

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

LIST OF WRITERS OF NEW ARTICLES IN THE SECOND EDITION.

INITIALS.	NAMES.
C. J. B.	Rev. CHARLES JAMES BALL, M.A., Chaplain of Lincoln's Inn.
E. R. B.	Rev. EDWARD RUSSELL BERNARD, M.A., Canon of Salisbury; formerly Fellow of Magdalen College, Oxford.
A. T. C.	Rev. ARTHUR THOMAS CHAPMAN, M.A., Fellow, Assistant Tutor, and Hebrew Lecturer of Emma- nuel College, Cambridge.
C. R. C.	Major CLAUDE REGNIER CONDER, B.E.; D.C.L., LL.D.
H. D.	Rev. HENRY DEANE, B.D., Prebendary of Winchester.
S. R. D.	Rev. SAMUEL ROLLES DRIVER, D.D., Regius Professor of Hebrew, and Canon of Christ Church, Oxford; Examining Chaplain to the Bishop of Southwell; formerly Fellow of New College, Oxford.
G. E.	Professor Dr. GEORG EBERS.
W. E.	Rev. WILLIAM ELWIN, M.A., Vicar of St. Andrew's, Worthing.
F.	Rev. JOHN MEE FULLER, M.A., Professor of Ecclesiastical History, King's College, London; Examining Chaplain to the Archbishop of Canterbury; Vicar of Bexley, R.D.; formerly Fellow of St. John's College, Cambridge.
E. C. S. G.	Rev. EDGAR CHARLES SUMNER GIBSON, M.A., Principal of Wells Theological College.
C. H.	Rev. CHARLES HOLE, M.A., Lecturer on Ecclesiastical History, King's College, London.
A. F. K.	Rev. ALEXANDER FRANCIS KIRKPATRICK, D.D., Regius Professor of Hebrew, Cambridge; Canon of Ely; Fellow of Trinity College, Cambridge; Examining Chaplain to the Bishop of Rochester.
J. B. L.	The late Right Rev. JOSEPH BARBER LIGHTFOOT, D.D., Bishop of Durham.
J. R. L.	Rev. JOSEPH RAWSON LUMBY, D.D., Lady Margaret Professor of Divinity, Cambridge; Ex- amining Chaplain to the Archbishop of York.

INITIALS.	NAMES.
D. S. M.	D. S. MARGOLIOUTH, M.A., Laudian Professor of Arabic in the University of Oxford.
E. N.	ÉDOUARD NAVILLE.
J. W. N.	Rev. JOHN WILLIAM NUTT, M.A., Rector of Harpsden; formerly Fellow of All Souls' College, Oxford.
T. G. P.	THEOPHILUS GOLDRIGE PINCHES, M.R.A.S., Of the Department of Egyptian and Assyrian Antiquities, British Museum.
A. P.	Rev. ALFRED PLUMMER, D.D., Master of University College, Durham.
A. R.	Rev. ARCHIBALD ROBERTSON, M.A., Principal of Hatfield Hall, Durham.
R., or H. E. R.	Rev. HERBERT EDWARD RYLE, B.D., Hulsean Professor of Divinity, Cambridge; Examining Chaplain to the Bishop of Ripon.
G. S.	Rev. GEORGE SALMON, D.D., Provost of Trinity College, Dublin.
W. S—y.	Rev. WILLIAM SANDAY, D.D., LL.D., Dean Ireland's Professor of Exegesis, Oxford.
J. E. S.	JOHN EDWIN SANDYS, Litt. D., Fellow and Tutor of St. John's College, and Public Orator in the University of Cambridge.
A. H. S.	Rev. ARCHIBALD HENRY SAYCE, LL.D., Professor of Assyriology, Oxford; Fellow of Queen's College, Oxford.
V. H. S.	Rev. VINCENT HENRY STANTON, M.A., Ely Professor of Divinity, Cambridge; Fellow of Trinity College, Cambridge; Examining Chaplain to the Bishop of Ely.
A. W. S.	Rev. ARTHUR WILLIAM STREANE, M.A., Fellow of Corpus Christi College, Cambridge.
S. S.—Sy.	The late Dr. S. SCHILLER-SZINESSY, of the University Library, Cambridge.
C. T.	Rev. CHARLES TAYLOR, D.D., Master of St. John's College, Cambridge.
H. F. T.	Rev. HENRY FANSHAWE TOZER, M.A., Fellow and Tutor of Exeter College, Oxford.
H. B. T.	Rev. HENRY BAKER TRISTRAM, D.D., F.L.S., Canon of Durham.
H. W. W.	Ven. HENRY WILLIAM WATKINS, D.D., Archdeacon and Canon of Durham; Examining Chaplain to the Bishop of Durham.
B. F. W.	Right Rev. BROOKE FOSS WESTCOTT, D.D., Bishop of Durham.
W.	Major-General Sir CHARLES WILLIAM WILSON, R.E., K.C.B., K.C.M.G., D.C.L., LL.D., F.R.S., Director-General of the Ordnance Survey.
C. H. H. W.	Rev. CHARLES HENRY HAMILTON WRIGHT, D.D., Ph.D., Vicar of St. John's, Liverpool.

PREFACE TO THE SECOND EDITION.

THE DICTIONARY OF THE BIBLE was commenced on a more restricted scale than was afterwards found to be consistent with the completion of the undertaking in a scholarlike and satisfactory manner. Accordingly, as the Work proceeded, it expanded into three volumes instead of two, as was originally intended, and an Appendix was added to supply the omissions and deficiencies of the earlier letters. The primary object of this new Edition was to insert these supplementary articles in their proper places in the first volume; but as this could only be done by re-setting the type, the opportunity was taken to revise the whole volume, and to re-write many of the more important articles. So large have been the additions that the new first volume exceeds the old, with the addition of the Appendix, by more than 550 pages; and it has therefore been found necessary to issue it in two parts. The second and third volumes, having been composed on a more extended and comprehensive scale than the earlier portion of the Dictionary, do not call for similar revision; and there is therefore no present intention of bringing out a new edition of them. Fortunately a large proportion of those articles on which recent research and criticism have thrown the strongest light, and concerning which the opinions of the best Biblical scholars have undergone the most noted change since the Dictionary was published, are contained in the first volume. We need only mention such subjects as Jerusalem, Assyria, Babylonia, Egypt, and the Hittites; the Gospels and the Acts of the Apostles; the Books of Genesis and Deuteronomy; the Epistle to the Hebrews, and the Gospel of St. John.

It remains only to explain briefly the alterations and improvements which have been made in the present edition. First, the articles on the Books of the Bible have been for the most part re-written, on a much more extensive scale than before. For example, the article on the "Acts of the Apostles," re-written by the late Bishop Lightfoot, occupies eighteen pages, compared with a page and a half in the former edition; that on the "Gospel of St. John," re-written by Archdeacon Watkins, fills twenty-five pages, compared with three in the former edition; that on the "Epistle to

the Galatians," re-written by Dr. Salmon, Provost of Trinity College, Dublin, comprises fourteen pages, compared with a page and a half in the former edition; the "Epistle to the Hebrews," re-written by Dr. Westcott, the present Bishop of Durham, fills fourteen pages, compared with five in the former edition; the article on "Deuteronomy," re-written by Professor Driver, occupies twenty-two pages, compared with five in the former edition; the article on the "Apocrypha," re-written by Professor Ryle of Cambridge, fills thirty-seven pages, compared with four in the former edition; to the article on the "Gospels" by the late Archbishop Thomson, a supplement by Professor Sanday, containing twenty-six pages, has been added. This list might easily be enlarged, but the instances named above will serve to show the pains and labour bestowed upon the new articles relating to the Books of the Bible.

Secondly, the revision of other articles has been entrusted to writers recognized as specialists in their respective departments. Thus, for example, the articles on Assyria and Babylonia have been re-written by Mr. Pinches, of the department of Assyrian Antiquities in the British Museum; those on Egypt by the eminent Egyptologist, M. Naville; and those on Natural History by Canon Tristram. The geographical articles by Sir George Grove, which were justly considered one of the most valuable portions of the original edition, have been revised, at his request, by Sir Charles Wilson and, in a few instances, by Major Conder. Sir Charles Wilson has also re-written the article on the topography of Jerusalem, and has added separate maps of the Tribes and of other countries, with fresh illustrations of the sites of places.

It would be impossible within the limits of a Preface to specify more particularly the assistance obtained in other departments. As each writer is alone responsible for his own contributions, differences of opinion must naturally occur, and the Editors could not take the liberty of altering materially articles thus signed, nor would it have been desirable, if it had been possible to do so. In the present state of Biblical criticism, it is better that different schools should be represented in the Dictionary than that strict uniformity should be secured. In the case of articles which have been revised by other writers, the initials of the original authors have been appended with those of the revisers, but the latter are alone responsible for the articles in their present form.

Few articles of any importance have been reprinted without material alteration. The chief exceptions are, for obvious reasons, those by the late Dean Stanley, and the present Bishop of Durham; though some of the articles by the latter writer have, at his request, been revised by Professor Ryle of Cambridge.

The meanings of the names of persons and places have been mostly given in accordance with the best authorities, but often with a real sense of the precariousness of the explanation. In some cases words of the Authorized Version now obsolete have been explained, and the readings of the Revised Version appended.

The Editors wish to acknowledge cordially the generous help given them from various quarters. To Professor Driver and the Rev. C. J. Ball they owe a careful revision of the Hebrew and other Semitic words in a large number of the articles. They are also indebted to the courtesy of Dr. Swete for sending them the early sheets of his smaller edition of the Septuagint, from which the readings are given in the present Work; and to the Palestine Exploration Fund for permission to use the surveys and drawings from which Sir Charles Wilson has constructed many of the maps and illustrations.

LONDON, *March*, 1893.

LIST OF WRITERS IN THE FIRST EDITION.

INITIALS.	NAMES.
H. A.	The late Very Rev. HENRY ALFORD, D.D., Dean of Canterbury.
H. B.	Rev. HENRY BAILEY, D.D., Hon. Canon of Canterbury; formerly Fellow of St. John's College, Cambridge.
H. B.	The late Rev. HORATIUS BONAR, D.D. <small>[The geographical articles, signed H. B., are written by Dr. Bonar: those on other subjects, signed H. B., are written by Mr. Bailey.]</small>
A. B.	Right Rev. ALFRED BARRY, B.D., Canon of Windsor; late Bishop of Sydney and Metropolitan of Australia.
W. L. B.	Rev. WILLIAM LATHAM BEVAN, M.A., Canon of St. David's; Examining Chaplain to the Bishop of St. David's; Vicar of Hay, Brecknockshire.
J. W. B.	The late Very Rev. JOSEPH WILLIAM BLAKESLEY, B.D., Dean of Lincoln.
T. E. B.	The late Rev. THOMAS EDWARD BROWN, M.A., Vice-Principal of King William's College, Isle of Man; formerly Fellow of Oriel College, Oxford.
R. W. B.	Von. ROBERT WILLIAM BROWNE, M.A., Archdeacon of Bath; Canon of Wells; Rector of Weston- super-Mare.
E. H. B.	The late Right Rev. EDWARD HAROLD BROWNE, D.D., Bishop of Winchester.
W. T. B.	The late Rev. WILLIAM THOMAS BULLOCK, M.A., Assistant Secretary of the Society for the Propagation of the Gospel in Foreign Parts.
S. C.	The late Rev. SAMUEL CLARK, M.A., Vicar of Bredwardine with Brobury, Hertfordshire.
F. C. C.	The late Rev. F. C. COOK, M.A., Canon of Exeter.
G. E. L. C.	The late Right Rev. GEORGE EDWARD LYNCH COTTON, D.D., Bishop of Calcutta and Metropolitan of India.
J. L. D.	Rev. JOHN LLEWELYN DAVIES, M.A., Vicar of Kirkby Lonsdale; formerly Fellow of Trinity College, Cambridge.

INITIALS.	NAMES.
G. E. D.	Rev. G. E. DAY, D.D., Lane Seminary, Cincinnati, Ohio.
E. D.	The late EMANUEL DEUTSCH, M.R.A.S.
W. D.	Rev. WILLIAM DRAKE, M.A., Chaplain to the Queen; Hon. Canon of Worcester; formerly Fellow of St. John's College, Cambridge.
E. P. E.	Rev. EDWARD PAROISSIEN EDDRUP, M.A., Prebendary of Salisbury; Vicar of Bremhill.
C. J. E.	Right Rev. CHARLES JAMES ELLICOTT, D.D., Bishop of Gloucester and Bristol.
F. W. F.	Ven. FREDERICK WILLIAM FARRAR, D.D., F.R.S., Archdeacon and Canon of Westminster; formerly Fellow of Trinity College, Cambridge.
J. F.	The late JAMES FERGUSSON, F.R.S., F.R.A.S.
E. S. Ff.	Rev. EDMUND SALUSBURY FFOULKES, B.D., Vicar of St. Mary the Virgin, Oxford.
W. F.	Right Rev. WILLIAM FITZGERALD, D.D., Bishop of Killaloe.
F. G.	The late Rev. FRANCIS GARDEN, M.A., Subdean of Her Majesty's Chapels Royal.
F. W. G.	Rev. FREDERICK WILLIAM GOTCH, LL.D., President of the Baptist College, Bristol.
G.	Sir GEORGE GROVE, D.C.L., Director of the Royal College of Music.
H. B. H.	Rev. H. B. HACKETT, D.D., Professor of Biblical Literature, Newton, Massachusetts.
E. H—s.	The late Rev. ERNEST HAWKINS, B.D., Prebendary of St. Paul's; Secretary of the Society for the Propagation of the Gospel in Foreign Parts.
H. H.	Rev. HENRY HAYMAN, D.D., Hon. Canon of Carlisle; Rector of Aldingham.
A. C. H.	Right Rev. Lord ARTHUR CHARLES HERVEY, D.D., Bishop of Bath and Wells.
J. A. H.	The late Ven. JAMES AUGUSTUS HESSEY, D.C.L., Archdeacon of Middlesex.
J. D. H.	Sir JOSEPH D. HOOKER, K.C.B., F.R.S.
J. J. H.	The late Rev. JAMES JOHN HORNSBY, M.A., Fellow of Brasenose College, Oxford; Principal of Bishop Cosin's Hall; Tutor in the University of Durham.
W. H.	Rev. WILLIAM HOUGHTON, M.A., F.L.S., Rector of Preston on the Weald Moors, Salop.
J. S. H.	The late Very Rev. JOHN SAUL HOWSON, D.D., Dean of Chester.
E. H.	Rev. EDGAR HUXTABLE, M.A., Prebendary of Wells.

INITIALS.	NAMES.
W. B. J.	Right Rev. WILLIAM BASIL JONES, D.D., Bishop of St. David's.
A. H. L.	Right Hon. AUSTEN HENRY LAYARD, G.C.B., D.C.L.
S. L.	Rev. STANLEY LEATHES, D.D., Professor of Hebrew, King's College, London; Prebendary of St. Paul's; Rector of Much Haddam.
J. B. L.	The late Right Rev. JOSEPH BARBER LIGHTFOOT, D.D., Bishop of Durham.
D. W. M.	Rev. D. W. MARKS, Professor of Hebrew in University College, London.
F. M.	Rev. FREDERICK MEYRICK, M.A., Prebendary of Lincoln; Rector of Blickling; formerly Fellow of Trinity College, Oxford.
Oppert.	Professor OPPERT, of Paris.
E. R. O.	Rev. EDWARD REDMAN ORGER, M.A., Vicar of Hougham.
T. J. O.	The late Ven. THOMAS JOHNSON ORMEROD, M.A., Archdeacon of Suffolk; formerly Fellow of Brasenose College, Oxford.
J. J. S. P.	Right Rev. JOHN JAMES STEWART PEROWNE, D.D., Bishop of Worcester.
T. T. P.	Ven. THOMAS THOMASON PEROWNE, B.D., Archdeacon of Norwich; Examining Chaplain to the Bishop of Norwich; Rector of Redenhall.
H. W. P.	Rev. HENRY WRIGHT PHILLOTT, M.A., Canon of Hereford.
E. H. P.	The late Very Rev. EDWARD HAYES PLUMPTRE, M.A., Dean of Wells.
E. S. P.	The late EDWARD STANLEY POOLE, M.R.A.S.
R. S. P.	REGINALD STUART POOLE, LL.D., Keeper of Coins, British Museum; Professor of Archæology in University College, London; Corresponding Member of the Institute of France.
J. L. P.	The late Rev. J. L. PORTER, M.A.
C. P.	Rev. CHARLES PRITCHARD, M.A., F.R.S., Savilian Professor of Astronomy, Oxford; Fellow of New College, Oxford; formerly Fellow of St. John's College, Cambridge.
C. R.	Rev. GEORGE RAWLINSON, M.A., Canon of Canterbury; Rector of All Hallows, London.
H. J. R.	The late Rev. HENRY JOHN ROSE, B.D., Rector of Houghton Conquest, Bedfordshire; formerly Fellow of St. John's College, Cambridge.
W. S.	The late Rev. WILLIAM SELWYN, D.D., Lady Margaret Professor of Divinity, Cambridge; Canon of Ely.

INITIALS.	NAMES.
W. S.	Sir WILLIAM SMITH, D.C.L., LL.D., Formerly Classical Examiner in the University of London.
A. P. S.	The late Very Rev. ARTHUR PENRHYN STANLEY, D.D., Dean of Westminster.
C. E. S.	Rev. CALVIN E. STOWE, D.D., Professor of Sacred Literature, Andover, Massachusetts.
J. P. T.	Rev. J. P. THOMPSON, D.D., New York.
W. T.	The late Most Rev. WILLIAM THOMSON, D.D., Archbishop of York.
J. F. T.	The late Rev. JOSEPH FRANCIS THRUPP, M.A., Vicar of Barrington; formerly Fellow of Trinity College, Cambridge.
S. P. T.	The late S. P. TREGELLES, LL.D.
H. B. T.	Rev. HENRY BAKER TRISTRAM, D.D., F.L.S., Canon of Durham.
E. T.	The late Hon. EDWARD T. B. TWISLETON, M.A.
E. V.	Rev. EDMUND VENABLES, M.A., Canon of Lincoln Cathedral.
B. F. W.	Right Rev. BROOKE FOSS WESTCOTT, D.D., Bishop of Durham.
C. W.	The late Right Rev. CHRISTOPHER WORDSWORTH, D.D., Bishop of Lincoln.
W. A. W.	WILLIAM ALDIS WRIGHT, M.A., Fellow of Trinity College, Cambridge.

PREFACE TO THE FIRST EDITION.

THE present Work is designed to render the same service in the study of the Bible as the Dictionaries of Greek and Roman Antiquities, Biography, and Geography have done in the study of the classical writers of antiquity. Within the last few years Biblical studies have received a fresh impulse; and the researches of modern scholars, as well as the discoveries of modern travellers, have thrown new and unexpected light upon the history and geography of the East. It has, therefore, been thought that a new Dictionary of the Bible, founded on a fresh examination of the original documents, and embodying the results of the most recent researches and discoveries, would prove a valuable addition to the literature of the country. It has been the aim of the Editor and Contributors to present the information in such a form as to meet the wants not only of theological students, but also of that larger class of persons who, without pursuing theology as a profession, are anxious to study the Bible with the aid of the latest investigations of the best scholars. Accordingly, while the requirements of the learned have always been kept in view, quotations from the ancient languages have been sparingly introduced, and generally in parentheses, so as not to interrupt the continuous perusal of the Work. It is confidently believed that the articles will be found both intelligible and interesting even to those who have no knowledge of the learned languages; and that such persons will experience no difficulty in reading the book through from beginning to end.

The scope and object of the Work may be briefly defined. It is a Dictionary of the *Bible* and not of *Theology*. It is intended to elucidate the antiquities, biography, geography, and natural history of the Old Testament, New Testament, and Apocrypha; but not to explain systems of theology, or discuss points of controversial divinity. It has seemed, however, necessary in a "Dictionary of the Bible" to give a full account of the Book, both as a whole and in its separate parts. Accordingly, articles are inserted not only upon the general subject, such as "Bible," "Old Testament," "New Testament," "Apocrypha," and "Canon," and upon the ancient Versions, as "Septuagint" and "Vulgate;" but also upon each of the separate books. These articles are naturally some of the most important in the Work, and occupy

considerable space, as will be seen by referring to "Genesis," "Isaiah," "Job," "Nehemiah," "Pentateuch," "Proverbs," and the Books of "Samuel."

The Editor believes that the Work will be found, upon examination, to be far more complete in the subjects which it professes to treat than any of its predecessors. No other Dictionary has yet attempted to give a complete list of the proper names occurring in the Old and New Testaments, to say nothing of those in the Apocrypha. The present Work is intended to contain *every name*, and, in the case of minor names, references to every passage in the Bible in which each occurs. It is true that many of the names are those of comparatively obscure persons and places; but this is no reason for their omission. On the contrary, it is precisely for such articles that a Dictionary is most needed. An account of the more important persons and places occupies a prominent position in historical and geographical works; but of the less conspicuous names no information can be obtained in ordinary books of reference. Accordingly many names, which have been either entirely omitted or cursorily treated in other Dictionaries, have had considerable space devoted to them; the result being that much curious and sometimes important knowledge has been elicited respecting subjects, of which little or nothing was previously known. Instances may be seen by referring to the articles "Ishmael, son of Nethaniah," "Jareb," "Jedidiah," "Jehosheba."

In the alphabetical arrangement the orthography of the Authorized Version has been invariably followed. Indeed the Work might be described as a Dictionary of the Bible, *according to the Authorized Version*. But at the commencement of each article devoted to a proper name, the corresponding forms in the Hebrew, Greek, and Vulgate are given, together with the variations in the two great manuscripts of the Septuagint, which are often curious and well worthy of notice. All inaccuracies in the Authorized Version are likewise carefully noted.

In the composition and distribution of the articles three points have been especially kept in view—the insertion of copious references to the ancient writers and to the best modern authorities, as much brevity as was consistent with the proper elucidation of the subjects, and facility of reference. To attain the latter object an explanation is given, even at the risk of some repetition, under every word to which a reader is likely to refer, since it is one of the great drawbacks in the use of a Dictionary to be referred constantly from one heading to another, and frequently not to find at last the information that is wanted.

Many names in the Bible occur also in the classical writers, and

are therefore included in the Classical Dictionaries already published. But they have in all cases been written anew for this work, and from a Biblical point of view. No one would expect in a Dictionary of the Bible a complete history of Alexandria or a detailed life of Alexander the Great, simply because they are mentioned in a few passages of the Sacred Writers. Such subjects properly belong to Dictionaries of Classical Geography and Biography, and are only introduced here so far as they throw light upon Jewish history, and the Jewish character and faith. The same remark applies to all similar articles, which, far from being a repetition of those contained in the preceding Dictionaries, are supplementary to them, affording the Biblical information which they did not profess to give. In like manner it would obviously be out of place to present such an account of the plants and animals mentioned in the Scriptures, as would be appropriate in systematic treatises on Botany or Zoology. All that can be reasonably required, or indeed is of any real service, is to identify the plants and animals with known species or varieties, to discuss the difficulties which occur in each subject, and to explain all allusions to it by the aid of modern science.

In a Work written by various persons, each responsible for his own contributions, differences of opinion must naturally occur. Such differences, however, are both fewer and of less importance than might have been expected from the nature of the subject; and in some difficult questions—such, for instance, as that of the “Brethren of our Lord”—the Editor, instead of endeavouring to obtain uniformity, has considered it an advantage to the reader to have the arguments stated from different points of view.

An attempt has been made to ensure, as far as practicable, uniformity of reference to the most important books. In the case of two works of constant occurrence in the geographical articles, it may be convenient to mention that all references to Dr. Robinson’s *Biblical Researches* and to Professor Stanley’s *Sinai and Palestine* have been uniformly made to the second edition of the former work (London, 1856, 3 vols.), and to the fourth edition of the latter (London, 1857).

The Editor cannot conclude this brief explanation without expressing his obligations to the Writers of the various articles. Their names are a sufficient guarantee for the value of their contributions; but the warm interest they have taken in the book, and the unwearied pains they have bestowed upon their separate departments, demand from the Editor his grateful thanks. There is, however, one Writer to whom he owes a more special acknowledgment. Mr. George Grove of Sydenham, besides contributing the articles to which his initial is attached, has rendered the Editor

important assistance in writing the majority of the articles on the more obscure names in the First Volume, in the correction of the proofs, and in the revision of the whole book. The Editor has also to express his obligations to Mr. William Aldis Wright, Librarian of Trinity College, Cambridge, and to the Rev. Charles P. Phinn of Chichester, for their valuable assistance in the correction of the proofs, as well as to Mr. E. Stanley Poole for the revision of the Arabic words. Mr. Aldis Wright has likewise written in the Second and Third Volumes the more obscure names to which no initials are attached.

In consequence of the great importance of many of the subjects contained in the latter half of the alphabet,—of which “Miracles,” “Noah,” “Palestine,” “Pentateuch,” “Prophecy,” “Versions,” and “Vulgate” may be mentioned as specimens,—it has been found necessary to extend the work to three volumes, instead of comprising it in two, as originally intended. The usefulness of many Encyclopædias and Dictionaries has been sacrificed by compressing into narrow limits the later letters; and it is believed that the extension of the present work will add greatly to its value. It has also enabled the Editor to give, at the end of the Third Volume, an APPENDIX to Volume I., containing many important articles on Natural History as well as some subjects omitted in the First Volume, such as “Antichrist,” “Baptism,” and “Church.”

It is intended to publish shortly an Atlas of Biblical Geography, which, it is hoped, will form a valuable supplement to the Dictionary.

WILLIAM SMITH.

LONDON, *November*, 1863.

SOME ABBREVIATIONS.

A. V. = Authorized Version ; R. V. = Revised Version.

LXX. = Greek Version of the Old Testament.

A. = Codex Alexandrinus.

B. = Codex Vaticanus.

Σ. = Codex Sinaiticus.

T.⁷ = 7th edition of Tischendorf's LXX.

PE., or PEF. *Mem.* or *Qy. Stat.* = Palestine Exploration Fund, Memoir, or Quarterly Statement.

BIBLICAL ANTIQUITIES, BIOGRAPHY, GEOGRAPHY, AND NATURAL HISTORY.

A

A and α. [ALPHA.]

A'ALAR. [ADDAN.]

AARON (אַהֲרֹן; 'Aapón; Aaron [derivation unknown; connected fancifully by Rabbinic etymology with אִמְרָן, his mother having been pregnant with him at the time of Pharaoh's edict (Ex. i. 16); by Gesenius thought perhaps to mean *mountaineer*, as though connected with אָרָא; by Sayce connected with the Assyrian *aharu*, to send]. He was the son of Amram (Ex. vi. 20 [AMRAM]), the son of Kohath and Jochebed (Kohath's sister); he was three years older than Moses (Ex. vii. 7), but younger than his sister Miriam (Num. xxi. 59). He was a Levite, and as the first-born would naturally be the priest of the household, even before any special appointment by God. Of his early history we know nothing, although, by the way in which he is first mentioned in Ex. iv. 14, as "Aaron the Levite," it would seem as if he had been already to some extent a leader in his tribe. All that is definitely recorded of him at this time is, that in the same passage he is described as one "who could speak well." Judging from the acts of his life, we should suppose him to have been, like many eloquent men, a man of impulsive and comparatively unstable character, leaning almost wholly on his brother; incapable of that endurance of loneliness and temptation which is an element of real greatness; but at the same time earnest in his devotion to God and man, and therefore capable of sacrifice and of discipline by trial.

His first office was to be the "Prophet," i.e. (according to the proper meaning of the word) the Interpreter and "Mouth" (Ex. iv. 16) of his brother, who was "slow of speech;" and accordingly he was not only the organ of communication with the Israelites and with Pharaoh (Ex. iv. 30, vii. 2), but also the actual instrument of working most of the miracles of the Exodus (see Ex. vii. 19, &c.). Thus also on the way to Mount Sinai, during the battle with Amalek, Aaron is mentioned with Hur, as staying up the weary hands of Moses, when they were lifted up for the victory of Israel (not in prayer, as is sometimes explained, but) to bear the rod

AARON

of God (see Ex. xvii. 9). Through all this period he is only mentioned as dependent upon his brother, and deriving all his authority from him. The contrast between them is even more strongly marked on the arrival at Sinai. Moses at once acts as the mediator (Gal. iii. 19) for the people, to come near to God for them, and to speak His words to them. Aaron only approaches, with Nadab and Abihu and the seventy elders of Israel, by special command, near enough to see God's glory, but not so as to enter His immediate presence. Left then, on Moses' departure, to guide the people, he is tried for a moment on his own responsibility, and he fails not from any direct unbelief on his own part, but from a weak inability to withstand the demand of the people for visible "gods to go before them." Possibly it seemed to him prudent to make an image of Jehevah, in the well-known form of Egyptian idolatry (Apis or Mnevis), rather than to risk the total alienation of the people to false gods; and his weakness was rewarded by seeing a "feast of the Lord" (Ex. xxxii. 5) degraded to the lowest form of heathenish sensuality, and knowing, from Moses' words and deeds, that the covenant with the Lord was utterly broken. There can hardly be a stronger contrast with this weakness, and the self-convicted shame of his excuse, than the burning indignation of Moses, and his stern decisive measures of vengeance; although beneath these there lay an ardent affection, which went almost to the verge of presumption in prayer for the people (Ex. xxxii. 19-34), and gained forgiveness for Aaron himself (Dent. ix. 20).

It is not a little remarkable, that immediately after this great sin, and almost as though it had not occurred, God's fore-ordained purposes were carried out in Aaron's consecration to the new office of the high-priesthood. Probably the fall and the repentance from it may have made him one "who could have compassion on the ignorant and them who are out of the way, as being himself also compassed with infirmity." The order of God for the consecration is found in Ex. xxix., and the record of its execution in Lev. viii.; and the delegated character of the Aaronic priesthood is clearly seen by the fact that, in this its inauguration, the priestly office is borne

B

by Moses, as God's truer representative (see Heb. vii.).

The form of consecration resembled other sacrificial ceremonies in containing, first, a sin-offering, the form of cleansing from sin and reconciliation [SIN-OFFERING]; a burnt-offering, the symbol of entire devotion to God of the nature so purified [BURNT-OFFERING]; and a meat-offering, the thankful acknowledgment and sanctifying of God's natural blessings [MEAT-OFFERING]. It had, however, besides these, the solemn assumption of the sacred robes (the garb of righteousness), the anointing (the symbol of God's grace), and the offering of the ram of consecration, the blood of which was sprinkled on Aaron and his sons, as upon the altar and vessels of the ministry, in order to sanctify them for the service of God. The former ceremonies represented the blessings and duties of the man; the latter the special consecration of the priest.*

The solemnity of the office, and its entire dependence for sanctity on the ordinance of God, were vindicated by the death of Nadab and Abihu, for "offering strange fire" on the altar, and apparently (see Lev. x. 9, 10) for doing so in drunken recklessness. The checking of his sorrow by Aaron, so as at least to refrain from all outward signs of it, would be a severe trial to an impulsive and weak character, and a proof of his being lifted above himself by the office which he held.

From this time the history of Aaron is almost entirely that of the priesthood, and its chief feature is the great rebellion of Korah and the Levites against his sacerdotal dignity, united with that of Dathan and Abiram and the Reubenites against the temporal authority of Moses [KORAH]. The true vindication of the reality of Aaron's priesthood was, not so much the death of Korah by the fire of the Lord, as the efficacy of his offering of incense to stay the plague, by which he was seen to be accepted as an Intercessor for the people. The blooming of his rod which followed was a miraculous sign, visible to all and capable of preservation, of God's choice of him and his house.

The only occasion on which his individual character is seen, is one of presumption, prompted as before chiefly by another; and, as before, speedily repented of. The murmuring of Aaron and Miriam against Moses, if partly directed against the marriage of Moses with an Ethiopian, clearly proceeded from their trust, the one in his own priesthood, the other in her prophetic inspiration, as equal commissions from God (Num. xii. 2). It seems to have vanished at once before the declaration of Moses' exaltation above all prophecy and priesthood, except that of One Who was to come; and, if we may judge from the direction of the punishment, to have originated mainly with Miriam. On all other occasions Aaron is spoken of as acting with Moses in the guidance of the people. Leaning, as he seems to have done, wholly on him, it is not strange that he should have shared his sin at Meribah, and its punishment [MOSES] (Num. xx. 10-12). As

* It is noticeable that the ceremonies of the restoration of the leper to his place, as one of God's people, bear a strong resemblance to those of consecration. See Lev. xiv. 10-32.

that punishment seems to have purged out from Moses the tendency to self-confidence which tainted his character, so in Aaron it may have destroyed that idolatry of a stronger mind, into which a weaker one, once conquered, is apt to fall. Aaron's death seems to have followed very speedily. It took place on Mount Hor, after the transference of his robes and office to Eleazar, who alone with Moses was present at his death, and performed his burial (Num. xx. 28). This mount is still called the "Mountain of Aaron." [HOR.]

The wife of Aaron was Elisheba (Ex. vi. 23). She bore him four sons. Nadab and Abihu predeceased him (see above). Two survived him, Eleazar and Ithamar. The high-priesthood descended to the former and to his descendants until the time of Eli, who, although of the house of Ithamar, received the high-priesthood (see Joseph. *Ant.* v. 11, viii. 1, § 3), and transmitted it to his children; with them it continued till the accession of Solomon, who took it from Abiathar, and restored it to Zadok (of the house of Eleazar), so fulfilling the prophecy of 1 Sam. ii. 30. [A. B.]

The Rabbinic view of Aaron is highly eulogistic. It will be found summed up in Hamburger, *Real-Encyclopädie f. Bibel u. Talmud*,² s. n. Rabbinic teaching finds depicted in Mal. ii. 6, the work and character of one who died "by the kiss of God." [F.]

AARONITES, THE (אַהֲרֹנִי; B. δ [A. of] 'Ααρών; stirps Aaron, *Aaronitic*). Descendants of Aaron, and therefore priests, who, to the number of 3700 fighting men, with Jehoiada the father of Benaiah at their head, joined David at Hebron (1 Ch. xii. 27). Later on in the history (1 Ch. xxvii. 17) we find their chief was Zadok, who in the earlier narrative is distinguished as "a young man mighty of valour." They must have been an important family in the reign of David to be reckoned among the tribes of Israel. [W. A. W.]

AB (אַב, father), an element in the composition of many proper names, sometimes a title of God, sometimes not (see Nestle, *Die Israelit. Eigennamen*, p. 173, &c. Cp. אַבְרָהָם.) Abba is the Chaldaic form, the syllable affixed giving the emphatic force of the definite article. The conception of God as Ab forms one of the principal doctrines common to Judaism and Christianity. [ABBA.] [F.]

AB. [MONTHS.]

AB'ACUC, 2 Esd. i. 40. [HABAKKUK.]

ABAD'DON (אַבְדֹּן, destruction) in the Hagiographa of the O. T. the poetical name for the place of the dead (in Job xvi. 6 and in Prov. xv. 11 it is parallel with Sheol; in Ps. lxxviii. 12 with the grave; in Job xxviii. 22 with death), and personified in Job xxviii. 22 (cp. a similar personification of a place in the personification of the "heavens" in Dan. iv. 23). In Rev. ix. 11 it is the name of "the angel of the abyss" (R. V.), and the Greek equivalent Ἀπολλών (APOLLYON) is given in explanation of this "king of the locusts upon the earth" (Rev. ix. 3-11). The Rabbis gave the name Abaddon to the lowest chamber of hell (see Schöttgen, *Hor. Hebr.* in Rev. i. c.), and the

Talmud personified "the angel of the abyss" under the title Dumah (Buxtorf, *Lex. Chald. et Talm.*; Hamburger, *R.E.* 2 a. v.). [F.]

ABADI'AS (B. 'Αβαδίας; *Abdias* [v. 38]). OBADIAH, the son of Jehiel (1 Esd. viii. 35).

[W. A. W.] [F.]

ABAG'THA (אַבְגָּתָה; *Abgatha*), one of the seven eunuchs in the Persian court of Ahasuerus (Esth. i. 10). In the LXX. the names of these eunuchs are different. The word contains the same root which we find in the Persian names *Biztha* (Esth. i. 10), *Bizthan* (Esth. ii. 21), *Bizthana* (Esth. vi. 2), and *Bagoas*. The etymology of all these names is quite uncertain (Keil, and Oettli in Strack u. Zöckler's *Kyf. Kom.* in loco). Bohlen explains it by *bagadāta*, "given by fortune," from *baga*, fortune, the sun; Kysel-Berthean (*Kyf. Ezeg. Hdb.* z. A. T., 'Ester' p. 389) = god's gift. [W. A. W.] [F.]

ABANA (אֲבָנָה; 'Abana; B. 'ApBard [superscr. B.?, 'AvaBard, Baime]; A. NaBard; Abana; R. V. *Abanah*; R. V. marg. *Amanah*), one of the "rivers (נָהָרִים) of Damascus" (2 K. v. 12). Gesenius (*Thes.* 116) supposes Abana to be a commutation for AMANA by an interchange of the labials א and מ: it may be a dialectic or a provincial difference. See also Keil's *Bb. der Könige*, p. 368. Amana might mean "constant" (comp. אֲמָן), as said of water in Is. xxxiii. 16 and Jer. xv. 18). The rivers of Damascus are its one great abiding charm, and every Damascene loves them passionately. Some distance above Damascus the *Barada* (Χρυσόπιδας of the Greeks) is split up into several streams, which flow through the city under different names, and which are supposed to be of various degrees of excellence. The stream whose water is most prized is the *Nahr Abanias* (cp. the *Amanah* of Schwarz, p. 54), and this is doubtless the Abana of the text (Dr. Wright, in *Leisure Hour*, 1874, p. 284). In the Arabic Version of the passage—the date of which has been fixed by Rüdiger as the 11th cent.—Abana

is rendered by *Barda*, بَرْدَى, and one of the streams flowing through the city is now called *Nahr Barada*. Another of the seven principal streams is the *Nahr Taúra*, a name which is found in the Arabic Version of the Bible instead of Pharpar. Benjamin of Tudela (*E. T.* 90) apparently identifies Pharpar with the same stream. Naaman's interrogation in 2 K. v. 12: "Are not Abana and Pharpar, rivers of Damascus, better than all the waters of Israel?" is something more than pride of country; for the waters of the Abana (*Nahr Abanias*) are clear and sparkling, whilst those of the Jordan and Kishon are tepid and turbid.

The *Barada* rises in the Antilibanus near *Zeb-dány*, at about 23 miles from the city, and 1149 feet above it. In its course it passes the site of the ancient Abila, and receives the waters of *Ain Fijeh*, one of the largest springs in Syria. This was long believed to be the real source of the *Barada*, according to the popular usage of the country, which regards the most copious

fountain, not the most distant head, as the origin of a river. We meet with other instances of the same mistake in the case of the Jordan and the Orontes [AIN]; it is to Dr. Robinson that we are indebted for its discovery in the present case (Rob. iii. 477). After flowing through Damascus the *Barada* runs across the plain, leaving the remarkable Assyrian or perhaps Hittite ruin *Tell es-Sulahiyyeh* on its left bank, till it loses itself in the lake or marsh *Bahret el-Khlyeh*. Mr. Porter calculates that 14 villages and 150,000 souls are dependent on this important river. For the course of the *Barada* see Porter, vol. i. ch. v.; *Journ. of S. Lit.*, N. S. viii.; Rob. iii. 446-7. Lightfoot (*Cent. Chor.* iv.) and Gesenius (*Thes.* 116) quote the name אֲבָנִי as applied in the Lexicon *Arach* to the Amana; it is also found in the *Baba Bathra*, 74 c; Schwarz, p. 54. [G.] [W.]

ABA'RIM (Milton accents Ab'arim), the "mount," or "mountains of" (always with the definite article, הַר הַעֲבָרִים, or הָרֵי הָעֵבֶר, ὄρος τὸ Ἀβαρίμ, &c., or ἐν τῷ ὄρει τῷ Ἰορδάνου, = the mountains of the further parts, or possibly, of the fords), a mountain or range of highlands on the east of the Jordan, in the land of Moab (Deut. xxxii. 49), facing Jericho, and forming the eastern wall of the Jordan valley at that part. Josephus (*Ant.* iv. 8, § 48) has ἐν τῷ ὄρει τῷ Ἀβαρίμ; Euseb. (*OS.* p. 237, 4) Ἀβαρίμ. Its most elevated spot was "the Mount Nebo, 'head' of the 'Piagah," from which Moses viewed the Promised Land before his death. There is nothing to prove that the Abarim were a range or tract of any length, but the mention of Ije-Abarim ("heaps of A.") in Num. xxxiii. 44, on the south frontier of Moab, seems to indicate that the name was applied to the whole range of hills on the eastern side of the Dead Sea; it must, too, be remembered that a word derived from the same root as Abarim, viz. עָבַר, is the term commonly applied to the whole of the country on the east of Jordan.

These mountains are mentioned in Num. xvii. 12, xxxiii. 47, 48, and Deut. xxxii. 49; also probably in Jer. xxii. 20, where the word is rendered in the A. V. "passages," in R. V. "Abarim."

The mountains of Abarim have recently been surveyed, and it is now possible to identify with considerable accuracy the places mentioned in connexion with them. Moses probably took his view of the Promised Land from some point on the ridge of *Jebel Neba*, which runs out west from the Moabite plateau, sinking gradually,—at first a broad brown field of arable land, then a flat top crowned by a ruined cairn, then a narrower ridge ending in the summit called *Siaghah*, whence the slopes fall steeply on all sides. The name *Neba* (Nebo) applies to the flat top with the cairn, which has an altitude of 2644 feet; and *Tal'at es-Sufa*, which may contain a reminiscence of the "field of Zophim" (Num. xxiii. 14), to the ascent leading up to the ridge from the north; the word *Siaghah*,* too, is possibly the modern form of "Seath," the burial-place of Moses, which is substituted for Nebo in the Targum of Onkelos (Num. xxxii. 3).

* The Keri, with the Targum Jonathan and the Syriac Version, has *Amanah*.

* Merrill, however (*East of Jordan*, p. 246), does not believe in the existence of the name *Siaghah*.

Ashdod-pisgah is probably 'Ayūn Mūsā, "the springs of Moses" [ASHDOTH-PISGAH], and the camp of the Israelites "in the mountains of Abarim, before Nebo" (Num. xxxiii. 47); the top of Pisgah in Num. xxi. 20 may be placed close to *Jebel Nebo* on the plain between Medeba and Heshbon. Capt. Conder (*Heth and Moab*, pp. 142-4) has identified "the top of Peor" (Num. xxxiii. 28) with a narrow spur which runs out to *Minyeh*, north of the *Zerka M'ain*, and "the high places of Baal" (Num. xxii. 41) with the ridge of *Mastubiye* (p. 141). A good account of this interesting district is given by Capt. Conder (*Heth and Moab*, pp. 128-145), who found some interesting groups of rude stone monuments, which he supposes to have been connected with the sacrifices of Balaam and the idolatrous worship of Moab. See also Merrill, *East of the Jordan*, 240-252; Tristram, *Land of Moab*, 325-330; Paine, *American Pal. Exp. Soc.*, 3rd Stat., January 1875. [G.] [W.]

AB'BA (אַבָּא, *stat. emph.*; 'Aββā: see AB). The West-Aramaic equivalent of the Greek ὁ πατήρ (Mk. xiv. 36; Rom. viii. 15; Gal. iv. 6); perhaps a liturgical formula originating among the Jews of Palestine after they had become acquainted with the Greek language, and expressing emphasis by repetition of the same idea. If so, it illustrates that fusion of Jew and Greek which prepared the way for the preaching of the Gospel to the heathen (Bp. Lightfoot on *Gal.* i. c.). [F.]

AB'DA (אַבְדָּא, *servant*; or, as in Phoenician, *servant of Him*: see Renan, *Des Noms théophores apocopes*, in 'Revue d. Études Juives', v. p. 165. 1. Father of Adoniram (1 K. iv. 6; B. 'Ephrā. A. 'Aβā; Abda). 2. Son of Shammua (Neh. xi. 17; B. 'Iwβā; N. 'Aβdās), called Obadiah in 1 Ch. ix. 16 (B. 'Aβdeia, A. 'Oβdā; Obda). [W. A. W.] [F.]

AB-DEE'L (אַבְדֵּעַל, *Abdeel*), father of Shemariah (Jer. xxxvi. 20; LXX. omits). [W. A. W.]

ABDI' (אַבְדִּי, *my servant*; or, *servant of Him*, Renan [ABDA]. Olshausen [*Lehrb.* p. 613] prefers = אַבְדִּי. 1. A Merarite of the time of David and ancestor of Ethan the singer (1 Ch. vi. 44; B. 'Aβde, A. -i; Abdi). 2. The father of Kish. A Merarite of the time of Hezekiah (2 Ch. xxix. 12). From a comparison of 2 with 1, it would seem that the Levitical families repeated ancestral names, or that such names became the names of families and not of individuals. 3. One of the Bene-Elam in the time of Ezra, who had married a "strange" (i.e. foreign) wife (Ezra x. 26; Bn. 'Aβde, A. -ia). [W. A. W.] [F.]

ABDIAS. The prophet Obadiah (2 Esd. i. 39). [W. A. W.]

ABDI-EL (אַבְדִּי־אֵל, *servant of God*; A. 'Aβdehā, B. 'Aβdehā; Abdiel), son of Guni (1 Ch. v. 15). The name corresponds to the Arabic Abdallah. Milton (*Paradise Lost*, v. 805, 896) applies it to "the Seraph faithful found among the faithless, faithful only he." [W. A. W.] [F.]

AB'DON (אַבְדֹּן, *servile*; B. 'Aβdōn, A. Aaβdōm; Abdon). 1. The eleventh out of the twelve judges (Judg. xii. 13, 15). He judged Israel eight years, and had forty sons and thirty

sons' sons, who rode, in token of their rank, upon asses. He is not to be confounded with BEDAN, in 1 Sam. xii. 11. 2. Son of Shashak (1 Ch. viii. 23; B. 'Aβašōn, A. 'Aβšōn). 3. First-born son of Jeiel, father of Gibeon (1 Ch. viii. 30, B. 'Aβalōn; ix. 36, Bn. 'Aβašōn, A. 'Aβšōn), i.e. the head of the house of Gibeon. 4. Son of Micah, a contemporary of Josiah (2 Ch. xxxiv. 20; A. 'Aβšōn, B. 'Aβšōdōm), called Achbor, son of Micah, in 2 K. xxii. 12.

[W. A. W.] [F.]

AB'DON (אַבְדֹּן; A. 'Aβdōn, B. Aaβdōn in Josh. i. c., 'Aβapōn in 1 Ch. i. c.; Abdon), i.e. *servile*, a city in the tribe of Asher, given to the Gershonites (Josh. xxi. 30; 1 Ch. vi. 74). No place of this name appears in the list of the towns of Asher (Josh. xix. 24-31); but instead we find (v. 28) עֲבְרֹן, "Hebron," which is the same word, with the change frequent in Hebrew of ʾ for ʿ. Indeed many MSS. have Abdon in Josh. xxi. 28 (Ges. p. 980; Winer, s. v.); but, on the other hand, all the ancient Versions retain the ʾ (e.g. Vulg. *Abram*) except B., which has 'EAbōn (A. 'Aβpōn; 17 MSS. have 'Eβpōn). Identified by Guérin (*Galilee*, ii. 35, 36) with 'Abdeh, small ruins east of ez-Zib (Achziv), on a low hill overlooking the plain of Acre (*P. F. Mem.* i. 170). There are also ruins called 'Abdūn, close to Dor. The name occurs in Arabia Petraea, and is written in the older itineraries 'Eβdōn. [G.] [W.]

ABED-NEGO (אַבְדֵּן-נֶגוֹ, or [once in Dan. iii. 29] נְגוֹ 'N; 'Aβdenagō; Abdenago), i.e. *servant of Nego*, a copyist's mistake for NEBO, the Babylonian name of the planet Mercury, worshipped as the scribe and interpreter of the gods (Ges. *Theol.*; Duncker-Abbott, *Hist. of Antiq.* i. 268; Sayce, *Hibbert Lectures*, p. 115). A statue of the god, found at Nimrud, is in the British Museum (see Hommel, *Geschichte Babylonians-Assyriens*, p. 629). Abed-nebo occurs (B.C. 683) in a "registry" tablet from the record office of the Assyrian king, as the name of a witness to a deed of sale (see *Speaker's Commentary* on Daniel [1881], p. 243). Compounds with Abed are not infrequent in Babylonian names (see Schrader, *KAT.*, p. 430). Abednego (or -nebo) was the Babylonian name given to Azariah (Dan. i. 7), one of the three friends of Daniel, miraculously saved from the burning fiery furnace (Dan. iii.). [AZARIAH, No. 10.] [F.]

A'BEL (אַבֶּל = meadow, according to Gesenius, who derives it from a root signifying moisture like that of grass), the name of several places in Palestine:—

1. A'BEL-BETH-MA'ACHAH (עֵבֶר בֵּית מַאֲכָה) see below and MAACHAH; 2 Sam. x. 15, A. 'Aβēl u. Βηθμααχά, B. 'Aβēl tēn Βαθμααχά; Aβela et Bethmaacha: 1 K. xv. 20, A. 'Aβēl oukou [sic] Μααχά, B. 'Aβελμαδ; Abēl domum-Maacha: 2 K. xv. 29, B. tēn 'Aβēl καὶ tēn Θαμααχά, A. τ. Καβēl κ. τ. Βερμααχά; Abēl domum-Maacha: R. V. Abēl-beth-Maachah, a town

• The *Ain* is here rendered by H. The H in the well-known Hebron represents Ch. Usually *Ain* is not expressed in the Authorized Version.

• The Chaldee Targum frequently renders Abel by *Miskor*, a level spot or plain generally. Cp Lagarde, *Uebersicht üb. d. im Aram., Arab., u. Hebr. übl. Bildung d. Nomina*, pp. 45, 75.

of some importance (πόλις καὶ μητρόπολις, "a city and a mother in Israel," 2 Sam. xx. 19), in the extreme N. of Palestine; twice named with other places in the order from north to south; once Ijon, Dan, Abel, and all Cinneroth; and again Ijon, Abel, Janoah, Kedesh, Hazor; and as such falling an early prey to the invading kings of Syria (1 K. xv. 20) and Assyria (2 K. xv. 29). In the parallel passage, 2 Ch. xvi. 4, the name is changed to Abel Maim, אֲבֵל מַיִם "N = "Abel on the waters."

Here Sheba was overtaken and besieged by Joab (2 Sam. xx. 14, 15); and the city was saved by the exercise on the part of one of its inhabitants of that sagacity for which it was proverbial (r. 18). In ex. 14 and 18 it is simply Abel, and in r. 14 is apparently distinguished from Beth-maacha: the full name may possibly have been Abel near Beth-maacha. It was possibly a colony of, and derived its name from, the small Aramean kingdom of Maacha. Josephus (*Ant.* vii. 12, § 5) gives the form 'Αβελ-αδρῆ, and apparently places it near the northern boundary of Israel. It is probably the modern *Abil*, or *Abil-el-Kamh*, a small Christian village on the left bank of the *Nahr Bareigit*, which flows from the *Merj 'Aynān*. The village is situated on an isolated oval hill that rises above a plain of rich basaltic soil which produces fine wheat, whence the name *el-Kamh*; there are traces of old foundations and a spring (*P. F. Mem.* i. 83, 107). It possibly derives its name Abel Maim from the stream that rushes past the western slope of the mound, or from the neighbouring *Merj 'Aynān*, which is rich in springs. Stanley (*S. and P.* p. 390, note) places it to the south in the marshy region of Lake Huleh; Eusebius and Jerome between Paezus and Damascus.

2. 'ΑΒΕΛ-ΜΑ'ΙΜ (אֲבֵל מַיִם; A. 'Αβελμαίμ, B. -μαί; *Abelmaim*). 2 Ch. xvi. 4. [ABEL. 1.]

3. 'ΑΒΕΛ-ΜΙΖ'ΡΑΙΜ (Μιζραϊμ), אֲבֵל מִצְרַיִם according to the etymology of the text, the mourning of Egypt, πένθος Αἰγύπτου, *Planctus Aegypti* (this meaning, however, requires a different pointing, אֲבֵל מִצְרַיִם for אֲבֵל מִצְרַיִם): the name given by the Canaanites to the floor of Atad, at which Joseph, his brothers, and the Egyptians made their mourning for Jacob (Gen. l. 11). It was מִצְרַיִם, "beyond" Jordan, an expression used for either east or west of the river, according to the position of the speaker. Jerome identifies it with Beth-Hogla (now *Ain Hajla*), near the river, on its west bank. No authority is given for this identification, which necessitates the carriage of Jacob's body by a long circuitous route through Moab and round the north end of the Dead Sea to Hebron. A more natural position would be some station on the direct caravan road from Egypt to Hebron, possibly near the territory of the Canaanite king Arad. [ATAD.]

4. 'ΑΒΕΛ-SHIT'TIM (with the article 'N אֲבֵל שִׁטִּים, "the meadow of the acacias" [the Sam. Cod. omits the article]; B. Βελσῶ, A. Βελσῶν, F. -ελ; *Abelsatim*); in the "plains" (שִׁטִּים = the deserts) of Moab by Jordan-Jericho, or in that portion of the Jordan valley which was opposite Jericho and belonged to Moab. Here—their last resting-place before crossing the Jordan—Israel "pitched from Beth-jeshimoth

unto Abel-shittim" (Num. xxxiii. 49). The place is most frequently mentioned by its shorter name of Shittim. [SHITTIM.] In the days of Josephus it was still known as Abila,—the town embosomed in palms* (δπου οὖν πόλις ἐστὶν 'Αβιλῆ, φοινικιδότον δ' ἐστὶ τὸ χωρίον, *Ant.* iv. 8, § 1), 60 stadia from the river (v. 1, § 1). It was taken by Placidus, with Julius Besimoth and other villages near the Dead Sea (*B. J.* iv. 7, § 6). Jerome, in his commentary on the third chapter of Joel, places it six Roman miles from Lívias. The Jerusalem and Babylonian Talmuds give twelve miles as the distance between Abel-shittim and Beth-jeshimoth. Now probably *Kefrein*, on a rocky slope east of Jordan, near the northern margin of the fertile plain called *Seisobán*. There is abundant water at *Kefrein* and some shapeless ruins, including those of a citadel on a small isolated rock. Near the western edge of the plain there are still many acacia trees, "shittim" (*Trietram, Land of Israel*, 523-525).

5. 'ΑΒΕΛ-ΜΕΧΟΛΑΗ (Mecholah, מֵחֹלָה 'N. "meadow of the dance."* 4 In Judg. vii. 22 [*Vulg.* v. 23], B. 'Αβελμουλά, A. Βαρεμμουλά; in 1 K. iv. 12, B. 'Εβελμουλά, A. 'Αβελμουλά; in 1 K. xix. 16, B. 'Εβελμουλά, A. 'Αβελμουλά; *Abel-Meula, Abelmehula*), named with Bethshean (Scythopolis) and Jokneam (1 K. iv. 12), and therefore in the N. part of the Jordan valley (*Euseb. ἐν τῇ Αἰλῶνι, OS.* p. 243, 36). To "the border (the 'lip' or 'brink' of Abelmeholah," and to Beth-shittah (the "house of the acacia"), both places being evidently down in the Jordan valley, the routed Bedonin host fled from Gideon (Judg. vii. 22). Here Elisha was found at his plough by Elijah returning up the valley from Horeb (1 K. xix. 16-19). In Jerome's time the name had dwindled to 'Αβελμά. Probably at *Ain el-Helweh*, "sweet spring," at the southern end of the Bethshean plain, where the western hills approach the Jordan, and close to an ancient road. There are ruins near the spring, and the position agrees with that indicated by Eusebius and Jerome (*ep. P. F. Mem.* ii. 231).

6. 'ΑΒΕΛ-CERA'MIM (אֲבֵל צֶרַם 'N; B. 'Εβελχαρμείμ, A. 'Αβελ ἀμπελωνών; *Abel quæ est vineis consita*), in the A. V. rendered "the plain (*marg.* 'Abel') of the vineyards;" R. V. *Abelcheramim*; R. V. *marg. the meadow of vineyards*: a place eastward of Jordan, beyond Aroer; named as the point to which Jephthah's pursuit of the Bene-Ammon extended (Judg. xi. 33). Α κόμη ἀμπελοφόρος "Abel is mentioned by Eusebius as 6 (Jerome, 7) miles beyond Philadelphía (Rabbah); and another, οἰνοφόρος καλουμένη, more to the N. 12 miles E. from Gadara, below the Hieromax. The site of the former has not yet been identified; the latter, the modern *Abil*, is still found in the same position (Ritter, *Syria*, p. 1058). There is another *Kefr Abil* on the Roman road from Pella to Gerasa, between the former place and *Wady Yabis*. The passage (Judg. xi. 33) possibly means that Jephthah drove the Ammonites out of Gilead (*comp.* vv. 13, 22), in which case Aroer

* It was amongst these palms, according to Josephus, that Deuteronomy was delivered by Moses. See the passage above cited.

* If Mecholah always implies a religious dance, Abelmeholah was probably a sanctuary.

on the Arnon and Abel-ceramim (*Abil*) on the Hieromax would be the limits of the district freed. The position of Abel-ceramim depends upon that of Minnith, which is still unknown; it is placed by Jerome (*OS.*² p. 171, 4) four miles from Heshbon on the road to Philadelphia. Oliphant (*Land of Gilead*, p. 420) identifies it with *Minch*, a station on the *Haj* road north of *Ka'at Zerká*. There is also a *Minich* south of Mount Nebo. There were at least three places with the name of Aroer on the further side of the Jordan. [ARÖER.]

7. אֶבֶל הַמָּוֶלֶת. "The GREAT 'ABEL' (*marg.* 'stone'; *Abel Magnum*) in the field of Joshua the Bethshemite" (1 Sam. vi. 18). By comparison with *re.* 14 and 15, it would seem that for אֶבֶל should be read אֶבֶן = stone. So the LXX., Targum, R. V., and most modern scholars. The translators of A. V., by the insertion of "stone of," seem to have taken a middle course. The view that Abel was the name subsequently given to the spot in reference to the "mourning" (יְהוֹנָתָן) there (v. 19) has now no supporters. In the Jewish traditions it was an altar erected by Abraham. M. C. Ganneau (*P. F. Qy. Stat.*, 1877, pp. 154-6), reading *Eben* for Abel, connects the spot with Eben-ezer (1 Sam. iv. 1), where the Israelites encamped before the disastrous battle in which the ark was lost. This place he identifies with *Deir 'Abán*, two miles east of 'Ain Shems, "Bethshamesh," and close to the Roman road to Jerusalem. Eusebius and Jerome (*OS.*² pp. 132, 20; 243, 15) place Abenezzer ('*Abēze*(*ep*)) near Bethsames on the road from Elia to Ascalon, a position which answers well to that of *Deir 'Abán*. [G.] [W.]

A'BEL (אֶבֶל; 'AbeL; *Abel*; i.e. *breath, vapour, transitoriness*), a name expressive generally (a) of the transitoriness of man considered by himself apart from God and God's promises; or (b) of the mother's recognition of the brevity and frailty of human life after the fall; in the latter case the child would have been so named at his birth. Others consider Abel to have been so called from the shortness of his life (cp. Ps. xxxix. 6; Job vii. 16). He was the second son of Adam, and was murdered by his brother Cain (Gen. iv. 1-16). Jehovah showed respect for Abel's offering, but not for that of Cain; because, according to Hebrews xi. 4, Abel "by faith offered a more excellent sacrifice than Cain." The expression "sin" (taken in the sense of a sin-offering) "lieth at the door" (Gen. iv. 7), seems to imply that the need of sacrifices of blood to obtain forgiveness was already revealed. Others, questioning as anachronistic the interpretation "sin-offering," take the sentence to refer to the danger to which Cain was exposing himself by his wrath. Sin, like a crouching beast, was preparing to spring upon him (see *int. al.* Delitzsch [1887], Harold Browne [*Speaker's Commentary*], Payne Smith [*Ellicott's Commentary*], on Gen. iv. 7). On account of Abel's faith, St. Augustine makes Abel the type of the new regenerate man; Cain that of the natural man (*de Civ. Dei*, xv. 1). St. Chrysostom observes that Abel offered the *best* of his flock—Cain that which was most readily procured (*Hom. in Gen.* xviii. 5: cp. the Midrash

Rabbah, Par. xxii. in Hamburger, *R.E.* s. n. *Hebel*, or in Wünsche's *Sammlung Alter Midraschim*, 4^{te} Lieferung, pp. 98, &c.). Jesus Christ spoke of him as the first "martyr" (Matt. xxiii. 35); so did the early Church subsequently. For Christian traditions, see *Iren.* v. 67; Chrysost. *Hom. in Gen.* xix.; Cedren. *Hist.* 8; Wetzer u. Welte's *KL.*² s. n.: for those of the Rabbins and Mahomedans, see Eisenmenger, *Entdeckt. Jud.* i. 462, 832; Hamburger, *op. cit.*; Hottinger, *Hist. Or.* 24; Ersch and Gruber, *Encyklop.* s. v.; and the *Kur-an*, ch. v. The place of his murder and his grave are pointed out near Damascus (Pococke, b. ii. 168); and the neighbouring peasants tell a curious tradition respecting his burial (Stanley, *S. and P.* p. 413).

In modern times the interpretation of Abel has been traced to the Assyrian *habal*=son, a word not infrequent in proper names (e.g. Asurnāyir-habal; Nabū-habal-usur), and imported from the Sumerian-Accadian (Schröder, *KAT.*², p. 44); but such an interpretation, if suitable to the first-born son of the first man, does not seem appropriate to the younger brother (cp. Delitzsch). The fondness for the pastoral life, in which—as distinguished from the agricultural life—the Israelites delighted in the earlier days of their existence, has been traced with some probability to their attachment to the memory and calling of Abel. To Christians, Abel the shepherd became a type of Christ, "the just One," the "good Shepherd," "brought like a lamb to the slaughter," and offering the "blood of sprinkling that speaketh better than that of Abel" (Heb. xii. 24, R. V.). For the sect of the Abelonii (or Abelitæ) see s. v. in *Dictionary of Christian Biography*. [R. W. B.] [F.]

A'BEZ (אֶבֶז, in pause אֶבֶז; B. 'PeBés, A. 'Aeú; *Abes*; R. V. *Ebez*), a town in the possession of Issachar, named between Kishion and Remeth, in Josh. xix. 20, only. Gesenius (*Thes.*) mentions as a possible derivation of the name, that the Chaldee for tin is אֶבֶז. Some derive it and the name Ibban from an unused root (= to shine, hence to be high) applied to high places and positions. Others connect it with an Arabic root, to be white. Possibly, however, if the boundary of Issachar may be carried so far to the south, the word is a corruption of אֶבֶז, Thebez, now *Tubás*, a town, 9 miles S.E. of Engannim, which otherwise has escaped mention in the list in Joshua. Conder (*Ilbdk. to Bible*, 401) identifies it with *Kh. el-Beidha*, on the plain of Esdraelon, between Tell Keimūn (Jokneam) and Beit Lahm (Bethlehem), but this place must have been included within the border of Zebulun. [G.] [W.]

ABI (אֲבִי, *father*=progenitor; 'Abo; *Abi*), wife of Ahaz, and mother of king Hezekiah (2 K. xviii. 2). The name is written אֲבִיָּא (No. 6, אֲבִיָּה) in 2 Ch. xxix. 1. Her father's name was Zechariah. He was perhaps the Zechariah mentioned by Isaiah (viii. 2). [R. W. B.] [F.]

ABIA, ABI'AH, or ABI'JAH (אֲבִיָּה=אֲבִיָּה, *my father* [or *a father*] is *Jah*; 'Abiá; *Abia*). Many proper names are compounded of אֲבִי (father, or my father). The sense in which this is to be understood is uncertain;

perhaps in some cases it may be a title of God (cp. Ewald, *Lehrb.* p. 615; Nestle, *Israelit. Eigennamen*, p. 182 sq.; Fr. Delitzsch, *Prolegg. i. Heb.-Aram. Wörterb.* p. 200 sq.). 1. Son of Becher, the son of Benjamin (1 Ch. vii. 8, B. 'Abiôô, A. 'Abiôô). 2. Wife of Hezron (1 Ch. ii. 24). 3. Second son of Samuel, whom together with his eldest son Joel he made judges in Beersheba (1 Sam. viii. 2; 1 Ch. vi. 28). The corruptness of their administration was the reason alleged by the Israelites for their demanding a king. 4. Mother of king Hezekiah [Abi]. 5. Or Abijam, the son of Rehoboam (1 Ch. iii. 10, B. 'Aβela; Matt. i. 7). 6. Descendant of Eleazar, and chief of the eighth of the twenty-four courses of priests (Luke i. 5). Cp. ABIJAH (No. 4). For other persons of this name, see ABIJAH. [R. W. B.] [F.]

ABI-AL'BON. [ABIEL]

ABI-A'SAPH, otherwise written EBI-ASAPH (עֲבִי־אַסָּף, Ex. vi. 24, B. 'Abiāsdāp, F. 'Abiāsdāp; and עֲבִי־אַסָּף in 1 Ch. vi. 8 [LXX. and Vulg. c. 23], B. 'Abiāsdāp, A. 'Abiāsdāp; in 1 Ch. vi. 22 [LXX. and Vulg. c. 37], B. 'Abiāsdāp, A. 'Abiāsdāp; in 1 Ch. ix. 19, B. 'Abiāsdāp; Abiasaph: according to Simonis (but improbably), "*cujus patrem abstulit Deus*," with reference to the death of Korah, as related in Num. xvi.; but according to MV.¹⁰ *my father hath gathered*; compare אֲבִי־אַסָּף, Asaph, 1 Ch. vi. 39). He was the head of one of the families of the Korbites (a house of the Kohathites), but his precise genealogy is somewhat uncertain. In Ex. vi. 24, he appears at first sight to be represented as one of the sons of Korah, and as the brother of Assir and Elkanah. But in 1 Ch. vi. he appears as the son of Elkanah, the son of Assir, the son of Korah. The natural inference from this would be that in Ex. vi. 24 the expression "the sons of Korah" merely means the families into which the house of the Korhites was subdivided. But if so, the verse in Exodus must be a later insertion than the time of Moses, as in Moses' lifetime the great-grandson of Korah could not have been the head of a family. And it is remarkable that the verse is quite out of its place, and appears improperly to separate ver. 25 and ver. 23, which both relate to the house of Aaron. If, however, this inference is not correct, then the Ebiasaph of 1 Ch. vi. is a different person from the Abiasaph of Ex. vi., viz. his great-nephew. But this does not seem probable. It appears from 1 Ch. ix. 19, that that branch of the descendants of Abiasaph of which Shallum was chief were porters, "keepers of the gates of the tabernacle;" and from ver. 31 that Mattithiah, "the first-born of Shallum the Korhite, had the set office over the things that were made in the pans," apparently in the time of David. From Neh. xii. 25 we learn that Abiasaph's family was not extinct in the days of Nehemiah; for the family of Meshullam (which is the same as Shallum), with Talmon and Akkub, still filled the office of porters, "keeping the ward at the threshold of the gate." Other remarkable descendants of Abiasaph, according to the text of 1 Ch. vi. 33-37, were Samuel the prophet and Elkanah his father (1 Sam. i. 1), and Heman the singer; but Ebiasaph seems to

be improperly inserted in v. 37.* The possessions of those Kohathites who were not descended from Aaron, consisting of ten cities, lay in the tribe of Ephraim, the half-tribe of Manasseh, and the tribe of Dan (Josh. xxi. 20-26; 1 Ch. vi. 61). The family of Elkanah the Kohathite resided in Mount Ephraim (1 Sam. i. 1). [A. C. H.]

ABI-A'THAR (עֲבִי־אַתָּר; 'Abiāthar; Abiathar; but the version of Sanctes Pagninus has *Ebiathar*, according to the Hebrew points. In Mark ii. 26, it is 'Abiāthar. According to Gesenius = *father of excellence*, or *abundance*; according to Olshansen [*Lehrb.* p. 620] = *my father excels*. The exact meaning is uncertain). Abiathar was that one of all the sons of Ahimelech the high-priest who escaped the slaughter inflicted upon his father's house by Saul, at the instigation of Doeg the Edomite (see title to Ps. lii. and the Psalm itself), in revenge for his having inquired of the Lord for David, and given him the shewbread to eat and the sword of Goliath the Philistine, as is related in 1 Sam. xxii. We are there told that when Doeg slew in Nob on that day fourscore and five persons that did wear a linen ephod, "one of the sons of Ahimelech the son of Ahitub, named Abiathar, escaped and fled after David;" and it is added in 1 Sam. xxiii. 6, that when he did so "he came down with an ephod in his hand," and was thus enabled to inquire of the Lord for David (1 Sam. xxiii. 9, xxx. 7; 2 Sam. ii. 1, v. 19, &c.). The fact of David having been the unwilling cause of the death of all Abiathar's kindred, coupled with his gratitude to his father Ahimelech for his kindness to him, made him a firm and steadfast friend to Abiathar all his life. Abiathar on his part was firmly attached to David. He adhered to him in his wanderings while pursued by Saul; he was with him while he reigned in Hebron (2 Sam. ii. 1-3), the city of the house of Aaron (Josh. xxi. 10-13); he carried the ark before him when David brought it up to Jerusalem (1 Ch. xv. 11; 1 K. ii. 26); he continued faithful to him in Absalom's rebellion (2 Sam. xv. 24, 29, 35, 36, xvii. 15-17, xix. 11); and "was afflicted in all wherein David was afflicted." He was also one of David's chief counsellors (1 Ch. xxvii. 34). When, however, Adonijah set himself up for David's successor on the throne in opposition to Solomon, Abiathar, either persuaded by Joab, or in rivalry to Zadok, or under some influence which cannot now be discovered, sided with him, and was one of his chief partisans, while Zadok was on Solomon's side. For this Abiathar was banished to his native village, Anathoth, in the tribe of Benjamin (Josh. xxi. 18), and narrowly escaped with his life, which was spared by Solomon only on the score of his long and faithful service to David his father. He was no longer permitted to perform the functions, or enjoy the prerogatives, of the high-priesthood. For we are distinctly told that "Solomon thrust out Abiathar from being priest to the Lord;" and that "Zadok the priest did the king put in the room of Abiathar" (1 K. ii. 27, 35). So that we must understand the assertion in 1 K. iv. 4, that in Solomon's reign "Zadok and Abiathar were the priests," as simply stating the historical fact that they were the priests at the

* See *The Genealogies of our Lord and Saviour Jesus Christ*, by Lord Arthur Hervey, p. 210, and p. 214, note.

beginning of Solomon's reign. Ver. 2, which tells us that "Azariah the son of Zadok" was "the priest,"—a declaration confirmed by 1 Ch. vi. 10,—refers to the eleventh year of his reign when the Temple was finished. It is probable that Abiathar did not long survive David. He is not mentioned again, and he must have been far advanced in years at Solomon's accession to the throne.

There are one or two other difficulties connected with Abiathar, to which a brief reference must be made before we conclude this article. (1.) In 2 Sam. viii. 17*, and in the duplicate passage 1 Ch. xviii. 16 (N^a 'Αβιαθάρ), and in 1 Ch. xxiv. 3, 6, 31, we have *Ahimelech* substituted for *Abiathar*, and *Ahimelech the son of Abiathar* instead of *Abiathar the son of Ahimelech*. Whereas in 2 Sam. xx. 25, and in every other passage in the O. T., we are uniformly told that it was Abiathar who was priest with Zadok in David's reign, and that he was the son of Ahimelech, and that Ahimelech was the son of Ahitub. The difficulty is increased by finding Abiathar spoken of as the high-priest in whose time David ate the shewbread (see Mark ii. 26, and Alford *in loc.*). However, the evidence in favour of David's friend being *Abiathar the son of Ahimelech* preponderates so strongly, and the impossibility of any rational reconciliation is so clear, that one can only suppose, with Procopius of Gaza, an error here (cp. Wellhausen, *d. Text d. B.B. Sam.* p. 177). The mention of *Abiathar* by our Lord, in Mark ii. 26, might perhaps be accounted for, if Abiathar was the person who persuaded his father to allow David to have the bread, and if, as is probable, the loaves were Abiathar's (Lev. xxiv. 9), and given by him with his own hand to David. The expression *ὁ ἀρχιερεὺς* is the equivalent of *הַכֹּהֵן*, "the priest," applied to Ahimelech throughout 1 Sam. xxi. and xxii., and equally applicable to Abiathar if he was the chief officiating priest under his father.

(2.) Another difficulty concerning Abiathar is to determine his position relatively to Zadok, and to account for the double high-priesthood, and for the advancement of the line of Ithamar over that of Eleazar. A theory has been invented that Abiathar was David's, and Zadok Saul's high-priest, but it seems to rest on no solid ground. The facts of the case are these:—Ahimelech, the son of Ahitub, the son of Phinehas, the son of Eli, was high-priest in the reign of Saul. On his death his son Abiathar became high-priest. The first mention of Zadok is in 1 Ch. xii. 28, where he is described as "a young man mighty of valour," and is said to have joined David while he reigned in Hebron, in company with Jehoiada, "the leader of the Aaronites." From this time we read, both in the books of Samuel and Chronicles, of "Zadok and Abiathar the priests," Zadok being always

* Klostermann (*Kurzgef. Kommentar zu A. u. N. T.*, edd. Strack u. Zöckler, 1867) supposes *in loco* that such words as *לִסְנֵי אֲבִיָּתָר* (cp. 1 Sam. iii. 1, ii. 18) have fallen out of the text after *בְּהֵנִים*. Hackett (*D. B.*, Amer. ed.) mentions the opinion that Ahimelech and Abiathar were hereditary names in the family, and hence that the father and son could have borne these names respectively, and this view is accepted by most moderns. [F.]

named first. And yet we are told that Solomon on his accession put Zadok in the room of Abiathar. Perhaps the true state of the case was, that Abiathar was the first and Zadok the second priest; but that from the superior strength of the house of Eleazar (of which Zadok was head), which enabled it to furnish sixteen out of the twenty-four courses (1 Ch. xxiv.), Zadok acquired considerable influence with David; and that this, added to his being the heir of the elder line, and perhaps also to some of the passages being written after the line of Zadok was established in the high-priesthood, led to the precedence given him over Abiathar. We have already suggested the possibility of jealousy of Zadok being one of the motives which inclined Abiathar to join Adonijah's faction. It is most remarkable how, first, Saul's cruel slaughter of the priests at Nob, and then the political error of the wise Abiathar, led to the fulfilment of God's denunciation against the house of Eli, as the writer of 1 K. ii. 27 leads us to observe when he says that "Solomon thrust out Abiathar from being priest unto the Lord, that he might fulfil the word of the Lord which He spake concerning the house of Eli in Shiloh." See also Joseph. *Ant.* viii. 1, §§ 3, 4. [A. C. H.]

A'BIB. [MONTIS.]

ABI-DAH and ABI-DA (אֲבִידָה, apparently = *my father knoweth*; B. 'Αβιδά, A. -i- [in 1 Ch. i. c.]; A.D. 'Αβιδά [in Gen. i. c.]; *Abida*), a son of Midian and grandson of Abraham by Keturah (Gen. xiv. 4; 1 Ch. i. 33). [E. S. P.]

ABI-DAN (אֲבִידָן, *my father is judge*; A. 'Αβιδαν, B. -ei-; *Abidan*), chief of the tribe of Benjamin at the time of the Exodus (Num. i. 11, ii. 22, vii. 60, 65, x. 24). [W. A. W.] [F.]

ABIE-EL (אֲבִיעֵל, *my father [or, a father] is God [or El]*; A. 'Αβιήλ, B. -ei-; *Abiēl*). 1. The father of Kish, and consequently grandfather of Saul (1 Sam. ix. 1), as well as of Abner, Saul a commander-in-chief (1 Sam. xiv. 51, B. 'Αβιήρ). In the genealogy in 1 Ch. viii. 33, ix. 39, Ner is made the father of Kish, and the name of Abiel is omitted, but the correct genealogy according to Samuel is:—

2. 'Αβιήλ. One of David's thirty "mighty men" (1 Ch. xi. 32). The view that Abi-Albon (2 Sam. xxiii. 31) is an alternative for Abiel is very improbable (Driver). The reading Abiel in 2 Sam. is supported by B. (at end of ch. xxiii., ed.

Swete, p. 666), Γαδ α β ι η λ υ δ ρ ς אביעלכּן and the Luc. Recension Γαλασβιηλ. Holmes and Parsons give twelve MSS. with 'Αβιήλ, and eleven with 'Αβιήλ. Klostermann's suggestion here (note *in loco* in Strack u. Zöckler's *Kgf. Komm.*) is to some not unreasonable. בּוֹן in

עלכון ('Albon) may be a corruption of בית, and he would read אֲבִיעֵל בֵּית הָעֲרֵבָתִי (instead of אֲבִיעֵלכּוֹן הָעֲרֵבָתִי), Abiel of Betharaba (cp. Josh. xv. 6, 61), called Arabah in Josh. xviii. 18. [R. W. B.] [F.]

ABI-EZER (אֲבִיעֶזֶר, *father of help*; in Josh. i. c. A. 'Αχιέζερ, B. 'Ιέζε; in Num. i. c. [LXX. c. 34], 'Αχιέζερ; *Abiezer*). 1. Eldest son of Gilead, and descendant of Machir and Manasseh, and apparently at one time the leading family of the tribe (Josh. xvii. 2; Num. xxvi. 30, where the name is given in the contracted form of אֲבִיעֶזֶר, *Jezzer*). In the genealogies of Chronicles, Abiezer is, in the present state of the text, said to have sprung from the sister of Gilead (1 Ch. vii. 18). Originally, therefore, the family was with the rest of the house of Gilead on the east of Jordan; but when first met with in the history, some part at least of it had crossed the Jordan and established itself at Ophrah, now probably *Feráta*, a village five miles W.S.W. of Shechem, and not far from the borders of Ephraim, the old name of which was Ophrah (*Sam. Chron.*). See *P. F. Mem.* ii. 162. Here, when the fortunes of his family were at the lowest—"my 'thousand' is 'the poor one' in Manasseh" (Judg. vi. 15)—was born the great judge Gideon, destined to raise his own house to almost royal dignity (Stanley, p. 229), and to achieve for his country one of the most signal deliverances recorded in their whole history. [GIDEON; OPHRAH.]

2. One of David's "mighty men" (2 Sam. xxi. 27, B. 'Αβιεζερ, AB. 'Αβιεζερ; 1 Ch. xi. 28, xxvii. 12, B. 'Αβιεζερ). [G.] [W.]

ABI-EZ'RITE (אֲבִיעֶזְרִית, B. *απαρτος τοῦ* 'Εσθελ in Judg. vi. 11 [A. π. 'Αβιεζερ], 24 [A. π. τ. 'Ιεζρ]; B. 'Αβιεσθελ in Judg. viii. 32, A. πρὸς 'Αβιεζερ: *pater familiae Ezri* [vi. 11], *familia Ezri* [vii. 24, viii. 32]). The designation is given to Joash the father of Gideon, and is descriptive of a descendant of Abiezer, or Jeezer, the son of Gilead (Judg. vi. 11, 24; viii. 32), and thence also called JEEZERITE (Num. xxvi. 30; see ABIEZER, No. 1). In Judg. vi. 24, viii. 32, the A. V. and R. V. both use the plural "Abiezrites" for the collective Hebrew singular. The Peshito and Targum both regard the first part of the word "Abi" as an appellative, "father of," as also the LXX. and Vulgate. [W. A. W.] [F.]

ABI-GAIL (אֲבִיגַיִל, or אֲבִיגַיִל [Kethib, אֲבִיגַיִל, MV.¹⁰ = *father of joy*, Olshausen in *Lehrb.* p. 616] = *my father is joy*; 'Αβρυαλα, B. -ει; *Abigail*). 1. The beautiful wife of Nabal, a wealthy owner of goats and sheep in Carmel. When David's messengers were slighted by Nabal, Abigail took the blame upon herself, supplied David and his followers with provisions, and succeeded in appeasing his anger. Ten days after this Nabal died, and David sent for Abigail and made her his wife (1 Sam. xxv. 14 seq.). By her he had a son, called Chileab in 2 Sam. iii. 3, but Daniel (B. Δανιήλ; *Daniel*) in 1 Ch. iii. 1. He may well have borne both names (Keil).

2. A sister of David, married to Jether the Ishmaelite, and mother, by him, of Amasa (1 Ch. ii. 17). In 2 Sam. xvii. 25 she (*Abigail*) is described as the daughter of Nahash, sister to Zeruiah, Job's mother, and as marrying Ithra (another form of Jether) an Israelite. A. has here 'Ισραηλῆνης (B. 'Ισρ-), a reading accepted by Thenius, Keil, and Wellhausen. There could, it is thought, be no reason for recording a marriage with an Israelite; but the circumstance of David's sister marrying a

heathen Ishmaelite deserved mention (Thenius, *Exeg. Handb.* Sam. i. c.). Lucian has the reading δ' Ἰσραηλῆνης (= 'Ισραηλῆνη), but there is no place called 'Ισραήλ. [R. W. B.] [F.]

ABIHA'IL (אֲבִיהַיִל, Ges. = *father of might*).

1. A. 'Αβιχαλ, B. -ει, F. 'Αβιχαλα; *Abihaiel*. Father of Zuriel, chief of the Levitical family of Merari, a contemporary of Moses (Num. iii. 35).

2. Wife of Abishur (1 Ch. ii. 29).

3. A. 'Αβιχαλα, B. -ει, F. *Abihail*. Son of Huri, of the tribe of Gad (1 Ch. v. 14).

4. Wife of Rehoboam (2 Ch. xi. 18; *Abihail*). She is called the daughter, i.e. a descendant of Eliab, the elder brother of David.

5. 'Αμινάδab; *Abihail*. Father of Esther and uncle of Mordecai (Esth. ii. 15, ix. 29).

The names of Nos. 2 and 4 are written in some

MSS. אֲבִיהַיִל (B. 'Αβιχαλα, A. 'Αβρυαλα in 1 Ch. ii. 29; B. Βαλαρ, B. αβιδ 'Αβαλαρ, A. 'Αβιαδ in 2 Ch. xi. 18), which may be conjectured to be a mistake for or variation of אֲבִיהַיִל.

[R. W. B.] [F.]

ABI'ATHU (אֲבִיהָטוּ, *my Father is He*; 'Αβιούδ;

Abiu), the second son (Num. iii. 2) of Aaron by Elisheba (Ex. vi. 23), who, with his father and his elder brother Nadab and seventy elders of Israel, accompanied Moses to the summit of Sinai (Ex. xxiv. 1). Being together with Nadab guilty of offering strange fire (Lev. x. 1) to the Lord, i.e. not the holy fire which burnt continually upon the altar of burnt-offering (Lev. vi. 9, 12), they were both consumed by fire from heaven, and Aaron and his surviving sons were forbidden to mourn for them. The name also occurs in Exod. xxiv. 9, xxviii. 1; Num. iii. 4, xxvi. 60, 61; 1 Ch. vi. 3, xxiv. 1, 2. [R. W. B.] [F.]

ABI'HUD (אֲבִיהֻד, *father of majesty*, or *my father is majesty*; 'Αβιούδ; *Abiud*), son of Bela and grandson of Benjamin (1 Ch. viii. 3). [W. A. W.] [F.]

ABI'JAH or ABI'JAM. 1. אֲבִיהָיָה. אֲבִיהָיָה according to Ges. = *father of the sea*, i.e. a maritima man; according to Nestle (*Die Isr. Eigenn.* p. 173 n.) = אֲבִיהָיָה, *father of the people*; 'Αβίας, Joseph; *Abiam*, *Abia*, the son and successor of Rehoboam on the throne of Judah (1 K. xiv. 31; 2 Ch. xii. 16). He is called Abijah in Chronicles (אֲבִיהָיָה; 'Αβιά; *Abia*), Abijam in Kings ('Αβιούδ; *Abiam*); the latter name being probably an error in the MSS., since the LXX.-form, 'Αβιούδ, seems taken from *Abijahu*, which occurs 2 Ch. xiii. 20, 21 ('Αβιά; *Abia*). Indeed Gesenius says that some MSS. read *Abijah* in 1 K. xiv. 31. The supposition, therefore, of Lightfoot (*Harm. O. T.*, p. 209, Pitman's edition), that the writer in Kings, who takes a much worse view of Abijah's character than we find in Chronicles, altered the last syllable to avoid introducing the holy JAH into the name of a bad man, is unnecessary. But it is not fanciful or absurd, for changes of the kind were not unusual: for

* Cf. אֲבִיהָיָה. אֲבִיהָיָה, He, appears to have been used to denote God. Cp. Olshausen, *Lehrb.*, p. 616; Renan, *Des Noms théophores*, in *REV.* v. 164. [F.]

example, after the Samaritan schism the Jews altered the name of Shechem into Sychar (*drunken*), as we have it in John iv. 5; and Hosea (iv. 15) changes Beth-el, *house of God*, into Beth-aven, *house of naught* (see Stanley, *S. & P. p.* 222).

From the First Book of Kings we learn that Abijah endeavoured to recover the kingdom of the Ten Tribes, and made war on Jeroboam. No details are given, but we are also informed that he walked in all the sins of Rehoboam (idolatry and its attendant immoralities, 1 K. xiv. 23, 24), and that his heart "was not perfect before God, as the heart of David his father." In the Second Book of Chronicles his war against Jeroboam is more minutely described, and he makes a speech to the men of Israel, reproaching them for breaking their allegiance to the house of David, for worshipping the golden calves, and substituting unauthorized priests for the sons of Aaron and the Levites. He was successful in battle against Jeroboam, and took the cities of Bethel, Jeshanah, and Ephraim, with their dependent villages. It is also said (2 Ch. xiii. 3, 17) that his army consisted of 400,000 men, and Jeroboam's of 800,000, of whom 500,000 fell in the action: numbers which, if in themselves almost incredibly high and possibly incorrect, are yet in keeping with the systematic use of high figures on the part of the Chronicler (see 1 Ch. xxi. 5; cp. 2 Sam. xxiv. 9: Rawlinson in the *Speaker's Commentary* on Ch. i. c.). Nothing is said by the writer in Chronicles of the sins of Abijah, but we are told that after his victory he "waxed mighty, and married fourteen wives," whence we may well infer that he was elated with prosperity, and, like his grandfather Solomon, fell during the last two years of his life into wickedness, as described in Kings. Both records inform us that he reigned but three years; and the Talmud accounts his early death a punishment for his non-fulfilment of the duties to which his own speech had summoned the children of Israel (2 Chron. xiii. 4-12). His mother was called Maachah. In some places (1 K. xv. 2; 2 Ch. xi. 20) she is said to be the daughter of Absalom or Abshalom (the same name); in one (2 Ch. xiii. 2; Heb. reads מַכְיָה, but the LXX. and Syr. read מַלְכָּה, which is certainly right, and is accepted by Bertheau and Keil) of Uriel of Gibeah. It is, however, so common for the word *ḥad*, *daughter*, to be used in the sense of *granddaughter* or *descendant*, that we need not hesitate to assume that Uriel married Tamar, Absalom's daughter, and that thus Maachah was daughter of Uriel and granddaughter of Absalom. Abijah therefore was descended from David, both on his father's and mother's side. According to the old chronology, the date of Abijah's accession was variously placed between B.C. 933 (Seyffarth) and B.C. 968 (Ewald); but, since the discovery of the Assyrian Eponymous Canon, between B.C. 912 (Brandes) and B.C. 921 (Riehm). See Röscher's useful table in Herzog, *RE.* xvii. p. 477, s. n. *Zeitrechnung*. The 18th year of Jeroboam coincides with the 1st and 2nd of Abijah.

2. The second son of Samuel, called ABIAH in A. V., Abijah in R. V. [See ABIA, No. 3.]

3. *'Abid; Abia*. The son of Jeroboam I. king of Israel, in whom alone, of all the house of Jeroboam, was found "some good thing toward

the Lord God of Israel," and who was therefore the only one of his family who was suffered to go down to the grave in peace. He died in his childhood, just after Jeroboam's wife had been sent in disguise to seek help for him in his sickness from the prophet Abijah, who gave her the above answer. (1 K. xiv.)

4. *'Abid; Abia*. A descendant of Eleazar, who gave his name to the eighth of the twenty-four courses into which the priests were divided by David (1 Ch. xxiv. 10; 2 Ch. viii. 14). Only four of the courses returned from the Captivity, and that of Abijah was not one (Ezra ii. 36-39; Neh. vii. 39-42, xii. 1). But the four were divided into the original number of twenty-four, with the original names; and hence it happened that to the course of Abijah or Abia belonged Zacharias the father of John the Baptist (Luke i. 5).

5. *'Abid; Abia*. A contemporary of Nehemiah (Neh. x. 7).

6. The daughter of Zechariah (2 Ch. xxix. 1. B. *'ABBA, A. 'ABBAḥ, Abia*), also called ABI (B. *'ABOḥ, Abi*, in 2 K. xviii. 2), wife of Ahaz, and mother of Hezekiah. [ABI.] [G. E. L. C.] [F.]

ABIJAM. [ABIJAH, No. 1.]

A'BILA. [ABILENE.]

ABILE'NE (Ἀβιλινή, Luke iii. 1), a tetrarchy of which Abila was the capital. This Abila must not be confounded with Abila in Peræa, and other Syrian cities of the same name, but was situated on the eastern slope of Antilibanus, in a district fertilised by the river Barada. It is distinctly associated with Lebanon by Josephus (*Ant.* xviii. 6, § 10, xix. 5, § 1, xx. 7, § 1; *B. J.* ii. 11, § 5). Its name probably arose from the green luxuriance of its situation, "Abel" perhaps denoting "a grassy meadow" [see s. v.]. The name, thus derived, is quite sufficient to account for the traditions of the death of Abel, which are associated with the spot, and which are localised by the tomb called *Noby Habil*, on a height above the ruins of the city. The position of the city is very clearly designated by the Itineraries as 18 miles from Damascus, and 38 (or 32) miles from Heliopolis or Baalbec (*Itin. Ant. and Tab. Peut.*).

It is impossible to fix the limits of the Abilene which is mentioned by St. Luke as the tetrarchy of Lysenias. [LYSANIAS.] Like other districts of the East, it doubtless underwent many changes both of masters and of extent, before it was finally absorbed in the province of Syria. Josephus associates this neighbourhood with the name of Lysanias both before and after the time referred to by the Evangelist. For the later notices see the passages just cited. We there find "Abila of Lysanias," and "the tetrarchy of Lysanias," distinctly mentioned in the reigns of Claudius and Caligula. We find also the phrase *'Abila Avraḥam* in Ptolemy (v. 15, § 22). The natural conclusion appears to be that this was the Lysanias of St. Luke. It is true that a chieftain bearing the same name is mentioned by Josephus in the time of Antony and Cleopatra, as ruling in the same neighbourhood (*Ant.* xiv. 3, § 3, xv. 4, § 1; *B. J.* i. 13, § 1; also Dio Cass. xlix. 32): and from the close connexion of this man's father with Lebanon and Damascus (*Ant.* xiii. 16, § 3, xiv. 7, § 4; *B. J.* i. 9, § 2) it is probable that Abilene was part of his terri-

tory, and that the Lysanias of St. Luke was the son or grandson of the former. Even if we assume (as many writers too readily assume) that the tetrarch mentioned in the time of Claudius and Caligula is to be identified, not with the Lysanias of St. Luke, but with the earlier Lysanias (never called tetrarch and never positively connected with Abila) in the times of Antony and Cleopatra, there is no difficulty in believing that a prince bearing this name ruled over a tetrarchy having Abila for its capital, in the 15th year of Tiberius (see Wieseler, *Chronologische Synopse der vier Evangelien*, pp. 174-183).

The site of the chief city of Abilene has been undoubtedly identified where the Itineraries place it; and its remains have been described of late years by many travellers. It stood in a remarkable gorge called the *Sûk Wâdy Barada*, where the river breaks down through the mountain towards the plain of Damascus. Among the remains the inscriptions are most to our purpose. One containing the words *Αβιλαίου Τερπόχου* is cited by Pococke, but has not been seen by any subsequent traveller. Two Latin inscriptions on the face of a rock above a fragment of Roman road (first noticed in the *Quarterly Review* for 1822, No. 52) were first published by Letronne (*Journal des Savants*, 1827), and afterwards by Orelli (*Inscr. Lat.* 4997, 4998). One relates to some repairs of the road at the expense of the *Abileni*: the other associates the 16th Legion with the place. See Hogg, *Trans. of the Roy. Geog. Soc.* for 1851; Porter, *Journ. of Sac. Lit.* for July 1853, and esp. his *Damascus*, i. 261-273; Robinson, *Later Bib. Es.* 478-484; *Dict. G. and R. Geogr.*, art. "Abilene;" and Schumacher, "Abila of the Decapolis" (*PEF*, July 1889). [J. S. H.] [W.]

ABI-MA'EL (אַבִּימָאֵל; A. 'Αβιμέηλ, E. 'Αβιμελέηλ; *Abimael*), named as a descendant of Joktan (Gen. x. 28; 1 Ch. i. 22), and thus as the progenitor of an Arab tribe. Bochart (*Phileg.* ii. 24) conjectures that his name is preserved in that of *Μάλα* [*Maula*], a place in Arabia Aromatifera, mentioned by Theophrastus (*Hist. Plant.* ix. 4), and thinks (with scant probability) that the Malitae are the same as Ptolemy's *Μαυῖται* (vi. 7, § 23), and that they were a people of the Minaeans (for whom see ARABIA). D. H. Müller (in *MV.*¹⁰ s. n.) compares the name with the South-Arabian proper name *אַתְחָר אֶתְחָר*, *Abmi 'Athtar* = a father is *Athtar* (the Hebrew Ashtoreth, but in S. Arabia a male divinity. See Baethgen, *Beiträge z. Semit. Religionsgesch.*, p. 117 sq.). [E. S. P.] [F.]

ABI-MELECH (אַבִּימֶלֶךְ; if compounded of the Phœnician deity *Milk* [or Moloch = king; see Baethgen, *op. cit.*, p. 37 n.] = my father is [the god] *Milk*; 'Αβιμέλεχ; *Abimelech*), the name of several Philistine kings. It is supposed by many to have been a common title of their kings, like that of Pharaoh among the Egyptians, and that of Caesar and Augustus among the Romans. The name Father of the King, or Father King, corresponds to *Padishah* (Father King), the title of the Persian kings, and *Atāliḥ* (Father, pr. paternity), the title of the Khans of Bucharia (Ges. *Thes.*).

1. A Philistine, king of Gerar (Gen. xx., xxi.),

who, exercising the right claimed by Eastern princes of collecting all the beautiful women of their dominions into their harem (Gen. xii. 15; Esth. ii. 3), sent for and took Sarah. The account given of Abraham's conduct on this occasion is similar to that of his behaviour towards Pharaoh [ABRAHAM]. A few years later, Abimelech and Phicol, "the chief captain of his host," made an alliance of peace and friendship with Abraham; and the covenant was established by a present to the king of seven ewe lambs, made at "the well of the oath" [BEERSHEBA], which Abimelech's servants had "violently taken away," but which was then restored.

2. Another king of Gerar in the time of Isaac, of whom a similar narrative is recorded in relation to Rebekah (Gen. xxvi. 1 seq.). Once more there was a dispute about wells; and once more were these disputes allayed by peaceful alliances between the king and the patriarch.

3. B. 'Αβιμέλεχ. Son of the judge Gideon by his Shechemite concubine (Judg. viii. 31). Here the derivation of the name is not Phœnician. The latter part of the name is not to be connected with a heathen deity, but is another name for Jehovah, = (The) *King* (Jehovah) is (my) father, or father of him who bears the name (see Baethgen, p. 146 sq.). After his father's death he "hired vaia and light fellows," and murdered all his brethren, seventy in number, with the exception of Jotham the youngest, who concealed himself; and he then persuaded the Shechemites, through the influence of his mother's brethren, to elect him king. It is evident from this narrative that Shechem then became an independent state, and threw off the yoke of the conquering Israelites (Ewald, *Gesch.* ii. 444). When Jotham heard that Abimelech was made king, he addressed to the Shechemites his fable of the trees choosing a king (Judg. ix. 1 seq.; cf. Joseph. *Ant. v.* 7, § 2), which may be compared with the well-known fable of Menenius Agrippa (Liv. ii. 32). After he had reigned three years, the citizens of Shechem rebelled under Gaal, son of Ebed. He was absent at the time, but he returned and quelled the insurrection. Gaal was expelled by Zebul, the governor friendly to Abimelech, and the city was taken by stratagem, utterly destroyed, and the ground strewn with salt. Those who had escaped for safety to "the hold of the house of El-Berith" were destroyed by the setting of the hold on fire. Shortly after he stormed and took Thebez, but was struck on the head by a woman with the fragment of a mill-stone (comp. 2 Sam. xi. 21); and lest it should be said to his disgrace that he had died by the hand of a woman (cp. Soph. *Trach.* 1064; Sen. *Herc. Oct.* 1176), he bade his armour-bearer slay him. Thus the murder of his brethren was avenged, and the curse of Jotham fulfilled.

4. Son of Abiathar, the high-priest in the time of David (1 Ch. xviii. 16); but this is evidently an error for the person called Abimelech (אַבִּימֶלֶךְ; 'Αχιμέλεχ, B. 'Αχιμέλεχ; *Achimelech*) in 2 Sam. viii. 17 [ABIMELECH]. The reading Achimelech is also adopted in 1 Ch. xviii. 16 by the LXX., Vulg., Syr., Targ., Arab., and by twelve Heb. MSS. (De Rossi, *Var. Lect.* iv. 182).

5. Ps. xxxiv., title. [ANIMELECH, 2.] [R. W. B.] [F.]

ABI-NADAB (אַבִּינָדָב, Ges. = *noble father*, *MY*.¹⁰ = *my father is noble*; A. 'Αμινάδδβ, B. 'Αμιν-; *Abinadab*). 1. A native of Kirjath-jearim, in whose house "on a hill" the ark remained 20 years (1 Sam. vii. 1, 2; 2 Sam. vi. 3, 4; 1 Ch. xiii. 7, N. 'Αμιν-). 2. Second son of Jesse, who followed Saul to his war against the Philistines (1 Sam. xvi. 8, xvii. 13; 1 Ch. ii. 13). 3. A son of Saul, who was slain with his brothers at the fatal battle on Mount Gilboa (1 Sam. xxxi. 2, B. 'Ιωνάδδβ; 1 Ch. viii. 33, ix. 39, x. 2, NA. 'Αμινάδδβ, B. βιδά 'Αμιν-). 4. Father of one of the twelve chief officers of Solomon (1 K. iv. 11, A. 'Αβινάδδβ, B. omits). [R. W. B.] [F.]

ABI-NER (אַבִּינֶר, Ges. = *father of a lamp*, *MY*.¹⁰ = *my father is a lamp*; B. 'Αβερνρρ, A. 'Αβερρρ; *Abner*). Marginal form of the name Abner (1 Sam. xiv. 50). Cp. Lagarde, *Übersicht üb. d. i. Aram., Arab., u. Hebr. Bildung d. Nomina*, p. 75 n. [W. A. W.] [F.]

ABI-NO'AM (אַבִּינֹעַם, Ges. = *father of pleasantness*, Olshausen and *MY*.¹⁰ = *my father is pleasantness*; B. 'Αβινέεμ, A. 'Αβιν-; *Abinoem*), father of Barak (Judg. iv. 6, 12, A. 'Ιαβινέεμ; v. 1, 12). [R. W. B.] [F.]

ABI-RAM (אַבִּירָם, Ges. = *father of loftiness*, *MY*.¹⁰ = *my father is lofty*; B. 'Αβιράν [A. once 'Αβαράν], F. 'Αβι-; *Abiron*). 1. A Reubenite, son of Elisab, who with Dathan and On, men of the same tribe, and Korah a Levite, organized a conspiracy against Moses and Aaron (Num. xvi.). [For details, see KORAH.]

2. B. 'Αβιράν; *Abiram*. Eldest son of Hiel, the Bethelite, who died when his father laid the foundations of Jericho (1 K. xvi. 34), and thus accomplished the first part of the curse of Joshua (Josh. vi. 26). [R. W. B.] [F.]

ABI-RON ('Αβιράν; *Abiron*). **ABIRAM** (Ecclus. xlv. 18; Vulg. c. 22). [W. A. W.]

ABI-SE'I (*Abisei*). **ABISHUA**, the son of Phinehas (2 Esd. i. 2). [W. A. W.]

ABI-SHAG (אַבִּישָׁג, Ges. = *father [i.e. author] of error*, and so used of man or woman. Olshausen, *Lehrb. d. Hebr. Sprache*, p. 620, notes that the real meaning is very obscure. B. 'Αβισαδ, A. 'Αβισαδ; *Abisag*), a beautiful Shunammite, taken into David's harem to comfort him in his extreme old age (1 K. i. 1-4). After David's death Adonijah induced Bathsheba, the queen-mother, to ask Solomon to give him Abishag in marriage; but this imprudent petition cost Adonijah his life (1 K. ii. 13 seq.). [ADONIJAH.] [R. W. B.] [F.]

ABI-SHAI (אַבִּישַׁי; in 2 Sam. x. 10, אַבִּישַׁי. Ges. = *father of a gift*, *MY*.¹⁰ = *my father is a gift*: *Abisai*). The eldest son of Zeruiah, David's sister, and the brother of Joab and Asahel (1 Ch. ii. 16, B. 'Αβισαδ [and usually], A. 'Αβισσαδ). A man of daring and devoted loyalty, he, more than his brothers, had won the confidence of David. He went with him to the sleeping camp of Saul (1 Sam. xxvi. 6, &c., A. 'Αβισαδ [and usually]), and would have smitten the king with his spear, had not David's loyal respect for "the Lord's anointed" prevented him. They took the king's spear and the cruse of

water which was at Saul's head; and David, presently denouncing the incompetency of the guard kept over their master by Abner and his soldiers, pointed to the king's preservation as an illustration of his own good will towards his person. A like indignation against the enemies of his uncle animated Abishai when he eagerly craved permission to slay Shimei, who cursed David while fleeing before Absalom (2 Sam. xvi. 9-14). In the successful battle which quelled the rebellion of Absalom (2 Sam. xviii. 2, A. 'Αβισαδ), Abishai was in command of one of the three divisions of the royal army, and in the absence of Amasa he headed the troops commanded to pursue the rebel Sheba (2 Sam. xx. 6, A. 'Αβισαδ). Abishai could forgive no wrong and brook no rival. Hence his name is inseparably connected with two deeds of blood wrought by, or in conjunction with, his brother Joab: the second was the slaughter of Amasa, whom David had appointed captain of his host in the place of Joab after the murder of Absalom (2 Sam. xix. 13, xx. 10, A. 'Αβισαδ); the first was the treacherous murder of Abner, who, when fleeing after the fight of "the pool of Gibeon," had slain Asahel (2 Sam. ii. 19, &c., iii. 30, B. 'Αβισσαδ, A. 'Αβισαδ). His bravery and generalship were undisputed. In the war of retaliation against the Ammonites and Syrians, in consequence of Hannan's outrageous treatment of David's messengers, Joab assigned to Abishai the command against the former, and together they utterly discomfited the hosts united against them (2 Sam. x. 1, &c., B. 'Αβισσαδ, A. 'Αβισαδ; 1 Ch. xix. 1, &c., B. c. 11, A. c. 15, 'Αβισσαδ). Abishai took also his share in the memorable victories won over the Edomites in "the valley of salt" by David and Joab (2 Sam. viii. 13; 1 Ch. xviii. 12, B. 'Αβισσαδ, A. 'Αβισαδ; Ps. lx., title). As acts of personal prowess, it is recorded of him that in a war with the Philistines he rescued his master David from his peril at the hands of Ishbi-benob the giant and slew him (2 Sam. xxi. 17, B. 'Αβισσαδ, A. 'Αβισαδ); and in a single-handed contest with three hundred men, his valour secured him the title of Rosh ha-sheleshah (רֹאשׁ הַשְּׁלֹשָׁה, al. רֹאשׁ הַשְּׁלֹשִׁים, "chief among the three" (al. "of the thirty"), or, as some prefer, "chief or captain of the warrior (or Shalish) class" (2 Sam. xxiii. 18; 1 Ch. xi. 20, A. 'Αβισσαδ), the second grade in the famous catalogue of David's mighty men. There is much probability in the conjecture that these personal acts are to be referred to the period of David's wandering among the Philistines. There is no record of the end of Abishai's life. [F.]

ABI-SHA'LOM (אַבִּישָׁלֹם, 'Αβισσαλώμ; *Abessalom*, "father of peace"), father of Maachah, who was the wife of Rehoboam, and mother of Abijah (1 K. xv. 2, 10). He is called Absalom (אַבִּישָׁלֹם) in 2 Ch. xi. 20, 21. This person must be David's son (see B. [A. βασιλει], 2 Sam. xiv. 27). The daughter of Absalom was doubtless called Maachah after her grandmother (2 Sam. iii. 3). [W. A. W.]

ABI-SHU'A (אַבִּישׁוּעַ, Ges. = *father of welfare*, Olshausen and *MY*.¹⁰ = *my father is welfare*;

Abiseu. 1. Son of Bela, of the tribe of Benjamin (1 Ch. viii. 4, B. 'Αβισούρας, A. 'Αβισούρ, T. 'Αβισούρ). 2. Son of Phinehas, the son of Eleazar, and father of Bukki, in the genealogy of the high-priests (1 Ch. vi. 4, 5, 50, B. 'Αβισούρ, A. -; Ezra vii. 5, T. 'Αβισούρ). According to Josephus (*Ant.* viii. 1, § 3) he executed the office of high-priest after his father Phinehas, and was succeeded by Eli; his descendants, till Zadok, falling into the rank of private persons (*ἱερεῖς ἰδιώταις*). His name is corrupted in Josephus into 'Ιδωκίππος. Nothing is known of him. [A. C. H.]

ABI-SHUR (אֲבִישׁוּר). The meaning is uncertain; Ges.=*father of a wall*, MV.¹²=*my father is a wall*; B. 'Αβισούρ, A. -; *Abisur*, son of Shammai (1 Ch. ii. 28). [W. A. W.] [F.]

ABI-SUM (B. 'Αβισούμ, A. -; *Abisue*). ABISUMA, the son of Phinehas (1 Esd. viii. 2 [LXX. end Vulg. vii. 5]), called also ABISEI; one of the ancestors of Ezra. [W. A. W.] [F.]

ABI-TAL (אֲבִיטַל), Ges.=*father of dew*, Ols-hausen and MV.¹²=*My father is the dew*; B. 'Αβιτάλ, A. -; *Abital*, one of David's wives (2 Sam. iii. 4; 1 Ch. iii. 3, B. 'Αβιτάλ). [W. A. W.] [F.]

ABI-TUB (אֲבִיטוּב), Ges.=*father of goodness*, MV.¹²=*My father is goodness*; BA. 'Αβιτάβ, T. 'Αβιτάλ; *Abitob*, son of Shaharaim by Hushim (1 Ch. viii. 11). [W. A. W.] [F.]

ABI'UD (Αβιαύδ; *Abiud*). Descendant of Zerobabel, in the genealogy of Jesus Christ (Matt. i. 13). Lord A. Hervey identifies him with HODALAH (1 Ch. iii. 24) and JUDA (Luke ii. 26), and supposes him to have been the grandson of Zerubabel through his only daughter mentioned, Shelomith (1 Ch. iii. 19). Nösgen, with less probability, considers him to have been the husband of Shelomith. [W. A. W.] [F.]

ABLUTION. [PURIFICATION.]

ABNER (אֲבִנֵר, once אֲבִינֵר, where see the etymologies; B. 'Αβερρή, A. 'Αβερρ or 'Αβερρή; *Abner*). 1. Son of Ner, who was the brother of Kish (1 Ch. ix. 36), the father of Saul. Abner, therefore, was Saul's first cousin, and was made by him commander-in-chief of his army (1 Sam. xiv. 50). He was the person who conducted David into Saul's presence after the death of Goliath (xvii. 57); and afterwards accompanied his master when he sought David's life at Hachilah (xxvi. 3-14). From this time we hear no more of him till after the death of Saul, when he rose into importance as the mainstay of his family. It would seem that, immediately after the disastrous battle of Mount Gilboa, David was proclaimed king of Judah in Hebron, the old capital of that tribe, but that the rest of the country was altogether in the hands of the Philistines, and that five years passed before any native prince ventured to oppose his claims to their supremacy. During that time the Israelites were gradually recovering their territory, and at length Abner proclaimed the weak and unfortunate Ishbosheth, Saul's son, as king of Israel in Mahanaim, beyond Jordan—at first no doubt as a place of security against the Philistines, though all serious appre-

hension of danger from them must have soon passed away—and Ishbosheth was generally recognised except by Judah. This view of the order of events is necessary to reconcile 2 Sam. ii. 10, where Ishbosheth is said to have reigned over Israel for two years, with v. 11, in which we read that David was king of Judah for seven;* and it is confirmed by vv. 5, 6, 7, in which David's message of thanks to the men of Jabesh-gilead for burying Saul and his sons implies that no prince of Saul's house had as yet claimed the throne, but that David hoped that his title would be soon acknowledged by all Israel; while the exhortation "to be valiant" probably refers to the struggle with the Philistines, who placed the only apparent impediment in the way of his recognition. War soon broke out between the two rival kings, and a "very sore battle" was fought at Gibeon between the men of Israel under Abner, and the men of Judah under Joab, son of Zeruiah, David's sister (1 Ch. ii. 16). When the army of Ishbosheth was defeated, Joab's youngest brother Asahel, who is said to have been "as light of foot as a wild roe," pursued Abner, and in spite of warning refused to leave him, so that Abner in self-defence was forced to kill him. After this the war continued, success inclining more and more to the side of David, till at last the imprudence of Ishbosheth deprived him of the counsels and generalship of the hero, who was in truth the only support of his tottering throne. Abner had married Rizpah, Saul's concubine, and this, according to the views of Oriental courts, might be interpreted to imply a design upon the throne. Thus we read of a certain Armais, who, while left viceroy of Egypt in the absence of the king his brother, "used violence to the queen and concubines, and put on the diadem, and set up to oppose his brother" (Manetho, quoted by Joseph. c. *Apion.* i. 15. Cp. also 2 Sam. xvi. 21, xx. 3, 1 K. ii. 13-25, and the case of the Pseudo-Smerdis, Herod. iii. 68). [ABSALOM; ADONIJAH.] Rightly or wrongly, Ishbosheth so understood it, though Abner might seem to have given sufficient proof of his loyalty, and he ventured to reproach him with it. Abner, incensed at his ingratitude, after an indignant reply, opened negotiations with David, who received him most favourably at Hebron, and promised him the chief command of the armies of the united kingdom. Abner then undertook to procure his recognition throughout Israel; but after leaving his court for the purpose was enticed back by Joab, and treacherously murdered by him and his brother Abishai at the gate of the city, partly no doubt, as Joab showed afterwards in the case of AMASA, from fear lest so distinguished a convert to their cause should gain too high a place in David's favour (Joseph. *Ant.* vii. 1, § 5), but ostensibly in retaliation for the death of Asahel. For this there was indeed some pretext, inasmuch as it was thought dishonourable even in battle to kill a mere stripling like Asahel, and Joab and Abishai were in this case the *retengers of blood*

* In the opinion of many, the numbers have been tampered with. Ishbosheth was more probably 24 or 14 years old than 40, and his reign lasted possibly six years. See *Speaker's Comm.* and Klostermann (*Kaf. Komm. z. A. u. N. T.*, edd. Strack u. Zöckler) in loco.

(Num. xxxv. 10), but it is also plain that Abner only killed the youth to save his own life. This murder caused the greatest sorrow and indignation (cp. 1 Kings ii. 5) to David; and as the assassins were too powerful to be punished, he contented himself with showing every public token of respect to Abner's memory, by following the bier and pouring forth a simple dirge over the slain, which is thus translated by the R. V.:—

Should Abner die as a fool dieth?
Thy hands were not bound, nor thy feet put into fetters:
As a man falleth before the children of iniquity, so didst thou fall.

i.e. "Thou didst not fall as a prisoner taken in battle, with hands and feet fettered, but by secret assassination, such as one wicked man meets at the hands of other wicked men" (2 Sam. iii. 33, 34). What specially excited the indignation of David was the mode in which Abner had met his death. See also Lowth, *Lectures on Hebrew Poetry*, xxii. [G. E. L. C.] [F.]

2. Father of Jaasiel, chief of the Benjamites in David's reign (1 Ch. xxvii. 21); probably the same as ABNER No. 1. [W. A. W.]

ABOMINATION (תּוֹמָה). The consideration of this term may be confined to two passages (see *Speaker's Commentary* and Delitzsch, *Genesis* [1887], notes in loco). (a) Gen. xliii. 32, "The Egyptians might not eat bread with the Hebrews, for that is an abomination unto the Egyptians." The Egyptians would not eat with foreigners. National pride and superstition had combined in establishing such usage (Herod. ii. 41; Diod. Sic. i. 67). They treated the Hebrew, the Greek, and all outside themselves as foreigners. A primary reason for this exclusiveness may have consisted in the fact that the sacrifice of the cow, so common among Hebrew, Greek, and other nations, was forbidden among the Egyptians, the cow being their sacred animal; but, generally speaking, the land of the "foreigners" and its inhabitants belonged to Set (Typhon), "the almighty destroyer and blighter." The Jews themselves, at a later period of their existence, adopted the same habits of exclusiveness (cp. John iv. 9; Acts x. 28, xi. 3). (b) Gen. xlii. 34: "Every shepherd is an abomination unto the Egyptians." Joseph describes his brothers to Pharaoh as "shepherds, keepers of cattle"; and bids them describe themselves as "keepers of cattle from our youth even until now, both we and our fathers." Such description will, he intimates, secure their dwelling in the land of Goshen rather than in the heart of Egypt, because—he adds—"every shepherd," &c. If the advent of Joseph to Egypt be placed (with Ebers and Lepsius) at the end of the Hyksos period [EGYPT], the memory of the shepherd (i.e. nomad) dynasty and its oppressiveness would be still acute. "Foreigner" shepherds would all be termed by an indiscriminating hatred, "abomination." Otherwise the shepherd was not, as was the swineherd (Herod. ii. 47), especially abominable to the Egyptians, a people who were great breeders and rearers of cattle of all sorts (cp. Gen. xlvii. 6). They would only have stamped with an offensive epithet men of foreign nationality and religion (cp. ANANIM;

Dillmann, *Genesis*,⁵ in loco; Duncker-Abbott, *Hist. of Antiquity*, i. p. 199). [F.]

ABOMINATION OF DESOLATION (τὸ βδέλυγμα τῆς ἐρημώσεως, Matt. xxiv. 15), mentioned by our Saviour as a sign of the approaching destruction of Jerusalem, and with reference to Dan. ix. 27, xi. 31, xii. 11. The Hebrew words in these passages are respectively, (a)

וְהָיָה כִּי יִשְׁכַּח עַל הָעִיר וְהָיָה עַל הָעִיר וְהָיָה עַל הָעִיר, (b) וְהָיָה כִּי יִשְׁכַּח עַל הָעִיר וְהָיָה עַל הָעִיר וְהָיָה עַל הָעִיר,

and (c) וְהָיָה כִּי יִשְׁכַּח עַל הָעִיר: the LXX. translate the first word uniformly βδέλυγμα, and the second ἐρημώσεων (ix. 27) and ἐρημώσεως (xi. 31, xii. 11): BA. however have ἡφανισμένον in xi. 31, and AB.²² ἀπὸ ἀφανισμού in ix. 27. The meaning of the first of these words is clear: ἡφανισμός often expresses religious abominations, and in the singular (1 K. xi. 5, 7)—and especially in the plural—number, idols (2 K. xiii. 24). Suidas defines βδέλυγμα as used by the Jews to express πᾶν εἶδωλον καὶ πᾶν ἐκτόπημα ἀνθρώπων. It is important to observe that the expression is not used of idolatry in the abstract, but of idolatry adopted by the Jews themselves (2 K. xxi. 2-7, xxiii. 13). Hence we must look for the fulfilment of the prophecy in some act of apostasy on their part; and so the Jews themselves appear to have understood it, according to the traditional feeling referred to by Josephus (*B. J.* iv. 6, § 3), that the Temple would be destroyed ἐὰν χεῖρες οἰκτεῖαι προμύνασι τὸ νέμενος. With regard to the words וְהָיָה עַל הָעִיר and וְהָיָה עַל הָעִיר, the former is translated in ix. 27 by the A. V. "he shall make it desolate," and by the R. V. "shall come one that maketh desolate;" in xi. 31 and xii. 11 by both A. V. and R. V., "that maketh desolate." The Saviour probably referred to the latter of these passages. What was the object referred to is a matter of doubt (see a summary of opinions in the *Speaker's Commentary*, Daniel,³ pp. 364-5); it should be observed, however, that in the passages in Daniel the setting up of the abomination was to be consequent upon the cessation of the sacrifice. The Jews considered the prophecy to be fulfilled in the profanation of the Temple under Antiochus Epiphanes, when the Israelites themselves erected an idolatrous altar (*Βωμός*, Joseph. *Ant.* xii. 5, § 4) upon the sacred Altar, and offered sacrifice thereon: this altar is described as βδέλυγμα τῆς ἐρημώσεως (1 Macc. i. 54, vi. 7). The prophecy, however, referred ultimately (as Josephus himself perceived, *Ant.* x. 11, § 7) to the destruction of Jerusalem by the Romans, and consequently the βδέλυγμα must describe some occurrence connected with that event. But it is not easy to find one which meets all the requirements of the case: the introduction of the Roman standards into the Temple would not be a βδέλυγμα, properly speaking, unless it could be shown that the Jews themselves participated in the worship undoubtedly paid to them by the Roman soldiers (Joseph. *Bell. Jud.* vi. 6, § 1; Tertullian, *Apol.* xvi.); moreover, this event, as well as several others which have been proposed, such as the erection of the statue of Hadrian (Nicephorus Callist. iii. 24), fails in regard to the time of their occurrence, being subsequent to the destruction of the city. It appears very probable that the profanities of the Zealots con-

strutted the abomination, which was the sign of impending ruin (Joseph. *B. J.* iv. 3, § 7. Cp. Mänsel in *Speaker's Commentary*, Matt. xxiv. 15, note, and Nösgen on the same passage in Strack u. Zöckler's *Kgf. Komm. z. d. N. T.*). If so, St. Luke's paraphrase, explanatory for the Gentiles (xxi. 20), "when ye shall see Jerusalem compassed with armies," dwells only upon the latter part of the sign, the *desolation*, the nearness of which would be intimidated by the Roman armies encircling Jerusalem. [W. L. B.] [F.]

AB-RAHAM (אַבְרָהָם). The significance of this name to the Hebrew is given in Gen. xvii. 5, אַבְרָהָם, R. V. "the father of a multitude of nations," but its etymology is still a matter of conjecture.* Dillmann and Delitzsch in loco take אַבְרָם as an older and dialectic form of אַבְרָם, the final syllable אַם reflecting the first syllable of אַבְרָם [see *MV.*¹⁰, s. n.]; 'Abpādū; Abraham: originally **ABRAM**, אַבְרָם, the father is lofty or lofty father, 'Abpādū; Abram; which name is similar in meaning to Abiram [1 K. xvi. 34], the Abiram of the Assyrian inscriptions [Schrader, *KAT.* i. L], the son of Terah, and brother of Nahor and Haran; and the progenitor, not only of the Hebrew nation, but of several cognate tribes. His history is recorded to us with much detail in Scripture, as the very type of a true patriarchal life; a life, that is, in which all authority is paternal, derived ultimately from God the Father of all, and religion, imperfect as yet in revelation and ritual, is based entirely on that same Fatherly relation of God to man. The natural tendency of such a religion is to the worship of tutelary gods of the family or of the tribe, traces of such a tendency on the part of the patriarchs being found in the Scriptural History itself; and the declaration of God to Moses (in Ex. vi. 3) plainly teaches that the full sense of the Unity and Eternity of Jehovah was not yet unfolded to them. But yet the revelation of the Lord as the "Almighty God" (Gen. xvii. 1, xxviii. 3, xxxv. 11) and "the Judge of all the earth" (Gen. xviii. 25), the knowledge of His intercourse with kings of other tribes (Gen. xx. 3-7), and His judgment on Sodom and Gomorrah (to say nothing of the promise which extended to "all nations") must have raised the patriarchal religion far above this narrow idea of God, and given it the germs, at least, of future exaltation. The character of Abraham is that which is formed by such a religion and by the influence of a nomad pastoral life; free, simple, and manly; full of hospitality and family affection; truthful towards all such as were bound to him by ties, though not untainted with Eastern craft towards those considered as aliens; ready for war, but not a professed warrior or one who lived by plunder; free and childlike in religion, and gradually educated by God to a continually deepening sense of its all-absorbing claims. His character stands remarkably contrasted with those of Isaac and Jacob.

The scriptural history of Abraham is mainly limited, as usual, to the evolution of the Great Covenant in his life; it is the history of the man himself rather than of the external events of his life; and, except in a few instances

(Gen. xii. 10-20, xiv., xx., xxi. 22-34), it does not refer to his relation with the rest of the world. To them he may only have appeared a chief of the hardier Chaldaean race, disdaining the settled life of the more luxurious Canaanites, and fit to be hired by plunder as a protector against the invaders of the North (see Gen. xiv. 21-23). Nor is it unlikely, though we have no historical evidence of it, that his passage into Canaan may have been a sign or a cause of a greater migration from Haran, and that he may have been looked upon (e.g. by Abimelech, Gen. xxi. 22-32) as one who, from his position as well as his high character, would be able to guide such a migration for evil or for good.

The traditions which Josephus adds to the scriptural narrative, are merely such as, after his manner and in accordance with the aim of his writings, exalt the knowledge and wisdom of Abraham, making him the teacher of monotheism to the Chaldeans, and of astronomy and mathematics to the Egyptians. He quotes, however, Nicolaus of Damascus,^b as ascribing to him the conquest and government of Damascus on his way to Canaan, and stating that the tradition of his habitation was still preserved there (Joseph. *Ant.* i. c. 7, § 2; see Gen. xv. 2).

The Arab traditions are partly ante-Mohammedan, relating mainly to the Kaabah (or sacred house) of Mecca, which Abraham and his son "Ismail" are said to have rebuilt for the fourth time over the sacred black stone. But, in great measure, they are taken from the Koran (see Sale's *Koran*, index s. n.; Hughes, *Dict. of Islam*, s. n.), which has itself borrowed from the O. T. and from the Rabbinical traditions. Of the latter the most remarkable is the story of his having destroyed the idols (see Jud. v. 8-8) which Terah not only worshipped (as declared in Josh. xxiv. 2) but also manufactured, and of his having been cast by Nimrod into a fiery furnace (cp. Vulg. of Neh. [2 Esd.] ix. 7), which turned into a pleasant meadow. The legend is generally traced to the word *Ur* (אוּר), Abraham's birthplace, which has also the sense of "light" or "fire." The name of Abraham appears to be commonly remembered in tradition through a very large portion of Asia, and the title "el-Khalil," "the Friend" (of God) (see 2 Ch. xx. 7; Isa. xli. 8; Jas. ii. 23), is that by which he is usually spoken of by the Arabs.

The scriptural history of Abraham, derived mainly from three sources (Köhler and Delitzsch, *Genesis* [1887], p. 241 sq. = J, E, Q), is divided into various periods by the various and progressive revelations of God which he received:—

1. Gen. xii.-xiv. With his father Terah, his wife Sarai, and nephew Lot, Abram left Ur (i.e. *El-Mugheir*, on the W. side of the Euphrates). Thence he migrated to Haran (Charran), in the N. part of Mesopotamia, on the high road from Babylonia and Assyria to Syria and Palestine. Both cities were famous for the cult of the Moon-god. This step was in obedience to a call of God (cp. Acts vii. 2-4). Haran, apparently the eldest brother—since Nahor married his daughter, and Abram's position as first of the three brothers is that of merit and fame rather than of priority of birth—was dead already;

^b Nicolaus was a contemporary and favourite of Herod the Great and Augustus. His *Universal History* is said to have contained 144 books.

* Cp. also Lagarde, *Uebersicht üb. d. i. Aram., Arab., u. Hebr. Bildung d. Nomina*, p. 92, etc.

and Nahor remained behind (Gen. xi. 31). In Haran Terah died: and Abram, now the head of the family, received a second call, and with it the promise.* The promise was twofold, containing both a temporal and spiritual blessing, the one of which was the type and earnest of the other. The temporal promise was, that he should become a great and prosperous "nation"; the spiritual was, that in him "should all families of the earth be blessed" (Gen. xii. 2).

Abram appears to have entered Canaan, as Jacob afterwards did, along the valley of the Jabbok; for he crossed at once into the rich plain of Moreh, near Sichem, and under Ebal and Gerizim. There, in one of the most fertile spots of the land, he received the first distinct promise of his future inheritance (Gen. xii. 7), and built his first altar to God. "The Canaanite" (it is noticed) "was then in the land," and probably would view the strangers of the warlike north with no friendly eyes. Accordingly Abram made his second resting-place in the strong mountain country, the key of the various passes, between Bethel and Ai. There he would dwell securely, till famine drove him into the richer and more cultivated land of Egypt. It is still a matter of dispute in what dynasty this took place. Cook (*Speaker's Commentary*, i. p. 446) and Rawlinson place Abram's entry into Egypt in the earlier part of the 12th dynasty; Ebers and Sayce place it in the later or Hyksos period.

That his history is no ideal, mythical, or heroic legend,⁴ is very clearly shown, not merely by the record of his deceit as to Sarai, practised in Egypt and repeated afterwards, but much more by the clear description of its utter failure, and the humiliating position in which it placed him in comparison with Pharaoh, and still more with Abimelech. That he should have felt afraid of such a civilized and imposing power as Egypt even at that time evidently was, is consistent enough with the Arab nature as it is now: that he should have sought to guard himself by deceit, especially of that kind, which is true in word and false in effect, is unfortunately not at all incompatible with a generally religious character; but that such a story should have been framed in an ideal description of a saint or hero is inconceivable.

The period of his stay in Egypt is not recorded, but it is from this time that his wealth and power appear to have begun (Gen. xiii. 2). On his return, the very fact of this growing wealth and importance caused the separation of Lot and his portion of the tribe from Abram.

* It is expressly stated in the Acts (vii. 4) that Abram quitted Haran after his father's death. This is supposed to be inconsistent with the statements that Terah was 70 years old at the birth of Abram (Gen. xi. 26); that he died at the age of 205 (Gen. xi. 32; in Samar. text, 145); and that Abram was 75 years old when he left Haran: from which it would seem to follow that Abram migrated from Haran in his father's lifetime. Various explanations have been given of this difficulty: one being that the statement in Gen. xi. 26, that Terah was 70 years old when he begat his three children, applies only to the eldest, Haran, and that the births of his two younger children belonged to a subsequent period [CHRONOLOGY]. Many adopt the Samar. number.

⁴ See some of these views from Goldziher to Stade stated in Delitzsch, *Genesis*, pp. 217, 248 (1887); Dillmann, *Genesis*,² p. 227, &c.

Lot's departure to the rich country of Sodom implied a wish to quit the nomadic life, and settle at once; Abram, on the contrary, was content still to "dwell in tents" and wait for the promised time (Heb. xi. 9). Probably till now he had looked on Lot as his heir, and his separation from him was a providential preparation for the future. From this time he took up his third resting-place at Mamre, or Hebron, the future capital of Judah, situated in the direct line of communication with Egypt, and opening down to the wilderness and pasture land of Beersheba. This very position, so different from the mountain-fastness of Ai, marks the change in the numbers and powers of his tribe.

The history of his attack on Chedorlaomer (see s. n.; on the genuineness of the history, cf. Delitzsch, pp. 262-3) which follows, gives us a specimen of the view which would be taken of him by the external world. By the way in which it speaks of him as "Abram the Hebrew" (Gen. xiv. 13),* it would seem to be an older document, a fragment of Canaanitish history (as Ewald calls it), preserved and sanctioned by Moses. The invasion was clearly another northern immigration or foray, for the chiefs or kings were of Shinar (? South Babylonia), Ellasar (Larsa), Elam (Persia), &c. That it was not the first, is evident from the vassalage of the kings of the cities of the plain; and it extended (see Gen. xiv. 5-7) far to the south over a wide tract of country. Abram appears here as the head of a small confederacy of chiefs, powerful enough to venture on a long pursuit to the head of the valley of the Jordan, to attack with success a large force, and not only to rescue Lot, but to roll back for a time the stream of northern invasion. His high position is seen in the gratitude of the people, and the dignity with which he refuses the character of a hireling. That it did not elate him above measure, is evident from his reverence to Melchizedek, in whom he recognised one whose call was equal, and consecrated rank superior, to his own [MELCHIZEDEK].

II. Gen. xv., xvi. The second period of Abram's life is marked by the fresh revelation which, without further unfolding the spiritual promise, completes the temporal one, already in course of fulfilment. It first announced to him that a child of his own should inherit the promise, and that his seed should be as the "stars of heaven." This promise, unlike the other, appeared at his age contrary to nature, and therefore it is on this occasion that his faith is specially noted, as accepted and "counted for righteousness." Accordingly, he now passed into a new position, for not only is a fuller revelation given as to the captivity of his seed in Egypt, the time of their deliverance, and their conquest of the land, "when the iniquity of the Amorites was full," but after his solemn burnt-offering the visible appearance of God in fire is vouchsafed to him as a sign, and he enters into covenant with the Lord (Gen. xv. 18). This

* Ο ἑβραῖος, LXX.; one who had come from the other side of the Euphrates. If this sense of the word be taken, it strengthens the supposition noticed. In any case the name is that applied to the Israelites by foreigners, or used by them of themselves only in speaking of foreigners: see ΕΒΡΑΙΩΝ.

covenant, like the earlier one with Noah (Gen. ix. 9-17), is one of free promise from God, faith only in that promise being required from man.

The immediate consequence was the taking of Hagar, Sarai's maid, to be a concubine of Abram (as a means for the fulfilment of the promise of seed), and the conception of Ishmael.

III. Gen. xvii.-xxi. For fourteen years no more is recorded of Abram, who seems during all that period to have dwelt at Mamre. After that time, in Abram's 99th year, the last step in the revelation of the promise is made, by the declaration that it should be given to a son of Sarai, and at the same time the temporal and spiritual elements are distinguished; Ishmael can share only the one, Isaac is to enjoy the other. The covenant, which before was only for temporal inheritance (Gen. xv. 18), is now made "everlasting," and sealed by circumcision. This new state is marked by the change of Abram's name to "Abraham," and Sarai's to "Sarah," and it was one of far greater acquaintance and intercourse with God. For, immediately after, we read (xviii. 1) of the Lord's appearance to Abraham in human form, attended by two Angels, the ministers of His wrath against Sodom, of His announcement of the coming judgment to Abraham, and His acceptance of his intercession for the condemned cities.² The whole record stands alone in Scripture for the simple and familiar intercourse of God with him, contrasting strongly with the vaguer and more awful descriptions of previous appearances (see e.g. xv. 12), and of those of later times (Gen. xxvii. 17, xxxii. 30; Ex. iii. 6, &c.). And, corresponding with this, there is a perfect absence of all fear on Abraham's part, and a cordial and reverent joy, which, more than anything else, recalls the time past when "the voice of the Lord God was heard, walking in the garden in the cool of the day."

Strangely unworthy of this exalted position as the "friend" and intercessor with God, is the repetition of the falsehood as to Sarah in the land of the Philistines (Gen. xx.). It was the first time Abraham had come in contact with that tribe or collection of tribes which stretched along

the coast almost to the borders of Egypt; a race apparently of lords ruling over a conquered population, and another example of that series of immigrations which appear to have taken place at this time. It seems, from Abraham's excuse for his deceit on this occasion, as if there had been the idea in his mind, that all arms might be used against unbelievers, who, it is assumed, have no "fear of God," or sense of right. If so, the rebuke of Abimelech, by its dignity and its clear recognition of a God of justice, must have put him to manifest shame, and taught him that others also were servants of the Lord.

This period again, like that of the sojourn in Egypt, was one of growth in power and wealth, as the respect of Abimelech and his alarm for the future, so natural in the chief of a race of conquering invaders, very clearly shows. Abraham's settlement at Beersheba, on the borders of the desert, near the Amalekites' plunderers, shows both that he needed room and was able to protect himself and his flocks.

The birth of Isaac crowned his happiness, and fulfilled the first great promise of God: and the expulsion of Ishmael, painful as it was to him, and vindictive as it seems to have been on Sarah's part, was yet a step in the education which was to teach him to give up all for the one great object. The symbolical meaning of the act (drawn out in Gal. iv. 21-31) could not have been wholly unfelt by the patriarch himself, so far as it involved the sense of the spiritual nature of the promise, and carried out the fore-ordained will of God.

IV. Gen. xxii.-xxv. 11. Again for a long period (twenty-five years, Joseph. *Ant.* i. 13, § 2) the history is silent: then comes the final trial and perfection of the faith of Abraham in the command to offer up the child of his affections and of God's promise. The trial lay, first in the preciousness of the sacrifice, and the perplexity in which the command involved the fulfilment of the promise; secondly, in the strangeness of the command to violate the human life, of which the sacredness had been enforced by God's special command (Gen. ix. 5, 6), as well as by the feelings of a father. To these trials he rose superior by faith, that "God was able to raise Isaac even from the dead" (Hab. xi. 19), probably through the same faith to which our Lord refers, that God had promised to be the "God of Isaac" (Gen. xvii. 19), and that He was not "a God of the dead, but of the living."³

It is remarkable that, in the blessing given now to Abraham, the original spiritual promise is repeated for the first time since his earliest

¹ The original name עֲבְרָה is uncertain in derivation and meaning. See the Lexicons of Gesenius, of M.V.¹⁰, and Dillmann on Gen. xvii. 15. Gesenius renders it "nobility," from the same root as "Sarah"; Ewald and Delitzsch by "quarrelsome" (from the root עָרַב, in sense of "to fight"). The name Sarah, שָׂרָה, is certainly "princess."

² Tradition still points out the supposed site of this appearance of the Lord to Abraham. About a mile from Hebron is a beautiful and massive oak, which still bears Abraham's name. The residence of the patriarch was called "the oaks of Mamre" (R. V.), erroneously translated in A. V. "the plain" of Mamre (Gen. xlii. 18, xviii. 1); but it is doubtful whether this is the exact spot, since the tradition in the time of Josephus

(B. J. iv. 9, § 7) was attached to a terebinth (תְּרֵבִינִי) which is rendered "terebinths of M." in R. V. marg.).

This tree no longer remains; but there is no doubt that it stood within the ancient enclosure, which is still called "Abraham's House." A fair was held beneath it in the time of Constantine; and it remained to the time of Theodosius. (Robinson, ii. 81, ed. 1856; Stanley, S. & P. p. 143.)

BIBLE DICTIONARY.—VOL. I.

³ The scene of the sacrifice is, according to our present text, and to Josephus, the land of "Moriah," מוֹרְיָה, the meaning of which is unknown; in Gen. xxii. there seems to be a play upon it: comp. the name "Jehovah-Jireh," xxii. 14. The Samaritan Pentateuch has "Moreh," מוֹרֶה; the LXX. renders the word here

by ἡν ὁ θεὸς ὤφειλε, the phrase used for what is undoubtedly "Moreh" in xli. 6, whereas in 2 Ch. iii. 1 "Moriah" is rendered by Β' Ἀμορῖα, A. α.: they therefore probably read "Moreh" also. The distance—three days' journey from Beersheba—suits Moreh better (see Stanley's S. & P. p. 251); but other considerations seem in favour of Moriah, the place where the Temple was afterwards built. [MORIAH.]

call, and in the same words then used. But the promise that "in his seed all nations should be blessed" would also be now understood very differently, and felt to be far above the temporal promise, in which, perhaps, at first it seemed to be absorbed. It can hardly be wrong to refer pre-eminently to this epoch the declaration that Abraham "saw the day of Christ and was glad" (John viii. 56).

The history of Abraham is now all but over, though his life was prolonged for nearly fifty years. The only other incidents are the death and burial of Sarah, the marriage of Isaac with Rebekah, and that of Abraham with Keturah.

The death of Sarah took place at Kirjath-arba, i.e. Hebron, so that Abraham must have returned from Beersheba to his old and more peaceful home. In the history of her burial, the most notable points are the respect paid to the power and character of Abraham, as a mighty prince, and the exceeding modesty and courtesy of his demeanour. It is sufficiently striking that the only inheritance of his family in the land of promise should be a tomb. The sepulchral cave of Machpelah is now said to be concealed under the Mosque of HEBRON (see Stanley, *S. & P.* p. 101).

The marriage of Isaac, so far as Abraham is concerned, marks his utter refusal to ally his son with the polluted and condemned blood of the Canaanites.

The marriage with Keturah is the strangest and most unexpected event recorded in his life, Abraham having long ago been spoken of as an old man; but his youth having been restored before the birth of Isaac may have remained to him; and Isaac's marriage, having taken his son comparatively away, may have induced him to seek a wife to be the support of his old age. Keturah held a lower rank than Sarah, and her children were sent away, lest they should dispute the inheritance of Isaac, Abraham having learnt to do voluntarily in their case what had been forced upon him in the case of Ishmael.

Abraham died at the age of 175 years, and his sons, the heir Isaac, and the outcast Ishmael, united to lay him in the cave of Machpelah by the side of Sarah.

His descendants were (1) the Israelites; (2) a branch of the Arab tribes through Ishmael; (3) the "children of the East," of whom the Midianites were the chief; (4) perhaps (as cognate tribes) the nations of Ammon and Moab (see these names); and through their various branches his name is known all over Asia.

To English readers Stanley's *Lectures on the Jewish Church*, Lectures i. and ii. (1883); Milman's *History of the Jews*, i. ch. 1; H. G. Tomkins' *Abraham and his Times*; W. J. Deane's *Abraham, his Life and Times*, will give much interesting information. See also Vigouroux, *La Bible et les Découvertes Modernes*,⁴ i. pp. 379-497. The Jewish legends concerning Abraham will be found in Beer, *Leben Abrahams n. Auffassung d. jüdischen Sage*, 1859; and summarized in Hamburger, *RE. für Bibel u. Talmud*,² s. n. Cp. Gaster, *The Apocalypse of Abraham*, from the Roumanian (Trans. of Soc. of Bibl. Arch. ix. p. 195 sq.). [A. B.] [F.]

ABRAHAM'S BOSOM. Cp. Luke xvi. 23. During the Roman occupation of Judaea at least

the practice of reclining on couches at meals was customary among the Jews. As each guest leaned upon his left arm, his neighbour next below him would naturally be described as lying in his bosom; and such a position with respect to the master of the house was one of especial honour, and only occupied by his nearest friends (John i. 18, xiii. 23). To lie in Abraham's bosom, then, was a metaphor in use among the Jews (cp. 4 Macc. xiii. 16 and Grimm's note in Fritzsche's *Kgf. Handbuch zu d. Apokryphen d. A. T.* iv⁴. Lief. p. 347) to denote a condition after death of perfect happiness and rest, and a position of friendship and nearness to the great founder of their race, when they should lie down on his right hand at the banquet of Paradise, "with Abraham, and Isaac, and Jacob, in the kingdom of heaven" (Matt. viii. 11). That the expression was in use among the Jews is shown by Lightfoot (*Hor. Hebr. in Luc.* xvi. 22), who quotes a passage from the Talmud (*Kiddushin*, fol. 72), which, according to his interpretation, represents Levi as saying in reference to the death of Rabbi Judah, "to-day he dwelleth in Abraham's bosom." The future blessedness of the just was represented under the figure of a banquet, "the banquet of the garden of Eden or Paradise." See Schoettgen, *Hor. Hebr. in Matt.* viii. 11; Hamburger, *RE. f. B. u. T.* s. n. "Abraham's Schooss." [W. A. W.] [F.]

ABRAM. [ABRAHAM.]

ABRECH. Gen. xli. 43 (A. V. and R. V.): "They cried before him (Joseph), Bow the knee (קִרְיָה)." Of the many conjectural explanations of this word, that which considers it Egyptian is the most usual and natural. The LXX. and Vulg. give no direct translation of it; the Targum and Midrash make it a composite word = "tender father" (רִי. בֶן) or "father of the king" (רִי = rex! cp. Gen. xlv. 8). Fried. Delitzsch, adopting the last-named signification, identifies it with the Babylonian-Assyrian *abar-akku*, the title of the principal minister (cp. *Heb. Language viewed in the Light of Assyrian Research*, 1883, pp. 25-7).^a An Assyrian word in the mouth of the Egyptian was not, however, so likely as an Egyptian. Canon Cook's explanation "Rejoice thou" (*Speaker's Commentary*, i. note to Gen. xli. 43, and p. 482), if the most perfect as regards sound and grammatical form, hardly gives the real sense of the word *Ab*. Moreover, the transcription *ab-rek* does not accurately represent the Egyptian pronunciation of the original word, which would have been *abu-re-k*. If, however, אֲבֹרָךְ may be admitted as standing for *abu-re-k*, the word may be taken to signify "thy commandment is the object of our desire," i.e. "we are at thy service" (see Renouf, *PSBA.* xi. p. 5, &c.). [F.]

ABRO'NAH (עֲבֹרָנָה) = passage, from עָבַר, to cross over), one of the halting-places of the Israelites in the desert, immediately preceding Ezion-geber; and therefore, looking to the root,

^a The intercourse between Egypt and Babylonia was so great that this identification cannot be called impossible; and the word may thus have been one which, with many other words of Semitic origin, found admission into the ancient Egyptian speech.

the name may possibly retain the trace of a ford across the head of the Elanitic Gulf. In the A. V. it is given as Ebronah (R. V. Abronah; *Ἀβρωνά*; B. *Ἀβρωνά*; *Hebronah*; Num. xiii. 34, 35). [EBRONAH.] If the wilderness of the wanderings was in Arabia proper, Abronah was possibly at *Hahli*, between which place and 'Abakah the mountains approach the sea so closely that only one camel can pass at a time. [G.] [W.]

ABRONAS (*Ἀβρωνά*; *Ἄ. Ἀβρωνά*; *Mambre*), a torrent [*χελμαῖος*] apparently near Cilicia (Judith ii. 24, compared with 25); if so, it may possibly be the *Nahr Abraim*, or *Ibrahim*, the ancient Adonis, which rises in the Lebanon at *Asha*, and falls into the sea at *Jebeil* (Byblos). It has, however, been conjectured (Movers, *Bonner Zeits.* xiii. 38) that the word is a corruption of *עבר הנהר* = beyond the river (Euphrates), which has just before been mentioned; a corruption not more inconceivable than many which actually exist in the LXX. The A. V. has ARBONAT (Judith ii. 24. See *Speaker's Commentary*, note in loco). [G.] [W.]

ABSALOM (*אֲבִשָׁלֹם*, *father of peace*; *Ἀβερσαλῶμ*; *Absalom*), third son of David by Maacah, daughter of Talmai king of Geshur, a Syrian district adjoining the N.E. frontier of the Holy Land near the Lake of Merom. He is scarcely mentioned till after David had committed the great crime which by its consequences embittered his old age; and then appears as the instrument by whom was fulfilled God's threat against the sinful king, that "evil should be raised up against him out of his own house, and that his neighbour should lie with his wives in the sight of the sun" (2 Sam. xii. 11). In the latter part of David's reign, polygamy bore its ordinary fruits. Not only is his sin in the case of Bathsheba traceable to it, since it naturally suggests the unlimited indulgence of the passions, but it also brought about the punishment of that sin, by raising up jealousies and conflicting claims between the sons of different mothers, each apparently living with a separate house and establishment (2 Sam. xiii. 8, xiv. 24; cf. 1 K. vii. 8, &c.). Absalom had a sister Tamar, who was violated by her half-brother Amnon, David's eldest son by Ahinoam, the Jezreelitess. The king, though indignant at so great a crime, would not punish Amnon because he was his first born (cp. the LXX. of 2 Sam. xiii. 21. The words are wanting in the Hebrew). The natural avenger of such an outrage would be Tamar's full brother Absalom, just as the sons of Jacob took bloody vengeance for their sister Dinah (Gen. xxiv.). He brooded over the wrong for two years, and then invited all the princes to a sheep-shearing feast at his estate in BAAL-HAZOR, possibly an old Canaanitish sanctuary, on the borders of Ephraim and Benjamin. Here he ordered his servants to murder Amnon, and then fled for safety to his father-in-law's court at Geshur, where he remained for three years. David was overwhelmed by this accumulation of family sorrows, thus completed by separation from his favourite son, whom he thought it impossible to pardon or recall. But he was brought back by an artifice of Joab, who sent a woman of Tekoah (after-

wards known as the birthplace of the Prophet Amos) to entreat the king's interference in a supposititious case similar to Absalom's. Having persuaded David to prevent the avenger of blood from pursuing a young man who, she said, had slain his brother, she adroitly applied his assent to the recall of Absalom, and urged him, as he had thus yielded the general principle, to "fetch home his banished." David did so, but would not see Absalom for two more years, though he allowed him to live in Jerusalem. At last, the impetuous young man—wearied with delay, perceiving that his triumph was only half complete and that his exclusion from court interfered with the ambitious schemes which he was forming, and fancying that sufficient exertions were not made in his favour—sent his servants to burn a field of corn near his own, belonging to Joab, thus doing as Samson had done (Judg. xv. 4, 5). Thereupon Joab, probably dreading some further outrage from his violence, brought him to his father, from whom he received the kiss of reconciliation. Absalom now began at once to prepare for rebellion, urged to it partly by his own restless wickedness, partly perhaps by the fear lest Bathsheba's child should supplant him in the succession, to which he would feel himself entitled as of royal birth on his mother's side as well as his father's, and as being now David's eldest surviving son, since we may infer that the second son Chileab was dead, from no mention being made of him after 2 Sam. iii. 3. It is hard to account for Absalom's temporary success, and the imminent danger which befel so powerful a government as his father's. The sin with Bathsheba had probably weakened David's moral and religious hold upon the people; and as he grew older he may have become less attentive to individual complaints and to that personal administration of justice which was one of an Eastern king's chief duties. For Absalom tried to supplant his father by courting popularity, standing in the "gate" (or place of justice), conversing with every suitor, lamenting the difficulty which he would find in getting a hearing, "putting forth his hand and kissing any man who came nigh to do him obeisance" (2 Sam. xv. 5). He also maintained a splendid retinue (2 Sam. xv. 1), and was admired for his personal beauty and the luxuriant growth of his hair, on grounds similar to those which had made Saul acceptable (1 Sam. x. 23). It is also probable that the great tribe of Judah had taken some offence at David's government, perhaps from finding themselves completely merged in one united Israel; and that they hoped secretly for pre-eminence under the less wise and liberal rule of his son. Thus Absalom selected Hebron, the old capital of Judah (then supplanted by Jerusalem), as the scene of the outbreak; Amasa, his chief captain, and Ahitophel of Giloh, his principal counsellor, were both of Judah, and after the rebellion was crushed we see signs of ill-feeling between Judah and the other tribes (2 Sam. xix. 41). But whatever the causes may have been, Absalom raised the standard of revolt at Hebron after forty years, as we read in 2 Sam. xv. 7, but which it seems better to consider a false reading (cp. Hervey, *Speaker's Com.*, in loco; Kleinert in Rishm's *HWB*. a. n. "Absalom")

for four (the number actually given by Josephus, Lucian's Recension, and accepted by nearly all modern critics—Ewald, Keil, Kirkpatrick, Wellhausen), than to interpret of the fortieth year of David's reign. The revolt was at first completely successful: David fled from his capital over the Jordan to Mahanaim in Gilead, where Jacob had seen the "two Hosts" of the Angelic vision, and where Abner had rallied the Israelites round Saul's dynasty in the person of the unfortunate Ishbosheth. Absalom occupied Jerusalem, and by the advice of Ahitophel, who saw that for such an unnatural rebellion war to the knife was the best security, took possession of David's harem, in which had been left ten concubines. This was considered to imply a formal assumption of all his father's royal rights (cp. the conduct of Adonijah, 1 K. ii. 13 ff., and of Smerdis the Magian, Herod. iii. 68), and was also a fulfilment of Nathan's prophecy (2 Sam. xii. 11). But David had left friends who watched over his interests. The vigorous counsels of Ahitophel were afterwards rejected through the crafty advice of Hushai, who insinuated himself into Absalom's confidence to work his ruin; and Ahitophel himself, seeing his ambitious hopes frustrated, and another preferred by the man for whose sake he had turned traitor, went home to Giloh and committed suicide. At last Absalom, after being solemnly anointed king at Jerusalem (xix. 10), and lingering there far longer than was expedient, crossed the Jordan to attack his father, who by this time had rallied round him a considerable force; whereas, had Ahitophel's advice been followed, he would probably have been crushed at once. A decisive battle was fought in Gilead, in the wood of Ephraim (Lucian's Recension is unsupported in its reading, "of Mahanaim:" EPHRAIM); so called, according to Gerlach (*Comm. in loco*), from the great defeat of the Ephraimites (Judg. xii. 4), or perhaps from the connexion of Ephraim with the trans-Jordanic half-tribe of Manasseh (Stanley, *S. and P.*, p. 323). Here Absalom's forces were totally defeated; and as he himself was escaping, his long hair was entangled in the branches of a terebinth, where he was left hanging while the mule on which he was riding ran away from under him. Here he was despatched by Joab in spite of the prohibition of David, who, loving him to the last, had desired that his life might be spared; and who, when he heard of his death, lamented over him in the pathetic words, *O my son Absalom! would God I had died for thee! O Absalom, my son, my son!* (2 Sam. xviii. 33). He was buried in a great pit in the forest, and the conquerors threw stones over his grave, in proof of bitter hostility (cp. Josh. vii. 26). The practice is still continued; see Thomson's *The Land and the Book*, ii. 234). The sacred historian contrasts this dishonoured burial with the tomb which Absalom had raised in the King's dale (cp. Gen. xiv. 17) for the three sons whom he had lost (cp. 2 Sam. xviii. 18 with xiv. 27), and where he probably had intended that his own remains should be laid. Josephus (*Ant.* vii. 10, § 3) mentions the pillar of Absalom as situate 2 stadia from Jerusalem. An existing monument in the valley of Jehoshaphat just outside Jerusalem bears the name of the Tomb of Absalom; but the Ionic pillars which sur-

round its base show that, if a tomb at all, it belongs to a much later period. [G. E. L. C.] [F.]

The so-called Tomb of Absalom.

AB'SALOM (T. Ἀβεσσάλωμος, A. Ἀψάλωμος [and N in 1 Macc. xiii. 11]; *Absalom*), the father of Mattathias (1 Macc. xi. 70; B. ψαλμωδῆς) and Jonathan (1 Macc. xiii. 11). [B. F. W.]

AB'SALON (Ἀβεσσαλὼν; *Abesalom*), an ambassador with John from the Jews to Lysias, chief governor of Coele-Syria and Phoenicia (2 Macc. xi. 17). [W. A. W.]

ABU'BUS (Ἀβουβός; *Abobus*), father of Ptolemaeus, the captain of the plain of Jericho, and son-in-law to Simon Maccabaeus (1 Macc. xvi. 11, 15). [W. A. W.]

ABYSS. The word is absent from the A. V., but is of frequent occurrence in the R. V. as a translation of ἡ ἀβυσσος; and the use of this Greek word, as a *substantive*, in the sense of the unfathomable depth (ἀβυθός), is confined to Biblical and Ecclesiastical Greek. The LXX. use ἀβυσσος (see Trommius, *Concord.* s. n.) to denote three Hebrew words: (a) תְּהוֹמֹת in the Pentateuch, poetical, and historical Books; (b)

תְּהוֹמוֹת in Job xli. 23 (A. V. and R. V. v. 32, "the deep"), and תְּהוֹמוֹת in Is. xlii. 27 (A. V. and R. V. "the deep"); (c) עֲרֵב in Job xxxvi. 16 (A. V. and R. V. "a broad place"). In the N. T. the word is contrasted with heaven, as a synonym with Hades, the abode of the dead (Rom. x. 7), and with special application to the place of woe and of the devils (e.g. Luke viii. 31; Rev. xvii. 8, xx. 3). Cremer points out that the application of the term to Hades becomes less frequent in Ecclesiastical Greek (*Bibl.-theol. Wörterb. d. NTlichen Gräcität*, s. n.). [F.]

AC'ATAN (Ἀκάρδ; *Eccetan*). See HAK-KATAN (1 Esd. viii. 38). [W. A. W.]

AC'CAD (אַכַּד; Ἀρχαδ; *Archad*; Babylonian

𒀭𒊕𒂗𒍪, *al Ak-kad*, "the city of Akkad"), one of the chief cities of the land of

Shinar, mentioned (Gen. x. 10) with Babel, Erech, and Calneh, as being the beginning of Nimrod's kingdom. This city, which is supposed to be the same as the Agade (an earlier form) of the inscriptions, lay near Sepharvaim (Sippara, now Abu-habbah), 16 miles west of Baghdad, and was probably the capital of the land of

Akkad (𐎶 𐎠𐎫𐎶, *mât Akkadî*), nearly

always mentioned with Šumer or Shinar. These two important nations, the pioneers of early civilisation, supposed to be of Turanian race, peopled a great part of Mesopotamia before the Semitic Babylonian and Assyrian supremacy. They spoke an agglutinative language, which seems to have died out about 1200 B.C., giving place to Semitic Babylonian, though Akkadian and Sumerian were used as sacred or literary tongues to a very late date. The boundaries of the country are unknown, but it probably lay between lat. 32° and 35°, and long. 44° and 46°. The native name of the country was Uri, and the Assyrian and Babylonian kings generally called themselves "king of Sumer and Akkad" (Assyr. or Bab., *šar Šumēri u Akkadî*; Akkadian, *Lugal Kingi-Uri(ki)*). The group

𐎶 𐎠𐎫𐎶 was also used to designate the land of Armenia (Assyr. or Bab., *Uršû* or *Uratû* (Ararat); Akkad., *Tilla*). The close connexion between the Semitic and Akkadian inhabitants of Mesopotamia is shown by the fact, that even in the earliest times the kings bore both an Akkadian and a Semitic name, the one being a translation of the other. The Akkadians probably merged into the Babylonians about 1500 B.C. [BABYLONIA.] [T. G. P.]

ACCARON. [EKRON.] Accaron is the form used by Saewulf for Acre (E. T. 48). [W.]

ACCCHO (𐤀𐤠𐤥), Ges. derives the name from the Arabic, *hot sand*, a sense not contradicted by subsequent climatal or topographical changes; *ʾAxya*, *ʾAry*, Strabo; *Accho*; R. V. *Acro*; and the PROLEMAIS of the Maccabees and N. T.), now called *Akko*, or more usually by Europeans, *Saint Jean d'Acre*, an important seaport town on the Syrian coast, about 30 miles S. of Tyre. *Akko* is situated at the northern extremity of the Bay of Acre, which terminates southwards in the bold bluff of Carmel, and is the only inlet of importance on the Syrian coast south of St. George's Bay near *Beirût*. Inland the hills, which from Tyre southwards press closely upon the seashore, gradually recede, leaving in the immediate neighbourhood of *Akko* a fertile plain, watered by the small river *Nahr Naein* (Belus), which discharges itself into the sea a short distance south of the town. Its military importance, which has led to its being called "the key of Palestine," is due to its position, which enables the Power that holds it to close the coast road from Syria to Egypt, and to operate, from a convenient base, against any hostile force attempting to cross the plain of Esdraelon; it also has near at hand, at *Haifa*, a safe anchorage for shipping, and its own harbour was sufficient to afford protection to the galleys and vessels used in the Middle Ages. The town itself is triangular in form, the base facing the north and the apex the south; it is surrounded on the land

side by double ramparts, flanked by towers and bastions; and there are remains of an outer and inner port. Few traces of the old town are to be found; the original name has alone survived all the changes to which the place has been exposed.

In the division of Canaan among the tribes Accho was assigned to Asher, but it was never conquered by the Israelites (Judg. i. 31). No further mention is made of it in O. T. history, and it is always reckoned among the cities of Phœnicia (Strab. xvi. 2, § 25; Plin. v. 17; Ptol. v. 15). It is described by Josephus as a maritime city of Galilee, situated in the great plain (B. J. ii. 10, § 2). When Shalmaneser IV. advanced against Tyre, which had revolted against him, Accho, with Sidon, Palaetyrne, and other cities joined the Assyrians and assisted them with vessels and men (Ant. ix. 14, § 2). It afterwards revolted, but was recaptured by Sennacherib, and a little later was ceded by Esarhaddon to the king of Tyre, in return for services which that monarch had rendered to the Assyrians. It passed into the hands of the Babylonians, and afterwards into those of the Persians, who used it as a place of assembly for their troops during their expeditions against Egypt (Strab. xvi. 2, § 25). According to the first distribution of Alexander's kingdom, it was assigned, with Phœnicia and Syria, to Ptolemy Soter, from whom it probably derived its name Ptolemais. During the wars between Syria and Egypt it several times changed hands; and its importance, as commanding the road down the Syrian coast, probably dates from this period. In 218 B.C. it was surrendered to Antiochus the Great by the treachery of Philopator's lieutenant, but was recovered by the Egyptians in the following year, and remained in their hands until it was finally incorporated in the kingdom of Antiochia. In the reign of Antiochus Epiphanes, Simon Maccabæus defeated a confederation of the people of Ptolemais, Tyre, and Sidon, and drove his enemies back within the walls of Ptolemais, but did not take the city (1 Macc. v. 22; Ant. xii. 8, § 2). It was taken by Alexander Balas (Ant. xiii. 2, § 1), who was married within its walls to Cleopatra, daughter of Ptolemy Philometor (Ant. xiii. 4, §§ 1, 2). It afterwards came into the possession of Demetrius Nicator, who gave it, with its lands, to Jonathan for the expenses of the Temple at Jerusalem (1 Macc. x. 39); when, however, Jonathan went, at the invitation of Tryphon, to take possession of the city, he was treacherously seized and his escort put to death (Ant. xiii. 6, § 2). Ptolemais was besieged by Alexander Jannæus, but the siege was raised on the approach of Ptolemy Lathyrus, who had landed from Cyprus with a large force to assist the besieged. The people having refused to admit Ptolemy, he, on his arrival, took the place by force (Ant. xiii. 12, §§ 2-6); but it was afterwards captured by Cleopatra, whom Alexander Jannæus had summoned to his assistance (Ant. xiii. 13, §§ 1, 2). It was transferred by Cleopatra with her daughter Cleopatra (Selene) to the Syrian monarchy, and it was under her rule when attacked and taken by Tigranes during his expedition against Syria (Ant. xiii. 16, § 4; B. J. i. 5, § 3). It opened its gates to the Parthians under Pacorus, who was advancing along the coast to the assistance

of Antigonus (*Ant.* xiv. 13, § 3; *B. J.* i. 13, § 1), and ultimately passed into the hands of the Romans, who raised it to the rank of a colony under the title of Colonia Claudii Caesaris Ptolemaia (*Plin.* v. 19, § 19). The only notice of it in the N. T. is in connexion with St. Paul's passage from Tyre to Caesarea (*Acts* xxi. 7). Herod built a gymnasium there (*B. J.* i. 21, § 11), but of this no trace has been found.

The post-biblical history of Acco will be found in *P. F. Mem.* i. 160-167, and Guérin, *Galilee*, i. 510-525. Acco is perhaps alluded to in Ocina (*Jud.* ii. 28); its mediæval names were Accaron and Acon; and the last name survives, where one would little expect it, in Lombard-street, where the church of St. Nicholas Acons

Coin of Acco.

is the successor of the church of St. Thomas of Acon, or Acres Hospital, founded by a member of the order of Augustine monks after the capture of Acre, under the patronage of St. Thomas of Canterbury. Coins of Acre exist in which the city is represented as a figure on a rock surrounded by the sea. In the right hand she bears three ears of corn; at her feet is the image of a river with open hands. [W.]

AC'COOS (Ἀκκῶς; *A. 'Akḥṓs*; *Jacob*), father of John and grandfather of Eupolamus, the ambassador from Judas Maccabæus to Rome (*I Macc.* viii. 17). [W. A. W.]

AC'COZ. [Koz.]

ACELDAMA (Ἀκελδამά; *Lachmann* and *Tischendorf* [NB.], Ἀκελδამάχ; *Haeldama*; *R. V. Aeldama*; *χαρπον αἱματος*, "the field of blood;" *Chald.* ܐܬܪ ܕܕܡܐ, the name given by the Jews of Jerusalem to a "field" (*χαρπον*) near Jerusalem purchased by Judas with the money which he received for the betrayal of Christ, and so called from his violent death therein (*Acts* i. 19). This is, apparently, at variance with the account of St. Matthew (xxvii. 8), according to which the "field of blood" (*ἀγρος αἱματος*) was purchased by the priests with the thirty pieces of silver after they had been cast down by Judas, as a burial-place for strangers, the locality being well known at the time as "the field of the potter" (τὸν ἀγρὸν τοῦ κεραμῆως). See *Alford's* notes to *Acts* i. 19. And accordingly ecclesiastical tradition appears, from 600 A.D., to have pointed out two distinct (though not unvarying) spots as referred to in the two accounts.

Bp. Jacobson (*Speaker's Comm.*, note on *Acts* i. 19) has pointed out that the variance is imaginary. The money received by Judas as the "reward of iniquity" was invested by others. A similar use of language is to be noted when the Jews (and not the Romans) are said to have

crucified Jesus Christ (*Acts* v. 30), Joseph of Arimathea to have hewn out the new tomb, and Saul to have offered sacrifice (*1 Sam.* xiii. 9).

Aeldama, now called *Hakk ed-Dumm*, is shown at the east end of a broad terrace on the southern slope of the modern valley of Hinnom, not far from the pool of Siloam; and the name is more particularly applied to a large vaulted chamber built against the thick bed (*malaki*) of limestone in which most of the large tombs on the right bank of the ravine have been excavated. The chamber is deep, and its floor is covered by a thick bed of bones and soil; in the face of the rock, within the building, there are two sepulchral chambers, with "loculi," and traces of the steps which led down to them are still visible. Against the face of the rock are buttresses of masonry which formed part of an earlier building than the existing one (see O. S. plan of Jerusalem, notes, and photo.). The chamber is probably the same as that described by Maundrell as "a square fabric twelve yards high, built for a charnel-house;" the corpses were let down into it from the top, and apparently left uncovered.

The tradition which fixes Aeldama upon this spot reaches back to the time of Jerome, who describes it as being "ad australem plagam montis Sion;" and it is mentioned by Antoninus Martyr, Arculfus, Snæwulf, and almost every traveller to the present day. Arculfus distinguishes between Aeldama, then a small field covered with a heap of stones, and the spot, apparently, as at present, on the Hill of Evil Counsel, where Judas hanged himself on a fig-tree.* The latter site was afterwards transferred to the vicinity of Absalom's pillar in the Kedron valley, where Sir J. Maundeville found the "elder tree" of Judas, and Maundrell was shown "another Aeldama." In *La Cité de Jérusalem* (p. 16) a stone arch, which gave its name to a street within the city, is identified with the place of the suicide of Judas. At a later period the site was re-transferred to the Hill of Evil Counsel, where, according to tradition, stood the country-house of Caiaphas in which Judas made his bargain. In the 12th and also in the 14th centuries, Aeldama belonged to the Latins, and there was a small church there; but in the 17th century it was in the hands of the Armenians, who sold the right of interment at a high price. "Aeldama" was the name popularly given to the estate purchased by the infamous Judge Jeffries with the money extorted by him during the "bloody assize" (Macaulay).

It was believed in the Middle Ages that the soil of this place had the power of very rapidly consuming bodies buried in it (*Sandya*, p. 187), and, in consequence either of this or of the sanctity of the spot, great quantities of the earth were taken away; amongst others by the Pisan Crusaders in A.D. 1218 for their *Campo Santo* at Pisa, and by the Empress Helena for that at

* Eusebius, from whom Jerome translated, has here *ἐν βορείῳ*. This may be a clerical error, or it may add another to the many instances existing of the change of a traditional site to meet circumstances.

* Antoninus Martyr however says, "De Gethsemane ascendimus ad portam Hierosolymæ per gradus munitos. In dextera parte portæ est oliveum et ficulnea, in qua Judas laqueo se suspendit" (*Hin.* xvii.).

* The prophecy referred to by St. Matthew, Zechariah (not Jeremiah) xi. 12, 13, does not in the present state of the Hebrew text agree with the quotation of the Evangelist. The Syriac Version omits the name altogether. See *Speaker's Comm.* on Matt. xxvii. 9, additional note.

Rome (Rob. i. 355; Baumer, p. 270). Besides the ciarrel-house above mentioned, there are several large hollows in the ground in this immediate neighbourhood which may have been caused by such excavations. Kraft states (*Top. Jer.* 193) that he saw people digging clay at Aceldama. Schultz (*Jer.* 39) and Porter (*Giant Cities*, 147) speak of a bed of clay at that place. Clay is still obtained from the hill above the valley of Hinnom. [G.] [W.]

ACHAIA (Ἀχαΐα) signifies in the N. T. a Roman province, which included the whole of the Peloponnesus and the greater part of Hellas proper with the adjacent islands. This province with that of Macedonia comprehended the whole of Greece: hence Achaia and Macedonia are frequently mentioned together in the N. T. to indicate all Greece (Acts xviii. 12, xix. 21; Rom. xv. 26, xvi. 5 [where Asia is the correct reading]; 1 Cor. xvi. 15; 2 Cor. ii. 1, ix. 2, xi. 10; 1 Thess. i. 7, 8). A narrow strip of country upon the northern coast of Peloponnesus was originally called Achaia, the cities of which were confederated in an ancient League, which was renewed in B.C. 280 for the purpose of resisting the Macedonians. This League subsequently included several of the other Grecian states, and became the most powerful political body in Greece; and hence it was natural for the Romans to apply the name of Achaia to the Peloponnesus and the south of Greece, when they took Corinth and destroyed the League in B.C. 146. (Καλοῦσι δὲ οὐκ Ἑλλάδος ἅλλ' Ἀχαΐας ἡγεμόνα οἱ Ῥωμαῖοι, διότι ἐχειρόσαντο Ἑλλάδας δὲ Ἀχαιῶν τότε τοῦ Ἑλληνικοῦ προεσκήσαν, Paus. vii. 16, §10). Whether the Roman province of Achaia was established immediately after the conquest of the League, or not till a later period, need not be discussed here (see *Dict. of Geogr.* i. p. 17). In the division of the provinces by Augustus between the emperor and the senate in B.C. 27, Achaia was one of the provinces assigned to the senate, and was governed by a proconsul (Strab. xvii. p. 840; Dio Cass. liii. 12). Tiberius in the second year of his reign (A.D. 16) took it away from the senate, and made it an imperial province governed by a procurator (Tac. Ann. i. 76); but Claudius restored it to the senate (Suet. Claud. 25). This was its condition when Paul was brought before Gallio, who is therefore (Acts xviii. 12) correctly called (R. V.) the "proconsul" (ἀνθύπατος) of Achaia, which is translated in the A. V. "deputy" of Achaia. [J. S. H.] [W.]

ACHATICUS (Ἀχαΐκός; Achaicus), name of a member of the Christian household of Stephanus (1 Cor. xvi. 17). [G.]

ACHAN (אֲחָנִי, written אֲחָר [ACHAR] in 1 Ch. ii. 7; B. אֲחָדָר, A. אֲחָדָר in Josh. i; Achan; BA. אֲחָדָר in Chron.; Achar), the son of Carmi, an Israelite of the tribe of Judah, who, when Jericho and all that it contained were accursed and devoted to destruction (Josh. vi. 17-19), secreted a portion of the spoil in his tent (Josh. vii. 1-21). For this sin Jehovah punished Israel by their defeat in their attack upon Ai. When Achan confessed his guilt, and the booty was discovered, he was stoned to death with his whole family by the people in a valley situated

between Ai and Jericho, and their remains, together with his property, were burnt (Josh. vii. 24, 25). From this event the valley received the name of Achor (i.e. trouble) [ACHOR]. From the similarity of the name Achan to Achar, Joshua said to Achan, "Why hast thou troubled us (אֲכָרָה)?" The Lord shall trouble thee (אֲכָרָה) this day" (Josh. vii. 25). In order to account for the terrible punishment executed upon the family of Achan, it is quite unnecessary to resort to the hypothesis that they were his accomplices in an act of military insubordination. The sanguinary severity of Oriental nations, from which the Jewish people were by no means free, has in all ages involved the children in the punishment of the father; but, independently of such considerations, according to the Jewish apprehension of the second commandment, the sins of the father were visited upon the children by a distinctly judicial medium. Achan was guilty of a distinct breach of the covenant made by God with His people, and his family were treated as guilty of the father's sin (Josh. vii. 15; xxii. 20). They were punished upon the ground of being implicated in his sin (cp. Mozley's *Lectures on the Old Testament*, pp. 115, 116). This is also the view taken by the Talmud, which is prompt to recognise that Achan's confession of his sin (Josh. vii. 20) was accepted: "He was punished in this life ('The Lord shall trouble thee this day,' Josh. vii. 25); but he has part in the life to come" (Midr. *Wajikra Rabba*, §9 [on Lev. vii. 11]. Hamburger, *RE*, s. n. "Achan"; Wüschke, *Bibl. Rabb. Lief.* 22, p. 54). [R. W. B.] [F.]

ACHAR (see ACHAN), a variation of the name Achan, which seems to have arisen from the play upon it in 1 Ch. ii. 7: "Achar, the troubler (עֲוֹרֵר) of Israel, who committed a trespass in the devoted thing" (R. V.). [W. A. W.]

A'CHAZ (אַחָז; Achar). AHAZ, king of Judah (Matt. i. 9). [W. A. W.]

ACH'BOR (אֲחֹבֹר, a mouse; BA. [usually] אֲחֹבֹר; Achobor). 1. Father of Baal-haanun, king of Edom (Gen. xxvi. 38, D. אֲחֹבֹר; 1 Ch. i. 43). 2. Son of Micahiah, a contemporary of Josiah (2 K. xxii. 12, 14; Jer. xxvi. 22 [LXX. = xxxiii. omits], xxxvi. 12), called ABDON [No. 4] in 2 Ch. xxxiv. 20. [A. C. H.] [F.]

ACHIACHARUS (Heb. and Chald. [ed. Neubauer] אֲחִיכָר; Achicharus, N. אֲחֵיכָרֹס; Itala, Achicharus). On the fanciful reproduction of this name as אֲחִיכָרֹס, see *Speaker's Comm.* on Tobit, add. note to i. 21. The supposition that the name is אֲחִיכָרֹס = Postremus is not less fanciful, the chief minister, "cupbearer, and keeper of the signet, and steward, and overseer of the accounts" at the court of Sarchedonus or Esarhaddon, king of Nineveh, in the Apocryphal story of Tobit (Tob. i. 21, 22; ii. 10; xiv. 10). He was nephew to Tobit, being the son of his brother Anael, and supported him in his blindness till he left Nineveh. From the occurrence of the name of Aman in xiv. 10, it has been conjectured that Achicharus is but the Jewish name for Mordecai, whose history suggested some points which the author of the Book of Tobit worked up into his

narrative; but there is no reason to have recourse to such a supposition, as the discrepancies are much more strongly marked than the resemblances (see *Speaker's Comm.* note on Tob. xiv. 10). [W. A. W.] [F.]

ACHI'AS (Αχίας), son of Phinees; high-priest and progenitor of Esdras (2 Esd. i. 2), but omitted both in the genealogies of Ezra and 1 Esdras: perhaps confounded with Ahijah, the son of Abitub and grandson of Eli. [W. A. W.]

A'CHIM (Αχιμ; Achim, Matt. i. 14), son of Sadoc, and father of Eliud, in our Lord's genealogy; the fifth in succession before Joseph the husband of Mary. The Hebrew form of the name would be אֲחִימ, Jachin (Gen. xli. 10, A. 'Iaxelμ, A. *vid 'Axiμ, D. 'Iaxelμ, Jachin; 1 Ch. xxiv. 17, A. 'Iaxelμ, B. Γαμουβ, Jachin). It is a short form of Jehoiachin, the Lord will establish. The name, perhaps, indicates him as successor to Jehoiachin's throne, and expresses his parents' faith that God would, in due time, establish the kingdom of David, according to the promise in Is. ix. 7 (c. 6 Heb.) and elsewhere. [A. C. H.] [F.]

ACHI'OR (Αχιώρ, i.e. אֲחִיֹּר, the brother of light [comp. אֲחִיֹּר, Num. xxxiv. 27]; Achior; confounded with 'Αχιόραπος, Tob. xi. 17, Gk.), a general of the Ammonites in the army of Holofernes, who is afterwards represented as becoming a proselyte to Judaism (Judith v. vii. xiii. xiv.). [B. F. W.]

A'CHISH (אַחִישׁ; 'Αρχίος; Achis), a Philistine king at Gath, son of Maach (1 Sam. xxvii. 2), called in the 34th Psalm (title) ABIMELECH [No. 1], possibly the dynastic name of the Philistine kings (cp. Gen. xx. 2), Achish being his personal name. David twice found a refuge with him when he fled from Saul. On the first occasion, being recognised by the servants of Achish as one celebrated for his victories over the Philistines, he was alarmed for his safety, and feigned madness (1 Sam. xxi. 10-13). [DAVID.] From Achish he fled to the cave of Adullam. 2ndly, David fled to Achish with 600 men (1 Sam. xxvii. 2), and remained at Gath a year and four months.

Whether the Achish, to whom Shimei went in disobedience to the commands of Solomon (1 K. ii. 39, 40), be the same person is uncertain. Riehm (*HWB.* s. n.) thinks that he was. [R. W. B.] [F.]

ACHITOB (Αχιτωβ, B. 'Αχει; Achitob). Ahitub, the high-priest in the genealogy of Esdras (1 Esd. viii. [Vulg. vii.] 2; 2 Esd. i. 1). [W. A. W.]

ACH'METHA. [ECBATANA.]

A'CHOR, VALLEY OF (אֶחָזֵר; φάραγξ 'Αχώρα; Έμεκαχώρα; Hos. κολὰρ 'Αχώρα; vallis Achor) = "valley of trouble," according to the etymology of the text; the spot at which Achan, "the troubler of Israel," was stoned (Josh. vii. 24, 26). On the N. boundary of Judah (xv. 7; also Isa. lxx. 10; Hos. ii. 15, who alludes to the meaning of the name rather than to the place). Jerome (*OS.* pp. 125, 31, 151. 14) describes it as north of Jericho; but this

is at variance with the course of the boundary in Joshua (Keil's *Joshua*, 131). It is now the *Wady Kelt*, which runs into the Jordan valley to the south of Old Jericho and north of Roman Jericho. [G.] [W.]

ACH'SA (אָחֶסָא; B. 'Ασά, A. 'Ασά; Achsa), daughter of Caleb, or Chelubai, the son of Hebron (1 Ch. ii. 49). [CALEB.] In the R. V. the name is more correctly given as ACHSAH. [W. A. W.] [F.]

ACH'SAH (אָחֶסָה, Ges. anklet; 'Ασά; Aza), daughter of Caleb, the son of Jephunneh, the Kenazite. Her father promised her in marriage to whoever should take Debir, the ancient name of which (according to the analogy of KIRJATH-ARBA, the ancient name of Hebron) was KIRJATH-SEPHER (or, as in Josh. xv. 49, KIRJATH-SANNA, the city of the book. Othniel, her father's younger brother, took the city, and accordingly received the hand of Achsa as his reward. Caleb, at his daughter's request, added to her dowry the upper and lower springs, which she had pleaded for as peculiarly suitable to her inheritance in a south country (Josh. xv. 15-19. See Stanley's *S. and P.* p. 161). [GULLOTH.] The story is given in Judg. i. 11-15. Achsa is mentioned again, as being the daughter of Caleb, in 1 Ch. ii. 49, which in the A. V. is incorrectly given as Achsa. [ACHSA.] But there is much confusion in the genealogy of Caleb there given. [CALEB.] [A. C. H.]

ACH'SHAPH (אָחֶשָׁף, Ges. enchantment; Achsaph [Josh. xi. xii.], Azaph [Josh. xix.]), a city within the territory of Asher, named between Beten and Alammelech (Josh. xix. 25); originally the seat of a Canaanite king (Josh. xi. 1, xii. 20 [B., in both places, 'Ασέφ, but in xix. 25 Kεφ; A. in xi. 1 'Αχίφ (F. 'Αχέφ), in xii. 20 'Ασάφ]). It is not yet identified. The modern *Kefr Yásif*, a small village, with an ancient well, north-east of Acre (*P. F. Mem.* i. 146, 153), does not suit (Dillmann on Josh. xi. 1). Others have suggested *Haifa*, a town which, from its situation, must always have been too important to have escaped mention in the history, as it otherwise would have done. The identification with either *Yásif* or *Haifa* is, however, philologically most questionable. [G.] [W.]

ACH'ZIB (אָחֶזֶב = falsehood; in Josh. i. c. B. Kεφέβ; A. omits; Achzib). 1. A city of Judah, in the Shefelah, named with Keilah and Maresah (Josh. xv. 44; Mic. i. 14). The latter passage contains a play on the name: "the houses of Achzib (אָחֶזֶב) shall be a lie" (אָחֶזֶב; LXX. εἰς κενὸν ἐγένοντο; Vulg. domus mendacii in deceptionem). It is probably the same with CHEZIB and CHOZERA, which see. The name may perhaps be retained in *'Ain Kεzbeh*, at *Beit Nettif*, 2½ miles from *'Aid el-Má* (Adullam). 2. In Josh. i. c. B. 'Εχοζόβ; A. 'Αχέφ [A. * 'Ασέφ, A. superscr. χ]; Achziba: in Judg. i. c. B. 'Ασχαζέ; A. 'Ασχενδελ; Achazib. A town belonging to Asher (Josh. xix. 29), from which the Canaanites were not expelled (Judg. i. 31); afterwards Eodippa (Jos. B. J. i. 13, § 4, 'Εκδιππών). Josephus also (*Ant.* v. 1, § 22) gives the name as 'Αρχή . . . ἡ καὶ Ἀκτιρούς. In *Rhin. Hierosolym.* Eodippa is placed 8 Roman miles from

Ptolemais, on the road to Tyre; by Jerome (*OS.* p. 130, 13) 9 Roman miles. Here was the *Casale Huberti* of the Crusaders (Schulx; Ritter, *Pal.* p. 782); and it is now *ex-Zib*, on the sea-shore at the mouth of *Waddy el-Kürn*; a small village on an artificial mound, with unimportant ruins (*P. F. Mem.* i. 148, 155, 193; and cp. Maundrell, p. 427). Achzib is mentioned in the Assyrian inscriptions, under the form Akzihi, as one of the towns dependent on Sidon, which were captured by Sennacherib during his third campaign (Schroder, *AAT.* p. 170). After the return from Babylon it was considered by the Jews as the northernmost limit of the Holy Land; it possessed a synagogue and was fortified. See the quotations from the Gemara in Reland (p. 544). [G.] [W.]

ACIPHA (B. Ἀχιβά; A. Ἀχιφά; *Agista*). Hakopha (1 *Esd.* v. 31). [W. A. W.] [F.]

ACTHO ([T.] omits) A. Ἀκθών, probably an error for Ἀχιβά, the reading of N; *Achitob*, i.e. ἀδελφὸς, brother of goodness), one of the ancestors of Judith (*Judith* viii. 1; see *Speaker's Comm.*). [B. F. W.]

ACRABATTINE. [ARABATTINE; AKRABEIM.]

ACTS OF THE APOSTLES. 1. *The Title.*—The title of this Book, as given in the oldest authorities, is either "Acts" or "Acts of Apostles." The former (ᾠράξεις) appears at the commencement and in the headings of the pages in N; the latter (ᾠράξεις ἀποστόλων) in B D (but with the itacism ᾠράξις in D), and in the subscription of N. Accordingly the Book is quoted indifferently by the early Fathers as "Acts," "The Acts" (*Orig.* *Op.* i. p. 434, *iv.* pp. 6, 25; comp. *Euseb. H. E.* vi. 25; Tertull. *c. Marc.* v. 3, *de Præscr.* 22, and elsewhere), or "Acts of Apostles," "The Acts of the Apostles" (*Iren.* iii. 13, 3; *Clem. Alex. Strom.* v. 12, p. 696; Tertull. *c. Marc.* v. 1, 2, and elsewhere; *Orig.* *Op.* i. p. 22, ii. p. 538, &c.). Longer titles, such as "Acts of the Holy Apostles" (ᾠράξεις τῶν ἁγίων ἀποστόλων), found in the subscription of E G H, may be dismissed at once from our consideration. The author of the *Muratorian Canon* (c. A.D. 180?) refers to the Book as containing "acta omnium apostolorum" (p. 18, ed. Tregelles); but he does not give this definitely as a title, and by inserting "omnium," which however is not a correct description, he obviously desires to distinguish it from apocryphal histories of individual Apostles, such as the "Acta Petri," &c. Whether we should consider the larger title a later expansion of the shorter, or whether on the other hand "Acts" is an abridgement of "Acts of Apostles" for convenience, may be a matter of question. On the whole, perhaps the latter view is the more probable; since the long and short forms are found in the same writers, and moreover, whenever the title of the Book is distinctly recorded as such—for instance by Eusebius (*H. E.* iii. 25), by Athanasius (*Op.* ii. p. 787), by Chrysostom (*Op.* iii. p. 54), by Euthalius, and by Photius (*Amphil.* Qu. 123)—the word ἀποστόλων is never wanting. We gather also from the evidence, that in the original form the definite articles were absent. Thus, for instance, Chrysostom (in the passage just referred to), having

distinctly given the title without the articles (ταύτην ἔχει τὴν ἐπιγραφὴν, Πράξεις ἀποστόλων), nevertheless in the same context writes, ἀπὸ τῶν πράξεων τῶν ἀποστόλων. This example shows that no stress can be laid on the fact that elsewhere the Book is quoted in early writers as "The Acts of the Apostles." In Wicliffe's Version, which was translated from the Vulgate, it is headed "Deeds of Apostles"; but in the Authorised (1611) the heading is "The Actes of the Apostles," as also in the previous English Versions of the 16th century generally, which were made from the Greek. But, though it seems clear that the earlier title was "Acts of Apostles" (ᾠράξεις ἀποστόλων) without the definite article, the value of the fact in its bearing on the contents is diminished by the consideration that in titles and headings the omission of the article was common in ancient times, as it is with ourselves. Thus in Matt. i. 1 the words are "Book of generation (or genealogy) of Jesus Christ" (Βίβλος γενέσεως κ. τ. λ.). Moreover, we have no ground for assuming that this title, whether ᾠράξεις ἀποστόλων or ᾠράξεις simply, was given to the Book by the writer himself. In other cases in the N. T. we find indications that the earliest existing headings are somewhat later than the writings themselves (*Lightfoot, Colossians*, p. 16). The later word πρεσβυτέρους is not a title of this individual Book; but, being compounded of ᾠράξεις and ἀπόστολος, designates lectionaries which contained lessons from the Acts and Apostolic Epistles (*Scrivener's Introduction*, pp. 71, 279, 301).

2. *The Scope and Contents.*—The Acts of the Apostles, like the Third Gospel, is addressed to one Theophilus. Was he an actual person, a disciple or friend of the writer? or have we here a fictitious name, a representative of the Christian reader generally? The former is the view commonly taken by modern writers. He has been made a native of Antioch, of Alexandria, of Rome, &c. by different critics, all without any shadow of authority which deserves consideration. If he were a real person, we might with greater probability place him at Philippi, for the writer of the Acts apparently had close relations with this place. Yet the other opinion is not to be hastily rejected; for it is at least consonant with the literary character of St. Luke's two treatises, and more especially of the prefaces. This view is thrown out as a suggestion by Epiphanius (*Haer.* li. 7, εἰσὶν τινὲς Θεοφίλου τότε γράφων . . . ἢ παντὶ ἀνθρώπῳ Θεὸν ἀγαπῶντι). It seems also to be present to the mind of Origen, though he does not express himself very clearly (*Hom.* in *Luc.* i. *Op.* iii. p. 933, Delarue). So also St. Ambrose, "Scriptum est evangelium ad Theophilum, hoc est ad eum quem Deus diligit" (*Exp. Evang. Luc.* i. 12, *Op.* i. p. 1270, ed. Bened.). In modern times it has found some rather lukewarm supporters (e.g. Renan, *L'Eglise Chrétienne*, p. 256). As the Greek equivalent to the Hebrew Jēdidiāh, Theophilus is not uncommon as a Jewish name. Thus it is borne by the Jewish high-priest (A.D. 37–41) the son of Annas (*Jos. Ant.* xviii. 5, § 3, xix. 6, § 2), who has been identified—an extremely improbable identification—with the person here addressed by St. Luke. Again, we find two persons so called in an inscription in a Jewish

cemetery at Rome (Schürer, *Gemeindeverf. der Juden in Rom*, p. 39). It was a frequent heathen name likewise (Pape, *Wörterb. Griech. Eigennamen*, s. v.; Fabric. *Bibl. Graec.* vii. p. 106 sq., ed. Harles; comp. Tac. Ann. ii. 55). Naturally also it was common among the Christians, e.g. the apologist Theophilus, Bishop of Antioch (c. A.D. 180). A reminiscence of this later Theophilus, combined with the tradition that St. Luke himself was an Antiochene, may have given rise to the Clementine statement that Theophilus was a person of importance in Antioch (*Recogn.* x. 71, "Theophilus qui erat cunctis potentibus in civitate sublimior"), who consecrated his house as a basilica, where the chair of St. Peter was established. In *Apost. Const.* vii. 48, a Theophilus is represented as the third Bishop of Caesarea of Palestine, and appointed to the see by the Apostles themselves, his predecessors being Zacchaeus and Cornelius. Probably our Theophilus is meant, as it is the practice of this writer to find an episcopal see for every worthy whose name is mentioned in the N.T. In the Armenian *Epistle of the Corinthians* to St. Paul (Aucher, *Armen. Gramm.* p. 177) one Theophilus is represented as a joint writer of the latter.

The adoption of the name Theophilus or Philotheus, as a representative godly Christian, has parallels in both ancient and modern times. Thus the treatise of Hippolytus, *de Antichristo* (pp. 1, 36, Lagarde), is addressed to his "beloved brother Theophilus," evidently a fictitious name; and in the *Symposium* of Methodius (ii. 1, p. 14, Jahn) one of the divine maidens bears the name Theophila. So likewise Law's *Atonement* is a *Dialogue between Eusebius and Theophilus*, and Wordsworth's treatise on the Church is designated *Theophilus Anglicanus*; while in Ken's *Manual of Prayer* for the Winchester scholars he addresses his reader as Philotheus.

If this view be correct, this second treatise is drawn up, like the first, for the instruction of the godly reader who seeks information respecting the foundation of the Church (here addressed under the imaginary name Theophilus). It is no objection that he is designated *κρητιστος* (Luke i. 3), a title given to those in high position (Acts xxiii. 26, xxiv. 3, xxvi. 25); for there is no reason why the writer should not have wished to commend the faith of Christ to persons of this class.

Its aim, purport, and contents are set forth in the preface (i. 1-8). The first treatise is there described as an account of "all things which Jesus began both to do and to teach (*ἤρξατο ὁ Ἰησοῦς ποιεῖν τε καὶ διδάσκειν*), until the day on which, having given commandment through the Holy Ghost to the Apostles whom He had chosen, He was taken up (into heaven)." This language suggests (1) that, if the writer had given any title to the work, he might well have styled it "Second Treatise" (*δευτέρου λόγου*); and (2) that he regards it as strictly a continuation of the first, for this is implied in *ἤρξατο*, "began." But here a question arises. Is the "doer and teacher" the same person in the second part as in the first? In other words, is Jesus Himself here regarded as continuing in the history of the Church the work which He began in His personal ministry? This is Baumgarten's view, and it has been followed by

some later critics. In its favour are the facts, (α) that the form of the sentence suggests the same agent, and (β) that our Lord is again and again represented as interposing in person in the course of the narrative. If so, the title *πράξεις ἀποστόλων* is misleading, and obscures the author's main conception. But this view is not altogether free from the charge of artificiality. At all events we might expect that, if this had been the writer's leading idea, he would have emphasised it more plainly. It seems on the whole therefore more probable that the Apostles are represented as *continuing* the work which Jesus inaugurated in person. If so, the common title of the Book is fairly adequate, and Photius (*Amphil.* 123, p. 716, Migne) is right when he speaks of the Gospel as "comprising the Acts of the Lord" (*τὰς δεσποτικὰς περιέχουσα πράξεις*). Similarly Irenaeus (iii. 15. 1) describes the second treatise as "sequens testificatio ejus (Lucas), quam habet de actibus et doctrina apostolorum," with an obvious reference to the "doing and teaching" of our Lord as contained in the first. In this case the *ἤρξατο* may be answered by *ἔχει ἡ ἡμέρας κ. τ. λ.*, i.e. "the whole history of the doings and teachings of Jesus from the beginning till the final day of the Ascension"; as it is taken by Chrysostom (*Op.* ix. p. 5, *ἀπ' ἀρχῆς μέχρι τέλους*). This view also accords with the fact that special stress is laid on the selection of and charge to the Apostles, that their names are given again (though previously mentioned in the Gospel), and that the completion of their number is recorded. Bengel, following Chrysostom, describes the relation of the two treatises somewhat differently, "non tam Apostolorum quam Spiritus Sancti describens, sicut prior liber Acta Jesu Christi habet"; but this is not the antithesis present to the mind of the writer himself.

Thus the two treatises are regarded respectively as the ministry of Jesus and the ministry of the Apostles, or (if we take the other view) the ministry of Jesus in His own person and the ministry of Jesus through the Apostles. The first has been given in full by St. Luke (*πρὸς πάντων κ. τ. λ.*); the second, not being yet concluded, could not be so given. The contents of the first have been directly described. This description is expressed in such language (*τὸν μὲν πρῶτον κ. τ. λ.*) as to lend the reader to expect an antithetical clause (*ἐν δὲ τῷ δευτέρῳ διηγήσασθαι*) describing the contents of the second. But this antithetical clause never appears, and in place of it the sentence runs off into a narrative of facts. In this narrative of facts therefore we look for the explanation; and we are not disappointed. The Lord is represented as conversing with the disciples after the Resurrection and preparing them for their mission. His words are prophetic of the future, and thus implicitly involve a table of contents:

"Ye shall receive power, when the Holy Ghost," &c. (ii. 1-13).

"And ye shall be witnesses unto Me,

(I.) Both in Jerusalem (ii. 14-viii. 1),

(II.) And in all Judaea and Samaria (viii. 2-xi. 18),

(III.) And to the uttermost parts of the earth" (xi. 19-xxviii. 31).

The first two sections are complete; the fulfilment of the third is given not actually, but potentially. Such an earnest of it is afforded as to leave no doubt of its ultimate accomplishment. St. Paul travels to the far West; he preaches the faith in Rome without hindrance; and thus Christianity has obtained a firm footing in the metropolis of the human race, the stronghold of heathendom.

After this anticipatory abstract of the history of the Christian Church, our thoughts are led forward to the great and terrible day, the consummation of all things, when this history shall be wound up. But again this is effected, not by his own words, but by the narrative of the sayings and doings of others (i. 8-11). The departure of Jesus by the Ascension is thus linked with His return in the second Advent. The narrative of the Acts spans over this interval potentially.

These considerations will explain the close of the Book. Whatever apparent abruptness there may be in the ending, the writer was clearly not interrupted so as to leave his work unfinished. He closes with the event which his aim required. The occupation of Rome, the capital of the world, was the one eventful crisis which closed an epoch. Nor did he contemplate a "third treatise," as some have imagined. There is indeed no conceivable plea for any third treatise, if our view of his main design be correct. Nor again can any chronological argument be drawn from his stopping at this particular point; as for instance that he was unacquainted with St. Paul's visit to Spain or with the martyrdom of the two Apostles. He was not writing the biography of either Apostle.

It will be observed also that the close of the second treatise is strictly analogous to the close of the first:

Fulfillment of prophecies.	Luke xxiv. 44-49.	Acts xxviii. 23-29.
Joyful termination.	Luke xxiv. 50-53.	Acts xxviii. 30, 31.

The following then is the table of contents:—

INTRODUCTORY.

- (i.) Connexion with the previous narrative i. 1, 2.
- (ii.) Christ's final commands and prophecies respecting the Kingdom of God i. 3-8.
- (iii.) The resurrection, and announcement of the Second Advent i. 9-11.
- (iv.) The names and attitude of the Apostles i. 12-14.
- (v.) The vacant place in the apostolate filled i. 15-26.

THE MAIN NARRATIVE.

A. The Hebrew Period (ii.-v.).

- (i.) Consecration of the Apostles and first disciples by the outpouring of the Holy Ghost ii. 1-13.
- (ii.) The ingathering of the first-fruits on the day of Pentecost ii. 14-41.
- (iii.) The inner life and the extension of the infant Church ii. 42-47.
- (iv.) The first miracle (of mercy and restoration). The address of Peter and the conflict with the rulers consequent thereupon iii. 1-iv. 31.
- (v.) The unity and communion of goods of the early Church iv. 32-37.

- (vi.) The sin of Ananias and Sapphira. The second miracle (of retribution and judgment) v. 1-11.
 - (vii.) The miraculous working of the Apostles. Their imprisonment, their appearance before the priests and rulers, and their dismissal v. 12-41.
- This period closes with a notice of their energetic and incessant preaching of Jesus as the Christ v. 42.

B. The Transitional Period (vi.-xii.).

- (i.) Appointment of a diaconate (chiefly or wholly Hellenist) to meet complaints of Hellenists as to the distribution of alms vi. 1-7.
 - (ii.) The labours, apprehension, speech, and martyrdom of Stephen vi. 8-vii. 60.
 - (iii.) The consequences of the martyrdom:
 - (a) Scattering of the disciples in Judaea and Samaria; viii. 1-4.
 - (b) Antagonism of Saul viii. 1-4.
 - (iv.) Samaria evangelized through Philip, whose work is confirmed by the Apostles Peter and John. First conflict with a false form of religion (outside Judaism) in the person of Simon Magus viii. 5-25.
 - (v.) Conversion of the Ethiopian eunuch, a proselyte viii. 26-40.
 - (vi.) Conversion of Saul and vision of Ananias. Saul is healed and disputes with the Hellenists at Jerusalem ix. 1-30.
 - (vii.) Peace in the churches "throughout the whole of Judaea and Galilee and Samaria" ix. 31.
 - (viii.) Peter's miracles at Lydda (Aeneas) and at Joppa (Dorcas) ix. 32-43.
 - (ix.) Visions of Cornelius and of Peter. Peter visits converts, and baptizes Cornelius and his companions. Their Baptism is anticipated by an outpouring of the Holy Ghost x. 1-48.
 - (x.) Peter reports the case to the Church at Jerusalem and obtains its approval xi. 1-18.
 - (xi.) Disciples scattered at the persecution of Stephen preach in Phoenicia, at Cyprus, and at Antioch, to the Greeks (v. l. Hellenists). Their action confirmed by the Apostles through Barnabas xi. 19-24.
 - (xii.) Saul preaches at Antioch, where the disciples are first called Christians xi. 25, 26.
 - (xiii.) The Christians of Jerusalem relieved by the Gentile churches xi. 27-30.
 - (xiv.) Herod's persecution of the Church. Martyrdom of James and imprisonment of Peter. Release of Peter, who goes elsewhere, and punishment of Herod xii. 1-23.
- At the close is a notice of the triumphant progress of the Word of God xii. 24.

reference to the Acts of the Apostles, and to Luke as their author, occurs in the writings of the Fathers before one by Irenæus about the end of the 2nd century" (*Supernatural Religion*, iii. p. 2). (2) Clement of Alexandria (c. A.D. 190-200) represents more especially the Church whose name he bears; but he mentions obligations to six different teachers—in Greece, in Egypt, in Palestine, Assyria, and the East—who had received the "tradition handed down direct from father to son from the holy Apostles Peter and James, John and Paul" (*Strom.* i. 1, p. 322). He quotes the Acts repeatedly, and in one passage (*Strom.* v. 12, p. 696) gives the name of the writer Luke. (3) The *Muratorian Canon* probably represents Rome, and is generally placed about A.D. 170-180 (since the author speaks of the episcopate of Pius, c. A.D. 140-155, as "nuperrime temporibus nostris"), but may be a few years later. This writer (ed. Tregelles, p. 18), in a passage which is somewhat corrupt, but of which the general tenor seems clear, after the four Gospels mentions "Acta omnium apostolorum" as written by Luke and addressed to Theophilus, adding that he wrote down the events of which he had personal knowledge ("corprindit quia [i. quæ] sub præsentia ejus singula gerebantur"), and that evidently he was not an eye-witness of the martyrdom of Peter and the journey of Paul to Spain. (4) Tertullian is the chief representative of the African Church. His literary activity covers the last years of the 2nd and the early years of the 3rd centuries. He quotes the Acts many times. About 150 references or quotations are given by Rössch (*Das Neue Testament Tertullians*, p. 291 sq.), but a certain percentage of these may be doubtful. He quotes it generally as *Acta* or *Acta Apostolorum* and ascribes it to St. Luke (*de Jejun.* 10). He cites it too as Scripture (see e. g. *Præscr. Haer.* 22), and designates it *Apostolicum Instrumentum* (*Pudic.* 12) or *Scriptura Apostolicorum* (*Marc.* v. 2). (5) Polycrates of Ephesus (A.D. 189-198) represents Asia Minor at the close of this century. He lays great stress on the primitive tradition, which he had inherited through several relatives who were Bishops (Euseb. *H. E.* v. 24). He quotes Acts v. 29 *verbatim*, though not by name, in the words "They that are greater than I have said, *It is right to serve God rather than men*" (*πειθαρχεῖν δεῖ Θεῷ μᾶλλον ἢ ἀνθρώποις*), a saying ascribed in the Acts to "Peter and the Apostles."

We find then that in the last decades of the 2nd century the Book is quoted profusely and without any sign of misgiving as authoritative Scripture and as the work of St. Luke. The testimony comes from all quarters of the Church; and the witnesses are persons who were mixed up in various religious controversies and bad alliances far and wide, striking (in some instances) deep into the past. There can be no doubt therefore about the universal verdict of the Church at this time. Thus at the earliest moment when we have sufficient materials for a judgment, the evidence in favour of the Book is overwhelming.

The earlier testimony is of the same kind as for most of those Canonical Books of which the authenticity has never been questioned. The apostolic Fathers do not directly quote Romans

or 2 Corinthians or Galatians, nor are these Epistles named by any Church writer before Irenæus. Of Acts xx. 35, "To remember (*μνημονεύειν*) the words of the Lord Jesus, how He said, It is blessed rather to give than to receive (*μᾶλλον διδόναι ἢ λαμβάνειν*)," we have reminiscences in CLEMENT OF ROME, § 13, "especially remembering (*μνησθέντες*) the words of the Lord Jesus which He spake" (comp. § 46), and § 2, "more gladly giving than receiving" (*ἡδίων δίδοντες ἢ λαμβάνοντες*), for in the context of this latter passage the Corinthians are praised for "giving heed to the words" of Christ. Again in § 18, "What shall we say of David, to whom witness is borne (*τῷ μαρτυρημένῳ*), unto whom God said, I have found a man after My heart, David the son of Jesse, with oil," &c., Clement is compounding the original passage in the Psalms, lxxxviii. (lxxxix.) 20, with the quotation in Acts xiii. 22, "To whom also He said, bearing witness (*μαρτυρήσας*), I have found David the son of Jesse a man after my heart, who will do," &c., where the features borrowed from the Acts are (1) the mention of the "witness"; (2) the addition of "a man after my heart" (comp. 1 Sam. xiii. 14); and (3) the further addition of "the son of Jesse"—none of these being found in the original passage of the Psalms. This threefold coincidence is not easily explained away. The coincidences in IGNATIUS are somewhat less close, but not insignificant. *Magn.* 5, "to go (*χερεῖν*) to his own place," recalls Acts i. 25, "to go (*πορεύθηναι*) to his own place." In *Philad.* 11 we have the phrase *ἀντὶ μαρτυρημένων*, which occurs also in Acts vi. 3. In *Smyrn.* 3, "After His Resurrection He ate and drank with them (*συνέφαγεν αὐτοῖς καὶ συνέπιεν*)," there is an allusion to Acts x. 41, *συνεφάγομεν καὶ συνεπίομεν αὐτῷ μετὰ τὸ ἀναστῆναι κ. τ. λ.* In POLYCARP the coincidences are of the same kind, but stronger. § 1, "Whom God raised (*ἤγειρεν*), loosing the pangs of Hades (*ἀλῶσας τὰς ὀδύνας τοῦ ᾗδου*)," closely follows Acts ii. 24, "whom God raised up (*ἀνέστησεν*), having loosed the pangs of death (*ἀλῶσας τὰς ὀδύνας τοῦ θανάτου*)," where there is a v. l. *ᾗδου*, which is shown from the authorities (D, e, Vulg., Memph., Iren.) to have been current at least as early as the 2nd century. Though the individual expressions (e.g. *ὀδύνας ᾗδου*) may be found elsewhere, there is nothing approaching to the parallelism throughout the sentence, so that it cannot be regarded as accidental. Again, in § 2 we have the expression "judge of quick and dead," as in Acts x. 42. There are also other coincidences (§ 2 to xx. 35, § 6 to vii. 52, § 12 to viii. 21), on which however no stress can be laid. Of PAPIAS (Euseb. *H. E.* iii. 39) we can only say that his anecdotes deal with personages mentioned in the Acts, Judas Barsabbas and the daughters of Philip (if he be the same Philip), and that his story of Judas the traitor is used by Apollinaris of Laodicea in the 4th century to reconcile the accounts of his death in St. Matthew and in the Acts, and may have had some such reference as told by himself. In HERMAS, who gives not a single quotation (strictly speaking) either from the Old or from the New Testament, we stumble on coincidences with the Acts, which however would have no great value in themselves. Thus

Hermas (*Mand.* iv. 3) uses the word καρδιογνώστης, "heart-knower," of God, which occurs twice in the Acts (i. 24, xv. 8), but is found nowhere else in the LXX. or N. T. Again, he speaks of being thought "worthy of hearing the Name," and of being "healed" or "saved by the Name" (*Vis.* iv. 2, *Sim.* ix. 28), expressions which are close parallels to Acts iv. 12, v. 41.

In the Apologists there are similar coincidences. Thus in JUSTIN MARTYR we have in two several passages (*Dial.* 36, 76) a reference to prophecy as announcing παθητός [ὁ] Χριστός, "the Messiah would be passible," as in Acts xxvi. 23. Here the coincidence consists not in the idea, but in the manner of expressing it, the word παθητός not occurring elsewhere in the LXX. or N. T. So again the summary of events after the Crucifixion in *Apol.* i. 50 seems to be taken from Acts i. 8 sq. (comp. ii. 33), the expression "to receive power" (λαμβάνειν δύναμιν) being common to both, besides other coincidences. Again, *Dial.* 68, "How saith the Word unto David that God would take a son for Himself from his loins (ἐκ τῆς ὀσφύος αὐτοῦ) . . . and would seat (καθίσει) him on the throne of His glory," is best explained as a reminiscence of Acts ii. 30, "God aware unto him by an oath that he would set (καθίσαι) of the fruit of his loins (τῆς ὀσφύος αὐτοῦ) upon his throne;" for in both passages "loins" (ὀσφύος) is substituted for "body" (κοιλίας), and "set" (καθίσαι) for "place" (τίθεσθαι) of the LXX. of Psalm cxxii. (cxxxii.) 11, though in neither case does the Hebrew suggest such a substitution. Again in *Dial.* 16 we read, "Ye slew the Just One and before Him the prophets," which has a close parallel in Acts vii. 52 (comp. Is. lvii. 1). Again, the connexion of "common or unclean things" with "refraining to eat" is matched by Acts x. 14, 28, xi. 8; and there are other coincidences likewise. It seems difficult, with these facts before us, to resist the inference that Justin was acquainted with the Acts. The coincidences in the other Apologists are much slighter. Thus TATIAN (*Orat. ad Græc.* 6) writes, "Though you consider us . . . babblers (σπερμολόγους)," the word used of St. Paul by the Athenians in Acts xvii. 18. In THEOPHILUS again (*ad Autol.* ii. 1) there is the same play on γινώσκειν, ἀναγινώσκειν, which appears in Acts viii. 30.

Of other writers in the 2nd century DIONYSIUS OF CORINTH is reported by Eusebius (*H. E.* iv. 23) as recording (δηλοῦν) that "Dionysius the Areopagite, when turned (προτραπέαίς) to the faith by the Apostle Paul in accordance with the records (τὰ δεδλωμένα) in the Acts, was the first to be entrusted with the bishopric of the diocese (παροικίας) of Athens." From this passage indeed it does not necessarily follow that Dionysius actually mentioned the Acts; but, if the language of Eusebius may be interpreted strictly, Dionysius of Corinth must have said that his early namesake was converted by St. Paul (not ὁ προτραπέαίς, but προτραπέαίς), as therein stated. In the EPISTLE OF VIENNE AND LYONS (Euseb. *H. E.* v. 1) the last prayer of "Stephen the perfect martyr" is given from Acts vii. 60, just as elsewhere in this same document the language used of Zacharias (the father of the Baptist) is taken from Luke i. 6. These obligations to the

two treatises of St. Luke can only be evaded by postulating doubles of both writings (see *Supernatural Religion*, iii. p. 25), but this is an alternative which need not be seriously discussed.

It should be added also that in all the VERSIONS of the 2nd century (the Syriac, Latin, and Egyptian), so far as our information goes, this Book formed a part.

Moreover the early APOCRYPHAL ACTS and other historical romances show an acquaintance with this work, to which they are frequently indebted for their personal and geographical notices, where they cross the historical path of the canonical Acts. Such are the Acts of Peter and Paul, and those of Paul and Thecla. So too Cornelius (*Hom.* xx. 13) and others are mentioned in the Clementine *Homilies*, while Theophilus also appears in the *Recognitions*. The *Homilies* moreover contain several expressions found in the Acts, such as "heart-knower," *Hom.* x. 13, πρὸς καρδιογνωσθῆν Θεόν (comp. Acts i. 24, xv. 8); "What purporteth this to be?" *Hom.* xiii. 6, xiv. 9, τί θέλει τοῦτο εἶναι (comp. Acts ii. 12, xvii. 20); "What hindereth me to be baptized?" *Hom.* xiii. 5 (see also xiii. 11; comp. Acts viii. 36). Similar resemblances also appear in the *Recognitions*.

It was indeed rejected by several HERETICS of the 2nd century, not however in a single instance (so far as we can discover) because they questioned its authorship, but in many cases obviously on this very account. Those who, like the EBIONITES, denied the apostleship of St. Paul, were forced to repudiate the authority of his disciple. Those on the other hand who, like the MARCIONITES, maintained a direct antagonism between St. Paul and the Apostles of the circumcision, could not do otherwise than reject a work which represented them as meeting each other on friendly terms. For the Ebionites see *Iren.* iii. 15. 1. Again, as regards the Marcionites, Irenæus argues with them throughout on the hypothesis of its Lucan authorship, as if this were common ground (iii. 12. 12, iii. 14. 1 sq.). When dealing with the VALENTINIANS and other Gnostics, he distinctly states that they accept the Book as authoritative, but try to get round it by false interpretations, or by a distinction between an esoteric and exoteric doctrine (iii. 12. 12, iii. 14. 4, iii. 15. 1. 2). Thus these Valentinians are valuable witnesses—all the more valuable because the acceptance of the Book involved them in great difficulty.

It should be added also that, as the Third Gospel and the Acts were evidently the work of one man—and the admission of this fact may now be regarded as practically universal—all the evidence which testifies to the authorship of the former is available also for the latter, and conversely. But the testimony in favour of St. Luke as the author of the Third Gospel is absolutely unbroken, and no shadow of suspicion overclouds it for nearly eighteen centuries.

The unanimity and directness of testimony which we have observed at the close of the 2nd century continue in the succeeding ages. At the close of the 4th century however, we find Chrysostom saying that he is induced to explain the Book, because many are ignorant of its existence and its authorship (*Comm. in Act. Apost.* i. 1, *Op.* ix. p. 1). As it is freely quoted without any suspicion cast on its author-

ship by all the great fathers of his own generation, as well as before and after, this can only mean that it was more or less neglected by the general reader. This neglect may be accounted for by the fact that it would not be read regularly in churches like the Gospels or the Apostolic Epistles, and copies would not be multiplied to the same extent as in the case of these other Scriptures. As it did not bear its author's name in the title (in this respect differing from the other Books of the N. T.), ignorance on this point becomes the more explicable.

Still more perplexing, and still less reconcilable with the facts, is a notice in Photius (*Amphil. Qu. 123*) at the close of the 9th century: "Some say that the author of the Acts was Clement of Rome, others Barabas, and others again Luke the Evangelist; but Luke himself settles the question (*ἐμπεριστα*)," &c. As there is not the faintest trace of any difference of opinion in all the preceding eight centuries, I am disposed to think that Photius is here guilty of a confusion with the Epistle to the Hebrews, these three persons being named by ancient Fathers as claimants for the authorship of this letter (Orig. in *Enseph. H. E. vi. 25*; Tertull. *de Pudic. 20*; Euseb. *H. E. iii. 38*; Hieron. *Viv. III. 5*).

4. *The Authorship.*—We have seen that the universal tradition of the first eight centuries ascribes the Book with no flinching voice to St. Luke; and that this evidence is further fortified by a still greater mass of testimony—equally unanimous—which independently ascribes the Third Gospel to this same person. How far is this assumption supported by internal evidence?

The first person plural "we" is used in certain parts of the narrative, where the writer is describing the journeys of St. Paul. He therefore professes to be a companion of St. Paul. This first person appears in the ordinary text for the first time at Troas (xvi. 10), during the second missionary journey (c. A.D. 51 or 52), and continues to Philippi, where it is dropped (xvi. 17) as suddenly as it had appeared. It is taken up again after several years (A.D. 58) during the third missionary journey at this same place Philippi (xx. 5), and continues till St. Paul arrives at Jerusalem and confers with James and the elders (xx. 18). When again he sets sail for Italy (xxvii. 1), it accompanies him and remains in his company during the voyage and shipwreck and until his arrival in Rome (xxviii. 15, 16, for in ver. 16 the best supported reading is *ἐλαβον*). But besides these occurrences in the ordinary text, it is found likewise in D at a much earlier point (xi. 28), where the prophecy of Agabus is mentioned, at Antioch. Though the variations in D seem in many passages to give contemporary traditions, yet the capriciousness of this MS. elsewhere forbids us to regard this as the original reading.

Who then is this writer who uses the first person? The obvious answer is that which identifies him with the traditional author of the work, St. Luke. This person was certainly a trusty companion of the apostle (Col. iv. 14; Philem. 24; 2 Tim. iv. 11); and though the notices in St. Paul's Epistles refer to a somewhat later date, he might very well have been with the apostle at this time. Not a single

Epistle of St. Paul was written during the precise periods covered by "we" in the Acts, and therefore the absence of Luke's name in the Epistles prior to the Roman captivity is not even a *prima facie* objection. Moreover, Luke is described as "the beloved physician" (Col. iv. 14), and a tendency to the use of medical terms has been observed both in the Third Gospel and the Acts. If many of the examples adduced must be set aside as proving nothing, the residuum is quite sufficient to establish the main point (see esp. Hobart's *Medical Language of St. Luke*, Dublin, 1882).

But though the natural inference from the use of the first person plural seems plain enough, it has given rise to various opinions. These may be divided into four classes:—

(i.) That which regards it as a mere literary fiction to give an air of credibility to the narrative. This view has been held by two or three critics, of whom Schrader (*Der Apostel Paulus*, 1836) may be taken as the type. As no one now upholds this view, I need not take the trouble to refute it.

(ii.) That which identifies it with St. Luke, who is regarded as also the ultimate author of the work. This is the vastly preponderating opinion even in the present day, and until quite recent times it was the sole possessor of the field. Its consistency and verisimilitude have been already shown.

(iii.) That which identifies it with St. Luke as the original authority for this portion of the narrative, but maintains that the Book, as a whole, was compiled by some later person. This is the view of Baur and Zeller, with several subsequent critics, of whom the latest is Holtzmann (*Zeitsch. f. Wiss. Theol.* 1881, p. 408 sq.; *Eindl.* p. 385, 1885).

(iv.) That which identifies it with some one else besides St. Luke. The persons selected for this distinction are: (a) TIMOTHEUS. This is the view of Schleiermacher, De Wette, and others, notably Bleek (see esp. *Intro. to New Test.* i. p. 355 sq., Engl. transl.). It appears to have been first suggested by Königsmann, *De Fontibus Comm. Sacr. qui Lucas nomen præferunt*, &c., 1798. (B) SILAS. This hypothesis is vigorously maintained by Schwanbeck (*Ueber die Quellen der Schriften des Lukas*, i. p. 168 sq., 265 sq.), though he was not the first to suggest it. It is sometimes connected with the identification of Silvanus (Silas) with Lucanus (Lucas), as e.g. by Hennell (*Untersuchung über den Ursprung des Christenthum*, 1840). This identification is put forward by Van Vloten (*Zeitschr. f. Wiss. Theol.* 1867, p. 223 sq.; comp. *ib.* 1871, p. 431 sq.), as if he were the originator of the theory. He is answered by Cropp (*ib.* 1868, p. 353 sq.). (γ) TITUS. This view seems to have been suggested first by Horst (*Sur les Sources de la deuxième partie des Actes*, &c., 1849; see Holtzmann, *Eindl.* p. 385), and has been adopted by Krenkel, Jacobsen, and others, notably by Hooykaas (*Bible for Young People*, v. 33; see Salmon, *Intro. d.* p. 312 sq.). In connexion with this theory should be mentioned the identification of Titus with Silvanus (or Silas), maintained by Zimmer (*Zeitschr. f. kirchl. Wiss. u. kirchl. Leben*, 1881, 4, p. 169 sq.; *Jahrb. f. Protest. Theol.* 1881, p. 721 sq.), who supposes Silas the prophet of Antioch to be

a different person from Titus Silas the companion of St. Paul. His theory is discussed by Jülicher (*Jahrb. f. Protest. Theol.* 1882, p. 538 sq.).

The two solutions (8), (γ), may be quickly dismissed. The identification of Silvanus with Lucanus on the ground that *silva* and *lucus* are synonyms is about as reasonable as would be the identification of persons bearing the names Wood and Forest and Grove, or Lea and Field and Meadows, or Mountain and Hill, or Rock and Cliffe and Stone. The objection to the other identification is of a different kind. Everything points to the separation of Titus and Silvanus. Thus the two are mentioned by their respective names in one and the same Epistle by St. Paul (2 Cor. i. 19, ii. 13, vii. 6, &c.). Moreover, Titus was a Gentile (Gal. ii. 3), while Silas (Silvanus) was plainly a Jew (Acts xv. 22); for it is altogether arbitrary to distinguish the Silas of xv. 22, 27, 32 [34], from the Silas of xv. 40, &c.

Having thus cleared the way, we may deal generally with the hypotheses which belong to the third and fourth classes.

Of the third we may remark: (1) That the "we" sections are absolutely identical in style with the rest of the Acts, and indeed with the Third Gospel also, so that they can only have been written by the ultimate compiler of both narratives. (2) That accordingly these "we" sections contain numerous cross references to other parts of the narrative. (3) That the ultimate compiler (whoever he was) shows not only literary ability, but literary care. This point is strongly insisted upon (among others) by Renan, who speaks of the Third Gospel and Acts as forming one work excellently put together (*très bien rédigé*), composed with reflection and even with art, &c. (*Les Apôtres*, p. xi.). But it is incredible that an author evincing this literary capacity and aim should commit the school-boy blunder of inserting paragraphs written by another without even taking the trouble to alter the personal pronouns. It is not sufficient to point to such carelessness in mediæval chroniclers as Schwanbeck does. The examples are not parallel. We have in the Acts "not one of those low organisations which do not resent being pulled asunder," but "a highly organised structure, showing evident marks that the whole proceeded from a single author" (Salmon, *Introd.* p. 316). (4) Lastly: the hypotheses belonging to this class have not a shadow of evidence in their favour. On what grounds then should they claim to displace the traditional view? Is the strongest historical attestation to count for nothing?

It will be seen at once that some of these objections apply equally to the fourth class. But the individual hypotheses again, which belong to this class, present additional difficulties of their own. (a) The assignment to Timotheus is irreconcilable with Acts xx. 5, 6, where the writer, having mentioned him among others who accompanied St. Paul, adds, "But these (οἱ τοὶ δὲ) had gone before and were waiting for us (προσεδόκουν ἡμεῖς ἡμᾶς) in Troas;" where οἱ τοὶ δὲ naturally refers to all those previously mentioned, and the restriction to the two last, Tychicus and Trophimus, is not justified by the form of the sentence. (8) The attribution to Silas has nothing to recommend it. Silas

or Silvanus is a prominent figure during the Apostle's second missionary journey in the Acts; and this prominence is borne out by the notices in St. Paul's Epistles relating to this period (1 Thess. i. 1; 2 Thess. i. 1; 2 Cor. i. 19). On the contrary, he nowhere appears during the third missionary journey, either in the history or in the letters, whereas the "we" occurs frequently during this period. (γ) The only ground for suggesting Titus is the negative fact that he is not mentioned by name in the narrative,* though he is known to have been with St. Paul during part of this period (2 Cor. ii. 13, vii. 6 sq., xii. 18), and is a prominent person among the Apostle's companions. But what is the value of this negative fact? What advantage has the Titus guess over the Luke tradition? Unless indeed it be "thought a disadvantage to an hypothesis that it should have some amount of historical testimony" (Salmon, p. 313). Moreover, of these attributions generally we may remark that the propriety in the change from the first to the third person, and conversely, as pointed out above (p. 31), ceases, and the use of the pronouns, from being orderly and consistent, becomes a chaos.

Nor is it easy to understand how St. Luke's name should have thus been persistently assigned to the work, if he had had nothing to do with it. As Salmon has pointed out (p. 372), it is not attached to this second treatise in any uncial MS. But the Third Gospel had the name of St. Luke prefixed, and the Acts bore evidence on the face of it that it was written by the same author. Hence the attribution. Indeed the sequence of facts is a most powerful argument in favour of the genuineness of the work. These are as follows: (1) The Gospel bears the name of Luke; but Luke was a companion of St. Paul. (2) When we examine the Gospel, we find not only that it brings out into special prominence certain points in Christ's teaching which illustrate the cardinal doctrines of St. Paul, the universality and the freedom of the Gospel, justification not by works of law but by faith, and the like; but also that, where St. Paul refers to incidents in our Lord's life, as for instance to the Last Supper (1 Cor. xi. 23 sq.; comp. Luke xxii. 19 sq.) or to the appearances after the Resurrection (e.g. 1 Cor. xv. 5, ὥσθι Κηφᾶ; comp. Luke xxiv. 34, ὥσθι Σίμωνι), his references present striking resemblances to this Gospel rather than to the others. Yet there is not a word nor a hint of any connexion with or

* In Acts xviii. 7 the reading is most probably Τίτιος 'Ιούστου, though some read Τίτου 'Ιούστου, some Τίτω simply, and some 'Ιούστου simply (the received reading). At all events the alternative lies between the first and the last, as the variation must have arisen from the addition or omission of the same recurring letters (ONOMATITITIOYIOYCTOY). But even if "Titus" were read here, he could hardly be the same person; for he is mentioned here as a Jewish proselyte, and his surname Justus implies that he was an observer of the Mosaic law; whereas the Apostle's companion Titus had been converted to Christianity before this (Gal. ii. 1) and is called a "Gentile" without any qualification. Moreover this Justus was a resident in Corinth, whereas St. Paul, writing to the Corinthians (2 Cor. ii. α.), mentions Titus in such a way as to preclude the supposition that he was one of themselves.

any knowledge of the Apostle. (3) The Acts professes to be written by the same person as the Third Gospel, of which it is a later continuation; and this profession is fully borne out by its style and character. (4) We read over more than half this second treatise without any indication that the writer was a companion of St. Paul. (5) Then at length the token of companionship occurs. Yet even now it is not distinctly stated, but the fact is inferred from the incidental occurrence of the first person plural, which makes its first appearance quite unobtrusively. And not only so, but in its subsequent disappearance and re-appearance it shows a congruity which cannot fail to strike the mind. Who will be bold enough to explain these harmonies as a fortuitous concurrence of pseudo-historical atoms? Yet it would require greater hardihood still to ascribe them to a sustained and elaborate artifice.

Apart from the hypotheses which we have hitherto considered, stands the view propounded in H. H. Evans, *St. Paul the Author of the Acts of the Apostles and of the Third Gospel* (London, 1884). The Pauline authorship is maintained by this writer on the ground of certain resemblances of diction. He does not attempt to deal with the first person plural or to grapple with the difficulties which beset his theory on all sides.

5. *Authenticity and Genuineness.*—In discussing the authenticity of any work, two main divisions of the subject present themselves: (1) The internal characteristics, as indications of verisimilitude or the contrary; (2) The external tests, as evidences of veracity or the contrary.

(i.) In treating of the internal characteristics, I must satisfy myself with pointing out a few beads, giving here and there an example, but without any attempt to do more than indicate lines of investigation which the reader may carry out for himself.

(i.) There is first of all the *change of moral and spiritual atmosphere*. As we pass from the beginning to the end of the Book, we find that the religious climate, so to speak, is quite changed, and we are breathing a different air. In short we have passed from the Hebraic to the Hellenic. This change manifests itself throughout, in the speeches and in the actions, in the modes of feeling and in the local customs and institutions. Yet the transition is not sudden. It is a gradual growth, as the Church emancipates itself, both locally and morally, from the tutelage of its Hebrew infancy. Between the two extremes the intermediate Hellenistic territory is duly traversed. In short, the work, regarded from this point of view, betokens a writer who either had witnessed the progressive career himself, or made use of successive contemporary documents; but such a narrative would be quite impossible from one who some generations later attempted to furnish a story of the apostolic doings, trusting mainly or solely to his own faculty of invention.

(ii.) Not unconnected with this feature is the *sequence and connexion of events*. We may take as an example the incidents which prepared the way for the extension of the Church to the Gentiles. What could be more natural, and yet what more unlike the work of a forger than these fragmentary disconnected notices,

which, as we see after the fact, must inevitably have led to the result, but which no one could have foreseen or devised, and which require careful piecing together before we can trace their bearing and direction. These are: (1) The murmuring of the Hellenist widows, vi. 1; (2) the creation of the diaconate, vi. 2 sq.; (3) the composition of this diaconate, comprising especially Stephen and Philip, vi. 5 sq.; (4) Stephen's disputations, speech, and martyrdom, vi. 8-vii. 60; (5) Saul's appearance on the scene, vii. 58, viii. 1; (6) the scattering abroad of the disciples as the consequence of this persecution, viii. 1; (7) the preaching of Philip in Samaria and elsewhere, as the result of this scattering, viii. 5-40; (8) the wider dissemination of the word and the first preaching to the Gentiles through the outlying members of this scattered band (xi. 19, 20). A little reflection will show that all this is inconceivable, except as an account of facts which actually occurred.

(iii.) Another point is the *disproportion and inequality* of the narrative. This argument is strongly insisted upon by Renan (p. xv.) among others: "Ce qui distingue l'histoire composée d'après des documents de l'histoire écrite en tout ou en partie d'original, c'est justement la disproportion." A narrator who allows himself *carte blanche* to invent will take care that the different parts of his narrative bear some proportion to each other. On the other hand, a recorder of facts is limited by the historical knowledge at his disposal. At some points he has very ample information; at others it entirely fails him. Now nothing is more striking than the want of proportion in the Acts. In some parts the history of a few months occupies several chapters; in others the history of many years is disposed of in two or three verses. Sometimes we have a diary of a journey or voyage; elsewhere a bald statement of the main fact is given. But nowhere is this disproportion more striking than in some of the speeches, notably in that of St. Stephen. This is by far the longest record of a speech in the Book, extending over 52 verses. Having all this space at his disposal, a forger would have made it both pertinent and complete. He would have provided a well-reasoned defence against the two-fold crime with which Stephen is charged. But here we have nothing of the kind. There is a long and at first sight irrelevant account of the early history of the Jewish people, which occupies 49 verses, and the last three are taken up in a denunciation of his accusers. Direct answer to the charges there is none. Only when we examine it more carefully, we discover two things: first, that the incidents in the long historical narrative illustrate the transitory character of the present dispensation and of the local sanctuary; and secondly, that the latter part of the speech (vii. 48-53) is interrupted and hurried. Thus the whole speech, as we have it, is a preamble, and the argumentative application which should have formed the main part of his defence does not appear at all, or at least is confined to two or three short sentences, doubtless because the clamours of the bystanders bring the speaker prematurely to a close. But until we discover the key to its meaning, this rambling discourse is quite unintelligible under the circumstances, and such as no forger would

or could have invented. It is only conceivable as a substantially true record of what was actually said. Another instance of similar disproportion is the speech on the Areopagus (xvii. 22-31), where there is no distinctive Christian teaching till the last verse, and here only one point is touched upon. In this case however the probable explanation is that it was not so much the speech itself, as the report of the speech accessible to the historian, which was fuller at the commencement and hurried at the end. But the bearing on the point at issue—the truthfulness of the narrator—is the same.

(iv.) We have also another indication of genuineness in the *minor discrepancies and errors*, or what appear to be such in the account. Thus we have three separate accounts of St. Paul's conversion (ix. 3 sq., xxii. 6 sq., xxvi. 12 sq.). The divergences may not be irreconcilable, but they do not reconcile themselves. The reasonable explanation is not that the writer himself invented the three accounts, but that he obtained them from different sources, and reproduced them as he found them. Again the inaccuracies in the references to Old Testament history in St. Stephen's speech are probably due to the strict reproduction of a report taken under necessarily unfavourable circumstances. In some cases at all events (e.g. vii. 43, the substitution of "Babylon" for "Damascus"), we seem to see that they are due to hurried condensation.

(v.) The *naturalness* of the language, as indicating direct knowledge of the facts, should also be noticed. The incidental appearance and disappearance of the "we," to which attention has been directed already, is a good illustration. Another example appears in the order of the names Barnabas and Paul (or Saul). Barnabas is the earlier disciple (iv. 36), and the mediator between Saul and the elder Apostles (ix. 27, xi. 22-26). Accordingly, in the earlier part of the history the order is always "Barnabas and Saul" (xi. 30, xiii. 2). But when their missionary journeys commence, and they stand on Gentile ground, St. Paul's supremacy of character asserts itself, and the order is tacitly changed to "Paul and Barnabas" (xiii. 43, 46, 50; xv. 2, 22, 35). There are indeed exceptions in this latter part, but they only "prove the rule." At the apostolic council and in the apostolic letter, the old sequence "Barnabas and Paul" is again resumed (xv. 12, 25); and so too at Lystra, where Barnabas is identified with Zeus and Paul with Hermes, the former naturally takes the precedence for the moment (xiv. 14). As instances of naturalness in the language represented to have been used by the speakers, we may allege the distortion of facts by Claudius Lysias (xxiii. 27) to save his own credit, or the exaggerated compliments paid to Felix by Tertullus (xxiv. 2 sq.), which are explained but not justified by his career as governor.

Altogether, it may be affirmed that if there had been no miraculous element in the narrative, and if it had had no bearing on religious controversy, the form and contents of this work would have placed it beyond all suspicion, as regards genuineness and authenticity.

(2.) From the consideration of the internal characteristics we turn to the *external tests*, as an evidence of truthfulness.

(i.) In the earlier part of the narrative we have rarely an opportunity of testing the incidents by reference to other Christian documents; but the latter portion, giving the history of St. Paul, may be compared with and checked by the Apostle's own letters. This work has been done admirably by Paley in his *Horae Paulinae*; and the main result is conclusive. He has elicited a mass of "undesigned coincidences," which renders the hypothesis of a fictitious history impossible. The comparison of the four greater Epistles, more especially (Romans, 1 Corinthians, 2 Corinthians, Galatians), belonging to the years 57, 58, elicits striking examples. Any reader, for instance, who will take the pains to go carefully over Paley's discussion of the passages relating to the contributions for the Christian poor at Jerusalem, observing how they dovetail into one another, may satisfy himself of the validity of the argument. Yet it is plain that the writer of the Acts was unacquainted with these Epistles, or at all events that, if he had ever seen them, he made no use of them in compiling his history. Otherwise, we are wholly unable to explain the omission of any reference to the incidents and persons mentioned: for example, in Rom. xv. 19, 28, xvi. 1 sq., 23; 1 Cor. i. 11 sq., xvi. 15 sq.; 2 Cor. ii. 12, vii. 5, xi. 24, xii. 3 sq.; Gal. i. 17, ii. 11 sq.; to say nothing of the absence of any allusion to Titus in connexion with Corinth or of the different aspects which the third visit to Jerusalem bears in the Acts (xv. 1 sq.) and in St. Paul's Epistle (Gal. ii. 1 sq.).

(ii.) Another point of comparison with external documents relates to the language ascribed to the different Apostles in the Acts. St. James, St. Peter, and St. Paul, all have speeches assigned to them. Is their language such as might be expected from the writers of the Epistles bearing their several names? The very few sentences ascribed to James do not afford much scope for comparison. Yet the sentiments attributed to him are what might have been expected from one who was the recognised head of the Church of Jerusalem, as well as from the writer of the Epistle which bears his name. It has been observed also that of the canonical writers James alone uses the common formula *χαρὶς* as the heading of his Epistle (James i. 1), which appears likewise at the beginning of the apostolic letter, evidently represented in the Acts as dictated by him. The speeches and sayings of St. Peter afford considerably more material for comparison. In the diction, and still more in the ideas, they exhibit such parallels with the Epistles bearing the name of this Apostle, as to suggest identity of authorship, notwithstanding the alterations in form which they have necessarily undergone by transmission. On this subject see Weiss, *Der Petrinische Lehrbegriff*, p. 6 sq. and *passim*; Kähler, *Die Reden des Petrus in der Apostelgeschichte*, *Stud. u. Krit.*, 1873, p. 492 sq.; Salmon, *Introd.* p. 335 sq., ed. 2, as well as the commentaries on this Book, esp. Nösgen, p. 47 sq. For St. Paul the material is much more ample, and the result correspondingly more conclusive. The speech at Miletus (Acts xx. 18 sq.) more especially has been carefully analysed, and exhibits throughout both Pauline matter and Pauline diction. Moreover, it is not fanciful to

trace more special correspondences with the letters belonging to the several periods at which the speeches are represented as being delivered. Thus the one Christian doctrine which is mentioned in the speech on the Areopagus (xvii. 31)—the second Advent and the Judgment—is the one prominent topic of the Epistles to the Thessalonians, written at this time. Again, the speech at Miletus, already mentioned, exhibits resemblances to the Epistles of the third missionary journey which preceded this epoch, and with the Epistles to the Philip-pians and Ephesians which succeeded it.

(iii.) The geographical and historical tests which the subject-matter of the Acts invites us to apply, are exceptionally wide and various. If, for instance, we confine ourselves to geography, we accompany the Apostle by land and by sea; we follow him about in Jerusalem, in Palestine and Syria, in Asia Minor, in Greece, in Italy. The topographical details are scattered over this wide expanse of continent, island, and ocean; and they are both minute and incidental. Yet the writer is never betrayed into an error. The account of the Apostle's journey to Rome (for example) is so accurate and consistent, that a modern writer has been enabled almost to reproduce a log-book of the voyage (James Smith's *Voyage and Shipwreck of St. Paul*). The amount of geographical and topographical illustration which the narrative of the Acts admits may be seen from such books as Conybeare and Howson's *Life and Epistles of St. Paul* and Lewin's *Life and Epistles of St. Paul*; and these works will afford a measure of the strength of the argument to be derived from such considerations.

When we turn from geography to history, the tests are still more numerous, and lead to still more decisive results. The laws, the institutions, the manners, the religious rites, the magisterial records, of Syria and Palestine, of Asia Minor, of Macedonia and Greece, all live in the pages of this narrative. It will suffice to mention one or two of the more striking facts. When St. Paul first visits Europe, he sojourns at two important Macedonian cities in succession, Philippi and Thessalonica. In neither case does the political constitution follow the normal type of a Greek city; yet in both the local government is correctly and significantly indicated. Philippi was a Roman colony (xvi. 12). Accordingly here we find all the apparatus and colouring of a colony, which was a miniature reproduction of Rome herself (see *Philippians*, p. 51 sq.). There are the local magistrates, the *decurions*, who, after the wont of such colonial magnates, arrogate to themselves the title of *prætors* (σπαρτηγοί, xvi. 20, 22, 35, 36). There are the attendant *licitors* (παῖδοιχοι, xvi. 35). The majesty of Rome is appealed to again and again (xvi. 21, 37, 38). But when we turn from Philippi to Thessalonica, all is changed. Thessalonica was a free city, with a magistracy of its own. A collision occurs here, as at Philippi, and the alleged offenders are again brought before the magistrates. These magistrates are mentioned, though quite incidentally, as *politarchs* (πολιτάρχαι, xvii. 6, 8). It so happens that this word (πολιτάρχης) has not hitherto been found anywhere in extant Greek literature, though *πολιταρχος* appears, in a general sense, in an obscure passage of Aeneas Tacticus, c. 26

(p. 81, Schweigh.). From inscriptions however, found at Thessalonica itself (Boeckh, *C. I. G.*, No. 1967; see *Greek Inscriptions in the British Museum*, II. clxxi. p. 32, with the notes), we learn that this was the local name of the chief magistrates of Thessalonica, who were seven in number. It should be added also that at Thessalonica mention is made (xvii. 5) of a popular assembly (δημος), which is likewise in keeping. Again, at Corinth, the notice of the chief magistrate is in strict accordance with history, though the chances of error were very great. The province of Achaia at this epoch was banded about between the senate and the emperor, being transferred and retransferred from one to the other, and was governed by a proconsul (ἀνθύπατος) or proprætor (ἀντισπάρχης) accordingly. At this moment (A.D. 52 or 53) it was in the hands of the senate, and the designation of the chief magistrate as ἀνθυπατεύων in the Acts (xviii. 12) is therefore correct. But it had only been retransferred to the senate a few years earlier (A.D. 44) by Claudius (Suet. *Claud.* 25; Dio Cass. ix. 24), after being in the emperor's hands for some thirty years (since A.D. 15); and somewhat later under Nero (A.D. 67) it ceased to be a Roman province (Plin. *N. H.* iv. 6; Suet. *Nero*, 24, &c.: see Clinton, *Fast. Rom.* l. p. 50), and remained autonomous till Vespasian again restored the provincial government. Moreover, the person represented as holding the proconsulate at this time, Gallio, is mentioned by his brother Seneca (*Epist.* 104, § 1) as residing in Achaia, though his office is not named. In this passage however Seneca mentions an illness and consequent sea-voyage of Gallio during his residence in Achaia, and Pliny (*N. H.* xxxi. 33) refers to this same incident in Gallio's life as taking place *post consulatum*, but without any mention of Achaia. Thus the notice in the Acts links together the statements of the two profane writers, for the proconsulship of Achaia would be a natural sequel to the consulship. Moreover, the time harmonises; for as Seneca was not restored to favour till A.D. 49, after eight years' banishment, his brother's promotion to office would naturally take place after that year, and probably not long after. Gallio's character also, as here given, accords with the description of him by his brother Seneca (*Quæst. Nat.* iv. Præf.), and his friend Statius (*Silv.* ii. 7. 30 sq.), who both use the same epithet "dulcis." The easy-going magistrate was the amiable, sweet-tempered companion. Similarly, the description of Sergius Paulus, as *proconsul* of Crete, is confirmed by notices and inscriptions, though here again any one but a contemporary would be very liable to error, owing to the transference and retransference of the province (see *Contemporary Review*, May 1878, p. 290). Not only do the inscriptions show that at this time it was governed by proconsuls, but one discovered a few years ago by Cesnola (*Cyprus*, p. 425) mentions "the proconsulship of Paulus" (ΕΠΙ ΠΑΥΛΟΥ [ΑΝΘΥ]ΠΑΤΟΥ). On the probability that this is the Sergius Paulus mentioned by Pliny, see *Contemp. Rev.* l. c.

Among other Greek cities which St. Paul is represented as visiting, comparatively full accounts are given of his sojourns at two especially, Athens and Ephesus. It is instructive to

study the narratives of his residence at these two places, in themselves and in comparison one with another. Athens is the most Hellenic of all cities, the heart and citadel of Greece; whereas at Ephesus there is a very strong intermingling of the Oriental spirit and institutions with the main stream of Hellenism. The diverse tone of these two typical cities of heathendom appears to the life in the Apostle's conflicts with his audiences on either occasion. The one is inquisitive, philosophical, courteous, and refined; the other fanatical, superstitious, and impulsive. Nor does the truthfulness of the narrative manifest itself only in the moral and religious atmosphere of the two places. It descends even to the details. At Athens (Acts xvii. 16 sq.) we are confronted with some of the main topographical features of the city—the Areopagus and the agora. There are the representatives of the two dominant philosophical schools, the Stoics and Epicureans. There is the predominant attitude of inquiry in this metropolis of newsmongers, and here even the characteristic Athenian term of abuse (*σπερμολόγος*) finds its proper place. There is the large number of foreign residents, which was always a distinguishing feature of Athens. There is the reference to the numerous images and temples which thronged the city; to the boastful pride of the citizens in their religious devotion to the gods, consistent as it was with no small amount of theological scepticism; to their jealousy of the introduction of strange deities, as manifested in the case of Socrates and at various points in their history; to their practice of propitiating the offended powers after any plague or other infection, by erecting an altar to "an unknown god" or "unknown gods"; to their custom of deifying attributes of character, frames of mind, and conditions of body, so that "Resurrection" (*Anastasis*)^b would seem to them to be only another addition to their pantheon, which already included "Pity," "Modesty," "Rumour," "Persuasion," "Impulse," &c. (Pausan. i. 17). Lastly, there is an appropriate allusion to *θεῖον*, an expression which would commend itself to his philosophical audience, but which occurs nowhere else in the New Testament; and an equally appropriate appeal to the sentiments of the Stoic poets Aratus and Cleanthes (*τῶν κατ' ὕμῶν ποιητῶν*), who had proclaimed the universal fatherhood of Zeus. The amount of illustration which has been gathered together from classical sources by such writers as Wetstein, Conybeare and Howson, and Renan (not to mention the numerous commentators on the Acts), is sufficient evidence how true to local colouring is this description of St. Paul's visit to Athens, even in the finest touches. When we turn from Athens to Ephesus (xix. 1 sq.), the indication of the truthfulness of the narrative is equally complete. Here however the verification is found more in ancient inscriptions

than in extant literature. The recent excavations at Ephesus more especially have added largely to our stores of illustrations. On this subject see a paper by the writer of this article in the *Contemporary Review*, May 1878, p. 292 sq. We here mention, in St. Luke's account, of the magical books, of which we read elsewhere under the name *Ἐφέσια γράμματα*: of the chief buildings of the city, not only the Temple of Artemis but the Great Theatre, with which the recent excavations have made us familiar; of the great officials of the city and province—the proconsul as the chief imperial magistrate, the town-clerk as the chief municipal authority, and the Asiarchs as the principal religious functionaries; of the court days, by implication divided into two, the regular and the special, as we know to have been the case; above all, of the prevailing cultus of the place. "Artemis of the Ephesians" dominates everywhere. The characteristic religious phraseology of her worshippers is reproduced—the city is the "temple-sweeper," the vergers, of the "great goddess;" the silver models of her shrine which were carried away as keepsakes by pilgrims to Ephesus, appear in the narrative; the image which "fell down from Zeus" has its place there; everything is strictly in keeping.

These instances of geographical and historical propriety are taken from Greece and Asia Minor, and the illustrations are drawn from classical writers and inscriptions. But the pictures relating to Jerusalem and Palestine are found to be drawn with equal fidelity, where we can test them. Of topographical accuracy an example will be given presently in the vivid description of a scene which takes place in the Temple area (p. 38). The historical fidelity of the narrative may be illustrated by the part assigned to the Sadducees. It is not among the high-priests and leaders of the hierarchy that we should have expected to find a Sadducean predominance. Yet the author of the Acts boldly represents the high-priestly circle as members of this sect (iv. 1, v. 17); and this representation is confirmed by the direct testimony of Josephus (*Ant.* xx. 9. 1). Moreover it has been more than once observed that, whereas the Pharisees are the chief opponents of Christ and His disciples in the Gospels, the Sadducees take the lead in the Acts, and that this change is explained from the fact of the Apostles making the Resurrection the foundation of their preaching, and thus striking at the root of Sadducean doctrine. From this point of view, it is noticeable that in the Fourth Gospel, though the sect of the Sadducees is not mentioned by name by St. John, the most virulent opposition of the high-priestly party led by Caiaphas begins first at the point where we should expect it to begin, after the miracle of the raising of Lazarus (John xi. 47 sq.), and that it was a main object with them to put Lazarus to death (John xii. 9-11) and thus get rid of this evidence for a resurrection. Accordingly the course of events as related on a subsequent occasion, when St. Paul pleads before the Sanhedrin at Jerusalem (Acts xxiii. 1 sq.), is perfectly consistent and evidently historical. The Apostle had offended the Sadducean high-priest Ananias, who presided; and he recovered his position with his audience by declaring that he and his forefathers were

^b Compare the account of the Russian revolt in 1825 (*Allison's History of Europe*, ii. p. 239): "Meanwhile the leaders of the revolt, deeming their victory secure, began to boast their real colours. Cries of 'Constitution and the Constitution' broke forth from their ranks. 'What is that?' said the men to each other. 'Do you not know?' said one; 'it is the Empress (Constitutionia).' 'Not at all,' replied a third; 'it is the carriage in which the emperor is to drive at his coronation.'"

Pharisees, and that the main subject of his contention was the doctrine of the Resurrection, which the Pharisees held in common with him, thus dividing the assembly and securing (as it would appear) the support of the majority. Whether this declaration was strictly defensible (as it was certainly true), I need not stop to inquire; but it is what a sagacious man would naturally do under the circumstances, and the fact that it is frankly recorded is a token of the narrator's veracity.

The evidence then in favour of the authenticity of the narrative is far fuller and more varied than we had any right to expect. But certain objections have been taken, which it is necessary to remove.

(i.) Thus it is asserted that the *diction* is the same throughout, and that therefore the speeches ascribed to the principal characters are unhistorical. It is not Stephen or Peter or Paul who speaks, but Luke or pseudo-Luke himself. Long lists of words and modes of expression have been drawn up, which are regarded as characteristic of the writer's style. These extend over the whole of the Gospel as well as the Acts. There is frequently very great exaggeration in these lists (e.g. *Supernatural Religion*, iii. pp. 72 sq., 146 sq., &c.). Irrelevant expressions are included; Septuagint quotations are treated as if they were the narrator's own language; words used in wholly different senses (e.g. *βῆμα*, "footstep," and *βῆμα*, "tribunal") are treated as parallels; terms which are necessitated by the subject-matter are regarded as characteristic of the author; the commonest words in the language are invested with a special value. Thus an entirely false impression is conveyed. But, after all these spurious examples are set aside, there is a certain *residuum* of resemblance in the diction (see e.g. Lekebusch, p. 35 sq.). Characteristic words and phrases of the author appear in the speeches, as well as in the narrative portion. But this was inevitable. It was impossible that the speeches could be reported word for word. Sometimes they must have been spoken in Aramaic; in other cases only shorthand and fragmentary reports were in the author's hands; in others again he may have heard them by word of mouth; in all probably they were much abridged. A certain infusion of his own phraseology was a natural consequence, and it does not affect their substantial accuracy. It appears even in the example which I have already given of an evidently Pauline utterance—the speech to the Ephesian elders at Miletus. The measure of the *extent* to which it would affect the language is seen by the example of the Third Gospel. Here we are able to compare St. Luke's account with the parallel narratives of the two other Synoptists; and the historical character remains, notwithstanding the literary editing of the third Evangelist. There is no reason to suppose that he dealt more freely with his materials in the Acts, where we have no such means of testing them. Indeed, as he was nearer to the events and more familiar with the persons, we should expect, if anything, a closer adherence to the form in which he received the reports.

(ii.) A second objection, or rather a second class of objections, is based on the representation

here given of the principal agents in the planting of the Church, more especially of the relations between St. Peter and St. Paul and their respective followers. These objections start from the assumption that there was an irreconcilable opposition between the Apostle of the Circumcision and the Apostle of the Gentiles; that their views of Christianity were diametrically opposed; and that the former never emancipated themselves from a strictly Judaic and national conception of Christ's Kingdom, whereas the idea of the latter was cosmopolitan and universal. The author of the Acts, it is assumed, living at a later date, was desirous of finding a meeting point for conflicting parties, and thus invented positions, words, and actions for the chief Apostles, so as to bring them into accord. His aim was *conciliation*, and he twisted or forged history accordingly. This is too wide a question for discussion here. The objection indicated involves a *petitio principii*. Our chief authority for the relations existing between the leading Apostles is this very Book itself. We can only say that to ourselves such passages as 1 Cor. i. 12 sq., 23; Gal. i. 18, ii. 6 sq., 14 sq., seem to indicate a substantial harmony in principle between the two supposed antagonists; that they are placed on the same level by the two earliest of the apostolic Fathers (Clem. Rom. 5; Ignat. Rom. 4), and are quoted as of equal authority by the third (Polyc. Phil. 2, 5, 6, &c.); that the main stream of Christian history betrays no evidence of this fundamental antagonism as the substratum of the Catholic Church; and that the first distinct mention of it occurs in an obviously fictitious narrative, which cannot date before the second half of the second century, though doubtless even from the apostolic times there were some extreme men who used the names of the two Apostles as party watchwords.

According to this conception of early Christianity, it would be impossible that St. Peter should have seen the vision obliterating the distinction of meats clean and unclean, which led to the conversion of Cornelius, or that St. Paul should have taken part in the Nazarene vows, and so have been guilty of complicity with Jewish customs, on his last visit to Jerusalem. Above all, the representation of the attitudes of the respective leaders at the so-called apostolic council is called in question, both as impossible in itself and as irreconcilable with the notices of what is apparently the same occasion in Gal. ii. 1-10.

As regards the apostolic council, I may perhaps be allowed to refer to a full consideration of the question in my *Galatians*, p. 123 sq. The subject is too long for discussion here. It has been treated from various points of view, not only in Introductions, Apostolic Histories, and Commentaries, but also in separate articles and monographs. Among the latter are Grimm, *Stud. u. Krit.* 1880, Hft. 3; Hilgenfeld, *Zeitschr.*

So far as regards St. Peter's attitude towards the Pauline doctrine of faith and grace, we can only say that the Acts represents him as adopting it (xv. 9, 11), just as the Epistle bearing his name (1 Peter i. 5, 9, 13, &c.) adopts it, though not giving it the same special prominence, and as indeed it is distinctly implied that he adopted it in St. Paul's argument Gal. ii. 14.

Krit.* 1855, p. 554 sq.; Volkmar, *Theol. Zeitschr. aus d. Schweiz*, 1885, p. 33 sq.; Weizsäcker, *Jahrb. f. Deutsch. Theol.* 1873, p. 191 sq.; Wittichen, *Jahrb. f. Protest. Theol.* 1877, p. 653 sq. See also other references in Holtzmann, *l. c.* p. 436 sq. The opinions of Baur, Lechler, Neander, Ritschl, Schwegler, Zeller, and others, will be found in their several works mentioned at the end of this article; and the question is discussed at length in some of the Commentaries (e.g. Overbeck and Nösgen).

But it so happens that at the very two points in the narrative where St. Paul is represented as making the largest concessions to the Judaic Christians, and where therefore the author is supposed to diverge most widely from historical truth in order to gratify this assumed motive, we find in the character of the context indications which, in any other case, would be regarded as striking evidences of veracity in an ancient narrator. These are the account of the third visit to Jerusalem, including this apostolic council in the 15th chapter, and the conduct of the Apostle on his last visit to this same place in the 21st chapter.

(1.) The account of the apostolic council is preceded by one avowal of weakness in the factions and quarrels in the Church (xv. 1, 2 sq.), and succeeded by another in the contention and separation of Paul and Barnabas (xv. 36 sq.). These frank confessions at all events afford a strong presumption of truthfulness. The whole narrative is essentially simple, straightforward, and natural, as a record of events. The principal speakers, Peter and James, express opinions and use language, as we have seen, which at all events present resemblances to the Epistles extant in their names. The "apostolic decree" bears such manifest traces of genuineness, and would have been so impossible at a late date, that few even of those who impugn the representation of St. Paul's action have ventured to question it. The relative positions of Peter and James harmonise with the circumstances, the official superiority of James at Jerusalem being recognised. The relative positions of Paul and Barnabas show still more subtle traces of authenticity, as I have already pointed out. Where the author is narrating in his own person, the order "Paul and Barnabas," which would be natural to him, is adopted (xv. 2, 22, 35); but where the Church of Jerusalem is interested, as in the order of hearing accorded to the two (xv. 12), and again in the apostolic letter itself (xv. 25), the order is reversed—Barnabas being the older disciple, and better known to the Christians in Jerusalem. As a minor indication of truthfulness again, we may mention that Peter here, and here only in the Acts (in the speech of James), is called by his Hebraic name in its Hebraic form "Symeon" (comp. 2 Pet. i. 1). Indeed, the whole narrative is such that no one would have hesitated to

accept it as a genuine record, if this prepossession as to the mutual relations of the Apostles at this crisis had not stood in the way.

(2.) The same is true of the later incident, the concession of the Apostle to the Jewish Christians in the matter of the Nazarite vows, on the occasion of his last visit to Jerusalem. The account is preceded by a diary of the voyage to Caesarea (xxi. 1-8) and the sojourn in Caesarea (xxi. 9-14), which is singularly plain, straightforward, and lifelike, which satisfies every test of truthfulness, and which in the purposelessness of the incidental touches is only explicable as a narrative of an eye-witness. This is especially true likewise of the verse immediately preceding the visit (xxi. 16), which records the journey from Caesarea to Jerusalem, "taking with us one Mnason of Cyprus, a primitive disciple, with whom we were to lodge." There is no reason for this mention of Mnason, of whom we never hear again, except that the fact struck the narrator. The whole account again belongs to the "we" sections, and manifests the life-like character which pervades these sections. Moreover, it is allusive. It omits to explain certain points to the reader, because they were obvious to the writer. Such, for instance, is the reference to "the seven days" (xxi. 27), which has puzzled the commentators. Again, the narrative of the tumult in the Temple, which follows, is not only full of life, but (what is more important) instinct with local colouring. The alarm that the Apostle had introduced the Gentile Trophimus, the Ephesian, into the Temple, is illustrated by M. Ganneau's discovery (*Palestine Exploration Fund.* 1871, pp. 132 sq., 172 sq.) of the inscription on the stone barrier (*δρῶμας*) which divided off the Court of the Israelites, forbidding any foreigner to pass it on pain of death, as correctly recorded by Josephus (*Ant.* xv. 11. 5; comp. *Bell. Jud.* v. 5. 2, vi. 2. 4); and hence doubtless St. Paul drew his illustration of the middle wall of partition (*τὸ μεσότοιχον τοῦ ἱεροῦ*) separating Jew and Gentile in Ephes. ii. 14, not without a remembrance (we may well suppose) of this incident of Trophimus the Ephesian, which was the beginning of his captivity. Again, in the tumult which follows, the same characteristics are still more prominent. The "tribune," the "cohort," the "descent" (r. 12), the "steps," the "fortress"—what is the meaning of all this? A minute topographical knowledge underlies the narrative. The tower of Antonia, dominating the Temple area and ascended thence by a long flight of stairs, with the armed cohort stationed there to keep order during the Festivals (Joseph. *B. J.* ii. 12. 1, τῆς Ῥωμαϊκῆς σκεπας ὑπὲρ τῆν τοῦ ἱεροῦ στοὰν ἐφεστῶσης, *ἑκατολὶ δὲ ἀεὶ τὰς ἐορτὰς παραφύλατταναι κ.τ.λ.*), are the facts familiar to the writer which explain and vivify the incidents. But they are assumed, not stated. Upon this follows immediately the reference to the Egyptian pretender, who, as we learn from Josephus (*Ant.* xx. 8. 6; *B. J.* ii. 13. 5), some three years before this time had threatened Jerusalem. He had disappeared, and nothing more was heard of him. What more likely than that the Roman captain should suppose that he had started up again to disturb the peace? The manner in which he is mentioned

here is altogether natural and unstudied. On the other hand, is it at all probable that a writer in the 2nd century would be capable of the very subtle and ingenious artifice which would be involved in this reference, if the narrative were not genuine? In fact the whole of this passage before and after the account of the Nazirite vows hangs together; and it is marked throughout with many and various tokens of authenticity.

Not unconnected with the objection based on the conciliatory tendency of the Book, is the supposed *parallelism* between the careers of the two Apostles in the former and latter parts of the narrative respectively. Paul is miraculously released from prison at Philippi (xvi. 26 sq.), as Peter was at Jerusalem (xii. 6 sq.). Paul strikes the sorcerer Elymas blind (xiii. 6 sq.), as Peter struck the liars Ananias and Sapphira dead (v. 1 sq.). Sick persons are healed by handkerchiefs and aprons brought from the body of Paul (xix. 11 sq.), as they are healed by the shadow of Peter falling upon them (v. 15). And so forth. When the incidents are extracted from their contexts and marshalled in pairs, they produce a great impression, and it is not surprising that many able critics of different schools have laid stress on this parallelism. On nearer examination, however, it is difficult to find any indication that this design was present to the mind of the writer, though he could hardly have concealed the fact, if he had entertained it. Nor, except in the miraculous release from prison, is there any close correspondence; and in this case the effect of the parallelism, as an indication of any such purpose, is destroyed by the fact that a third miraculous release from prison, earlier than either, is recorded (v. 19), in which "the Apostles" generally are involved. But in fact parallelisms far more close are common in history.

(iii.) But a wholly different objection has been urged to the genuineness of the Book. Several persons and incidents mentioned in the Acts have a place likewise in Josephus. As the two writers were treating of the history of the same country during the same period, we should hardly have expected it to be otherwise. But it is urged that the writer of the Acts borrowed from Josephus, and therefore cannot have been St. Luke. This objection was started by Holtzmann (*Zeitschr. f. Wiss. Theol.* xvi. [1873], p. 25 sq.), and followed up by Krenkel (*ib.* p. 441 sq.), by the author of *Supernatural Religion* (*Fortnightly Review*, 1877, p. 502 sq.), and by Keim (*Urchristenthum*, p. 1 sq., 1878). Holtzmann was answered by Schürer (*Zeitschr. f. Wiss. Theol.* xix. [1876], p. 574 sq.), to whom he made a counter-reply (*ib.* xx. [1877], p. 535 sq.). As regards the narrative of facts, the divergences between the two are a sufficient answer to the charge of plagiarism. Indeed, the genuineness of the narrative in the Acts has been assailed on two wholly different and irreconcilable grounds. On the one hand, its coincidences with Josephus are taken to prove that it is the work of a late pretender; on the other hand, its divergences from this same historian are regarded as evidence that the narrative is inauthentic. The attempt to reconcile these two contradictory grounds of attack by the supposition that when the author followed Josephus, he trusted his memory and was

betrayed by it, will hardly carry conviction to any one. We may remark in passing that it is an unproved assumption that, wherever there are divergences between the two, Josephus is right and St. Luke is wrong. Probabilities are often the other way. When, for instance, Josephus (*B. J.* ii. 13. 5) gives the number of the sicarii who followed the Egyptian as 30,000, and the author of the Acts as 4000, we can have no hesitation in preferring the smaller number to the larger. Moreover, Josephus is not always consistent with himself in his different works, and is full of inaccuracies when dealing with O. T. history (*Dict. of Christ. Biogr.* s. v. Josephus, iii. pp. 445, 455). As regards resemblances of diction, no coincidences have been alleged which make out even a *prima facie* case of plagiarism. Thus, when Holtzmann compares *Ant.* xx. 5. 1 (Φάδδου τῆς Ἰουδαίας ἐπιτροπέοντος) with Luke iii. 1 (ἡγεμονεύοντος Ποντίου Πιλάτου τῆς Ἰουδαίας), or when Krenkel sets side by side Josephus' account of his own boyhood (*Vit.* 2) with St. Luke's account of Christ's childhood (ii. 42 sq.), laying stress on the occurrence of such words as "intelligence" (σύνεσις) and "progress" (προκοπτεῖν), and on the fact that the one was fourteen years old (παῖς ὃν περὶ τεσσαρσκαίδέκατον ἔτος) and the other twelve (ὅτε ἐγένετο ἑτῶν δάδεκα . . . ὑπέμεινεν Ἰησοῦς ὁ παῖς), or when the author of *Supernatural Religion* calls attention to the dedication of Josephus' treatise *Against Apion* to Epaphroditus, whom he designates *κράτιστε ἀνδρῶν*, as Theophilus is designated *κράτιστε* by St. Luke, and then ransacks the preface of Josephus, which extends over several pages, to find words such as *παρὰκολουθεῖν*, *αὐτόπτης*, *ἀκριβῶς*, *ἐπιχειρεῖν*, we are able to measure the value of this objection. To take the last case. The epithet *κράτιστος* is very common as applied to persons in high position; it occurs many times, for instance, in the inscriptions in Wood's *Ephesus*. In one single inscription (*Great Theatre*, No. 17) it is found, twice within six lines, applied to two different persons (*Μάδεστος ὁ κράτιστος*, *Κορνηλίῳ Πρίσκιῳ τῷ κράτιστῳ ἀθλητῇ*); and in another (*City and Suburbs*, No. 5), twice within four lines, applied to four different persons, three of them being women (*Πειθίδος τῆς κράτιστης ὑπατικῆς*, *Δράκοντος Ξωσιπείρας Θεωνίδος τῶν κράτιστων*). Again, in every case the words used by both these writers in common are the obvious words to express the things signified, as any lexicon will show; and where two authors are dwelling on similar topics (e.g. the authorities for contemporary or nearly contemporary history), they cannot fail to employ similar language; nor is it easy to explain how any one who could write the Third Gospel and the Acts should be driven to Josephus to replenish his vocabulary with such ordinary words as "attempt," "accurately," "eye-witness," "observe," and the like.

(iv.) Another objection to the genuineness and authenticity of the narrative is the alleged fact that it contains certain unhistorical statements. For the most part however the errors adduced do not affect the veracity of the historian himself. Thus, for instance, it is affirmed that St. Stephen's speech, as tested by the Old Testament, contains several inac-

crucifixes. These would doubtless require consideration, if we were discussing the nature and limits of inspiration; but for the question of the veracity of the author they have no value at all. We have no ground for supposing that he was in any degree responsible for them. Nearly all the alleged historical errors are of this kind. The speakers are to blame, not the author who records their speeches. One or two examples, however, do not belong to this class. The chief and most formidable of such historical difficulties is connected with Theudas, the religious insurgent or pretender, whose name is mentioned in the speech of Gamaliel (Acts v. 36) as having been put to death "aforetime" (*πρὸ τούτων τῶν ἡμερῶν*), and his followers, about four hundred in number, dispersed. A person of this name appears likewise in Josephus (*Ant.* xx. 5. 1), where he is described as a wizard (*γῶγης*), who pretended that he was a prophet; undertook to divide the waters of the Jordan, so that it might be traversed dryshod; and was followed by the great mass of the common people (*τὸν πλείστον ὄχλον*). The procurator Fadus promptly sent a detachment of cavalry after him. The leader himself was beheaded, and of his followers some were slain and others captured alive. It is assumed that the Theudas of Josephus is the same with the Theudas of St. Luke; and if so, there is an insuperable chronological discrepancy. The procurator Fadus entered upon his office A.D. 44, but the Theudas of St. Luke must be placed long before this time: for (1) the speech of Gamaliel itself is supposed to be spoken some years earlier, and (2) Gamaliel describes the insurrection of Judas the Galilean, as subsequent to that of Theudas (*ver.* 37, *μετὰ τούτων*), and the insurrection of Judas certainly took place "in the days of the taxing," i.e. soon after the birth of Christ (see Joseph. *Ant.* xviii. 1. 1, xx. 5. 2; *B. J.* ii. 17. 8). Though the narrative of Josephus is disfigured by demonstrable errors and inaccuracies, yet it is hardly possible that he can have been mistaken here. We must therefore suppose the Theudas of Gamaliel to be a different person, as Origen does (*c. Cels.* i. 57, *Θευδᾶς πρὸ τῆς γενέσεως Ἰησοῦ γεγὼνέ τις παρὰ τοὺς βασιλεῖς*). Beyond the name there is no close resemblance; and Theudas contracted from Theodorus, Theodotus, Theodosius (frequently written Theodorus, Theudotus, Theodosius), as the Greek equivalent to several Hebrew names—Jonathan, Mattaniah, Matthias, Nathanael, &c.—would be commonly affected by the Jews (on these names, Theodorus, &c. among the Jews, see Zunz, *Gesamm. Schriften*, ii. pp. 6, 7, 10, 22). Josephus himself mentions four pretenders named Simon, and three named Judas—these last all within ten years (see Gloger, i. p. 197). The Theudas of Gamaliel, therefore, will probably have been one of the many pretenders of whom Josephus speaks as troubling the peace of the nation about this time (Joseph. *Ant.* xvii. 10. 8; *B. J.* ii. 4. 1), without however giving their names. There is something to be said for the solution of Wieseler (*Synopsis*, p. 90 sq., Eng. trans.), who, on the ground of the name, would identify him with Matthias the son of Margalothus, an insurgent in the time of Herod; for this person has a prominent place in Josephus (*Ant.* xvii. 6. 2 sq.). In connexion with this charge of

falsification the language respecting Judas of Galilee, attributed to Gamaliel in the context, deserves notice. He speaks of Judas' rebellion as coming to nothing. This was natural enough on the lips of Gamaliel before the sequel had revealed itself, but would be out of place at a later date; for two sons of this rebel leader, James and Simon, broke out in rebellion under Claudius, and were crucified by the procurator Tiberius Alexander (*Ant.* xx. 5. 2); while a third son, Menahem, headed a formidable rebellion shortly before the commencement of the Jewish war, and he too was put to death (*B. J.* ii. 17. 8 sq. See Nösgen, p. 146 sq.).

6. *The Time and Place of Writing.*—What was the date of the Acts? To this we can give no certain answer. It has been shown that the conclusion of the history is intentional, that there is no abruptness in it, and that therefore we cannot draw any inference from it, as though the book were written at the point of time where the narrative closes (p. 27). This indication of date having failed us, no clue remains. The fancy of Hug and others that *ἀβρὴ ἐστὶν ἔρημος* ("this is desert") in viii. 26 refers to the destruction of Gaza immediately before the fall of Jerusalem (Joseph. *B. J.* ii. 18. 1), and therefore points to a date not earlier than about A.D. 80, is based on a misconception. The words are perhaps not the author's own, but the Angel's, and they certainly refer not to the city, but to the road. They would thus be an instruction to Philip to take this route, because it passed through an uninhabited and unfrequented country, where he would be unmolested in his interview with the Ethiopian. The Book itself contains no reference to any event later than the close of the narrative itself. It must however have been written later than the Gospel, and we are thus led to investigate the date of this "former treatise." Here it is confidently assumed that the turn given to our Lord's predictions of the coming troubles (Luke xxi. 20–24), as compared with the parallel passages in the other Evangelists, shows that this Gospel was written after the destruction of Jerusalem. I am unable to see the force of this argument. The destruction of Jerusalem seems clearly to be indicated in Christ's prophecies in the other Evangelists likewise, and the difference of language does not seriously affect the case. Yet, though the reason given may not be valid, the date so assigned is perhaps not far wrong. It would at all events be a probable date for a writer who was a younger disciple and a personal follower of St. Paul. Not a few of those who recognise St. Luke as the author of the work have accepted this date as approximately correct.

The place of writing is altogether indeterminate. Something may be said in favour of Philippi. At all events the writer seems to have spent some time there (see above, p. 35), and the use of the first person at this point, without any explanation, may suggest some corresponding local knowledge on the part of the recipient. Again Antioch is far from improbable, since St. Luke according to an old tradition was born at Antioch, and some details connected with this city are given with exceptional particularity (vi. 5, xi. 26, xiii. 1 sq., xv. 22 sq.). Again Rome has a certain claim to be considered, since the writer accompanied

St. Paul on the visit with which the narrative closes. Other places which have been suggested, such as Alexandria or Ephesus, have nothing to recommend them.

7. *Sources of Information.*—The authorities of which the writer made use must remain a matter of speculation. It has been inferred from the preface to the Gospel, that St. Luke discarded all written sources of information, such as any memoirs of Christ's life and teaching which others before him may have published, and depended entirely on oral tradition, as received directly from eye-witnesses. It does not seem to me that his language suggests this strict limitation. The "tradition" of which he there speaks might be written as well as oral. Nor again, even supposing that he had confined himself to the oral communications of eye-witnesses in the first treatise, are we justified in assuming him to have acted in precisely the same way in composing the second. As a question of probability, the life and words of Christ, being the subject-matter of Christian teaching, would form a more or less definite body of oral tradition; but the doings of the Apostles had no such importance that they should assume this form. The question as regards the Acts resolves itself into one of internal evidence and probability. So regarding it, we are forced to the conclusion that, for some parts at least (the speech of Stephen will serve as an example), he must have used written notes taken down at the time; for this speech is inconceivable as a fiction, and almost equally so as an oral tradition. When we take into account the common use of shorthand among the ancients, there is no improbability in this supposition; and the gravity and interest of the defence on such a critical occasion must have impressed itself on all, more especially on the disciples.

The materials then would be partly oral, partly written. The written materials would be here and there a document, such as the letter of the apostolic council (xv. 23 sq.); here and there notes of speeches taken down at the time or immediately afterwards; and occasionally also diaries or memoranda of facts. Besides these, he would receive a large amount of oral information; and for some portions of his narrative he was himself an eye-witness. His chief authority would naturally be St. Paul, with whom at different epochs he spent large portions of time. But he likewise lodged a considerable time (ἡμέρας πλείους) with Philip the Evangelist (xxi. 10), and from him he may have received written or oral information respecting the earliest history of the Church, more especially the doings of the deacons, in which Philip himself "pars magna fuit" (viii. 3-40). From this source also he might have derived his information respecting the conversion of Cornelius, for Caesarea seems to have been Philip's permanent home before as well as after this event (viii. 40, xxi. 8). For portions of this earlier history also he may have been indebted to John Mark, in whose company we find him at a later date (Col. iv. 10, 14; Philem. 24; comp. 2 Tim. iv. 11). For all that related to Barnabas (Col. iv. 10) and to St. Peter (1 Pet. i. 13), Mark would be a competent authority. His intercourse with men like Timothy and Tychicus also must have been considerable; and

they may have supplied information for the latter part of his narrative, where St. Paul failed him. How close may have been St. Luke's intimacy with any of the Twelve, we cannot say. To any such intimacy we find no reference within the compass of his own narrative; but an acquaintance with St. Peter afterwards, at Rome, is consistent with the notices.

8. *The Motive and Design of the Work.*—The motive and design of the work have been considered already, when its contents were under discussion. Addressing one Theophilus, either an actual person or an imaginary representative of the Christian student, St. Luke merely proposes to give for the edification of his readers a history of the Christian Church from its foundation to its establishment in the metropolis of the world. If there were sufficient grounds for postulating a theological principle as the basis of the narrative, it would be the continued working and presence of Jesus, no longer in the flesh, but in the Church.

But a large number of recent critics have seen in this work a motive of a wholly different kind. They have regarded it as written with an *apologetic* or *conciliatory* purpose. In the present case these two epithets come to the same thing. For, if *apologetic*, it was intended either to defend St. Paul from the charge of hostility to the Jews, or St. Peter from the charge of opposition to the free admission of the Gentiles; if *conciliatory*, its motive was to bring together and amalgamate two parties in the Christian Church—the Judaic, which clung to the name of St. Peter, and the Gentile, whose watchword was the liberalism of St. Paul.

It will be seen at once, that such a view of the purpose is consistent with a frank recognition of the genuineness of the work and of the truthfulness of the narrative. Its aim would then be the correction of prevailing misunderstandings. Such was the position of Schneckenburger (1841), who was the first to emphasise the real or supposed parallelism between St. Peter and St. Paul, as showing the apologetic design of the author;⁴ but he himself herewith maintains the substantial credibility of the account. This same idea however was adopted by the critics of the Tübingen school, who occupied another platform, and to whom it was a convenient weapon for their destructive warfare. Baur (*Paulus*, p. 1 sq., 1845), Schweigler (*Das Nachapostolische Zeitalter*, ii. p. 73 sq., 1846), and Zeller (*Die Apostelgeschichte*, p. 316 sq., 1854), all took this parallelism as the basis of their theories, and regarded the Book as the work of a Pauline Christian in the 2nd century, whose object was to reconcile parties, and who freely invented his story accordingly. Not very different is the position of Hilgenfeld (*Einleitung*, p. 576 sq.), who takes it to represent "Unionist Paulinism" not earlier than the close of the 1st century. Several other critics also, without going to these extremes, have regarded the narrative as coloured by this "conciliatory" motive. Thus Renan (*Les Apôtres*, pp. xiii. sq., xxviii. sq.), though confidently ascribing the work to a companion of St. Paul,

⁴ Baur had previously suggested the idea of this "tendency" in the *Tübing. Zeitschr. f. Theol.* iii. p. 38 sq. 1836.

and therefore presumably to St. Luke, and employing its statements as generally credible, yet holds that the representations of the chief Apostles are highly coloured, so as to produce an impression of harmony which was not justified by the facts. In answer to such allegations it is sufficient to say that St. Paul's own practical maxim of "becoming all things to all men," and therefore of "becoming a Jew to the Jews," covers all the actions ascribed to him in St. Luke's narrative; that the very context, in which these particular actions are related, manifests, as I have already shown (p. 38), unmistakable tokens of authenticity; that St. Paul's language and conduct in dealing with Gentile converts like the Galatians is no standard at all for measuring his intercourse with the Church of Jerusalem; and that generally the tone and character of the narrative ought to place it above the suspicion of any conscious distortion of facts. For the rest, if any false impressions were abroad about the relations of the two chief Apostles, St. Peter and St. Paul, it is not unnatural that the writer should wish to correct them.

9. *The Chronology.*—There are two fixed points in the chronology of the Acts, as determined by contact with secular history. The first of these is St. Paul's second visit to Jerusalem (xi. 30, xii. 25), which is obviously synchronous, or nearly so, with the death of Herod Agrippa (xii. 23); but this latter event is known to have happened A.D. 44 (Joseph. *Ant.* xix. 8. 2). The second is St. Paul's appearance before Festus and consequent voyage to Rome (xxvi. 32, xxvii. 1). This occurred immediately after Festus had arrived in the province. But from various considerations it appears that the deposition of Felix and the accession of Festus most probably happened in A.D. 60, and must certainly have happened close upon that year; see Wieseler, *Chronol.* p. 66 sq.

Besides these two fixed dates, there are other references to events in secular history of which the date indeed is not definitely determined, but which serve as rough verifications. Such are the great famine (xi. 28), the banishment of the Jews from Rome (xviii. 2), the reign of Aretas at Damascus (ix. 25, 2 Cor. xi. 32), the proconsulship of Gallio in Achaia (xviii. 12).

Of the two fixed dates, the first—the death of Herod Agrippa—is isolated, and renders no assistance in the general scheme of chronology. But the second is of the highest value. The notices of the intervals of time in the Acts are fairly continuous from the apostolic council (c. xv) to the end of the Book. Thus by working backwards from the accession of Festus and the journey to Rome (A.D. 60), we are able to frame a skeleton of the chronology for the latter half of the Book, and we arrive at about A.D. 51 for the apostolic council. From this point, still working backwards, the chronological notices in Gal. i. 18, ii. 1, enable us to fix some of the early dates. The whole system is worked out most thoroughly by Wieseler. The results will be found in any of the common books relating to the apostolic history or the life of St. Paul. The special books on the chronology of St. Paul and of the Acts are Anger, *De temporum in Act. Apost. ratione* (Lipsiæ, 1833), and Wieseler, *Chronologie des apostolischen Zeitalters*

(Göttingen, 1848). Lewin's *Fasti Sacri* (London, 1865) is a useful work, and is not as well known as it deserves to be.

10. *The Text.*—Accounts will be found of the authorities for the text of the Acts in their proper place in the well-known Introductions and Prolegomena of Tregellea (1856), Scrivener (ed. 3, 1883), Tischendorf (ed. Gregory, 1884), and Westcott and Hort. Special works relating to this particular book are J. D. Michaelis, *Curæ in Versionem Syriacam Actuum Apostolicorum* (Göttingæ, 1755); Belsheim, *Die Apostelgeschichte u. die Offenbarung Johannis in einer alten lateinischen Uebersetzung* (Christiania, 1879); and F. A. Bornemann, *Acta Apostolorum ad Col. Cantabrigiensi fidem recensuit* (Grossenhainæ, 1848). In the last, as its title suggests, the MS. D is taken as the standard of the text—a conclusion which is not adopted by any sound textual critic. But the text of D and of a few other authorities which coincide with it in greater or less degrees, presents a difficult problem. The variations from the normal text are greater than are found in any other portion of the New Testament. They are of two kinds—partly paraphrases and amplifications, and partly insertions of additional incidents or particulars. As examples of this latter class may be mentioned such passages as xii. 10, where the number of steps is given in the account of St. Peter's release from prison, or xviii. 16, where the delivering of Paul and his fellow-prisoners to the prefect of the prætorium is mentioned. In this latter passage, however, D is wanting. Such additions belong to the same class of which the pericope relating to the women taken in adultery (John viii. 3 sq.) is the most prominent example. The editor or transcriber seems to have had access to some very early and genuine tradition; and the fact that the incident in the pericope in St. John was related likewise by Papias (Euseb. *H. E.* iii. 39) suggests that the source of these traditions is to be sought ultimately in the disciples who gathered about St. John and his successors in Asia Minor.

11. *The Literature.*—The literature which has accumulated about the Acts is so vast that an exhaustive catalogue is quite impracticable. In the following list all works which are directly homiletic or are intended for school purposes are omitted; nor have I for the most part included monographs and articles which treat of special points. Many of these have been noticed already in their respective places. After these deductions, the following books may be mentioned:—

A. *General Commentaries*, including the whole or a great part of the New Testament. Of the older commentaries those of Calvin, Grotius, and Bengel deserve to be specially named. Among recent works Alford, Wordsworth, the *Speaker's Commentary* (Cook and Jacobson), Ellicott's *New Testament Commentary for English Readers* (Plumptre), in England; and Olshausen (ed. 4, 1862, re-edited by Ebrard), De Wette (ed. 4, 1870, re-edited by Overbeck), Meyer (ed. 5, 1880, re-edited by Wendt), Lechler (in *Lange's Bibelwerk*, ed. 4, 1881), in Germany, may be mentioned.

B. *General Introductions to the New Testament.*—Bleek (Eng. trans.), 1869; Davidson, vol. ii.,

1842; Guericke, 1868 (ed. 3); Hilgenfeld, 1875; Holtzmann, 1885; Hug (Eng. trans.), 1827; Marsh's Michaelis, 1802 (ed. 2); Reuss, 1860; Salmon, 1886 (ed. 2); Weiss, 1886.

C. *Special Commentaries on the Acts*.—The Homilies of St. Chrysostom are the only patristic commentary of real importance on this Book. Passing to recent times, we have Baumgarten, Braunschweig, 1852, 1854 (Eng. trans.); Gloag, Edinburgh, 1870; Hackett, Boston, 1863 (new ed.); Humphry, London, 1854 (ed. 2); Nüsgen, Leipzig, 1882. A complete list of commentaries, special and general, up to the date (1859), will be found in Darling's *Cycl. Bibl.* p. 1167 sq.

D. *Special Works on the Acts*.—Biscoe, *Hist. of the Acts*, &c. confirmed from other Authors, &c. 1742, reprinted, 1840; Klostermann, *Vindiciae Lucanae sive de Itinerarii in libro Actuum asseruatore*, 1866; Klostermann, *Probleme im Aposteltexte*, 1883; Köaig, *Die Echtheit der Apostelgeschichte*, 1867; Lekebusch, *Composition u. Entstehung der A.-G.*, 1854; Lightfoot, *Hebrew and Talmudical Exercitations on the Acts of the Apostles*; Oertel, *Paulus in der A.-G.*, 1868; Paley, *Horae Paulinae* (edited by J. Tate, 1840; by Birks, 1850); Schmidt, K., *Die Apostelgeschichte*, Band i., 1882; Schneckenburger, *Über den Zweck der A.-G.*, 1841; Schwanbeck, *Über die Quellen der A.-G.*, 1847; *Supernatural Religion*, vol. iii., 1877; Stier, *Die Reden der Apostel* (ed. 2), 1861; S. P. C. K., *The Heathen World and St. Paul* (no date), Rawlinson, Plumtree. Davies, Merivale; Zeller, *Die Apostelgeschichte*, 1854.

E. *Apostolic Histories, Lives of St. Paul*, &c.—Baur, *Paulus*, 1845; Conybeare and Howson, *Life and Epistles of St. Paul*, 1856 (2nd ed.); Ewald, *Geschichte des apostolischen Zeitalter*, 1858 (2nd ed.), being vol. vi. of *Geschichte des Volkes Israel*; Farrar, *Early Days of Christianity*, 1882 (1st ed.); Farrar, *Life and Work of St. Paul*, 1879 (1st ed.); Lehler, *Das Apostolische u. das Nachapostolische Zeitalter* (1st ed., 1857; 2nd ed., 1885); Lewin, *Life and Epistles of St. Paul*, 1872; Neander, *Pflanzung und Leihung*, 1862 (5th ed.); Pfeleiderer, *Urchristenthum*, 1897; Renan, *Les Apôtres*, 1866 (1st ed.); Saint Paul, 1869 (1st ed.); Ritschl, *Die Entstehung der altkatholischen Kirche*, 1857 (1st ed.); Schaff, *Hist. of the Christian Church—Apostolic Christianity*, 1882; Schwegler, *Das Nachapostolische Zeitalter*, 1846; Thiersch, *Die Kirche im apostolischen Zeitalter*, 1879 (3rd ed.); Weizsäcker, *Das apostolische Zeitalter*, 1886.

This list might be considerably increased, if there were any object in increasing it. [J. B. L.]

ACU'A (Ἀκούβ; *Accub*) or AKKUB (1 Esd. v. 30; cp. Ezra ii. 45), who with

ACUB (B. Ἀκούβ, A. Ἀκούβ; *Accusu*) or BAKKUB (1 Esd. v. 31; cp. Ezra ii. 51), servants of the Temple, returned to Jerusalem. [W. A. W.]

ADA'DAH (עֲדָדָה), according to Ges. from the Syr. *festinal*; A. Ἀδαδ, B. Ἀδούδα; *Adada*, one of the cities in the extreme south of Judah named with Dimonah and Kedesh (Josh. xv. 22). Wellhausen and Dillmann* think that the reading was probably עֲדָדָה (*Arara*), and that the place is the same as עֲדָדָה (1 Sam. xxx. 28). Ruins bearing the name of 'A'dara are found S.E. of Beersheba (Rob. iii. 14, 180 sq.). [S. R. D.]

A'DAH (הָדָה), *ornament, beauty*. See Baethgen, *Beiträge z. Sem. Religionsgesch.*, p. 149. Cp. Dillmann [Gen. i. c.] for other derivations; 'Aḏā; *Ada*.

1. The first of the two wives of Lamech, fifth in descent from Cain, by whom were born to him Jabal and Jubal (Gen. iv. 19–23).

2. A Hittite, daughter of Elion, one (probably the first) of the three wives of Esau, mother of his first-born son Eliphaz, and so the ancestress of six (or seven) of the tribes of the Edomites (Gen. xxxvi. 2, 4, 10 ff. 15 ff.). In Gen. xxvi. 34 she is called BASHEMATH. [F. W. G.]

ADA'IAH (אֲדָיָה), Ges. = *Jah hath adorned*; B. Ἰεδαία, A. Ἰεδαία; *Hadaia*. 1. The maternal grandfather of king Josiah, and native of Boacath in the lowlands of Judah (2 K. xxii. 1).

2. B. Ἀδαία; *Adaiā*. A Levite, of the Gershonite branch, and ancestor of Asaph (1 Ch. vi. 41). In v. 21 he is called IDDO.

3. B. Ἀβιά, A. Ἀλαία; *Adaiā*. A Benjamite, son of Shimhi (1 Ch. viii. 21), who is apparently the same as Shema in v. 13.

4. B. Ἀδαία, A. Σαβίας in 1 Ch. i. c.; *Adaias*, *Adaiā*. A priest, son of Jeroham (1 Ch. ix. 12; Neh. xi. 12, BN¹ omits), who returned with 242 of his brethren from Babylon.

5. Ἀδαίας; *Adaiā*. One of the descendants of Bani, who had married a foreign wife after the return from Babylon (Ezra x. 29). He is called JEDEUS in 1 Esd. ix. 30.

6. Ἀδαία; A. Ἀδαίας; N. Ἀδαίμ; *Adaias*. The descendant of another Bani, who had also taken a foreign wife (Ezra x. 39).

7. A. Ἀχάα; BN. Δαλδ; *Adaiā*. A man of Judah of the line of Pharez (Neh. xi. 5).

8. אֲדָיָה; A. Ἀδαία; B. Ἀδαίμ; Ἀδαίμ; *Adaias*. Ancestor of Maaseiah, one of the captains who supported Jehoiada (2 Ch. xxiii. 1).

[W. A. W.] [F.]

ADAL'IA (אֲדָלְיָה). The name in the Greek texts corresponding to this is N. Βαπέδ, B. Βαπέδ, A. Βαπέξ; *Adalia*, one of the sons of Haman, massacred by the Jews at Shushan (Esth. ix. 7–10). Gesenius and Cassel (*d. B. Esther*, p. 228) consider the name Persian, but are not agreed as to its etymology. [F.]

ADAM (אָדָם; Ἀδάμ; *Adam*), the name which is given in Scripture to the first man. The term apparently has reference to the ground from which he was formed, which is called *Adamah* (אֲדָמָה, Gen. ii. 7). The idea of *redness of colour* seems to be inherent in either word (cf. אָדָם, Lam. iv. 7; אָדָם, *red*, אָדָם; *Edom*, Gen. xxv. 30; אָדָם, *a ruby*; Arab. آدم; *colore fusco praeditus fuit, rubrum tinxit*, &c.).

The conjecture of Fried. Delitzsch which associates the term with the Assy. *admu* and renders it "geschaffener" (*Prolegg. eines neuen Heb.-Aram. Wörterb.* z. A. T. pp. 103–4) is not universally accepted (see Franz Delitzsch, *Genesis* [1887], p. 77); equally conjectural is the identification of Adam with the Egyptian Atum (see *Transactions of the Soc. of Biblical Archaeology*, ix. 176). The generic term Adam, man, becomes, in the case of the first man, a denominative. Supposing the Hebrew language to

represent accurately the primary ideas connected with the formation of man, it would seem that the appellation bestowed by God was given to keep alive in Adam the memory of his earthly and mortal nature; whereas the name by which he preferred to designate himself was *Ish* (עִשׂ, a man of substance or worth, Gen. ii. 23). The creation of man was the work of the sixth day. His formation was the ultimate object of the Creator. It was with reference to him that all things were designed. He was to be the "roof and crown" of the whole fabric of the world. In the first nine chapters of Genesis there appear to be three distinct histories relating more or less to the life of Adam. The first extends from Gen. i. 1 to ii. 3, the second from ii. 4 to iv. 26, the third from v. 1 to the end of ix. (see Riehm, *HWB.* s. n.). The word at the commencement of the two latter narratives, which is rendered there and elsewhere *generations*, may also be rendered *history*. The style of the second of these records differs very considerably from that of the first. In the first the Deity is designated by the word *Elohim*; in the second He is generally spoken of as *Jehovah Elohim*. The object of the first of these narratives is to record the creation; that of the second to give an account of Paradise, the original sin of man, and the immediate posterity of Adam; the third contains mainly the history of Noah, referring it would seem to Adam and his descendants, principally in relation to that patriarch.

We should, however, not fail to observe that the interdependence of these sections is complete, notwithstanding their marked individuality. For example, ii. 4 presupposes the previous section, because it is a summary of what has gone before and not of what follows, inasmuch as there is no mention in that of the creation of the heavens and the earth. "These are the generations" can, therefore, refer only to Gen. i. 1—ii. 3. In like manner v. 1 implies i. 27, and v. 29 implies iii. 17; whereas on the other hand it is impossible to conceive any consecutive narrative which can have run on continuously from ii. 3 to v. 1 or elsewhere, without the intermediate record. The essential unity of the composition involves the unity of the narrative. The work of the compiler is conspicuous from whatever source he may have gathered his materials, and these materials can never have formed an independent whole. We can only treat the narrative as one, however composite it may be.

The Mosaic accounts furnish us with very few materials from which to form any adequate conception of the first man. He is said to have been created in the image and likeness of God, and this is commonly interpreted to mean some superexcellent and divine condition which was lost at the Fall: apparently however without sufficient reason, as the continuance of this condition is implied in the time of Noah, subsequent to the Flood (Gen. ix. 6), and is asserted as a fact by St. James (iii. 9) and by St. Paul (1 Cor. xi. 7). It more probably points to the Divine pattern and archetype after which man's intelligent nature was fashioned; reason, understanding, imagination, volition, &c. being attributes of God; and man alone of the animals of the earth being possessed of a spiritual nature which resembled God's nature. Man in short

was a spirit, created to reflect God's righteousness and truth and love, and capable of holding direct intercourse and communion with Him. As long as his will moved in harmony with God's will, he fulfilled the purpose of his Creator. When he refused submission to God, he broke the law of his existence and fell, introducing confusion and disorder into the economy of his nature. As much as this we may learn from what St. Paul says of "the new man being renewed in knowledge after the image of Him that created him" (Col. iii. 10), the restoration to such a condition being the very work of the Holy Spirit of God. The name Adam was not confined to the father of the human race, but like *homo* was applicable to *woman* as well as *man*, so that we find it said in Gen. v. 1, 2, "This is the book of the 'history' [A. V. and R. V. 'generations'] of Adam. In the day that God created 'Adam,' in the likeness of God made He him; male and female created He them, and called *their* name Adam in the day when they were created."

The man Adam was placed in a garden which the Lord God had planted "eastward in Eden" (Gen. ii. 8), for the purpose of dressing it and keeping it. It is perhaps hopeless to attempt to identify the situation of EDEN with that of any district familiar to modern geography. There seems good ground for supposing it to have been an actual locality, and modern investigations have tended to show that this locality was not improbably between the Mediterranean and the Caspian seas. Two of the rivers which are described as watering the Garden of Eden can still be identified unmistakably with the Euphrates and the Tigris. Thus the LXX. call the Hiddekel, both in Gen. ii. 14 and in Dan. x. 4, the Tigris. [HIDDEKEL.] The Pison and the Gihon may likewise be traced in existing rivers of Mesopotamia, though it is difficult to understand how they should have been united unless indeed the historian contemplates them as flowing together like the Tigris and Euphrates as they approach the sea, and then traces them backwards towards their source when they became four distinct head streams.

Adam was permitted to eat of the fruit of every tree in the garden but one, which was called the "tree of the knowledge of good and evil." What this was, it is also impossible to say [see *Speaker's Comm.* and Delitzsch (1887) in loco]. Its name would seem to indicate that it had the power of bestowing the consciousness of the difference between good and evil; in the ignorance of which man's innocence and happiness consisted. The prohibition to taste the fruit of this tree was enforced by the menace of death. There was also another tree which was called "the tree of life." Some have supposed it to have acted as a kind of medicine, and that by the continual use of it our first parents, not created immortal, were preserved from death. (Abp. Whately.) While Adam was in the garden of Eden the beasts of the field and the fowls of the air were brought to him to be named, and whatsoever he called every living creature that was the name thereof. Thus the power of fitly designating objects of sense was possessed by the first man, a faculty which is generally considered as indicating mature and extensive intellectual resources. Upon the

failure of a companion suitable for Adam among the creatures thus brought to him to be named, the Lord God caused a deep sleep to fall upon him, and took one of his ribs from him, which He fashioned into a woman and brought her to the man. Prof. S. Lee supposed the narrative of the creation of Eve to have been revealed to Adam in his deep sleep (Lee's *Job*, Introd., p. 16). This is agreeable with the analogy of similar passages, as Acta x. 10, xi. 5, xxii. 17. At this time they are both described as being naked without the consciousness of shame.

Such is the Scripture account of Adam prior to the Fall: there is no narrative of any condition superhuman, or contrary to the ordinary laws of humanity. The first man is a true man, with the powers of a man and the innocence of a child. He is moreover spoken of by St. Paul as being "the figure (*τύπος*) of Him Who was to come," the second Adam, Christ Jesus (Rom. v. 14). His human excellence therefore cannot have been superior to that of the Son of Mary, who was Himself the Pattern and Perfect Man. By the subtlety of the serpent, the woman who was given to be with Adam was beguiled into a violation of the one command which had been imposed upon them. She took of the fruit of the forbidden tree and gave it to her husband. The propriety of its name was immediately shown in the results which followed: self-consciousness was the first-fruits of sin; their eyes were opened and they knew that they were naked. The subsequent conduct of Adam would seem to militate against the notion that he was in himself the perfection of moral excellence. His cowardly attempt to clear himself by the imputation of his helpless wife bears no marks of a high moral nature, even though fallen; it was conduct unworthy of his sons, and such as many of them would have scorned to adopt. Though the curse of Adam's rebellion of necessity fell upon him, yet the very prohibition to eat of the tree of life after his transgression was probably a manifestation of Divine mercy, because the greatest malediction of all would have been to have the gift of indestructible life superadded to a state of wretchedness and sin. When moreover we find in Prov. iii. 18, that wisdom is declared to be a tree of life to them that lay hold upon her, and in Rev. ii. 7, xxii. 2, 14, that the same expression is applied to the grace of Christ, we are led to conclude that this was merely a temporary prohibition imposed till the Gospel dispensation should be brought in. Upon this supposition the condition of Christians now is as favourable as that of Adam before the Fall, and their spiritual state the same, with the single exception of the consciousness of sin and the knowledge of good and evil.

Till a recent period it has been generally believed that the Scriptural narrative supposes the whole human race to have sprung from one pair. It is maintained that the O. T. assumes it in the reason assigned for the name which Adam gave his wife after the Fall, viz. Eve, or Charvah, i.e. a living woman, "because she was the mother of all living;" and that St. Paul assumes it in his sermon at Athens when he declares that God hath made of one blood all nations of men; and in the Epistle to the Romans and First Epistle to the Corinthians, when he opposes Christ as the representative of

redeemed humanity to Adam as the representative of natural, fallen, and sinful humanity. But the full consideration of this important subject will come more appropriately under the article MAN.

In the Middle Ages discussions were raised as to the period which Adam remained in Paradise in a sinless state. Dante (*Paradiso*, xvi. 139-142) did not suppose him to have been more than seven hours in the earthly Paradise.

Adam is stated to have lived 930 years: so it would seem that the death which resulted from his sin was the spiritual death of alienation from God. "In the day that thou eatest thereof thou shalt surely die" (Gen. ii. 17); and accordingly we find that this spiritual death began to work immediately. The sons of Adam mentioned in Scripture are Cain, Abel, and Seth: it is implied however that he had others.* [S. L.]

ADAM (אָדָם; *Adam*), a city on the Jordan "beside (בְּצֵדָה) Zarthan," in the time of Joshua (Josh. iii. 16. See Dillmann² in loco). It is not elsewhere mentioned, nor is there any reference to it in Josephus. The name is thought by some to be preserved in the bridge and ford of *ed-Dāmiḥ*, directly east of *Kurn Surtabeh*; but the identification of *Surtabeh* and Zarthan involves an improbable change of letters (Dillmann²).

The A. V. in Josh. *l.c.* follows the *Keri*, which, in the place of אָדָם = "by Adam," the reading in the Hebrew text or Chethib, has אָדָם = "from Adam," an alteration which is a questionable improvement (Keil, i. l.). The R. V. has "at Adam." A more accurate rendering of the text is "rose up upon a heap, very far off, by Adam, the city that is beside Zarthan" (Stanley, *S. & P.* 304, note). The LXX. (B.) rendering, ἀφ' ὧρα ἀφ' ὧρα ἕως μέσους καθίσταται, arose from the *Keri* with a different signification and omission of part of the text; e.g. כָּדָר כָּדָר צֶרֶת (cp. Hollenberg, p. 17). [G.] [W.]

ADAM'AH (אָדָמָה; B. *'Apmal*, A. *'Adamū*; *Edema*), one of the "fenced cities" of Naphtali, named between Chinnereth and ha-Ramah (Josh. xix. 36). It is now probably the village *ed-Dāmiḥ*, west of the Sea of Galilee (*P. F. Mem.* i. 384). [G.] [W.]

ADAMANT (אָדָמָן; *adāmān*; *ἀδάμαντος*; *adamas*). The word *shāmīr* occurs as a common noun eleven times in the O. T. In eight of these passages, all of them in Isaiah, it stands for a thorny tree, and is rendered "briers" in A. V. In some instances it is coupled with נִשְׁתִּי, "thorns," and in one with קִרְיָן, also "thorns" in A. V. and R. V. Its Arabic equivalent *سامور*, *samur*, is applied

to this day by the Arabs of the district to the *Paliurus aculeatus*, or "Christ's thorn,"

* The comparison of the Biblical narrative relative to Adam with parallel traditions (Assyrian, Egyptian, &c.) will be found in Lenormant, *Les Origines de l'Histoire* (ed. 1880), i. 37 sq., and Vigouroux, *La Bible et les Découvertes Modernes*, i. p. 191 sq.

^b Arab. شَمِير and سَامُور. Cp. the Chaldee אָדָמָן.

which grows in the Jordan valley and the warmer parts of Palestine. In Galilee it is given to *Rhamnus palaestina*, the Palestine buckthorn; and in Arabia to various species of *Zizyphus* or *Sidra*. In the three remaining passages (Jer. xvii. 1; Ezek. iii. 9; Zech. vii. 12), it is the representative of some stone of excessive hardness, and is used in each of these last instances metaphorically. In Jer. xvii. 1, *shāmīr* = "diamond" in A. V. and R. V. "The sin of Judah is written with a pen of iron and with the point of a diamond," i.e. the people's idolatry is indelibly fixed in their affections, *engraved* as it were on the tablets of their hearts. In Ezek. iii. 9, *shāmīr* = "adamant" (A. V. and R. V.): "As an adamant harder than flint have I made thy forehead: fear them not." Here the word is intended to signify that firmness of purpose with which the prophet should resist the sin of the rebellious house of Israel. In Zech. vii. 12, the Hebrew word = "adamant-stone" (A. V. and R. V.): "Yea, they made their hearts as an adamant-stone, lest they should bear the law," and is used to express the hardness of the hearts of the Jews in resisting truth.

The LXX. affords us but little clue whereby to identify the mineral here spoken of, for in Ezek. iii. 9 and in Zech. vii. 12 they have not rendered the Hebrew word at all, while the whole passage in Jer. xvii. 1-5 is altogether omitted in the Vatican MS.; the Alexandrine MS., however, has the passage, and reads, with the Versions of Aquila, Theodotion, and Symmachus, "with a nail of adamant." "Adamant" occurs in the Apocrypha, in Ecclus. xvi. 16 (a verse omitted in most Greek copies, but found in the Syriac and Arabic).

Our English "adamant" is derived from the Greek,^a and signifies "the unconquerable," in allusion perhaps to the hard nature of the substance, or, according to Pliny (xxxvii. 15), because it was supposed to be indestructible by fire.^b The Greek writers generally apply the word to some very hard metal, perhaps steel, though they do also use it for a mineral. Pliny, in the chapter referred to above, enumerates six varieties of *Adamas*. Dana (*Syst. Mineral.* art. *Diamond*) says that the word "Adamas was applied by the ancients to several minerals, differing much in their physical properties. A few of these are quartz, specular iron ore, emery, and other substances of rather high degrees of hardness, which cannot now be identified." Nor does the English language attach any one definite meaning to *adamant*: sometimes indeed we understand the *diamond*^c by it, but it is often used vaguely to express any substance of impenetrable hardness. Chaucer, Bacon, Shakespeare, use it in some instances

for the *lode stone*.^d In modern mineralogy the simple term *adamant* has no technical signification, but *adamantine spar* is a mineral well known, and is closely allied to that which we have good reason for identifying with the *shāmīr* or *adamant* of the Bible.

That some hard cutting stone is intended can be shown from the passage in Jeremiah quoted above. In Arabic and Aramaic there is a word corresponding to the Hebrew *shāmīr*,^e but in all three languages the derivation is not apparent. A sense of sharpness is implied by the application of the original word to a *brier* or *thorn*. New since, in the opinion of those who have given much attention to the subject, the Hebrews appear to have been unacquainted with the true diamond,^f it is very probable, from the expression in Ezek. iii. 9, of "adamant harder than flint,"^g that by *shāmīr* is intended some variety of *corundum*, a mineral inferior only to the diamond in hardness. Of this mineral there are two principal groups: one is crystalline, the other granular; to the crystalline varieties belong the indigo-blue sapphire, the red oriental ruby, the yellow oriental topaz, the green oriental emerald, the violet oriental emethyst, the brown adamantine spar. But it is to the granular or massive variety that the *shāmīr* may with most probability be assigned. This is the modern *emery*, extensively used in the arts for polishing and cutting gems and other hard substances; it is found in Saxoe, Italy, Asia Minor, the East Indies, &c., and "occurs in boulders or nodules in mica slate, in talcose rock, or in granular limestone, associated with oxide of iron; the colour is smoke-grey or bluish grey; fracture imperfect. The best kinds are those which have a blue tint; but many substances now sold under the name of emery contain no corundum."^h The Greek name for the emery is *smiris* or *smiris*,ⁱ and

^a Chaucer, *Romaunt of the Rose*, 1182; Shakespeare, *Mid. Night Dr.* Act ii. sc. 2, and *Troil.* and *Cress.* Act iii. sc. 2; Bacon's *Essay on Travel*.

^b Roediger in Gesenius, *Theor. sub. voc.* שָׁמִיר, i. q.

שָׁמִיר, *horruit, riguit*. Ges. (*Lex.*) connects it with שָׁמִיר, the root (annexed in Bibl. Heb.) of שָׁמִיר, a nail, whence a point, but the change of sibilant is opposed to both these views. [S. R. D.] In Arab.

سمر, *sanur*, is "an Egyptian thorn" (see Forskål,

Fl. Eg. Ar. cxxiii. 176), and سامور, *adamas*. See

Freitag, *Lex. Arab.* s. v.

^c Dana says that the method of polishing diamonds was first discovered in 1456 by Louia Bergen, a citizen of Bruges, previous to which time the diamond was only known in its native uncut state. It is quite clear that *shāmīr* cannot mean *diamond*, for if it did the word would be mentioned with precious stones; but this is not the case.

^d שָׁמִיר, *That* שָׁ, though it may sometimes be applied to "rock" generally, yet sometimes = *flint*, or some other variety of quartz, seems clear from Ex. iv. 25: "Then Zipporah took a sharp stone" (שָׁ, *tsôr*). That flint knives were in common use amongst Eastern nations is well known. Compare that very interesting verse of the LXX., Josh. xxiv. 31.

^e Ansted's *Mineralogy*, § 394.

^f *σμίρις*, or *σμίρις*, *σμίρις* est *ἀμμου λίθος* (Hesychius); *σμίρις λίθος* ἐστὶ (Dioscor. v. 165).

^a ἐν ὄνυχι ἀδάμαντι, LXX. A.; "In ungue adamantino," Vulg.

^b ἀ, ἀδάμας.

^c It is incorrect to suppose that even the *diamond*, which is only pure carbon crystallized, is "invincible" by fire. It will burn; and at a temperature of 14° Wedgwood will be wholly consumed, producing carbonic acid gas.

^d Comp. also Senec. *Hercul. Fur.* 807: "Adamante texto vincire."

^e Our English *diamond* is merely a corruption of *adamant*, Comp. the French *diamant*.

the Hebrew lexicographers derive this word from the Hebrew *shāmīr*. There seems to be no doubt whatever that the two words are identical, and that by *adamant* we are to understand the *emery-stone*,² or the uncrystalline variety of the *corundum*.

The word SHAMIR occurs in the O. T. three times as a proper name—once as the name of a man (1 Ch. xxiv. 24), and twice as the name of a town. The name of the town may have reference to the rocky nature of the situation, or to *briers* and thorns abundant in the neighbourhood.³ [W. H.] [H. B. T.]

ADAMI (אָדָמִי; B. 'Appé, A. 'Appai; Adami), a place on the border of Naphtali, named after Allon hexaanannim (Josh. xix. 33). By some it is taken in connexion with the next name, *ban-Nekeb* (cp. R. V. Adami-nekeb), but see Reland, p. 545. In the post-biblical times Adami bore the name of Damin, probably *Kh. Admah*, south-west of the Sea of Galilee, and immediately north of *W. el-Bireh*; so named from the purple basaltic soil (Heb. אָדָם, "red"). (P. F. Mem. ii. 89, 121.) [G.] [W.]

AD'AR (accurately, as in R. V., Addar, אָדָר; B. *Zapdā*, A. 'Aðpā; Addar), a place on the south boundary of Palestine and of Judah (Josh. xv. 3), which in the parallel list is called HAZAR-ADDAR. Probably some place in *Jebel Magrah*, which forms the natural boundary of the *Negb* or south country. [G.] [W.]

AD'AR. [MONTHS.]

AD'ASA (ΑΔΑΣΑ, LXX.; *ῥὰ Ἀδασά*, Jos.; *Adarsa*, *Adazer*), a place in Judaea, a day's journey from Gazera, and 30 stadia from Beth-boron (Jos. Ant. xii. 10, § 5). Here Judas Maccabaeus encamped before the battle in which Nicanor was killed, Nicanor having pitched at Beth-boron (1 Macc. vii. 40, 45). Eusebius (OS.² p. 240, 6) mentions it as near Guphna, and it is now possibly *Kh. Adasch*, 6½ miles from Upper Beth-boron on the road to Jerusalem (P. F. Mem. iii. 30, 105). The site is still connected with a tradition of some great slaughter; for the ruin stands above a valley called *Wādy ad-Dumm*, "the valley of blood" (Conder, *Handbook to Bible*, p. 294). [G.] [W.]

AD'BEEL (אָדְבֵּעַל; A. *Naßēhā*, D. -ai; *Adbeel*; ΑΒΔΕΛΛΟΣ, Joseph. Ant. i. 12, § 4; "per-haps 'miracle of God,' from *أَدَب*, *miracle*," Ges. *Thes.* s. v.), named as the third of the

Both statements are correct; the one refers to the powder, the other to the stone. The German *Smirgel*, or *Schmergel*, is evidently allied to the Hebrew and Greek words. Bohlen considers the Hebrew word to be of Indian origin, comparing *asmirā*, a stone which eats away iron. Doubtless all these words have a common origin.

² This is probably the same stone which Herodotus (iii. 69) says the Aethiopians in the army of Xerxes used instead of iron to point their arrows with, and by means of which they engraved seals.

³ In the Keri. The Chethib has *שָׁמִיר*, *shamir*.

⁴ It will be enough merely to allude to the Rabbinical tale about Solomon, the Hoopoe (*al. the moorcock or the eagle*), and the worm *Shamir*. See Bochart's *Hierozoicon*, vol. iii. p. 842, ed. Rosenmüller, and Buxtorf, *Lex. Talmud.* col. 2455.

twelve sons of Ishmael (Gen. xxv. 13; 1 Ch. i. 29), and thus presumably as the progenitor of an Arab tribe. No satisfactory identification of this name with that of any people or place mentioned by the Greek geographers, or by the Arabs themselves, has yet been discovered. The latter have lost most of the names of Ishmael's reputed descendants between that patriarch and 'Adnān (said to be of the twenty-first generation before Mohammad), and this could scarcely have been the case if tribes, or places named after them, existed in the times of Arabian historians or relaters of traditions: it is therefore unlikely that these names are to be recovered from native authors. But some they have taken, and apparently corrupted, from the Bible; and among these is Adbeel, written (in the *Mirāt ez-Zemān*) *ازبل*. [E. S. P.]

Caneiform inscriptions mention an Arab tribe, *Idibā'ū*, *Idibī'dū*, as located S.W. of the Dead Sea towards the borders of Egypt (Delitzsch, *Wo lag das Paradies*, p. 301; Schrader, *KAT*², p. 148); and D. H. Müller has pointed out the name אָדְבֵּעַל in an inscription from Medain Sālih (NIV.¹⁰ s. n.). [F.]

AD'DAN (אָדָן; 'Hōdān; *Adon*), one of the places from which some of the Captivity who could not show their pedigree as Israelites returned with Zerubbabel to Judaea (Ezra ii. 59). In the parallel list of Nehemiah (vii. 61) the name is ADDON. In 1 Esd. v. 36 the names Cherub, Addan, and Immer appear as "CHARATHALAR leading them, and Anlar." [G.] [W.]

AD'DAR (אָדָר; B. 'Alēl, A. 'Apēd; *Addur*), son of Bela (1 Ch. viii. 9), called ARD in Num. xxi. 40. [W. A. W.] [F.]

ADDER. This word in the text of the A. V. is the representative of four distinct Hebrew names, and in R. V. of three, mentioned below. It occurs in Gen. xlix. 17 (margin, A. V. *arrow-snake*, R. V. *horned snake*); Ps. lviii. 4 (margin, A. V. *asp*), xci. 13 (margin, A. V. *asp*); Prov. xxiii. 32 (margin, A. V. *cockatrice*, R. V. *basilisk*); and in Is. xi. 8, xiv. 29, lix. 5, the R. V. has *cockatrice*, the R. V. *basilisk*, and the margin of both has *adder*. Our English word *adder* is used for any poisonous snake, and is applied in this general sense by the translators of the A. V. and R. V.* They use in a similar way the synonymous term *asp*.

1. *Acshūb* (אֲכַשְׁבּ; *akōsis*; *aspis*) is found only in Ps. cxl. 3, "They have sharpened their tongues like a serpent; adders' poison is under their lips." The latter half of this verse is quoted by St. Paul from the LXX. in Rom. iii. 13. The poison of venomous serpents is often employed by the sacred writers in a figurative sense, to express the evil tempers of ungodly men; that malignity which, as Bishop Horne says, is "the venom and poison of the intellectual world" (comp. Deut. xxxii. 33; Job xx. 14, 16).

It is not possible to say with any degree of certainty what particular species of serpent is intended by the Hebrew word; the ancient

* *Adder*, in systematic zoology, is generally applied to those genera which form the family *Viperidae*—*Asp.* to the *Vipera Aspis* of the Alps.

Versions do not help us at all, although nearly all agree in some kind of serpent, with the exception of the Chaldee paraphrase, which understands a *spiler* by 'acshûb, interpreting this Hebrew word by one of somewhat similar form.^b The etymology of the term is not ascertained with sufficient precision to enable us to refer the animal to any determinate species, and no Arabic equivalent of the word has been found. Gesenius derives it from two Hebrew roots,^c the combined meaning of which is "rolled in a spire, and lying in ambush;" a description which would apply to almost any kind of serpent.

Vipera euphratica. (British Museum.)

Thirty-three species of *Ophidia*, the Serpent tribe, are known from Palestine, but only six of these, belonging to five genera, are poisonous: *Naja haje*, two vipers, *Daboia xanthina*, *Cerastes Hasselquisti*, and *Echis arnicola*. Seven Hebrew words are employed to designate serpents, but one of them, נָחָשׁ (*nachash*), is undoubtedly generic. While it is unlikely that the two vipers, which occur in different parts of the country, were discriminated by the Jews, we may reasonably presume that the Jews distinguished five species, which are very different in appearance and habits. The prejudice against all the serpent tribe was probably as strong among the Jews as among the Arabs at the present day, who kill all snakes when they have the opportunity, and believe many of the harmless species to be poisonous, especially if they happen not to be brightly coloured. But for none of the harmless snakes have the Arabs any distinctive name, nor do we find any in the Hebrew. As there seems to be some reason for assigning *pethen*, *shephiphôn*, and *tsiphóni* to other species, we may fairly presume that the common poisonous snake of the country, in the plains *Vipera euphratica*, in the higher grounds *Vipera ammodytes*, is intended by 'acshûb. The former species, a native of Mesopotamia, Persia, Armenia, and the Caucasus, is very common both in the Jordan valley and in the plains and lower hills. The latter species is chiefly con-

^b עֲקָבִיט, 'accabîb.

^c *Thec.* sub voc. :- עֲקָבִיט, *retrosum se flexit*, and עֲקָבִיט, *insidiatus est*; but in *Lex.* it is taken as formed apparently from an Arab. root, to bend backward, by the addition of בּ. Cp. Delitzsch on Ps. cxi. 4.

fined to Lebanon. Both of them are plainly coloured, very dark brown, with broad flat heads and prominent jaws, and with suddenly contracting tails.

2. *Pethen* (פֶּתֶן). [ASP.]

3. *Tsepha'* or *Tsiph'óni* (צִפְּהָא' וְצִפְּהוֹנִי; ἰκνύρα δασιδων, κερδάνης; *regulus*) occurs five times in the Hebrew Bible. In Prov. xxiii. 32 it is translated *adder* in A. V. and R. V.; and in the three passages of Isaiah quoted above, as well as in Jer. viii. 17, it is rendered *cockatrice* in A. V. and *basilisk* in R. V. The derivation of the word from a root which means "to hiss" does not help us at all to identify the animal. From Jeremiah we learn that it was of a hostile nature, and from the parallelism of Is. xi. 8 it appears that the *tsiph'óni* was considered even more dreadful than the *pethen*. Bochart, in his *Hierozoicon* (iii. 182, ed. Rosenmüller), has endeavoured to prove that the *tsiph'óni* is the *basilisk* of the Greeks (whence Jerome in Vulg. reads *regulus*), which was then supposed to destroy life, burn up grass, and break stones by the pernicious influence of its breath (comp. Plin. H. N. viii. c. 33), but this is explaining an "ignotum per ignotius."

The whole story of the basilisk is involved in fable, and it is vain to attempt to discover the animal to which the ancients attributed such terrible power. It is curious to observe, however, that Forskål (*Descr. Animal.* p. 15) speaks of a kind of serpent (*Coleber Höllei*: is the name he gives it) which, he says, produces irritation on the spot touched by its breath: he is quoting no doubt the opinion of the Arabs. Is this a relic of the *basiliskian* fable? This creature was so called from a mark on its head, supposed to resemble a kingly crown. Several serpents, however, have peculiar markings on the head—the varieties of the Spectacle-Cobras of India, for example—so that identification is impossible. As the LXX. make use of the word *basilisk* (Ps. xc. 13 = xci. 13, A. V.) it was thought desirable to say this much on the subject.^d

The *tsiph'óni* may probably be the great yellow viper, *Daboia xanthina*, a very beautifully marked serpent, and the largest poisonous species found in the Holy Land, as well as one of the most dangerous, on account not only of its size, but of its nocturnal habits, in which it differs from the Cobra and the Cerastes. I once killed a *Daboia* having in its stomach a leveret which it had swallowed whole. On another occasion I saw one spring on a quail which was feeding; it missed its prey, the bird fluttered on a few yards, and then fell in the agonies of death. On taking it up, I found the viper had made the slightest possible puncture in the tip of one wing as it snapped at it. The *Daboia* is remarkable as belonging to an exclusively Indian family of serpents, and which has no representatives in Africa, to which region or to Europe all the other poisonous snakes of Palestine belong. Dr. Harris, in his *Natural History of the Bible*, erroneously supposes the *tsiph'óni* to be identical with the *Rajah zeyphen* of Forskål,

^d The *basilisk* of naturalists is a most forbidding-looking yet harmless lizard of the family *Iguanidae*, order *Sauria*. In using the term, therefore, care must be taken not to confound the mythical serpent with the veritable Saurian.

which, however, is a fish (*Trigon zephcn*, Cuv.), and not a serpent.

Echis arnoulia.

4. *Shephiphôn* (שֶׁפִּיפֹּן; ἑγκαθήμενος; *cerastes*) occurs only in Gen. xlix. 17, where it is used to characterise the tribe of Dan: "Dan shall be a serpent in the way, an adder (margin, or, *horned snake*) in the path, that biteth the horse's heels, so that his rider falleth backward" (R. V.). Various are the readings of the old Versions in the passage: the Samaritan interprets *shephiphôn* by "lying in wait;" the Targums of Onkelos, of Jerusalem, and of P. Jonathan, with the Syriac, "a basilisk." Saadias and the Arabic edited by Erpenius have "the horned snake;" and so the Vulg. *Cerastes*. The LXX., like the Samaritan, must have connected the Hebrew term with a word which expresses the idea of "sitting in ambush." The original word, according to Gesenius and Rödiger, comes from a root preserved in Syriac, and signifying "to glide."*

The Hebrew word *shephiphôn* is no doubt identical with the Arabic *siff-un*. If the translation of this Arabic word by Golius be compared with the description of the *Cerastes*, there will appear good reason for identifying the *shephiphôn* of Genesis with the *Cerastes* of naturalists. "*Siffum*, serpentis genas leve, punctis maculisque distinctum"—"a small kind of serpent marked with dots and spots" (Golius, *Arab. Lex.* s. v.). The *Cerastes* (*Cerastes Hasselquisti*), the well-known Horned Snake, is a small serpent of a sandy colour, varying from reddish to whitish buff, according to the character of the soil where it is found, with pale brown or sometimes blackish irregular spots, very roughly

scaled, with broad flattened jaws and suddenly tapering tail, seldom exceeding a foot, or at most eighteen inches in length, well known in the sandy and rocky deserts of Egypt, Abyssinia, the Sahara, Arabia, and Syria. It extends through Southern Judaea and Philistia. It can be recognised at a glance by the peculiar horn-like appendages just above the eyes, covered with small scales, which are always developed in the male, and sometimes, though to a less extent, in the female.^b

Another peculiarity of the *Cerastes* assists us in identifying it with the *shephiphôn*, viz. its lying in ambush in the path, and biting the horse's heels. Its habit is usually to coil itself on the sand, where it basks in the impress of a camel's footprint, and thence suddenly to dart out on any passing animal. So great is the terror which its sight inspires in horses, that I have known mine suddenly start and rear, trembling and perspiring in every limb, and no persuasion could induce him to proceed. I was quite unable to account for his terror, till I noticed a *Cerastes* coiled up in a depression two or three paces in front of us, with its basilisk eyes steadily fixed on us, and no doubt preparing for a spring as the horse should pass. This species is said to have been the Asp with which Cleopatra killed herself. It is extremely venomous, causing the certain death of a man in half an hour, and is considered more vicious even than the Cobra, as it will attack when unprovoked. Its ordinary food consists of jerboas and desert marmots. By comparing the tribe of Dan to this wily serpent, the Patriarch intimated that by stratagem, more than by open bravery, they should avenge themselves of their enemies and extend their conquests. This was illustrated by the wily manner in which Samson, a Danite, destroyed his Philistian foe. Bruce, in his *Travels in Abyssinia*, has given a very accurate and detailed account of these animals. He observes that he found them in greatest numbers in those parts which were frequented by the jerboa, and that in the stomach of a *Cerastes* he discovered the remains of a jerboa. He kept two of these snakes in a glass vessel for two years without any food. Another circumstance mentioned by Bruce throws some light on the assertions of ancient authors as to the movement of this snake. Aelian,^c Jaisidorus, Aëtius, have all recorded of the *Cerastes* that, whereas other serpents creep along in a straight direction, this one and the *Hæmorrhous*^d (no

^b Hasselquist (*Itiner.* pp. 241, 365) has thus described them:—"Tentacula duo, utrinque unum ad latera verticis, in margine superiori orbitæ oculi, erecta, parte aversa parum arcuata, eademque parte parum canaliculata, sub-dura, membrana tenaci vestito, basi squamis minimis, una serie erectis, cincta, brevia, orbitæ oculorum dimidia longitudine."

With this description that of Geoffroy St. Hilaire may be compared:—"Au-dessus des yeux naît de chaque côté une petite éminence, ou comme on a coutume de la dire une petite corne, longue de deux ou trois lignes, présentant dans le sens de sa longueur des sillons et dirigée en haut et un peu en arrière, d'où le nom de *Céraste*. La nature des cornes du *Céraste* est très peu connue, et leurs usages, si toutefois elles peuvent être de quelque utilité pour l'animal, sont entièrement ignorés."

^c Λαβὼν ἐν αἵματι πρὸς αὐτὸν (Aelian, *de Anim.* xv. 13).

^d Δαχμά δ' ἐπισκάζων βλῖγον δίμας, οὐα κεράστως (Nicander, *Theriac.* 294).

* חורבן (*Hürman*), derived by the Rabbis from חרב "bar," metaph. "destruction." Rashi on Gen. xlix. 17 explains "ח as species serpentis, ad cuius mortem nulla est medicina ... Omnia quæ morau suo lesit, prodat et excindat" (Buxtorf. *Lex. Chald.* s. v. ח). מִן מַכָּה In this sense is common (see Payne Smith, *Theo. Syr.* col. 1375).

حیة قرناء.

^e ف. The word is derived by Schnltens from an Arabic root to which he assigns the questionable meaning of "to prick" or "bite."

doubt the same animal under another name) move sideways, stumbling as it were on either side (and comp. Bochart). Let this be compared with what Bruce says: "The Cerastes moves with great rapidity and in all directions, for-

The Horned Cerastes. (British Museum.)

wards, backwards, sideways; when he inclines to surprise any one who is too far from him, he creeps with his side towards the person," &c. &c. The words of Ibn Sina, or Avicenna, are to the same effect. I have noticed it move, when not alarmed, with a peculiar sidelong wriggle. So soon as it perceived itself observed, it glided along in a straight line. But this sidelong movement is not peculiar to the Cerastes. It belongs to the family *Viperidae*, order *Ophidia*.¹ [SERPENT.]

From the root *Shaphaph* are possibly derived the proper names of SHUPHAM, whence the family of the SHUPHAMITES, SHEPHUPHAN, and SHUPPIH.² [W. H. B. T.]

ADDI ('Aḏḏī, 'Aḏḏel [Westcott and Hort], Luke iii. 28), son of Cosam, and father of Melchi, in our Lord's genealogy; the third above Salathiel. The etymology and Hebrew form of the name are doubtful, as it does not occur in the LXX., but it probably represents the Hebrew 'ḏḏ, an ornament, and is a short form of Adiel, or Adaiah. The latter name in 1 Ch. vi. 41 (26 in Heb. Bib.) is rendered in the LXX. A. 'Aḏaīd [B. 'Aḏeīd; Adaia], which is very close to Addi. [A. C. H.]

AD'DO (A. 'Aḏḏā, B. 'Eḏḏel; Addin), IDDO, the grandfather of the prophet Zechariah (1 Esd. vi. 1). [W. A. W.] [F.]

AD'DON (Neh. vii. 61; 'Hḏḏon; Addon), a variation in the orthography of ADDAN (דדן and דדן or דדן). [F.]

AD'DUS ('Aḏḏous; Addus). 1. The sons of Addus are enumerated among the children of Solomon's servants who returned with Zerobabel (1 Esd. v. 34); but the name does not occur in the parallel lists of Ezra or Nehemiah.

2. A. 'Iḏḏous, B. 'Iḏḏous; Addin. A priest, whose descendants were unable to establish their genealogy in the time of Ezra, and were removed from their priesthood (1 Esd. v. 38). He is said to have married Angia, the daughter of Berzelus

or Barzillai. In Ezra ii. 61 and Nehemiah vii. 63 he is called by his adopted name Barzillai; it is not clear whether Addus represents his original name or is a corruption. [W. A. W.] [F.]

A'DER (אדר; in pause אדר, a flock; B. 'Aḏḏer; A. 'Aḏḏer; Heder; R. V. EDER), a Benjamite, son of Beriah, chief of the inhabitants of Aijalon (1 Ch. viii. 15). [W. A. W.] [F.]

ADIDA ('Aḏḏida, Ḥ-ei; Joseph. 'Aḏḏida; Addus [1 Macc. xiii., Adia [1 Macc. xii.]), a town on an eminence (Ant. xiii. 6, § 4) overlooking the low country of Judah (A. ἡ τῆς Σαφίλας), fortified by Simon Maccabaeus in his wars with Tryphon (1 Macc. xii. 38, xiii. 13). Alexander was here defeated by Aretas (Ant. xiii. 15, § 2); and Vespasian used it as one of his outposts in the siege of Jerusalem (B. J. iv. 9, § 1). In the O.S.² (p. 128, 1) it is called Aditha, and placed east of Diopolis (Lydda). Now *Hadithah*, a village with the remains of a considerable town near the foot of the hills eastward of Lydda (P. F. Mem. ii. 297, 322). Probably identical with HADID. [G.] [W.]

AD'EL (אדל, Fürst = El is ornament. MV.¹⁰ = ornament of God: A. 'Eḏḏel; B. has a different reading: Adiel). 1. A prince of the tribe of Simeon, descended from the prosperous family of Shimei (1 Ch. iv. 36). He took part in the murderous raid made by his tribe upon the peaceable Hamite shepherds in the valley of Gedor, in the reign of Hezekiah. 2. 'Aḏḏel; Adiel. A priest, ancestor of Maasai (1 Ch. ix. 12, R. V.). 3. BA. 'Aḏḏel; Adiel. Ancestor of Azmaveth, David's treasurer (1 Ch. xxi. 25). [W. A. W.] [F.]

A'DIN (אדין, luxurious or delicate; B. 'Aḏḏin, A. -in [in Ezra viii. 6 (LXX. c. 32), B. 'Aḏḏin, A. 'Aḏḏin in Ezra ii. 15]; 'Hḏḏin [in Neb.]; Adin in Ezra ii. 15, Adan in Ezra viii. 6). Ancestor of a family who returned with Zerubabel to the number of 454 (Ezra ii. 15, 1 Esd. v. 14 [B. 'Aḏḏilos, A. 'Aḏḏilos], or 655, according to the parallel list in Neh. vii. 20. Fifty-one more (or 251, according to A. V. of 1 Esd. viii. 32) accompanied Ezra in the second caravan from Babylon (Ezra viii. 6). They joined with Nehemiah in a covenant to separate themselves from the heathen (Neh. x. 16). [W. A. W.] [F.]

AD'INA (אדינא, luxurious, soft; B. 'Aḏḏin, B. -in; Adina). The son of Shiza, one of David's captives beyond the Jordan, and chief of the Reubenites (1 Ch. xi. 42). The A. V. R. V., and the Syriac read respecting him, "and thirly with him." The expression is obscure (Keil). [W. A. W.] [F.]

AD'INO (אדינו; B. 'Aḏḏin, A. 'Aḏḏin; Vulg. paraphrase), the Ezrite (2 Sam. xxi. 8). See JASHOBEBAM. The clause in Samuel (l. c.) is corrupt (see R. V. marg.). The true reading is preserved in the parallel passage (1 Ch. xi. 11), from which it is apparent that אדינו is a corruption of עורר. [W. A. W.] [S. R. D.]

¹ The celebrated John Ellis seems to have been the first Englishman who gave an accurate description of the Cerastes (see *Philosoph. Transact.* 1760).

² Bochart (*Hieroz.* iii. 209, Rosenm.) says that the Rabbin derive אדינו from אדינו, claudicare, wherefore אדינו is claudus. See, however, Levy, *Chald. Würterb.* s. v.

* It does not necessarily mean that he was in command of these thirty, Reubenite chiefs or not; nor does the interpretation given to the LXX. (ed. Swete), *καὶ ἐν αὐτῷ τριάκοντα*, "and over him were thirty," i. e. superiors (those enumerated in vv. 26-41), appear justified. Cp. the LXX-text usage in xli. 4, xxvii. 6.

ADINUS (A. Ἰαδινός, B. -ει; *Jaddimus*). JAMIN the Levite (1 Esd. ix. 48; cp. Neh. viii. 7; *Jamin*). [W. A. W.] [F.]

ADITHATM (אֲדִיתָם, Ges. = *double booty*; A. Ἀδιθαετα; *Adithaim*), a town belonging to Judah, lying in the low country (*Shefelah*), and named, between Sharaim and hag-Gederah, in Josh. xv. 36 only. It is entirely omitted by the Vat. MS. of the LXX., and the site has not yet been identified (see Dillmann, *l. c.*). For the dual termination, comp. the two names occurring in the same verse; also Eglaim, Horonaim, &c. [ADIDA.] [G.] [W.]

ADJURATION. [EXORCIST.]

ADLAI (עֲדָלַי, Ges. = *the righteousness of Jehovah*; B. Ἀδαι; *Adi*). Ancestor of Shaphat, the overseer of David's herds which fed in the broad valleys (1 Ch. xxvii. 29). [W. A. W.] [F.]

ADMAH (אֲדָמָה, *Adamah*; *Adama*), one of "the cities of the plain," always coupled with Zeboim (R. V.), and destroyed with Sodom and Gomorrah (Gen. x. 19, xiv. 2, 8; Dent. xix. 23; Hos. xi. 8). It had a king of its own. [G.]

ADMA'THA (אֲדָמָתָה, *Admatha*; *Adama*), one of the seven princes of Persia (Ezth. i. 14). Rawlinson (*Speaker's Comm.*, add. n. in loco), by manipulation of the letters, makes the name = Artabanus, the uncle of Xerxes; and Cassel (*Das Buch Esther*, p. 33) identifies him with Aspathines. The etymology is quite uncertain (see Bertheau-Ryssel, *l. c.*). [F.]

AD'NA (אֲדָנָה, *Adnah*; *Adna*). 1. One of the family of Pahath-Moab who returned with Ezra, and married a foreign wife (Ezra x. 30).

2. T. *Marvds*, *Adnads*; B. Ἀδνάς; B. Ἀδνά. A priest, descendant of Harim, in the days of Joiakim, son of Jeshua (Neh. xii. 15).

[W. A. W.] [F.]

AD'NAH (אֲדָנָה, *Edna*; *Ednas*). 1. A Manassite, who deserted from Saul and joined the fortunes of David on his road to Ziklag from the camp of the Philistines (1 Ch. xii. 20 [Heb. 21]).

2. *Edna*, *Ednas*; B. Ἐδνάς; B. Ἐδνάς. The commander-in-chief of 300,000 men of Judah, who were in Jehoshaphat's army (2 Ch. xvii. 14). [W. A. W.] [F.]

ADONI-BE'ZEK (אֲדוֹנִי-בֶּזֶק, *Adonibezek*; *Adonibezec*), king of Bezek, a city of the Canaanites. [BEZEK.] This chieftain was vanquished by the tribe of Judah (Judg. i. 7), who cut off his thumbs and great toes, and brought him prisoner to Jerusalem, where he died. He confessed that he had inflicted the same cruelty upon 70 petty kings whom he had conquered. Dr. Hackett (*D. B.*, Amer. ed.), quoting Cassel in his note on Judg. (i. c.), remarks that this form of mutilation was not uncommon in ancient times, and was chosen in order to unfit men for warlike service (such as the use of the bow) and for active and rapid movements. It is told of the Athenians that they cut off the thumbs of the Aeginetans whom they conquered (B.C. 456), in order to pre-

vent their handling the spear. Adoni-bezek not only mutilated but humbled his captives; they "gathered their meat under his table." A somewhat similar treatment of prisoners is recorded of the Parthian kings (Athen. *Deipn.* iv. p. 152d). [R. W. B.] [F.]

ADONICAM, ADONICAN. [ADONIKAM.]

ADONIJAH (אֲדוֹנִיָּהוּ, *Adonias*; *Adonias*). 1. The fourth son of David by Haggith, born at Hebron, while his father was king of Judah (2 Sam. iii. 4. The Greek text here, and the Lucianic Recension in 1 K. i. ii., reading Ἰ as ῃ, have B. Ὀπρία, A. Ὀπρία, Luc. -ια). After the death of his three brothers,—Amnon, Chileab, and Absalom,—he became eldest son; and when his father's strength was visibly declining, put forward his pretensions to the crown, by equipping himself in royal state, with chariots and horsemen, and fifty men to run before him, in imitation of Absalom (2 Sam. xv. 1), whom he also resembled in personal beauty, and apparently also in character, as indeed Josephus says (*Ant.* vii. 14, § 4). For this reason he was plainly unfit to be king, and David promised Bathsheba that her son Solomon should inherit the crown (1 K. i. 30), for there was no absolute claim of primogeniture in these Eastern monarchies. Solomon's cause was espoused by the best of David's counsellors: the illustrious prophet Nathan; Zadok, the descendant of Eleazar, and representative of the elder line of the priesthood; Benaiah, the captain of the king's body-guard; together with Shimei and Rei, whom Ewald (*Geschichte*, iii. 266) conjectures to be David's two surviving brothers, comparing 1 Ch. ii. 13, and identifying שִׁמְעִי with שִׁמְעָה (*Shimma* in A. V., *Shimea* in R. V.), and רֵעִי with רֵדִי (A. V. *Raddai*). From 1 K. ii. 8, it is unlikely that the Shimei of 2 Sam. xvi. 5 could have actively espoused Solomon's cause. On the side of Adonijah, who—when he made his attempt on the kingdom—was about 35 years old (2 Sam. v. 5), were Abiathar, the representative of Eli's (i.e. the junior) line of the priesthood (descended from Ithamar, Aaron's fourth son), and Joab, the famous commander of David's army; the latter of whom, always audacious and self-willed, probably expected to find more congenial elements in Adonijah's court than in Solomon's. Adonijah's name and influence secured a large number of followers among the captains of the royal army belonging to the tribe of Judah (cp. 1 K. i. 9, 25); and these, together with all the princes except Solomon, were entertained by Adonijah at a great sacrificial feast held "by the stone Zoheleth, which is by En-rogel." The meaning of the stone Zoheleth is very doubtful, being translated *rock of the watch tower* in the Chaldee; *great rock*, Syr. and Arab.; and explained (but improbably) *rock of the stream of water* by R. Kimchi, and by Ges. = *the stone of the serpent* [cp. Dent. xxxii. 24 Heb.], i.e. the rock with its image of the serpent. The rock upon which the village of *Silwad* [Silloom] is built bears the name Zahweile (see Gannan in *MV.* s. n. זחלת). En-

* This seems preferable to the unsupported conjectures that the reading of 1 K. i. 8 was שִׁמְעִי הָרֵדִי or שִׁמְעִי וְרֵעִי.

rogel is mentioned in Josh. xv. 7, as a spring on the border of Judah and Benjamin, S. of Jerusalem, and may be the same as that afterwards called the Well of Job or Joab (*'Ain Ayûb*). Conder identifies it with the spring now called *'Ain Umm ed-Deraj*, and known to Christians as the Virgin's Well). It is explained *spring of the fuller* by the Chaldaea Paraphraet, perhaps because he trod the clothes with his feet (רָגַל, see Gesen.

s. r.); but cp. Deut. xi. 10, where "watering with the feet" refers to machines trodden with the foot, and such as were possibly fed by the spring of Rogel. [EN-ROGEL.] A meeting for a religious purpose would be held near a spring, just as in later times sites for *προσευχή* were chosen by the waterside (Acts xvi. 13).

Nathan and Bathsheba, now thoroughly alarmed, apprised David of these proceedings, who immediately gave orders that Solomon should be conducted on the royal mule in solemn procession to Gihon, a spring on the W. of Jerusalem (2 Ch. xxxii. 30). [Gihon.] Here he was anointed and proclaimed king by Zadok, and joyfully recognised by the people. This decisive measure struck terror into the opposite party, and Adonijah fled to the sanctuary. He was pardoned by Solomon on condition that he should "show himself a worthy man," and with the threat that "if wickedness were found in him he should die" (1 Kings i. 52).

The death of David quickly followed these events; and Adonijah begged Bathsheba, who as "king's mother" would now have special dignity and influence [ASA], to procure Solomon's consent to his marriage with Abishag, who had been the wife of David in his old age (1 K. i. 3). This was regarded as equivalent to a fresh attempt on the throne [ABSALOM; ABNER]; and therefore Solomon ordered him to be put to death by Benaiah, in accordance with the terms of his previous pardon. Far from looking upon this as "the most flagrant act of despotism since Doeg massacred the priests at Saul's command" (Newman, *Hebrew Monarchy*, ch. iv.), we must consider that the clemency of Solomon in sparing Adonijah, till he thus again revealed a treasonable purpose, stands in remarkable contrast with the almost universal practice of Eastern sovereigns. Any one of these, situated like Solomon, would probably have secured his throne by putting all his brothers to death, whereas we have no reason to think that any of David's sons suffered except the open pretender Adonijah, though all seem to have opposed Solomon's claims; and if his execution be thought an act of severity, we must remember that we cannot expect to find the principles of the Gospel acted upon a thousand years before Christ came, and that it is hard for us, in this nineteenth century, altogether to realize the position of an Oriental king in that remote age. The *Midrash Rabba* (§ 20 on Gen. iii. 15) applied to Adonijah (and to others, e.g. Cain, Korah, Balaam, Absalom, and Haman) the proverb, "He that seeks what is not his, loses that which is" (cp. Hambürger, *RE*² s. n.).

2. B. *'Adwlas*. A Levite in the reign of Jehoshaphat (2 Ch. xvii. 8).

3. *'Adwla*, A. *'Awdā*, M. *'Edwla*; *Adonia*. One of the Jewish chiefs in the time of Nehemiah (x. 16). He is called ADONIKAM (אֲדוֹנִיקָם);

'Adwinkam, B. -*kan*; *Adoniam* in Ezra ii. 13. Cp. Ezra viii. 13; Neh. vii. 18. [G. E. L. C.] [F.]

ADONIKAM (אֲדוֹנִיקָם), MV.¹⁰ = *my Lord uplifts himself* [cp. Olshausen, *Lehrb.* p. 620]; BA. *'Adwinkam* [in 1 Esd. v. 14], B. -*kan* [in Ezra ii. 13]; *Adoniam*. The sons of Adonikam, 666 in number, were among those who returned from Babylon with Zerubbabel (Ezra ii. 13; Neh. vii. 18 [B. *'Adwinkam*, N. *'Adwinkam*]; 1 Esd. v. 14, *Cham*). In the last two passages the number is 667. The remainder of the family returned with Ezra (Ezra viii. 13 [B. *'Adwinkam*]; 1 Esd. viii. 39 [B. *'Adwinkam*]). The name is given as ADONIJAH in Neh. x. 16.

[W. A. W.] [F.]

ADONIRAM (אֲדוֹנִירָם), MV.¹⁰ = *my Lord is exalted*, 1 K. iv. 6, v. 14; by an unusual contraction, ADORAM, אֲדוֹרָם, 2 Sam. xx. 24 [*Aduram*], and 1 K. xii. 18 [B. *'Ardam*; *Aduram*]; also HADORAM, אֲדוֹרָם, 2 Ch. x. 18, A. *'Adwirdam*, *Aduram*; usually *'Adwirdam*, B. -*wei*; *Admiram*. Chief receiver of the tribute during the reigns of David (2 Sam. xx. 24), Solomon (1 K. iv. 6), and Rehoboam (1 K. xii. 18). This last monarch sent him to collect the tribute from the rebellious Israelites, by whom he was stoned to death. [R. W. B.] [F.]

ADONI-ZE'DEC (אֲדוֹנִי-צֶדֶק), Ges. and MV.¹⁰ = *lord of righteousness*; *'Adwizet* (ex: *Adonisedec*), by some thought to be the official title of the Jebusite king of Jerusalem who organized a league with four other Amomite princes against Joshua. The confederate kings having laid siege to Gibeon, Joshua marched to the relief of his new allies and put the besiegers to flight. The five kings took refuge in a cave at Makkedah, whence they were taken and slain, their bodies hung on trees, and then buried in the place of their concealment (Josh. x. 1-27). [JOSHUA.] [R. W. B.] [F.]

ADOPTION (*υιοθεσία*), an expression metaphorically used by St. Paul in reference to the present and prospective privileges of Christians (Rom. viii. 15, 23; Gal. iv. 3; Eph. i. 5). He probably alludes to the Roman custom of adoption, by which a person, not having children of his own, might adopt as his son one born of other parents. It was a formal act, effected either by the process named *adrogatio*, when the person to be adopted was independent of his parent, or by *adoptio*, specifically so called, when in the power of his parent. (See *Dict. of Gr. and Rom. Ant.*, art. ADOPTIO.) The effect of it was that the adopted child was entitled to the name and *sacra privata* of his new father, and ranked as his heir-at-law: while the father on his part was entitled to the property of the son, and exercised towards him all the rights and privileges of a father. In short the relationship was to all intents and purposes the same as existed between a natural father and son. The selection of a person to be adopted implied a decided preference and love on the part of the adopter: and St. Paul aptly transfers the well-known feelings and customs connected with the act to illustrate the position of the Christianized Jew or Gentile. The Jews themselves were unacquainted with the process of adoption: indeed it would have

been inconsistent with the regulations of the Mosaic law affecting the inheritance of property: the instances occasionally adduced as referring to the custom (Gen. xv. 3, xvi. 2, xxx. 5-9) are evidently not cases of adoption proper. Our "adoption as sons through Jesus Christ" is the key-note of St. Paul's Epistle to the Ephesians (see *Speaker's Comm.*, Intro. to the Ep. to the Ephes. § 5; and on the whole subject Giffard's note on Rom. viii. 15 in the same work). [W. L. B.] [F.]

ADORA or ADOR. [ADORAIM.]

ADORA'IM (אֲדוֹרַיִם; B. 'Aḏopal; A. 'Aḏopal; *Aduram*), a fortified city built by Jehoboam (2 Ch. xi. 9), in Judah (Jos. *Ant.* viii. 10, § 1), apparently in or near the *Shefelah*, since, although omitted from the lists in Josh. xv., it is by Josephus (*Ant.* xiii. 9, § 1, 15, § 4; B. J. i. 2, § 6, i. 8, § 4) almost uniformly coupled with Mareshah, which was certainly situated there. For the dual termination compare Adithaim, Gederothaim, &c. By Josephus it is given as 'Aḏopa, 'Aḏopos; and in *Ant.* xiii. 9, § 5, he calls it a "city of Idumaea," under which name was included, in the later times of Jewish history, the southern part of Judaea itself (Reland, 48; Robinson, ii. 69). Adoraim is probably the same place as Aḏopa (1 Macc. iii. 20, *Ador*), unless that be Dor, on the sea-coast below Carmel. It is generally identified with *Dura*, a large village on the flat slope of a hill, west of Hebron. Near it is the celebrated tomb of *Nehy Nih* (Noah). The village occupies an important position guarding an ancient main line of communication with Philistia, which runs through it (*P. F. Mem.* iii. 304, 328; see Robinson, ii. 215). [G.] [W.]

ADORA'IM. [ADONIRAM.]

ADORATION. The acts and postures by which the Hebrews expressed adoration, bear a

Adoration. Ancient Egyptian. (Wilkinson.)

great similarity to those still in use among Oriental nations. To rise up and suddenly prostrate the body, was the most simple method; but, generally speaking, the prostration was conducted in a more formal manner, the person

falling upon the knee and then gradually inclining the body, until the forehead touched the ground. The various expressions in Hebrew referring to this custom appear to have their specific meaning: thus שָׁלַךְ (פָּטוּ, LXX.) describes the sudden fall; כָּרַע (κἀμπτω, LXX.) bending the knee; קִיָּץ (κύπτω, LXX.) the inclination of the head and body; and lastly שָׁחָה (προσκυεῖν, LXX.) complete prostration. The term סָבַךְ (Is. xlv. 15, 17, 19; xlv. 6) was introduced at a late period as appropriate to the worship paid to idols by the Babylonians and other Eastern nations (Dan. iii. 5, 6). Such

Adoration. Modern Egyptian. (Lane.)

prostration was usual in the worship of Jehovah (Gen. xvii. 3; Ps. xcv. 6); but it was by no means exclusively used for that purpose; it was the formal mode of receiving visitors (Gen. xviii. 2), of doing obeisance to one of superior station (2 Sam. xiv. 4), and of showing respect to equals (1 K. ii. 19). Occasionally it was repeated three times (1 Sam. xx. 41), and even seven times (Gen. xxxiii. 3). It was accompanied by such acts as a kiss (Ex. xviii. 7), laying hold of the knees or feet of the person to whom the adoration was paid (Matt. xxviii. 9), and kissing the ground on which he stood (Ps. lxxii. 9; Mic. vii. 17). Similar adoration was paid to idols (1 K. xix. 18); sometimes however prostration was omitted, and the act consisted simply in kissing the hand to the object of reverence (Job xxi. 27) in the manner practised by the Romans (Plin. xxviii. 5: see *Dict. of Gr. and Rom. Ant.*, art. ADORATIO), in kissing the statue itself (Hos. xiii. 2). The same customs prevailed at the time of our Saviour's ministry, as appears not only from the numerous occasions on which they were put in practice towards Himself, but also from the parable of the unmerciful servant (Matt. xviii. 26), and from the reverence of Cornelius to St. Peter (Acts x. 25), in which case the Apostle objected to it, as implying a higher degree of superiority than he was entitled to, especially as coming from a Roman, to whom prostration was not usual. [W. L. B.]

ADRAMME'LECH (אֲדַרְמֶלֶךְ; B. 'Aḏramē-lex, A. -ek; *Adramelch*). 1. A deity (2 K. xvii. 31) worshipped by the colonists brought into Samaria by Shalmaneser II., king of Assyria, from Sepharvaim (Sipar or Sippara, now Abuhabbah). Both Adrammelech and Anammelech were worshipped with rites similar to those of Moloch, children being sacrificed to them. This

* Even without this statement of Josephus, it is plain that "Judah and Benjamin," in 2 Ch. xi. 10, is a form of expression for the new kingdom, and that none of the towns named are necessarily in the limits of Benjamin proper.

name, according to Schrader, is equivalent to the Assyrian Adarmalik, "Adar (or Ninip) is prince." The reading of "Adar" for "Ninip" is, however, very doubtful; and as the word Adara is found as a by-name of Hea, god of the sea and of wisdom, it is very likely that the Assyrian form of the name is Adaramilk, "Adar (lord of) counsel." [ANAMMELECH.]

2. One of the sons of Sennacherib, king of Assyria, who, with his brother Shareser, killed their father whilst he was worshipping in the temple of Nisroch (2 K. xix. 37, B. -ek, A. -ex; la. xxxvii. 38, *Ν. Ἀνδραμελῆχ*). According to the Babylonian chronicle, this happened in the eighth year of the reign of Sennacherib in Babylon (u.c. 688). This text differs from the account in the Bible, in that it states that Sennacherib was killed by only one son, and that it happened in a revolt. This is probably to be understood in this way: that both sons took part in the revolt, but that only one actually committed the crime, entering the temple where the king his father was worshipping, whilst his brother, in command of the rebel troops, surrounded the building to prevent the escape of the king. Adrammelech may probably be identified with the Ašsur-munik of the Assyrians. He seems to have been the eldest son of SENNACHERIB, who built a small palace for him at Nineveh. [T. G. P.]

ADRAMYTTIUM (occasionally ATRAMYT-TIUM. Some cursive MSS. have Ἀτραμυττήνη, instead of Ἀδραμυττήνη in Acts xvii. 2), a seaport in the province of Asia [ASIA], situated in the district anciently called Aeolis, and also Mysia (see Acts xvi. 7). Adramyttium gave and still gives its name to a deep gulf on this coast, opposite to the opening of which is the island of Lesbos [NITYLENE]. St. Paul was never at Adramyttium, except perhaps during his second missionary journey, on his way from Galatia to Troas (Acts xvi.), and it has no biblical interest, except as illustrating his voyage from Caesarea in a ship belonging to this place (Acts xxvii. 2). The reason is given in what follows, viz. that the centurion and his prisoners would thus be brought to the coasts of Asia, and therefore some distance on their way towards Rome, to places where some other ship bound for the west would probably be found. Ships of Adramyttium must have been frequent on this coast, for it was a place of considerable traffic. It lay on the great Roman road between Assos, Troas, and the Hellespont on one side, and Pergamus, Ephesus, and Miletus on the other, and was connected by similar roads with the interior of the country. According to tradition, Adramyttium was a settlement of the Lydians in the time of Croesus; it was afterwards an Athenian colony; under the kingdom of Pergamus it became a seaport of some consequence; and in the time of St. Paul Pliny mentions it as a Roman assize-town. The modern *Edremid* or *Adramyti* is a poor village, but there is still some trade, more especially in timber. It is described in the travels of Pococke, Turner, and Fellows. See *Dict. Gr. and Rom. Geog.*, art. "Adramyttium." [J. S. H.] [W.]

ADRIA, more properly A'DRIAS (δ' Ἀδρίας; *Adria*). It is important to fix the meaning of this word as used in Acts xvii. 27. The word

seems to have been derived from the town of Adria, near the Po; and at first it denoted that part of the Gulf of Venice which is in that neighbourhood. Afterwards the signification of the name was extended, so as to embrace the whole of that gulf. Subsequently it obtained a much wider extension, and in the apostolic age denoted that natural division of the Mediterranean which Humboldt names the Syrtic basin (see Acts xvii. 17), and which had the coasts of Sicily, Italy, Greece, and Africa for its boundaries. This definition is explicitly given by almost a contemporary of St. Paul, the geographer Ptolemy, who also says that Crete is bounded on the west by Adrias. Later writers state that Malta divides the Adriatic sea from the Tyrrhenian sea; and the isthmus of Corinth, the Aegean from the Adriatic. Thus the ship in which Josephus started for Italy about the time of St. Paul's voyage foundered in Adrias (*Life*, 3), and there he was picked up by a ship from Cyrene and taken to Puteoli (see Acts xxviii. 13). It is through ignorance of these facts, or through the want of attending to them, that writers have drawn an argument from this geographical term in favour of the false view which places the Apostle's shipwreck in the Gulf of Venice. [MELITA.] Cp. Smith's *Voy. and Shipwreck of St. Paul: Dias. on the Island Melita*. See *Dict. Gr. and Rom. Geog.*, art. "Adriaticum Mare." [J. S. H.] [W.]

ADRI'EL (אֲדִרְיֶל, Ges. = *flock of God*; Ἀδρίηλ; *Hadriel*), a son of Barzillai the Mebathite, to whom Saul gave his daughter Merab, although he had previously promised her to David (1 Sam. xviii. 19; rr. 17-19 are wanting in B, and the name in A. is Ἰηλ, the usual abbreviation for Ἰσαήλ). His five sons were amongst the seven descendants of Saul whom David surrendered to the Gibeonites (2 Sam. xxi. 8; where in B. the name appears as Ζεπέ, in A. as Ἐσθρῖ) in satisfaction for the endeavours of Saul to extirpate them, although the Israelites had originally made a league with them (Josh. ix. 15). In 2 Sam. xxi. 8 they are called the sons of Michal; but as Michal had no children (2 Sam. vi. 23), the A. V., in order to surmount the difficulty, translates אֲדִרְיֶל "brought up" instead of "bare," in accordance with the opinion of the Targum and Jewish authorities. The margin also gives "the sister of Michal" for "Michal." The R. V. translates "bare," and against the name Michal attaches a marginal note: "In 1 Sam. xviii. 19 *Merab*," the reading here of LXX.-Luc., the Peshito, and certain codd. of Vulg.; and a reading also adopted by most modern scholars. [R. W. B.] [F.]

ADU'EL (Ἀδούηλ, i.e. אֲדִרְיֶל, MV.¹⁰ = the ornament of God, First = *El* is ornament, 1 Ch. iv. 36; Ἰεδῆλ (abs. from B, A. Ἐδῆλ) ix. 12 (Ἀδῆλ). A Naphtalite, ancestor of Tobit (Tob. i. 1; *N.* reads Ναῦν). [B. F. W.] [F.]

ADULLAM (אֲדֻלָּם). The meaning is uncertain. Lagarde [*Übersicht üb. die im Aram., Arab., u. Hebr. übliche Bildung der Nomina*, p. 54, 1889] explains it plausibly as a retreat, from the Arab. عَدَل [*adula*], "to turn aside;" Ὀδολλᾶμ; *Odollam, Odullam, Adullam*), a city of

Judah in the lowland of the Shefelah, Josh. xv. 35 (cp. Gen. xxxviii. 1, "Judah went down," and Micah i. 15, where it is named with Maresah and Achsib); the seat of a Canaanite king (Josh. xii. 15), and evidently a place of great antiquity (Gen. xxxviii. 1, 12, 20). It was fortified by Rehoboam (2 Ch. xi. 7), was one of the towns re-occupied by the Jews after their return from Babylon (Neh. xi. 30), and was still a city (O. *ᾠδα*) in the times of the Maccabees (2 Macc. xii. 38). Josephus (*Ant.* vi. 12, § 3) gives the forms *ᾠδα* *Ἀδουλλάμη* and *Ὀδουλλάμη* (*Ant.* viii. 10, § 1), where it is named between Socho and Ipan. In Josh. xv. 35 it forms with Jarmuth, Socoh, and Azekah a group apart amongst the fourteen cities placed in the Shefelah, and the narratives of Samuel and Chronicles imply that it was a place of strategic importance. David took refuge in the cave of Adullam when no longer able to rest at Gath, and his father and brethren went down to him there from Bethlehem (1 Sam. xiii. 1); thence too three of the bravest of the *Gibborim* passed through the lines of the Philistines and brought to David from Bethlehem the water for which he longed (2 Sam. xiii. 13; 1 Ch. xi. 15). Judas Maccabaeus and his army kept the Sabbath at Adullam after the defeat of Gorgias (2 Macc. xii. 38). In the *OS.*² (p. 128, 29) Jerome describes it as a *vicus non parvus* ten miles E. of Eleutheropolis; in another passage Eusebius and Jerome, following apparently the reading of the LXX. in Josh. x., confound Adullam with EGLON: see that name. It has been identified by M. Clermont-Ganneau with the ruins of *ʿAid el-Miyeh*, "feast of one hundred," or *ʿAid el-Mā*, "feast of water." This place, where there are two ancient wells and several caves, is seven miles north-east of Beit Sabin, and not far from *Shuweikeh* (Socoh) and *ʿAḡ el-Yarmuk* (Jarmuth). A very clear statement of the arguments in favour of the above site is given in *P.F.Qy. Stat.* 1875, pp. 160-177; see also *P. F. Mem.* iii. pp. 311, 347, 361-7; Geikie, *The Land and the Bible*, p. 108. Van de Velde and Stanley place it, doubtfully, at *Deir Duḡdān*, 5 or 6 miles from Eleutheropolis. Monastic tradition places the cave at *Khūreitūn*, at the south end of the *Wādī Urtās*, between Bethlehem and the Dead Sea (Robinson, i. 481). William of Tyre speaks of the inhabitants of *Tetān* flying for refuge to the cave of Odolla in A.D. 1138. [G.] [W.]

ADULLAMITE (אֲדֻלָּמִי): A. [usually] *Ὀδουλλαμίτης*, E. [in c. 12] *Ὀδουλλαμίτης*, [in c. 20] *Ὀδουλλαμίτης*; *Odollamites*). A native of Adullam: applied to Hirah, the friend (or "shepherd" as the Vulgate has it, reading אֲדֻלָּמִי לְיִשְׁרָאֵל) of Judah (Gen. xxxviii. 1, 12, 20). See ADULLAM. [W. A. W.] [F.]

ADULTERY (אֶרְוָה, אֶרְוָה, LXX. *μοιχεία*). The parties to this crime were a married woman and a man who was not her husband; the toleration of polygamy rendering it nearly impossible to make criminal a similar offence committed by a married man with a woman not his wife. In the patriarchal period the sanctity of marriage is noticeable from the history of Abraham, who fears, not that his wife will be seduced from him, but that

he may be killed for her sake, and especially from the scruples ascribed to Pharaoh and Abimelech (Gen. xii. xx.). The woman's punishment was, as commonly amongst Eastern nations, no doubt capital, and probably, as in the case of Tamar's unchastity, death by fire (xxxviii. 24). The Mosaic penalty was that both the guilty parties should be stoned, and it applied as well to the betrothed as to the married woman, provided she were free (Deut. xxii. 22-24). A bondswoman so offending was to be scourged, and the man was to make a trespass offering (Lev. xix. 20-22).

The system of inheritances, on which the polity of Moses was based, was threatened with confusion by the doubtful offspring caused by this crime, and this secured popular sympathy on the side of morality until a far advanced stage of corruption was reached. Yet from stoning being made the penalty we may suppose that the exclusion of private revenge was intended. It is probable that, when that territorial basis of polity passed away—as it did after the Captivity—and when, owing to Gentile example, the marriage tie became a looser bond of union, public feeling in regard to adultery changed, and the penalty of death was seldom or never inflicted. Thus in the case of the woman brought under our Lord's notice (John viii.), it is likely that no one then thought of stoning her in fact, but there remained the written law ready for the purpose of the caviller. It is likely also that a divorce in which the adulteress lost her dower and rights of maintenance, &c. (Genara *Chethuboth*, cap. vii. 6), was the usual remedy suggested by a wish to avoid scandal and the excitement of commiseration for crime. The word *παράδερμα* (*Matt.* i. 19) probably means to bring the case before the local Sanhedrin, which was the usual course, but which Joseph did not propose to take, preferring repudiation (Buxtorf, *de Spons. et Divorc.* iii. 1-4), because that could be managed privately (*λῆπτα*).

Concerning the famous trial by the water of jealousy (Num. v. 11-29), it has been questioned whether a husband was in certain cases bound to adopt it. The more likely view is, that it was meant as a relief to the vehemence of implacable jealousy to which Orientals appear prone. The ancient strictness of that tie gave room for a more intense feeling than was consistent with the laxity which had set in, to a great extent under Gentile influences, in the period of the N. T. In that intensity probably arose this strange custom, which no doubt Moses found prevailing and deeply seated; and which is said to be paralleled by a form of ordeal called the "red water" in Western Africa (Kitto, *Cyclop.* s. v.). The forms of Hebrew justice all tended to limit the application of this test. 1. By prescribing certain facts presumptive of guilt, to be established on oath by two witnesses, or a preponderating but not conclusive testimony to the fact of the woman's adultery. 2. By technical rules of evidence which made proof of those presumptive facts difficult (*Sotah*, vi. 2-5). 3. By exempting certain large classes of women (all indeed except a pure Israelitess married to a pure Israelite, and some even of them) from the liability. 4. By providing that the trial could only be before the great Sanhedrin (*Sotah*,

i. 4). 5. By investing it with a ceremonial at once humiliating and intimidating, yet which still harmonised with the spirit of the whole ordeal as recorded in Num. v. But it was above all discouraged by the conventional and even mercenary light in which the nuptial contract was latterly regarded.

When adultery ceased to be capital, as no doubt it did, and divorce became a matter of mere convenience, it would be absurd to suppose that this trial was continued. And when adultery became common, as the Jews themselves confess, it would have been impious to expect the miracle which the trial implied. If ever the Sanhedrin were driven by force of circumstances to adopt this trial, no doubt every effort was used, nay was prescribed (*Sotah*, i. 5, 6), to overawe the culprit and induce confession. Even if she submitted to the trial and was really guilty, some Rabbis held that the effect on her might be suspended for years through the merit of some good deed (*Sotah*, iii. 4-6). Besides, however, the intimidation of the woman, the husband was likely to feel the public exposure of his suspicious odious and repulsive. Divorce was a ready and quiet remedy; and the only question was, whether the divorce should carry the dowry, and the property which she had brought; which was decided by the slight or grave character of the suspicions against her (*Sotah*, vi. 1; Gemara *Chethuboth*, vii. 6; Ugol. *Uzor* Heb. c. vii.). If the husband were incapable through derangement, imprisonment, &c., of acting on his own behalf in the matter, the Sanhedrin proceeded in his name as concerned the dowry, but not as concerned the trial by the water of jealousy (*Sotah*, iv. 6).

As regards the N. T. teaching on the subject of adultery, the chief passages are those which contemplate it in reference to divorce or separation, viz. Matt. v. 31, 32; xix. 6 foll.; Mark x. 11, 12; Luke xvi. 18; Rom. vii. 2, 3; 1 Cor. vi. 10, 11, 39, 40. These open some grave questions, on which great divines have differed (see Dean Alford's note and *Speaker's Comment*, on the first of them), and even Augustine saw reason in his *Retractions* to doubt whether he had satisfactorily solved them. The principal one is, what is intended by λόγος πορνείας in Matt. v. 32, corresponding apparently to ἐν πορνείᾳ in xix. 9? Most authorities seem to take it of unchastity after marriage on the part of the wife, i.e. adultery. Hereupon various difficult questions open to which the context gives no solution. The first (i.) is, Must we in Matt. v. 32 carry on the exception, "saving for the cause of fornication" (i.e. of adultery), to the latter clause, and make the sense, "whoever shall marry a woman divorced for any other cause than adultery, committeth adultery." The next is (ii.). What would be the case of him who marries a woman divorced for adultery? If this be judged an adulterous union, the reading the condition aforesaid into the clause is nugatory; if a lawful union, a further question arises (iii.). Does this then sanction the union of the paramours? If yes, this seems to open a wide door to collusive, as well as other, infidelity. If no, we arrive at a *privilegium* excluding one person only, and leaving the woman open to the same temptation still which led her astray before.

Then comes (iv.), May the injured husband, rid of the adulteress wife, marry anew? If he may, then the adultery of the wife has the same effect on their union as her natural death: and a bar is placed in the way of forgiveness and reconciliation on repentance. These conclusions seem opposed to the words of St. Paul in Rom. vii. 2, 3, and 1 Cor. vii. 10, 11, 39, 40.

An interpretation which gives rise to such questions may suggest doubts of its own soundness, besides another question as grave as any of the former, how to reconcile it with the general principle that God has made man and wife "one flesh," and that "whom He has joined together" man, i.e. human law, is not to "put asunder." Besides, if adultery had been, in such a context as Matt. v. 32, xix. 9, intended, we cannot doubt that πορνεία, the special word, and not ἡ πορνεία, the general one, would have been used. Assume, on the contrary, that the λόγος πορνείας and ἐν πορνείᾳ refer to unchastity before marriage, and that marriage once made is, save for that cause, indissoluble, and we harmonize the statements of all the passages above referred to. Such unchastity implies, besides incontinence, a fraud to which Oriental races are especially sensitive, and which may be held to vitiate that consent on the part of the man which is of the essence of the marriage contract. Thus the true view would be, that such a marriage, being defective in this vital point, never existed from the first, but was a union founded on fraud, which the innocent party is entitled to disclaim. This is illustrated by the suspicions of Joseph in Matt. i. 19. The weight of authority seems against retaining πορνεία, as heading St. Paul's catalogue of the "works of the flesh" in Gal. v. 19. [H. H.]

ADUMMIM, "THE GOING UP TO" or "OF" (מַעְלָה אֲדָמִים); B. Ἀδὰμ-μῆν, A. ἀποστανδῆμιν Ἀδὰμμι; *ascensio* or *ascensus Adommim*) = the "pass of the red;" one of the landmarks of the boundary of Benjamin, a rising ground or pass "over against Gilgal," and "on the south side of the 'torrent'" (Josh. xv. 7; xviii. 17), which is the position still occupied by the road leading up from Jericho and the Jordan valley to Jerusalem (Rob. i. p. 558*), on the south face of the gorge of the *Wady Kelt*. Jerome (*OS*,³ p. 127, 9, s. n. *Adommim*) ascribes the name to the blood shed there by the robbers who infested the pass in his day, as they still (Stanley, pp. 314. 424; Martineau, p. 481; Stewart) continue to infest it, as they did in the Middle Ages when the order of Knights Templars arose out of an association for the guarding of this road, and as they did in the days of our Lord, of whose parable of the Good Samaritan this is the scene. But the name is possibly of a date and significance far more remote, and is perhaps derived from some tribe of "red men" of the earliest inhabitants of the country (Stanley, p. 424, note). It is most probably *Tal'at ed-Dumm*, "the ascent of blood," a mediaeval fortress, surrounded by a rock-hewn ditch, which stands above *A'hân*

* Robinson's words, "On the south side . . . above," are the more remarkable, because the identity of the place with the Maaleh-Adummim does not seem to have occurred to him.

Halkiruk, and commands the road from Jericho to Jerusalem. There is a steady ascent from Jericho to this point, but the road onwards to Jerusalem passes over undulating ground; hence the "going up to Adummim" would be that part of the road which lies between the *Ghor* and *Tu'fat ed-Dumun*, a name applied more particularly to the hill on which the fortress was built. The limestone and marl are here of a ruddy colour, like burnt brick: hence the name. The fortress is probably the *Castellum Militum* mentioned in the *Onomasticon* as being on the road from Jerusalem to Jericho, and the *Tour Rouge* built by the Templars to protect pilgrims going down to Jericho and the Jordan (*P. P. Mem.* iii. 172, 207-9). [G.] [W.]

ADVENT. [COMING.]

ADVOCATE. The rendering (A. V. and R. V.) in 1 John ii. 4 of *παράκλητος*. In other passages of the writings of St. John (e.g. Gospel, xiv. 16, 26, xv. 26, xvi. 7) *παράκλητος* is translated "Comforter" (R. V. inserting in the marg. *Advocate* or *Helper*). This double rendering of one and the same Greek word dates from Wiclif, and is due to the influence of the Vulgate, which has *advocatus* in the Epistle and *paracletus* in the Gospel. Dr. Westcott has pointed out that the word "can properly mean only 'one called to the side of another,' and that with the secondary notion of counselling, supporting, or aiding him." In 1 John ii. 1 this sense of the word is alone applicable. The argument is that "Jesus Christ the righteous" as Advocate pleads the cause of the Christian who has sought His help against the accuser. See Westcott's notes in *Speaker's Commentary* on Gospel according to St. John (*H. c.*) and on 1 John ii. 1. [F.]

AEDIAS (B. *Ἀηδίας* [A. *-di-*]; *Helias*), 1 Esd. ix. 27. Perh. a corruption of *ELIAN*. [G.]

ÆGYPT. [EGYPT.]

ÆNEAS (*Αἰνέας*; *Aeneas*), a Greek or Hellenistic Jew of Lydda, healed of his palsy by St. Peter (Acts ix. 33, 34). [G.]

ÆNŌN (*Αἰνών*; *Aennon*), a place "near to Salim." John baptized "in Aenon (the springs) near to Salim, because there were many waters (*ὕδατος πολλὰ*) there" (John iii. 23). This is indicated by the name, which is merely a Greek version of the Chaldee *ܐܢܢ* = "springs." It was evidently west of the Jordan (cp. John iii. 22 with 26, and with i. 28), and apparently *see day's* journey from Nazareth and two from Bethany (Stanley, *S. & P. p.* 311). Three different sites have been proposed for Aenon: 1. Eusebius and Jerome (*OS.* pp. 134, 25; 245, 91) place it 8 miles south of Scythopolis, "juxta Salim et Jordanem," and the latter states that the ruins of Melchizedek's palace existed, in his day, at Salem. These statements are so positive that they cannot lightly be set aside. In the Jordan valley, about $7\frac{1}{2}$ miles from *Beisân* (Scythopolis), there is a remarkable group of seven springs, all lying within a radius of a quarter of a mile, which answers well to the description "many waters." Close to the springs are the considerable ruins of *Umm el-'Amdân*, and about three-quarters of a mile to the north is *Tell Ridhghah*, an artificial mound, on the top of which is the tomb of *Sheikh Salim*. This is almost certainly

the spot indicated by Eusebius and Jerome, and there is nothing remarkable in the disappearance of the ruins when it is considered that such important towns as Jericho and Antipatris have entirely disappeared. 2. Major Conder (*Tent Work in Pal.* i. 91-3) identifies Aenon with the springs in *Wady Fâr'ah*, which lie between *Salim* and *Ainûn*: but these two places are 7 miles apart, and the springs themselves are situated in a deep valley 4 miles from *Salim*, and separated from that village by the hills of *Noby Belân*, 2,500 feet high. Such a place could not possibly be described as being "near to Salim," and the springs are in fact quite as near to *Nablûs* (Shechem), with which they are connected by the Roman road to Scythopolis. There are no important springs at *Salim* or *Ainûn*. 3. Dr. Barclay (*City of the Great King*, pp. 558-570) and Mr. Hepworth Dixon place Aenon at the springs in *Wady Far'ah*, one of the heads of *Wady Kelt*, some miles from Jerusalem, but the only ground for this identification is the presence of copious springs and pools. See the curious speculations of Lightfoot (*Cent. Chorog.* 1-4). [G.] [W.]

AG'ABA (*Ἀγκάβα*, A. *Γαβά*; *Aggab*), 1 Esd. v. 30. [HAGAB.] [G.]

AG'ABUS (*Ἀγαβος* or *Ἀγαβος*; *Agabus*. *אַגַּב*, "a locust;" cp. Hagab, Ezra ii. 46. But the Syriac favours the derivation from *אַגַּב*, "to love"). A Christian prophet mentioned in Acts xi. 28 (notice the remarkable addition to the text made by D.) and xxi. 10, 11. In the first passage he is described as having come from Jerusalem to Antioch; in the second, from Judaea to Caesarea. His prediction of a great famine over all the world was delivered at Antioch, probably A.D. 44, during the twelve months which St. Paul then spent there. No universal famine is recorded in the reign of Claudius, but frequently recurring local famines [*CLAUDIUS*] justify the terms of the prophecy. The accuracy of his prediction respecting St. Paul (Acts xxi. 10) is also open to criticism if pedantically examined. The "whole world" cannot mean Judaea only, but the speedy fulfilment of the prediction there was what concerned the Christians most. This famine is that mentioned by Josephus (*Ant.* xx. 2 § 6, and 5 § 2), in which Helena of Adiabene gave generous assistance. It is dated by Josephus in the time of the Roman procurators Cuspius Fadus and Tiberius Alexander, i.e. after the death of Herod Agrippa I. An incidental notice of the same famine (*Ant.* lii. 15, § 3) shows that it prevailed in severity at the time of the Passover. That there was no famine before Agrippa's death is proved by the dependence of Tyre and Sidon at that time for food supplies on the king's country (Acts xii. 20). Wieseler on these grounds fixes the famine in A.D. 45, with the conjecture that it may have gone on for some time afterwards (see Wieseler, *Chron. Ap. Zeit.*, pp. 156 ff.). The other mention of Agabus (Acts xxi. 10, 11) belongs to the last journey of St. Paul to Jeru-

salem (probably A.D. 58). He prophesies St. Paul's arrest and deliverance into the hands of the Gentiles, therein repeating more circumstantially an inspired warning already given by some of the brethren at Tyre (xxi. 4). The points to notice in Agabus are that in his case the gift of Christian prophecy was not limited to its usual function, the exposition of divine truth [PROPHET, PROPHETS OF THE N. T.], but extended to foreknowledge of events; and, secondly, that being a Jewish prophet he not unnaturally used the symbolic method of delivery habitual to Jeremiah, Ezekiel, and others (cp. Jer. xiii. 1-13). [E. R. B.]

A'GAG (אָגָג, meaning quite uncertain, according to Ges., from an Arabic root "to burn;" 'Aḡā [in Sam. l. c.] and 'Aḡy [in Num.]; *Agag*), possibly the title of the kings of Amalek, like Pharaoh of Egypt. The view of Michaelis (see Ges. *Thes.* s. n. אָגָג) that the name Ogyges was identical with this name has been accepted by Fürst, but is rejected by the best modern authorities. One king of this name is mentioned in Num. xxiv. 7, and another in 1 Sam. xv. 8, 9, 20, 32. The latter was the king of the Amalekites, whom Saul spared together with the best of the spoil, although it was the well-known will of Jehovah that the Amalekites should be extirpated (Ex. xvii. 14; Deut. xxv. 17). For this act of disobedience Samuel was commissioned to declare to Saul his rejection, and he himself sent for Agag and cut him in pieces. [SAMUEL.]

Haman is called the AGAGITE in Esther (Boz-yaos, iii. 1, 10, viii. 3, 5). The Jews consider Haman a descendant of Agag, the Amalekite, and hence account for the hatred with which he pursued their race (Jos. Ant. xi. 6, § 5. See *Speaker's Comm. on the Apocrypha*, notes on "Additions to Esther" xii. 6, xiii. 12). [R. W. B.] [F.]

AGAGITE. [AGAG.]

AG'APE. [LORD'S SUPPER.]

A'GAR. [HAGAR.]

AGARE'NES (αἰὼν Ἀγάρ; filii Agar), Bar. iii. 23. [HAGAR.]

AGATE (שֶׁבֶט, *shebēṭ*; כַּדְמֹד, *cadmōd*; ἀχάτης; *achates*) is mentioned four times in the text of the A. V.: viz. in Ex. xxviii. 19, xxxix. 12 (similarly rendered in R. V.); Is. liv. 12; Ezek. xxvii. 16. In the two former passages, where it is represented by the Hebrew word *shebēṭ*, it is spoken of as forming the second stone in the third row of the high-priest's breast-plate; in each of the two latter places the original word is *cadmōd*, by which no doubt is intended a different stone ("rubies." R. V.). [RUBY.] In Ezek. xxvii. 16, where the text has *agate*, the margin has *chrysoprase*, whereas in the very next chapter, Ezek. xxviii. 13, *chrysoprase* occurs in the margin instead of *emerald*, which is in the text, as the translation of an entirely different Hebrew word, *nōpheç* (נֹפֶחַ): this will show how much our translators were perplexed as to the meanings of the minerals and precious stones mentioned in the sacred volume; and this uncertainty which belongs to the mineralogy of

the Bible, and indeed in numerous instances to its botany and zoology, is by no means a matter of surprise when we consider how often there is no collateral evidence of any kind that might possibly help us, and that the derivations of the Hebrew words have generally and necessarily a very extensive signification; identification therefore in many cases becomes a difficult and uncertain matter.

Various definitions of the Hebrew word *shebēṭ* have been given by the learned, but nothing definite can be deduced from any one of them. Gesenius places the word under the root *shābāḥ*, "to take prisoner," but allows that nothing at all can be learned from such an etymology.^a Fried. Delitzsch (*Prolegg. eius novem Hebr.-Aram. Wörterbuch* z. A. T. p. 85) identifies it with the Assyrian precious stone called *šubū*. The *šubū* appears to have been the precious stone (*par excellence*), and the ornament of Istar, and evidently of singular brilliancy; probably, therefore, the diamond.

Again, we find curiously enough an interpretation which derives it from another Arabic root, which has precisely the opposite meaning, viz. "to be dull and obscure."^b Another derivation traces the word to the proper name *Sheba*, whence precious stones were exported for the Tyrian merchants. Of these derivations it is difficult to see any meaning at all in the first, while a contrary one to what we should expect is given to the third, for a dull-looking stone is surely out of place amongst the glittering gems which adorned the sacerdotal breastplate. The derivation adopted by Fried. Delitzsch is perhaps the most plausible, even if his identification of it with the diamond be held in reserve. That *shebēṭ*, however, does stand for some variety of *agate* seems generally agreed upon by commentators, for, as Rosenmüller has observed (*Schol. in Exod.* xxviii. 19), there is a wonderful agreement amongst interpreters,^c who all understand an *agate* by the term.

Our English *agate*, or *achat*, derives its name from the Achates, the modern Drillo, in the Val di Noto, in Sicily, on the banks of which, according to Theophrastus and Pliny, it was first found;^d but as *agates* are met with in almost every country, this stone was doubtless from the earliest times known to the Orientals. It is a silicious stone of the quartz family, and is met with generally in rounded nodules, or in veins in trap-rocks; specimens are often found on the sea-shore, and in the beds of streams, the rocks in which they had been imbedded having been

^a See "Translators' Preface to the Reader," which, if found in Eyre and Spottiswoode's "Variorum" Bible, is not printed in all editions of the English Bible—a fact much to be regretted.

decomposed by the elements, when the agates have dropped out. Some of the principal varieties are called *chalcodony*, from Chalcedon in Asia Minor, where it is found; *carneian*, *chrysoprase*, an apple-green variety coloured by oxide of nickel; *Mocha-stones*, or *moss agate*, which owe their dendritic or tree-like markings to the imperfect crystallization of the colouring salts of manganese or iron, *onyx-stones*, *blood-stones*, &c. Specimens of the art of engraving on *chalcodony* are found in the tombs of Egypt, Assyria, Etruria, &c.^b [W. H.] [H. W. T.]

AGE, OLD. In early stages of civilization, when experience is the only source of practical knowledge, old age has its special value, and consequently its special honours. The Spartans, the Athenians, and the Romans were particular in showing respect to the aged, and the Egyptians had a regulation which has its exact parallel in the Bible (Herod. ii. 80; Lev. xix. 32). Under a patriarchal form of government such a feeling was still more deeply implanted. A further motive was superadded in the case of the Jew, who was taught to consider old age as a reward for piety, and a signal token of God's favour (Gen. xv. 15). For these reasons the aged occupied a prominent place in the social and political system of the Jews. In *private* life they were looked up to as the depositaries of knowledge (Job xv. 10): by the law of Moses the young were ordered to rise up in their presence (Lev. xix. 32; cp. Is. iii. 5): they allowed them to give their opinion first (Job xxiii. 4): they were taught to regard grey hairs as a "crown of glory" and as the "beauty of old men" (Prov. xvi. 31, xx. 29). The wise old man was the representative on earth of "the ancient of days" (Dan. vii. 9, 22); his company and counsel were to be sought and his example followed (Prov. xvi. 31, xxiii. 20; Deut. xxiii. 7; 1 K. xii. 13-19; Eccles. ii. 10, iii. 15, vi. 33). The attainment of old age was regarded as a special blessing (Job v. 26), not only on account of the prolonged enjoyment of life to the individual, but also because it indicated peaceful and prosperous times (Zech. viii. 4; 1 Mac. xiv. 9; Is. lxx. 20). In *public* affairs age carried weight with it, especially in the infancy of the state: it formed under Moses the main qualification of those who acted as the representatives of the people in all matters of difficulty and deliberation. The old men or Elders thus became a class, and the title gradually ceased to convey the notion of age and was used in an official sense, like *Patres*, *Senatores*, and other similar terms. [ELDERS.] Still it would be but natural that such an office was generally held by men of advanced age (1 K. xii. 8). [W. L. B.]

In the American edition of this work, some stress is laid upon the distinction between *πρεσβύτης* and *πρεσβύτερος*. The former is always applied to age (cp., in the case of Zecharias, Luke i. 18), the latter generally to rank or office, if also office usually dependent upon age (Cremier, *Bibl.-Theol. Wörterb.* s. v.). But the distinction can hardly be pressed into the question of deter-

mining the age of St. Paul (Philemon, v. 9 = *πρεσβύτης*) so long as able critics (e.g. Bp. Lightfoot) translate "ambassador" instead of "the aged" (A. V. and R. V. text). In the O. T. the Patriarch Jacob's reflections upon life as he looked back upon it in his old age (Gen. xlvii. 9), and in the N. T. the Saviour's description of what should mark the old age of St. Peter (John xxi. 18), have always been recognised as passages truthful and pathetic. The honour paid by Pharaoh to Jacob is illustrated by the Agalistic saying, "He who receives a grey-haired man and seeks out the aged, has at the same time sought out and received God" (Hambürger, *RE*,² s. v. "Alter," who gives many Talmudical expansions of the Biblical texts referred to above); while the refusal of this honour intimated in the words of Christ is deepened in pathos by that saying which affirms that one of the marks of the last days would be found in the despising the authority of the elders, in the mockery of the grey-haired by children, and in the standing up of the aged before the young (see Riehm, *HWB.*, s. n. "Alter"). [F.]

A'GEE (גֵּעַ, Ges. from the Arabic, *fugitive*. Fürst compares the name *φύγας* [2 Tim. i. 15]: B. 'A'od; A. 'A'od: *Age*). A Hararite, father of Shammah, one of David's three mightiest heroes (2 Sam. xxiii. 11). In the Peshito he is called "Ago of the king's mountain," the epithet being given as explaining מִן הַהָר, *mountaineer*. Cp. Targ. "of the mountain." [W. A. W.] [F.]

AGGAE'US (Ἀγγαιός; *Aggaeus*), 1 Esd. vi. 1, vii. 3; 2 Esd. i. 40. [HAGGAI.] [F.]

AGRICULTURE. This, though prominent in the scriptural narrative concerning Adam, Cain, and Noah, was little cared for by the Patriarchs; more so, however, by Isaac and Jacob than by Abraham (Gen. xxvi. 12; xxxvii. 7), in whose time, probably, if we except the lower Jordan valley (xiii. 10), there was little regular culture in Canaan. Thus Gerar and Shechem seem to have been cities where pastoral wealth predominated. The herdmen strove with Isaac about his wells; about his crop there was no contention (xxvi. 14-22; cf. xxi. 25). In Joshua's time, as shown by the story of the "Eshcol" (Num. xiii. 23-4), Canaan was found in a much more advanced agricultural state than Jacob had left it (Deut. viii. 8), resulting probably from the severe experience of famines, and the example of Egypt, to which its people were thus led. The pastoral life was the means of keeping the sacred race, whilst yet a family, distinct from mixture and locally unattached, especially whilst in Egypt. When, grown into a nation, they conquered their future seats, agriculture supplied a similar check on the foreign intercourse and speedy demoralization, especially as regards idolatry, which commerce would have caused. Thus agriculture became the basis of the Mosaic commonwealth (Michaelis, xxxvii.-xli.). It tended to check also the freebooting and nomad life, and made a numerous offspring profitable, as it was already honourable by natural sentiment and by law. Thus, too, it indirectly discouraged slavery, or, where it existed, made the slave somewhat like a son, though it made the son also somewhat of a slave. Taken in connexion with the inalienable character of inheritances, it gave each man and each family a

^b Compare with this Ex. xxxviii. 23: "And with him was Aholiab, son of Ahisamach, of the tribe of Dan, an engraver and a cunning workman;" and ch. xxxix. 8, "And he made the breastplate of cunning work."

state in the soil and nurtured a hardy patriotism. "The land is Mine" (Ler. xxv. 23) was a dictum which made agriculture likewise the basis of the theocratic relation; so that it becomes a charge against the apostate people, "Ye defiled My land" (Jer. ii. 7). Thus every family felt its own life with intense keenness, and had its divine tenure which it was to guard from alienation. The prohibition of culture in the sabbatical year formed, under this aspect, a kind of rent reserved by the Divine owner; or rather perhaps the soil reverted then to Him and to the poor as His representatives. Landmarks were deemed sacred (Deut. xix. 14), and the inalienability of the heritage was ensured by its reversion to the owner in the year of jubilee; so that only so many years of occupancy could be sold (Ler. xxv. 8-16, 23-35). The prophet Isaiah (v. 8) denounces the contempt of such restrictions by wealthy grandees who sought to "add field to field," erasing families and depopulating districts.

A change in the climate of Palestine, caused by increase of population and the clearance of trees, must have taken place before the period of the N. T. A further change caused by the decrease of skilled agricultural labour, e.g. in irrigation and terrace-making, has since ensued. Not only this, but the great variety of elevation and local character in so small a compass of country necessitates a partial and guarded application of general remarks (Robinson, i. 507, 553, 554, iii. 595; Stanley, *S. & P.* 119, 124-6). Yet wherever industry is secure, the soil still asserts its old fertility. The *Haurân* (Peraea) is as fertile as Damascus, and its bread enjoys the highest reputation. The black and fat, but light, soil about Gaza is said to hold so much moisture as to be very fertile with little rain. Here, as in the neighbourhood of *Bejrût*, is a vast olive-ground, and the very sand of the shore is said to be fertile if watered. Thus the "land of corn and wine, of bread and vineyard," is its description (Is. xxxv. 17). The Israelites probably found in Canaan a fair proportion of woodland, which their necessities, owing to the discouragement of commerce, must have led them to reduce (Josh. xvii. 18). But even in early times timber seems to have been far less used for building material than among Western nations; such parts as beams, rafters, doors, &c. were, however, indispensably of timber (Cant. i. 17; viii. 9). In Solomon's time the Israelites were not skilful hewers, and imported both the timber and the workmen (1 K. v. 6, 8). No store of wood-fuel seems to have been kept; ovens were heated with such things as dung and hay (Ezek. iv. 12, 15; Mal. iv. 1, 3) [DUNO]; thorns and stubble fully dry are often spoken of as fuel, unless, as is possible, the allusion may sometimes be to burning them to ashes to use as manure (Is. xxxiii. 11; Joel ii. 5; Obad. 18; Nah. i. 10); and in any case of sacrifice on an emergency, some, as we should think, unusual source of supply is constantly mentioned for the wood (1 Sam. vi. 14; 2 Sam. xxiv. 22; 1 K. xix. 21; comp. Gen. xxi. 3, 6, 7). All this indicates a non-abundance of timber. Against this may be set the poetical pictures derived from nature in which magnificent timber-trees supply the imagery, as to Ezekiel (xxii. 14), for nations flourishing in their pride. Such are called

"trees by the waters." Such a cedar is the Assyrian with "rivers running round about his plants," meaning perhaps mountain torrents of the Lebanon (ib. 4); an elevated syrian region which, with Carmel, &c., furnished prophetic types alike of national glory and of its decline (Is. xxxv. 2; xxxiii. 9). Again, "the trees of the wood moved by the wind" is the image used to describe unanimous popular feeling (Is. vii. 2). The felling of timber, especially of the choicer kinds, finds a leading place amidst hostile ravages (Is. vii. 24, xiv. 8, xxxvii. 24; Jer. xxii. 7); while the culture of such trees, assisted by special irrigation, is represented as a pursuit of the royal voluptuary in Eccles. ii. 6. So "the forest and every tree" is called on for acclamations of joy (Is. xlv. 23; lv. 12). Forests on fire, perhaps by lightning or spontaneous combustion in excessive drought, are also spoken of (Is. ix. 18; Jer. xxi. 14; Ezek. xix. 14, xx. 47; Joel i. 18-20). More especially the olive-groves were liable to such accidents (Jer. xl. 16; cf. the well-known passage, Virg. *Georg.* ii. 303 foll.). It seems likely also that the prevalence of idolatry may have given encouragement to the planting and cherishing of timber, especially the nobler sorts, both as a material for the idol, when felled, and a caecoc. for the altar while standing (Is. xlv. 14, ps. xl. 20; Jer. x. 3). Yet on the whole the allusions suggest that trees were scarce and deemed a valuable property, and even catalogued as such: see Is. x. 19, and compare the mention of the "trees" in Abraham's purchase (Gen. xxiii. 17). The spontaneous outburst of the choicest vegetation in the desert, and the displacement of its rude and stunted growths by that means, is a vivid image of spiritual revival (Is. xli. 19; lv. 13). The contrary process, viz. the land once tilled left to "briers and thorns" (Is. vii. 23-25), or reverting to pasturage of cattle (21, 22), marks the result of hostile ravages. To such a thorny state the soil speedily relapsed when neglected (Jer. iv. 3; Hos. x. 4) or left fallow. Thus "thorns" imply by their presence slovenly husbandry, or total failure of hopeful produce (Jer. xii. 13). The word which mostly occurs in such contrasts is *קִצְיִם*. The thorn used for fences is *קִצְיִם* or *סִסְיָה* (Job r. 5; Prov. xv. 19; Mic. vii. 4); and this, or the occasional arming of a rude barrow, seems (besides fuel, Eccles. vii. 6) the only use for them [THORNS and THISTLES]. The three grades of Is. xxxii. 15, the wilderness, the fruitful field, and the forest, rising from sparse to thick vegetation, are noteworthy; also the gradual return to culture after desolation by the enemy in xxxvii. 30. The image of exuberant fertility from barrenness (Is. xxxv. 1), "the desert... shall blossom as the rose," is certainly a mistranslation, though what plant the word *חֲבַצֶּלֶת* (like its Assyrian equivalent *hab(a)silatu* [cp. Fried. Delitzsch, *Prolegg. eines neuen Hebr.-Aram. Wörterbuchs z. A. T.*, p. 81, &c.]) actually represents seems at present uncertain. Cp. R. V. marg. in Is. xxxv. 1; Cant. ii. 1, *autumn crocus*.

Productiveness seems nearly measured by abundance of moisture, the exuberance of which as streams in the desert is a lively image of prophecy, whereas that of destructive floods is

comparatively rare. The precariousness of the surface brooks from mountain snow is noticed (Job vi. 15-18). Marshes and awamps were however known in the land of Uz, drier probably than Palestine (Job viii. 11: cf. Is. xxxv. 7; Ezek. xlvii. 11). "Sowing by the brooks" occurs both as characteristic of Egypt (Is. xix. 7) and generally, and is perhaps alluded to in the figurative exhortation, "Cast thy bread upon the waters" (Eccles. xi. 1). Its plenty of water from natural sources made Canaan a contrast to rainless Egypt (Deut. viii. 7; xi. 10-12). Nor was the peculiar Egyptian method alluded to in Deut. xi. 10 unknown, though less prevalent in Palestine. That peculiarity seems to have consisted in making in the fields square shallow beds, like our salt-pans, surrounded by a raised border of earth to keep in the water, which was then turned from one square to another by pushing aside the mud to open one and close the next with the foot. A very similar method is apparently described by Robinson as used, especially for garden vegetables, in Palestine. Trees, especially fruit trees, planted by the water-side, but also willows (grown perhaps to protect the stream itself by their shade, as well as for other uses), are a common image. Irrigation (including under the term all appliances for making the water available) was as essential as drainage in this land; and for this the large extent of rocky surface, easily excavated for cisterns and ducts, was most useful. The spring-water supply varies greatly in different districts. In some it abounds. Thus the Beisan (Bashan) plain has over thirty good springs, and the region of Nablous (Samaria) about seventy. The Negeb extends round Beersheba, and both in its extent and in the meaning of the term ("dry land") is nearly equivalent to the district of Daroma. Its "upper and nether springs" (Judg. i. 15) arise from the hard limestone formation in the N.W. corner of the region; throughout the rest of the Negeb area the water is from cisterns. The number of these in the drier regions of Palestine shows the dependence then as now to have been on storing the rainfall, while the geological structure forbids the supposition that springs once existing are now dried up (Survey of Western Palestine, Special Papers, p. 198). Even the plain of Jericho is watered, not by canals from the Jordan, since the river lies below the land, but by rills converging from the mountains. In these features of the country lay its expansive resources to meet the wants of a multiplying population. The lightness of agricultural labour in the plains set free an abundance of hands for the task of terracing and watering; and the result gave the highest stimulus to industry. The ruins of the great tank at Ziza still remain to illustrate the whole system of irrigation (cp. Tristram, *Land of Moab*, p. 185). Dew is also to be set to the amount of water-supply [DEW]. It is sometimes a figure for bright young foliage, e.g. "Thy dew is as the dew of herba" (Is. xxvi. 19). The cereal crops of constant mention are wheat and barley, and more rarely spelt and millet. "Rye" appears to be an error of the A.V. [RYE and FITCHES]. Of wheat and barley mention is made in the Book of Job, together with the vine, olive, and fig, the use of irrigation, the plough and the harrow (xv. 33; xxiv. 6;

xxix. 6; xxi. 40; xxxix. 10). The "fitches" of Is. xxviii. 25, 27, appears to be the black poppy; that of Ezek. iv. 9 to be spelt. This poppy, with cummin and such podded plants as beans and lentiles, may be named among the staple produce. To these, later writers add a great variety of garden plants, e.g. kidney-beans, peas, lettuce, endive, leek, garlic, onion, melon, cucumber, cabbage, &c. (Mishna, *Celaim*, l. 2). The term "garden of herba," lit. of verdure (Deut. xi. 10, &c.), and so "dinner of herba," Prov. xv. 17, probably means a kitchen garden [GARDEN]. The word for herbs regularly domesticated for man's use is עֵשֶׂב (Ps. civ. 14). Wild esculents analogous to them are rather נֶחֱמֵל (2 K. iv. 39; Is. xxvi. 19). But the former stands for "herbs of the mountains" in Prov. xxvii. 25. For the "bitter herba" eaten with the Paschal Lamb, see PASSOVER, ii. 3 (c). All such growths depended on a ready and copious water-supply (Deut. xi. 10; Is. lviii. 11). The produce which formed Jacob's present was of such kinds as would keep, and had kept during the famine (Gen. xliii. 11).

The Jewish calendar, as fixed by the three great festivals, turned on the seasons of green, ripe, and fully-gathered produce. Thus we see traces of a natural calendar in Is. xviii. 5, "Afore the harvest, when the bud is perfect and the sour grape is ripening in the flower;" the processes of growth marking the seasons which develop them. Hence, if the season was backward, or, owing to the imperfections of a non-astronomical reckoning, seemed to be so, a month was intercalated. This rude system was fondly retained long after mental progress and foreign intercourse placed a correct calendar within their power; so that notice of a *Ve-adar*, i.e. second or intercalated Adar, on account of the lambs being not yet of paschal size, and the barley not forward enough for the *Abib* (green sheaf), was sent to the Jews of Babylon and Egypt (Ugol. *de Re Rust.* v. 22) early in the season [YEAR].

The year, ordinarily consisting of twelve months, was divided into six agricultural periods as follows (*Tosaphtha Taanith*, ch. 1):—

I. SOWING TIME.	
Tisri, latter half	{ beginning about autumnal equinox }
Marchesvan	
Kisleu, former half	
Early rain due.	
II. UNRIPE TIME.	
Kisleu, latter half.	{
Tebeth.	
Shebath, former half.	
III. COLD SEASON.	
Shebath, latter half.. .. .	{
Adar	
[Ve-adar]	
Nisan, former half	
Latter rain due.	
IV. HARVEST TIME.	
Nisan, latter half	{ Beginning about vernal equinox. Barley green. Passover.
Ijar.	
Sivan, former half	
{ Wheat ripe. Pentecost.	
V. SCHEMER.	
Sivan, latter half.	{
Tamuz.	
Ab, former half.	

VI. SULTRY SEASON.

Ab, latter half.

Elul.

Tisri, former halfIngathering of fruits.

Thus the six months from mid Tisri to mid Nisan were mainly occupied with the process of cultivation, and the rest with the gathering of the fruits. Rain was commonly expected soon after the autumnal equinox or mid Tisri; and if by the first of Kasleu none had fallen, a fast was proclaimed (Mishna, *Taanith*, ch. 1). The common scriptural expressions of the "early" and the "latter rain" (Deut. xi. 14; Jer. v. 24; Hos. vi. 3; Zech. x. 1; James v. 7) are scarcely confirmed by modern experience, the season of rains being unbroken (Robinson, i. 41, 429; iii. 96), nor did the Jews probably regard these as separate rainy seasons. From the Mishna (*ubi sup.*) the seasons at the date of its being compiled (about 200 A.D.) seem to have not perceptibly differed from their course at the present time; when "rain, in an ordinarily good year, falls first at the autumnal equinox, during November frequent thunderstorms occur, and about Christmas the weather is generally stormy. In January the heaviest rains fall, and in February sometimes none at all, but the weather is never settled until after the vernal equinox, and the early April showers are past. From May to September no rain falls except generally one heavy shower in June or July" (Survey of Western Palestine, Special Papers, p. 196). "As a rule the seasons occur in a cycle, becoming yearly wetter and wetter for a certain period, then growing drier and drier till a year of drought arrives" (*ib.* p. 197). The average rainfall may now be put at "about 25 in. a year" (*ib.*). The consternation caused by the failure of the former rain is depicted in Joel i. ii.; and that Prophet seems to promise that and the latter rain together "in the first month," i.e. Nisan (ii. 23). Thus the failure of rain "when there were yet three months to the harvest" (Amos iv. 7) would be equivalent to destroying the hopes of the crop. The same Prophet, echoing Lev. xxvi. 5, says (ix. 13), "The plowman shall overtake the reaper, and the treader of grapes him that soweth seed." The last clause suggests that extremes shall meet, but the LXX. has the first clause otherwise,* yet not so as to reconcile it with the second. Exuberant produce leaving a balance over on the year is probably intended; cp. "Ye shall eat old store and bring forth the old because of the new" (Lev. xxvi. 10). The ancient Hebrews had little notion of green or root-crops grown for fodder, nor was the long summer drought suitable for them. Barley supplied food both to man and beast, although less esteemed for the former [BARLEY]; and the plant, called in Exek. iv. 9 "millet," *דָּחַל*, *Holcus dochna*, Linn. (Gesenius), but by some identified with the *Sorghum vulgare*, modern *dourra* [MILLET], was grazed while green, and its ripe grain made into bread. In the later period of

* καταλήφεται ὁ ἀμῖνος τὸν τρυγητόν, καὶ περσάσει ἡ σταφυλὴ ἐν τῷ σπόρῳ, in the LXX. (T.) here. "The cluster shall turn purple to the sowing-time" is the strict sense of the last clause; which approximately accords with the above, but yet suggests a variation in the Hebrew from which it came.

more advanced irrigation the *תלתן*, "Fenu-greek," occurs, also the *תחת*, a clover, apparently, given cut (*Peah*, v. 5). Mowing (*גָּזַח*, Amos vii. 1; Ps. lxxii. 6) and gathering hay [HAY] were familiar processes, but the latter had no express word, unless *חֶשֶׁן* ("chaff" in A. V.) be such; *חֶשֶׁן*, rendered "hay" in A. V. (e.g. Is. xv. 6), being properly grass (R. V.). The absence of any haymaking process is a token of a hot climate, where the grass may become hay as it stands.

The produce of the land, besides fruit from trees, was technically distinguished as *תבואה*, including apparently all cereal plants, *קטניות* (*quicquid in siliquis nascitur*, Buxt. *Lex.*) nearly equivalent to the Latin *legumen*, and *זרעונים* or *זרעוני גינה*, *semina hortensia* (since the former word alone was used also generically for all seed, including all else which was liable to tithe, for which purpose the distinction seems to have existed). The plough was probably like the Egyptian (see fig. 2), and the process of ploughing mostly very light, like that called *scarification* by the Romans ("Syria tenui sulco arat," Plin. xviii. 47), one yoke of oxen mostly sufficing to draw it. Such is still used in Asia Minor, and its parts are shewn in the accompanying drawing: *a* is the pole to which the

Fig. 1.—Plough, &c., as still used in Asia Minor. (From Fellows's *Asia Minor*.)

cross beam with yokes (b) is attached; c, the share; d, the handle; e represents three modes of arming the share, and f is a goad with a scraper at the other end, probably for cleansing the share. The following terms denote the tools of Hebrew husbandry:—Plough-share, *אָת*; the verb to plough is *חָרַשׁ*,^b but there is no word for the entire plough; yoke, *מוֹטָה* and *עֵל* [YOKE]; mattock, *מַחְרֵשׁ מַחְרֵשׁ מַחְרֵשׁ*; the last two akin to the above verb, and one, perhaps, meaning "plough-share," or more probably the metallic beak which armed it, of which three forms are given (fig. 1, e) above:—sickle, *חָרַשׁ* in Deut., and *מִנֵּל* in Jer. and

^b Also *יָנַב*, but rare, found only in its participle *יוֹנָבִים*, ploughmen (2 K. xxv. 12; Jer. iii. 16).

^c In 2 Chron. xxxiv. 6, Josiah is said to have destroyed all false altars, &c., in various places, "with their mattocks round about." The Hebrew text is doubtful. The Keri is *בְּחִרְבֵּיהֶם*, which may possibly denote some sharp instruments akin to *חֶרֶב*, sword, or, if otherwise pointed (Bertheau, Kell, R. V.), "in their ruins;" but the LXX. has *ἐν τοῖς τόποις αὐτῶν κύκλῳ*, following possibly a different original from our Hebrew, but also possibly rendering the same loosely.

Joel; goad, *קֶרֶן*; ⁴ three-pronged fork, *שֵׁלֶט*, *קֶרֶן*; axe, *קֶרֶן*; threshing sledge, *קֶרֶן*, as above; also *קֶרֶן* (Is. xli. 15), which is properly as epithet of *קֶרֶן* (Gesen.), and appears as *קֶרֶן* (2 Sam. xii. 31; 1 Ch. xx. 3; "harrow," A. V., Amos i. 3) as a cruel instrument of execution. To harrow¹ is *קֶרֶן*, but no corresponding noun occurs; for vine-dressers the pruning hook, *קֶרֶן*; for the shovel and fan, see fig. 15 and paragraph above it. Mountains and steep places were worked with the mattock (Is. vii. 25; Maimon. *ad Mishn.* vi. 2; Robinson, iii. 595, 602-3). The breaking up of new land was performed, as with the Romans, *tere novo*. Such new ground and fallows, the use of which latter was familiar to the Jews (Jer. iv. 3;

Hos. x. 12), were cleared of stones and of thorns (Is. v. 2; *Gemara Hierosol.* ad loc.) early in the year, sowing or gathering from "among thorns" being a proverb for slovenly husbandry (Job v. 5; Prov. xxiv. 30, 31; Robinson, ii. 127). Virgin land was ploughed a second time. The proper words are *קֶרֶן*, *קֶרֶן*, *aperire, proscindere*, and *קֶרֶן*, *offringere*, i.e. *iterare ut frangantur glebae* (by cross ploughing, used also of harrowing), Varr. *de R. R.* i. 32; both the latter are distinctively used Is. lxviii. 24. We find in 1 K. xix. 19, twelve ploughs, apparently going on the same ground, some of which may have repeated the process of others and reduced the ground to a finer tilth, a result especially needed where the agency of frost in pulverizing the soil cannot, by reason of climate, be relied upon. The importance of the operation, on which all

Fig. 2.—Egyptian ploughing and sowing. (Wilkinson, *Tombs of the Kings—Thebes*.)

subsequent ones depend, called for the presence of the master. Thus Elisha is actually present "with the twelfth" plough, and so Saul comes from the field after the plough-cattle (1 Sam.

xi. 5). Land already tilled was ploughed before the rains, that the moisture might the better penetrate (Maimon. *ap. Ugol. de Re Rust.* v. 11). Rain, however, or irrigation (Is. xxxii. 20), pre-

Fig. 3.—Goats treading in the grain, when sown in the field, after the water has subsided. (Wilkinson, *Tombs, near the Pyramids*.) The hieroglyphic word above, *ak* or *akut*, signifies "tillage," and is followed by the demonstrative sign, a plough.

pared the soil for the sowing (Ps. lxx. 10, 11), as may be inferred from the prohibition to irrigate till the gleaming was over, lest the poor should suffer (*Peah*, v. 3); and such sowing

¹ Also *קֶרֶן*, Judges iii. 31, the weapon of Shamgar.

We may conjecture this to have been longer as having a further function in guiding (*קֶרֶן*) the cattle (cf. *Wisd.* xlviii. 25), and therefore analogous to a spear. But *קֶרֶן* is the more common word (1 Sam. xiii. 21; Eccles. xii. 11 plur.; cp. Acts ix. 5, xxvi. 14).

² The text here is suspicious.

In Hos. x. 11 is a figurative passage, "I will put Ephraim in the wain, Judah shall plough, Jacob shall harrow for himself," where A. V. has wrongly, "I will make Ephraim to ride" (R. V. "I will set a rider on Ephraim"). The reference is clearly to a beast fastened to the plough.

often took place *without* previous ploughing, the seed, as in the parable of the sower, being scattered broadcast, and ploughed in *afterwards*, the roots of the late crop being so far decayed as to serve for manure (Fellows, *Asia Minor*, p. 72). The regulation declaring "any sowing seed which is to be sown" clean, although a carcass came in contact with it, refers to the dryness of seed kept for that purpose; as is plain from the context, declaring seed which has been wetted to be, under the same circumstances, "unclean" (Lev. xi. 37, 38). There may be a reference here to the fact that wheat was sown in wetted furrows (Jahn, *Archaeol.* i. p. 361; cf. Ps. lxx. 10). The soil was then brushed over with a light harrow, often of thorn bushes. In highly irrigated spots the seed was trampled in by cattle (Is. xxxii. 20), as in Egypt by goats (see fig. 3). Sometimes, however, the

sowing was by patches only in well-manured spots, a field so treated being called *קִנְיָן*, der. *קָנָר*, *pardus*, from its spotted appearance, as shown in the accompanying drawing by Suren-

Fig. 4.—Corn-growing in patches. (Surenhusius.)

husius to illustrate the Mishna. Where the soil was heavier, the ploughing was best done dry ("dum sicca tellure licet," Virg. *Georg.* i. 214); and there, though not generally, the *sarratio* (*סָרִיר*, der. *סָרַר*, to cleanse), and even the *liratio* of Roman husbandry, performed with *tabulae* affixed to the sides of the share, might be useful. But the more formal routine of heavy Western soils must not be made the standard of such a naturally fine tilth as that of Palestine generally. "Sunt enim regionum propria munera, sicut Aegypti et Africae, in quibus agricola post sementem ante messem segetem non attingit . . . in iis autem locis ubi desideratur sarratio," &c. (Columella, ii. 2.) The phrases "furrows of her plantation . . . furrows where it grew" (Ezek. xvii. 7, 10) are misleading. *סָרִיר*, rendered here by A. V. "furrows," means either "raised beds," or, more probably (Ges. s. v.), "espaliers." During the rains, if not too heavy, or between their showers, would be the best time for these operations; thus seventy days before the Passover was the time prescribed for sowing for the "wave-sheaf," and probably, therefore, for that of barley generally. The oxen were urged on by a goad like an aspen (see above, fig. 1 f, and note ⁴). The custom of watching ripening crops and threshing-floors against theft or damage (Robinson, i. 490; ii. 18, 83, 99) is certainly ancient (Job xxvii. 18; Is. i. 8) [CUCUMBERS]. Thus the besieging host are compared to the "keepers of a field . . . round about" the city to watch it (Jer. iv. 17). The "cottage," the "removal" of which is a type of rapid effacement in Is. xxiv. 20, is probably a field-bed or hammock for such a keeper (Delitzsch, in loco). Thus Boaz slept in the floor "at the end of the heap of corn," *עֵרָה*, made by depositing thereon the sheaves or shocks from the harvest field (Ruth iii. 4, 7). Barley ripened a week or two before wheat, and as fine harvest weather was certain (Prov. xxvi. 1; 1 Sam. xii. 17; Amos iv. 7), the crop chiefly varied with the quantity of timely rain. The period of harvest must always have differed according to elevation, aspect, &c. (Robinson, i. 430, 551). The proportion of harvest gathered to seed sown was often vast: a hundred-fold is mentioned, but in such a way as to signify that it was a limit rarely attained (Gen. xxvi. 12; Matt. xiii. 8). These natural tendencies were counteracted by seasons of drought which utterly prostrated for a while the energies of the people [FAMINE]. These, with their results, are often described in pathetic passages by the prophets (Jer. xiv. 2-6, *et al.*). A withering effect is also ascribed to the wind from the desert, or east

wind (Gen. xli. 6; Is. xxi. 1; Ezek. xix. 12; Hos. xiii. 15). A variety of insect plagues, some threatened in Deut. xxviii. 38, 39, and fully realised in the descriptions of subsequent prophets, caused at times such fearful ravages as to paralyse agriculture for a time [CATERPILLAR; LOCUST; PALMERWORM]. Amos iv. 9 briefly touches this, but the *locus classicus* is Joel i. ii. The fig-tree white and bare of bark, the field wasted, the land mourning, the beasts groning, the thick cloud of insect swarms darkening the sky, are some of his details. Besides these, some more occult agency rots the seed in the barus, withers the corn, and sears the pastures with flame, thus completing the picture of destruction from the Almighty, and of human misery in consequence.

The rotation of crops, familiar to the Egyptians, can hardly have been unknown to the Hebrews. Sowing a field with divers seeds was forbidden (Deut. xxii. 9), and minute directions are given by the Rabbis for arranging a seeded surface with

Fig. 5.—Sowing. (Surenhusius.)

Fig. 6.—Sowing. (Surenhusius.)

Fig. 7.—Sowing. (Surenhusius.)

great variety, yet avoiding juxtaposition of *heterogenea*. Such arrangements are shown in the annexed drawings. Three furrows' interval was the prescribed margin (*Celaia*, ii. 6). The blank spaces in fig. 5, a and b, represent such margins, tapering to save ground. In a vine-

yard wide spaces were often left between the vines, for whose roots a radius of four cubits was allowed, and the rest of the space cropped: so herb-gardens stood in the midst of vineyards

Fig. 8.—Sowing. (Surenhusius.)

(*Peah*, v. 5). Fig. 9 shows a corn-field with olives about and amidst it. Such an arrangement was probably that of the Philistine field, into which Samson sent his "foxes," which "burnt up both

Fig. 9.—Corn-field with Olives. (Surenhusius.)

the shocks and also the standing corn with the vineyards and olives" (*Judg.* xv. 5).^s

The wheat, &c., was reaped by the sickle, or the ears merely were gathered by hand (so

Fig. 10.—Reaping wheat. (Wilkinson, *Tombs of the Kings—Thebes*.)

"reapeth the ears with his arm," *Is.* xvii. 5) in the "Piceanian" method (*Job* xxiv. 24; *Varr. de Re Rust.* i. 50); or the stalk was cut in one

Fig. 11.—Pulling up the roots by the roots. (Wilkinson, *ut supra*.)

^s The expression "as a torch of fire in a sheaf" (*Zech.* iii. 6) is perhaps an allusion to this, as an image of violent havoc; see *Exod.* xxii. 6, where damages against such mischief are decreed.

method, or the plant was pulled from the roots (*Peah*, v. 10). Unless the first method was followed, it was bound in sheaves—a process prominent in Scripture, and described by peculiar words, *אָלם* and *עָמַר*, the sheaf itself being *אֵלֶמָה* (*Is.* xxxvi. 6) or *עָמַר* (*Lev.* xxiii. 10), and a shock or pile of such *גְּרִישׁ* (*Job* v. 26),

Fig. 12.—Reaping. (Surenhusius.)

whereas the standing corn is *קָקַה* (*Ex.* xxii. 5)

—or heaped, *לְקוֹבְעוֹת*, in the form of a helmet, or *לְבוּמָסוֹת* of a turban (of which, however, see another explanation, *Buxt. L.* s. v. *בוּמָסוֹת*, or *לְחָרָה* of a cake. Thus the "heap" of "harvest" is a familiar image (*Is.* xvii. 11). But the "heaps in the furrows of the field" to which "altars" are compared (*Hos.* xii. 11) are wholly different, being heaps of stones, and the point of the comparison their frequency—they stand as thick about the country as the stone-heaps, when stones are gathered from the furrows. The sheaves or heaps were carted (*Amos* ii. 13) to the floor—a

Fig. 13.—Threshing-floor. The oxen driven round the heap contrary to the usual custom. (Wilkinson, *Thebes*.)

circular spot of hard ground, probably, as now, from 50 to 80 or 100 feet in diameter. Such floors were probably permanent, and became well-known spots (*Gen.* i. 10, 11; 2 *Ssm.* xxiv. 16, 18). On these the oxen, &c., forbidden to be muzzled (*Deut.* xxv. 4), tramped out the grain, as we find represented in the Egyptian monuments. Lighter grains were threshed^h with a flail or switch (*Is.* xlviii. 27), and so Gideon treated his wheat, being unable to resort to the floor as usual for fear of hostile violence (*Judg.* vi. 11); and so Ruth treated her barley (*Ruth* ii. 17). At a later time, perhaps in the agricultural progress under king Uzziash, who loved husbandry (2 *Ch.* xxvi. 10), the Jews used a threshing sledge called *Moraq* (*Is.* xli. 15; 2 *Sam.* xxiv. 22; 1 *Ch.* xxi. 23), probably re-

^h The same word, *תָּרַס*, is used for knocking fruit off a tree (*Dent.* xxiv. 20; *Is.* xlvii. 12).

sembling the *nóreg*, still employed in Egypt (Wilkinson, i. 408, ii. 421, 423)—a stage with

Fig. 14.—Threshing Instrument. (From Fellows's *Asia Minor*.)

three rollers ridged with iron, which, aided by the driver's weight, crushed out, often injuring,

Fig. 15.—The *Noreg*, a machine used by the modern Egyptians for threshing Corn.

the grain, as well as cut or tore the straw, which thus became fit for fodder. It appears to have been similar to the Roman *tribulum* and the

Fig. 16.—Treating out the grain by oxen, and winnowing. 1. Raking up the ears to the centre. 2. The driver. 3. Winnowing with woolen shovels. (Wilkinson, *Thebes*.)

ber, to be increased if the field be large (*Schevioth*, cap. iii. 2). We learn also from Is. xxv. 10, 11, the existence of a midden with a tank for liquid manure. Nor was the great usefulness of sheep to the soil unrecognised (*Scher*, iii. 4), though, owing to the general distinctness of the pastoral life, there was less scope for it. Vegetable ashes, burnt stubble, &c. were also used; and the regulation for compensation in case of fire destroying a neighbour's produce (Ex. xxii. 6) probably has in view the firing a surface, to burn thorns and similar refuse.

plotellum Poenicum (Varr. *de R. R.* i. 52). The passage Is. xxviii. 24 *sq.* is worth noting. The Prophet's parable is couched in imagery so precise as to instruct us in the facts. Intelligence working with a purpose, following a method and avoiding excess, is the lesson taught, and ascribed to a divine source. Thus sowing is the end of ploughing, which opens the soil and breaks its clods. The surface is levelled, and each seed comes in order, the finer first, the heavier after, wheat in rows, barley in the appointed spot, spelt in the border.¹ In threshing a like discretion prevails. The heavy-armed sledge and waggon wheel^k and horses would crush the lighter grains, and, if applied too long, would be fatal to corn also. This is the only instance of the scriptural mention of "horses" ("horsemen," A. V.; "horses," R. V.) in a purely agricultural process. The wheeled carriage as used for threshing supplies an image in Prov. xx. 25, "He bringeth the wheel over them." Barley was sometimes soaked and then parched before treading out, which got rid of the pellicle of the grain (see further the *Antiquitates Trituræ*, Ugolini, vol. 29). The culture of flax for linen garments, &c., was already familiar to the Israelites in Egypt before the Exodus, and was a staple of Palestine at the time of their invading it. The working the yarn, &c., was a point of housewifery (Ex. ix. 31; Jos. ii. 6; Prov. xxxi. 13).

The use of animal manure is proved frequent by such recurring expressions as "dung on the face of the earth, field," &c. (Ps. lxxxiii. 10; 2 K. ix. 37; Jer. viii. 2, &c.). [DUG.] A rabbi limits the quantity to three heaps of ten hall-cors, or about 380 gallons to each מִנְיָן of grain (= $\frac{1}{3}$ of ephah, Gesen.), and wishes the quantity in each heap, rather than their num-

The "shovel" and "fan" (מִזְרָה and רֶחֶת) Is. xxx. 24, the difference between which is pre-

¹ For the obscure words מִזְרָה, here applied to wheat, and נֶסֶךְ to barley, see Gesen. s. vv. The latter cannot grammatically be an epithet. Some have taken it for "millet"; but it is perhaps best taken in adverbial apposition, "as appointed," with reference to the space allotted. See Cheyne, *l. c.*

^k The proper word for a chariot wheel, as in Exod. xiv. 25, is used here in v. 27; in v. 28 the more general word, used also for water-wheels, &c.

ferred to the present day) indicate the process of winnowing—a conspicuous part of ancient husbandry (Ps. xxxv. 5; Job xxi. 18; Is. xvii. 13), and important owing to the slovenly threshing. Evening was the favourite time (Ruth iii. 2) when there was mostly a breeze. The “wind from the wilderness,” i.e. dry, was favourable to the same purpose¹ (Jer. iv. 11). The מִזְרָה (מִזְרָה, to scatter) = σπύρον (Matt. iii. 12; Hom. *Iliad*, xviii. 588), was the migra or fork with six prongs; while the רֶחֶת (akin to רֶחֶת?) was the shovel which threw the grain up against the wind (see Wetzstein in Delitzsch, *Jesaja*,² p. 707 ff. Cp. however on רֶחֶת Delitzsch, *Jes.* p. 337, note). The heap of produce rendered in rent was sometimes customarily so large as to cover the רֶחֶת (*Bava Metzia*, ix. 2). So the σπύρον was a corn-measure in Cyprus, and the δισσύρον = $\frac{1}{2}$ a μέγιστος (Liddell and Scott, *Lex. n. v.* σπύρον). The last process was the shaking in a sive, מִבְרָה, *cribrum*, to separate dirt and refuse (Is. xxx. 28; Amos ix. 9; cf. Luke xii. 31).

The words rendered “barn,” “storehouse,” “garner” in A. V., sometimes denote structures raised on the surface (Luke xii. 18), but very often subterranean repositories excavated in the rock, &c. This gives great profundity to the image of Ps. xxxiii. 7, “He layeth up the depth in storehouses.” Such is probably the explanation of Jer. xli. 8, where Ishmael’s prisoners were, “We have treasures in the field, of wheat, &c.” The same word occurs in Job iii. 21, “who dig for it more than for hid treasures.” They were so hidden that without guidance no stranger could find them; in short, a *cache* is intended. Hence the prisoners virtually offer to show them, and thus to ransom themselves. In the *Speaker’s Commentary*, “O my mountain in the field” is supposed to refer to Jerusalem. Thus it is said of Babylon, “Open her storehouses, cast her up as *heaps*,” the “heaps” of corn (Hag. ii. 16) flung forth of such receptacles supplying the image (Jer. l. 26). Such were made in abundance by Hezekiah (2 Ch. xxxii. 28). Seed corn was so stored; cp. “Is the seed yet in the barn?” (Hag. ii. 19), i.e. unsown. In Joel i. 17, “The barns are broken down,” probably in the husbandman’s despair at the complete havoc described. Fields and floors were not commonly enclosed; vineyards mostly were, with a tower and other buildings (Num. xxii. 24; Ps. lxxx. 12; Is. v. 5; Matt. xxi. 33; comp. Judg. vi. 11). Banks of mud from ditches were also used.

Fruit gardens, fruit trees, and orchards are often mentioned, but few kinds of fruits are named. Besides the fig, olive, and vine, there occur apple-trees (so called, but see APPLES), pomegranates, palms (i.e. date palms; cf. Bethany, “House of dates”), mulberries (2 Sam. v. 23, 24; 1 Mac. vi. 34), pistachio-tree, walnut (Gen. xliii. 11; Cant. vi. 11), and almond; also melons in Egypt (Num. xi. 5), and various kinds of spices (Cant. iv. 13, 14). “Gardens and orchards” are mentioned specially

among royal delights (Eccles. ii. 5). We have also summer fruits spoken of (Is. xvi. 9; Amos viii. 2; Mic. vii. 1); but the precise kinds intended by this general term are uncertain [GARDEN]. In Is. xvii. 10 “plantations of delights” (A. V. “pleasant plants;” R. V. marg. “plantings of Adonis”) seem to correspond to old English “pleasaunces,” and propagation by slips seems intended by the context. There is no mention of grafting in the O. T., and the reference to it in Rom. xi. 17 sq. is perhaps due to later influences.

With regard to occupancy, a tenant might pay a fixed moneyed rent (Cant. viii. 11), in which case he was called מִשְכָּר, and was compellable to keep the ground in good order; or a stipulated share of the fruits (2 Sam. ix. 10; Matt. xxi. 34), often a half or a third: Joseph in Egypt appointed a fifth (Gen. xlvii. 24, 26); but local custom was the only rule: in this case he was called מִשְכָּר, and was more protected, the owner sharing the loss of a short or spoilt crop; so, in case of locusts, blight, &c., the year’s rent was to be abated; or he might receive such share as a salary—an inferior position—when the term which described him was חֹכֶר. It was forbidden to sow flax during a short occupancy (hence leases for terms of years would seem to have been common), lest the soil should be unduly exhausted (comp. Virg. *Georg.* i. 77). A passer-by might eat any quantity of corn or grapes, but not reap or carry off fruit (Deut. xxiii. 24, 25; Matt. xii. 1). The “burdens of wheat,” taken from the poor (Amos v. 11), should be rendered “the tax of wheat.” Tyre was a large customer of Judah for wheat (Ezek. xxvii. 17; Acts xii. 20) [MINNITH]. There was a corn market of course in Jerusalem, and most important cities, &c. (Amos viii. 5), and its tradesmen’s misdeeds are denounced; see also Neh. xiii. 15.

The rights of the corner to be left, and of gleaning [CORNER; GLEANING], formed the poor man’s claim on the soil for support. For his benefit, too, a sheaf forgotten in carrying to the floor was to be left; so also with regard to the vineyard and the olive-grove (Lev. xix. 9, 10; Deut. xxiv. 19). Besides, there seems a probability that every third year a second tithe, besides the priests’, was paid for the poor (Deut. xiv. 28, xxvi. 12; Amos iv. 4; Tob. i. 7; Joseph. *Ant.* iv. 8). On this doubtful point of the poor man’s tithe (מַעֲשֵׂר עֲנִי) see a learned note by Surenhusius, *ad Peah*, viii. 2. These rights, in case two poor men were partners in occupancy, might be conveyed by each to the other for half the field, and thus be retained between them (Maimon. *ad Peah*, v. 5). Sometimes a charitable owner declared his ground common, when its fruits, as those of the sabbatical year, went to the poor [SABBATH]. For three years the fruit of newly-planted trees was deemed uncircumcised and forbidden; in the fourth it was holy, as first-fruits; in the fifth it might be ordinarily eaten (Mishna, *Arlah*, passim). Probably three years would mostly be needed for the maturation of the tree to the fruit-bearing point. The planter of a vineyard would thus, according to Deut. xx. 6, be for four years exempt from military service [VINEYARD]. For the various classical analogies, see *Dict. of Gr. and Rom. Antiq.* s. v. [H. H.]

¹ Thus the residuum of empty husks and chaff becomes an image of vacant desolation; and “fanners which shall fan” are threatened against Babylon (Jer. li. 2).

AGRIPPA. [HEROD.]

A'GUR (אָגור, MV.¹⁰ = *collector*; LXX. om.; *Congregans*). The son of Jakoh, an unknown Hebrew sage, who uttered or collected the sayings of wisdom recorded in Prov. xxx. Ewald attributes to him the authorship of Prov. xxx. 1-xxxi. 9, in consequence of the similarity of style exhibited in the three sections therein contained; and assigns as his date a period not earlier than the end of the 7th or beginning of the 6th cent. B.C. Delitzsch assigns Prov. xxx., xxxi. to the same person who made the great Hexekian collection. The Rabbis, according to Rashi, and Jerome after them, interpreted the name symbolically of Solomon, who "collected understanding" (from אָגַר, *agur*, he gathered), and is elsewhere called "Kehleth." Others render Prov. xxx. 1 as follows:—"The words of Agur, the son of Jakoh, of (the country of) Massa" (Delitzsch = Mesha, see Gen. x. 30). Hence Bunsen (*Bibelwerk*, i. p. clxxviii.) contended that Agur was an inhabitant of Massa, and probably a descendant of one of the 500 Simeonites, who, in the reign of Hexekiah, drove out the Amalekites from Mount Seir. Hitzig goes further, and makes him the son of the queen of Massa (which he places in N. Arabia, Mühlau in the Hauran) and brother of Lemuel (*Die Sprüche Sal.* p. 311, ed. 1858). The names Agur and Jakoh do not occur elsewhere, and some have thought them pseudonyms. In Castellus's *Lxx. Heptag.* we find the Syriac word אָגור, *aguró*, defined as

signifying "one who applies himself to the studies of wisdom," which may be better rendered "the hireling of wisdom" (Payne Smith, *Thes. Syr.* col. 25), from the Syriac sense of

אָגור, "a reward." Hence may have been derived a traditional interpretation of the proper name Agur. Much discussion on the questions connected with this verse and section of the Proverbs will be found in Mühlau, *De provv. Aguri et Lem. origine* (1869); Delitzsch, art. "Sprüche Salomos," in Herzog, *RE.*², and Cheyne, *Job and Solomon*, pp. 149, 170. [W. A. W.] [F.]

A'HAB (אָחָב, MV.¹⁰ = *father's brother*, comparison being made with a similar juxtaposition in Syriac names, e.g. אָחָב: אָבִי, which Bar-Hebr. explains as due to great likeness to his father; cp. Nestle, *Die Israelitischen Eigennamen*, p. 187, n. 1: 'Αχάβ; *Achab*), son of Omri, seventh king of the separate kingdom of Israel, and second of his dynasty. The great lesson which we learn from his life is the depth of wickedness into which a weak man may fall, even though not devoid of good feelings and amiable impulses, when he abandons himself to the guidance of another person, resolute, unscrupulous, and depraved. The cause of his ruin was his marriage with Jezebel, daughter of Ethbaal, or Ithobaal, king of Tyre, who had been priest of Astarte, but had usurped the throne of his brother Phalea (compare Joseph. *Ant.* viii. 13, 2, with c. *Apion.* i. 18). If she resembles the Lady Macbeth of our great dramatist, Ahab has hardly Macbeth's energy and determination, though he was probably by nature a better man. We have a comparatively

full account of Ahab's reign, because it was distinguished by the ministry of the great prophet Elijah, who was brought into direct collision with Jezebel, when she ventured to introduce into Israel the impure worship of Baal and her father's goddess Astarte. In obedience to her wishes, Ahab caused temples to be built to Baal and "the Asherah" in Samaria itself (1 K. xvi. 32, 33, R. V.). With a fixed determination to extirpate the true religion, Jezebel hunted down and put to death God's prophets, some of whom were concealed in caves by Obadiah, the governor of Ahab's house; while the Phœnician rites were carried on with such splendour, that we read of 450 prophets of Baal and 400 of Asherah (see 1 K. xviii. 19, where the A. V. follows the LXX. in erroneously substituting "the grove" for the proper name "the Asherah" [R. V.], as again in 2 K. xxi. 7, xxiii. 6; where R. V. has in both places Asherah). [ASHERAH.] How the worship of God was restored, and the idolatrous priests slain, in consequence of "a sore famine in Samaria," will be more properly related under the article ELIJAH. But heathenism and persecution were not the only crimes into which Jezebel led her yielding husband. One of his chief tastes was for splendid architecture, which he showed by building an ivory house and several cities, and also by ordering the restoration and fortification of Jericho, which seems to have belonged to Israel, and not to Judah, as it is said to have been rebuilt in the days of *Ahab*, rather than in those of the contemporary king of Judah, Jehoshaphat (1 K. xvi. 34). But the place in which he chiefly indulged this passion was the beautiful city of Jezreel (now *Zerin*), in the plain of Esdraelon, which he adorned with a palace and park for his own residence, though Samaria remained the capital of his kingdom, Jezreel standing in the same relation to it as the Versailles of the old French monarchy to Paris (Stanley, *S. & P.* p. 244). Desiring to add to his pleasure-grounds there the vineyard of his neighbour Naboth, he proposed to buy it or give land in exchange for it; and when this was refused by Naboth, in accordance with the Mosaic law, on the ground that the vineyard was "the inheritance of his fathers" (Lev. xix. 23), a false accusation of blasphemy was brought against him, and not only was he himself stoned to death, but his sons also, as we learn from 2 K. ix. 26. Elijah, already the great vindicator of religion, now appeared as the assertor of morality, and declared that the entire extirpation of Ahab's house was the penalty appointed for his long course of wickedness, now crowned by this atrocious crime. The execution, however, of this sentence was delayed in consequence of Ahab's deep repentance. The remaining part of the First Book of Kings is occupied by an account of the Syrian wars, which some think was originally contained in the last two chapters. It is thought more natural to place the 20th chapter after the 21st, and so bring the whole history of these wars together, than to interrupt the narrative by interposing the story of Naboth between the 20th and 22nd, especially as the beginning of the 22nd seems to follow naturally from the end of the 20th. And this arrangement is found in the LXX. [B.; A. follows the order of the Heb.] and is confirmed by the narrative of Josephus.

We read of three campaigns which Ahab undertook against Benhadad II., king of Damascus, two defensive and one offensive. In the first, Benhadad laid siege to Samaria, and Ahab, encouraged by the patriotic counsels of God's prophets, who, next to the true religion, valued most deeply the independence of His chosen people, made a sudden attack on him whilst in the plenitude of arrogant confidence he was banqueting in his tent with his thirty-two vassal kings. The Syrians were totally routed, and fled to Damascus. Next year Benhadad, believing that his failure was owing to some peculiar power which the God of Israel exercised over the hills, invaded Israel by way of Aphek, on the E. of Jordan (Stanley, *S. & P. App.* § 8. See *APHEK*, 5). Ahab's fresh victory was so complete that Benhadad himself fell into his hands; but was released (contrary to the will of God as announced by a prophet) on condition of restoring all the cities of Israel which he held, and making "streets" for Ahab in Damascus (confirmed by the inscriptions; see Schrader, *KAT.* p. 199); that is, admitting into his capital permanent Hebrew commissioners, in an independent position, with special dwellings for themselves and their retinues, to watch over the commercial and political interests of Ahab and his subjects. This was apparently in retaliation for a similar privilege exacted by Benhadad's predecessor from Omri in respect to Samaria (1 K. ix. 34). After this great success Ahab enjoyed peace for three years, and it is difficult to account exactly for the third outbreak of hostilities, which in Kings is briefly attributed to an attack made by Ahab on Ramoth in Gilead on the east of Jordan, in conjunction with Jehoshaphat king of Judah, which town he claimed as belonging to Israel. But if Ramoth was one of the cities which Benhadad agreed to restore, why did Ahab wait for three years to enforce the fulfilment of the treaty? From this difficulty, and the extreme bitterness shown by Benhadad against Ahab personally (1 K. xiii. 31), it seems probable that this was not the case (or at all events that the Syrians did not so understand the treaty), but that Ahab, now strengthened by Jehoshaphat, who must have felt keenly the paramount importance of crippling the power of Syria, originated the war by assaulting Ramoth without any immediate provocation. In any case, God's blessing did not rest on the expedition, and Ahab was told by the prophet Micaiah that it would fail, and that the prophets who advised it were hurrying him to his ruin. For giving this warning Micaiah was imprisoned; but Ahab was so far roused by it as to take the precaution of disguising himself, so as not to offer a conspicuous mark to the archers of Benhadad. But he was slain by a "certain man who drew a bow at a venture;" and, though stayed up in his chariot for a time, he died towards evening, and his army dispersed. When he was brought to be buried in Samaria, the dogs licked up his blood as a servant was washing his chariot (1 K. xiii. 37, 38: see R. V.); a partial fulfilment of Elijah's prediction (1 K. xxi. 19), which was more literally accomplished in the case of his son (2 K. ix. 26). Josephus, however, substitutes Jeruel for Samaria in the former passage (*Ant.* viii. 15, 6). The date of Ahab's accession is,

according to the old chronology. 919 B.C.; of his death, B.C. 897. Schrader, Wellhausen, and others, correcting the dates by the Assyrian monuments, place his reign between B.C. 874-854. These monuments supplement the Biblical narrative by recording one very important event. From an inscription engraved by Shalmaneser (II.) on the rocks of Armenia, it would seem that in the campaign of the sixth year (B.C. 854) of this Assyrian monarch, a battle was fought at Karkar against twelve (? eleven) allied kings. Amongst the allies were Ahab of Israel and Hadadezer (Benhadad) of Damascus. Such an alliance was a natural result of the covenant between Syria and Israel, followed by the three years' peace (1 K. xx. 34, xiii. 1). The inscription records a complete defeat of the allies; and, if the numbers can be trusted, Benhadad's loss in men and material was greater than Ahab's. Perhaps this may not have been without its influence in inducing Ahab to put an end to the alliance and "entice" (2 Ch. xviii. 2; R. V. "move") Jehoshaphat to join forces with him and make an united attack on Ramoth-gilead. See Schrader, *KAT.* pp. 193-200; *Zeitschr. f. Keilschriften*, ii. 365-384; Sayce, *Fresh Light from the Ancient Monuments*, p. 101, &c.; *Records of the Past*, iii. 99; Tiele, *Bab.-Assyr. Geschichte*, p. 200; Hommel, *Gesch. Bab.-Assyr.* p. 606; *Hebraica*, iii. 2014. Klostermann (in Strack u. Zöckler's *Kgf. Komm.*—"Chronologie d. Königsbücher," p. 496) appears to be alone in denying that the 'Ahabbu mentioned in the Inscriptions as defeated at Karkar is the Ahab of Israel, and places his reign in B.C. 910-889.

Some critics allow but little merit to some of the Biblical records of Ahab's life, and by no means accept the usual estimate of his character or of Elijah's work (cp. Bleek-Wellhausen, *Einleitung* in *d. A. T.* pp. 245, &c.; Wellhausen, *Geschichte Israels*, i. pp. 302-6; Stade, *Gesch. d. Volkes Israel*, i. p. 522, &c.). Thus, the sections dealing with Elijah and Naboth (chaps. xvii.-xix. xxi.) are considered to be largely affected by legends circulating about the prophet, to be marked by strong partisanship against Ahab, and to be reputed unhistorical on account of the miracles which they record. Further, the sections dealing with Ahab and Benhadad (ch. xx.), and with Ahab's death (ch. xxii.), are said to be marked by interpolations; though these are not of a character to discredit the general trustworthiness of the narrative. Many of these criticisms are met by Eilersheim, *History of Judah and Israel*, v. 176, vi. 1-58.

The Rabbinical legends of Ahab, often very curious, will be found summed up in Hamburger, *RE.* s. n.

2. אַחָב and אַחָב; 'Aχιδ; *Achab*. The son of Kolahai, and a lying prophet, who deceived the Israelites in Babylon, and was burnt to death by Nebuchadnezzar (Jer. xxix. 21). [G. E. L. C.] [F.]

AH'ARAH (אַחֲרָא, Ges. suggests אַחֲרָא. *post fratrem*; MV.¹⁶ an abbreviation of AHARHEL; etym. is uncertain: A. 'Aapd, B. 'Aapdā: *Ahara*). The third son of Benjamin (1 Ch. viii. 1). See *AHER*, *AHIRAM*. [W. A. W.] [F.]

AHARHEL (אַחֲרֵל, Ges. = *behind a fortress-wall* [cp. Olshausen, *Lehrb.* p. 164]; ἀρελός 'Pηχδ; *Aharchel*). A name occurring in an

obscure fragment of the genealogies of Judah (1 Ch. iv. 8). "The families of Aharhel" apparently traced their descent through Cox to Ashur, the posthumous son of Hezron. The Targum of R. Joseph on Chronicles (*l. c.*) identifies him with "Hur the firstborn of Miriam." The LXX. (ἀδελφοῦ Πηχάβ) appear to have read רַחֲבִי רַחֲבִי, "brother of Rechab." [W. A. W.] [F.]

AHASA'I (אֲחָסָאִי, *MV*.¹⁰ an abbreviation for אֲחָסָאִי; om. in LXX., *N*.⁵ 'Αχασιός; *Ahasi*). A priest, ancestor of Amashai (Neh. xi. 13), called JANZERAH in 1 Ch. ix. 12. [W. A. W.] [F.]

AHAS'BAI (אֲחָסָאִי, of uncertain etym.; *MV*.¹⁰ = contr. from אֲחָסָאִי, *I will take refuge in Jah*: B. δ' Ἀσβεῖτης, A. δ' Αἰρουέ; *Asbat*), the father of Eliphelet, one of David's thirty-seven captains (2 Sam. xxiii. 34). The name is suspicious, perhaps corrupt; cp. Driver, *Notes on Samuel* in loco; and cp. the very different names in 1 Ch. xi. 35. The LXX. regarded the name Ahasbai as denoting not the father but the family of Eliphelet. [W. A. W.] [F.]

AHASHVEROSH, mentioned in the margin of Ezra iv. 6 (A. V. and R. V.) as the Hebrew form of AHASUERUS. [F.]

AHASUERUS (אֲחָסְוֶרֶשׁ; 'Ασσοῦρος, LXX., but 'Ασούρος, Tob. xiv. 15, A. V.; *Asuerus*, Vulg.), the name of one Median and two Persian kings mentioned in the Old Testament. It may be desirable to prefix to this article a chronological table of the Medo-Persian kings from Cyaxares to Artaxerxes Longimanus, according to their ordinary classical names. The Scriptural names conjectured to correspond to them and ARTAXERXES are in some cases added in italics.

1. Cyaxares, king of Media, son of Phraortes, grandson of Deioces and conqueror of Nineveh, began to reign B.C. 634. *Ahasuerus*.

2. Astyages his son, last king of Media, B.C. 594.

3. Cyrus, son of his daughter Mandane and Cambyases, a Persian noble, first king of Persia, 559. *Cyrus*.

4. Cambyases his son, 529. *Ahasuerus*.

5. A Magian usurper, who personates Smerdis, the younger son of Cyrus, 521. *Artaxerxes*.

6. Darius Hystaspis, raised to the throne on the overthrow of the Magi, 521. *Darius*.

7. Xerxes, his son, 485. *Ahasuerus*.

8. Artaxerxes Longimanus (Macrocheir), his son, 465-495. *Artaxerxes*.

The name Ahasuerus or Achashverosh is, according to Schrader (*KAT*.² p. 375), written on the Persian inscriptions *Akhasjārshā*,—a name, according to *MV*.¹⁰, compounded from *akaja* = kingdom and *arshā* = eye (Burnouf). Schrader and *MV*.¹⁰ take A. to be the Hebrew form of the name Xerxes. It is written in Aramaic אֲחָשְׁוֶרֶשׁ (without *N* prosthetic, Schrader, *KAT*.² p. 815), on the beautiful stele of Sak-karah from Egypt, in his 4th year (see *Fac-similes of MSS. and Inscriptions*, Pl. lxiii. Palaeographical Soc., Oriental Series). Herod. (vi. 98) explains Xerxes to mean ἀπώϊος, a signification sufficiently near that of *king*.

1. In Dan. ix. 1, Ahasuerus is said to be the father of Darius the Mede. With many Cyaxares is a form of Ahasuerus, gricised into

Axares with the prefix Cy- or Kai-, common to the Kaianian dynasty of kings (Malcolm's *Persia*, ch. iii.), with which may be compared Kai Khosroo, the Persian name of Cyrus. The son of this Cyaxares was Astyages, and it has been conjectured that Darius the Mede was Astyages, set over Babylon as viceroy by his grandson Cyrus, and allowed to live there in royal state (see Rawlinson's *Herodotus*, vol. i. Essay iii. § 11). [DARIUS.] On this supposition Ahasuerus is Cyaxares, the conqueror of Nineveh. And in accordance with this view, we read in Tobit, xiv. 15, that Nineveh was taken by Nabuchodonosor (*i. e.* as crown-prince; see *Speaker's Commentary* on Tob. xiv. 4) and Assuerus, *i. e.* Cyaxares. This identification of Ahasuerus is not, however, universally admitted either in the passage of Dan. or of Tobit (see Schrader in Riehm's *HWB.* and Schultz in Herzog's *RE*.² a. n.), and in the opinion of many it is wisest to wait for further discovery or information.

2. In Ezra iv. 6, the enemies of the Jews, after the death of Cyrus, desirous to frustrate the building of Jerusalem, send accusations against them to Ahasuerus, king of Persia. Ewald thought that this king was Cambyases, arguing from v. 5 that the opposition to the Jews continued from the time of Cyrus to that of Darius, and that the Ahasuerus and Artaxerxes mentioned in vv. 6, 7 were names of Cambyases and the Pseudo-Smerdis, who reigned between them. This identification is also generally surrendered. Further, it is not necessary to consider the section Ezra iv. 6-23 episodic, or to preserve historical continuity by reading v. 24 immediately after v. 5 (see Sayce, *Introduction to Ezra*, &c., p. 22). The existing arrangement may very well stand, if vv. 6-23 be considered a summary statement of the principal relations between the enemies of the Jews and the Persian kings during the period extending beyond the days of Darius Hystaspis (cp. Bertheau-Ryssel,³ *Ezra*, *Nehemia*, u. *Ester*, p. 62; Oetli in Strack u. Zöckler's *Kgf. Komm.* to *Ezra*, p. 161). Ahasuerus is then identified with Xerxes (No. 7. Cp. Schrader and Schultz, *ll. c.*) and with the Ahasuerus next to be considered.

3. The third is the Ahasuerus of the Book of Esther. It is needless to give more than the heads of the well-known story. Having divorced his queen Vashti for refusing to appear in public at a banquet, he married four years afterwards the Jewess Esther, cousin and ward of Mordecai. Five years after this, Haman, one of his counsellors, having been alighted by Mordecai, prevailed upon the king to order the destruction of all the Jews in the empire. But before the day appointed for the massacre, Esther and Mordecai overthrew the influence which Haman had exercised, and so completely changed the king's feelings in the matter, that they induced him to put Haman to death, and to give the Jews the right of self-defence. This they used so vigorously that they killed several thousands of their opponents. Now from the extent assigned to the Persian empire (Esth. i. 1), "from India even unto Ethiopia," it is proved that Darius Hystaspis is the earliest possible king to whom this history can apply, and it is hardly worth while to consider the claims of any after Artaxerxes Longimanus. But Ahasuerus cannot be identical

with Darius, whose wives were the daughters of Cyrus and Otanes, and who alike in name and character differs from that foolish tyrant. Neither can he be Artaxerxes Longimanus, although, as Artaxerxes is a compound of Xerxes, there is less difficulty here as to the name. But is the first place the character of Artaxerxes, as given by Plutarch and by Diodorus (xi. 71), is also very unlike that of Ahasuerus. Besides this, in Ezra vii. 1-7, 11-26, Artaxerxes, in the seventh year of his reign, issues a decree very favourable to the Jews, and it is therefore unlikely that in the *twelfth* (Esth. iii. 7) Haman could speak to him of them as if he knew nothing about them, and persuade him to sentence them to an indiscriminate massacre. We are therefore led to the belief, now generally accepted, that Ahasuerus is Xerxes (the names being, as we have seen, identical); and this conclusion is fortified by the resemblance of character (cp. Herod. vii. 33, 37, ix. 107; Justin, ii. 12; Spiegel, *Iranische Alterthumskunde*, ii. 377, &c.), and by certain chronological indications. As Xerxes scourged the sea, and put to death the engineers of his bridge, because their work was injured by a storm, so Ahasuerus repudiated his queen Vashti because she would not violate the decorum of her sex, and ordered the massacre of the whole Jewish people to gratify the malice of Haman. In the third year of the reign of Xerxes was held an assembly to arrange the Grecian war (Herod. vii. 7 ff.); in the third year of Ahasuerus was held a great feast and assembly in Shushan the palace (Esth. i. 3). In the seventh year of his reign Xerxes returned defeated from Greece, and consoled himself by the pleasures of the harem (Herod. ix. 108); in the seventh year of his reign "fair young virgins were sought" for Ahasuerus, and he replaced Vashti by marrying Esther. The tribute he "laid upon the land and upon the isles of the sea" (Esth. x. 1) may well have been the result of the expenditure and ruin of the Grecian expedition. Throughout the Book of Esther in the LXX. Ἀρταξέρξης is written for Ahasuerus, but on this no argument of weight can be founded. [G. E. L. C.] [F.]

AHAVA (אָהַבָּה) in Ezra [2 Esd.] viii. 15, B. *Edel*, A. *Edel*; in Ezra viii. 21, A. *Aové*, B. *Θουέ*; in Ezra viii. 31, B. *Aové*, AB. *Θουέ* (*Ahava*), a place (Ezra viii. 15), or a river (יָרֵד, viii. 25), on the banks of which Ezra collected the second expedition which returned with him from Babylon to Jerusalem. Various have been the conjectures as to its locality: e.g. *Adiaba* (Leclerc and Mannert); *Aleb* or *Aveh* (Hävernick, see Winer); the Great Zab (Rosenmüller, *Bib. Geogr.*). But the latest researches are in favour of its being the modern *Hm*, on the Euphrates, due east of Damascus, the name of which is known to have been in the post-biblical times *Ihi*, or *Ihi dakra* (Talm. יְהִי דַקְרָא "the spring of bitumen." See Rawlinson's *Herodotus*, i. 316, note. In the apocryphal *Esdra* (1 Esd. viii. 41, 61) the name is given *Θεπας* [B. omits in v. 41]; *Tais*. Josephus (*Ant.* xi. 5, § 2) merely says *eis tē rēpar tou Euphratou*. [G.] [W.]

AHAZ (אֲחָז, *possessor*; perhaps an abbreviation or alteration of Jehoahaz, the Jahbazi of the inscriptions [Schrader, *KAT.* p. 263]: B. 'Αχὰς and 'Αχὰρ, A. 'Αχὰς and 'Αχὰδ; Joseph. Ἀχάζης:

Achaz, eleventh king of Judah and son of Jotham, ascended the throne in the twentieth year of his age, according to 2 K. xvi. 2. But this must be a transcriber's error for the twenty-fifth, which number is found in one Hebrew MS., the LXX. [Lucian; BA. have 20], the Peshito, and Arabic Version of 2 Ch. xxviii. 1; for otherwise his son Hezekiah was born when he was eleven years old (so Clinton, *Fasti Hell.*, vol. i. p. 318). At the time of his accession, Rezin, king of Damascus, and Pekah, king of Israel, had recently formed a league against Judah, and they proceeded to lay siege to Jerusalem, intending to place on the throne Ben Tabael, who was not a prince of the royal family of Judah, but probably a Syrian soldier of low origin (Gesenius). Upon this the great prophet Isaiah, full of zeal for God and patriotic loyalty to the house of David, hastened to give advice and encouragement to Ahaz, and it was probably owing to the spirit of energy and religious devotion which he poured into his counsels that the allies failed in their attack on Jerusalem. Thus much, together with anticipations of danger from the Assyrians, and a general picture of weakness and unfaithfulness both in the king and the people, we find in the famous prophecies of the 7th, 8th, and 9th chapters of Isaiah, in which he seeks to animate and support them by the promise of the Messiah. From 2 Ch. xxviii. we learn that the allies took a vast number of captives, who, however, were restored in virtue of the remonstrances of the prophet Oded; and from 2 K. xvi. that they also inflicted a most severe injury on Judah by the capture of Elath, a flourishing port on the Red Sea, in which, after expelling the Jews, they re-established the Edomites (according to Keri of 2 K. xvi. 6, אֲדוֹמִים [*Ἰδουμαῖοι* and Vulg.]. Further Ewald, Thienius, Stade, Edersheim, &c., conjecture אֲדוֹמִים for אֲרָמִים, who attacked and wasted the east part of Judah, while the Philistines invaded the west and south. The weak-minded and helpless Ahaz sought deliverance from these numerous troubles by appealing to Tiglath-pileser, king of Assyria, who freed him from his most formidable enemies by invading Syria, taking Damascus, killing Rezin, and depriving Israel of its Northern and Transjordanic districts. But Ahaz had to purchase this help at a costly price: he became tributary to Tiglath-pileser (so the inscriptions, in which Ahaz = Jahuhazi; see Schrader, *KAT.* p. 263), sent him all the treasures of the Temple and of his own palace, and even appeared before him in Damascus as a vassal. He also ventured to seek for safety in heathen ceremonies (2 K. xvi. 3, 4); making his son pass through the fire to Moloch, consulting wizards and necromancers (Is. viii. 19), sacrificing to the Syrian gods, introducing a foreign altar from Damascus, and probably the worship of the heavenly bodies from Assyria and Babylon, as he would seem to have set up the horses of the sun mentioned in 2 K. xxiii. 11 (cf. Tac. *Ann.* xii. 13); and "the altars on the top (or roof) of the upper chamber of Ahaz" (2 K. xxiii. 12) were connected with the Assyrian adoration of the stars. We see another and blameless result of this intercourse with an astronomical people in the "sundial of Ahaz," Is. xxxviii. 8. He died after a reign of sixteen years, lasting according to some B.C.

735-715, according to others B.C. 735 or 4-728. See CHRONOLOGY; Driver, *Isaiah, his Life and Times*, pp. 13, 14; Herzog, *RE. Zeitrechnung*, p. 477. [G. E. L. C.] [F.]

2. A son of Micah, the grandson of Jonathan through Meribbaal or Mephibosheth (1 Ch. viii. 35, 36 [B. *Zdk*, A. *Xad*], ix. 42 [B. *'Axd*, A. *Xad*]). [W. A. W.] [F.]

AHAZIAH (חֲזַקְיָהוּ, *whom Jeho- vah sustains*; B. *Ὀχοζίας*, A. *-i*; *Ochozias*). 1. Son of Ahab and Jezebel, and eighth king of Israel. After the battle of Ramoth in Gilead [AHAB] the Syrians had the command of the country along the east of Jordan, and they cut off all communication between the Israelites and Moabites, so that MESHIA, the vassal king of Moab, refused his yearly tribute of 100,000 lambs and 100,000 rams with their wool (2 K. iii. 4, 5; cp. Is. xvi. 1), and "rebelled against the king of Israel." [On the war between Israel and Moab, and the supplement to the Biblical account furnished by "the Moabite stone," see Sayce, *Fresh Light from the Ancient Monuments*, p. 76, &c.] Before Ahaziah could take measures for enforcing his claim, he was seriously injured by a fall through a lattice in his palace at Samaria. In his health he had worshipped his mother's gods, and now he sent to inquire of the oracle of Baalzebub in the Philistine city of Ekron whether he should recover his health. But Elijah, who now for the last time exercised the prophetic office, rebuked him for this impiety, and announced to him his approaching death. He reigned two years; the date being dependent upon that adopted for the death of AHAB. The only other recorded transaction of his reign, his endeavour to join the king of Judah in trading to Ophir, is more fitly related under JEHOSHAPHAT (1 K. xxii. 50 ff.; 2 K. i.; 2 Ch. xx. 35 ff.).

2. Fifth king of Judah, son of Jehoram and Athaliah, daughter of Ahab, and therefore nephew of the preceding Ahaziah. He is called Azariah (2 Ch. xxii. 6), probably by a copyist's error, and Jehoahaz (2 Ch. xxi. 17), which is the same name as Ahaziah, the two words of which they are compounded being reversed. Ewald (*Geschichte des Volkes Israel*, iii. p. 525) thinks that his name was changed to Ahaziah on his accession, but the LXX. read *Ὀχοζίας* for Jehoahaz, and with this agree the Peshito, Chald., and Arabic. So, too, while in 2 K. viii. 26 we read that he was 22 years old at his accession, we find in 2 Ch. xxii. 2 that his age at that time was 42. The former number is certainly right, as in 2 Ch. xxi. 5, 20, we see that his father Jehoram was 40 when he died, which would make him younger than his own son. The LXX. of 2 Ch. xxii. 2 reads 20. Ahaziah was an idolater; "walking in all the ways of the house of Ahab," and he allied himself with his uncle Jehoram, king of Israel, brother and successor of the preceding Ahaziah, against Hazael, the new king of Syria. The two kings were successful at Ramoth (cp. 2 K. ix. 14), though Jehoram was so severely wounded that he retired to his mother's palace at Jezreel to be healed. The union between the uncle and nephew was so close that there was great danger lest heathenism should entirely overspread both the Hebrew kingdoms, but this was prevented by the great revolution

carried out in Israel by Jehu under the guidance of Elisha, which involved the house of David in calamities only less severe than those which exterminated the house of Omri. It broke out while Ahaziah was visiting his uncle at Jezreel. As Jehu approached the town, Jehoram and Ahaziah went out to meet him, either from not suspecting his designs, or to prevent them. Jehu's arrow pierced the heart of the former. Ahaziah was pursued as far as the pass of Gur, near the city of Ibleam, and there mortally wounded. He died when he reached Megiddo. But in 2 Ch. xxii. 9 it is said that he was found hidden in Samaria after the death of Jehoram, brought to Jehu, and killed by his orders. Attempts to reconcile these accounts may be found in Pole's *Synopsis*; in Lightfoot's *Harm. of Old Test.* (in loc.); in Davidson's *Text of the Old Test.*, part ii. book ii. ch. xiv.; in Eidersheim, *Hist. of Judah and Israel*, vi. 201, and in the American edition of this work, where Dr. Hackett considers the two accounts to be at once fragmentary and supplementary. Ahaziah reigned one year, B.C. 884 (Klostermann, 875; Hommel, 842), called the 12th of Jehoram, king of Israel, 2 K. viii. 25; the 11th, 2 K. ix. 29. His father, therefore, must have died before the 11th year of Jehoram was concluded (Clinton, *Fasti Hell.*, i. p. 324). [G. E. L. C.] [F.]

AH'BAN (אֲבָנָן, meaning uncertain [Nestle, *Israelit. Eigennamen*, p. 187, n. 1], Ges.=brother of the prudent; B. *'AxaBdp*, A. *'Og*; *Ahoban*). Son of Abishur, by his wife Abihail (1 Ch. ii. 29). He was of the tribe of Judah. [W. A. W.] [F.]

A'HER (אֶחָד, *another*; B. *'Aep*, A. *'Adp*; *Aher*). Ancestor of Hushim, or rather "the Hushim," as the plural form seems to indicate a family rather than an individual. The name occurs in an obscure passage in the genealogy of Benjamin (1 Ch. vii. 12). Some translators consider it as not a proper name at all, and render it literally "another," because, as Rashi says, Ezra, who compiled the genealogy, was uncertain whether the families belonged to the tribe of Benjamin or not. It is not improbable that Aher and Ahiram (Num. xxvi. 38) are the same; unless the former belonged to the tribe of Dan, whose genealogy is omitted in 1 Ch. vii.: Hushim being a Danite as well as a Benjamite name. [W. A. W.] [F.]

AHI' (אֲחִי, *brother*; Ges. and Olshausen [Lehrb. p. 615] contracted from אֲחִינָח [cp. Renan, *Des Noms théophores apocopes* in 'Revue des Études Juives,' v. 169]). 1. A Gadite, chief of a family who lived in Gilead in Bashan (1 Ch. v. 15), in the days of Jotham, king of Judah. Some texts of the Greek Version and the Vulgate did not consider the word a proper name. Hence the reading ἀδελφοί, *T. frateres*. A. takes the last name of v. 14 (Ἰσὴ) and the first name of v. 15 (אֲחִי) of the Heb. text, and makes the name 'Αχιβούβ by reversing the Heb. order. The reading of B. Ζαβουχάμ is not so readily explained. 2. B. *'Axioud*, A. *'Axioudp*; *Ahi*. A descendant of Shamer, of the tribe of Asher (1 Ch. vii. 34). [W. A. W.] [F.]

AHI'AH. [ΑΗΙΑΗ.]

AHI'AM (ΑΗΙΑΜ, meaning obscure, Ol-

hansen, *Lehrb.* p. 620; Gesenina (*Theo.*) takes it in 2 Sam. as a wrong reading for אֲחִיָּהוּ, *father's brother*: 'Aurān in 2 Sam.; B. 'Aχελu, A. 'Aχιδu in 1 Ch.: *Ahiām*, son of Sharar the Hararite (or of Sacar, 1 Ch. xi. 35), one of David's thirty mighty men (2 Sam. xxiii. 33). [W. A. W.] [F.]

AHI'AN (אֲחִיָּאן, Ges. = *brotherly*, comparing Syr. [ܐܚܝܐ]; B. 'Iaaelu, A. 'Aelw; *Ahin*), a Manassite of the family of Shemida (1 Ch. vii. 12). [W. A. W.] [F.]

AHI'EZER (אֲחִיעֶזֶר, *brother of help*, or *my brother is help*: 'Aχιδep; *Ahiezer*). 1. Son of Ammishaddai, hereditary chieftain of the tribe of Dan under the administration of Moses (Num. i. 12; ii. 25; vii. 66, 71; x. 25). 2. The Benjamite chief of a body of archers at the time of David (1 Ch. xii. 3). [R. W. B.] [F.]

AHI'HUD (אֲחִיהוּד = *brother of majesty*, or *my brother is majesty*; B. 'Aχiwu, A. 'Aχiwuβ; *Ahihud*). 1. The son of Shelomi, and prince of the tribe of Asher, selected to assist Joshua and Eleazar in the division of the Promised Land (Num. xxxiv. 27). 2. אֲחִיהוּד, probably an error for אֲחִיעֶזֶר, cp. Olshausen, *Lehrb.* p. 615, MV.¹⁸ n. 3; B. 'Iaχeiχwλ, A. 'Iaχeiχwδ; *Ahiud*, a chief of the tribe of Benjamin (1 Ch. viii. 7). [R. W. B.] [F.]

AHIJAH, or **AHI'AH** (אֲחִיהָ, or אֲחִיָּה, *brother of Jah* [Ges.] or *my brother is Jah* [Olshausen, MV.¹⁹]. Cp. the Phoenician parallels in Nestle, *Israel. Eigennamen*, p. 186; Schroeder, *Phœnic. Gram.* p. 87: 'Aχid; *Achias*). 1. Son of Ahitub, Ichabod's brother, the son of Phinehas, the son of Eli (1 Sam. xiv. 3, 18). He was the Lord's priest in Shiloh: the ark of God was under his care, and he inquired of the Lord by means of it and the ephod (cp. 1 Ch. xiii. 3). There is, however, great difficulty in reconciling the statement (1 Sam. xiv. 18) that the ark was used for inquiring by Ahijah at Saul's bidding, and the statement that men inquired not at the ark in the days of Saul, if the latter expression be taken strictly. This difficulty is removed by the reading of LXX. B. τὸ ἐφόδιον, in 1 Sam. xiv. 18, instead of "the ark"; and most modern critics (cp. *Speaker's Comm.* l. c.) accept this reading in preference to that of the Hebrew. Josephus also notes that Saul bade the priest take (not the ark but) "the garments of his priesthood" and prophesy (*Antiq.* vi. 6, § 3). Others, however, still prefer to meet the difficulty by applying the expression "the days of Saul" only to all the latter years of the reign of Saul, when the priestly establishment was at Nob, and not at Kirjath-jearim or Beale of Judah, where the ark was. On this supposition the narrative in 1 Sam. xiv. may be taken as favourable to the mention of the ark. For it appears that Saul was at the time in Gibeah of Benjamin, and Gibeah of Benjamin seems to have been the place where the house of Abinadab was situated (2 Sam. vi. 3), being probably the Benjamite quarter of Kirjath-jearim, which lay on the very borders of Judah and Benjamin (see Josh. xviii. 14, 28). Whether it was the encroachments of the Philistines, or an incipient schism between the tribes of Benjamin and Judah, or any other cause, which led to the dis-

use of the ark during the later years of Saul's reign, is difficult to say. But probably the last time that Ahijah inquired of the Lord before the ark was on the occasion related 1 Sam. xiv. 36, when Saul marred his victory over the Philistines by his rash oath, which nearly cost Jonathan his life. For we there read that when Saul proposed a night-pursuit of the Philistines, the priest, Ahijah, said, "Let us draw near hither unto God;" for the purpose, namely, of asking counsel of God. But God returned no answer, in consequence, as it seems, of Saul's rash curse. If, as is commonly thought, and as seems most likely, Ahijah is the same person as Ahimelech the son of Ahitub, this failure to obtain an answer from the priest, followed as it was by a rising of the people to save Jonathan out of Saul's hands, may have led to an estrangement between the king and the high-priest, and predisposed him to suspect Ahimelech's loyalty, and to take that terrible revenge upon him for his favour to David. Such changes of name as Ahi-melech and Ahi-jah are not uncommon (see *Genealogies*, &c., pp. 115-118); or it is not impossible that, as Gesenius supposes, Ahimelech may have been brother to Ahijah.

2. B. 'Aχela, A. 'Aχia; *Achia*. Son of Bela (1 Ch. viii. 7); thought to be the same as Ahoah (1 Ch. viii. 4, B. 'Aχid, A. omits).

3. Son of Jerahmeel (1 Ch. ii. 25; LXX. ἀδελφὸς αὐτοῦ; *Achia*).

4. *Ahia*. One of David's mighty men, a Pelonite (1 Ch. xi. 36).

5. LXX. ἀδελφὸς αὐτῶν; *Ahias*. A Levite in David's reign who was over the treasures of the house of God, and over the treasures of the dedicated things (1 Ch. xxvi. 20).

6. *Ahia*. One of Solomon's princes, brother of Elihoreph, and son of Shisha (1 K. iv. 3).

7. *Ahias*. A Prophet of Shiloh (1 K. xiv. 2), hence called the Shilonite (xi. 29), in the days of Solomon and of Jeroboam king of Israel, of whom we have two remarkable prophecies extant: the one in 1 K. xi. 31-39, addressed to Jeroboam, announcing the rending of the ten tribes from Solomon, in punishment of his idolatries, and the transfer of the kingdom to Jeroboam: a prophecy which, though delivered privately, became known to Solomon, and excited his wrath against Jeroboam, who fled for his life into Egypt, to Shishak, and remained there till Solomon's death. The other prophecy, in 1 K. xiv. 6-16, was delivered in the Prophet's extreme old age to Jeroboam's wife, in which he foretold the death of Abijah, the king's son, who was sick, and to inquire concerning whom the queen had come in disguise. He then went on to denounce the destruction of Jeroboam's house on account of the images which he had set up, and to foretell the Captivity of Israel "beyond the river" Euphrates. These prophecies give us a high idea of the faithfulness and boldness of Ahijah, and of the eminent rank which he attained as a Prophet. Jeroboam's speech concerning him (1 K. xiv. 2, 3) shows the estimation in which he held him for his truthfulness and prophetic powers. In 2 Ch. ix. 29 reference is made to a record of the events of Solomon's reign contained in the "prophecy of Ahijah the Shilonite." If there were a larger work of Ahijah's, the passage in 1 K. xi. may be based upon it.

B. Ahias. Father of Baasha, king of Israel, the contemporary of Asa, king of Judah. He was of the tribe of Issachar (1 K. xv. 27, 33, xxi. 22; 2 K. ix. 9). [A. C. H.]

B. A.A. 'Ala, B. 'Apa; Echaia. One of the heads of the people who sealed the covenant with Nehemiah (Neh. x. 26). [W. A. W.] [F.]

AHIKAM (אֲחִיקָם, MV.¹⁰ = my brother up-lifts himself, or rises up; cp. Olshausen, *Lehrb.* p. 620: 'Αχικᾶμ, B. -ει-; Ahicim), a son of Shaphan the scribe, an influential officer at the court of Josiah (2 K. xxii. 12) and of Jehoikim his son (Jer. xxvi. 24). When Shaphan brought the book of the Law to Josiah, which Hilkiah the high-priest had found in the Temple, Ahikam was sent by the king, together with four other delegates, to consult Huldah the prophetess on the subject. In the reign of Jehoikim, when the priests and prophets arraigned Jeremiah before the princes of Judah on account of his bold denunciations of the national sins, Ahikam successfully used his influence to protect the Prophet. His son Gedaliah was made governor of Judah by Nebuchadnezzar, the Chaldean king, and to his charge Jeremiah was entrusted when released from prison (Jer. xxxix. 14, xl. 5). [R. W. B.] [F.]

AHIUD (אֲחִיזָכְיָה, meaning doubtful; according to Gesen. [Thec.] = brother of the born. The readings of the Greek texts are very varied. In 2 Sam. viii. 16, B. 'Αχιεύς, A. 'Αχιμέλεχ; in 2 Sam. xx. 24, 'Αχι[B-ει-]λοός; in 1 K. iv. 3, B. 'Αχιελίδς, A. 'Αχιμύς; in 1 Ch. xviii. 15, B. 'Αχιεύς, A. 'Αχιλοός: Ahilud. 1. Father of Jehoshaphat, the recorder or chronicler of the kingdom in the reigns of David and Solomon.

2. B. 'Αχιμύχ, A. 'Ελοός. The father of Baana, one of Solomon's twelve commissariat officers (1 K. iv. 12). It is uncertain whether he is the same as No. 1. [W. A. W.] [F.]

AHIMAAZ (אֲחִימָאז, Ges., from the Arabic, = brother of anger; A. 'Αχιμάς, B. 'Αχειμάς; Achimaas). 1. Father of Saul's wife, Ahinoam (1 Sam. xiv. 50).

2. B. 'Αχειμάς, A. 'Αχιμάς; Achimaas. Son of Zadok, the priest in David's reign. When David fled from Jerusalem on account of Absalom's rebellion, Zadok and Abiathar, accompanied by their sons, Ahimaaz and Jonathan, and the Levites, carried the ark of God forth, intending to accompany the king. But at his bidding they returned to the city, as did likewise Hushai the Archite (2 Sam. xv. 24, &c.). It was then arranged that Hushai should feign himself to be a friend of Absalom, and should tell Zadok and Abiathar whatever intelligence he could obtain in the palace. They, on their parts, were to forward the intelligence through Ahimaaz and Jonathan. Accordingly Jonathan and Ahimaaz stayed outside the walls of the city at En-rogel, on the road towards the plain (2 Sam. xvii. 17). A message soon came to them from Zadok and Abiathar through the maid-servant, to say that Ahithophel had counselled an immediate attack against David and his followers, and that, consequently, the king must cross the Jordan without the least delay. They started at once on their errand, but not without being suspected, for a lad seeing the maid speak to them, and seeing them immediately run off quickly—and Ahimaaz, we know,

was a practised runner—went and told Absalom, who ordered a hot pursuit. In the meantime, however, they had got as far as Bahurim, the very place where Shimei cursed David (2 Sam. xvi. 5), to the house of a steadfast partisan of David. Here the woman of the house effectually hid them in a well in the courtyard, and covered the well's mouth with ground or bruised corn. Absalom's servants coming up searched for them in vain; and as soon as they had gone and returned on the road to Jerusalem, Ahimaaz and Jonathan hastened on to David, and told him Ahithophel's counsel, and David with his whole company crossed the Jordan that very night. Ahithophel was so mortified at seeing the failure of his scheme, through the unwise delay in executing it, that he went home and hanged himself. This signal service rendered to David, at the hazard of his life, by Ahimaaz, must have tended to ingratiate him with the king. We have a proof how highly he was esteemed by him, as well as an honourable testimony to his character, in the saying of David recorded in 2 Sam. xviii. 27. For when the watchman announced the approach of a messenger, and added, that his running was like the running of Ahimaaz, the son of Zadok, the king said, "He is a good man, and cometh with good tidings."

The same transaction gives us a very curious specimen of the manners of the times, and a singular instance of Oriental or Jewish craft in Ahimaaz. For we learn, first, that Ahimaaz was a professed runner—and a very swift one too—which one would hardly have expected in the son of the high-priest. It belongs, however, to a simple state of society that bodily powers of any kind should be highly valued, and exercised by the possessor of them in the most natural way. Ahimaaz was probably naturally swift, and so became famous for his running (2 Sam. xviii. 27). So we are told of Asahel, Joab's brother, that "he was as light of foot as a wild roe" (2 Sam. ii. 18). And that quick running was not deemed inconsistent with the utmost dignity and gravity of character appears from what we read of Elijah the Tishbite, that "he girded up his loins and ran before Ahab (who was in his chariot) to the entrance of Jezreel" (1 K. xviii. 46). The kings of Israel had running footmen to precede them when they went in their chariots (2 Sam. xv. 1; 1 K. i. 5), and their guards were called דָּוָרִים "runners." It appears by 2 Ch. xxx. 6, 10, that in Hezekiah's reign there was an establishment of running messengers, who were also called דָּוָרִים. The same name is given to the Persian posts in Esth. iii. 13, 15; viii. 14: though it appears from the latter passage that in the time of Xerxes the service was performed with mules and camels. The Greek name, borrowed from the Persian, was *ἄγγαροι*. As regards Ahimaaz's craftiness we read that, when Absalom was killed by Joab and his armour-bearers, Ahimaaz was very urgent with Joab to be employed as the messenger to run and carry the tidings to David. The politic Joab, well knowing the king's fond partiality for Absalom, and that the news of his death would be anything but good news to him, and apparently having a friendly feeling towards Ahimaaz, would not allow him

to be the bearer of such tidings, but employed Cushai instead. But after Cushai had started, Ahimaaz was so urgent with Joab to be allowed to run too that at length he extorted his consent. Taking a shorter or an easier way by the plain, he managed to outrun Cushai before he got in sight of the watch-tower, and, arriving first, he reported to the king the good news of the victory, suppressing his knowledge of Absalom's death, and leaving to Cushai the task of announcing it. He had thus the merit of bringing good tidings without the alloy of the disaster of the death of the king's son. This is the last we hear of Ahimaaz, for the Ahimaaz of 1 K. iv. 15, who was Solomon's captain in Naphtali, was certainly a different person (3). There is no evidence, beyond the assertion of Josephus, that Ahimaaz ever filled the office of high-priest; and Josephus may have concluded that he did, merely because, in the genealogy of the high-priests (1 Ch. vi. 8, 9), he intervenes between Zadok and Azariah. Judging only from 1 K. iv. 2, compared with 1 Ch. vi. 10, we should conclude that Ahimaaz died before his father Zadok, and that Zadok was succeeded by his grandson Azariah. Josephus's statement that Zadok was the first high-priest of Solomon's Temple, seeing the Temple was not finished till the eleventh year of his reign, is a highly improbable one in itself. The statement of the Seder Olam, which makes Ahimaaz high-priest in Rehoboam's reign, is still more so. It is safer, therefore, to follow the indications of the Scripture narrative, though somewhat obscured by the apparently corrupted passages, 1 K. iv. 4 and 1 Ch. vi. 9, 10, and conclude that Ahimaaz died before he attained the high-priesthood, leaving as his heir his son Azariah.

3. B. 'Axi (A. -i) Judas. Solomon's officer in Naphtali, charged with providing victuals for the king and his household for one month in the year. Probably of the tribe of Naphtali, he was the king's son-in-law, having married his daughter Basmath (1 K. iv. 7, 15). [A. C. H.]

AHIMAN (אִימָן), of doubtful meaning; perhaps [if Man be the name of a divinity] = brother of Man: in Num. F. 'Axiḡmān, B. 'Axiḡmān, A. 'Axiḡmān; in Judg. B. 'Axiḡmān, B. 'Axiḡmān, A. 'Axiḡmān; Achiman). 1. One of the three giant Anakim who inhabited Mount Hebron (Num. xiii. 22, 23), seen by Caleb and the spies. The whole race were cut off by Joshua (Josh. xi. 21), and the three brothers were slain by the tribe of Judah (Judg. i. 10).

[R. W. B.] [F.]

2. B. Axiḡmān, A. Axiḡmān; Ahimam. One of the porters or gate-keepers, who had charge of the king's gate for the "camps" of the sons of Levi (1 Ch. ix. 17).

[W. A. W.] [F.]

AHIMELECH (אִימֶלֶךְ, brother of the king; A. 'Axiḡmēlek, B. 'Axiḡmēlek; Achimelech). 1. Son of Ahitub (1 Sam. xxii. 12), and high-priest at Nob in the days of Saul. He gave David the shewbread and the sword of Goliath; and for so doing was, upon the accusation of Doeg the Edomite, put to death with his whole house by Saul's order. Eighty-five priests wearing an ephod were thus cruelly slaughtered; Abiathar alone escaped [ABIATHAR]. The LXX. reads *three hundred and five men*, thus affording another instance of the frequent clerical errors

in transcribing numbers of which Ezra li. compared with Neh. vii. is a remarkable example. The interchange of אִימֶלֶךְ, or אִימֶלֶךְ, with אִימֶלֶךְ and אִימֶלֶךְ, is very common. For the question of Ahimelech's identity with Ahijah, see AHIJAH. For the confusion between Ahimelech and Abiathar in the First Book of Chronicles (xxiv. 3, 6, 31), see ABIATHAR.

2. One of David's companions while he was persecuted by Saul, a Hittite; called in the B. of 1 Sam. xxvi. 6, 'Axiḡmēlek, and A. 'Axiḡmēlek (but B. 'Axiḡmēlek); which is perhaps the right reading, after the analogy of Ahimelech, king of Gerar. In the title of Ps. xxiv. אִימֶלֶךְ seems to be an error for אִימֶלֶךְ, due possibly to a lapsus of memory [S. R. D.]. See 1 Sam. xxi. 13 (R. 12 in A. V.; and AHIMELECH). [A. C. H.]

AHI'MOTH (אִימֹת, brother of death; B. 'Axiḡmōth, A. 'Oxiḡmōth; Achimoth), a Levite of the house of the Korhites, of the family of the Kohathites, apparently in the time of David (1 Ch. vi. 25 [LXX. r. 10]). In ver. 35, for Ahimoth we find Mahath (מַחַת), B. Māth, A. Māth (as in Luke iii. 26). For a collection of these genealogies, see *Genealogies of our Lord*, p. 214, note. [A. C. H.]

AHI'NADAB (אִינָדָב, Ges. = noble brother, MV.¹⁰ = my brother is noble; B. 'Axiḡnadab, A. Aivādāb; Ahinadab), son of Iddo, one of Solomon's twelve commissaries who supplied provisions for the royal household. The district entrusted to Ahinadab was that of Mahanaim, situated on the east of the Jordan (1 K. iv. 14). [R. W. B.] [F.]

AHI'NOAM (אִינוֹם, Ges. = brother of grace, MV.¹⁰ = my brother is grace; B. 'Axiḡnoam, A. 'Axiḡnoam; Achinoam). 1. Daughter of Ahimaaz and wife of Saul (1 Sam. xiv. 50).

2. B. 'Axiḡnoam (1 Sam. xxv. 43), -am (1 Sam. xxvii. 3; 1 Ch. iii. 1), -noam (1 Sam. xxx. 5; 2 Sam. iii. 2), 'Axiḡnoam (2 Sam. ii. 2); A. usually 'Axiḡnoam (in 2 Sam. ii. 2, same as B.); Achinoam. A woman of Jezreel. If the masculine sense given to the name (see Ges. above) be retained, a similar use is found in Abigail, father of joy. Ahinoam was married to David during his wandering life (1 Sam. xxv. 43), lived with him and his other wife Abigail at the court of Achish (xxvii. 3), was taken prisoner with her by the Amalekites when they plundered Ziklag (xxx. 5), but was rescued by David (18). She is again mentioned as living with him when king of Judah in Hebron (2 Sam. ii. 2), and as the mother of his eldest son Amnon (iii. 2; 1 Ch. iii. 1). [G. E. L. C.] [F.]

AHIO (אִיּוֹ; of ἀδελφός αὐτοῦ; Ahio, 2 Sam. vi. 3, 4; frater ejus, 1 Ch. xiii. 7). 1. One of the two sons of Abinadab who accompanied the ark when it was brought out of their father's house at Gibeah.

2. אִיּוֹ; B. ἀδελφός αὐτοῦ, A. of ἀδελφός αὐτοῦ; Ahio. A Benjamite, one of the sons of Beriah, who drove out the inhabitants of Gath (1 Ch. viii. 14).

3. A Benjamite, son of Jehiel, father or founder of Gibeon (1 Ch. viii. 31, ix. 37). In

both places B. has ἀδελφός, and A. (supported in the second by α) ἀδελφός. [W. A. W.] [F.]

AHI'RA (אֲחִירָא, Ges. = *brother of evil*, MV.¹⁰ = *my brother is evil*; AF. [usually] 'Αχιρά, B. -ει-; Ahira), chief of the tribe of Naphtali when Moses took the census in the year after the Exodus (Num. i. 15; ii. 29; vii. 78, 83; x. 27). [R. W. B.] [F.]

AHI'RAM (אֲחִירָאָם; MV.¹⁰ = *my brother is exalted* [cp. Olshausen, *Lehrb.* p. 620]; B. 'Ιαχεράμ, A. -ι-, F. 'Αχιρά; Ahiram), son of Benjamin (Num. xxvi. 38 [LXX. v. 42]), called Ehi in Gen. xlii. 21, Aharah in 1 Ch. viii. 1, perhaps the same as AHER. [W. A. W.] [F.]

AHI'RAMITES, THE (אֲחִירָאָמִיתַי; B. 'Ιαχεράμ, F. 'Αχιρά, A. 'Αχιρά; Ahiramites). One of the branches of the tribe of Benjamin, descendants of Ahiram (Num. xxvi. 38, LXX. v. 42). [W. A. W.] [F.]

AHI'SAMACH (אֲחִישָׁמַח, MV.¹⁰ = *my brother supports*; 'Αχισαμάχ; Achisamech). A Danite, father of Aholiab, one of the architects of the tabernacle (Ex. xxxi. 6; xxxv. 34 [AF. -αχ, B. -ακ]; xxxviii. 23 [LXX. xxxvii. 21, AF. -αχ, B. -ακ]). [W. A. W.] [F.]

AHI'SHAHAR (אֲחִישָׁהָר, Ges. = *brother of the dawn*, MV.¹⁰ and Olshausen = *my brother is the dawn*; B. 'Αχισσάαρ, A. 'Αχισσάαρ; Ahisahar). One of the sons of Bilhan, the grandson of Benjamin (1 Ch. vii. 10). [W. A. W.] [F.]

AHI'TOPHEL (אֲחִיתוֹפֶל, of uncertain meaning, apparently = *brother of folly* [Ges.]; A. 'Αχιδόφελ, B. -ει-, Joseph. 'Αχιδόφελος; Achitophel), a native of Giloh, in the hill-country of Judah (Josh. xv. 51), and privy councillor of David, whose wisdom was so highly esteemed that his advice had the authority of a divine oracle, though his name (according to Gesenius) had an exactly opposite signification (2 Sam. xvi. 23). He was the grandfather of Bathsheba (comp. 2 Sam. xi. 3 with xxiii. 34), and it was her fall which influenced him to join in the rebellion of Absalom. She is called daughter of Ammiel in 1 Ch. iii. 5; but אֲחִיתוֹפֶל

is probably only the anagram of אֲמִיֶּלֶם (see Klostermann, *Kgf. Komm.* in 2 Sam. xi. 3). Absalom as soon as he had revolted sent for him, and, when David heard that Ahitophel had joined the conspiracy, he prayed Jehovah to turn his counsel to foolishness (xv. 31), alluding possibly to the signification of his name. David's grief at the treachery of his confidential friend found expression in the Messianic prophecies (Ps. xli. 2; lv. 12-14).

In order to show to the people that the breach between Absalom and his father was irreparable, Ahitophel persuaded him to take possession of the royal harem (2 Sam. xvi. 21). David, in order to counteract his counsel, sent Hushai to Absalom. Ahitophel had recommended an immediate pursuit of David; but Hushai advised delay, his object being to send intelligence to David, and to give him time to collect his forces for a decisive engagement. When Ahitophel saw that Hushai's advice prevailed, he despaired of success, and returning to his own home "put his household in order and hung himself" (xvii.

1-23). This is the only case of suicide mentioned in the Old Testament (except in war), as that of Judas is the only case in the New Testament. The Talmud ranks him and Balaam together as instances of men whose "wisdom" not being "the gift of heaven" led them to destruction. (Hambürger, *RE.*, s. n.; Joseph. *Ant.* vii. 9, § 8; Niemeyer, *Charakt.* iv. 434; Ewald, *Geschich.* ii. 652.) [R. W. B.] [F.]

AHI'TUB (אֲחִיתוֹב, *brother of goodness*; B. 'Αχισάβ, A. -ι-, Achitob). 1. Father of Ahimelech, or Ahijah, son of Phinehas, and elder brother of Ichabod (1 Sam. xiv. 3; xxii. 9, 11), and therefore of the house of Eli and the family of Ithamar. There is no record of his high-priesthood, which, if he ever was high-priest, must have coincided with the early days of Samuel's judgeship.

2. B. 'Αχισάβ, A. -ι-. Son of Amariah, and father of Zadok the high-priest (1 Ch. vi. 7, 8; 2 Sam. viii. 17), of the house of Eleazar. From 1 Ch. ix. 11, where the genealogy of Azariah, the head of one of the priestly families that returned from Babylon with Zerubbabel, is traced, through Zadok, to "Ahitub, the ruler of the house of God," it appears tolerably certain that Ahitub was high-priest. And so the LXX. Version (B.) unequivocally renders it υἱὸς Ἀχισάβ ἡγουμένου οἴκου τοῦ Θεοῦ. The expression

יְיָ בֵּית־הַמִּזְבֵּחַ is applied to Azariah the high-priest in Hezekiah's reign, in 2 Ch. xxi. 13. The passage is repeated in Neh. xi. 11 [where the name has in the Greek texts several variant forms:—T. 'Αισάβ, B. 'Απυβόχ, A. Αισάβ], but the LXX. have spoilt the sense by rendering ἡν ἀνέστη, as if it were ἡν. If the line is correctly given in these two passages, Ahitub was not the father, but the grandfather of Zadok, his father being Meraioth. But in 1 Ch. vi. 8, and in Ezra vii. 2, Ahitab is represented as Zadok's father. This uncertainty makes it difficult to determine the exact time of Ahitub's high-priesthood. If he was father to Zadok, he must have been high-priest with Ahimelech. But if he was grandfather, his age would have coincided exactly with the other Ahitub, the son of Phinehas. Certainly a singular coincidence.

3. The genealogy of the high-priests in 1 Ch. vi. 11, 12, introduces another AHI'TUB, son of another Amariah, and father of another Zadok. At p. 287 of the *Genealogies*, &c., will be found reasons for believing that the second Ahitub and Zadok are spurious. [A. C. H.]

AH'LAB (אֲחִלָּב = *fat, fertile place*; Δαλάβ; Achalab), a city of Asher from which the Canaanites were not driven out (Judg. i. 31). Its omission from the list of the towns of Asher, in Josh. xix., has led to the suggestion (Bertheau on Judg.) that the name is but a corruption of Achahaph; but this appears extravagant. It is more probable that Ahlab reappears in later history as Gush Chaleb, גֻּשׁ חִלְבָּ

חִלְבָּ, or Giscala (Reland, 813, 817), a place lately identified by Robinson under the abbreviated name of *el-Fish*, near *Safed*, in the hill

* *El-Fish*, however, lies within the territory assigned to Naphtali.

country to the N.W. of the Sea of Galilee (Rob. ii. 446; iii. 73). Gush Chaleb was in Rabbinical times famous for its oil (see the citations in Reland, 817), and the old olive-trees still remain in the neighbourhood (Rob. iii. 72). From it came the famous John, son of Levi, the leader in the siege of Jerusalem (Jos. Vit. § 10; B. J. ii. 21, § 1), and it had a legendary celebrity as the birthplace of the parents of no less a person than the apostle Paul (Jerome, quoted by Reland, 813). [G.] [W.]

AHLAI (אֲחַלַי, of uncertain meaning; Ges. and Olshausen, *Lehrb.* p. 610, preserve for it the sense *utinam!* it has in Ps. cxix. 5: B. 'אחל, A. 'Achal; *Oholai*), daughter of Sheshan, whom he gave in marriage to his Egyptian slave Jarha (1 Ch. ii. 31, 35). In consequence of the failure to Sheshan of male issue, Ahlai became the foundress of an important branch of the family of the Jerahmeelites, and from her were descended Zabab, one of David's mighty men (1 Ch. xi. 41, B. 'אחל, A. 'Oal, N. 'Achal; *Oholi*), and Azariah, one of the captains of hundreds in the reign of Josiah (2 Ch. xxiii. 1; cp. 1 Ch. ii. 38). [W. A. W.] [F.]

AHO'AH (אֲחֹהַּ, in 1 Ch. viii. 7 the name is read אֲחִיָּה, Ahijah; 'אחל, A. omits; *Aho*), son of Bela, the son of Benjamin (1 Ch. viii. 4). The patronymic Ahohite (אֲחֹהִית, *Ahohites*) is found in 2 Sam. xxiii. 9 [T. 'אחל, *Ahohites*], 28 [B. 'אחל, A. 'Eloheites]; 1 Ch. xi. 12 [B. 'אחל, N. 'Ahoel, A. 'Ahoel, B. 'Ahoel, N. 'Ahoel, A. 'Ahoel]; xxvii. 4 [T. B. 'אחל, A. 'Ahoel]. [EHL.] [W. A. W.] [F.]

AHO'HITE. [AHOAH.]

AHOLAH (אֲחֹלָה, *tent*; T. 'Oolā, B. 'Oolā, A. 'Oolā; *Oolla*; R. V. *Oholah*), a harlot, used by Ezekiel as the symbol of Samaria (Ezek. xxiii. 4, 5, 36, 44). [W. A. W.] [F.]

AHOLI'AB (אֲחֹלִיָּאב, MV.¹⁰ = *tent or family of the father*; 'Eliab; *Ooliab*; R. V. *Oholiab*), a Danite of great skill as a weaver and embroiderer, whom Moses appointed with Bezaleel to erect the tabernacle (Ex. xxxi. 6, xxxv. 30-35, xxxvi. 1, 2, xxxviii. 22, 23). [W. A. W.] [F.]

AHOLI'BAH (אֲחֹלִיבָה, MV.¹⁰ = *she in whom is my tent*, for בָּהּ; First compares בָּהּ, *Behab*; T. 'Oolā, A. 'Oolā; B. sometimes 'Ool-, sometimes 'Ool-; *Ooliba*; R. V. *Oholiba*), a harlot, used by Ezekiel as the symbol of Jerusalem (Ezek. xxiii. 4, 11, 22, 36, 44). [W. A. W.] [F.]

AHOLI-BA'MAH (אֲחֹלִיבָמָה, MV.¹⁰ = *tent of the high place*; *Oolibama*; R. V. *Oholibama*), one (probably the second) of the three wives of Esau. She was the daughter of ANAH, a descendant of Seir the Horite (Gen. xxxvi. 2, A. 'Ooliba, E. 'Ooliba; v. 25, E. 'Ooliba). It is doubtless through this connexion of Esau with the original inhabitants of Mount Seir that we are to trace the subsequent occupation of that territory by him and his descendants, and it is remarkable that each of his three sons by this wife is himself the head of a tribe, whilst all the tribes of the Edomites sprung from his other two wives are founded by

his grandsons (Gen. xxxvi. 15-19 [v. 18, A. 'Ooliba and 'Eli-, D. 'Ooliba and 'Eli-, B. 'Ooliba, E. [second time] 'Ooliba]). In the earlier narrative (Gen. xvi. 34) Aholibamah is called JUDITH, daughter of Beeri, the Hittite. The explanation of the change in the name of the woman seems to be that her proper personal name was Judith, and that Aholibamah was the name which she received as the wife of Esau and foundress of three tribes of his descendants; she is therefore in the narrative called by the first name, whilst in the genealogical table of the Edomites she appears under the second (see Delitzsch, *Genesis*, p. 429 [1887]). This explanation is confirmed by the recurrence of the name Aholibamah in the concluding list of the genealogical table (Gen. xxxvi. 40-43 [v. 41, A. 'Eli-, D. 'Eli-, B. 'Eli-, E. 'Eli-]), which, with Hengstenberg (*Die Authentizität d. Pent.* ii. 279; Eng. trans. ii. 228), Tuch (*Komm. üb. d. Gen.* 493), Knobel (*Genes.* p. 258), Dillmann and Delitzsch, we must regard as a list of names of places and not of persons, as indeed is expressly said at the close of it: "These are the chiefs (heads of tribes) of Esau, according to their settlements in the land of their possession." The district which received the name of Esau's wife, or perhaps rather from which she received her married name, was no doubt (as the name itself indicates) situated in the heights of the mountains of Edom, probably therefore in the neighbourhood of Mount Hor and Petra, though Knobel places it south of Petra, having been misled by Burckhardt's name *Hesma*, which however, according to Robinson (ii. 155), is "a sandy tract with mountains around it . . . but not itself a mountain, as reported by Burckhardt." It seems not unlikely that the three tribes descended from Aholibamah, or at least two of them, possessed this district, since there are enumerated only eleven districts, whereas the number of tribes is thirteen, exclusive of that of Korah, whose name occurs twice, and which we may further conjecture emigrated (in part at least) from the district of Aholibamah, and became associated with the tribes descended from Eliphaz, Esau's first-born son.

It is to be observed that each of the wives of Esau is mentioned by a name in the genealogical table different from that which occurs in the history. See BASHEMATH. With respect to the name and race of the father of Aholibamah, see ANAH and BEERI. [F. W. G.] [F.]

AHU'MAI (אֲחֻמַּי; B. 'Ahoel, A. 'Ahoel; *Ahumai*), son of Jahath, a descendant of Judah, and head of one of the families of Zorathites (1 Ch. iv. 2). [W. A. W.]

AHUZZATH (אֲחֻזָּת, *possession*, but (?) a Philistine name; A. 'Ochozath, D. 'Ach [in Gen. xvi. 26]; *Ochozath*), one of the friends of the Philistine king Abimelech who accompanied him at his interview with Isaac (Gen. xvi. 26). In the LXX. the epithet ὁ φίλος (R. V. "his friend") is rendered ὁ συμπατριώτης αὐτοῦ = *pronubus*, or bridesman (cp. Jud. xiv. 20, LXX. A.), and his name is inserted in xxi. 22, 32. St. Jerome (*Quaest. in Gen.*) and the Targum render "ח" N by "a company of friends," a sense which "N does not possess. For the termination "-ath" to Philistine masc. names, cp. Goliath

-ath (the old fem.) is common in Canaanitish, Aramaic, and Arabic names, even of men: cp. Genubath (1 K. xi. 20. See Driver, *Hebr. Tenses*,² p. 261; Euting, *Nabat. Inschriften*, pp. 73, 90-92; e.g. *הרתת* = Aretas). [R. W. B.] [F.]

AI (אִי = *heap of ruins*, Ges.). 1. (always with the def. article, אִי [see Gen. xii. 8, in A. V.]; 'Ayyal [Gen. and Is. x. 28], 'Aī [in Josh.], 'Aīa [in Ezra], T.' 'Aī, NB. 'Aīa [Neh. vii. 32], 'Aīa [Neh. xi. 31]; Jos. *Ant.* v. 1, 2, 'Aīa [Dind. 'Ayya]: *Hai*), a royal city (cp. Josh. viii. 23, 29; x. 1; xii. 9) of Canaan, already existing in the time of Abraham (Gen. xii. 8) [HAI]. It was east of and "beside" Bethel (Gen. xii. 8; Josh. vii. 2, xii. 9); on the south side of a valley (Josh. viii. 11); "beside" Bethaven (Josh. vii. 2); a valley or place where 5,000 men could be concealed lay between it and Bethel (Josh. viii. 9, 12), and it was apparently more closely connected with Bethel than with Michmash (Ezra ii. 28; Neh. vii. 32.) It was the second city taken by Israel after their passage of the Jordan, and was "utterly destroyed" (Josh. vii. 3-5; viii. 1-3, 10-12, 14, 16-18, 20, 21, 23-26, 28, 29; ix. 3; x. 1, 2; xii. 9: see Stanley, *S. & P.* p. 202). However, if Aiath be Ai—and from its mention with Migron and Michmash, it is at least probable that it was so—the name was still attached to the locality at the time of Sennacherib's march on Jerusalem (Is. x. 28). [AIATH.] At any rate, the "men of Bethel and Ai," to the number of two hundred and twenty-three, returned from the Captivity with Zerubbabel (Ezra ii. 28; Neh. vii. 32, "one hundred and twenty-three" only); and when the Benjamites again took possession of their towns, "Michmash, Aija, and Bethel, with their 'daughters,'" are among the places named (Neh. xi. 31). [AIJA.]

Ensebius remarks (*OS.* p. 233, 59, 'Ayyal) that though Bethel remained, Ai was a *τοπος ἔρημος, αὐτὸ μόνον δεικνύται*: but even that cannot now be said, and no attempt has yet succeeded in definitely fixing the site of the city which Joshua doomed to be a "heap and a desolation for ever." It is now probably *et-Tell*, a conspicuous mound, covered with heaps of stones and ruins, 1½ miles E.S.E. of Bethel, on the south side of *W. Muhcisin*, "the valley of the fortifications." Compare Josh. viii. 28, where the Hebrew has *תל*, "Tell," for heap, an unusual word which only occurs in four other passages of the Bible. Between *Beilin* (Bethel) and *et-Tell* the ruins of a church on the brow of a hill, whence there is a commanding view of the Jordan valley north of the Dead Sea, possibly mark the site of the altar built by Abram (Gen. xii. 8. See *PFQy. Stat.* 1869, pp. 123-6, and 1874, pp. 62-4). M. Ganneau and Major Conder identify Ai with *Kh. Haiyân*, near *Dair Dirân*, 2½ miles S.E. of Bethel, but the position and topographical features are not so closely in accordance with the Bible narrative as those of *et-Tell*; see, however, Major Conder in *Tent Work in Palestine*, ii. 108-9. Ai has also been identified by Krafft and Capt. Kitchener with *Kh. el-Haiyeh*, "ruin of the snake," south-east of *Mikhmas* (Michmash), but this position is too remote from Bethel; and the same remark applies to *Kh. Dâr Haiyeh* to the south of *W. Suweinîl*. An Ai

occurs in the Geographical Lists of the Temple of Karnak in Upper Egypt, but this would appear to have been in Northern Palestine. It is the opinion of some that the words Avim (אִימ) in Josh. xviii. 23, and Gaza (גָּזָא) in 1 Ch. vii. 28, are corruptions of Ai. [AVIM; AZZAH.]

2. 'A; T.' 'Aī, NA. Kal, B. omits; *Hai*. A city of the Ammonites, apparently attached to Heshbon (Jer. xlix. 3, LXX. xxx. 3). [G.] [W.]

AI'AH (אִיאָה, *culture*; B. 'Aīθ, A. Aīd; Aīa). 1. Son of Zibeon, a descendant of Seir, and ancestor of one of the wives of Esau (1 Ch. i. 40), called in Gen. xxxvi. 24 AIAH [A. 'Aīe, E. Nale]. He probably died before his father, as the succession fell to his brother ANAH.

2. Father of Rizpah, the concubine of Saul (2 Sam. iii. 7; xxi. 8, 10, 11). In 2 Sam. iii. 7 B. gives the name as 'Idā (B*. 'Idā), A. as 'Idā; in 2 Sam. xxi. 8, B. reads 'Aīd. [W. A. W.] [F.]

AI'ATH (אִיאָת, fem. of 'Aī, Ai; *elr thn pōlur* 'Ayyal; *Aiath*), a place named by Isaiah (x. 28) with Migron and Michmash. Probably the same as Ai. [AI; AIJA.] [G.] [W.]

AIJA (אִיאָה; om. NA., N. 'Aīa; *Hai*), like Aiath, probably a variation of the name Ai. The name is mentioned with Michmash and Bethel (Neh. xi. 31). [AI.] [G.] [W.]

AIJALON (אִיְיָלֹן, "place of deer* or gazelles," MV.¹⁰ s. n., Stanley, p. 208, note; *Ajalon*). 1. A city of the Kohathites (Josh. xxi. 24, B. Aīlōn, A. 'Ialōn; 1 Ch. vi. 69, B. 'Eyalām, A. 'Hilōn; *Helon*), originally allotted to the tribe of Dan (Josh. xix. 42, B. 'Ammōn, A. 'Iaalōn; A. V. "Ajalon"), which tribe, however, was unable to dispossess the Amorites of the place (Judg. i. 35 [LXX. paraphrases]). Ajalon was one of the towns fortified by Rehoboam (2 Ch. xi. 10, B. 'Alōn, A. Aīlōn) during his conflicts with the new kingdom of Ephraim (1 K. xiv. 30), and the last we hear of it is as being in the hands of the Philistines (2 Ch. xxviii. 18, B. Aīlō, A. Aīlōn, A. V. "Ajalon").

Being on the very frontier of the two kingdoms, we can understand how Ajalon should be spoken of sometimes (1 Ch. vi. 69, comp. with r. 66) as in Ephraim,^b and sometimes (2 Ch. xi. 10; 1 Sam. xiv. 31 [LXX. omits]) as in Judah and Benjamin.

The name is most familiar to us from its mention in the celebrated speech of Joshua during his pursuit of the Canaanites (Josh. x. 12, Aīlōn, "valley (Pōl) of Ajalon"; see Stanley, p. 210). There is no doubt that the town has been discovered by Dr. Robinson in the modern *Yālo*,^c a little to the N. of the Jaffa road, about 14 miles out of Jerusalem. It stands on the side of a long hill which forms

* The part of the country in which Ajalon was situated—the western slopes of the main central tableland leading down to the plain of Sharon—must, if the derivation of the names of its towns is to be trusted, have abounded in animals. Besides Ajalon (deer), here lay Shaalim (foxes or jackals), and not far off the valley of Zebolm (hyaenas). See Stanley, p. 162, note.

^b Perhaps this may suggest an explanation of the allusion to the "house of Joseph" in the difficult passage, Judg. i. 34, 35.

^c 'Ialō, in Epiphanius; see Reland, p. 553.

the southern boundary of a fine valley of corn-fields, which valley now bears the name of the *Merj Ibn 'Amir*, but which there seems no reason for doubting was the valley of Aijalon which witnessed the defeat of the Canaanites (Rom. ii. 253, iii. 145).

2. אֵילֶן; A. אֵילֶן. A place in Zebulun, mentioned as the burial-place of Elon (אֵילֶן),⁴ one of the Judges (Judg. xii. 12). It may also have been his birthplace and originally called after him. [ELON, 3.] It may possibly be אֵילֶן, *Jaffin*, E. of Acre. [G.] [W.]

AIJELETH SHAHAR, or rather *Ayyeleth Hashshachar* (Aurora*), stands in the Hebrew text as part of the first, i.e. introductory, verse of Ps. xxiii. These two words being nowhere else found together in the Bible, are somewhat difficult to explain, both as regards their meaning and their application. Whilst some of the translators are agreed as to the literal meaning of these words, scarcely two commentators agree as to their literary application. Rashi⁵ leaves us the choice between *Ayyeleth Hashshachar* being either the name of a musical instrument, or the allegorical name of the Congregation of Israel.⁶ This latter application is taken from the Midrash,⁷ and is accepted by Kimchi.⁸ Ibn 'Ezra,⁹ while justly rejecting this meaning, takes *Ayyeleth Hashshachar* as the commencement of a poem, which, together with its tune (though now lost), was so well known (before and during the existence of the Temple), that these mere two words were a sufficient indication to the leader of the music-band how to execute the whole Psalm. It is but just to say that to this explanation Ibn 'Ezra adheres almost consistently throughout the whole Psalter, whenever the superscriptions thereof are concerned [GITTITH]. This view of Ibn 'Ezra has been received with great favour by most of the modern translators and commentators. It would, indeed, be very acceptable were it not lacking in one point—*truth*. Moreover, it is not only not true, but cannot be true, as it rests on a gross anachronism. That such is the case can be proved both negatively and positively. In the first place, there is not the

slightest evidence that such a custom of giving the first word or two for a whole poem and its melody ever obtained in early Christian, not to say in pre-Christian, times.¹⁰ We know, moreover, for a fact where this custom originated, and approximately when. Singularly enough, the man who has furnished us with this piece of information is Ibn 'Ezra himself. On Ps. vii. 1 (superscription) he tells us: "Set to *Dibere Akush*. As the writers of *Sepharad* (the Iberian peninsula) at the top of the poems noted down a poem, the melody of which is (well) known" כְּמוֹ שְׁנוֹתָיו כֹּתְבֵי סֵפֶר הַפְּיוּטִין יִתְּבוּ

לְמַעַל בְּתַחֲלַת טוֹר הַפְּיוּטִים טַעַם [וְנוֹעַם]. פְּיוּטִין. Now, Ibn 'Ezra does not tell us whether he means by "the writers of *Sepharad*" simply Jewish poets, or Jewish liturgical authors, or Christian or Mohammedan poets, or, finally, mere copyists. We will give him, however, the benefit of the doubt, and assume that he meant either Jewish poets who had learnt versification from the Arabs of Spain, or those Arabs themselves. The former supposition is the more probable one. Ibn 'Ezra lived into the second half of the 12th century; and although born in Arabic-speaking Spain, had travelled much abroad, and seen "the lands of many lords" (Italy, France, Provence, England, &c.), where Christians, laymen as well as ecclesiastics, were in the habit of writing poetry "set to" popular tunes. Had he not meant, therefore, by "the writers of *Sepharad*," either the Jews who had learnt from the Arabs, or those Arabs themselves, he would scarcely have used that peculiar expression. Now, the earliest Arabs of Spain who wrote metrically lived at the very least full a thousand years later than the time when the latest Psalm received its superscription. Again, when we look into the practice obtaining among later Jews of having a poem "set to" a well-known melody, we find that neither the Sepharadim nor the Ashkenazim employ for that practice the word 'Al (עַל). The former use the terms *Leno'am* (לְנוֹעַם) or *Lechen* (לֶחֶן), whilst the latter employ the word *Beniggun* (בְּנִיגּוּן). Ibn 'Ezra's theory, that 'Al *Ayyeleth Hashshachar* signified "Set to the tune of a poem beginning *Ayyeleth Hashshachar*," must therefore be absolutely rejected as an anachronism.

But how came so keen-witted a scholar as Ibn 'Ezra unquestionably was, to fall into such a gross mistake? This may be easily explained. It has been clearly shown by Ewald,¹¹ and by

s It is true that some writers (Gesenius, Fürst, &c.) have even gone so far as to maintain that a somewhat similar lustrance is to be found in the Bible itself, and that the word *qasheth* (קָשֶׁת) in 2 Sam. i. 18 refers to the word *qesheth* (קֶשֶׁת), which is to be found in v. 22. With the same reason, and a much better one, as the word *qasheth* (קָשֶׁת) there stands at the beginning of a verse, we might say that it refers to 1 Sam. ii. 4. But this, surely, would be a gross absurdity. As regards the "proof" which Gesenius brings from the Quran, we can only say that it is worse than a mere anachronism.

¹¹ *Die poetischen Bücher des Alten Bundes* (Gütingen, 1839, 8vo, i. p. 175).

* It will be observed that the two words אֵילֶן and אֵילֶן differ only in their vowel-points.

⁴ *Shocher Tob* (i.e. Midrash Tehillim, or *Tillim*), xxi.; Midrash *Chazitha* (on Cant. vi. 10); Talmud Yerushalmi *Berachoth*, i. 1; *Taamei*, iii. 2.

⁵ This greatest of mediæval Rabbis flourished at Troyes, Champagne, from 1048 to 1105. See Schiller-Schneury, art. "Rashi," *Encyclopaedia Britannica*, vol. xx.

⁶ Rashi's statement that the Rabbis applied this Psalm to Esther is given by him without any further remark. It is evident by his silence that he does not quite see the cogency of this application.

⁷ *Shocher Tob*, in loco.

⁸ This prince of commentators was born after 1155, died about 1235 at Narbonne. See Schiller-Schneury, art. "Kimchi," *Encyclopaedia Britannica*, vol. xiv.

⁹ Abraham Ibn 'Ezra was born at Toledo after 1090, died at Rome (?) after 1165. He was versed in all branches of literature and science known in his time. He wrote most learnedly on philosophy and theology, and it may safely be said of him, *Nihil tetigit quod non ornavit*; but he believed, alas! also in astrology, on which we have several books by him.

others both before¹ and after² him, though not with sufficient consistency, that no word or words signifying an instrument or instruments can be preceded by 'Al, as the Hebrews did not speak of playing "upon" ('Al), but "with" or "by means of" (= Be or = Bi). Ewald and his predecessor, however, were by no means the first to find out this fact: it must have been well known to Ibn 'Ezra, who no doubt rejected, on account of that fact, the "instrument-of-music" theory, though he only did so silently. The theory, that a word or words succeeding 'Al in superscriptions signified a "music-band," applied practically by Rab Se'adyah Gaon to Ps. viii. 1, was not only not rejected by Ibn 'Ezra, but even received with some favour. He, no doubt, would have consistently adhered to this rational theory, had not the superscriptions of Ps. liii. 1, lxi. 1, and lxxxviii. 1 presented, as it appeared to him, an insuperable difficulty. He gives us an insight into his thoughts concerning this matter in his commentary on Ps. lxi. 1 and lxxxviii. 1 (and silently also on Ps. liii. 1). He tells us that the *Pattach* under the last syllable of *Neginath* (נְגִינָת) and *Machalath* (מַחְלָת) (being common nouns, as he believed) pointed to a construct state (*status constructus*); but since the genitive of this construction was missing, this omission, in its turn, could only point to one thing, viz. that this was the first word of a poem, the tune of which was well known at the time while the Temple stood. Now, in reality, Ibn 'Ezra argues here in a circle (*circulus vitiosus*), as *Machalath* need not be a common, but may be a proper, noun; in the latter case it is found with a *Pattach*, without a genitive following (cf. Gen. xviii. 9; 2 Ch. xi. 18). If we may appeal to analogy, such is also the case with *Neginath*, when a proper noun.

To resume: (1) The "instrument-of-music" theory must be abandoned. That part of it which identifies *Ayyeleth Hashshachar* with a "morning-flute" is so gross an absurdity that it needs no further refutation. (2) The "commencement-of-a-poem" theory must also be rejected, as resting not merely on an anachronism, but also as originating in an argument which moves in a circle.

What, then, is the meaning of *Ayyeleth Hashshachar*? It is the name of a music-band, as the learned Calmet,³ in his commentary on this Psalm (which with him, as with the Septuagint, is Ps. xxi.), already suggests, although he was not aware of all the reasons why it was so called. Now, there can be little doubt that this band had its seat in *Ayyalon* (Aijalon or Ajalon), and that it was its duty Levitically to assist in the morning sacrifice and service. Hence *Ayyeleth Hashshachar*. This theory fits in well with the Targumic phrase "the perpetual morning sacrifice" (קורבן תרומה וקריאתה), which expresses in part an old tradition. [S.-S.]

AIN (עַיִן), an eye, and also, in the simple but vivid imagery of the East, a spring or natural burst of living water, always distinguished from the well or tank of artificial formation, which is designated by the words *Bêr* (בֵּר) and *Bor* (בּוֹר and בּוֹר). Ain still retains its

ancient and double meaning in Arabic, عَيْن. Such living springs abound in Palestine even more than in other mountainous districts, and, apart from their natural value in a hot climate, form one of the most remarkable features of the country. Stanley (*S. and P.* 147, 509) has called attention to the accurate and persistent use of the word in the original text of the Bible, and has well expressed the inconvenience arising from the confusion in the A.V. of words and things so radically distinct as *Ain* and *Beer*. "The importance of distinguishing between the two is illustrated by Ex. xv. 27, in which the word 'Ainoth (A. V. 'wells,' R. V. 'springs') is used for the springs of fresh water at Elim, although the rocky soil of that place excludes the supposition of dug wells." [FOUNTAIN.]

Ain oftenest occurs in combination with other words, forming the names of definite localities: these will be found under En, as En-gedi, Engannim, &c. It occurs alone in two cases:—

1. With the def. article, הַעֵין. One of the landmarks on the eastern boundary of Palestine as described by Moses (Num. xxxiv. 11), and apparently mentioned, if the rendering of the A.V. and R. V. be accurate, to define the position of Riblah, viz. "on the east side of 'the spring'" (LXX. ἐπὶ ἄκρας). By Jerome, in the Vulgate, it is rendered *contra fontem Daphnim*, meaning the spring which rose in the celebrated grove of Daphne, dedicated to Apollo and Diana at Antioch.⁴ But Riblah having been lately, with much probability, identified (Rob. iii. 542-6; Porter, ii. 335) with a place of the same name on the east bank of the Orontes between *Ba'ulbet* and *Homs*, "the spring" of the text must in the present state of our knowledge be taken to be 'Ain el-'Asy, the main source of the Orontes; a spring remarkable, even among the springs of Palestine, for its force and magnitude. The objections to this identification are the distance from *Riblah*—about 9 miles; and the direction—nearer N.E. than E. (see Rob. iii. 534; Porter, ii. 335-6, 358). Not far from 'Ain el-'Asy is the remarkable monument of *Kamû'a el-Hermil*, perhaps the most conspicuous landmark in Syria, and some distance to the south is the modern village of el-'Ain. [RIBLAH; HAMATH.]

2. One of the southernmost cities of Judah (Josh. xv. 32, *Aen*), afterwards allotted to Simeon (Josh. xix. 7, *Ain*; 1 Ch. iv. 32, *A* omits, A.

* That this, and not the spring identified at *Difneh*, near the source of the Jordan at *Tel el-Kady* (Rob. iii. 393; Ritter, *Jordan*, 215), is the Daphne referred to in the Vulgate, is clear from the quotations from Jerome given in Reland (*Pal.*, cap. xxv. p. 120). In the Targums of Jerusalem and Ps.-Jonathan Riblah is rendered by Daphne, and Ain by 'Invatha (עֵינֵינְוָתָה). Schwarz (29) would place Ain at "Ein-al-Malecha": to be consistent with which, he is driven to assume that the Daphne near Panias had also the name of Riblah.

^b After enumerating the "cities" (עָרִים) of Simeon, the text proceeds, "and their villages" (חֲצֵרֵיהֶם) were

¹ The late I. H. Kohn, Hebrew Master at the Imperial Royal Normal School of Old Buda, whose pupil the writer of this article was in 1830-32.

² H. P. Rée, *Forschungen über die Ueberschriften der Psalmen* (Leipzig, 1846, sm. 8vo, p. 2, n. 2, seqq.). This little book, if used with caution, will prove valuable in many respects.

³ Calmet was a French Benedictine of great distinction. He flourished from 1672 to 1757.

Hz, Azn) and given to the priests (Josh. xxi. 16, B. 'Aza, A. 'Aiz; *Ain*). In the list of priests' cities in 1 Ch. vi. 59 ([Heb. r. 44], B. 'Aaz, A. 'Aard; *Asan*) Ashan (אֲשָׁן) takes the place of *Ain*; they were, however, different places as they are mentioned together in Josh. xix. 7 and 1 Ch. iv. 32. [ASHAN.] The name may possibly be retained in the W. cl. *Ain*, which rises in the heart of *Jebel Magrah* at the southern extremity of Palestine.

In Neh. xi. 29 (T. and Vulg. omit, *א. 3* *זר* *פּעמון*) *Ain* is joined to the name which in the other passages usually follows it, and appears as *En-rimmon*. So the LXX. B. in Josh. xv. 32 gives the name as 'Ερωμόν (A. *Πεμμών*; *En*), and in Josh. xix. 7 as 'Ερεμμών (A. 'Ain; *rai* P.; *Ain*). [EN-RIMMON.] (See Rob. ii. 204.) [G.] [W.]

AIR (אֵיר). In Eph. ii. 2 Satan is called "the prince of the power of the air," "the spirit that worketh in the sons of disobedience" (R. V.). Whether or not "air" be taken, with some critics, as equivalent to darkness, the sentence expresses the popular belief of Jew and Gentile that the air was peopled with spiritual beings, and the lower strata especially or those nearest to earth with spirits of evil. It was the teaching of Pythagoras, of Plutarch, and of Xenocrates that the air beneath the ether and the heaven was full of gods and demons; it was a similar belief which made the Jews "all their lifetime through fear of death subject to bondage" (Heb. ii. 15). Jewish theology (to refer only to that) massed together these noxious spirits under the head of *Massikin* (מַסִּיקִין). Their leader was and is Satan,—restless, cruel, and independent. As the "spirit of delusion" he first tempts and deceives man; next as "accuser" he brings charges against him, and then as the "angel of death" he seeks to slay him. In this conception, probably that current in the time of St. Paul, there is an advance upon the more reserved statements of the 'canonical Scripture of the Old Testament. The prologue to Job and Zechariah (ch. iii.) represents the Satan as able to work ill only by God's permission; and if the later writer of 1 Ch. xxi. 1 represents this prince-spirit as acting in a more independent fashion, his conception falls yet very far short of the *ἀρχὴν τῆς ἐξουσίας τοῦ αἵματος*. See DEMONOLOGY, and consult on the whole subjoin *Hamburger, R.E. s. n.* "Geister," and *Speaker's Comm.* on Tobit, pp. 176, &c. [F.]

AIRUS (Ἰαίρος; *An*). One of the "servants of the Temple," or Nethinim, whose descendants returned with Zorobabel (1 Esd. v. 31). Perhaps the same as REAIAH. [W. A. W.]

AIAH (אֵיָה; A. 'Aid, E. *Naid*; *Aia*; R. V. *Aiah*). Son of Zibeon (Gen. xxxvi. 24; called in 1 Ch. i. 40 AIAH [B. 'Aia, A. 'Aia; *Aia*]). [AIAH; ANAH.] [F.]

AIALON (R. V. 'Aialon, Josh. x. 12, xix. 42; 2 Ch. xxviii. 18). The same place as AIAJALON

Exon, *Ain* five cities" (עֵירִים). Keil and Bertheau join אֵירִים to v. 31. The difference between the numbers five and four (Josh. xix. 6, 7, to which the passage in 1 Ch. refers) is sufficiently explained by Dillmann on Josh. i. c. [S. R. D.]

BIBLE DICTIONARY.—VOL. I.

(1), which see. The Hebrew being the same in both, there is no reason for the inconsistency in the spelling of the name in the A. V. [G.] [W.]

AKA'N (אָקָן; A. 'Ioukām, D. 'Ioukām; *Acan*), a descendant of Esau (Gen. xxxvi. 27), called JAKAN in 1 Ch. i. 42 (B. omits, A. 'Iwān; *Jacan*). [BENE-JAAKAN.] [W. A. W.] [F.]

AKEL'DAMA. [ACELDAMA.]

AKKUB (אָקֻב, Ges. = *cunning*, cp. אָקֻב; A. 'Ακκούβ, B. 'Iakoun; *Accub*). 1. A descendant of Zerubbabel, and one of the seven sons of Elioenai (1 Ch. iii. 24).

2. *Accub*. One of the porters or doorkeepers at the east gate of the Temple. His descendants succeeded to his office, and appear among those who returned from Babylon (1 Ch. ix. 17 [B. 'Akoúμ; A. 'Akoúβ]; Ezra ii. 42 [AB. 'Akoúμ; Neh. vii. 45 [NAB (?). 'Akoúμ], xi. 19 [T. 'Akoúβ], xii. 25 [T. omits, *א. 3* 'Akoúβ]). Also called DACOBI (1 Esd. v. 28).

3. B. 'Akaβóβ, A. 'Akoúβ. One of the Nethinim, whose family returned with Zerubbabel (Ezra ii. 45). The name is omitted in Neh. vii., but occurs in the form ACUB (B. 'Akoúβ, A. 'Akoúμ) in 1 Esd. v. 31; though some prefer to consider ACUB as answering to BAKBUK in Ezra ii. 51 (*Βακβούκ*, B. *Βακβούκ*), and find in Acua in 1 Esd. v. 30 ('Akoúβ) the name of this member of the Nethinim.

4. Omitted in LXX. A Levite who assisted Ezra in expounding the Law (Neh. viii. 7). Called JACUBUS in 1 Esd. ix. 48 (A. 'Iakoubos, B. 'Iakoubos; *Accubus*). [W. A. W.] [F.]

AKRAB'BIM, "THE ASCENT OF," and "THE GOING UP TO;" also "MAALEH-ACRABBIM" (מַעְלֵה עֲקָרִיִּים = "the ascent of scorpions;" BA. usually, ἀνάβασις 'Ακραβείμ, A. ? in Josh. 'Ακραβείμ; *Ascensus scorpionum*). A pass between the south end of the Dead Sea and Zin, forming one of the landmarks on the south boundary at once of Judah (Josh. xv. 3) and of the Holy Land (Num. xxxiv. 4). Also the north (?) boundary of the Amorites (Judg. i. 36).

Judas Maccabaeus gained here a great victory over the Edomites (1 Macc. v. 34 [AM. 'Ακραβανή, N. 2 -ατταρή; *Acraathane*], "Arabatine," which see; Jos. Ant. xii. 8, § 1).

De Sauley (i. 77) would identify it with the long and steep pass of the *Wady es-Zuweirah*. Scorpions he certainly found there in plenty, but this wady is too much to the north to have been Akrabblim, as the boundary went from thence to Zin and Kadesh-Barnea, which wherever situated were certainly many miles further south. Robinson's conjecture is, that it is the line of cliffs which cross the Ghor at right angles, 11 miles south of the Dead Sea, and form the ascent of separation between the Ghor and the Arabah (ii. 120). Akrabblim is possibly the

* The Alex. MS. in this place reads 'Ioudaís for 'Ioudaíq, and Ewald (*Geach* iv. 91, 358) endeavours to show therefrom that the Acraathane there mentioned was that between Samaria and Judaea, in support of his opinion that a large part of Southern Palestine was then in possession of the Edomites. But this reading does not agree with the context, and it is at least certain that Josephus had the text as it now stands. See *Speaker's Commentary*, note on 1 Macc. v. 3.

G

steep pass *es-Sufah*, by which the final step is made from the desert to the level of the actual land of Palestine, or perhaps the ascent leading up to *Naqb Ibn Mār*, a position more in accordance with that usually assigned to Zin, the next point mentioned on the boundary. As to the name, scorpions abound in the whole of this district.

This place must not be confounded with Akrobatene, *Ἀκραβατηνή*, or Akrobatta, *Ἀκραβαττά*, one of the eleven Toparchies into which Judaea was divided, and named next to Gophna. This place lay between Neapolis and Jericho, and its name survives in the modern village *'Akrobeh*. [ARBATTIS.] [G.] [W.]

ALABASTER (ἀλάβαστρος; *alabastrum*) occurs in the N. T. only, in the notice of the *alabastr-box* of ointment which a woman brought to our Lord when He sat at meat in the house of Simon the leper at Bethany, the contents of which she poured on the head of the Saviour. (See Matt. xxvi. 7; Mark xiv. 3; Luke vii. 37.) By the English word *alabaster* is to be understood both that kind which is also known by the name of *gypsum*, and the *Oriental alabaster* which is so much valued on account of its translucency, and for its variety of coloured streakings, red, yellow, gray, &c., which it owes for the most part to the admixture of oxides of iron. The latter is a fibrous carbonate of lime, of which there are many varieties, *satin spar* being one of the most common. The former is a hydrous sulphate of lime, and forms when calcined and ground the well-known substance called *plaster of Paris*. Both these kinds of alabaster, but especially the latter, are and have been long used for various ornamental purposes, such as the fabrication of vases, boxes, &c. The ancients considered alabaster (carbonate of lime) to be the best material in which to preserve their ointments (Pliny, *H. N.* xiii. 3). Herodotus (iii. 20) mentions an alabaster vessel of ointment which Cambyses sent, amongst other things, as a present to the Aethiopians. Hammond (*Annotat. ad Matt.* xvi. 7) quotes Plutarch, Julius Pollux, and Athenaeus, to show that alabaster was the material in which ointments were wont to be kept.

In 2 K. xxi. 13, "I will wipe Jerusalem as a man wipeth a dish" (נִסְחָה), the Vat. and Alex. versions of the LXX. use *alabastron* in the rendering of the Hebrew words.* The reading of the LXX. in this passage is thus literally translated by Harmer (*Observations*, iv. 473): "I will unanoint Jerusalem as an alabaster unanointed box is unanointed, and is turned down on its face." Pliny^b tells us that the usual form of these alabaster vessels was long and slender at the top, and round and full at the bottom. He likens them to the long pearls, called *elenchi*, which the Roman ladies suspended from their

fingers or dangled from their ears. He compares also the green pointed cone of a rose-bud to the form of an alabaster ointment-vessel (*H. N.* xxi. 4). The *onyx*—(cp. Hor. *Od.* iv. 12, 17, "*Nardi parvus onyx*")—which Pliny says is another name for *alabastrites*, must not be confounded with the precious stone of that name, which is a sub-species of the *quartz* family of minerals, being a variety of agate. Perhaps the name of *onyx* was given to the pink-coloured variety of the calcareous alabaster, in allusion to its resembling the finger-nail (*onyx*) in colour, or else because the calcareous alabaster bears some resemblance to the agate-onyx in the characteristic lunar-shaped mark of the last-named stone, which mark reminded the ancients of the whitish semicircular spot at the base of the finger-nail.

The term *alabastra*, however, was by no means exclusively applied to vessels made from this material. Theocritus^c speaks of *golden alabasters*. That the passage in Theocritus implies that the alabasters were made of gold, and not simply gilt, as some have understood it, seems

Alabaster Vessels. (From the British Museum.) The inscription on the centre vessel denotes the quantity it holds.

clear from the words of Plutarch (in *Alexandro*, p. 676), cited by Kypke on Mark xiv. 3, where he speaks of alabasters "all skilfully wrought of gold" (χρυσῷ ἡσκημένα περιττῶς). Alabasters, then, may have been made of any material suitable for keeping ointment in,—glass, silver, gold, &c. Precisely similar is the use of the English word *box*; and perhaps the Greek *πύξις* and the Latin *boxus* are additional illustrations. *Box* is doubtless derived from the name of the shrub, the wood of which is so well adapted for turning boxes and such like objects. The term, which originally was limited to boxes made of the box-wood, eventually extended to boxes generally; as we say, an *iron box*, a *gold box*, &c.

In Mark xiv. 3, the woman who brought "the alabaster-box of ointment of spikenard" is said to *break* the box before pouring out the ointment. Some have supposed that *breaking* the box implied merely *breaking the seal* which kept

* Β. ἀπαλείψει τὴν Ἱερουσαλήμ, καθὼς ἀπαλείφεται ὁ ἀλάβαστρος [A. τὸ ἀλάβαστρον] ἀπαλείφμενος, καὶ εὐαγγελίζεται [A. -τε] ἐνὶ πρόσωπον αὐτοῦ. The Complutensian Version and the Vulgate [*delebo Jerusalem sicut deleri solent tabulae* (Lucian's recension, *πύξις*); *et delens vestiam, et duam crebrius stylum super faciem ejus*] understand the passage in a very different way.

^b "Et procerioribus sua gratia est: elenchos appellat fastigata longitudine, *alabastrorum* figura in pleniorum orbem desinentes" (*H. N.* ix. 56).

^c Σπρίν δὲ μύρον χρύσει' ἀλάβαστρα (Id. xv. 114). "μύρον χρύσεια, ἀλάβαστρα non sunt vasa unguentaria ex alabastrite lapide eaque auro ornata, sed simpliciter vasa unguentaria ex auro facta. Cf. Schiesens. *Lex. N. T. s. v. ἀλάβαστρον*" (Kiesling, ad Theocr. l. c.)

the essence of the perfume from evaporating; others take it more literally: the box was broken as having no value apart from its use as holding the ointment.

The town of Alabastron in Middle Egypt received its name from the nlabastr quarries of the adjacent hill, the modern Mount St. Anthony. In this town was a manufactory of vases and vessels for holding perfumes, &c. [W. H.]

ALAMETH (עֲלָמֶת, Ges. = *coercing*, Fürst = *youthfulness*; B. Γεμέθ, A. Ἐλμθέμ; *Al-meth*); better **ALEMETH**. One of the sons of Becher, the son of Benjamin (1 Ch. vii. 8).

[W. A. W.] [F.]

ALAMMELECH (עֲלָמֶלֶךְ, perhaps *king's* out; B. Ἐλμμελεχ; *Elmelech*), a place within the limits of Asher, named between Achahaph and Amad (Josh. xix. 26, only). It has not yet been identified, but Schwarz (p. 191) suggests a connexion with the *W. el-Melek*, which falls into the Kishon near Haifa, and has a large forest of oaks on its south side. [G.] [W.]

ALAMOTH (עֲלֵמֹת) occurs only twice in the Bible (Pa. xvi. 1 and 1 Ch. xv. 20). The translators and commentators are much divided as regards the meaning of this phrase. The Targomist, taking advantage of the Sons of Qorach occurring in the first, or introductory, verse of the said Psalm, interprets '*Al-Alamoth*' Midrashically by, "When their father had been removed from their sight" (בְּזִמְזֻמָּם מִפְּנֵי אֲבִיהֶם); comp. Num. xvi. 33; xxvi. 11. This explanation, if we may call it one, deserves, of course, no further notice. Rashi gives '*Alamoth*' as an instrument of music. This explanation, from the construction of the word with '*Al*' (עַל) cannot be correct [AJJELETH SHAHAR].

Ibn 'Ezra gives it as the commencement of a poem. This is an anachronism (see *ut supra*). Gimchi's explanation, being the same as Rashi's, must be rejected on the same grounds. The same is the case as regards the translation of it by '*The Virginal*.' Calmet's "*La bande des filles musiciennes*" (on Ps. ix. 1) is historically incorrect, since women were not allowed, at public worship, to sing together with men. The explanation of '*Alamoth*' by the German "*Jungfrauenweise*" is a worse anachronism still than Ibn 'Ezra's. We are, then, at once led to the only possible interpretation, which is strongly supported by the peculiar wording of 1 Ch. xv. 16. There only three instruments are named (*Nebalim*, *Kinnoroth*, and *Mizulayim*: see **HARP** and **CYMBALS**); and

idem r. 21 the last word (לְנָצֵחַ) must refer also to the last word of r. 20 (עֲלֵמֹת). Thus we see that three men, Heman, Asaph, and Ethan (r. 19), handled the cymbals to give general notice (לְהַשְׁמִיעַ), while the eight men

(r. 20) played on psalteries in order to direct the music-corps called '*Alamoth*', and the six other men (r. 21) played on harps to direct the music-corps called '*Hassheminit*.'^b

There would, then, remain only one more point that requires an explanation, viz. why this music-corps was called '*Alamoth*'. This will be, however, easily understood when the following two facts are taken into consideration. (1) According to the Mosiac economy (Num. xviii. 2-6) there subsisted a very close connexion between the priests and the Levites.

The latter were the companions (וְיָלוּ), if not the servants (וְיָשָׁרוּ), of the former. (2) '*Almeth*' and '*Almon*' (*Bachurim*) were not identical but contiguous localities, and the dwelling-places of some of the priests; and hence we may derive the use of this word '*Alamoth*'. This theory would likewise account for the plural number. As regards the feminine gender of '*Alamoth*', we need only refer to 1 Ch. xxiii. 6, where the Levites are said to have been divided into bands (*Machleqoth*, מַחֲלָקֹת; which is fem. plur.). The names of the bands, therefore, with rare exceptions, are given in that gender. [S.-S.]

ALCIMUS (Ἀλκιμος, *valiant*, a Greek name, assumed, according to the prevailing fashion, as representing Eliakim, Ἐליקים, Ἐλμμελεχ, *God setteth up*); called also **JACEIMUS** or **JAKIM** (δ καὶ Ἰακείμος alit. Ἰωάκειμος, Joseph. *Ant.* xii. 9, § 5, i.e. Ἰάκωβ, cf. Jud. iv. 6 varr. lectt.; '*Idkimos*, Joseph. *Ant.* xx. 10, 3), a Jewish priest (1 Macc. vii. 14), who was attached to the Hellenizing party (2 Macc. xiv. 3).^a On the death of Menelaus (162 B.C.), Alcimus seems to have obtained from Antiochus Eupator, through the influence of Lysias, the succession to the high-priesthood, thereby excluding Onias, the nephew and heir of Menelaus (Joseph. *Ant.* xii. 9, § 7; 2 Macc. xiv. 3). Though of the stock of Aaron (1 Macc. vii. 14), he was probably not of the high-priestly family (Joseph. *l. c.*; xx. 10, § 3); and, if not for that reason, yet at any rate for his well-known Hellenizing views, his designation to office seems not to have been recognised by his people. In the interval which elapsed before the downfall of Antiochus and Lysias, Judas in all probability exercised the functions of high-priest (cp. Joseph. xii. 11, § 2, τῆν ἀρχιερωσύνην ἐπὶς τριῶν κατασχών), Alcimus being driven from the country. Of this first period of the high-priesthood of Alcimus we are told nothing in the First Book of Maccabees. It is, however, directly asserted by Josephus (*Ant.* xii. 9, § 7), and again implied by him when he states that Jakim (i.e. Alcimus) had at the time of his death held the office for three years (δ δὲ Ἰακείμος, ἔτη τρία τῆν ἀρχιερωσύνην κατα-

^a It was, no doubt, called so from having been the eighth music-corps when only eight such bands existed. Later on there were twenty-four such bands. See **AL-TASCHITH**.

^b This explanation we owe to Kohn [AJJELETH SHAHAR, note 1]. A somewhat similar one is given by Rée [AJJELETH SHAHAR, note 1].

^c According to a Jewish tradition (*Beresith R.* 65), he was "sister's son of Jose ben Joser," chief of the Sanhedrin (Raphall. *Hist. of Jews*, i. 245, 303).

^a When one finds the expression "and singing-women" (וְשִׁירָוֹת) twice in the Bible (Ezra ii. 65 and Neh. vii. 67), it must be explained, as the commentators on these passages maintain, that these singers had nothing to do with religious songs in the Temple or any other public place of worship. Compare Ps. cxlviii. 12, and mark the difference there between the expression שָׁמַח ('and also') and עִם ('with'). [DASCH.]

σχὼν ἐτελεύτησεν, *Ant.* xi. 10, 3), or, as he says in another place, for four years (ἀρχιερατεύσας ἔτη τέσσαρα, *Ant.* xii. 10, 6). When Demetrius Soter obtained the kingdom of Syria, Alcimus paid court to that monarch, and represented the dangerous character of Judas and his followers (1 Macc. vii. 6). Demetrius therefore confirmed him in his office, and through his general Bacchides [BACCHIDES] established him at Jerusalem. At first a considerable section of the nationalist party were ready to put faith in Alcimus, because he was of the stock of Aaron. But their confidence was cruelly requited. By the order of Bacchides, apparently with the consent of Alcimus, as many as sixty were treacherously murdered; among them, according to Jewish tradition, the uncle of Alcimus—Jose ben Jooser, the illustrious pupil of Antigonus of Socho. The cruelty of the new high-priest, of which this deed may be taken as an example, quickly undeceived those who had hitherto remained doubtful. In spite of the force left in his command, he was unable to withstand the opposition which he provoked. The influence of Judas and the nationalist party (see ASSIDEANS) frustrated all his schemes of policy or revenge (1 Macc. vii. 9, 25); and he was once more compelled to flee to Demetrius at Antioch, who immediately took measures for his restoration. The first expedition under Nicanor proved unsuccessful. According to one account, it terminated in an amicable arrangement between Judas and Nicanor. This so little suited the purpose of Alcimus, that he applied again to Demetrius and charged Nicanor with friendship towards the king's worst foe. Nicanor received a stern order from Demetrius to bring Judas in chains to Antioch (2 Macc. xiv. 26, 27). A second campaign ended in Judas's great victory of Adarsa, near Bethhoron, where Nicanor was killed and his forces utterly routed (13th Adar=March, 161). Upon this Bacchides marched against Jerusalem with a large army, routed Judas, who fell in the battle of Eleasa (Nisan=April, 160 or 161 B.C.), and reinstated Alcimus. After his restoration, Alcimus seems to have attempted to modify the ancient worship, and was engaged in pulling down "the wall of the inner court of the sanctuary" (i.e. which separated the court of the Gentiles from it; yet see Grimm, 1 Macc. ix. 54) when he was "plagued" (by paralysis), and "died at that time,"—"in the second month," Ijar=May, 159 or 160 B.C. This "wall" was in all probability the barrier or fence of trellis-work (cf. the name נִיבִּיב, "soriga"), from three to four feet in height, which stood between the inner and outer walls of the Temple. No Gentile nor any person rendered unclean by contact with a corpse might pass beyond it. [See a facsimile of the inscription placed on the wall in Stade, *Gesch. d. Volkes Israel*, ii. p. 268.] The great "outer court" was limited on its inner side by this breastwork, which is described by Josephus as it appeared in the Herodian Temple (δρόφακτος λίθινος τρίπηχους μὲν ὕψος, πάνυ δὲ χαριέντως διεγγραμμένος, *Bell. Jud.* v. 5, 2). By the Jews it was regarded with peculiar reverence as the work of the prophets (ἔργα τῶν προφητῶν, 1 Macc. ix. 54; τὸ τεῖχος τοῦ ἁγίου, ὃν παλαιὸν καὶ κατασκευασμένον ὑπὸ τῶν ἁγίων προφητῶν, *Joseph. Ant.* xii. 10, 6). Ac-

cordingly the attempt of Alcimus was regarded with special horror by pious Jews; for it implied both the destruction of a sacred portion of their sanctuary, and the intention of granting a free access to the Temple even to the Gentiles and the unclean. The undertaking was stopped by the sudden seizure and death of Alcimus, which to the Jews appeared as a heaven-sent punishment for his impiety (παγή τις αἰφύβιος ἐκ τοῦ θεοῦ, *Joseph. l. c.*). The 23rd of Marcheswan, i.e. the second month of the civil year, = November, was observed by the people as the day on which Alcimus had begun the unholy work, which the hand of God had prevented him from carrying into effect. (Cf. *Mishna Middoth*, 2, 3. See Grätz, *Gesch. d. Jud.* iii. pp. 12, 603.)

The character of Alcimus seems to have been thoroughly contemptible. Greed and love of power prompted him to sue for the office of high-priest. During the short period of his residence in Jerusalem he showed himself to be both treacherous and cruel. The last act of his life was prompted by his wish to curry favour with the Hellenizers and the court of Antioch, rather than by any ambition of making his religion universal.

His death is noticeable for another reason. The court at Antioch nominated no successor to his office, and there ensued an interregnum of seven years in the list of the high-priests, during which the high-priestly functions were performed by a *Sagan*, the representative or vice high-priest (cp. Buxtorf, *sub voce* סָגָן). Cp. *Joseph. Ant.* xii. 9, § 5, xii. 10; 1 Macc. vii. ix. cf. 2 Macc. xiv. xv.; Ewald, *Hist. of Israel*, v. 319 seq. (Eng. trans.); Graetz, *Gesch. der Jud.* iii. pp. 11, 12, and his *Excursus on the Megillath Taanith*, p. 597. [R.]

AL'EMA (ἐν Ἀλέμας, A. ἐν Ἀλέμας; is *Alimis*), a large and strong city in Gilead in the time of the Maccabees (1 Macc. v. 26). Its name does not occur again, nor have we yet any means of identifying it with certainty; it may, however, be *Ḳefr el-Ma* on the right bank of *Nahr er-Rukhād* in *Jaulān* (Schumacher, *Across the Jordan*, 78–83). Grimm (*in loc.*) suggests that it may represent BEER-ELIM (*Is.* xv. 8; comp. Num. xxi. 16). [G.] [W.]

ALEMETH (אַלְמֶתְ [meaning uncertain: see under ALAMETH]), Fürst = youthfulness; *Alamath*). A Benjamite, son of Jehoadan, or Jarah, and descended from Jonathan the son of Saul (1 Ch. viii. 36 [B. Σαλαμῶδ, A. Γαλεμῶδ], ix. 42 [B. Γαμῆλεθ, A. Γαλεμῶθ]). The form of the name in Hebrew is different from that of the town ALEMETH, with which it has been compared. [W. A. W.] [F.]

ALEMETH (R. V. more accurately, *Alameth*, אַלְמֶתְ, B. Γαλέμεθ, A. Γαλῆμεθ; *Almath*), the form under which Almon, the name of a city of the priests in Benjamin, appears in 1 Ch. vi. 60 [45]. Under the very similar form of *Almit*, it has been identified in the present day at about a mile N.E. of *Andāra*, the site of Anathoth; first by Schwarz (p. 128) and then by Mr. Finn (Rob. iii. 287). Among the genealogies of Benjamin the name occurs in connexion with Azmaveth, also the name of a town of that tribe (1 Ch. viii. 36, ix. 42; compared with

Ezra ii. 24). [ALMON.] In the Targum of Jonathan on 2 Sam. xvi. 5, Bahurim is rendered Alemath. [G.] [W.]

ALEXANDER III., king of Macedon, surnamed THE GREAT (Ἀλέξανδρος, *the helper of men*; Alexander; Arab. *the two-horned*, Golii *Lex. Arab.* p. 1806), "the son of Philip" (1 Macc. vi. 2) and Olympias, was born at Pella B.C. 356. On his mother's side he claimed descent from Achilles; and the Homeric legends were not without influence upon his life. At an early age he was placed under the care of Aristotle; and while still a youth he turned the fortune of the day at Chaeroneia (B.C. 338). On the murder of Philip (B.C. 336) Alexander put down with resolute energy the disaffection and hostility by which his throne was menaced; and in two years he crossed the Hellespont (B.C. 334) to carry out the plans of his father, and execute the mission of Greece to the civilised world. The battle of the Granicus was followed by the subjugation of Western Asia; and in the following year the fate of the East was decided at Issus (B.C. 333). Tyre and Gaza were the only cities in Western Syria which offered Alexander any resistance, and these were reduced and treated with unusual severity (B.C. 332). Egypt next submitted to him; and in B.C. 331 he founded Alexandria, which remains to the present day the most characteristic monument of his life and work. In the same year he finally defeated Darius at Gaugamela; and in B.C. 330 his unhappy rival was murdered by Bessus, satrap of Bactria. The next two years were occupied by Alexander in the consolidation of his Persian conquests, and in the reduction of Bactria. In B.C. 327 he crossed the Indus, penetrated to the Hydaspes, and was there forced by the discontent of his army to turn westward. He reached Susa B.C. 325, and proceeded to Babylon B.C. 324, which he chose as the capital of his empire. In the next year he died there (B.C. 323) in the midst of his gigantic plans; and those who inherited his conquests left his designs unachieved and unattempted (cp. Dan. vi. 6, viii. 5, xi. 3).

The famous tradition of the visit of Alexander to Jerusalem during his Phœnician campaign (Joseph. *Ant.* xi. 8, § 1 sq.) has been a fruitful source of controversy. The Jews, it is said, had provoked his anger by refusing to transfer their allegiance to him when summoned to do so during the siege of Tyre, and after the reduction of Tyre and Gaza (Joseph. *l. c.*) he turned towards Jerusalem. Jaddua (Jaddus) the high-priest (Neh. xii. 11, 22), who had been warned in a dream how to avert the king's anger, calmly awaited his approach; and when he drew near went out to Sapha (more generally known as Scopas; cp. Joseph. *Bell. Jud.* v. 2, 3), within sight of the city and Temple, clad in his robes of hyacinth and gold, and accompanied by a train of priests and citizens arrayed in white. Alexander was so moved by the solemn spectacle that he did reverence to the holy name inscribed upon the tiara of the high-priest; and when Parmenio expressed surprise, he replied that "he had seen the God Whom Jaddua represented in a dream at Dium, encouraging him to cross over into Asia, and promising him success." After this it is said that he visited Jerusalem,

offered sacrifice there, heard the prophecies of Daniel which foretold his victory, and conferred important privileges upon the Jews, not only in Judaea but in Babylonia and Media, which they enjoyed during the supremacy of his successors. The narrative is repeated in the Talmud (*Joma*, p. 69; cp. Wünsche, *Der Babyl. Talmud*, i. 374; the high-priest is there said to have been Simon the Just, and the scene to have taken place near Antipatris), in later Jewish writers (*Vajikra R.* Par. 13; Joseph ben Gorion, *ap. Ste. Croix*, p. 553), and in the chronicles of Abulfeda (Ste. Croix, p. 555). The event was adapted by the Samaritans to suit their own history with a corresponding change of places and persons and various embellishments (Abulfeda, quoted by Ste. Croix, pp. 209-212); and in due time Alexander was enrolled among the proselytes of Judaism. On the other hand, no mention of the event occurs in Arrian, Plutarch, Diodorus, or Curtius; and the connexion in which it is placed by Josephus is alike inconsistent with Jewish history (Ewald, *Hist. Isr.* vol. v. p. 214, Eng. tr.; Grätz, *Gesch. d. Jud.* Bd. ii. pt. 2, p. 221) and with the narrative of Arrian (iii. 1, ἡ πόλις ἡμέτερος ἀπὸ τῆς Γάζης ἐλευθέρων ἦκεν ἐς Πηλούσιον).

But admitting the incorrectness of the details of the tradition as given by Josephus, there are several points which confirm the truth of the main fact. Justin says that "many kings of the East came to meet Alexander wearing fillets" (lib. xi. 10); and after the capture of Tyre, "Alexander himself visited some of the cities which still refused to submit to him" (Curt. iv. 5, 13). Even at a later time, according to Curtius, he executed vengeance personally on the Samaritans for the murder of his governor Andromachus (Curt. iv. 8, 10). Besides this, Jewish soldiers were enlisted in his army (Ilecat. *ap. Joseph. c. Apion.* i. 22), and Jews formed an important element in the population of the city, which he founded shortly after the supposed visit. Above all, the privileges which he is said to have conferred upon the Jews, including the remission of tribute every sabbatical year, existed in later times, and imply some such relation between the Jews and the great conqueror as Josephus describes. Internal evidence is decidedly in favour of the story even in its picturesque fullness. From policy or conviction Alexander delighted to represent himself as chosen by destiny for the great act which he achieved. The siege of Tyre arose professedly from a religious motive. The battle of Issus was preceded by the visit to Gordium; the invasion of Persia by the pilgrimage to the temple of Ammon. And if it be impossible to determine the exact circumstances of the meeting of Alexander and the Jewish envoys, the silence of the classical historians, who notoriously disregarded (e.g. the Maccabees) and misrepresented (Tac. *Hist.* v. 8) the fortunes of the Jews, cannot be held to be conclusive against the occurrence of an event which must have appeared to them trivial or unintelligible (Jahn, *Archæol.* iii. 300 ff.; Ste. Croix, *Examen critique*, &c., Paris, 1810; Thirlwall, *Hist. of Greece*, vi. 206 f.; and on the other side Ant. van Dale, *Dissert. super Aristot.*, Amstel. 1705, pp. 69 sq.).

The tradition, whether true or false, presents

an aspect of Alexander's character which has been frequently lost sight of by his recent biographers. He was not simply a Greek, nor must he be judged by a Greek standard. The Orientalism, which was a scandal to his followers, was a necessary deduction from his principles, and not the result of caprice or vanity (comp. Arr. vii. 29). He approached the idea of a universal monarchy from the side of Greece, but his final object was to establish something higher than the paramount supremacy of one people. His purpose was to combine and equalize, not to annihilate: to wed the East and West in a just union—not to enslave Asia to Greece (Plut. *de Alex. Or.* 1, § 6). The time, indeed, was not yet come when this was possible; but if he could not accomplish the great issue, he prepared the way for its accomplishment.

The first and most direct consequence of the policy of Alexander was the weakening of nationalities, the first condition necessary for the dissolution of the old religions. The swift course of his victories, the constant incorporation of foreign elements in his armies, the fierce wars and changing fortunes of his successors, broke down the barriers by which kingdom had been separated from kingdom, and opened the road for larger conceptions of life and faith than had hitherto been possible (cp. Polyb. iii. 59). The contact of the East and West brought out into practical forms, thoughts and feelings which had been confined to the schools. Paganism was deprived of life as soon as it was transplanted beyond the narrow limits in which it took its shape. The spread of commerce followed the progress of arms; and the Greek language and literature vindicated their claim to be considered the most perfect expression of human thought by becoming practically universal.

The Jews were at once most exposed to the powerful influences thus brought to bear upon the East, and most able to support them. In the arrangement of the Greek conquests, which followed the battle of Ipsus B.C. 301, Judaea was made the frontier land of the rival empires of Syria and Egypt; and though it was necessarily subjected to the constant vicissitudes of war, it was able to make advantageous terms with the state to which it owed allegiance from the important advantages which it offered for attack or defence [ANTIOCHUS, II.—VII.]. Internally also the people were prepared to withstand the effects of the revolution which the Greek dominion effected. The constitution of Ezra had obtained its full development. A powerful hierarchy had succeeded in substituting the idea of a Church for that of a state; and the Jew was now able to wander over the world and yet remain faithful to the God of his fathers [THE DISPERSION]. The same constitutional change had strengthened the intellectual and religious position of the people. A rigid "fence" of ritualism protected the course of common life from the licence of Greek manners; and the great doctrine of the unity of God, which was now seen to be the divine centre of their system, counteracted the attractions of a philosophic pantheism [SIMON THE JUST]. Through a long course of discipline, in which they had been left unguided by prophetic teaching, the Jews had realised the nature of their mission to

the world, and were waiting for the means of fulfilling it. The conquest of Alexander furnished them with the occasion and the power. But at the same time the example of Greece fostered personal as well as popular independence. Judaism was speedily divided into sects, analogous to the typical forms of Greek philosophy. But even the rude analysis of the old faith was productive of good. The freedom of Greece was no less instrumental in forming the Jews for their final work than the contemplative spirit of Persia, or the civil organization of Rome: for if the career of Alexander was rapid, its effects were lasting. The city which he chose to bear his name perpetuated in after ages the office which he providentially discharged for Judaism and mankind; and the historian of Christianity must confirm the judgment of Arrian, that Alexander, "who was like no other man, could not have been given to the world without the special design of Providence" (ἔξω τοῦ θεοῦ, Arr. vii. 30). And Alexander himself appreciated this design better even than his great teacher; for it is said (Plut. *de Alex. Or.* 1, § 6) that when Aristotle urged him to treat the Greeks as freemen and the Orientals as slaves, he found the true answer to this counsel in the recognition of his "divine mission to unite and reconcile the world (κοινὸς ἦεν θεόθεν ἀμωστὴς καὶ διαλλακτὴς τῶν ἄνθρωποις)." ¹

Tetradrachm (Attic talent) of Lysimachus, king of Thrace. Oliv. Head of Alexander the Great, as a young Jupiter Ammon, to right. Rev. ΒΑΣΙΛΕΥΣ ΑΥΤΕΙΜΑΧΟΥ. In field, monogram and Σ. Pallas seated to left, holding a Victory.

In the prophetic visions of Daniel the influence of Alexander is necessarily combined with that of his successors.^a They represented with partial exaggeration the several phases of his character; and to the Jews nationally the policy of the Syrian kings was of greater importance than the original conquest of Asia. But some traits of "the first mighty king" (Dan. viii. 21, xi. 3) are given with rigorous distinctness. The emblem by which he is typified (יָעִי, *a he-goat*, fr. יָעַר, *he leapt*, Ges. *Thess.* s. v.) suggests the notions of strength and speed;^b and the universal extent (Dan. viii. 5. . . from the west on the face of the whole earth) and marvellous rapidity of his conquests (Dan. i. c. *he touched not the ground*) are brought forward as the characteristics of his power, which was directed by the strongest personal

^a The attempt of Bertholdt to apply the description of the third monarchy to that of Alexander has little to recommend it [DANIEL].

^b There may be also some allusion in the word to the legend of Caranus, the founder of the Argive dynasty in Macedonia, who was guided to victory by "a flock of goats" (Justin, i. 7).

impetuosity (Dan. viii. 6, *in the fury of his power*). He ruled with great dominion, and did according to his will (xi. 3); "and there was none that could deliver . . . out of his hand" (viii. 7). [B. F. W.] [R.]

ALEXANDER BALAS (Joseph. *Ant.* xiii. 4, § 8, Ἀλέξανδρος ὁ Βάλας λεγόμενος; Strab. *liv.* p. 751, τὸν Βάλαν Ἀλέξανδρον; Just. *xxv.* l., "Subornant pro eo *Balam* quendam . . . et . . . nomen ei Alexandri inditur." Balas possibly represents the Aram. ܠܝܬܐ, *lord*. He was, according to some, a (natural) son of Antiochus IV. Epiphanes (Liv. *Ep.* 50; Strab. xiii.; Joseph. *Ant.* xiii. 2, 1), but he was more generally regarded as an impostor who falsely assumed the connexion (App. *Syr.* 67; Justin, l. c.; cp. Polyb. *xxiii.* 16). In any case he seems to have assumed the title of his reputed father (cp. Ἀλέξανδρος, ὁ τοῦ Ἀντιόχου ὁ Ἐπιφανῆς, 1 Macc. x. 1, where there is no need to read τοῦ Ἐπιφανοῦς, as Grotius and Michaelis propose). He claimed the throne of Syria in B.C. 152 in opposition to Demetrius Soter, who had provoked the hostility of the neighbouring kings and alienated the affections of his subjects (Joseph. *l. c.*). His pretensions were put forward by Hieracides, formerly treasurer of Antiochus Epiphanes, who obtained the recognition of his title at Rome by scandalous intrigues (Polyb. *xxiii.* 14, 16). After landing at Ptolemais (1 Macc. x. 1) Alexander gained the warm support of Jonathan, who was now the leader of the Jews (1 Macc. ix. 73); and though his first efforts were unsuccessful (Just. *xxv.* 1, 10), in B.C. 150 he completely routed the forces of Demetrius, who himself fell in the retreat (1 Macc. x. 48-50; Joseph. *Ant.* xiii. 2, 4; Strab. *xvi.* p. 751). After this Alexander married Cleopatra, the daughter of Ptolemaeus VI. Philometor; and in the arrangement of his kingdom appointed Jonathan governor (μετὰ δόξαν, 1 Macc. x. 65) of a province (Judea: cp. 1 Macc. xi. 57). But his triumph was of short duration. After obtaining power he gave himself up to a life of indulgence (Liv. *Ep.* 50; cp. *Athen.* v. 211); and when Demetrius Nicator, the son of Demetrius Soter, landed in Syria in B.C. 147, the new pretender found powerful support (1 Macc. x. 67 ff.). At first Jonathan defeated and slew Apollonius the governor of Coele-Syria, who had joined the party of Demetrius, for which exploit he received fresh favours from Alexander (1 Macc. x. 69-89); but shortly afterwards (B.C. 146) Ptolemy entered Syria with a large force, and after he had placed garrisons in the chief cities on the coast, which received him according to the commands of Alexander, suddenly pronounced himself in favour of Demetrius (1 Macc. xi. 1-11; Joseph. *Ant.* xiii. § 4, 5 sq.), alleging, probably with truth, the existence of a conspiracy against his life (Joseph. *l. c.* cf. Diod. *ap. Müller, Fragm.* ii. 16). Alexander, who had been forced to leave Antioch (Joseph. *l. c.*), was in Cilicia when he heard of Ptolemy's defection (1 Macc. xi. 14). He hastened to meet him, but was defeated (1 Macc. xi. 15; Just. *xxv.* 2), and fled to Abae in Arabia (Diod. *l. c.*), where he was murdered B.C. 146 (Diod. *l. c.* and 1 Macc. xi. 17 differ as to the manner; and Euseb. *Chron. Arm.* i. 349 represents him to have been slain in the battle). The

narrative in 1 Macc. and Josephus shows clearly the partiality which the Jews entertained for Alexander "as the first that entreated of true peace with them" (1 Macc. x. 47); and the same

Tetradrachm (Ptolemaic talent) of Alexander Balas. Obv. Bust of King to right. Rev. ΒΑΣΙΛΕΥΣ ΑΛΕΞΑΝΔΡΟΥ. Eagle, upon rudder, to left, and palm-branch. In field the monogram and symbol of Tyre; date ΓΕΓ' (163 A.D. Seleucid.), &c.

feeling was exhibited afterwards in the zeal with which they supported the claims of his son Antiochus. [ANTIOCHUS, VI.] [B. F. W.] [R.]

ALEXANDER (Ἀλέξανδρος; Alexander).

Several persons of this name are mentioned in the N. T. The name was so common that attempts at identification are most precarious. In the following list 3 and 5 may be identical, but 4 and 5 are probably different persons.

1. Son of Simon of Cyrene, who bore our Lord's Cross (Mark xv. 21). On the probable reason for mentioning Simon's sons, see RUFUS.

2. One of the high-priestly family, and important enough to be mentioned by name in the account given (Acts iv. 6) of the meeting of the Sanhedrin to examine Peter and John. It has been conjectured that he may possibly be the Alabarch Alexander Lysimachus of Alexandria, brother of Philo, and father of Tiberius Alexander, procurator of Judaea (Jos. *Ant.* xviii. 8, § 1; *xix.* 5, § 1). He was the first man of his time among the Jews of Alexandria (*Ant.* *xx.* 5, § 2). But this identification has no confirmatory evidence.

3. A Jew of Ephesus, whom his countrymen put forward during the tumult raised by Demetrius the silversmith (Acts xix. 33). Their object was to dissociate themselves from the Christians, and to avoid any further increase of the habitual enmity of their Gentile fellow-citizens. This was the subject of Alexander's attempted defence. The verb used, which signifies "instructed" (*συμβιβασαυ*, so best authorities), negatives the explanation that he was a Christian whom the Jews put forward as a victim.

4. A Christian who with Hymenæus had made shipwreck concerning the faith, and had been delivered to Satan by St. Paul (1 Tim. i. 19, 20). For the nature of the discipline inflicted, see HYMENÆUS.

5. A "coopersmith" (*χαλκεύς*), but see Stephanus, ed. Hase, s. r., who proves the word to mean simply a "smith." He is mentioned by St. Paul (2 Tim. iv. 14, 15) as "having done him much evil," and "having greatly withstood his words." The latter expression is not to be connected with r. 16 and referred to opposition to St. Paul in his defence (*ἀπολογία*) at Rome (as Lewin, vol. ii.), but is to be understood of former opposition to the Apostle's teaching (cp. Acts xiii. 8, where the same

verb is used, ἀποστραταί). Against a forensic and technical sense of "shewed" (ἐνεδείξατο), see Alford's note *ad loc.* If the epistle (2 Tim.) was addressed to Timothy at Ephesus, Alexander was probably concerned in the persecutions to which St. Paul was there exposed. [E. R. B.]

ALEXANDRIA (ἡ Ἀλεξάνδρεια, 3 Macc. iii. 1; Mod., *El-Iskenderiyyeh*; Eññ., Ἀλεξανδρεὺς, 3 Macc. ii. 30, iii. 21; Acts vi. 9, xviii. 24), the Hellenic, Roman, and Christian capital of Egypt, was founded by Alexander the Great B.C. 332, who himself traced the ground-plan of the city which he designed to make the metropolis of his western empire (Plut. *Alex.* 26). The work thus begun was continued after the death of Alexander by the Ptolemies; and the beauty (Athen. i. p. 3) of Alexandria became proverbial. Every natural advantage contributed to its prosperity. The climate and site were singularly healthy (Strab. p. 793). The harbours, formed by the island of Pharos and the headland Lochias, were safe and commodious, alike for commerce and for war; and the Lake Mareotis was an inland haven for the merchandise of Egypt and India (Strab. p. 798). Under the despotism of the later Ptolemies the trade of Alexandria declined, but its population (300,000 freemen, Diod. xvii. 52; the free population of Attica was about 130,000) and wealth (Strab. p. 798) were enormous. After the victory of Augustus it suffered for its attachment to the cause of Antony (Strab. p. 792); but its importance as one of the chief corn-ports of Rome secured for it the general favour of the first emperors. In later times the seditious tumults for which the Alexandrians had always been notorious desolated the city (A.C. 260 ff.: Gibbon, *Decline and Fall*, c. x.), and religious feuds aggravated the popular distress (Dionys. Alex. Ep. iii., xii.; Euseb. *H. E.* vi. 41 ff., vii. 22). Yet even thus, though Alexandria suffered greatly from constant dissensions and the weakness of the Byzantine court, the splendour of "the great city of the West" amazed Amrou, its Arab conqueror (A.D. 640; Gibbon, c. li.); and after centuries of Muslim misrule it promises once again to justify the wisdom of its founder (Strab. xvii. 791-9; *Frag.* ap. Joseph. *Ant.* xiv. 7, 2; Plut. *Alex.* 26; Arr. iii. 1; Joseph. *B. J.* iv. 5. **ALEXANDER THE GREAT**).

The population of Alexandria was mixed from the first (comp. Curt. iv. 8, 5); and this fact formed the groundwork of the Alexandrine character. The three regions into which the city was divided (*Regio Judæorum, Brachiorum, Rhacotis*) corresponded to the three chief classes of its inhabitants,—Jews, Greeks, Egyptians;

* The Alexandrine corn-vessels (Acts xxvii. 6, xxviii. 11) were large (Acts xxvii. 37) and handsome (Luc. *Navig.* p. 668, ed. Bened.); and even Vespasian made a voyage in one (Joseph. *B. J.* vii. 2). They generally sailed direct to Puteoli (*Dicaearchia*, Strab. p. 793; Senec. *Ep.* 77, 1; cp. Suet. *Aug.* 98, Acts xxviii. 13); but, from stress of weather, often sailed under the Asiatic coast (Acts xxvii.; cp. Luc. i. c. p. 870 sq.; Smith, *Voyage of St. Paul*, pp. 70 sq.).

† Polybius (xxxiv. 14; *an.* Strab. p. 797) speaks of the population as consisting of "three races" (τρία γένη), the native Egyptian . . . the mercenary . . . and the Alexandrine . . . of Greek descent." The Jews might receive the title of "mercenaries," from the service which they originally rendered to Alexander

but in addition to these principal races, representatives of almost every nation were found there (Dio Chrys. *Orat.* xxxii.). According to Josephus, Alexander himself assigned to the Jews a place in his new city; "and they obtained," he adds, "equal privileges with the Macedonians" (c. *Ap.* ii. 4), in consideration "of their services against the Egyptians" (*B. J.* ii. 18, 7). Ptolemy I. imitated the policy of Alexander, and, after the capture of Jerusalem, he removed a considerable number of its citizens to Alexandria. Many others followed of their own accord; and all received the full Macedonian franchise (Joseph. *Ant.* xii. 1; cf. c. *Ap.* i. 22), as men of known and tried fidelity (Joseph. c. *Ap.* ii. 4). Already on a former occasion the Jews had sought a home in the land of their bondage. More than two centuries and a half before the foundation of Alexandria a large body of them had taken refuge in Egypt, after the murder of Gedaliah; but these, after a general apostasy, were carried captive to Babylon by Nebuchadnezzar (2 K. xxv. 26; Jer. xlii.; Joseph. *Ant.* x. 9, 7).

The fate of the later colony was far different. The numbers and importance of the Egyptian Jews were rapidly increased under the Ptolemies by fresh immigrations and untiring industry. Philo estimates them in his time at little less than 1,000,000 (in *Flacc.* § 6, p. 971); and adds, that two of the five districts of Alexandria were called "Jewish districts;" and that many Jews lived scattered in the remaining three (*id.* § 8, p. 973). From a chance remark of Josephus we should infer that "the Delta"—by which name the fourth district in Alexandria was known—was more especially the Jewish quarter (τὸ καλούμενον Δέλτα: συνέκτιστο γὰρ ἐκεῖ τὸ Ἰουδαϊκόν, Joseph. *Bell. Jud.* ii. 18, 8). Julius Caesar (Joseph. *Ant.* xiv. 10, § 1) and Augustus confirmed to them the privileges which they had enjoyed before, and they retained them with various interruptions, of which the most important, A.D. 39, is described by Philo (*l. c.*), during the tumults and persecutions of later reigns (Joseph. c. *Ap.* ii. 4; *B. J.* xii. 3, 2). They were represented, at least for some time (from the time of Cleopatra to the reign of Claudius; Jost, *Gesch. d. Judenth.* 353) by their own officer (ἐθνάρχης, Strab. *ap.* Joseph. *Ant.* xiv. 7, 2: ἀναβάρχης, Joseph. *Ant.* xviii. 7, 3; 9, 1; xix. 5, 1; cp. *Rup. ad Jur. Sat.* i. 130: γεράρχης, Philo, in *Flacc.* § 10, p. 975), and Augustus appointed a council (γερούσια, i.e. *Sanhedrin*: Philo, *l. c.*) "to superintend the affairs of the Jews," according to their own laws. The establishment of Christianity altered the civil position of the Jews, but they maintained their relative prosperity; and when Alexandria was taken by Amrou, 40,000 tributary Jews were reckoned among the marvels of the city (Gibbon, c. li.).

For some time the Jewish Church in Alexandria was in close dependence on that of Jerusalem. Both were subject to the civil power of the first Ptolemies, and both acknowledged the high-priest as their religious head. The persecution of Ptolemy Philopator (B.C. 217) occasioned the first political separation between the

(Joseph. *B. J.* ii. 18, 7) and the first Ptolemies (Joseph. c. *Ap.* ii. 4).

two bodies. From that time the Jews of Palestine attached themselves to the fortunes of Syria [ANTIOCHUS THE GREAT]; and the same policy which alienated the Palestinian party gave unity and decision to the Jews of Alexandria. The Septuagint translation, which strengthened the barrier of language between Palestine and Egypt, and the temple at Leontopolis (B.C. 161), which subjected the Egyptian Jews to the charge of schism, widened the breach which was thus opened. But the division though marked was not complete. At the beginning of the Christian era the Egyptian Jews still paid the contributions to the Temple-service (Raphall, *Hist. of Jews*, ii. 72). Jerusalem, though its name was fashioned to a Greek shape, was still the Holy City, the metropolis not of a country but of a people (*ἱερὸπολις*, Philo, in *Flacc.* § 7; *Ley. ad Cai.* § 36), and the Alexandrians had a synagogue there (Acts vi. 9). The internal administration of the Alexandrine Church was independent of the Sanhedrin at Jerusalem; but respect survived submission.

There were, however, other causes which tended to produce at Alexandria a distinct form of the Jewish character and faith. The religion and philosophy of that restless city produced an effect upon the people more powerful than the influence of politics or commerce. Alexander himself symbolised the spirit with which he wished to animate his new capital by founding a temple of Isis side by side with the temples of the Grecian gods (Arr. iii. 1). The creeds of the East and West were to coexist in friendly union; and in after-times the mixed worship of Serapis (comp. Gibbon, c. xviii.; *Dict. of Geogr.* i. p. 98) was characteristic of the Greek kingdom of Egypt (August. *de Civ. Dei*, xviii. 5; *Savarium Aegyptiorum deus*). This catholicity of worship was further combined with the spread of universal learning. The same monarchs who favoured the worship of Serapis (Clem. Al. *Protr.* iv. § 48) founded and embellished the Museum and Library; and part of the Library was deposited in the Serapeum. The new faith and the new literature led to a common issue; and the Egyptian Jews necessarily imbibed the spirit which prevailed around them.

The Jews were, indeed, peculiarly susceptible of the influences to which they were exposed. They presented from the first a capacity for Eastern or Western development. To the faith and conservatism of the Oriental they united the activity and energy of the Greek. The mere presence of Hellenic culture could not fail to call into play their powers of speculation, which were hardly repressed by the traditional legalism of Palestine (comp. Jost, *Gesch. d. Judenth.* pp. 293 ff.); and the unchanging element of divine revelation which they always retained, enabled them to harmonize new thought with old belief. But while the intercourse of the Jew and Greek would have produced the same general consequences in any case, Alexandria was peculiarly adapted to ensure their full effect. The result of the contact of Judaism with the many creeds which were current there must have been speedy and powerful. The earliest Greek fragment of Jewish writing which has been preserved (about A.C. 160) [ARISTOBULUS] contains large Orphic quotations, which had been already moulded

into a Jewish form (comp. Jost, *Gesch. d. Judenth.* 370); and the attempt thus made to connect the most ancient Hellenic traditions with the Law was often repeated afterwards. Nor was this done in the spirit of bold forgery. Orpheus, Musaeus, and the Sibyls appeared to stand in some remote period anterior to the corruptions of polytheism, as the witnesses of a primeval revelation and of the teaching of nature, and thus it seemed excusable to attribute to them a knowledge of the Mosaic doctrines. The third book of the Sibyllines (c. B.C. 150) is the most valuable relic of this pseudo-Hellenic literature, and shows how far the conception of Judaism was enlarged to meet the wider views of the religious condition of heathendom which was opened by a more intimate knowledge of Greek thought; though the later Apocalypse of Ezra [ESDRAS, IV.] exhibits a marked reaction towards the extreme exclusiveness of former times.

But the indirect influence of Greek literature and philosophy produced still greater effects upon the Alexandrine Jews than the open conflict and combination of religious dogmas. The literary school of Alexandria was essentially critical and not creative. For the first time men laboured to collect, revise, and classify all the records of the past. Poets trusted to their learning rather than to their imagination. Language became a study; and the legends of early mythology were transformed into philosophical mysteries. The Jews took a vigorous share in these new studies. The caution against writing, which became a settled law in Palestine, found no favour in Egypt. Numerous authors adapted the history of the Patriarchs, of Moses, and of the Kings to classical models (Euseb. *Præp. Ev.* ix. 17-39. Eupolemus, Artapanus (?), Demetrius, Aristaeus, Cleodemus or Malchas, "a prophet"). A poem which bears the name of Phocylides gives in verse various precepts of Leviticus (*Daniel sec. LXX.*, *Apolog.* p. 512 f.; Romae, 1772); and several large fragments of a "tragedy" in which Ezekiel (c. B.C. 110) dramatized the Exodus, have been preserved by Eusebius (l. c.), who also quotes numerous passages in heroic verse from the elder Philo and Theodotus. This classicism of style was a symptom and a cause of classicism of thought. The same Aristobulus who gave currency to the Judaic-Orphic verses endeavoured to show that the Pentateuch was the real source of Greek philosophy (Euseb. *Præp. Ev.* xiii. 12; Clem. Al. *Strom.* vi. 98).

The proposition thus enunciated was thoroughly congenial to the Alexandrine character; and henceforth it was the chief object of Jewish speculation to trace out the subtle analogies which were supposed to exist between the writings of Moses and the teaching of the schools. The circumstances under which philosophical studies first gained a footing at Alexandria favoured the attempt. For some time the practical sciences reigned supreme; and the issue of these was scepticism (Matter, *Hist. de l'École d'Alex.* iii. 162 ff.). Then at length the clear analysis and practical morality of the Peripatetics found ready followers; and in the strength of the reaction men eagerly trusted to those splendid ventures with which Plato taught

them to be content till they could gain a surer knowledge (*Phaed.* p. 85). To the Jew this surer knowledge seemed to be already given; and the belief in the existence of a spiritual meaning underlying the letter of Scripture was the great principle on which all his investigations rested. The facts were supposed to be essentially symbolic: the language the veil (or sometimes the mask) which partly disguised from common sight the truths which it enveloped. In this way a twofold object was gained. It became possible to withdraw the Supreme Being (τὸ ὄν, δ ὦν) from immediate contact with the material world; and to apply the narratives of the Bible to the phenomena of the soul. It is impossible to determine the process by which these results were embodied; out, as in parallel cases, they seem to have been shaped gradually in the minds of the mass, and not fashioned at once by one great teacher. Even in the LXX. there are traces of an endeavour to interpret the anthropomorphic imagery of the Hebrew text [SEPTUAGINT]; and there can be no doubt that the Commentaries of Aristobulus gave some form and consistency to the allegoric system. In the time of Philo (B.C. 20—A.D. 50) the theological and interpretative systems were evidently fixed even in many of their details, and he appears in both cases only to have collected and expressed the popular opinions of his countrymen.

In each of these great forms of speculation—the theological and the exegetical—Alexandrianism has an important bearing upon the Apostolic writings. But the doctrines which are characteristic of the Alexandrine school were by no means peculiar to it. The same causes which led to the formation of wider views of Judaism in Egypt, acting under greater restraint, produced corresponding results in Palestine. A doctrine of the Word (*Memra*) and a system of mystical interpretation grew up within the Rabbinic schools, which bear a closer analogy to the language of St. John and to the "allegories" of St. Paul than the speculations of Philo.

But while the importance of this Rabbinic element in connexion with the *expression* of Apostolic truth is often overlooked, there can be no doubt that the Alexandrine teaching was more powerful in furthering its *reception*. Yet even when the function of Alexandrianism with regard to Christianity is thus limited, it is needful to avoid exaggeration. The preparation which it made was indirect and not immediate. Philo's doctrine of the Word (Logos) led men to accept the teaching of St. John, but not to anticipate it; just as his method of allegorizing fitted them to enter into the arguments of the Epistle to the Hebrews, though they could not have foreseen their application.

The first thing, indeed, which must strike the reader of Philo in relation to St. John is the similarity of phrase without a similarity of iden. His treatment of the Logos is vague and inconsistent. He argues about the term and not about the reality, and seems to delight in the ambiguity which it involves. At one time he represents the Logos as the reason of God in which the archetypal ideas of things exist (λόγος ἐνδιδότος), at another time as the Word of God by which He makes himself known to the

outward world (λόγος προφορικός); but he nowhere realizes the notion of One Who is at once Revealer and the Revelation, which is the essence of St. John's teaching. The idea of the active Logos is suggested to him by the necessity of withdrawing the Infinite from the finite, God from man, and not by the desire to bring God to man. Not only is it impossible to conceive that Philo could have written as St. John writes, but even to suppose that he could have admitted the possibility of the Incarnation of the Logos, or of the personal unity of the Logos and the Messiah. But while it is right to state in its full breadth the opposition between the teaching of Philo and St. John,* it is impossible not to feel the important office which the mystic theosophy, of which Philo is the representative, fulfilled in preparing for the apprehension of the highest Christian truth. Without any distinct conception of the personality of the Logos, the tendency of Philo's writings was to lead men to regard the Logos, at least in some of the senses of the term, as a person; and while he maintained with devout earnestness the indivisibility of the Divine nature, he described the Logos as Divine. In this manner, however unconsciously, he prepared the way for the recognition of a twofold personality in the Godhead, and performed a work without which it may well appear that the language of Christianity would have been unintelligible (comp. Dörner, *Die Lehre von der Person Christi*, i. pp. 23 sq.).

The allegoric method stands in the same relation to the spiritual interpretation of Scripture as the mystic doctrine of the Word to the teaching of St. John. It was a preparation and not an anticipation of it. Unless men had been familiarized in some such way with the existence of an inner meaning in the Law and the Prophets, it is difficult to understand how an Apollon "mighty in the Scriptures" (Acts xviii. 24–28) could have convinced many, or how the infant Church could have seen almost unmoved the ritual of the Old Covenant swept away, strong in the conscious possession of its spiritual antitypes. But that which is found in Philo in isolated fragments combines in the N. T. to form one great whole. In the former the truth is affirmed in casual details, in the latter it is laid down in its broad principles which admit of infinite application; and a comparison of patristic interpretations with those of Philo will show how powerful an apostolic example exercised in curbing the imagination of later writers. Nor is this all. While Philo regarded that which was positive in Judaism as the mere symbol of abstract truths, in the Epistle to the Hebrews it appears as the shadow of blessings realized (Heb. ix. 11, γενομένων) in the presence of a personal Saviour. History in the one case is the enunciation of a riddle; in the other it is the record of a life.

The speculative doctrines which thus worked for the general reception of Christian doctrine were also embodied in a form of society which was afterwards transferred to the Christian Church. Numerous bodies of ascetics (*Thera-*

* The closest analogy to the teaching of Philo on the Logos occurs in the Epistle to the Hebrews. Compare Heb. iv. 12 with Philo, *Quis rer. div. hæcres.* § 26.

proutae), especially on the borders of Lake Mareotis, devoted themselves to a life of ceaseless discipline and study. Unlike the Essenes, who present the corresponding phase in Palestinian life, they abjured society and labour, and often forgot, as it is said, the simplest wants of nature in the contemplation of the hidden wisdom of the Scriptures (Philo, *de Vit. Contempl.* throughout). The description which Philo gives of their occupation and character seemed to Eusebius to present so clear an image of Christian virtues that he claimed them as Christians; and there can be no doubt that some of the forms of monasticism were shaped upon the model of the Therapeutae (Euseb. *H. E.* ii. 16).

According to the common legend (Euseb. *l. c.*) St. Mark first "preached the Gospel in Egypt, and founded the first Church in Alexandria." At the beginning of the second century the number of Christians at Alexandria must have been very large, and the great leaders of Gnosticism who arose there (Basilides, Valentinus) exhibit an exaggeration of the tendency of the Church. But the later forms of Alexandrine speculation, the strange varieties of Gnosticism, the progress of the catechetical school, the development of Neo-Platonism, the various phases of the Arian controversy, belong to the history of the Church and to the history of philosophy. To the last Alexandria fulfilled its mission; and we still owe much to the spirit of its great teachers, which in later ages struggled, not without success, against the sterner systems of the West.

[In the face of the general acceptance of Alexandrine syncretism, a somewhat opposite view is taken by Renouf (*Libert Lectures*, 1879, pp. 246-248), who denies that Alexandria was of any importance "as a medium of interchange of ideas between the Eastern and Western worlds." Alexandrine thought, he maintains, was free from Oriental influence; Alexandrine philosophers were either ignorant or contemptuous of Oriental ideas, and of the Egyptian language and literature. He quotes M. Ampère, "Alexandre fut très grecque, assez juive et presque point égyptienne" (*Revue des Deux Mondes*, Sept. 1846, p. 735), and supports his view by pointing out that down to the Roman times there had been no commercial communication between Alexandria and the distant East, the Indian traffic passing through the Gulf of Akaba, and being conveyed to the Mediterranean either by Palmyra and Antioch or by Petra and Gaza (quoting Renaud, "Sur le royaume de la Mésène et de la Kharasène," in the *Mém. de l'Acad. des Insér.* t. xxiv. pt. 2, p. 215; and Lumbro, *Recherches sur l'économie politique de l'Égypte sous les Lagides*, chap. vi. on Commerce).—K.]

The following works embody what is valuable in the earlier literature on the subject, with copious references to it: Matter, *Histoire de l'École d'Alexandrie*, 2nd edit., Paris, 1840; A. F. Dähne, *Geschichtliche Darstellung der Jüdisch-Alexandrinischen Religions-Philosophie*, Halle, 1834; A. F. Gfrörer, *Philo und die Jüdisch-Alexandrinische Theosophie*, Stuttgart, 1835. To these may be added H. Ewald, *History of Israel*, vol. v. 223 sq.; J. M. Jost, *Gesch. des Judenthums*, Leipzig, 1857, i. 344 sq., 388 sq.;

A. Neander, *History of Christian Church*, vol. i. 66 sq., Eng. tr., 1847; Prof. Jowett, *Philo and St. Paul, St. Paul's Epistles to the Thessalonians*, &c., London, 1855, i. 363 ff. And for the later Christian history: H. F. Guericke, *De Scholâ Alexandrinâ Catechetica*, Halis, 1825; Haselbach, *De Scholâ, quæ Alex. floruit, Catechetica*, part i., Stettin, 1826; cf. Matter, *II. de l'École d'Alex.* 1820. For Alexandrian Gnosticism and allegory, cf. Baur's *Church History*, vol. i. pt. iii. chap. i., Eng. tr. (Williams and Norgate).

In recent literature the general subject has been very fully discussed. Special mention may here be made of Herzfeld's *Gesch. des Volkes Israel*, Bd. iii.; Grätz, *Gesch. der Juden*, Bd. iii. 3; Hausrath, *Neutestamentliche Zeitgeschichte*, Bd. ii. 91-145; Stanley's *Jewish Church*, Lect. xlvii.; Schürer's *Gesch. d. Jud.* Bd. ii. 493 sq. (1886).

For Alexandrine religious thought, see also Zeller, *Die Philosophie der Griechen*, &c., iii. 2, 338-418 (1881); Lipsius, *Alexandr. Religionphilos.*, in Schenkel's *Bibel Lexicon*; and specially for Philo's treatment of the Logos, Heinze, *Die Lehre vom Logos in der griech. Philos.*, 1872; Soulier, *La doctrine du Logos chez Philon d'Alexandrie*, 1876; Lightfoot, *St. Paul's Epistle to the Colossians*, note on i. 15; Westcott, *Gospel according to St. John*, Introd. xv.-xviii., and *Introduction to the Study of the Gospels*, chap. iii.; Bigg, *The Christian Platonists of Alexandria*, p. 14, &c.; Drummond's *Philo-Judaicus*.⁴ [B. F. W.] [R.]

ALEXANDRIANS, THE (οἱ Ἀλεξανδρεῖς).

1. The Greek inhabitants of Alexandria (3 Macc. ii. 30, iii. 21). 2. *Alexandrini*. The Jewish colonists of that city, who were admitted to the privileges of citizenship, and had a synagogue at Jerusalem (Acts vi. 9). [ALEXANDRIA.] [W. A. W.]

ALGUM or ALMUG TREES (עֲרֵבִי).

algummin; עֲרֵבִי, *almujjim*; ξυλλογελέκητα, A. ξ. πελεκητά, B. in 1 K. x. 11, 12; ξ. πικύνα; *ligna thyina, ligna picea*. There can be no question that these words are identical, although, according to Celsius (*Hierob.* i. 173), some doubted it. The same author enumerates no fewer than fifteen different trees, each one of which has been supposed to have a claim to represent the *algum* or *almug* tree of Scripture. Mention of the *almug* is made in 1 K. x. 11, 12 (*almug* in 2 Ch. ix. 10, 11) as having been brought in great plenty from Ophir, together with gold and precious stones, by the fleet of Hiram, for Solomon's Temple and house, and for the construction of musical instruments. "The king made of the almug-trees pillars for the house of the Lord, and for the king's house, harps also and psalteries for singers; there came no such almug-trees, nor were seen unto this day" (1 K. i. c.). In 2 Ch. ii. 8 (though not in 1 K. v. 6), Solomon—by an intelligible mistake on the part of the Chronicler—is represented as desiring Hiram to send him "cedar-trees, fir-trees, and algum-trees out of Lebanon" (cp. *Speaker's Comm.*, note l. c.). From the passage

⁴ Alexandria occurs in the Vulgate by an error for No-Ammon [No-AMMON], Jer. xvi. 25; Ezek. xxx. 14, 15, 16; Nah. iii. 8.

in Kings, it seems clear that almug-trees came from Ophir. No information can be deduced from the readings of the LXX., which explains the Hebrew word by "hewa wood" (1 K. x. 11, B.), "unhewn wood" (*ibid.* A.), and "pine-wood" (2 Ch. ii. 8, and ix. 10, 11). The Vulg. in the passages of Kings and 2 Ch. ix. read *ligna thyina*; but in 2 Ch. ii. 8 follows the LXX., and has *ligna pinet*.

Interpreters are greatly perplexed as to what kind of tree is denoted by the words *algummim* and *almuggim*. The Chaldee and the Arabic interpretations, with Munster, A. Montanus, Deodatus, Noldius, Tigurinus, retain the original word, as do the A. V. and R. V. in all the three passages. We may notice the conjectures of the chief modern writers on the subject. Against the first four given below, objections have been raised. (1.) Some maintain that the *thyina** wood (*Thuya articulata*) is signified by *algum*. This wood, as is well known, was highly prized by the Romans, who used it for the doors of temples, tables, and a variety of purposes; for the citron-wood of the ancients appears to be identical with the *thyua*. (The word occurs in Rev. xviii. 12.) Its value to the Romans accounts for the reading of the Vulgate in the passages quoted above. But the *Thuya articulata* is indigenous to the north of Africa, and is not found in Asia; and few geographers will be found to identify the ancient Ophir with any port on the N. African coast. [OPHIR.] (2.) Not more happy is the opinion of Dr. Kitto, that the *deodar* is the tree probably designated by the term *almug* (*Pict. Bibl.*, note on 2 Ch.). On this subject Sir J. Hooker, in a letter to the writer, says, "The *deodar* is out of the question. It is no better than cedar, and never could have been exported from Himalaya." (3.) The late Dr. Royle, with more reason, is inclined to decide on the white sandal-wood (*Santalum album*; see *Cycl. Bib. Lit.*, art. "Algum"). This tree is a native of India and the mountainous parts of the coast of Malabar, and deliciously fragrant in the parts near to the root. It is much used in the manufacture of work-boxes, cabinets, and other ornaments. (4.) The Rabbis understand a wood commonly called *brasil*, in Arabic *albaccam*, of a deep red colour, used in dyeing.^c This appears to be the *bukkum* (*Cues-alpina sappan*), a tree allied to the Brazil-wood of modern commerce, and found in India; and many of the Jewish doctors understand *coral* (i.e. coral-wood) by the word *almug*, the name no doubt having reference to the colour of the

wood. (5.) But little reliance can be placed on these rabbinical interpretations, and the most probable of all the attempts to identify the *almug* is that first proposed by Celsius (*Hierob.* i. 172), viz. that the red sandal-wood (*Pterocarpus santalinus*) may be the kind denoted by the Hebrew word. So also Rawlinson in *Speaker's Comm.* on 1 K. x. 11. Oettli (in Strack u. Zöckler, *Kgf. Komm.* on 2 Ch. ii. 7) indicates sandal-wood simply, without specification of colour.

This tree, which belongs to the natural order *Leguminosae*, and sub-order *Papilionaceae*, is a native of India and Ceylon. The wood is very heavy, hard, and fine-grained, and of a beautiful garnet colour, as any one may see who has observed the medicinal preparation, the compound tincture of lavender, which is coloured by the wood of the red sandal-tree. Dr. Lee (*Lex. Heb.* s. v. "Algummim"), identifying Ophir with some seaport of Ceylon, following Bochart (*Chanaan*, i. 46) herein, thinks that there can be no doubt that the wood in question must be either the *Kalanji ud* of Ceylon or the sandal-wood (*Pterocarpus santalinus*) of India. The *Kalanji ud*, which apparently is some species of *Pterocarpus*, was particularly esteemed and sought after for the manufacture of lyres and musical instruments, as Dr. Lee has proved by quotations from Arabic and Persian works. In fact he says that the Eastern lyre is termed the *ud*, perhaps because made of this sort of wood.

As to the derivation of the word, Hiller's (*Hierophyt.* pt. i. p. 106) derivation from two words supposed to mean "drops of gum" is untenable. Other etymologies that have been suggested may be seen in Celsius, *Hierob.* i. 172 sq.; Salmassius, *Hyl. Intr.* p. 120, b; Castell. *Lex.*

Hept. s. v. אלגום. The word is evidently foreign. Gesenius connects it with the Sanskrit *mic'uta* (the Arab. art. prefixed), *sandal-wood*, but the Sanskrit word is of doubtful existence; and uncertainty rests also, according to Böthlingk, upon another Sanskrit word, *calgu*, *cal-guka*, with which Lassen compared it, giving to it the meaning of *sandal-wood* (see *IV.*¹

s. v. אלמנים). Josephus, though not naming the almug-tree (*Ant.* viii. 7, § 1), makes special mention of a tree not unlike pine, which was imported by Solomon, but which he is careful to warn us not to confuse with the pine-trees known to the merchants of his time. "Those we are speaking of," he says, "were in appearance like the wood of the fig-tree, but were whiter and more shining." This description is too vague to allow us even to conjecture what he means. On the whole, the arguments are in favour of the red sandal-wood being the *almug* of the O. T. [W. H.] [H. B. T.]

ALI'AH. [ALVAH.]

ALI'AN. [ALVAN.]

ALIEN. [STRANGER.]

ALLEGORY, a figure of speech, which has been defined by Bishop Marsh, in accordance with its etymology, as "a representation of one thing which is intended to excite the representation of another thing;" the first representation being consistent with itself, but requiring, or being capable of admitting, a moral and

* *Thuya* appears to be a corruption of *Thya*, from *θύια*, "I sacrifice," the wood having been used in sacrifices. *Thuya occidentalis* is the well-known evergreen, "arbor vitæ."

^b R. Salomon Ben Melek, 1 K. x. 11, and R. Dav. Kimchi, 2 Ch. ii. 8. "Algummim est quod almyggim, arbor rubris coloris dicta Arabum lingua *albaccam*, vulgo *brasilia*." See Celsius, who wonders that the term "Brazil-wood" (*Lignum brasiliense*) should be named by one who lived 300 years before the discovery of America; but the word *brasil* also = red colour. Cf. Rosenm. *Bot. of Bibl.* p. 243, Morren's note.

^c بقم. *Lignum arboris magnæ, foliis amygdaliniæ, ejus decocto tingitur color rubicundus seu pseudo-purpureus—lignum brasilium—etiam, color ejus tincturam referens* (Gollus, *Arab. Lex.* s. v. *bakkam*).

spiritual interpretation over and above its literal sense. An allegory has been incorrectly considered by some as a lengthened or sustained metaphor, or a continuation of metaphors, as by Cicero, thus standing in the same relation to metaphor as parable to simile. But the two figures are quite distinct; no sustained metaphor, or succession of metaphors, can constitute an allegory, and the interpretation of allegory differs from that of metaphor, in having to do not with words but things. In every allegory there is a twofold sense; the immediate or historic, which is understood from the words, and the ultimate, which is concerned with the things signified by the words. The allegorical interpretation is not of the words, but of the things signified by them (cp. Luke viii. 11, &c.; 2 Sam. xii. 1-14); and not only may, but actually does, coexist with the literal interpretation in every allegory, whether the narrative in which it is conveyed be of things possible or real. An illustration of this may be seen in Gal. iv. 24, where the Apostle gives an allegorical interpretation to the historical narrative of Hagar and Sarah; not treating that narrative as an allegory in itself, as our A. V. would lead us to suppose, but drawing from it a deeper sense than is conveyed by the immediate representation, as "containing an allegory" (R. V.).

In *pure* allegory no direct reference is made to the principal object. Of this kind the parable of the prodigal son is an example (Luke xv. 11-32). In *mixed* allegory the allegorical narrative either contains some hint of its application, as Ps. lxxx., or the allegory and its interpretation are combined, as in John xv. 1-8; but this last passage is, strictly speaking, an example of a metaphor.

The distinction between the parable and the allegory is laid down by Dean Trench (*On the Parables*, chap. i.) as one of form rather than of essence. "In the allegory," he says, "there is an interpretation of the thing signifying and the thing signified, the qualities and properties of the first being attributed to the last, and the two thus blended together, instead of being kept quite distinct and placed side by side, as is the case in the parable." According to this, there is no such thing as pure allegory as above defined. [W. A. W.]

Allegory (ἄλλο ἀγορεύειν) has its position and history in Biblical Hermeneutics. This is traced, and may be followed with much profit, in Hamburger, *RE.*² Abth. ii. s. n. *Allegorie*; in Herzog, *RE.*²; and Wetzer u. Welte's *K. Lex.* s. n. *Hermeneutik*, *Biblische*. Cp. also Farrar's *Hist. of Interpretation*, Index, s. n. "Allegory." [F.]

ALLELUIA (Ἀλληλούια; *Allelui*), so written in Rev. xix. 7 foll., or more properly

HALLELUJAH (חַלְלֵהוּיָהּ), "praise ye Jehovah," as it is found in the margin of Ps. civ. 35, cv. 45, cvi., cxi. 1, cxii. 1, cxiii. 1 (cp. Ps. cxiii. 9, cv. 18, cxvi. 19, cxvii. 2). The Psalms from cxiii. to cxviii. were usually called by the Jews the Hallel, though some have applied the name by preference to Psalms cxxxiv.-vii. These Psalms were sung on the first of the month, at the feast of Dedication and the feast of Tabernacles, the feast of Weeks and the feast of the

Passover. [HOSANNA.] In later times, New Year's day and the day of Atonement were excluded from their seasons in deference to the grave character of these days as "days of judgment"; and the same exclusion applied to the feast of Purim. At the Passover Ps. cxiii. and cxiv., according to the school of Hillel (the former only according to the school of Shammai), were sung before the feast, and the remainder at its termination, after drinking the last cup. The hymn (Matt. xxvi. 30) sung by Christ and His disciples after the last supper is supposed to have been the great Hallel, which seems to have varied according to the feast* (cp. Hamburger, *RE.* für *Bibel u. Talmud*, Abth. ii. s. v. "Hallel"). The literal meaning of "Hallelujah" sufficiently indicates the character of the Psalms in which it occurs, as hymns of praise and thanksgiving. They are all found in the last book of the collection, and bear marks of being intended for use in the Temple-service; the words "praise ye Jehovah" being taken up by the full chorus of Levites. In the great hymn of triumph in heaven over the destruction of Babylon, the Apostle in vision heard the multitude in chorus like the voice of mighty thunders burst forth, "Alleluia, for the Lord God omnipotent reigneth," responding to the voice which came out of the throne, saying, "Praise our God, all ye His servants, and ye that fear Him, both small and great" (Rev. xix. 1-6). In this, as in the offering of incense (Rev. viii.), there is allusion to the service of the Temple, as the Apostle had often witnessed it in its fading grandeur. [W. A. W.] [F.]

ALLIANCES. In the time of Abraham alliances with foreigners were not forbidden. At Mamre he had his "confederates" among the chiefs of Canaan (Gen. xiv. 13); and his alliance with Abimelech, king of Gerar (Gen. xxi. 22), renewed by Isaac (Gen. xxvi. 26), is a model of primitive simplicity and trustfulness. Presently this permission was withdrawn, and on the first establishment of the Israelites in Palestine connexions between them and the surrounding nations were forbidden (Lev. xviii. 3, 4; xx. 22, 23). The geographical position of their country, the peculiarity of their institutions, and the prohibitions against intercourse with the idolatrous Canaanites and other heathen nations, alike tended to promote an exclusive and isolated state. But with the extension of their power under the kings, the Jews were brought more into contact with foreigners, and alliances became essential to the security of their commerce. Solomon concluded two important treaties chiefly for commercial purposes: the first was with Hiram, king of Tyre; and, if principally with the view of obtaining

* Historically the introduction of the Hallel into the synagogal service is traced, according to the Rabbinic teachers of the 3rd and 4th cent. A.D., to the men of the days of Mordecai and Esther, who instituted its use in commemoration of great deliverances from great sufferings and sorrows. It was easy to go further and base the idea upon the "Hallel" of a Moses and Israel after their passage through the Red Sea, of a Joshua and Israel after their battles with the kings of Canaan, of a Deborah and Barak after the victory over Sisera, of an Ananias, Misacl, and Azarias after their deliverance from the king of Babylon.

materials and workmen for the erection of the Temple, and afterwards for the supply of ship-builders and sailors (1 K. v. 2-12, ix. 27), it was also a general league of amity (cp. the rebuke to Tyre in Amos i. 9): the second was with Pharaoh, king of Egypt, and was cemented by his marriage with a princess of the royal family (1 K. iii. 1); by this he secured a monopoly of the trade in horses and other products of that country (1 K. x. 28, 29). After the division of the kingdom, political alliances (as distinguished from the lamentable matrimonial alliances, *c.g.* 1 K. xi. 1-8, xvi. 31) were of an offensive and defensive nature: they had their origin partly in the internal disputes of the kingdoms of Judah and Israel, and partly in the position which these countries held relatively to Egypt on the one side, and the great Eastern monarchies of Assyria and Babylonia on the other. The fresh light from the ancient monuments cast upon the Jewish scant historical records enables us to account for, and sometimes correct, views upon the alliances and counter-alliances formed between these peoples. Thus the invasion of SHISHAK in Rehoboam's reign—directed as it was against the northern as well as the southern kingdom—can no longer be claimed as an alliance made with Jeroboam, who had previously found an asylum in Egypt (1 K. xi. 40, xii. 2, xiv. 25). Each, however, of these monarchs sought a connexion with the neighbouring kingdom of Syria, on which side Israel was particularly assailable (1 K. xv. 19): but Aśa ultimately succeeded in securing the active co-operation of Benhadad against Baasha (1 K. xv. 16-20). Another policy, induced probably by the encroaching spirit of Syria, led to the formation of an alliance between the two kingdoms under Ahab and Jehoshaphat, which was maintained until the end of Ahab's dynasty: it occasionally extended to commercial operations (2 Ch. xx. 36). The alliance ceased in Jehu's reign: war broke out shortly after between Amaziah and Jeroboam II.: each nation looked for foreign aid, and a coalition was formed between Rezin king of Syria and Pekah on the one side, and Ahab and Tiglath-pileser king of Assyria on the other (2 K. xvi. 5-9). By this means an opening was afforded to the advances of the Assyrian power; and the kingdoms of Israel and Judah, as they were successively attacked, sought the alliance of the Egyptians, who were strongly interested in maintaining the independence of the Jews as a barrier against the encroachments of the Assyrian power. Thus Hoshea made a treaty with So (Sevechus, the Shabak of the 25th Dynasty), and rebelled against Shalmaneser (2 K. xvii. 4): Hezekiah adopted the same policy in opposition to Sennacherib (Is. xxx. 2). In neither case was the alliance productive of much good: the Israelites were abandoned by So: in Hezekiah's case, the Egyptian troops were defeated at Altkû in the earlier stages of the campaign of B.C. 701, Judah was overrun by the Assyrian soldiery, and heavy tribute exacted. Later on, when a fresh movement on the part of the Egyptians and a possible junction of his own forces with those of Tirhakah might have tempted Hezekiah to a fresh alliance, he was taught by Isaiah to ally himself to God as the only defence against the Assyrian (cp. Driver, *Isaiah*, ch. vii.). The weak condition

of Egypt at the beginning of the 26th Dynasty left Judah entirely at the mercy of the Assyrians, who under Esarhaddon subdued the country, and by a conciliatory policy secured the adhesion of Manasseh and his successors to his side against Egypt (2 Ch. xxxiii. 11-13). It was apparently as an ally of the Babylonians that Josiah, ninety years later, resisted the advance of Necho (2 Ch. xxxv. 20). His defeat, however, and the check to the Babylonian troops, made the Jews the subjects of Egypt. Nebuchadnezzar's first expedition against Jerusalem was contemporaneous with, and probably in consequence of, the expedition of Necho against the Babylonians (2 K. xxiv. 1; Jer. xlvii. 2): and lastly Zedekiah's rebellion was accompanied with a renewal of the alliance with Egypt (Ezek. xvii. 15). A temporary relief appears to have been afforded by the advance of Hophrah (Jer. xxxvii. 11), but it was of no avail to prevent the extinction of Jewish independence.

On the restoration of independence Judas Maccabæus sought an alliance with the Romans, who were then gaining an ascendancy in the East, as a counterpoise to the neighbouring state of Syria (1 Macc. viii.; Joseph. *Ant.* xii. 10, §6). This alliance—the terms of which were graven on brass and deposited in the Capitol at Rome—was renewed by Jonathan (1 Macc. xii. 1; *Ant.* xiii. 5, §8) and by Simon (1 Macc. xv. 17; *Ant.* xiii. 7, §3): on the latter occasion the independence of the Jews was recognised and formally notified to the neighbouring nations B.C. 140 (1 Macc. xv. 22, 23). Treaties of a friendly nature were at the same period concluded with the Lacedæmonians under an impression that they came of a common stock (1 Macc. xii. 2, xiv. 20; *Ant.* xii. 4, §10, xiii. 5, §8). The Roman alliance was again renewed by Hyrcanus, B.C. 128 (*Ant.* xiii. 9, §2), after his defeat by Antiochus Sidetes, and the losses he had sustained were repaired. This alliance, however, ultimately proved fatal to the independence of the Jews: the rival claims of Hyrcanus and Aristobulus having been referred to Pompey, B.C. 63, he availed himself of the opportunity of placing the country under tribute (*Ant.* xiv. 4, §4). Finally, Herod was raised to the sovereignty by the Roman Senate, acting under the advice of M. Antony (*Ant.* xiv. 14, §5).

The formation of an alliance was attended with various religious rites: a victim was slain and divided into two parts, between which the contracting parties passed, invoking imprecations of a similar destruction upon him who should break the terms of the alliance (Gen. xv. 10; cf. Liv. i. 24): hence the expression בְּרִית חֶטֶת (= *ἔρκια τέμνειν, foedus iurare*), to make (*lit. to cut*) a treaty; hence also the use of the term חֶטֶת (*lit. imprecation*) for a covenant. That this custom was maintained to a late period appears from Jer. xxxiv. 18-20. Generally speaking, the oath alone is mentioned in the contracting of alliances, either between nations (Josh. ix. 15) or individuals (Gen. xxi. 28, xxxi. 53; 2 K. xi. 4; 1 Macc. xv. 17). The event was celebrated by a feast (Gen. i. c.; Ex. xxiv. 11; 2 Sam. iii. 12, 20). Salt, as symbolical of fidelity, was used on these occasions; it was applied to the sacrifices (Lev. ii. 13), and probably used, as among the Arabs, at

hospitable entertainments; hence the expression "covenant of salt" (Num. xviii. 19; 2 Ch. xiii. 5). Occasionally a pillar or a heap of stones was set up as a memorial of the alliance (Gen. xxi. 32), a custom prevalent among the Assyrians also. Presents were also sent by the party soliciting the alliance (1 K. xv. 18; Is. xxx. 6; 1 Macc. xv. 18). The fidelity of the Jews to their engagements was conspicuous at all periods of their history (Josh. ix. 18), and any breach of covenant was visited with very severe punishment (2 Sam. xxi. 1; Ezek. xvii. 16).

[W. L. B.] [F.]

AL'LOM (B. 'Αλλών, A. 'Αδλόν, *Malinon*), 1 Esd. v. 34. The same as AMI or AMON. Cp. Ezra ii. 57; Neh. vii. 59. [W. A. W.] [F.]

ALLON (אלון or אלל), a large strong tree of some description, probably an oak (see *Ges. Thes.* 51, 103; Stanley, App. § 76). The word is found in two names in the topography of Palestine.

1. ALLON, more accurately ELON, אלון (עֲלֹנִים; B. Μολά καὶ Βερεμείν, A. Μηλὼν καὶ Βερεμείν; *Elon*), a place named among the cities of Naphtali (Josh. xix. 33). Probably the more correct construction is to take it with the following word, i.e. either (R. V.) "the oak in Zaanannim," or—treating the ל as part of the word (R. V. marg.)—the oak (or terebinth) of *Bezaanannim*. In the former case, the place might possibly derive its name Zaanannim from some nomad tribe or wanderers (see the verb in Is. xxxiii. 20). Such a tribe were the Kenites, and in connexion with them the place is again named in Judg. iv. 11,^b with the additional definition of "by Kedesh" (of Naphtali). The latter view (see Dillmann on Josh. xix. 33) is, however, favoured by the absence of the article before אלון.

In this case it would be better to read, as in Judg. iv. 11 (Cethib), בְּצַעֲנִים, *Bi'zannim*. The A. V., following the Vulgate, renders here "the plain of Zaanaim." [R. V. as above; B. εὖς θρύος (A. πρὸς θρύον) πλεονεκτούντων (thinking of εὖς to be corectous).] [ELON.] (See Stanley, p. 340, note.) [G.] [S. R. D.]

2. ALLON-BA'CHUTH (אלון בכח; R. V. *Allon-Bacuth* = "oak of weeping;" and so *βάλανος πένθους*; *Quercus fletus*), the tree under which Rebekah's nurse, Deborah, was buried "beneath Bethel" (Gen. xxxv. 8). Ewald (*Gesch.* iii. 29) believes the "oak of Tabor" (1 Sam. x. 3, A. V. "plain of T.") to be the same as, or the successor of, this tree; "Tabor" being possibly

* אלון, *Allon*, is the reading of V. d. Hooght, and of Walton's Polyglott; but the best authorities have as above (De Rossi, *Var. Lectt. Suppl.* p. 35).

† The Targum of Jonathan renders this passage by "the plain (מִצְרָה) of the pools" (מִצְרֵי מַיִם), connecting *Bezaanannim* with a late Heb. word מִצְרֵי (Be'aim) meaning tanks or pools (see Kimchi f. l.; Levy, *Chald. WB.* s. v. מִצְרֵי. *NHWB.* s. v. מִצְרֵי), upon which speculations respecting the character of the locality have been based (Ewald, *JBW.* ii. 62). "Plain" is in accordance with the usual rendering of מִצְרֵי in the Targum (cp. "the plains of Moreh"). [S. R. D.]

* The Sam. Version, according to its customary rendering of Allon, has here בְּכִיתֵי מִשְׁכֹּר, "the plain of Bakhith." See this subject more fully examined under *Elon*.

a merely dialectical change from "Deborah;" he would further identify it with the "palm-tree of Deborah" (Judg. iv. 5). See also Stanley, pp. 143, 220. [G.] [W.]

AL'LOM (אלל; B. 'Αμλόν, A. 'Αλλών; *Allon*). A Simeonite, ancestor of Zirza, a prince of that tribe in the reign of Hezekiah (1 Ch. iv. 37). [W. A. W.] [F.]

ALMO'DAD (אלמוֹדָד; 'Ελμοδᾶδ; *Elmodad*), named first, in order, among the descendants of Joktan (Gen. x. 26; 1 Ch. i. 20 [B. omits]), and thus as the progenitor of an Arab tribe. His settlements must be looked for, in common with those of the other descendants of Joktan, in the Arabian peninsula; and his name appears to be preserved in that of Mudād (or El-Mudād, the word being one of those proper names that admit of the article being prefixed), a famous personage in Arabian history, the reputed father of Ishmael's Arab wife, and the chief of the Joktanite tribe Jurhum (not to be confounded with the older, or first, Jurhum), which, coming from the Yemen, settled in the neighbourhood of Mekka, and intermarried with the Ishmaelites. The name of Mudād was peculiar to Jurhum, and borne by several of its chiefs (Caussin de Perceval, *Essai sur l'Hist. des Arabes*, i. 33 seq., 168, and 195 seq.). Gesenius (*Lex.*, ed. Tregelles, in loc.) says, "If there were an ancient error in reading (for אלמוֹדָד), we might compare *Morad*, مَرَاد or مَرَاد, the name of a tribe living in a mountainous region of Arabia Felix, near Zabid." Dillmann (*Gen.* i. c.), D. H. Müller, and Halévy take אל to be the name of God (as often in Sabæan names), and, deriving מֹדָד from מֹדַד, render *God is One to be loved or God loves* (see MV.¹⁶ s. n.). Others have suggested

مضر, but, apart from philological objections, the well-known tribes of this stock are of Ishmaelite descent. Bochart (*Phaley*, ii. 16) thinks that Almodad may be traced in the name of the Ἀλουμῶται of Ptolemy (vi. 7, § 24), a people of the interior of Arabia Felix, near the sources of the river Lar [ARANIA]; but see against this view *ZDMG.* xxii. 658. [E. S. P.]

AL'MON (עֲלֵמֹן; B. Γάμαλα, A. Ἀλμών; *Almon*), a city within the tribe of Benjamin, with "auburbs" given to the priests (Josh. xxi. 18). Its name does not occur in the list of the towns of Benjamin in Josh. xviii. In the parallel list in 1 Ch. (vi. 60) it is found as Alemeth [B. Γαλέμεθ, A. -η; *Almeth*];—probably a later form, and that by which it would appear to have descended to us. [ALEMETH.] [G.] [W.]

AL'MON-DIBLATHAIM (accurately Diblathaimah, עֲלֵמֹן דִּבְלָתַיִם; Γάμων Δεβλαθδαίμ; *Helmon-diblathaim*), one of the latest stations of the Israelites, between Dibon-gad and the mountains of Abarim (Num. xxxiii. 46, 47 [A. in v. 47 Δειβλαθδαίμ]). Dibon-gad is doubtless the

* This suggests that the Hebrew name of the Gamala so famous in the Roman war in Galilee may have been Almon.

present *Dhiban*, just to the north of the Arnon; and there is thus every probability that Almondiblathaim was identical with Beth-diblathnim, a Moabite city mentioned by Jeremiah (xlviii. 22) in company with both Dibon and Nebo, and that its traces will be discovered on further exploration. The name Beth-diblathaim occurs on the Moabite stele, and it has been identified, doubtfully, by Major Conder with the ruins of *Deleiyat*, south of the *Zerka M'ain*. [BETH-DIBLATHAIM.] [G.] [W.]

ALMOND (אֶמְוֶן, *shâkêd* [לֹז, *lûz*]; ἀμύγδαλον, κάρυον, καρῖνος, καρυστῆρ; *amygdalus*, *amygdala*, in *nucis modum*, *instar nucis*, *virga vigilans*). This word is found in Gen. xliii. 11; Ex. xxv. 33, 34, xxxvii. 19, 20; Numb. xvii. 8; Eccles. xii. 5; Jer. i. 11, in the text of the A. V. It is invariably represented by the same Hebrew word (*shâkêd*), which sometimes stands for the whole tree, sometimes for the fruit or nut: for instance, in Gen. xliii. 11, Jacob commands his sons to take as a present to Joseph "a little honey, spices and myrrh, nuts and almonds," where the fruit is clearly meant. In the passages out of the Book of Exodus the "bowls made like unto almonds," which were to adorn the golden candlestick, seem to allude to the nut also.^a Aaron's rod, that so miraculously budded, yielded *almond* nuts. In the two passages from Ecclesiastes and Jeremiah, *shâkêd* is translated *almond tree*, which from the context it certainly represents. It is clearly then a mistake to suppose, with some writers, that *shâkêd* stands exclusively for "almond-nuts," and that *lûz* signifies the "tree."^c It appears more probable that this tree, conspicuous as it was for its early flowering and useful fruit, was known by these two different names. The etymology of the Hebrew *lûz* is uncertain; and although the word occurs only in Gen. xxx. 37, where it is translated *hazel* in the text of the A. V., yet there can be little or no doubt that it is another word for the *almond* [so R. V. in *loco*], for in the Arabic this identical word, لوز, *lûz*, denotes the almond. [HAZEL.] The early appearance of the blossoms on the almond-tree (*Amygdalus communis*) was no doubt regarded by the Jews of old as a welcome harbinger of spring, reminding them that the winter was passing away—that the flowers would soon appear on the earth—and that the time of the singing of birds and the voice of the turtle would soon be heard in the land (Song of Sol. ii. 11, 12). *Shâkêd* is derived from a root

which signifies "to be wakeful," "to hasten," for the almond-tree blossoms very early in the season, the flowers appearing before the leaves. The word *shâkêd*, therefore, or the tree which hastened to put forth its blossoms, was a very beautiful and fitting synonym for the *lûz*, or almond-tree, in the language of a people so fond of imagery and poetry as were the Jews. We have in our own language instances of plants being named from the season of the year when they are flowering—*May* for *Hawthorn*; *Pasque Flower* for *Anemone*; *Lent Lily* for *Daffodil*; *Winter Cress* for *Hedge Mustard*. But perhaps the best and most exact illustration of the Hebrew *shâkêd* is to be found in the English word *Apricot*, or *Apricock*, as it was formerly and more correctly called, which is derived from the Latin *præcocus*, *præcoccia*; this tree was so called by the Romans, who considered it a kind of peach which ripened earlier than the common one; hence its name, the *præcocious tree* (comp. Plin. xv. 11; Martial, xiii. 46).

The almond-tree flowers early in January, and continues to show a mantle of white bloom suffused with a delicate blush, until February, when the fruit begins to set. The knowledge of this interesting fact will explain that otherwise unintelligible passage in Jeremiah (i. 11, 12), "The word of the Lord came unto me, saying, Jeremiah, what seest thou? And I said, I see the rod of an almond-tree (*shâkêd*). Then said the Lord unto me, Thou hast well seen, for I will hasten (*shâkêd*; R. V. "I watch over") My word to perform it."

In that well-known poetical representation of old age in Eccles. xii. 5 it is said, "the almond-tree shall flourish." This expression is generally understood as emblematic of the hoary locks of old age thinly scattered on the bald head, just as the white blossoms appear on the yet leafless boughs of this tree. Gesenius, however, does not allow such an interpretation, for he says with some truth^d that the almond flowers are pink or rose-coloured, not white. This passage, therefore, is rendered by him—"the almond is rejected."^e Though a delicious fruit, yet the old man, having no teeth, would be obliged to refuse it.^f If, however, the reading of the A. V.

שָׁקֵד (1) *decubuit*, (2) *vigilavit*=Arab. شَقِد.

שָׁקֵד, *insomnis*. The Chaldee is שָׁקֵד, *insomnis*. The Syriac word is similar.

^a The general colour of the almond blossom is pink, but the flowers do vary from deep pink to nearly white.

^b שָׁקֵד, *Gesenius* makes the verb שָׁקַד to be Hiphil future, from שָׁקַד, *to deride, to despise*; שָׁקַד would then be after the Syriac form, instead of שָׁקַד.

But all the old Versions agree with the translation of the A. V. [R. V. "blossom"], the verb being formed regularly from the root, שָׁקַד, *florere*. [See Wright, *Ecclesiastes*, p. 258 n., who prefers שָׁקַד, "will be despaired"]

^c "When the grinders cease because they are few" (Eccles. xii. 3). For some other curious interpretations of this passage, see that of R. Salomon, quoted by Sanctus Paganus in his *Thesaurus*, sub voce שָׁקַד, and Vatablus, *Annotata ad Ecclesiasten*, xii. 5 (*Crit. Sac.* iii. 256).

^a מִשְׁקָדִים, *Pual* part. pl., from denom. verb שָׁקַד, always used in Heb. text in reference to the golden candlestick; LXX. *κεκρυμμένους καρυσκούς*, al. *καρυσκούς*; Aquila, *ἐκκρυμμένους καρυσκούς*.

^b שָׁקֵד, "est *amygdalus* et *amygdalum*, arbor et fructus; hic autem fructus potius quam arboris forma designari videtur" (Rosenmüll. *Schol.* in Exod. xxv. 33). That *shâkêd* = tree and fruit, see also Fürst, *Concord.* שָׁקֵד, "*amygdala* et *amygdalum*, de arbore et fructu;" and Duxtorf, *Lex. Chald.* שָׁקֵד, "significat arborem et fructum." Michaelis (*Suppl.* s. v. שָׁקֵד) understands the almond-shaped bowls to refer to the blossom, i.e. the calyx and the corolla.

^c Harris, *Dict. Nat. H. Bibl.* art. "Almond," and Dr. Royle in Kitto, art. "Shâkêd."

is retained, then the allusion to the almond-tree is intended to refer to the *hastening* of old age in the case of him who remembereth not "his Creator in the days of his youth." As the almond-tree ushers in spring, so do the signs mentioned in the context foretell the approach of old age and death. It has always been regarded by the Jews with reverence, and even to this day the English Jews on their great feasts carry a bough of flowering almond to the synagogue, just as in old time they used to present palm-branches in the Temple, to remind them perhaps, as Lady Callcott has observed (*Script. Herb.* p. 10), that in the great famine in the time of Joseph the almond did not fail them, and that, as it "failed not to their patriarchs in the days of dearth, it cometh to their hand in this day of worse and more bitter privation, as a token that God forgetteth not His people in their distress, nor the children of Israel, though scattered in a foreign land, though their home is the prey of the spoiler, and their Temple is become an high place for the heathen."

The almond-tree, the scientific name of which is *Amygdalus communis*, belongs to the natural order *Rosaceae* and sub-order *Amygdaleae*. This order is a large and important one, for it contains more than 1000 species, many of which produce excellent fruit. Apricots, peaches, nectarines, plums, cherries, apples, pears, strawberries, &c., are all included under this order. It should be remembered, however, that the seeds, flowers, bark, and leaves of many plants in the order *Rosaceae* contain a deadly poison; namely, prussic or hydrocyanic acid. The almond-tree is a native of Western Asia and North Africa, but it is cultivated in the milder parts of Europe. It does not appear to have been cultivated in Egypt, since almonds were among the presents taken down thither by Jacob's sons. In Palestine it is indigenous. There are many wild almond-trees on Mount Carmel, and they abound in the lonely forests of Gilead, and are among the few trees which relieve the barrenness of the wilds of Moab. On Jebel Attarus and Jebel Shihan are many

orchards about Nablons (Shechem), the peach- and almond-trees are intermingled, the latter look white by contrast. In early spring they form a beautiful picture in the landscape there, as the lower slopes of Gerizim, as well as the valley, are studded with peaches and almonds (the descendants, doubtless, of those which supplied Jacob's sons with their gifts), in striking contrast with the deep green foliage of the orange-trees, and rivalling an apple orchard in splendour of colour. Though not so thickly massed, they are a not less beautiful feature in the forest scenery of Gilead. In England the almond is grown simply on account of its beautiful vernal flowers, for the fruit scarcely ever comes to maturity. The height of the tree is about 12 or 14 feet; the flowers are arranged for the most part in pairs; the leaves are long, ovate, with a serrated margin, and an acute point. The covering of the fruit is downy and succulent, enclosing the hard shell which contains the kernel. The bitter almond is the ungrafted wild tree. Four species of *Amygdalus* are indigenous in Palestine. The English *almond*, Spanish *almendra*, the Provençal *amandola*, the French *amande*, are all apparently derived from the Greek ἀμυγδαλή; Latin *amygdala*. It is curious to observe, in connexion with the almond-bowls of the golden candlestick, that pieces of rock-crystal used in adorning branch-candlesticks are still termed by the lapidaries "Almonds." [W. H.] [H. B. T.]

ALMS (Chald. ܐܠܡܝܢ), beneficence towards the poor, from Anglo-Sax. *almesse*, probably, as well as from the Germ. *almosen*, from ἀλεημοσύνη; *eleemosyna*, Vulg. (but see Bosworth, *A.-S. Dict.*). The word "alms" is not found in the A. V. of the canonical Books of the O. T., but it occurs repeatedly in the N. T., and in the apocryphal books of Tobit and Ecclesiasticus. The Heb. צְדָקָה, *righteousness*, is rendered by the LXX. in Deut. xxiv. 13, Dan. iv. 27, and elsewhere, ἀλεημοσύνη, instead of which the modern Revised text reads in Matt. vi. 1, *δικαιοσύνη*.

The duty of almsgiving, especially in kind, consisting chiefly in portions to be left designedly from produce of the field, the vineyard, and the oliveyard (Lev. xix. 9, 10, xxiii. 23; Deut. xv. 11, 14, xxiv. 19, 21, xxvi. 2-13; Ruth ii. 2), is strictly enjoined by the Law. After his entrance into the land of promise, the Israelite was ordered to present yearly the first-fruits of the land before the Lord, in a manner significant of his own previously destitute condition. Every third year also (Deut. xiv. 28) each proprietor was directed to share the tithes of his produce with "the Levite, the stranger, the fatherless, and the widow." The theological estimate of almsgiving among the Jews is indicated by the following passages:—Job xxxi. 17; Prov. x. 2, xi. 4; Eccl. ix. 22; Ps. cxli. 9; Dan. iv. 27; Acts ix. 36, the case of Dorcas; x. 2, of Cornelius: to which may be added, Tob. iv. 10, 11, xiv. 10, 11; and Ecclus. iii. 30, xl. 24. And the Talmudists went so far as to interpret *righteousness* by almsgiving in such passages as Gen. xviii. 19; Ps. xvii. 15; Is. liv. 14.

In the women's court of the Temple there were thirteen receptacles for voluntary offerings (cp. Mark xii. 41), one of which was devoted to

H

Almond-tree and blossom.

wild almond-trees. I found them covered with bloom 3000 feet above the sea in the beginning of February, and in Southern Gilead I have often, in my rides, gathered wild almond nuts well filled in March. Though the blossom of the almond is not white, yet when, as in the

BIBLE DICTIONARY.—VOL. I.

alms for education of poor children of good family. Before the Captivity there is no trace of permission of mendicancy, but it was evidently allowed in later times (Matt. xx. 30; Mark x. 46; Acts iii. 2).

After the Captivity, but at what time cannot be known certainly, a definite system of almsgiving was introduced, and even enforced under penalties. Besides the tithes mentioned above, and the portions of produce set apart for the poor in fields and vineyards, there were in every city three collectors. The collections were of two kinds: 1, of money for the poor of the city only, made by two collectors, received in a chest or box (תבנית) in the synagogue on the Sabbath, and distributed by the three in the evening; 2, for the poor in general, of food and money, collected every day from house to house, received in a dish (קעבלין) by the three collectors, and distributed by them. The two collections obtained the names respectively of "alms of the chest" and "alms of the dish." Special collections and distributions were also made on fast-days.

The Pharisees were zealous in almsgiving, but too ostentations in their mode of performance (Matt. vi. 2). But there is no ground for supposing that the expression *μη σαλπίζετε* is more than a mode of denouncing their display, by a figure drawn from the frequent and well-known use of trumpets in religious and other celebrations, Jewish as well as heathen (Winer, s. v.; Otho, *Lex. Rab.* pp. 163-167; Carpov. *Elem. Jud.* § 32, p. 745; Vitringa, *de Syn. Vet.* iii. 1, 13; Maimonides, *de Jure Pauperis*, a treatise devoted to the subject (Prideaux); Lightfoot, *Horae Hebr.*, on Matt. vi. 2, and *Descr. Templi*, 19; *Dict. of Antiq. s. v.* "Tuba.") [See OFFERINGS; POOR; TITHES; TEMPLE.]

The duty of relieving the poor was not neglected by the Christians (Matt. vi. 1-4; Luke xiv. 13; Acts xx. 35; Gal. ii. 10). Every Christian was exhorted to lay by on the Sunday in each week some portion of his profits, to be applied to the wants of the needy (Acts xi. 30; Rom. xv. 25-27; 1 Cor. xvi. 1-4). It was also considered a duty especially incumbent on widows to devote themselves to such ministrations (1 Tim. v. 10).

ALMUG-TREE. [ALGUM.]

AL'NATHAN (A. 'E'vavān, B. 'E'vavān; E'vathan). E'LNATHAN No. 2 (1 Esd. viii. 44 [LXX. v. 43]; cp. Ezra viii. 16, B. -μ).

[W. A. W.] [F.]

ALOE, LIGN ALOES (אלון, *Alālin*,

אלון, *Alālin*; *סקנאל* [in Num. xxiv. 6]; *סקנאל* [in Ps. xlv. 8]; *אלון*, *אלון*; Sym. *θυμιαμα* [in Cant. iv. 14]: *tabernacula, gutta, aloe*: in N. T. *אלון*, *aloe*, the name of some costly and sweet-smelling perfume prepared from a tree mentioned in Ps. xlv. 8, "All thy garments smell of myrrh, and aloes, and cassia;" in Prov. vii. 17, "I have perfumed my bed with myrrh, aloes, and cinnamon." In Cant. iv. 14, Solomon speaks of "myrrh and aloes, with all the chief spices." The word occurs once in the N. T. (John xix. 39), where mention is made of Nicodemus bringing "a mixture of myrrh and aloes, about an hundred pound weight," for the purpose of

anointing the body of our Lord. The tree itself is spoken of in Numb. xxiv. 6, where Balaam compares the camps of Israel to "trees of lign aloes which the Lord hath planted." Writers generally, following Celsus (*Hierob.* i. 135), who devotes thirty-five pages to this subject, suppose that the *Aquilaria agallochum* is the

Aquilaria agallochum.

tree in question. The trees which belong to the natural order *Aquilariaceae*, apetalous dicotyledonous flowering plants, are for the most part natives of tropical Asia. The species *A. agallochum*, which supplies the aloes-wood of commerce, is much valued in India on account of its aromatic qualities for fumigations and incense. It was well known to the Arabic physicians. Ibn Sina* (*Avicenna*), in the Latin translation, speaks of this wood under the names of *Agallochum*, *Xylaloe*, or *Lignum-Aloes*. In the Arabic original a description is given of it under the names of *Aghlagoon*, *Aghaloothi*, *Ood* (Dr. Royle, in *Cyc. Bib.* s. v. "Ahalim"). Dr. Royle (*Illustr. of Himalayan Botany*, p. 171) mentions three varieties of this wood as being obtained in the bazaars of Northern India.

The *Aquilaria secundaria* of China has the character of being the most highly scented. But it is a singular fact that this fragrance does not exist in any of this family of trees when in a

* Abdallah ibn Sina, a celebrated Arabian physician and natural philosopher, born A.D. 980. The Jews abbreviated the name into Abensina, whence the Christians called it *Avicenna*.

healthy and growing condition; it is only when the tree is diseased that it has this aromatic property. On this account the timber is often buried for a short time in the ground, which accelerates the decay, when the *utter*, or fragrant oil, is secreted. The best aloe-wood is called *calambac*, and is the produce of *Aquilaria agallochum*, a native of Silhet, in Northern India. This is a magnificent tree, and grows to the height of 120 feet, being 12 feet in girth: "The bark of the trunk is smooth and ash-coloured; that of the branches grey and lightly striped with brown. The wood is white, and very light and soft. It is totally without smell; and the leaves, bark, and flowers are equally inodorous" (*Script. Herb.* 238). The *Excoecaria agallochum*, with which some writers have confused the *Aq. agall.*, is an entirely different plant, being a small crooked tree, containing an acrid milky poison, in common with the rest of the *Euphorbiaceae*. Persons have lost their sight from this juice getting into their eyes, whence the plant's generic name, *Excoecaria*. It is difficult to account for the specific name of this plant, for the *agallochum* is certainly not the produce of it.

There would be no difficulty in the identification of *Ahalim* with the Oriental *A. agallochum*, as the three passages in which the perfume is mentioned would imply that it was a foreign product, were it not for the expression in Balaam's parable; for he speaks, as the passage would imply, of a tree familiar to himself or his hearers. But no species of *Aquilaria* is found in Mesopotamia, and we can scarcely assume that Balaam would take his illustration from a tree absolutely unknown. It seems much more probable that in this case the name was applied to some other but familiar tree, such as the graceful *Populus euphratica*, which in many parts is a conspicuous adornment of the banks of the Euphrates, and is pre-eminently the riverside tree of Western Asia. The difficulty seems to have been recognised by the LXX., who translate *αχαλμ*, as though the original had been

חֲלִיל, *ḥalīm*, and in this they are followed by the Vulg., Syriac, Arabic, and other Versions. But this reading destroys all the force and parallelism of the context.

The passage in Ps. xlv. 8 has been sometimes translated thus: "The myrrh, aloes, and cassia, perfuming all thy garments, brought from the ivory palaces of the Minni, shall make thee glad." The Minni, or Minaei, were inhabitants of spicy Arabia, and carried on a great trade in the exportation of spices and perfumes (Plin. vii. 14, 16; Bochart, *Phaleg*, ii. 22, 135). As the *myrrh* and *cassia* are mentioned as coming from the Minni, and were doubtless natural productions of their country, so it has been inferred that *aloes*, being named with them, was also a production of the same country. But the translation is impossible. The aloe of Scripture has nothing to do with the modern aloe of medicine, procured from a species of

American aloe, *Aloe vera*, which has become naturalised in Palestine. [W. H.] [H. B. T.]

ΑΛΟΘΗ (Ἰηλῦ; B. ἐν τῇ Μααλδ, A. ἐν Μααλδῶν, Luc. recension ἐν τῇ Γαλαδῇ; *Baloth*; R. V. *Bealoth*), a place or district, forming with Asher the jurisdiction of the ninth of Solomon's commissariat officers (1 K. iv. 16). T. and later scholars read ἐν Βααλῶθ, "(in) Bealoth," though the A. V. ("in Aloth") treats the ω as a prefix. In the former case see BEALOTH. Josephus has τὴν περὶ Ἀρκὴν παραλλίαν, Ἀρκὴ being the name which he elsewhere gives to Ecdippa (Achxib) on the sea-coast in Asher. Conder (*Hdbk. to Bible*, 402) identifies Galoth with *Ἰλ*. *Alia* near *Malia*; but Guérin (*Galilee*, ii. 62), with more probability, believes *Ἰλ*. *Alia* to be Hali (Josh. xix. 25). [G.] [W.]

AL/PHA, the first letter of the Greek alphabet, as Omega is the last. Its significance is plainly indicated in the context, "I am the Alpha and the Omega, the first and the last, the beginning and the end" (Rev. xii. 13, R. V.; a passage explanatory of i. 8, xxi. 6: cp. R. V. in each case), which may be compared with Is. xli. 4, xlv. 6, "I am the first and I am the last, and beside Me there is no God." So Prudentius (*Cathemer. hymn.* ix. 11, quoted by Bp. Wordsworth in loco) explains it:

"Corde natna ex Parentis, ante mundi exordium
Alpha et O cognominatus, Ipse fons et clausula
Omnium quae sunt, fuerunt, quaeque post futura
sunt."

In Rev. xii. 13, the speaker is our Lord; in i. 8, xxi. 6, He is, according to most commentators, God the Father. The appellation, taken in its most general sense, is equivalent to "the Eternal One," from Whom all things proceed and to Whom they tend; and, in the special sense of the Apocalypse, it is used of One Who will carry on to its consummation the work which He has begun; "the kingdom of the world is become the kingdom of our Lord and of His Christ" (Rev. xi. 15, R. V.). Illustrations of the expression "the Alpha and the Omega" are adduced by Abbot (*D. B.*, Amer. ed.) from Josephus, c. *Apion.* ii. 22; *Ant.* viii. 11, § 2; Plato, *de Legg.* iv. 7, p. 715 e; Clem. Alex. *Strom.* vi. 5. The expression "I am Alpha and Omega" is further illustrated by the usage in Rabbinical writers of Aleph and Tan, the first and last letters of the Hebrew alphabet. Schoettgen (*Hor. Hebr.* i. 1086) quotes from *Jalkut Rubeni*, fol. 17, 4, "Adam transgressed the whole law from \aleph to τ ," that is, from the beginning to the end. It is not necessary to inquire whether in the latter usage the meaning is so full as in the Revelation: that must be determined by separate considerations. As an illustration merely, the reference is valuable. Both Greeks and Hebrews employed the letters of the alphabet as numerals. In the early times of the Christian Church the letters A and Ω were combined with the cross or with the monogram of Christ (Maitland, *Church in the Catacombs*, pp. 166-8). One of the oldest monuments on which this occurs is a marble tablet found in the catacombs at Melos, which belongs, if not to the first century, to the first half of the second (see *Dict. of Christ. Antiq.* "A and Ω ," "Cross," i. pp. 495-7). [W. A. W.] [F.]

ALPHABET. [WRITING.]

H 2

* See Rosenmüller's note on this passage (*Schol. in T. P. ad Ps. xlv. 9*), and Lee's *Heb. Lex.* (s. v. \aleph). R. V. translates, "Out of ivory palaces strunged instruments have made thee glad." See *Speaker's Comm.* in loco and the commentaries of Perowne, Delitzsch, Cheyne, W. Schultz, &c., in loco.

ALPHAËUS (Ἀλφαῖος or Ἀλφαῖος; *Alpheus*; Aramaic, ܐܠܦܝܐ).

1. Father of Levi the publican (Mark ii. 14). Notice the Western reading Ἰδκουβον (James) for Λεβειν (Levi), suggested by τὸν τοῦ Ἀλφαῖου (the son of Alphaeus).

2. Father of James the Apostle, always mentioned to distinguish his son from James the son of Zebedee (Matt. x. 3; Mark iii. 18; Luke vi. 15; Acts i. 13). The identification of this Alphaeus with Clopas (John xix. 25), and perhaps with Cleopas (Luke xxiv. 18), is the only point necessary to consider. The question of the identity of the persons will be taken first, and afterwards the independent question of the identity of the names. The identity of Alphaeus and Clopas depends on the supposition that James the son of Alphaeus is the same as James "the Little" (R. V. marg., δ μικρός, Mark xv. 40; R. V. in text as A. V., "the less." There is no scriptural or early sanction for the title James the Great being applied to James the son of Zebedee). The mother of James the Little was Mary, and, by a comparison of the accounts of the Crucifixion, this Mary appears to be the same as Mary of Clopas, i.e. probably the wife of Clopas (John xix. 25). Clopas, according to Hegesippus (Euseb. *H. E.* iii. 11), was brother of Joseph, the husband of the Blessed Virgin. Some have supposed that Mary the wife of Clopas was the Virgin's sister, on the ground of John xix. 25 (but see Westcott's note in *Speaker's Commentary*). Clopas being Joseph's brother, his son Simeon was regarded (though of course not accurately) as our Lord's cousin; and Simeon was on this account chosen to succeed James as Bishop of Jerusalem (Euseb. *H. E.* iv. 22). If Clopas and Alphaeus are the same, then James the son of Alphaeus is no more really related to our Lord according to the flesh than Simeon the son of Clopas, who is described as our Lord's cousin (ἀνεψιός). For the bearing of this point on the controversy about James the Lord's brother, see JAMES. It will be evident from what has been said that all inferences from the passages quoted are precarious.

Admitting that Alphaeus and Clopas may be two names for the same man, can it be admitted that the names themselves are two Greek forms of one Aramaic name, ܐܠܦܝܐ (Chalphai)? Clopas cannot be connected with Alphaeus through ܐܠܦܝܐ, for an initial π is seldom if ever represented by κ; the omission of α before λ in Κλωπας and the insertion of ω after it are unaccountable; and the representation of ܐܠܦܝܐ by π is unlikely. Delitzsch* holds with great probability that Κλωπας is a contraction of Κλεόπας, and Κλεόπας an abbreviation of Κλεόπατρος (the masculine counterpart of Κλεοπάτρα), a name which actually occurs (Plutarch, *Vit. Ar.* 40). The identity of the man Alphaeus with the man Clopas may still be admitted, as Jews often bore Greek in addition to Aramaic names, and sometimes a man chose a Greek name which sounded like his Aramaic name, though not etymologically connected

with it. If Delitzsch's view is correct, Clopas and Cleopas are the same name, and the Cleopas of Luke xxiv. 18 may possibly be the same as the Clopas of John xix. 25.

On the whole question, see Herzog, *Real Ency.* art. Alphäus; *Expositor*, Jan. 1885, and authorities there quoted; Bishop Lightfoot's *Galatians*,* The Brethren of the Lord, p. 253 sq., especially p. 260, note 3. [E. R. B.]

ALTANEUS. Same as MATTENAI (EXA I. 33, NB. *Maḥavla*; *Mathania*), one of the sons of Hashum (1 Esd. ix. 33, B. Μαλτανναῖος, A. Ἀλτ-; *Carianus*). [W. A. W.] [F.]

ALTAR (ἄλтарь; *θυσιαστήριον*, *bairei*; *altare*). A. The first altar of which we have any account is that built by Noah when he left the ark (Gen. viii. 20). The Targumists indeed assert that Adam built an altar after he was driven out of the garden of Eden, and that on this Cain and Abel, and afterwards Noah and Abraham, offered sacrifice (Pseudo-Jonath. Gen. viii. 20; xxii. 9). According to the tradition, the First Man was made upon an altar which God Himself had prepared for the purpose, and on the site of this altar were reared both those of the Patriarchs and that in the Temple of Solomon. This tradition, if in no other way valuable, at least shows the great importance which the Jews attached to the altar as the central point of their religious worship (Bähr. *Symbol.* ii. 350).

In the early times altars were usually built in certain spots hallowed by religious associations, e.g. where God appeared (Gen. xii. 7; xiii. 18; xxvi. 25; xxv. 1). Generally of course they were erected for the offering of sacrifice; but in some instances they appear to have been only memorial. Such was the altar built by Moses and called Jehovah Nissi, as a sign that the Lord would have war with Amalek from generation to generation (Ex. xvii. 15, 16). Such too was the altar which was built by the Reubenites, Gadites, and half-tribe of Manasseh, "in the borders of Jordan," and which was erected "not for burnt-offering nor for sacrifice," but that it might be "a witness" between them and the rest of the tribes (Josh. xii. 10-29). Altars were most probably originally made of earth. This was the commonest form of altar in antiquity. Such were the altars of the Greeks, Romans, and Carthaginians. Tertullian (*Apol.* 25) speaks of altars of turf (*de cespite altaria*) as the earliest among the Romans. The Law of Moses allowed them to be made either of earth or of unhewn stones (Ex. xx. 26): any iron tool would have profaned the altar. But this law was subsequently modified.

In later times altars were frequently built on high places, especially in idolatrous worship (Dent. xii. 2; for the pagan notions on this subject, see Tac. *Ann.* xiii. 57). The altars so erected were themselves sometimes called "high places" (גִּבְעוֹת, 2 K. xxiii. 8; 2 Ch. xiv. 3, &c.). Both in the Levitical and Deuteronomic codes all altars were forbidden except those first in the Tabernacle and afterwards in the Temple (Lev. xvii. 8, 9; Deut. xii. 13, &c.). This prohibition, however, was not strictly observed, at least till after the building of the Temple, even by pious Israelites. Thus Gideon built two altars (Judg.

* In his Heb. N. T. (1885), Delitzsch renders Alphaeus by ܐܠܦܝܐ, Clopas by ܕܠܦܝܐ, Cleopas by ܕܠܦܝܐ.

vi. 24, 26). The first of these, which he called *Jehovah-shalom* in memory of the Divine manifestation to him, may have been only a monumental altar, as it does not appear that he offered sacrifices upon it. The second was erected by the command of God. So likewise did Samuel (1 Sam. vii. 9, 10), David (2 Sam. xxi. 25), and Solomon (1 K. iii. 4). Elijah also repaired the altar of Jehovah on Mount Carmel, and himself offered sacrifice thereon (1 K. xviii. 30-32). The sanctity attaching to the altar led to its being regarded as a refuge or asylum (Ex. xxi. 14; 1 K. i. 50). On the subject of this article generally, cp. W. R. Smith, *The Religion of the Semites*, i., index s. v. "altar."

B. The earliest provision for the erection of an altar is found in Ex. xx. 24, immediately after the promulgation of the Decalogue. It is as follows: "An altar of earth shalt thou make unto Me, and shalt sacrifice thereon thy burnt-offerings and thy peace-offerings, thy sheep and thine oxen; in every place where I record My name I will come unto thee and will bless thee. And if thou make Me an altar of stone, thou shalt not build it of hewn stones: for if thou lift up thy tool upon it, thou hast polluted it. Neither shalt thou go up by steps unto Mine altar; that thy nakedness be not discovered thereon" (R. V.). This no doubt is the original and simplest form of the Altar of Burnt-offering. As regards material, it might be of earth, or of unhewn stone. It must not be so elevated as to require an ascent to it, lest the person of the sacrificer should be exposed. The offering of victims is not confined to the priests. An altar of this kind might be erected wherever a Divine manifestation was made. Subsequently more definite directions were given for two altars for the service of the Tabernacle: I. the Altar of Burnt-offering; and II. the Altar of Incense.

I. The Altar of Burnt-offering (מִזְבֵּחַ הַעֹלָה), called in Ex. xxvii. 1 emphatically "the altar" (הַמִּזְבֵּחַ), sometimes "the brazen altar" (מִזְבֵּחַ הַנְּחֹשֶׁת); in Mal. i. 7, 12, "the table of the Lord." Throughout the Bible, wherever "the altar" is spoken of, the Altar of Burnt-offering is always meant, and where no confusion can arise the shorter expression is common. Where, however, it is necessary to distinguish between this and the Altar of Incense, the full phrase, Altar of Burnt-offering or Brazen Altar, is employed. This differed in construction at different times. (1.) In the Tabernacle (Ex. xxvii. 1 sq.; xxxviii. 1 sq.) it was comparatively small and portable. In shape it was square. It was five cubits in length, the same in breadth, and three cubits high. It was made of planks of shittim (or acacia) wood overlaid with brass (Josephus says *gold* instead of *brass*, Ant. iii. 6, § 8). The interior was hollow (כְּבֹר לְחִי, Ex. xxvii. 8). But as nothing is said about a covering to the altar on which the victims might be placed, Rashi supposes that whenever the Tabernacle for a time became stationary, the hollow case of the altar was filled up with earth. In support of this view he refers to Ex. xx. 24, where the command is given, "make me an altar of earth," &c., and observes: "The altar of earth is the Brazen Altar itself, the hollow of which was filled up

with earth, whenever the camp was pitched." This may have been done, but it is obvious, as has been remarked, that there was a modification of the earlier enactment.

At the four corners were four projections called horns, made, like the altar itself, of shittim-wood overlaid with brass. It is not quite certain how the words in Ex. xxvii. 2, מִקְנֹנֹת הַיָּיִן קַרְנֵי, should be explained. According to Mendelssohn, they mean that these horns were of one piece with the altar. So also Knobel-Dillmann (*Comm.* in loc.). And this is probably right. By others they are understood to describe only the projection of the horns from the altar. These probably projected upwards; and some have supposed, referring to Pa. cxviii. 27, that to them the victim was bound when about to be sacrificed. But the proper rendering of that passage is "even unto the horns of the altar" (R. V.), and Ainsworth's explanation is probably correct: "Unto the horns, that is all the court over, until you come even to the horns of the altar." There is no evidence that the victims were ever bound to the horns of the altar. On the occasion of the consecration of the priests (Ex. xxix. 12) and the offering of the sin-offering (Lev. iv. 7 ff.) the blood of the victim was sprinkled on the horns of the altar (see the symbolism explained by Baumgarten, *Commentar zum Pentateuch*, ii. 63; Jukes, *The Law of the Offerings*, p. 153, &c.). Round the altar midway between the top and bottom (וּ, as others suppose, at the top) ran a projecting ledge (מִרְכָּב, A. V. "compass," R. V. "ledge round"; Targ. סִבְכָּא; Gr. Ven. κύκλωμα, περιχώρη), on which perhaps the priests stood when they officiated. No other probable use has been suggested; and it is clear that in the case of an altar three cubits high the priests could not have discharged their duties except by standing upon some part of the altar. To the outer edge of this, again, a grating or network of brass (מִסְכָּר מַעֲשֶׂה רֶשֶׁת נְחֹשֶׁת) was affixed, and reached to the bottom of the altar, which thus presented the appearance of being larger below than above.* Others have supposed this grating to adhere closely to the boards of which the altar was composed, or even to have been substituted for them half-way up from the bottom.

At any rate there can be little doubt that the grating was perpendicular, not horizontal, as Jonathan supposes (Targum on Ex. xxvii. 5). According to him, it was intended to catch portions of the sacrifice or coals which fell from the altar, and which might thus be easily replaced. But it seems improbable that a network or grating should have been constructed for such a purpose (cp. Joseph. Ant. iii. 6, § 8). At the four corners of the network were four brazen rings into which were inserted the staves by which the altar was carried. These staves were of the same materials as the altar itself. As the Law forbade any ascent to the altar by steps (Ex. xx. 26), it has been conjectured that an approach was provided by means of a slope

* Knobel's opinion that the object of the network was to protect the altar from being injured by the feet and knees of the officiating priests, and that the מִסְכָּר was merely an ornament by way of finish, is not accepted by Dillmann (in loco).

of earth which led gradually up to the **זֶבֶח** or ledge round the altar already described. This must have been either on the north or south side; for on the east was "the place of the ashes" (Lev. i. 16), and on the west at no great distance stood the laver of brass. According to the Jewish tradition, it was on the south side. The place of the altar was at "the door of the tabernacle of the tent of the congregation" (Ex. xl. 29). The various utensils for the service of the altar (Ex. xxvii. 3) were: (1) **קִירֹת**, pans wherewith to clear away the fat

(**לִדְשֵׁן**) and ashes: elsewhere the word is used of the pots in which the flesh of the sacrifices was put to seethe (cp. Zech. xiv. 20, 21, and 2 Ch. xxv. 13, with 1 Sam. ii. 14). (2.) **קָיִים**, shovels, Vulg. *forpices*, Gesen. *palae cineri removendo*. (3.) **בָּזִימִים**, basins; LXX. *φιάλαί*, vessels in which the blood of the victims was received, and from which it was sprinkled (ר. **זֶרֶק**). (4.)

מִלֶּחֶת, flesh-hooks, LXX. *κρεδγραι*, by means of which the flesh was removed from the caldron or pot (see 1 Sam. ii. 13, 14, where they are described as having three prongs). (5.) **מִכָּתוֹת**, fire-pans, or perhaps censers. These might either be used for taking coals from the fire on the altar (Lev. xvi. 12); or for burning incense (Num. xvi. 6, 7). In Ex. xxv. 38 the English Bible (A. V. and R. V.), following the Vulgate, translates it "snuff-dishes" (cp. Dillmann in loco). All these utensils were of brass.

(2.) In Solomon's Temple the altar was considerably larger in its dimensions, as might have been expected from the much greater size of the building in which it was placed. Like the former, it was square: but the length and breadth were now twenty cubits, and the height ten (2 Ch. iv. 1). It differed, too, in the material of which it was made, being entirely of brass (1 K. viii. 64; 2 Ch. vii. 7). It had no grating: and instead of a single gradual slope, the ascent to it was probably made by three successive platforms, to each of which it has

Altar of Burnt Offering. (From Surenhusian's *Mishna*.)

been supposed that steps led (Surenhus. *Mishna*, vol. ii. p. 261, as in the figure annexed). Against this may be urged the fact that the Law of Moses, as we have seen, positively forbade the use of steps (Ex. xx. 26), and the assertion of Josephus that in Herod's Temple the ascent was by an inclined plane. On the other

hand, steps are introduced in the ideal, or symbolical, Temple of Ezekiel (xliii. 17), and the prohibition in Ex. xx. has been interpreted as applying to a continuous flight of stairs and not to a broken ascent. But it is very doubtful whether the

word **מַעֲלֹת** can be confined to "steps:" it would seem rather to cover any kind of ascent. If so, the prohibition was not understood to be of universal application. It must have been restricted to the case of worshippers who were not priests, the object of the prohibition being to guard against exposure of the person to the altar. In the case of the Levitical priests this danger was provided against in another way, by the use of linen breeches (Ex. xxviii. 42). When it is said (Lev. ix. 22) that Aaron came down after offering the sin-offering, &c., it is implied that there was some elevated structure upon which he had been standing. In the case of Ezekiel's altar, as has been said, steps are expressly mentioned (xliii. 17). The only way of reconciling these apparent contradictions is by supposing that the Law in Ex. xx. contemplates the case of laymen approaching in their ordinary dress, whereas the Brazen Altar was "approached by priests protected against exposure by their special costume." "In fact, with a large altar, the priest could not put the blood of a victim on the four horns without standing and walking on the altar (*Mishna, Zebachim*, v.), which is clearly against the spirit of Ex. xx., except on the understanding that that law does not apply to priests appropriately clad for the office" (*The Old Test. in the Jewish Church*, by Prof. Robertson Smith, Lect. xii. note 1). The prohibition in Ex. xx. is general, "Thou shalt not go up," not "the priests shall not go up." There is no evidence that by the first legislation priests only were allowed to approach the altar. Asa, we read, renewed (**שָׁמַר**) Solomon's altar (2 Ch. xv. 8). This may either mean that he repaired it, or more probably perhaps that he reconstructed it after it had been polluted by idol worship (*ἀνεκαίρωται*, LXX.). Subsequently Asa had it removed from its place to the north side of the new altar which Urijah the priest had made in accordance with his direction (2 K. xvi. 14). It was "cleansed" by command of Hezekiah (**קָדַשׁ**, 2 Ch. xxix. 18), and Manasseh,

after renouncing his idolatry, either repaired (*Kethibh*, **קָדַשׁ**) or rebuilt it (*Keri*, **קָדַשׁ**). It may finally have been broken up and the brass carried to Babylon, but this is not mentioned (Jer. lii. 17 sq.). According to the Rabbinical tradition, this altar stood on the very spot on which man was originally created.

(3.) The Altar of Burnt-offering in the second (Zerubbabel's) Temple. Of this no description is given in the Bible. We are only told (Ezra iii. 2) that it was built before the foundations of the Temple were laid. According to Josephus (*Ant.* xi. 4, § 1), it was placed on the same spot on which that of Solomon had originally stood. It was constructed, as we may infer from 1 Macc. iv. 47, of unhewn stones (*ἀθόους ἀκοκλήτους*). Antiochus Epiphanes desecrated it (*ἐφκοδόμησεν βδέλυγμα ἐρημώσας ἐπὶ τὸ θυσιαστήριον*. 1 Macc. i. 54); and, according to Josephus (*Ant.* xii. 5, § 4), removed it altogether. In the restoration by Judas Maccabaeus a new altar

was built of unhewn stone in conformity with the Law (1 Macc. iv. 47).

(4.) The altar erected by Herod, which is thus described by Josephus (*B. J.* v. 5, § 6):—"In front of the Temple stood the altar, 15 cubits in height, and in breadth and length of equal dimensions, viz. 50 cubits: it was built four-square, with horn-like corners projecting from it; and on the south side a gentle acclivity led up to it. Moreover it was made without any iron tool, neither did iron ever touch it at any time." Rabin. has 40 cubits square instead of 50. The dimensions given in the Mishna are different. It is there said (*Middoth*, 3, 1) that the altar was at the base 32 cubits square; at the height of a cubit from the ground 30 cubits square; at 5 cubits higher (where was the circuit, סוֹבֵבָא) it was reduced to 28 cubits square, and at the horns still further to 26. A space of a cubit each way was here allowed for the officiating priests to walk, so that 24 cubits square were left for the fire on the altar (הַמִּשְׁרֵבָה). This description is not very clear. But the Rabbinical and other interpreters consider the altar from the סוֹבֵבָא upwards to have been 28 cubits square, allowing at the top, however, a cubit each way for the horns, and another cubit for the passage of the priests. Others, however (as L'Empereur *in loc.*), suppose the ledge on which the priests walked to have been 2 cubits lower than the surface of the altar on which the fire was placed.

The Mishna further states, in accordance with Josephus (see above), and with reference to the Law already mentioned (*Ex.* xx. 25), that the stones of which the altar was made were unhewn; and that twice in the year, viz. at the Feast of the Passover and the Feast of Tabernacles, they were whitewashed afresh. The way up (עֲלֵה) was on the south side, 32 cubits long and 16 broad, constructed also of unhewn stones. In connexion with the horn on the south-west was a pipe intended to receive the blood of the victims which was sprinkled on the left side of the altar: the blood was afterwards carried by means of a subterranean passage into the brook Kidron. Under the altar was a cavity into which the drink-offerings passed. It was covered over with a slab of marble, and emptied from time to time. On the north side of the altar were a number of brasen rings, to secure the animals which were brought for sacrifice. Lastly, round the middle of the altar ran a scarlet thread (חוט של כִּיָּרֵא) to mark where the blood was to be sprinkled, whether above or below it.

According to Lev. vi. 12, 13, a perpetual fire was to be kept burning on the altar. This, as Eühr (*Symbol.* ii. 350) remarks, was the symbol and token of the perpetual worship of Jehovah. For inasmuch as the whole religion of Israel was concentrated in the sacrifices which were offered, the extinguishing of the fire would have looked like the extinguishing of the religion itself. It was therefore, as he observes, essentially different from the perpetual fire of the Persians (*Curt.* iii. 3; *Amm. Marc.* xxiii. 6; *Hyde, Rel. Vet. Pers.* viii. p. 148), or the fire of Vesta to which it has been compared. These were not sacrificial fires at all, but were symbols of the Deity, or were

connected with the belief which regarded fire as one of the primal elements of the world. This fire, according to the Jews, was the same as that which came down from heaven (ῥῆμα ὁπανο-*verés*), "and consumed upon the altar the burnt-offering and the fat" (*Lev.* ix. 24). It couched upon the altar, they say, like a lion; it was bright as the sun; the flame thereof was solid and pure; it consumed things wet and dry alike; and, finally, it emitted no smoke. This was one of the five things existing in the first Temple which tradition declares to have been wanting in the second (*Tract. Joma*, c. i. fol. 21 b; cp. Wünsche, *d. Babyl. Talm.* i. 353). The fire which consumed the sacrifices was kindled from this: and besides these there was the fire from which the coals were taken to burn incense with (see Carpzov. *Apparat. Hist. Crit.* Annot. p. 286).

II. The Altar of Incense (מִזְבֵּחַ הַקְּטֹרֶת) and קֶטֶר מִן הַקֶּטֶר, *Ex.* xxx. 1; *θευσιασθηριον θυμιαματος*, LXX.), called also the golden altar (מִזְבֵּחַ הַזָּהָב, *Ex.* xxxix. 38; *Num.* iv. 11; *θεσ. χρυσου*, LXX.) to distinguish it from the Altar of Burnt-offering, which was called the Brazen Altar (*Ex.* xxxviii. 30).^b Like the Altar of Burnt-offering, it was called "holy of holies" or "most holy" unto Jehovah (*Ex.* xxx. 10). Probably this is meant by the "altar of wood" spoken of *Ezek.* xli. 22, which is further described as the "table that is before the Lord," precisely the expression used of the Altar of Incense (see Delitzsch, *Brief an die Hebr.* p. 678). The name מִזְבֵּחַ, "altar," was not strictly appropriate, as no sacrifices were offered upon it. This, indeed, was expressly forbidden: "Ye shall

Supposed form of the Altar of Incense.

offer no strange incense thereon, nor burnt sacrifice, nor meal-offering; and ye shall pour no drink-offering thereon" (*Ex.* xxx. 9, R. V.). But once in the year, on the great Day of Atonement,

^b Wellhausen points out that the Altar of Incense does not appear among the furniture of the inner sanctuary in *Ex.* xxv.-xxix., but only as an appendix at the beginning of chap. xxx.; and very arbitrarily infers that the author of chaps. xxv.-xxviii. knew nothing of it. There may have been a good reason for its appearing where it does, though we may not now be able to account for it.

the high-priest sprinkled upon the horns of it "the blood of the sin-offering of atonement" (Ex. xxx. 10).

(a.) That in the Tabernacle was made of acacia-wood, overlaid with pure gold. In shape it was square, being a cubit in length and breadth, and 2 cubits in height. Like the Altar of Burnt-offering, it had horns at the four corners, which were of one piece with the rest of the altar. So Rabb. Levi ben Gersom:—"Disimus inde quod non conveniat facere cornua separatim, et altari deinde apponere, sed quod cornua debeant esse ex corpore altaris" (*Comment. in Leg. fol. 109, col. 4*).

It had also a top or roof (זָרֵק; *ζαχαρά*, LXX.), a flat surface like the roof of an Eastern house (the Hebrew word is the same), on which the incense was laid and lighted. Many, following the interpretation of the Vulgate *craticulam ejus*, have supposed a kind of grating to be meant; but for this there is no authority. Round the altar was a border or wreath (זָרֵק; *στρεπτήν στεφάνην χρυσήν*, LXX.). Josephus says: *ἐπὶ τὴν ζαχαράν χρυσάα ὑπὲρ ἀνεστρώσα, ἔχουσα κατὰ γωνίας ἐκδοτὴν στέρανον* (*Ant. iii. 7*). "Erat itaque cinctorium, ex solido conflatum auro, quod tecto ita adhaerebat, ut in extremitate illud cingeret, et prohiberet, ne quid facile ab altari in terram deolveretur" (*Carpzov. Appar. Hist. Crit. Annot. p. 273*). Below this were two golden rings which were to be "for places for staves to bear it withal." The staves were of acacia-wood overlaid with gold. Its appearance may be illustrated by the figure on the preceding page.

This Altar stood in the Holy Place, "before the veil that is by the ark of the testimony, before the mercy-seat" (Ex. xxx. 6; xl. 5). Philo too speaks of it as *ἔσω τοῦ προτέρου καταπέτασματος*, and as standing between the candlestick and the table of shewbread. In apparent contradiction to this, the author of the Epistle to the Hebrews (ix. 4) enumerates it among the objects which were within the second veil (*μετὰ τὸ δεύτερον καταπέτασμα*), i.e. in the Holy of Holies. It is true that by *θυμιατήριον* in this passage may be meant "a censer," in accordance with the usage of the LXX., but it is better understood of the Altar of Incense, which by Philo and other Hellenists is called *θυμιατήριον*. It is to be observed also that in 1 K. vi. 22, this same Altar is said to belong to "the oracle"

(הַמִּזְבֵּחַ אֲשֶׁר לְרֵבִיר, "the altar that belonged to the oracle," R. V.) or most Holy Place. This may perhaps be accounted for by the great typical and symbolical importance attached to this Altar, so that it might be considered to belong to the *δευτέρα ἀκαθῆ*. On the great Day of Atonement it, as well as the mercy-seat, was sprinkled with the blood of the sin-offering (Lev. xvi. 18); and incense itself was supposed to have an atoning efficacy (T. B. *Joma*, f. 44 a; Num. xvi. 47). But further, the writer of the Epistle has the Day of Atonement in his mind; and on that day, when the high-priest lifted the inner veil to go into the Most Holy Place, the separation between the Holy Place and the Most Holy Place seemed for the moment to cease, and they might be regarded as one sanctuary (see Prof. Milligan, *Bible Educator*, iii. 230). In like manner, in the vision of

Isaiah (vi. 1-8), the altar from which the seraph takes the "live coal," or rather "hot stone," wherewith he touches the Prophet's lips, and which clearly corresponds to the Altar of Incense in the earthly Temple, is before the Lord, seated upon His throne. And similarly in the Apocalypse (viii. 1-5) the Angel whom St. John sees with a golden censer has much incense given to him, that he may offer it upon the golden altar which is before the throne (see Bleek on Heb. ix. 4, and Delitzsch *loc.*). Wellhausen has pointed out, that "the rite of the most solemn atoning sacrifice takes place in Lev. iv. on the golden altar, but in Ex. xxix. Lev. viii. ix., without its use"; and that "a still more striking circumstance is, that in passages where the holiest incense-offering is itself spoken of, no trace can be discovered of the corresponding altar. This is particularly the case in Lev. xvi. To burn incense in the sanctuary, Aaron takes a censer, fills it with coals from the altar of burnt-offering (er. 12, 18-20), and lays the incense upon them in the adytum. Similarly in Lev. x., Num. xvi. xiii., incense is offered on censers of which each priest possesses one. The coals are taken from the Altar of Burnt-offering (Num. xvii. 11; A. V. xvi. 46), which is plated with the censers of the Korahite Levites (xvii. 3, 4; A. V. xvi. 38, 39); whoever takes fire from any other source incurs the penalty of death" (*Hist. of Israel*, Eng. transl. p. 66).

(b.) The Altar in Solomon's Temple was similar (1 K. vii. 48; 1 Ch. xxviii. 18), but was made of cedar overlaid with gold. The Altar mentioned in Is. vi. 6 is clearly the Altar of Incense, not the Altar of Burnt-offering; and although, as has been said, it is the heavenly Altar, not the earthly, that the Prophet sees, still no doubt the one was the pattern of the other; and if so, it may be inferred from this passage that heated stones (חֲמֻצִים) were laid upon the Altar, by means of which the incense was kindled.

(c.) The Altar of Incense is mentioned as having been removed from the Temple of Zerubabel by Antiochus Epiphanes (1 Macc. i. 21). Judas Maccabaeus restored it, together with the holy vessels, &c. (1 Macc. iv. 49). On the arch of Titus no Altar of Incense appears. But that it existed in the last Temple, and was richly overlaid, we learn from the Mishna (*Hagiga* 3, 8). Ezekiel in his ideal Temple mentions an altar of wood before the sanctuary, of which he says that it was three cubits in height, two cubits in length and breadth, and it had projecting corners, and the frame (R. V. text, "length") and the walls thereof were of wood: "this is the table that is before the Lord" (xli. 21, 22; cp. xli. 16). According to Wellhausen and Smeud, Ezekiel makes no distinction between the table of shewbread and the Altar of Incense. But "altar" and "table" are here convertible terms, just as they are in Mal. i. 7, 12, where they are applied indifferently to the Altar of Burnt-offering.

From the circumstance that the sweet incense was burnt upon it every day, morning and evening (Ex. xxx. 7, 8), as well as that the blood of atonement was sprinkled upon it (er. 10), this Altar had a special importance attached to it. It is the only Altar which

appears in the heavenly Temple (Is. vi. 6; Rev. viii. 3, 4).

C. Other altars. (1.) Altars of brick, forbidden by the Law (Ex. xx. 24, 25). Some commentators have seen an allusion to such

in Is. lxxv. 3. The words are עֲלֵי בְרִיקִים

עֲלֵי בְרִיקִים, "offering incense on the bricks," which has been explained as referring to altars made of this material, and situated perhaps in the "gardens" mentioned just before. Rosenmüller suggests, however, that the allusion is to some Babylonish custom of burning incense on bricks covered over with magic formulae or cuneiform inscriptions. This is also the view of Gesenius and Maurer. Dr. Cheyne understands by the "bricks," the tilings of the houses (2 K. xxiii. 13; Zeph. i. 5; Jer. xix. 13), and thinks this view, as implying that Palestine is the locality, and not Babylonia or Egypt, to be more in harmony with the context. Delitzsch, on the other hand, observes that the expression "transports us to Babylon, the country of cœli lateres (latereuli). The Torah mentions

עֲלֵי בְרִיקִים only with reference to Babylonian and Egyptian buildings, it knows and allows only of altars of earth, unhewn stones, and wooden planks with brazen covering."

(2.) An altar with the inscription Ἀγνώστῳ Θεῷ, Acts xvii. 22. St. Paul in his speech on the Areopagus mentions having seen such an altar in ATHENS. The inscription, however, is capable of two renderings, either (a) "to an unknown god" (Rev. Vers.), or (b) "to the unknown god" (A. V.); for in inscriptions of this kind Greek usage did not always require the insertion of the article. (a) If we understand the inscription in the former sense, the altar was one erected in gratitude for some benefit received, though the receiver did not know to which of the many deities of heathenism the benefit was due. This interpretation falls in

He says (i. § 4), ἐν ταῦτα καὶ βασιλεῖς θεῶν τε ὀνομαζομένων ἀγνώστων καὶ ἡρώων καὶ παιδῶν τῶν Θησέως καὶ Φαλήρου. And Philostratus (Vit. Apollon. vi. 3), σωφρονέστερον τὸ περὶ παντῶν θεῶν εὖ λέγειν, καὶ ταῦτα Ἀθήνησιν, οὐ καὶ ἀγνώστων δαίμονων βασιλεῖς ἱδρύνται. This, as Winer observes, need not be interpreted as if the several altars were dedicated to a number of ἀγνώστοι θεοί, but rather that each altar had the inscription Ἀγνώστῳ Θεῷ. It is not at all probable that such inscription referred to the God of the Jews, as One Whose Name it was unlawful to utter (as Wolf and others have supposed). Neander quotes Diog. Laertius, who, in his Life of Epimenides, says that in the time of a plague, when they knew not what god to propitiate in order to avert it, he caused black and white sheep to be let loose from the Areopagus, and, wherever they lay down, to be offered to the god to whom of right the victim belonged (τῷ προσήκοντι θεῷ). Eber, adds Diogenes, ἐστὶ καὶ νῦν ἔστιν εὐρεῖν κατὰ τοὺς δῆμους τῶν Ἀθ. βασιλεῖς ἀγνώστων. On which Neander remarks that on this or similar occasions altars might be dedicated to an unknown god, since they knew not what god was offended and required to be propitiated. But it is to be observed that, according to Diogenes, the altars were left without any inscription. Nor can we attach much importance to Eichhorn's suggestion that these altars (βασιλεῖς ἀγνώστων) might have been built before the art of writing was known, and subsequently have been inscribed Ἀγνώστῳ Θεῷ. A passage in the Philopatrias ascribed to Lucian, in which one of the speakers swears "by the unknown god," has sometimes been quoted as confirming St. Paul's statement; but as the Dialogue is of the 3rd century after Christ, it may be intended only as a sneer at the Apostle's words. Jerome, indeed (on Tit. i. 12), affirms that the inscription ran: "To the gods of Asia and Europe and Africa, to unknown and strange gods." But though Jerome may have seen such an inscription, it is plainly not that to which St. Paul refers. His statement is clear and definite.

(b.) If we adopt the rendering "to the unknown god," then we must take the verbal adjective in its extended signification, as meaning not only the unknown, but the unknowable. The inscription, as Dr. Plumptre observes, does not affirm Atheism, but simply recognises the existence of a Power concerning which man knows and can know nothing. He finds a parallel to this inscription in that which Plutarch (*de Isid. et Osir.*) records as found on the veil of Isis: "I am all that has been, and all that is, and all that shall be; and no mortal hath lifted my veil;" and a still more striking parallel in the inscription on a Mithraic altar found at Ostia, and now in the Vatican, "signum Indeprehensibilis Dei." "This," he remarks, "is the nearest equivalent that Latin can supply for 'the Unknown and Unknowable God'" (*Bible Commentary for English Readers*, in loc.). [J. J. S. P.]

AL-TASCHITH (אלתשחית), more correctly, Al-Tashcheth) forms part of the first, or introductory, verses of Psalms lviii., lvi., lix., lxxv. The Aramaic paraphrast and Rashi, both of whom literally translate this phrase by

Various Altars.

1. Egyptian, from bas-reliefs. (Rosellini.)
2. Assyrian, found at Khorsabad. (Layard.)
3. Babylonian, *Babylische Nationalm.* (Layard.)
4. Assyrian, from Khorsabad. (Layard.)

very well with what St. Paul had said as to the "somewhat superstitious" character of the Athenians. It would be evidence of a scrupulous anxiety lest any deity, even though unknown, should not receive his meed of honour and gratitude. Altars of this kind, Pausanias tells us, he had seen in the harbour and streets of Athens.

"Destroy not!" are, though consistent, greatly mistaken, because these Psalms do not merely stand on the defensive "Destroy not!" but take the offensive "Destroy my enemies!" So is also Ibn 'Ezra with his stereotyped phrase, "Commencement of a well-known poem to the tune of which these Psalms were to be sung." [AIJELETH SHAHAR; ALAMOTH.] But Ibn 'Ezra also, apart from the anachronism on which his theory rests, must be wrong, since it is impossible that all these four Psalms could have been sung satisfactorily to one and the same tune, seeing that they greatly differ not only in sentiment but also in length of diction. Qimchi (on lvi.) actually believes that he has found the very source from which the *Al-Tashcheth* comes, viz. the *Al-Tashchithu* used by David when Abiahah wished to kill Saul (1 Sam. xxvi. 9). On such grounds one need not be astonished to find a modern writer proposing seriously that the source of this title was the *Al-Tashchithu* of Isaiah (lvi. 8)! Although the explanations of the Targumist and Rashi cannot be true for the reasons given above, they have both at least some ground to stand upon, inasmuch as the phrase *Al-Tashcheth* literally occurs in the Pentateuch (Deut. ix. 26), where it is used by Moses in a prayer for Israel. But what shall we say to the following explanation propounded in all earnest by a German scholar, that *Al-Tashcheth* meant "Spoil not!" and that these words were addressed to a music-director whose band had some time before spoiled a Psalm by singing it or playing it out of tune. If Ibn 'Ezra's theory were true, the band would be certain to spoil the execution of one or the other of these Psalms, and the reminder "Spoil not!" might find an application. Since, however, the Scripture gives no indication of this, what warrant is there that *Al-Tashcheth* could have such a meaning? The fact is, *Al-Tashcheth* is itself the name of a music-

corps, as the '*Al*' (על) virtually standing before it clearly testifies. The '*Al*' is only left out on account of the *Al* following, as *Al* (ל) after '*Al*' (על) would be somewhat difficult to pronounce.* (Such was evidently the view taken by the R. V., which inserts in italics the words, *Set to*.) Let nobody object that we have '*Al-Alamoth*' (ALAMOTH); for in that case the second *Al* cannot be pronounced by itself at all, and absolutely depends upon the

following it (עלמות). It might, however, be legitimately asked: Why should a music-corps be called by the apparently singular name *Al-Tashcheth*? To this legitimate question a legitimate answer may be given, which will throw light on the names of the other music-bands also. When there were only eight music-bands (Talmud Babil *Tu'anih*, 27*), and these had no history worth speaking of, they were simply numbered 1, 2, 3, 4, 5, 6, 7, 8. The proof of this is the term *Husheminit* = the Eighth. When they were increased to twenty-four and

began to have a history of their own, or one partially relating to them, they received several kinds of names. Some were named from their dwelling-places and functions, as *Aygeleth Hashachar* (AIJELETH SHAHAR), '*Alamoth*' (ALAMOTH), *Haggittith* (GITTHI), &c.; some from their director, as *Yeduthun*; some from the nature, character, and position of the instruments on which they excelled, as *Jonath Elem Rechoqin* (JONATH ELEM RECHOKIM); some from historical occurrences, as *Mith-Labben* (see 1 Ch. xv. 2 and Qimchi on Ps. ix. 1). Of this last kind is, no doubt, this *Al-Tashcheth*, which was probably given to one of the bands when Uzzah was struck down dead (2 Sam. vi. 8). David commemorated that event, it is true, by calling the place where the catastrophe had occurred *Perez-Uzzah*; but as he could not give one of the music-bands such an ill-omened name, he called it by the historically-auspicious title *Al-Tashcheth*! [S.-S.]

AL'LUSH (לש), of uncertain etymology: Sam. לש; AF. *Alloús*; B. *Alélu*; *Alus*, one of the stations of the Israelites on their journey to Sinai, the last before Rephidim (Num. xiii. 13, 14). No trace of it has yet been found (see conjectures in Dillmann on Exod. xvii. 1). In the Seder Olam (Kitto, Cyc. s. v.) it is stated to have been 8 miles from Rephidim. Perhaps in *W. Feirán*, near the mouth of *W. er Ruamánah*. [G.] [W.]

AL'VAH (לח). The real meaning of the Edomite and pre-Edomite names is still unknown: *Γωλδ*; *Alva*, a duke (= *dux*, Valg.) of Edom (Gen. xxxvi. 40), written *Aliah* (לח) in 1 Ch. i. 51.

2. *Alvah* is the name of a place as well as of a chief. Dillmann (Gen. l. c.) and Delitzsch, *Genesis*, l. c. [1887], identify the name with *ALVAN*. [W. A. W.] [F.]

AL'VAN (לח), see *ALVAH*; A. *Γωλδ*, *DE-μ*; *Alvan*, a Horite, son of Shobal (Gen. xxxvi. 23), written *Alia* (לח) in 1 Ch. i. 40 (B. *Σωλδμ*, A. *Ιωλδμ*; *Alia*). [W. A. W.] [F.]

AM'AD (עמד); *Ἀμὰδ*; A. *Ἀμὰδ*; *Amuad*, an unknown place in Asher between Alamelech and Misheal (Josh. xix. 26 only). It is placed by Major Conder (*Handbook to Bible*, p. 402) at *Kh. el 'Amúd*, close to *ez-Zib*, but this identification seems doubtful. [W.]

AMADA'THA (Esth. xvi. 10, 17); and **AMADA'THUS** (Esth. xii. 6). [HAMEED ATHA.]

A'MAL (למ); B. *Ἀμαδ*; *Amal*, a descendant of Asher, the son of Jacob (1 Ch. vii. 35).

AM'ALEK (עמלק); *Ἀμαλῆκ*; *Amalech*, son of Eliphaz by his concubine Timnah, grandson of Esau, and one of the chieftains ("dukes," A. V. and R. V.) of Edom (Gen. xxxvi. 12, 16). His mother came of the Horite race, whose territory the descendants of Esau had seized and, although Amalek himself is represented as of equal rank with the other sons of Eliphaz, yet his posterity appear to have shared the fate of the Horite

* The somewhat similar pronunciation of *ל* and *ל* is no anachronism. It is not merely testified to in Talmudic times (Yerushalmi *Bera'koth*, II. 4; Babil *Megillah*, 24b), but is pre-supposed in the Bible itself (1 Sam. i. 10; Amos vi. 8, and very many other places).

population, a "remnant" only being mentioned as existing in Edom in the time of Hezekiah, when they were dispersed by a band of the tribe of Simeon (1 Ch. iv. 43). [W. L. B.]

AMAL'EKITES (אַמְלֵקִים):

the abnormal אַמְלֵקִים, 2 Sam. i. 1, is no doubt a textual error: see Wellh. or Driver i. 1; 'Αμολη-αῖραι; Amalecites), a nomadic tribe which, probably about the time of Moses, first occupied the peninsula of Sinai and the wilderness intervening between the southern hill-ranges of Palestine and the border of Egypt (Num. xiii. 29; 1 Sam. xv. 7, xxvii. 8). Arabian historians (to be read with reserve: see Nöldeke, *Die Amalekiter*, 1864) represent them as originally dwelling on the shores of the Persian Gulf. Thence they were pressed westwards by the growth of the Assyrian empire, and spread over a portion of Arabia at a period antecedent to its occupation by the descendants of Joktan. This account of their origin harmonizes with Gen. xiv. 7, where the "country" ("princes" according to the reading adopted by the LXX.) of the Amalekites is mentioned several generations before the birth of the Edomite Amalek (Gen. xxxvi. 12; cp. Num. xxiv. 20): it throws light on the traces of a permanent occupation of Central Palestine in their passage westward, as indicated by the

Map of the Country of the Amalekites.

names Amalek and Mount of the Amalekites (Judg. v. 14, xii. 15): and it accounts for the silence of Scripture as to any relationship between the Amalekites on the one hand, and the Edomites or the Israelites on the other. That a mixture of the two former races occurred at a later period, would in this case be the only inference from Gen. xxxvi. 16, though many writers have considered that passage to refer to the origin of the whole nation, explaining Gen. xiv. 7 as a case of *prolepsis* (see, however, Schultz, s. n. in Herzog, *RE.*). The physical character of the district occupied by the Amalekites [ARABIA] necessitated a nomadic life, which they adopted to its fullest extent, taking their families with them even on their military expeditions (Judg. vi. 5). Their wealth con-

sisted in flocks and herds. Mention is made of a "town" (1 Sam. xv. 5), and Josephus gives an exaggerated account of the capture of several towns by Saul (*Ant.* vi. 7, §2); but the towns could have been little more than stations, or nomadic enclosures. The kings or chieftains were perhaps distinguished by the hereditary title AGAG (Num. xxiv. 7; 1 Sam. xv. 8). Two important routes led through the Amalekite district, viz. from Palestine to Egypt by the *Isthmus of Suez*, and to Southern Asia and Africa by the Aelanitic arm of the Red Sea. It has been conjectured that the expedition of the four kings (Gen. xiv.) had for its object the opening of the latter route; and it is in connexion with the former that the Amalekites first came in contact with the Israelites, whose progress they attempted to stop, adopting a *guerilla* style of warfare (Deut. xxv. 18), but were signally defeated at REPHIDIM (Ex. xvii. 8, &c.). The conduct of Amalek in this cruel attack on a people "faint and weary" was never forgiven. "The Lord will have war with Amalek from generation to generation;" "Thou shalt blot out the remembrance of Amalek from under heaven" (Ex. xvii. 16; Deut. xxv. 17-19). In union with the Canaanites they were, however, permitted to attack the disobedient Israelites on the borders of Palestine, and to defeat them near Hormah (Num. xiv. 45). Thenceforward we hear of them only as a secondary power, at one time in league with the Moabites (Judg. iii. 13), when they were defeated by Ehud near Jericho; at another time in league with the Midianites (Judg. vi. 3), when they penetrated into the plain of Esdraelon, and were defeated by Gideon. Saul undertook an expedition against them, overrunning their whole district "from Havilah to Shur," and inflicting an immense loss upon them (1 Sam. xv.). Their power was thenceforward broken, and they degenerated into a horde of banditti, whose style of warfare is well expressed in the Hebrew term נָדָדָר (Gesen. *Lex.*), frequently applied to them in the description of their contests with David in the neighbourhood of Ziklag, when their destruction was completed (1 Sam. xxvii. xxx.; cp. Num. xxiv. 20). [W. L. B.] [F.]

AMAM (אָמָם B. אָמָם; A. 'Αμύ; Amam), a city in the south of Judah, named with Shema and Moladah (*el-Milh*) in Josh. xv. 26 only. Nothing is known of it. [G.] [W.]

A'MAN (B. 'Aḏm; Itala *Nadab*; Syr. *Ahāb*). Tob. xiv. 10. [HAMAN.] [F.]

AMANA (אָמָנָה, i.e. *constant*), apparently a mountain near Lebanon, and possibly a part of Anti-Lebanon which overlooks the plain of Damascus,—"from the head of Amana" (Cant. iv. 8). It is commonly assumed that this is the mountain in which the river Abana (2 K. v. 12; Keri, Targum-Jonathan, and margin of A. V. and R. V. "Amana") has its source, and it may have derived its name from that river. The LXX. (BA.) translate ἀν' ἀρχῆς πηγῶν. [G.] [W.]

AMARIAH (אָמָרִיָּהוּ, אָמָרִיָּהוּ, *Amariyas* usually; *whom God promised*, Gesen., i. q. Θεό-φραστορ). 1. Father of Ahitub, according to 1 Ch. vi. 7 [LXX. v. 33, B. 'Αμαρείδ, A. 'Αμαρίας], c. 52 [LXX. vi. 37, B. 'Αμαρείδ, A.

'*Amapid*], and son of Meraioth, in the line of the high-priests. In Josephus's Hist. (*Ant.* viii. 1, § 3) he is transformed into 'Αποφαϊός.

2. '*Amapias*. The high-priest in the reign of Jehoshaphat (2 Ch. xix. 11). He was the son of Azariah, and the fifth high-priest who succeeded Zadok (1 Ch. vi. 11). Nothing is known of him beyond his name, but from the way in which Jehoshaphat mentions him he seems to have seconded that pious king in his endeavours to work a reformation in Israel and Judah (see 2 Ch. xvii. xix.). Josephus, who calls him '*Amapias* τὸν *λεπίτα*, "Amaziah the priest," unaccountably says of him (as the text now stands) that he, as well as Zebadiah, was of the tribe of Judah. But if *ἐκάρτερος* is struck out, this absurd statement will disappear (*Ant.* ix. 1, § 1). It is not easy to recognise him in the wonderfully corrupt list of high-priests given in the *Ant.* x. 8, § 6. But he seems to be concealed under the strange form *ΑΞΙΟΡΑΜΟΣ*, Axioramus. The syllable *AΞ* is corrupted from *AΣ*, the termination of the preceding name, Azarias, which has accidentally adhered to the beginning of Amariah, as the final *Σ* has to the very same name in the text of Nicephorus (*ap. Seld. de Success.* p. 193), producing the form *Σαμαρίας*. The remaining '*ίωραμος* is not far removed from '*Amapias*. The successor of Amariah in the high-priesthood must have been Jehoiada. In Josephus *φιδέας*, which is a corruption of '*ιδέας*, follows Axioramus. There is not the slightest support in the sacred history for the names *Ahitub* and *Zadok*, who are made to follow Amariah in the genealogy, 1 Ch. vi. 11, 12.

3. The head of a Levitical house of the Kohathites in the time of David (1 Ch. xxiii. 19 [A. '*Amapid*, B. '*Amadi*]; xiv. 23 [B. '*Amadi*, A. '*Amapias*]).

4. The head of one of the twenty-four courses of priests, which was named after him, in the time of David, of Hezekiah, and of Nehemiah (1 Ch. xxiv. 14 [B. '*Emmer*, *Emmer*, but in A. Heb. Vulg. the head of the 16th course, in B. the head of the 15th course]; 2 Ch. xxxi. 15 [B. '*Mapias*]; Neh. x. 3 ['*Amapid*, xii. 2 [B. '*Mapid*, N. '*Mapia*, N. '*Amapiela*, A. '*id*], 13 [B. '*Maped*, N. '*Amapid*, N. '*A. Amapid*]). In the first passage the name is written *ימרי*, *Immer*, but it seems to be the same name. Another form of the name is *ימרי*, *Imri* (1 Ch. ix. 4 [B. '*Appel*, A. '*i*; Amri]), a man of Judah, of the sons of Bani. Of the same family we find,

5. Amariah in the time of Ezra (Ezra x. 42, NB. '*Mapia*, A. '*Amapias*), one of those who had married a "strange" wife.

6. An ancestor of Zephaniah the prophet (Zeph. i. 1, T. '*Amapias*, A. '*ei*, N. very corrupt).

[A. C. H.] [F.]

7. B. '*Amapias*, A. '*id*, N. '*Amapias*. A descendant of Pharez, son of Judah (Neh. xi. 4). Probably the same as Imri (above No. 4).

[W. A. W.] [F.]

AMARIAS (*Amerias*). An ancestor of Ezra (1 Esd. viii. 2, B. '*Amapias*, A. '*Amapias*; 2 Esd. i. 2 [Gk. vii. 3, '*Amapias*]). [W. A. W.] [F.]

AMA'SA (*Nemusa*, Ges. = a burden, Fürst = *Nemusa*, a bearer; D. H. Müller [in *MV.*]) connects it with an Arabic word and prefers the

meaning of *weak-sighted*, having weeping eyes: *Amasa*). 1. Son of Ithra or Jether, by Abigail, David's sister (2 Sam. xvii. 25, B. '*Amasai*, A. '*ai*). He joined Absalom in his rebellion, and was by him appointed commander-in-chief in the place of Joab, by whom he was totally defeated in the forest of Ephraim (2 Sam. xviii. 6). When Joab incurred the displeasure of David for killing Absalom, David forgave the treason of Amasa, recognised him as his nephew, and appointed him Joab's successor (xix. 13, B. '*Amasai* [and in xx. 10], A. '*Amasai*). Joab afterwards, when they were both in pursuit of the rebel Sheba, pretended to salute Amasa, and stabbed him with his sword (xx. 10, A. '*Amasai*), which he held concealed in his left hand. Amasa is probably identical with *ימשי* (AMASAI No. 2), who is mentioned among David's commanders (1 Ch. xii. 18, B. '*Amasai*, N. '*se*. Ewald, *Gesch. Israel*, ii. 544).

2. A prince of Ephraim, son of Hadlai, in the reign of Ahaz (2 Ch. xxviii. 12, B. '*Amasai*, A. '*i*). [R. W. B.] [F.]

AMA'SAI (*ימשי*, Ges. = *burdensome*, Fürst = *ימשי* [see AMASA]; *Amasai*). 1. A Kohathite, father of Mahath and ancestor of Shemuel and Heman the singer (1 Ch. vi. 25 [LXX. vi. 10, B. '*Amasai*, A. '*Amasai*], 35 [LXX. r. 20, B. '*Amabel*, A. '*Amay*]).

2. See AMASA No. 1. Chief of the captains (Heb., LXX., and R. V. "thirty"), leader of the men of Judah and Benjamin, who came to David while an outlaw at Ziklag (1 Ch. xii. 18). He was probably the same as Amasa, David's nephew.

3. B. '*Amasai*, N. '*Amasai*. One of the priests who blew trumpets before the Ark, when David brought it from the house of Obed-edom (1 Ch. xv. 24).

4. B. '*Maai*: cp. No. 1. Another Kohathite, father of another Mahath, in the reign of Hezekiah (2 Ch. xxix. 12), unless the name is that of a family. [W. A. W.] [F.]

AMASH'AI (*ימשי*), according to Ges. an incorrect reading springing out of the forms *ימשי* and *ימשי*; according to Olshausen [*Lehrb.* p. 625] an error for *ימשי*; '*Amasia*, A. '*Amasai*: *Amassai*, properly "Amashai." Son of Azazel, a priest in the time of Nehemiah (Neh. xi. 13); apparently the same as MAASAI (1 Ch. ix. 12). [W. A. W.] [F.]

AMASI'AH (*ימשי*, *Jah* is bearer, cp. the Phoen. *עֲשִׂימוֹן*, *Eshimun* beareth, *MV.* 14; B. '*Maasai*, A. '*Maasai*: *Amasias*). Son of Zichri, and captain of 200,000 warriors of Judah, in the reign of Jehoshaphat (2 Ch. xvii. 16).

[W. A. W.] [F.]

A'MATH. [HAMATH.]

AM'ATHEIS (B. '*Equathis*, A. '*Equathis*; *Emcus*). 1 Esd. ix. 29. [ATHLAI.]

[W. A. W.] [F.]

AM'ATHIS (in some copies AMATHAS, "THE LAND OF" (*ἡ Ἀμαθίς χώρα*); a district to the north of Palestine, in which Jonathan Maccabaeus met the forces of Demetrius (1 Macc. xii. 25). From the context it is evidently HAMATH. [G.] [W.]

AMAZIAH (*ימשי* or *ימשי*, *Jehorah* is strong; B. '*Amasaias* [usually], A. '*Amasaias*

[usually]; *Amasias*), son of Joash, and eighth king of Judah, succeeded to the throne at the age of 25 on the murder of his father, and punished the murderers (2 K. xii. 21, xiv. 2, 5); sparing, however, their children, in accordance with Deut. xxiv. 16, as the Second Book of Kings (xiv. 6) expressly informs us, thereby implying that the precept had not been generally observed. In order to restore his kingdom to the greatness of Jehoshaphat's days, he made war on the Edomites, defeated them in the valley of Salt, south of the Dead Sea (the scene of a great victory in David's time, 2 Sam. viii. 13; 1 Ch. xviii. 12; Ps. lx. title), and took their capital, *Selah* or *Petra*, to which he gave the name of *JORTHKEEL*, which was also borne by one of his own Jewish cities (Josh. xv. 38). We read in 2 Ch. xxv. 12-14, that the victorious Jews threw 10,000 Edomites from the cliffs, and that Amaziah performed religious ceremonies in honour of the gods of the country; an exception to the general character of his reign (cf. 2 K. xiv. 3 with 2 Ch. xxv. 2). In consequence of this he was overtaken by misfortune. Having already offended the Hebrews of the northern kingdom by sending back, in obedience to a prophet's direction, some mercenary troops whom he had hired from it, he had the foolish arrogance to challenge Joash, king of Israel, to battle, despising probably a sovereign whose strength had been exhausted by Syrian wars, and who had not yet made himself respected by the great successes recorded in 2 K. xiii. 25. But Judah was completely defeated, and Amaziah himself was taken prisoner, and conveyed by Joash to Jerusalem, which, according to Josephus (*Ant. ix. 9, § 3*), opened its gates to the conqueror under a threat that otherwise he would put Amaziah to death. We do not know the historian's authority for this statement, but it explains the fact that the city was taken apparently without resistance (2 K. xiv. 13). A portion of the wall of Jerusalem on the side towards the Israelitish frontier was broken down, and treasures and hostages were carried off to Samaria. Amaziah lived fifteen years after the death of Joash; and in the 29th year of his reign was murdered by conspirators at Lachish, whither he had retired for safety from Jerusalem. The chronicler seems to regard this as a punishment for his idolatry in Edom, though his language is not very clear on the point (2 Ch. xxv. 27); and doubtless it is very probable that the conspiracy was a consequence of the low state to which Judah must have been reduced in the latter part of his reign, after the Edomitish war and humiliation inflicted by Joash, king of Israel. The chronology of this king's reign is much disputed. Clinton (*Fasti Hellenici*, i. p. 325) gives the dates B.C. 837-809; and, previous to the comparison with Assyrian dates, the beginning of the regnal years has been variously placed between the limits B.C. 840 (Bengel) and B.C. 809 (Seyfarth. See the table in Herzog, *RE*,² xvii. p. 477, s. n. *Zeitrechnung*). Since the employment of Assyrian synchronistic dates, the beginning of Amaziah's reign is placed between B.C. 798 and B.C. 796, and a joint reign with his son Amariah (or Uziah) is supposed to have begun in B.C. 786. (See CHRONOLOGY.)

2. *Amasias*. Priest of the golden calf at Bethel, who endeavoured to drive the prophet

Amos from Israel into Judah, and complained of him to king Jeroboam II. (Amos vii. 10).

3. A descendant of Simeon (1 Ch. iv. 34, B. 'Αμασειδ, B⁶A. -ia).

4. A Levite (1 Ch. vi. 45, B. 'Αμασειδ: A. has a longer reading, *Μαροσία υἱοῦ Χελχιου υἱοῦ Ἀμασι*). [G. E. L. C.] [F.]

AMBASSADOR. Sometimes ἄγγελος and sometimes ἄρχιπρεσβυτης is thus rendered; and the occurrence of both terms in the parallel clauses of Prov. xiii. 17 seems to show that they approximate to synonyms. The word "messengers" is probably equivalent to ambassadors in the A. V. of Deut. ii. 26; Judg. xi. 12-19; 2 Sam. v. 11; 1 Ch. xiv. 1, xix. 2; Is. xiv. 32, xviii. 2, xxxiii. 7, lvii. 9; Jer. xxvii. 3; Ezek. xxx. 9; Nah. ii. 13, as well as in many of the passages cited below. The office, like its designation, was not definite nor permanent, but *pro re nata* merely. The precept given in Deut. xx. 10 seems to imply some such agency; rather, however, that of a mere nuncio, often bearing a letter (2 K. v. 5, xix. 14), than of a legate empowered to treat. The inviolability of such an officer's person may perhaps be inferred from the only recorded infraction of it being followed with unusual severities towards the vanquished, probably designed as a condign chastisement of that offence (2 Sam. x. 2-5; cf. xii. 28-31). The earliest examples of ambassadors employed occur in the cases of Edom, Moab, and the Amorites (Num. xx. 14, xxi. 21; Judg. xi. 17-19), afterwards in that of the fraudulent Gibeonites (Josh. ix. 4, &c.), of the king of Ammon, and in the instances of civil strife mentioned Judg. xi. 12 and xx. 12 (see Cuneaeus, *de Rep. Hebr.* ii. 20, with notes by J. Nicholas; Ugol. iii. 771-4). They are mentioned more frequently during and after the contact of the great adjacent monarchies of Syria, Babylon, &c. (e.g. xvii. 14), with those of Judah and Israel, e.g. in the invasion of Sennacherib. They were usually men of high rank; just as in that case the chief captain, the chief cupbearer, and chief of the eunuchs were deputed, and were met by delegates of similar dignity from Hezekiah (2 K. xviii. 17, 18; see also Is. xxx. 4). Ambassadors are found to have been employed, not only on occasions of hostile challenge or insolent menace (2 K. xiv. 8; 1 K. xx. 2, 6), but of friendly compliment, of request for alliance or other aid, of submissive deprecation, and of curious inquiry (2 K. xvi. 7, xviii. 14; 2 Ch. xxxii. 31). The dispatch of ambassadors with urgent haste is introduced as a token of national grandeur in the obscure prophecy Is. xviii. 2. The political complications of the Jewish State in the Maccabean period and subsequently, when they were brought into contact with the Western republics, as well as with the Eastern and Egyptian monarchies, gave a wider range and greater precision to the ambassadorial function. These treaties with Rome and Sparta were negotiated by Simon the Maccabee (1 Mac. xiv. 21 foll.). The A. V. is rather arbitrary in its selection of terms to designate the office. Thus "the ambassador" of 1 Mac. xii. 8 is *τὸν ἄνδρα τὸν ἀπεσταλμένον*; ib. 23, "ambassador" is understood from the verb *ἀπαγγεῖλαι*. Thus

both πρέσβεις and πρεσβευται are in A. V. "messengers" (1 Mac. xiii. 14, 21), whereas "ambassadors" stands for the same words in ix. 70, xi. 9, xiv. 21, 40, xv. 17; 2 Mac. xi. 34. On the other hand "ambassadors" stands for ἀγγέλους in Jud. iii. 1; and in 1 Mac. i. 44, where the same word is rendered "messengers," the ambassadorial function seems clearly intended. In 2 Mac. iv. 19, θεσποῖς, "special messengers" in A. V., is used for the envoys sent by Jason, the Hellenizing high-priest, to the festival of Herakles. In the N. T. the only mention of the office is in parables or metaphor (Luke xiv. 22; 2 Cor. v. 20). [H. H.]

AMBER (חֲשָׁמַל, *chashmal*; חֲשִׁמְלָה, *chashmalāh*; ἤλεκτρον; *electron*; R. V. margin, "electron") occurs only in Ezek. i. 4, 27, viii. 2. In the first passage the Prophet compares it with the brightness in which he beheld the heavenly apparition who gave him the Divine commands. In the third, "the glory of the God of Israel" is represented as having, "from the appearance of his loins even downward, fire; and from his loins even upward as the appearance of brightness, as the colour of amber" [חֲשָׁמַל כְּצֶבֶד, words which Orelli (*Kyf. Komm.* ed. Strack u. Zöckler) retains, but which Cornill (*Das Buch des Propheten Ezechiel*, note in loco) would strike out as a gloss]. It is by no means a matter of certainty, notwithstanding Bochart's dissertation and the conclusion he comes to (*Hieroz.* iii. 876, ed. Rosenmüll.), that the Hebrew word *chashmal* denotes a metal, and not the fossil resin called *amber*, although perhaps the probabilities are more in favour of the metal. Dr. Harris (*Nat. Hist. Bib.*, art. "Amber") asserts that the translators of the A. V. could not mean amber, "for that, being a bituminous substance, becomes dim as soon as it feels the fire, and soon dissolves and consumes." But this is founded on a misconstruction of the words of the Prophet, who does not say that what he saw was amber, but of the colour of amber (*Pict. Bib.* note on Ezek. viii. 2). The context of the passages referred to above is clearly as much in favour of amber as of metal. Neither do the LXX. and Vulg. afford any certain clue to identification, for the word *electron* was used by the Greeks to express both *amber* and a certain *metal*, composed of gold and silver, and held in very high estimation by the ancients (Pliny, *H. N.* xxxiii. 4). It is a curious fact, that in the context of all the passages where mention of *electron* is made in the works of Greek authors (Hom. see below; Hes. *Sc. Ilenc.* 142; Soph. *Antij.* 1038; Aristoph. *Eq.* 532, &c.), no evidence is afforded to help us to determine what the *electron* was. In the *Odyssey* (iv. 73) it is mentioned as enriching Menelaus's palace, together with copper, gold, silver, and ivory. In *Od.* xv. 480, xviii. 296, a necklace of gold is said to be fitted with *electron*. Pliny, in the chapter quoted above, understands the *electron* in Menelaus's palace to be the *metal*. But with respect to the golden necklace, it is worthy of note that amber necklaces have long been used, as they were deemed an amulet against throat diseases. They are still frequently worn in England by persons liable to asthma, and are believed to be efficacious for the purpose. Beads

of amber are frequently found in British barrows with entire necklaces (Fosbrooke, *Antiq.* i. 289). Theophrastus (ix. 18, § 2; and *Fr.* ii. 29, ed. Schneider), it is certain, uses the term *electron* to denote *amber*, for he speaks of its attracting properties. On the other hand, that *electron* was understood by the Greeks to denote a metal composed of one part of silver to every four of gold, we have the testimony of Pliny to show; but whether the early Greeks intended the metal or the amber, or sometimes one and sometimes the other, it is impossible to determine with certainty. Passow believes that the *metal* was always denoted by *electron* in the writings of Homer and Hesiod, and that *amber* was not known till its introduction by the Phoenicians: to which circumstance, as he thinks, Herodotus (iii. 115, who seems to speak of the resin, and not of the metal) refers. Others again, with Buttmann (*Mythol.* ii. p. 337), maintain that the *electron* denoted *amber*, and they very reasonably refer to the ancient myth of the origin of *amber*. Pliny (*H. N.* xxxvii. 2) ridicules the Greek writers for their credulity in the fabulous origin of this substance; and especially finds fault with Sophocles, who, in some lost play, appears to have believed in it.

From these considerations it will be seen that it is not possible to identify the *chashmal* by the help of the LXX., or to say whether we are to understand the metal or the fossil resin by the word. The derivation of the word is entirely unknown, nor is there any plausible explanation of it. Bochart (*Hieroz.* iii. 885) conjectures that *chashmal* is compounded of two Chaldee* words meaning *copper-gold-ore*, to which he refers the *aurichalcum*. But *aurichalcum* is in all probability only the Latin form of the Greek *orichalcum* (*mountain copper*). See Smith's *Lat.-Engl. Dict.*, s. v. "Orichalcum". Isidorus, however (*Orig.* xvi. 19), sanctions the etymology which Bochart adopts. But the *electron*, according to Pliny, Pausanias (r. 12, § 6), and the numerous authorities quoted by Bochart, was composed of *gold and silver*, not of *gold and copper*. The Hebrew word may denote either the metal *electron* or *amber*; but it must be left as a question which of the two substances is really intended. [W. H.] [H. B. T.]

A'MEN (אָמֵן), literally "firm, true;" and used as a substantive, "that which is true," "truth" (Is. lrv. 16); a word used in strong asseverations, fixing as it were the stamp of truth upon the assertion which it accompanied, and making it binding as an oath (cp. *Nam.* v. 22). In the LXX. of 1 Ch. xvi. 36, *Neh.* v. 13, viii. 6, the word appears in the form 'Αμήν, which is used throughout the N. T.† In other passages the Heb. is rendered by *yémena*, except in Is. lrv. 16. The Vulgate adopts the Hebrew word in all cases except in the Psalms, where it is translated *fiat*. In Deut. xxvii. 15-26.

* Fried. Deltzsch (Prof. to Baer's ed. of Ezekiel, p. xii.) compares with it an Assyrian word, *Amard*, which he conjectures, from the context of the passage in which it occurs, may have meant some white metal.

† The 'Αμήν of the Rec. text at the end of most of the Books of the N. T. is thought to be genuine only in Romans, Galatians, Hebrews (?), and Jude (see Westcott and Hort's ed. of the N. T. in Greek).

the people were to say "Amen," as the Levites pronounced each of the curses upon Mount Ebal, signifying by this their assent to the conditions under which the curses would be inflicted. In accordance with this usage we find that among the Rabbis "Amen" involves the ideas of swearing, acceptance, and truthfulness. The first two senses are illustrated by the passages already quoted; the last by 1 K. i. 36; John iii. 3, 5, 11 (A. V. "verily"), in which the assertions are made with the solemnity of an oath, and then strengthened by the repetition of "Amen." "Amen" was the proper response of the person to whom an oath was administered (Neh. v. 13, viii. 6; 1 Ch. xvi. 36; Jer. xi. 5, marg.); and the Deity, to Whom appeal is made on such occasions, is called "the God of Amen" (Is. lxxv. 16), as being a witness to the sincerity of the implied compact. With a similar significance Christ is called "the Amen, the faithful and true witness" (Rev. iii. 14; comp. John i. 14, xiv. 6; 2 Cor. i. 20). It is matter of tradition that in the Temple the "Amen" was not uttered by the people, but that instead, at the conclusion of the priest's prayers, they responded, "Blessed be the name of the glory of His kingdom for ever and ever." Of this a trace is supposed to remain in the concluding sentence of the Lord's Prayer (cp. Rom. xi. 36). But in the synagogues and private houses it was customary for the people or members of the family who were present to say "Amen" to the prayers which were offered by the minister or the master of the house, and the custom remained in the early Christian Church (Matt. vi. 13; 1 Cor. xiv. 16). And not only public prayers, but those offered in private, and doxologies, were appropriately concluded with "Amen" (Rom. ix. 5, xi. 36, xv. 33, xvi. 27; 2 Cor. xiii. 14, &c.). [W. A. W.]

AMETHYST (אֶמֶתֶשֶׁת, *achlāmāh*, derivation unknown. Ges. [*Lex.*] connects it with אֶמֶת, from the idea that it caused dreams to those that wore it; according to Fried. Delitzsch from *Alāmā*, an Armenian district in which he conjectures that the stone may have been found [*Heb. Lang.* p. 36]: ἀμέθυστος; *amethystus*). Mention is made of this precious stone, which formed the third in the third row of the high-priest's breastplate, in Ex. xxviii. 19, xxxix. 12, "And the third row a figure, an agate, and an amethyst." It occurs also in the N. T. (Rev. xxi. 20) as the twelfth stone which garnished the foundations of the wall of the heavenly Jerusalem. Commentators generally are agreed that the *amethyst* is the stone indicated by the Hebrew word, an opinion which is abundantly supported by the ancient Versions. The Targum of Jerusalem indeed reads *smaragdina* (*smaragdus*); those of Onkelos and Pseudo-Jonathan have two words which signify "cat's-eye" (*oculus vituli*), which Braunius (*de Fest. Sacerd. Heb.* ii. 711) conjectures may be identical with the *Beli oculus* of the Assyrians (Pliny, *H. N.* xxxvii. 55), the *Cat's-eye Chalcedony*, according to Ajasson and Desfontaines; but, as Braunius has observed, the word *achlāmāh* according to the best and most ancient authorities signifies *amethyst*.

Modern mineralogists usually understand by the term *amethyst* the amethystine variety of quartz, which is crystalline and highly trans-

parent: it is sometimes called *Rose quartz*, and contains alumina and oxide of manganese. There is, however, another mineral to which the name of *Oriental amethyst* is usually applied, and which is far more valuable than the quartz kind. This is a crystalline variety of *Corundum*, being found more especially in the E. and W. Indies. It is extremely hard and bright, and generally of a purple colour, which, however, it may readily be made to lose by subjecting it to fire. In all probability the common *Amethystine quartz* is the mineral denoted by *achlāmāh*; for Pliny speaks of the amethyst being easily cut (*sculpturis faciliis*, *H. N.* xxxvii. 40), whereas the *Oriental amethyst* is inferior only to the diamond in hardness, and is moreover a comparatively rare gem.

The Greek word *amethystos*, the origin of the English *amethyst*, is usually derived from ἀ, "not," and μέθυσ, "to be intoxicated," this stone having been believed to have the power of dispelling drunkenness in those who wore it (Dionys. Perieg. 1122; *Anthol. Palat.* 9, 752; Martini, *Excurs.* 158). Pliny, however (*H. N.* xxxvii. 9), traces the name of these stones "to their peculiar tint, which, after approximating to the colour of wine, shades off into a violet." Theophrastus also alludes to its wine-like colour.* [W. H.] [H. B. T.]

A'MI (אָמִי; Ἰμελ; *Ami*), name of one of "Solomon's servants" (Ezra ii. 57); called *Amon* (אֲמוֹן) in the parallel passage Neh. vii. 59 (Ἰμελ; *Amon*), of which, according to Ges., it is a corruption. The transcriptional variations between the parallel lists are tabulated by Smend, *Die Listen d. BB. Esra u. Nehemi* (Basel, 1881). [W. A. W.] [F.]

AMIN'ADAB (Ἀμινάδης; *Aminadab*). **AMINADAB** No. 1 (Matt. i. 4; Luke iii. 33). [W. A. W.]

AMIT'TAI (אֶמֶתַּי = *true, faithful*; B. Ἀμαθελ, A. -י; *Amathi*), father of the prophet Jonah (2 K. xiv. 25; Jon. i. 1). [W. A. W.] [F.]

AM'MAH, the hill of (אֶמֶתַּי הַבְּרָכָה; δὲ βουνός, B. Ἀμμά, A. Ἀμμά; *collis Aqueductus*), a hill "facing" Giah by the way of the wilderness of Gibeon, named as the point to which Joab's pursuit of Abner after the death of Asahel extended (2 Sam. ii. 24). Josephus (*Ant.* vii. ch. i. § 3), τόπος τις, ὅν' Ἀμμάται καλοῦσι (comp. Targ. Jon. אֶמֶתַּי). Both Symmachus (*ἀπή = gully*) and Theodotion (*ὄδραγωγός*), who is followed by the Vulgate, find an allusion to a watercourse here, possibly some place near *W. Kelt*, on the road by which Abner fled to the Jordan valley. Can this point to the "excavated fountain," "under the high rock," described as near Gibeon (*El-Jib*) by Robinson (i. 455)? [G.] [W.]

AMMI (אָמִי; λαός μου; *populus meus*), i.e. as explained in the margin of the A. V. and

* Το δ' ἀμέθυστον οἶνωπον τῇ χροί. (Fr. ii. 31, ed. Schneid.)

b In post-Biblical Hebrew as in Aramaic אֶמֶתַּי acquired the meaning of *aqueduct*. Had this sense, however, been intended here, the word would naturally have been provided with the article. [S. R. D.]

R. V., "My people;" a figurative name applied to the kingdom of Israel in token of God's reconciliation with them, and their position as "sons of the living God," in contrast with the equally significant name Lo-ammi, given by the prophet Hosea to his second son by Gomer, the daughter of Diblaim (Hos. ii. 1). In the same manner Ruhamah contrasts with Lo-Ruhamah.

[W. A. W.]

AMMIDIOI, in the Geneva Version AMMIDIOI (B. Ἀμμιδιοί, A. Ἀμμιδαίοι; Vulg. has different names), people who, together with the men of Chadias, came up from Babylon with Zerubbabel (1 Esd. v. 20). If Chadias be identified with Kedesh (Josh. xv. 23), the Ammidioi may be (Fritzsche) the men of Humtah (חֻמְתָּה, Josh. xv. 54). If so, the LXX. Α. χαμματά (B. Εδμή) furnishes the connecting link with Ammidioi or (replacing the guttural) Chammidioi (see Lupton, *Speaker's Commentary*, note on 1 Esd. v. 20).

[F.]

AMMI'EL (אַמִּי־אֵל, MV.¹⁰ = *people of God*). Many Heb. names are compounded of אֵל, but the sense in which it to be understood is uncertain. See Nestle, *Die Israel. Eigennamen*, p. 187, n. a; Fried. Delitzsch, *Prolegg.* p. 201, n. 3; B. Ἀμειήλ, AF. Ἀμιάλ; *Ammiel*. 1. The spy selected by Moses from the tribe of Dan (Num. xiii. 12).

2. The father of Machir of Lodebar (2 Sam. ix. 4 [B. Ἀμαήρ, A. Ἀμιάλ], v. 5 [B. Ἀμειήλ, A. -], xvii. 27 [B. Ἀμειήλ, A. Ἀμιάρ]; *Ammihel*).

3. The father of Bathshua, or Bathsheba, the wife of David (1 Ch. iii. 5), called ΕΛΙΑΜ (עֲלִיָּאִם) in 2 Sam. xi. 3; the Hebrew letters, which are the same in the two names, being transposed. He was the son of Abithophel, David's prime minister.

4. B. Ἀμειήλ, A. -r-. The sixth son of Obed-edom (1 Ch. xxvi. 5), and one of the doorkeepers of the Temple. [W. A. W.] [F.]

AMMIHUD (אַמִּי־הוּד, MV.¹⁰ = *my people is majesty*; Ἐμμοὺδ in Num. Ἀμμοὺδ in 1 Ch.; *Ammiud*). 1. An Ephraimite, father of Elishama, the chief of the tribe at the time of the Exodus (Num. i. 10, ii. 18, vii. 48 [F. Σεμμοὺδ, and in x. 22], 53, x. 22), and through him ancestor of Joshua (1 Ch. vii. 26 [B. Ἀμμουεῖδ, A. -ουδ]).

2. B. Σεμμοὺδ; B²EF. Ἐμμοὺδ. A Simeonite, father of Shemuel, chief of the tribe at the time of the division of Canaan (Num. xxiv. 20).

3. AF. Ἀμμοὺδ, B. Βεριαμμοὺδ, B²-μ-. The father of Pedahel, chief of the tribe of Naphtali at the same time (Num. xxiv. 28).

4. אַמִּי־חֻד, Keri אַמִּי־חֻד; Ἐμμοὺδ. Ammihud, or "Ammichur," as the written text has it, was the father of Talmi, king of Geshur (2 Sam. xiii. 37).

5. A. Ἀμμοὺδ, B. Σεμμοὺδ. A descendant of Pharez, son of Judah (1 Ch. ix. 4).

[W. A. W.] [F.]

AMMINADAB (אַמִּי־נָדָב, MV.¹⁰ = *my people is noble*: the passages Judg. v. 2, Ps. cx. 3 marg., seem however rather to suggest the sense *my people is willing* [see v. 4]; B. Ἀμειναδάβ,

AF. -נָדָב [usually; in Ex. vi. 23, A. and in Num. i. 7, F. Ἀμινάδαμ; *Aminadab*). 1. Son of Ram or Aram, and father of Nahshon, or Naasson (as it is written, Matt. i. 4; Luke iii. 32; R. V. Nahshon in both places), who was the prince of the tribe of Judah, at the first numbering of Israel in the second year of the Exodus (Num. i. 7, ii. 3; Ruth iv. 19, 20; 1 Ch. ii. 10). We gather hence that Amminadab died in Egypt before the Exodus, which accords with the mention of him in Ex. vi. 23, where we read that "Aaron took him Elisheba daughter of Amminadab, sister of Nahshon, to wife, and she bare him Nadab and Abihu, Eleazar and Ithamar." This also indicates that Amminadab must have lived in the time of the most grievous oppression of the Israelites in Egypt. He is the fourth generation after Judah, the patriarch of his tribe, and one of the ancestors of JESUS CHRIST. Nothing more is recorded of him; but the marriage of his daughter to Aaron may be marked as the earliest instance of alliance between the royal line of Judah and the priestly line of Aaron. And the name of his grandson Nadab may be noted as probably given in honour of Ammi-nadab his grandfather.

2. NA. Ἀμινάδαβ, B. -נָדָב. The chief of the 112 sons of Uzziel, a junior Levitical house of the family of the Kohathites (Ex. vi. 18), in the days of David, whom that king sent for, together with Uriel, Asaiah, Joel, Shemaiah, and Eliel, other chief fathers of Levitical houses, and Zadok and Abiathar the priests, to bring the ark of God to Jerusalem (1 Ch. xv. 10-13), to the tent which he had pitched for it. The passage last quoted is instructive as to the mode of naming the houses; for besides the sons of Kohath, 120 in v. 5, we have the sons of Elizaphan, 200 in v. 8, of Hebron, 80 in v. 9, and of Uzziel, 112 in v. 10, all of them Kohathites (Num. iii. 27, 30).

3. At 1 Ch. vi. 22 (c. 7, Heb.) Izhar, the son of Kohath, and father of Korah, is called Amminadab, and the LXX. has the same reading (B. Ἀμειναδάβ, A. Ἰσσαδάβ). But it is probably only a clerical error.

4. In Cant. vi. 12 it is uncertain whether we ought to read אַמִּי־נָדָב, *Aminadib*, with the A. V., or נָדָב, אַמִּי, *my willing people*, as in the margin [R. V. "my princely people"] and most moderns (Delitzsch, Ottli, &c.). If Amminadib is a proper name, it is thought to be either the name of some one famous for his swift chariots, מִדְּרָבָבוֹת, or that there is an allusion to Abinadab, and to the new cart on which they made to ride (יָרִידָב) the ark of God (2 Sam. vi. 3). But this last, though perhaps intended by the LXX. version of Cant., which has Ἀμινάδαβ, is very improbable. In vii. 2 (v. 1, A. V.) the LXX. (T.) also renders נָדָב, "O prince's daughter," by θύγατερ Ναδάβ; A reads θύγατερ Ἀμινάδαβ; Vulg. *filia principis*. [A. C. H.] [F.]

AMMINADIB (Cant. vi. 12). [AMMINADAB No. 4.]

AMMISHADDAI (אַמִּי־שָׁדַי, MV.¹⁰ = *people of the Almighty*; B. Ἀμεισαδάι, AF. -נָדָב [except in Num. ii. 25, where A. reads Σεμμοσαδάι, and in x. 25, Μισαδάι]; *Amisaddai, Ammisaddai*). The

father of Abiezer, chief of the tribe of Dan at the time of the Exodus (Num. i. 12, ii. 25, vii. 68, 71, x. 25). His name is one of the few which we find at this period compounded with the ancient name of God, Shaddai; Zuri-shaddai, and possibly Shedeur, are the only other instances: both belong to this early time.

[W. A. W.] [F.]

AMMIZABAD (אֲמִיזָבָד, *MV*.¹⁰ = *My people hath granted (it)*; for the verb אָבָד (*ἀπ. λει.*) see Gen. xxx. 20. אָבָד is common in proper names in the Palmyrene Inscriptions [cp. Euting, *Sächs. Phön. Inschriften*, p. 15]; B. Λαμβάδ, A. Ἀμπαδάδ; *Amizabad*). The son of Beniah, who apparently acted as his father's lieutenant, and commanded the third division of David's army, on duty for the third month (1 Ch. xxvii. 6). [W. A. W.] [S. R. D.]

AMMON, AM'MONITES, CHILDREN OF AMMON (עַמּוֹן, עַמּוֹנִי, עַמּוֹנִים; עַמּוֹן: *Ammon* [B. sometimes Ἀμμών, Ἀμμωνίται, LXX. in Pent.; elsewhere Ἀμμών, υἱὸν Ἀμμών; Joseph. Ἀμμωνίται; *Ammon, Ammonitae*], a people descended from Ben-Ammi, the son of Lot by his younger daughter (Gen. xix. 38; cp. Ps. lxxxiii. 7, 8), as Moab was by the elder; and dating from the destruction of Sodom.

The near relation between the two peoples indicated in the story of their origin continued throughout their existence: from their earliest mention (Deut. ii.) to their disappearance from the biblical history (Jud. v. 2) the brother-tribes are named together (cp. Judg. x. 10; 2 Ch. xx. 1; Zeph. ii. 8, &c.). Indeed, so close was their union, and so near their identity, that each would appear to be occasionally spoken of under the name of the other. Thus the "land of the children of Ammon" is said to have been given to the "children of Lot," i.e. to both Ammon and Moab (Deut. ii. 19). They are both said to have hired Balaam to curse Israel (Deut. xxiii. 4), whereas the detailed narrative of that event omits all mention of Ammon (Num. xxi., xxiii.). In the answer of Jephthah to the king of Ammon the allusions are continually to Moab (Judg. xi. 15, 18, 25), while Chemosh, the peculiar deity of Moab (Num. xxi. 29), is called "thy god" (Judg. xi. 24). The land from Arnon to Jabbok, which the king of Ammon calls "my land" (Judg. xi. 13), is elsewhere distinctly stated to have once belonged to a "king of Moab" (Num. xxi. 26). Possibly on a later occasion also the name represents both parts of the nation of Lot (2 Ch. xxvi. 8). [MOAB.]

Unlike Moab, the precise position of the territory of the Ammonites is not clearly ascertainable. In the earliest mention of them (Deut. ii. 29) they are said to have destroyed those Rephaim, or non-Semitic people, whom they called the Zamzummim, and to have occupied their country which lay north of Moab, between

the Arnon and the Jabbok.^b Shortly, however, before the advent of the Israelites in Palestine the Amorites had dispossessed the Ammonites of a portion of their territory and established a kingdom under Sihon, whose seat was at Heshbon (Num. xxi. 26). It was on this prior possession that the Ammonite king appears to have grounded his claim in the time of Jephthah (Judg. xi. 13); a claim perhaps admitted in Josh. xiii. 25. The kingdom of Sihon was divided between Gad and Reuben, but the Israelites were not permitted to occupy that portion of the Ammonite territory which the Amorites had failed to subdue. This independent kingdom lay between the Arnon and the Jabbok, and its western boundary was contemporaneous with the limits of the tribe of Gad (see Reland, 105, on Josh. xiii. 25), which included the town of Aroer near Rabbah; it consisted of the eastern portion of the district now called *Belka*, and its capital was Rabbah, or Rabbath, the modern *Ammán* [RABBAH]. "Land" or "country" is, however, but rarely ascribed to the Ammonites, nor is there any reference to those habits and circumstances of civilisation—the "plentiful fields," the "hay," the "summer-fruits," the "vineyards," the "presses," and the "songs of the grape-treaders"—which so constantly recur in the allusions to Moab (Is. xv., xvi.; Jer. xlviii.); but, on the contrary, we find everywhere traces of the fierce habits of marauders in their incursions—thrusting out the right eyes of whole cities (1 Sam. xi. 2), ripping up the women with child (Amos i. 13), and displaying a very high degree of crafty cruelty (Jer. xli. 6, 7; Judg. vii. 11, 12) to their enemies, as well as a suspicious discourtesy to their allies, which on one occasion (2 Sam. x. 1-5) brought all but extermination on the tribe (xii. 31). Nor is the contrast less observable between the one city of Ammon, the fortified hold of Rabbah (2 Sam. xi. 1; Ezek. xiv. 5; Amos i. 13), and the "streets," the "house-tops," and the "high-places" of the numerous and busy towns of the rich plains of Moab (Jer. xlviii.; Is. xv., xvi.). Taking the above into account, it is hard to avoid the conclusion that, while Moab was the settled and civilised half of the nation of Lot, the Bene-Ammon formed its predatory and Bedouin section. The confirmation of this opinion, once deduced (cp. 1st ed. of the *B. D.*) from the Succoth of Amos v. 26 (cp. LXX.; Acts vii. 43), that the special deity of the tribe was worshipped, in a booth or tent designated by that word Succah which most keenly expressed to the Israelites the contrast between a nomadic and a settled life, is now given up. Cp. the R. V. of Amos, l. c.

On the west of Jordan they never obtained a footing. Among the confusions of the times of the Judges we find them twice passing over; once with Moab and Amalek seizing Jericho, the "city of palm-trees" (Judg. iii. 13), and a second time "to fight against Judah and Benjamin, and the house of Ephraim" (Judg. x. 9); but they quickly returned to the freer pastures of Gilead, leaving but one trace of their presence in the name of Chephar ha-Ammonai, "the hamlet of the Ammonites" (Josh. xviii.

^a The expression most commonly employed for this nation is "Bene-Ammon;" next in frequency comes "Ammon" or "Ammonim" (usually in late writers); and least often "Ammon." The translators of the A.V. Version have neglected these minute differences, and have employed the three terms—children of Ammon, Ammonites, Ammon—indiscriminately.

^b Josephus states (*Ant. i. 11, § 5*) that the Moabites and Ammonites lived in Coele-Syria.

24), situated in the portion of Benjamin somewhere at the head of the passes which lead up from the Jordan valley, and form the natural access to the table-land of the west country.

The hatred in which the Ammonites were held by Israel, and which possibly was connected with the story of their incestuous origin, is stated to have arisen partly from their opposition, or, rather, their want of assistance (Deut. xxiii. 4), to the Israelites on their approach to Canaan. But it evidently sprang mainly from their share in the affair of Balaam (Deut. xxiii. 4; Neh. xiii. 1). At the period of Israel's first approach to the south of Palestine the feeling towards Ammon is one of regard. The command is then, "distress not the Moabites . . . distress not the children of Ammon, nor meddle with them" (Deut. ii. 9, 19; and cp. v. 37), and it is only from the subsequent transaction that we can account for the fact that Edom, who had also refused passage through his land but had taken no part with Balaam, is punished with the ban of exclusion from the congregation for three generations, while Moab and Ammon are to be kept out for ten generations (Deut. xxiii. 2), a sentence which acquires peculiar significance from its being the same pronounced on "bastards" in the preceding verse, from its collocation amongst those pronounced in reference to the most loathsome physical deformities, and also from the emphatic recapitulation (ver. 6), "Thou shalt not seek their peace or their prosperity all thy days for ever."

But whatever its origin it is certain that the animosity continued in force to the latest date. Subdued by Jephthah (Judg. xi. 33), and scattered with great slaughter by Saul (1 Sam. xi. 11)—and that not once only, for he "vexed" them "whithersoever he turned" (xiv. 47)—they enjoyed under his successor a short respite, probably the result of the connexion of Moab with David (1 Sam. xxii. 3) and David's town, Bethlehem—where the memory of Ruth must have been still fresh. But this was soon brought to a close by the shameful treatment to which their king subjected the friendly messengers of David (2 Sam. x. 1; 1 Ch. xix. 1), and for which David destroyed their city and inflicted on them the severest blows (2 Sam. xii. 1; 1 Ch. xx.).

[RABBAH.]

In the days of Jehoshaphat they made an incursion into Judah with the Moabites and the Maonites,* but were signally repulsed, and so many killed that three days were occupied in spoiling the bodies (2 Ch. xx. 1-25). In Uzziah's reign they made incursions and committed atrocities in Gilead (Amos i. 13); but afterwards were his tributaries (2 Ch. xxvi. 8), where perhaps the name represents both the children of Lot (comp. Jos. Ant. ix. 10, § 3). Jotham had wars with them, and exacted from them a heavy tribute of "silver (comp. "jewels," 2 Ch. xx. 25), wheat, and barley" (2 Ch. xxvii. 5). In the time of Jeremiah we find them in possession of the cities of Gad from which the Jews had been removed by Tiglath-pileser (Jer.

xliv. 1-6); and other incursions are elsewhere alluded to (Zeph. ii. 8, 9). At the time of the Captivity many Jews took refuge among the Ammonites from the Assyrians (Jer. xl. 11), but no better feeling appears to have arisen; and on the return from Babylon, Tobiah the Ammonite and Sanballat a Moabite (of Chorozaim, Jer. xlix.) were foremost among the opponents of Nehemiah's restoration.

Among the wives of Solomon's harem are included Ammonite women (1 K. xi. 1), one of whom, Naamah,⁴ was the mother of Rehoboam (1 K. xiv. 31; 2 Ch. xii. 13), and henceforward traces of the presence of Ammonite women in Judah are not wanting (2 Ch. xxiv. 26; Neh. xiii. 23; Ezra ix. 1; see Geiger, *Urschrift*, &c., pp. 47, 49, 299). These may have been either bestowed during the intervals of actual warfare or taken prisoners.

The last appearances of the Ammonites in the biblical narrative are in the books of Judith (v. vi. vii.) and of the Maccabees (1 Macc. v. 6, 30-43), where they are found (v. 39) in alliance with the Arabs; and where, as it has been already remarked, their chief characteristics—close alliance with Moab, hatred of Israel, and cunning cruelty—are maintained to the end. By Justin Martyr (*Dial. Tryph.*) they are spoken of as still numerous (*οὐκ ὡς ἀλλήθως*); but notwithstanding this, they do not appear again, and Origen, about a century afterwards, says (*in Jobum*, lib. i.) that the term Ammonites had become merged in that of Arabs.

The tribe was governed by a king (Judg. xi. 12, &c.; 1 Sam. xii. 12; 2 Sam. x. 1; Jer. xl. 14) and by "princes," *שָׂרִים* (2 Sam. x. 3; 1 Ch. xix. 3). It has been conjectured that Nabash (1 Sam. xi. 1; 2 Sam. x. 2) was the official title of the king as Pharaoh was of the Egyptian monarchs; but this is without any clear foundation.

The divinity of the tribe was Milcom—"the abomination of the children of Ammon" (1 K. xi. 5), a name only dialectically different from the Phœnician Milk (Molech; Baethgen, *Beiträge z. Sem. Religionsgeschichte*, p. 15). In more than one passage under the word rendered "their king" in the A. V. an allusion is intended to this idol. [MOLECH.]

The Ammonite names preserved in the sacred text are as follow. It is open to inquiry whether these words have reached us in their original form (certainly those in Greek have not), or whether they have been altered in transference to the Hebrew records.

Achior, *אַחִיּוֹר*, quasi *אֲחִי*, brother of light, Jud. v. 5, &c.

Baalis, *בַּעֲלִים* (see s. n.), Jer. xl. 14.

Hanun, *חָנוּן*, treated graciously, 2 Sam. x. 1.

Molech, *מֹלֶךְ*, king.

Naamah, *נַעֲמָה*, pleasant, 1 K. xiv. 21, &c.

Nabash, *נַבָּשׁ*, serpent, 1 Sam. xi. 1, &c.; Nadoms (Jos. Ant. vi. 5, 2).

Shobi, *שׁוֹבִי* (the Nabatean *שׁוֹבִי*, if the name

* There can be no doubt that instead of "Ammonites" in 2 Ch. xx. 1 we should read, with the LXX., "Maonites" or "Mehunim." The reasons for this will be given under *MEHUNIM*.

⁴ According to the LXX. (B. not A.) additions to 1 K. xli. [v. 24, ed. Swete], she was the daughter of Hanan son of Nabash.

be the same, is probably to be vocalized Shabbai; *Eating, Nab. Inschr.* pp. 57, 74), 2 Sam. xvii. 27. Timotheus, *Τιμόθεος*, 1 Macc. v. 6, &c.

Tobiah, *תוביה*, goodness of Jah, Neh. ii. 10, &c.

Zelek, *זלק*, in post-biblical Heb. = a scar, 2 Sam. xxiii. 37.

Ammon appears in the cuneiform inscriptions as Bit Ammana, Beth Ammon (comp. Beth Hamri, "house of Omri," for Samaria). A king Puduil, Puduel (cp. Pedabel, Num. xxxiv. 28), is mentioned in the records of Sennacherib and Esarhaddon; Sanibu (Fried. Delitzsch = Shinab, Gen. xiv. 2) in those of Tiglath-pileser; and Ba'-sa (cp. Baasha, 1 K. xv. 33) son of Rchub, in those of Shalmaneser II. (Schrader, *KAT.* pp. 141, 613).

The name Zamzumim, applied by the Ammonites to the Rephaim, a non-Semitic (possibly Turanian) people whom they dispossessed, should not be omitted. [G.] [W.]

AMMONITESS (*אֲמוֹנִיטָּה*): B. *Ἀμωναίτις*, sometimes with and sometimes without the article ἡ; A. usually ἡ Ἀμωναίτις, sometimes *Ἀμμ-: Ammanitis*. A woman of Ammonite race. Such were Naamah, the mother of Rehoboam, one of Solomon's foreign wives (1 K. xiv. 21, 31; 2 Ch. xii. 13), and Shimeath, whose son Zabab or Jozachar was one of the murderers of king Joash (2 Ch. xxiv. 26). For allusions to these mixed marriages see 1 K. xi. 1 and Neh. xiii. 25. Where in the Hebrew the word has the definite article, it should be rendered "the Ammonitess." [W. A. W.] [F.]

AMNON (*אֲמֹנ*, Ges. = faithful, once *אֲמֹנִי*, either a diminutive formation used contemptuously [Wright, *Arab. Gr.* i. § 269] or an error [Wellhausen, i. l.]; *Ἀμνών; Amnon*). 1. Eldest son of David by Ahinoam, the Jezreelitess, born in Hebron while his father's royalty was only acknowledged in Judah (2 Sam. iii. 2). He dishonored his half-sister Tamar, and was in consequence murdered by her brother (2 Sam. xiii. 1-39; 1 Ch. iii. 1). [ABSALOM.] [S. R. D.] 2. Son of Shimon (1 Ch. iv. 20). [G. E. L. C.]

AMOK (*אֲמוֹק*, deep; *Amoc*). A priest, whose family returned with Zerubbabel, and were represented by Eber in the days of Josiah (Neh. xii. 7 [A. *אֲמוֹק* me inf. *אֲמוֹק*]; 20 [A. *אֲמוֹק* me inf. *אֲמוֹק*]). B. omits almost the whole of vv. 3-7, 14-21; AN* omit vv. 14-21). [W. A. W.] [F.]

AMOMUM. In the descriptive list of the merchandise of Babylon (Rev. xviii. 13) the text should read *καὶ κιννάμωμον καὶ ἄμωμον*. A. V. omits the latter words; R. V. translates them "and spice." Lee (*Speaker's Commentary* in loco) describes it as "a zingiberaceous plant, with aromatic seeds, much employed under the name of cardamoms, grains of Paradise, &c., and found only in the hot parts of India and Africa." From the *amomum* the Romans prepared an oil or balsam for funeral rites (Pers. iii. 194; Ovid. *Pont.* i. 9, 51), and unguents for the hair (Ovid. *Her.* xxi. 166; Mart. viii. 28; Lucan. i. 164 ff.). Abbot (*D. B. Amer. ed.*) asserts that modern botanists have found it

difficult to identify the plant with any known species. [F.]

AMON (*אֲמוֹן*; *Ἀμμών*), the name of an Egyptian god, the chief object of worship at Thebes. It occurs as the second element in the name of Thebes, in Heb. No-Amon (*אֲמוֹן נֹה*, Nah. iii. 8); in hieroglyphics, Nu-Amon, "the city of Amon;" also called No, *נֹה*, "the city," hierog. Nu and Nu-ā, "the great city." If with Brugsch (*Dict. Géogr.* s. v.) we read Ni, the equivalent to No may be the distinctive name Ni-ā. The Assyrian form is Ni. Nu, however, seems the preferable transliteration of the Egyptian.

Amon is probably mentioned in Jer. xvi. 25, where we should rather render *אֲמוֹן* *אֲמוֹן*, "Amon of No," as in the LXX. and the Coptic Version, than "the multitude of No" (Vulg. *tumultum Alexandriae*): note the parallelism of "Amon" with "their gods," and "Pharaoh" with "their kings." In the parallel passage in Ezek. xxx. 15, "the multitude of No," *אֲמוֹן*, the equivalent of *אֲמוֹן* as a Heb. word, is used (Vulg. *multitudinem Alexandriae*). It does not appear venturesome to read the Egyptian name as Hamon here also. Comp. also vv. 4, 10, for the use of the latter word with reference to Egypt. The destruction of the false gods of Noph (Memphis, not Napata; *NOPH*) in v. 13 seems to support this parallel in the case of the other great city. Thus the two forms Amon and Hamon are no more unlikely than the Latin Ammon and Hammon. If this explanation be rejected, there is certainly a play on the name Amon. [R. S. P.]

Amon in Egyptian means "hidden," as in Ament, "the hidden land," Hades. The worship of Amon was not of very ancient origin in Egypt. His name does not occur in the Book of the Dead, and Maspero has but once found it, as part of a proper name, in the inscriptions of the first six dynasties (*Hist. anc. des Peuples de l'Orient*, p. 97).

Amon was at first the local god of Thebes, and his worship appears with the 11th and 12th dynasties, which founded the great temple of Amon. Afterwards, in the New Empire, when Thebes became the capital of Egypt, it spread over other parts of the land, and the god himself took a rank in the Egyptian Pantheon which he had never before held. If we consider all his attributes, we find that they are very much the same as those of the other gods, and that some of the hymns which are dedicated to him sum up all the characters which constitute the Egyptian deity. The distinctive features of

The god Amon. (Wilkinson.)

* Compare the *soubriquet* of "Le Balafre."

the Egyptian gods, their rank in the Pantheon, their pedigree, their history are generally not well marked, and have been very much exaggerated by the fact of their names being translated in Greek, and reasoned on by the late Neoplatonists, who laboured hard to philosophise Egyptian mythology. It would convey a very wrong idea of the nature of Amon to consider him as the equivalent of the Greek Zeus.

In the time of the 18th, 19th, and 20th dynasties, when the imperial power of Thebes had raised the worship of Amon to its highest importance, we generally find him called *Amon Ra*, "Amon the sun," showing his identification with the solar god; and having the attribute of *suten neteru*, king of the gods, out of which the Greeks have made the word *Ἀμωναυθεπ*. His special character, as far as it is possible to determine it, is indicated by this sentence, *Amon Ra Ka mut-f*, "Amon Ra, the bull or the husband of his mother;" the never-ceasing generative power, the hidden action of nature which manifests itself through its two principal agents, the sun and the water. This idea may probably be traced in most of the texts relating to Amon. It has been developed in a rich and poetical style in a hymn contained in a papyrus of the Boolak Museum of Theban origin, which has been translated by Grébaut (*Hymne à Ammon Ra*, Paris, 1874), and in the inscriptions which cover the temple of the Great Oasis, and which belong to the time of Darius I. (Brugsch, *Reise nach der Oase von El Khargeh*). These two remarkable compositions, which both bear a marked pantheistic character, are not to be considered as giving the distinctive features of Amon. They are interesting as showing how an Egyptian priest conceived his god, how he pictured his god to himself. Here his god was Amon; but if we take the hymn to Osiris translated by Chabas, or even Enna's hymn to the Nile, or any of the numerous prayers which are addressed to Ra Harmachis, we find in them most of the same attributes, which must be considered as belonging to the deity in general, but not to any particular god.

The history of the worship of Amon is intimately connected with that of the Theban power. As the god of their capital, he was to the conquering kings of Thebes, and particularly to Ramses II., what Assur was to the Assyrians. An interesting episode, where Amon assumes a more personal character, is related by the poem of Pentaur; it is the intervention of the god in the battle against the Chetas (Hittites), when Ramses, surrounded by their chariots, calls on him for help. Amon hears and comes to his rescue; the king hears his voice behind him, which promises him victory.

The dignity of high-priest of Amon must have been very high. We know the names of a great number of those officials who seem to have ranked next to the king. At the time of the 20th dynasty they were the great constructors who enlarged the temple of Amon, now called Karnak. They encroached more and more on the power of the Ramesside kings; and at last put them aside and founded the 21st dynasty (Naville, *Inscr. de Pinotém III.*). They were superseded and expelled to Ethiopia by the Bubastite house of Shishak, who, though very likely of Libyan origin, still adhered to the

worship of Amon at Thebes, and enlarged the sanctuary of the god. When the exiles founded a kingdom at Napata (Gebel Barkal), this city was the seat of the Theban worship. When, a little before the fall of Samaria, the Ethiopian king Pianchi reconquered Egypt, an intensely Theban worship was the result; and the succeeding Ethiopians, who fill so large a space in the view of the Prophets, maintained their devotion to Amon. His position was not lost in the final decline of Thebes. His worship had already spread to the Oases, to find its way gradually to the Cyrenaica and to Greece. His rank in Egypt led the Greeks to identify him with Zeus: thus he is called Zeus Ammon, the Latin Jupiter Ammon.

The Theban triad was composed of Amon, Mut, and Khonsu, this last one being decidedly a lunar god; while here Mut may be considered as being a representative of the sky. Mut and Khonsu had both their special temples at Thebes in the vicinity of the sanctuary of Amon.

Amon is generally represented in human form, standing or sitting, painted blue, and wearing a cap surmounted by tall plumes. We also see him in the shape of Khem, the generative power; or ram-headed, as he was in the Oasis of Ammon, or even under the form of a ram wearing a solar disk. This explains why several temples of Amon, at Thebes and in Nubia, are preceded by long avenues lined on each side by criosphinxes, of which at Karnak there must have been hundreds.

To the Hebrew Prophets, Amon seemed emphatically the national god of Egyptian and Ethiopian alike. Hence probably the fact that he alone is mentioned by name in their writings, except perhaps the bull Apis (Jer. xlv. 15, LXX.; Lagarde). [HAPIL.] [E. N.]

A'MON (יְהוֹנָן: B. Ἀμός, A. Ἀμμὼν in Kings; T. Ἀμόν, B. Ἀμμών, BabA¹ 10a? Ἀμόν in 1 Ch.; BA. Ἀμός in 2 Ch. and Jer.; AR¹ 10a Ἀμός, N. Ἀμμών in Zeph.; Ἀμός in Matt.; Joseph. Ἀμωσός: Amon). 1. King of Judah, son and successor of Manasseh. The name would naturally mean *architect*, but perhaps it is Egyptian, and connected with the Theban god; possibly it may have been given by Manasseh to his son in an idolatrous spirit. Following his father's example, Amon devoted himself wholly to the service of false gods, but was killed in a conspiracy after a reign of two years. Probably by insolence or tyranny he had alienated his own servants, and fell a victim to their hostility, for the people avenged him by putting all the conspirators to death, and secured the succession to his son Josiah. To Amon's reign we must refer the terrible picture which the prophet Zephaniah gives of the moral and religious state of Jerusalem: idolatry supported by priests and prophets (i. 4, iii. 4), the poor ruthlessly oppressed (iii. 3), and shameless indifference to evil (iii. 11). According to Usher, the date of his accession is B.C. 643, and of his death, B.C. 641 (2 K. xxi. 19; 2 Ch. xxxiii. 20); according to Kamphausen, 640 and 638. The name occurs in 2 K. xxi. 18-25; 1 Ch. iii. 14; 2 Ch. xxxiii. 20-25; Jer. i. 2, xiv. 3; Zeph. i. 1; Matt. i. 10.

2. (יְהוֹנָן, יְהוֹנָן: B. Σεμύρ [Kings], Ἐμύρ [Ch.]; A. Ἀμμών [Kings], Σεμύρ [Ch.]; Amon.)

Prince or governor of Samaria in the reign of Ahab (1 K. xii. 26; 2 Ch. xviii. 25). What was the precise nature of his office is not known. Perhaps the prophet Micaiah was entrusted to his care as captain of the citadel. The LXX. B. has τὸν βασιλέα (A. ἄρχοντα) τῆς πόλεως in 1 K., but BA. ἄρχοντα in 2 Ch. Josephus (*Ant.* viii. 15, § 4) calls him Ἀχάμωρ.

3. See AMI. [G. E. L. C.] [F.]

AMORITE, THE AMORITES (אֲמֹרִי, "Amorite" [always in the singular], accurately "the Amorite"—the dwellers on the summits—mountaineers; Ἀμορῆται; *Amorrhæi*), one of the chief nations who possessed the land of Canaan before its conquest by the Israelites.

In the genealogical table of Gen. x. "the Amorite" is given as the fourth son of Canaan, with "Zidon, Heth [Hittite], the Jebusite," &c. The interpretation of the name as "mountaineers" or "highlanders"—due to Simonis (see his *Orientalia*), though commonly ascribed to Ewald—is quite in accordance with the notices of the text, which, except in a few instances, speak of the Amorites as dwelling on the elevated portions of the country. In this respect they are contrasted with the Canaanites, who were the dwellers in the lowlands; and the two thus formed the main broad divisions of the Holy Land. "The Hittite, and the Jebusite, and the Amorite dwell in the mountain [of Judah and Ephraim], and the Canaanite dwells by the sea [the lowlands of Philistia and Sharon] and by the 'side' of Jordan" [in the valley of the Arabah],—was the report of the first Israelites who entered the country (Num. xiii. 29; see Josh. v. 1, x. 6, xi. 3; Deut. i. 6, 20; "Mountain of the A." 44). This we shall find borne out by other notices. In the very earliest times (Gen. xiv. 7) they are occupying the barren heights west of the Dead Sea, at the place which afterwards bore the name of Engedi; hills in whose fastnesses, the "rocks of the wild goats," David afterwards took refuge from the pursuit of Saul (1 Sam. xxiii. 29, xiv. 2). [HAZEZON-TAMAR.] From this point they stretched west to Hebron, where Abram was then dwelling under the "oak-grove" of the three brothers, Aser, Eschcol, and Mamre (Gen. xiv. 13; comp. xiii. 18). At this period they would appear to have formed part of the great Hittite kingdom, or confederation; it is from a Hittite that Abraham buys the cave of Machpelah (Gen. xxiii. 8, 9), and the obsequiousness shown by the Patriarch to the "children of Heth" indicates that they and not the Amorites were the ruling people. This may perhaps also be inferred from the lists of the early inhabitants in which the Amorites are usually mentioned as secondary in importance to the Hittites. The campaigns of Sethi I. and Rameses II. against the Hittites, which occurred during the interval between the settlement of Jacob in Egypt and the Exodus, would seem, however, to have weakened their power and to have been favourable to the growth of independent kingdoms in Southern Palestine. At this later period the dominant people appear to have been the Amorites, who had established kingdoms in the Jebusite town of Jerusalem, and at Hebron, Jarmuth, Lachish, and Eglon; they had also crossed the valley of the Jordan,

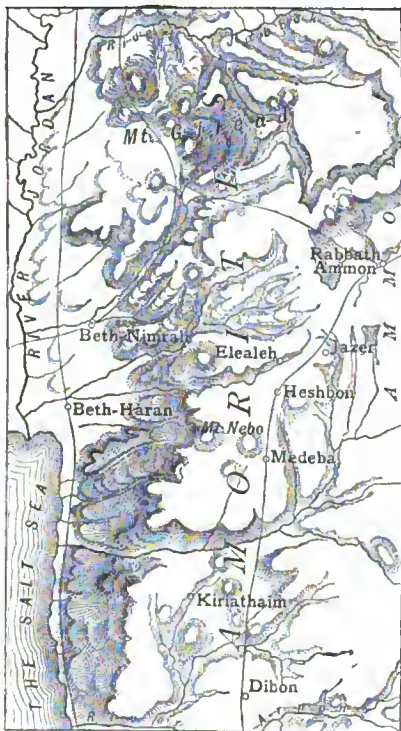

tempted by the high table-lands on the east, and founded the larger kingdoms over which Sihon and Og then ruled. Sihon had taken the rich pasture-land south of the Jabbok, and had driven the Moabites, its former possessors, across the wide chasm of the Arnon (Num. xxi. 13, 26), which thenceforward formed the boundary between the two hostile peoples (Num. xxi. 13). [SIHON.] The Israelites apparently approached from the south-east, keeping "on the other side" (that is on the east) of the upper part of the Arnon, which there bends southwards, so as to form the eastern boundary of the country of Moab. Their request to pass through his land to the fords of Jordan was refused by Sihon (Num. xxi. 21; Deut. ii. 26); he "went out" against them (xxi. 23; ii. 32), was killed with his sons and his people (ii. 33), and his land, cattle, and cities were taken possession of by Israel (xxi. 24, 25, 31; ii. 34, 35). Josephus (*Ant.* iv. 5, § 2) adds some singular details to the Bible narrative of this event, and sums up the character of the Amorites as "neither wise in council nor sagacious in war." This rich tract, bounded by the Jabbok on the north, the Arnon on the south, Jordan on the west, and "the wilderness" on the east (Judg. xi. 21, 22)—in the words of Josephus "a land lying between three rivers after the manner of an island" (*Ant.* iv. 5, § 2)—was perhaps, in the most special sense, the "land of the Amorites" (Num. xxi. 31; Josh. xii. 2, 3, xiii. 9; Judg. xi. 21, 22); but their possessions are distinctly stated to have extended to the very feet of Hermon (Deut. iii. 8, iv. 48), embracing "all Gilead and all Bashan" (iii. 10), with the Jordan valley on the east of the river (iv. 49), and forming together the land of the "two kings of the Amorites," Sihon and Og (Deut. xxxi. 4; Josh. ii. 10, ix. 10, xiv. 12*). In the reign of Sethi I. the Amorites appear to have had settlements north of Hermon, for Kadesh on the Orontes is said to have formed part of the land of the Amorites although it was under the jurisdiction of the Khita (Hittites). Later, in the reign of Rameses III., the Egyptians defeated a combined force of European maritime people, in the land of *Taha*, a part of Palestine, apparently the south, in which was comprised Amaur or the Amorites (Birch, *Egypt from the Earliest Times*, 116, 141).

After the passage of the Jordan we again meet with Amorites disputing with Joshua the conquest of the west country. But although the name generally denotes the mountain-tribes of the centre of the country, yet this definition is not always strictly maintained, varying probably with the author of the particular part of the history, and the time at which it was written. Nor ought we to expect that the Israelites could have possessed very accurate knowledge of a set of small tribes whom they were called upon to exterminate—with whom they were forbidden to hold any intercourse—and, moreover, of whose general similarity to each other we have one proof in the confusion in question.

Some of these differences are as follows:—Hebron is "Amorite" in Gen. xiii. 18 (cp. xiv. 13), though "Hittite" in xxiii. and "Canaanite"

* But here the LXX. reads δαδεκα, not δύο; and the context shows that West Palestine is probably referred to (see Dillmann, and *QPB.* in loco). [S. R. D.]

in Judg. i. 10. The "Hivites" of Gen. xxxiv. 2 are "Amorites" in xlviii. 22; and so also in

Map of the Country of the Eastern Amorites.

Josh. ix. 7, xi. 19, as compared with 2 Sam. xxi. 2. Jerusalem is "Amorite" in Josh. x. 5, 6; but in xv. 63, xviii. 28, Judg. i. 21, xix. 11, 2 Sam. v. 6, &c., it is "Jebusite." The "Canaanites" of Num. xiv. 45 (comp. Judg. i. 17) are "Amorites" in Deut. i. 44. Jarmuth, Lachish, and Egloou were in the low country of the *Shefelah* (Josh. xv. 35, 39), but in Josh. x. 5, 6, they are "Amorites that dwell in the mountains;" and it would appear as if the "Amorites" who forced the Danites into the mountain (Judg. i. 34, 35) must have themselves remained on the plain.^a

It appears plain that "Amorite" was a descriptive title, and not the name of a distinct tribe. This is confirmed by the following facts:—(1) The wide area over which the name was spread. (2) The want of connexion between those on the east and those on the west of Jordau—which is only once hinted at (Josh. ii. 10). (3) The existence of kings like Sihon and Og, whose territories were separate and independent, who are yet called "the two kings of the Amorites," a state of things quite at

variance with the habits of Semitic tribes. (4) Beyond the three confederates of Abram, and these two kings, no individual Amorites appear in the history (unless Araunah or Ornan the Jehusite be one). (5) There are no traces of any peculiar government, worship, or customs, different from those of the other "nations of Canaan."

One word of the "Amorite" language has survived—the name Senir (R. V., not "Shenir" A. V.) for Mount Hermon (Deut. iii. 9); but may not this be the Canaanite name as opposed to the Phœnician (Sirion) on the one side, and the Hebrew on the other?

All mountaineers are warlike; and, from the three confederate brothers who at a moment's notice accompanied "Abram the Hebrew" in his pursuit of the five kings, down to those who, not depressed by the slaughter inflicted by Joshua and the terror of the name of Israel, persisted in driving the children of Dan into the mountain, the Amorites fully maintained this character.

After the conquest of Canaan nothing is heard in the Bible of the Amorites, except the occasional mention of their name in the usual formula for designating the early inhabitants of the country. [G.] [W.]

AMOS (אָמֹס), i.e. apparently the bearer of a burden [אַמָּרָא (aw), Jerome, *Pref.* to Joel]: 'Amós; Amos, a Prophet whose short but important Book stands third in the collection known by us as the "Minor Prophets," but by the Jews called "the Twelve" (cp. Eccles. xlix. 10).

1. *Circumstances of the life and age of Amos.*—From the title to his Book (i. 1), we learn that he was "among the herdmen from Tekoa," i.e. as it would seem, one of a settlement of herdmen who had their home at Tekoa (cf. Jer. i. 1), and who, as the word used implies, reared a special breed of sheep, of small and stunted growth, but prized on account of their wool. From vii. 14 we learn further that he had under his charge herds of larger cattle as well; and that he was employed besides in the cultivation of sycamore trees. The attention which the cultivation of this tree demanded, and the artificial means by which its fruit was rendered edible, are explained under the article SYCAMORE. The Tekoa mentioned has been commonly supposed to be the well-known place of that name about nine miles south of Jerusalem; and Amos has been regarded accordingly as a Judean, who received a special commission to deliver his prophetic message to the northern kingdom. Kimchi, however, conjectured Tekoa to be a town in the tribe of Asher; and recently internal grounds have been alleged to show that the northern kingdom must have been his home, and that the Tekoa in question is at least not the Tekoa in Judah (Grätz, *Gesch. der Juden*, ii. 1, 82; Oort, in the *Theol. Tijdschrift*, 1880, pp. 123-7). Much weight will not indeed be attached to the argument drawn from his familiarity with the life and scenery of Israel (which he might have acquired from personal observation or by report, without being actually a native); but that derived from his occupation as sycamore-cultivator deserves greater attention. Sycamores, travellers are agreed (cp. Triestram, *Nat. Hist. of Bible*, p. 398), are highly susceptible of cold; and in Palestine "grow

^a The LXX. has here ἡ τῶν Ἀμοριταίων.

^b The clue to most, if not all, of these differences is, that in particular writers (esp. the Hexateuchal source E, Deut., Amos ii. 9, 10, 2 Sam. xxi. 2) Amorite is the general name of the primitive population of Canaan (cp. Wellhausen, *Comp. d. Hexat.* p. 341 sq. [1889]; Dillmann on Gen. x. 16, Deut. i. 7, and p. 617 sq.; Deltzsch on Gen. xlviii. 22). [S. R. D.]

only in the mild climate of the maritime plain and the hot Jordan valley." Is it probable, therefore, it is asked, that they could have been cultivated on the bare and elevated plateau on which Tekoa stands? Jerome, who must have known the district, describes it as wild and barren, and expressly mentions that no sycamores were to be found there; conjecturing indeed on this account that the word used by the prophet denoted rather "brambles" (*Pref. to Amos*, and on vii. 15). The difficulty is a real one; for as the temperature here is due to elevation [PALESTINE, Climate], a change of climate can hardly be assumed to have taken place since the days of Amos. On the whole, inasmuch as only one Tekoa is known, it seems safest, pending further investigation, to suppose that Amos, being a native of it, carried on the cultivation of sycamores at some spot in the neighbourhood suited to their growth—or even in the lower part of the Jordan valley itself. But, however this may be, we must think of Amos as busied with his rural tasks when he became conscious of the higher vocation reserved for him: "And Jehovah took me from following the sheep, and said unto me, Go, prophesy to My people Israel" (vii. 15). In connexion with the nature of prophecy, it is important to notice that Amos disclaims (v. 14) being a Prophet by profession or education: he is no member of a prophetic guild; his inspiration is independent of any artificial training. The date cannot be fixed with precision: for "the earthquake in the days of king Uzziah," though a sufficient clue at the time when the title was affixed, and though it lived for long in the memory of the people (Zech. xiv. 5), is not mentioned in the Historical Books, and cannot be assigned to any particular year of Uzziah's reign. Internal evidence, however (vii. 10 f.), agrees fully with the general limits specified in the title, pointing pretty conclusively to the latter part of the reign of Jeroboam II.; i.e. according to the chronology as corrected by Assyrian data, c. 760–50 B.C. The reign of Jeroboam II., though passed by briefly in the Historical Books (2 K. xiv. 23–29), was the culminating point in the history of the northern kingdom. A long series of successes abroad secured prosperity at home, and the Book of Amos shows us the nation reposing in opulence and ease (e.g. vi. 1–5): the ritual of the calf-worship at Beth-el, Gilgal and elsewhere (cp., a little later, Hos. iv. 15; x. 1, 5) was splendidly and punctiliously maintained (Amos iv. 4 f.; v. 21–23; vii. 13; viii. 14): general satisfaction reigned: the proud citizen of Ephraim could say, "Have we not taken to us horns by our own strength?" (vi. 13.) Such was the condition and temper of the people, when Amos was summoned to appear as a stranger amid the throng assembled at the great national sanctuary of Beth-el (vii. 10–17), and to interrupt the rejoicings with his unwelcome words.

II. *Contents and character of the Book of Amos.*—The Book falls naturally into three parts, each dominated by the same fundamental thoughts, and the whole pervaded by a unity of plan which leaves no reasonable doubt that the arrangement is the author's own. We may suppose that, having first delivered his discourses orally, after his ejection from Beth-el he arranged them at leisure in a literary form. The first part,

ch. i. ii., is introductory. After the fine exordium (i. 2), so graphically descriptive of Jehovah's power, he proceeds to take a survey of the principal nations bordering on Israel, with the object of showing that as none of these will escape retribution for having broken the common and universally recognised dictates of morality, so Israel, for similar or greater sins (ii. 6–8), aggravated indeed in its case by ingratitude (cr. 9–12), will not be exempt from the same law of righteous government: a disaster, darkly hinted at (cr. 13–16), will undo all the conquests achieved by Jeroboam II. The enumeration of countries is evidently meant to lead up to Israel: the mention of Judah may seem unneeded, but the Israelite would listen with some satisfaction to the prospect of Judah's humiliation (cp. what had happened under Jeroboam's father, 2 K. xiv. 8–14); and by the "law of Jehovah," the Prophet doubtless means primarily those moral precepts the neglect of which, not unconnected with superstition or idolatry ("lies"), so deeply stirred Hosea (iv. 1 f.; vi. 6, compared with viii. 1, 12). The second part (iii.–vi.) consists of three discourses, each introduced by the emphatic *Hear ye this word* (iii. 1; iv. 1; v. 1). Here the indictment and sentence of ii. 6–16 are further justified and expanded. Amos starts by disabussing the Israelites. The latter argued that the fact of Jehovah's having chosen the nation was a guarantee of its safety; he replies: You mistake the conditions of His choice; for that very reason He will punish you for your iniquities (iii. 2). Nor, he continues, does the Prophet say this without a real power constraining him; for does any effect in nature take place without its due and adequate cause (cr. 3–8)? Call the heathen themselves to witness whether justice rules in Samaria! (v. 9 f.) The toils will, ere long, have closed around the land (cr. 11–15). Ch. iv. begins by denouncing the cruelty and frivolity of the women (cr. 1–3); the Prophet next asks the Israelites ironically whether their punctiliously performed ritual will save them (v. 4 f.): the fivefold warning has passed unheeded (cr. 6–11); prepare thyself, then, for judgment! (v. 12.) Ch. v.–vi. is a longer discourse, with two clearly marked subdivisions at v. 18 and vi. 1, each beginning *Woe*. Here the grounds of the judgment are repeated with greater emphasis: the infatuation of the people is exposed in desiring the "Day of Jehovah," as though that could be anything but an interposition in their favour; a ritual unaccompanied by any sense of moral obligation is indignantly rejected (v. 21–24); the nature of the coming disaster is described more distinctly (exile, v. 27), and the enemy indicated, though not named (the Assyrians, spoken of more familiarly in Hosea, and destined soon to exercise an important influence on the fortunes of both Israel and Judah), who should "afflict" Israel over the entire limits of that territory, which Jeroboam had not long before recovered (vi. 14; see 2 K. xiv. 25). The third part (vii.–ix.) consists of a series of visions, with an historical interlude (vii. 10–17) and an epilogue (ix. 7–15). The visions, which are simple and unartificial in structure, reinforce, under an effective symbolism, the lesson which Amos found so hard to impress (ix. 10): in the first two (vii. 1–6), the threatened judgment is interrupted at the Prophet's intercession; the

third, which spoke without any concealment or ambiguity (vii. 7-9), aroused the alarm and opposition of Amaziah, the priest of the golden calf at Beth-el, and is the occasion of the historical notice, vii. 10-17. The fourth vision is the text of a fresh and more detailed denunciation of judgment (ch. viii.): the fifth depicts the desolation falling upon the people as they are assembled for worship in their own Temple, and emphasizes the hopelessness of every effort to escape (ix. 1-6). With ix. 7 the transition to a brighter prospect begins: Israel, indeed, if it sins, will be dealt with as any other nation; but it is only the sinners who will be thus treated (ix. 7-10); and so the Prophet concludes with a promise that the house of David (which had probably not yet fully recovered from the blow inflicted on it by Jehoash, 2 K. xiv. 13 f.) will be restored to its former splendour and power (v. 12; see 2 Sam. viii. 14; Ps. xviii. 43), and the blessings of unity and prosperity shared by the entire nation (13-15). From this analysis, the unity of plan before spoken of will be manifest: the main theme, gradually introduced in the opening section of the Book, is developed with increasing distinctness in the portions which follow, till it gives place to the Messianic outlook at the close. Amos, by his allusions to contemporary life, gives us many a glimpse into the social condition and religious life of the northern kingdom under Jeroboam II.: the picture drawn by him is not indeed so dark as that which presented itself to Hosea (ch. iv.-xiv.) a few years later, when the dynasty of Jehu had fallen, and the spirit of anarchy and discord reigned uncontrolled; nevertheless the amendment, which was still viewed by him (v. 14 f.) as a possibility, never came; and a generation had hardly passed away, when his forebodings of invasion, disaster, and exile (ii. 13-16; iii. 11-15; iv. 12; v. 2 f., 16 f.; v. 27; vi. 14; vii. 9, 17; viii. 2 f.; ix. 1-4), were amply realised by Tiglath-pileser, Shalmaneser, and Sargon (2 K. xv. 29; xvii. 3 f.). Judah is alluded to but incidentally (ii. 4 f.; iii. 1, "the whole family;" vi. 1, and ix. 11).

The place of Amos in Hebrew literature can only be properly estimated by an independent study of his Book, and comparison of it with other parts of the O. T. We confine ourselves to a few particulars, referring for a fuller treatment to the works quoted below. 1. As the earliest of the Prophets whose writings are extant and of undisputed date, it is worth noticing that his Book implies the existence of a recognised phraseology, and of familiar ideas to which he could appeal. The prophetic style, which in his hands appears already fully matured, had doubtless been formed gradually: among the Prophets to whom he alludes (ii. 11; iii. 7) may well have been some who were his literary predecessors. Whether his language presupposes an acquaintance with the Pentateuch, and, if so, to which of its component parts, is disputed. The allusions which are most distinct appear to be to the injunctions contained in the code Ex. xxi.-xxiii. (cp. ii. 8, v. 12, with Ex. xxii. 26 f., xxiii. 6): other phrases that have been cited are met with elsewhere, so that their occurrence in Amos is not a *demonstration* that he borrowed them from the Pentateuch. Passages such as ii. 9, 10; iii. 2; iv. 11;

ix. 15; and iv. 4b, 5a; v. 12b, 21, 22; viii. 5, show that he was familiar with events and usages, related, or codified, in the Pentateuch: it may be doubted whether, taken by themselves, they are a sufficient proof that he was acquainted with the written Pentateuch, as we know it. Too much must not, however, be built upon this admission: for the whole prophecy implies the existence of a body of established ideas and institutions, to the true meaning and import of which he recalls the people. Amos both recognises an authoritative Divine teaching (ii. 4; iii. 7), and appeals to a tradition reaching back to a remote past (cp. Smend's article, cited below). 2. As regards the influence of Amos upon his successors, his younger contemporary Hosea borrows from him (e.g. iv. 15 from Amos v. 5 [Heb.]; viii. 14b from ii. 5; i. 4, x. 8, cp. Amos vii. 9). Isaiah, in tone and style, often recalls Amos (e.g. xxxix. 21, cp. Amos v. 10; xxx. 10, cp. ii. 12; xxxi. 2, cp. vii. 9; xxxii. 11, cp. iv. 1, vi. 1); and his most characteristic doctrine may be considered as foreshadowed in Amos v. 15: cp. also Is. i. 25-28 with Amos ix. 8-10 (the purification of the nation by elimination of its guilty members). The example set by Amos (ch. i.) of noticing the fortunes and deserts of the nations bordering upon Palestine, especially in their bearing upon Israel, was also afterwards followed by Isaiah, Jeremiah, Ezekiel. Whether in his use of the term "Day of Jehovah" (v. 18, 20) Amos had been preceded by Joel (ii. 2 ff.), or not, must depend upon the date to which that Prophet is assigned; but in any case, he totally reversed the popular application of the idea, and showed what it really implied (see W. R. Smith, *Prophecy of Israel*, pp. 131, 397). 3. The special characteristics of Amos appear most distinctly when he is compared with Hosea. While both Prophets naturally share the same fundamental beliefs, their temper and attitude of mind are very different. Hosea is the man of deep and susceptible religious emotion: Amos burns with zeal on behalf of the moral law. The standard by which he primarily judges Israel is thus the common morality recognised as binding alike by it and other nations. Jehovah, it has been remarked, is never termed by him the "God of Israel;" he is God of the whole earth, of other nations not less than of Israel (ch. i.; ix. 7), and will only be Israel's God in so far as that same morality is practised in their midst. Jehovah had been pleased to enter into a personal relation with Israel: this fact, to which the common people pointed as their security (v. 14 end), in the eyes of Amos only aggravates their guilt (iii. 2). "Wrong is wrong everywhere, even against Israel's bitterest foe" (ii. 1); it is the first charge which he brings against Israel itself (ii. 6-8); and his indignation against it, in whatever form, is vehemently expressed (cp. e.g. the outburst in viii. 4-8, against deceit in commercial dealings; notice also the oath c. 7, iv. 2, vi. 8). The observances of religion are no substitute for honesty, and will not be accepted by Jehovah in lieu of righteousness of heart (v. 21-24).

In vi. 6b; ix. 10, we see the first traces of that opposition to popular opinion, especially when strengthened and directed by the leaders of the nation, which in Isaiah and Jeremiah assumed

a real political importance. Amos only alludes to the Assyrians darkly; but it is plain that he realised the crisis which their activity would occasion, long before his countrymen saw that there was any cause for alarm; and that by the attitude which he assumed in face of them, he prepared the way for Isaiah, who saw yet more distinctly, in the advance of the Assyrians, a manifestation of Jehovah's justice.

III. *The style of Amos.*—"Imperitus sermone, sed non scientia," wrote Jerome (*Pref. to Amos*), arguing *à priori* (as the context suggests) from the Prophet's antecedents; and hence it has been sometimes the custom to speak of the unadorned "rusticity" of his style, and to search for examples of homely imagery drawn by him from the objects of country life. Recent critics have protested with justice against such conclusions; and, indeed, a much sounder judgment was expressed long ago by Bishop Lowth (lect. xxi.), who rightly contended that the style of Amos possesses great literary merit, and only errs when he describes it in terms which, taken strictly, would place it on an equality with that of Isaiah. His language—with three or four exceptions, possibly due to copyists—is pure, his syntax idiomatic, his sentences smoothly constructed and clear. His literary power is shown in the regularity of structure which often characterises his periods, as i. 3–ii. 6, iv. 6–11 (the fivefold refrain), and the visions (iii. 1, 4, 7, viii. 1); in the fine climax, iii. 3–8; in the balanced clauses, the well-chosen images, the effective contrasts, in such passages as iii. 15, v. 2, v. 21–24, vi. 11, viii. 10, ix. 2–4; as well as in the ease with which he evidently writes, and the skill with which his theme (as shown above) is unfolded and developed. If in Amos, as compared with other Prophets, images derived from rural life somewhat preponderate, they are always applied by him worthily (e.g. i. 2; iii. 4, 8; v. 8 [a shepherd's observation], 16, 17, 19; ix. 9), and never strike the reader as occurring too frequently or as out of place. At other times his language is particularly fine (v. 24, viii. 8, ix. 5 f.). It is plain that Amos was no uncultured *illiters*. His intelligence, of course, was of the Eastern type. He was a man naturally shrewd and observant: alike in his survey of foreign nations (comp. also vi. 2, viii. 8, ix. 7), and in his allusions to Israelitish life and manners, he reveals a width of knowledge and precision of detail which are remarkable (comp. Smith, p. 127 f.).

The Massoretic text of Amos appears, with but few exceptions, to be free from corruption. The best edition of it is that in S. Baer's *Liber Duodecim Prophetarum* (Lipsiae, 1878); compare, however, the criticism of Baer's methods by Strack in Schürer's *Theol. Literaturg.* 1879, No. 8.

IV. *Authenticity of the Book of Amos.*—This has never been disputed.* Only particular passages have been thought by some to be later insertions. Thus Duhm (see below), p. 119, rejects ii. 4 f., iv. 13, v. 8 f., ix. 5 f., partly as interrupting the connexion and partly as containing ideas not so distinctly expressed till

later; and he is followed by Wellhausen, *Gesch.* i. 59, 349, note (omitted, *Prolegomena*, p. 322), Oort, p. 116 f., who discusses them at length, and Stade, *Geschichte des Volkes Israel*, 1887, i. p. 571. As explained above, however, the mention of Judah is relieved of suspicion; and all the passages are defended by Smith, p. 398 f., and shown to be in harmony with Amos' thought. Oort is inclined further to doubt v. 13–15, vi. 14, viii. 11 f.; but his arguments to show that they are out of place or break the connexion, are far from convincing.

V. *Literature.*—The commentary of Jerome (with much matter of interest); those of Iasbi. Ibn Ezra, and David Kimchi (printed in the Rabbinical Bibles, and indispensable, as always, for a complete acquaintance with the exegesis); Le Mercier (*Jo. Merceri Commentarii locupletissimi in Prophetas quinque priores inter eos qui minores vocantur*; no date, published posthumously towards the end of the 16th century; learned); Ewald, in *Die Propheten des Alten Bundes* (translated, London, 1875: i. p. 143 f.); Hitzig (in *Die Kleinen Propheten*, 3rd ed., 1863: the 4th ed., by Steiner, 1881, contains but little additional matter); Gustav Baur, *Der Proph. Amos erklärt*, 1847 (the fullest monograph in modern times; introduction specially useful); E. B. Pusey (in the *Minor Prophets*; learned and valuable); C. F. Keil (in his *Zwölf Kl. Proph.* 3rd ed. 1888); Otto Schmoller (in Lange's *Bibelwerk*, translated, Edinburgh, T. & T. Clark); Oort, u. s. pp. 114–158 (often arbitrary); G. Hoffmann, in Stade's *Zeitschrift*, 1883, pp. 87–126 (chiefly lexical: to be followed with caution); see also *ib.* p. 278 f.; J. H. Gunning, *De Godspraken van Amos vertaald en verklaard*, 1885; Orelli in Strack u. Zöckler's *Kyf. Komm.* On older commentators further information may be found in Baur, pp. 151–162.

On the ancient versions of Amos, in addition to the particulars given by Baur, p. 131 f., the article of K. Vollers on the LXX. in Stade's *Zeitschr.* 1883, pp. 260–72, J. Z. Schuurmans Stekhoven, *De Alexandrijnsche Vertaling van het Dodekapropheten* (Leiden, 1887), and M. Sebök, *Die Syrische Uebersetzung der zwölf Kl. Proph.* (Breslau, 1887), should be consulted.

On the position of Amos in the history of theology, see Duhm, *Theologie der Propheten*, 1875, pp. 109–26, with the criticisms of Rud. Smend, in the *Studien u. Kritiken*, 1876, p. 599 f.; Wellhausen, in the *Encycl. Brit.* (9th ed.), xiii. p. 410 f. (= *Hist. of Israel*, pp. 470–474); W. R. Smith, *Prophets of Israel*, 1882, Lecture III., with the notes, also pp. 163–5; Kuenen, *Hilbert Lectures*, 1882, pp. 178 ff., 317 (with the references), &c.; Castelli, *La Profetia nella Bibbia*, 1882, pp. 126–146; C. von Orelli, *Alttestamentliche Weissagung*, 1882 [translated under the title *Old Testament Prophecy*], § 26; W. H. Green, *Moses and the Prophets*, 1883, *passim* (see Index); C. A. Briggs, *Messianic Prophecy*, 1886, pp. 160–3; A. B. Davidson, in the *Expositor*, 1887, vol. v. pp. 161–179, vi. 161–173.

The passage v. 21–26 is dealt with most thoroughly by Engelhardt in the *Zeitsch. für Luth. Theol.* 1874, pp. 409–22, and Rud. Smend, in *Moses apud Prophetas*, 1875, pp. 23–36 (comp. also the article mentioned above, p. 659 f.). See, besides, K. H. Graf in Mers's *Archiv*, ii.

* Such exceptions as those of E. Havet, *Le Christianisme et ses origines*, iii. (1878), pp. 178 f., 196 f., 233 f., and of M. Vernes, *La composition et l'origine du Deutéronome* (1887), p. 49, are hardly worthy of mention.

1871, pp. 93-6 (comp. i. p. 486); Oort, u. s. p. 144 f.; Smith, u. s. p. 399, with the references; Bredenkamp, *Gesetz und Propheten*, 1881, pp. 83-90; F. E. König, *Hauptprobleme der altisr. Rel.-Gesch.* 1884, p. 9 f.; Baethgen, *Beiträge zur Semitischen Rel.-Gesch.* (1888), pp. 180-83. To the present writer it appears that the reference in v. 26 is to the future. Amos says nothing in palliation of the idolatrous service rendered to Jehovah at Beth-el and the other sanctuaries: but it is clear that what he feels most strongly is the indifference shown by the people to Jehovah's moral demands (see esp. ii. 6-8, viii. 4-8). The passage is addressed then to those who observe ostentatiously an external ceremonial, but are heedless of moral duties; and the argument is that of Isa. i. 11-15. Sacrifice, *as such*, the Prophet says, is not demanded by God (vv. 21, 22): it is demanded only as the expression of a righteous heart (v. 23 f.). So far is it from being of the essence of religion, that in the wilderness, where circumstances were unfavourable to its regular observance, it was dispensed with (v. 25). Yet you treat sacrifice as paramount; you neglect the moral demands of God, and trust to that to indemnify you. The end of your neglect will be exile (vv. 26, 27). An allusion in v. 25 to idolatry practised in the wilderness would be out of place in the argument: *sacrifices*, not to

Me, has in the Hebrew the emphatic position (cp. e.g. Isa. xxviii. 24); nor is there anything in the verse to suggest an antithesis between Jehovah and other gods. There is a real ambiguity in אֱלֹהִים; but treated as expressing a future, it stands evidently upon the same footing

syntactically as יְהוָה in v. 27. The allusions in v. 26 are still obscure: cp. Kuenen, *Religion of Israel*, i. 265 f.; Schrader, in his *Cuneiform Inscriptions and the O. T.* ad loc., and more fully in the *Stud. u. Krit.* 1874, p. 324 ff. (where plausible grounds are adduced, from Assyrian sources, for identifying Siccuth [R. V.] and Chlun with Adar and Saturn, respectively); Smith, p. 400 f. [S. R. D.]

2. 'Amós; Amos. Son of Naum, in the genealogy of Jesus Christ (Luke iii. 25). [W. A. W.]

AMMOZ (אַמּוֹז; 'Amóz; Amos), father of the Prophet Isaiah (2 K. xix. 2, 20, xx. 1; 2 Ch. xxvi. 22, xxxii. 20, 32; Is. i. 1, ii. 1, xiii. 1, xx. 2, xxxvii. 2, 21, xxxviii. 1). [G.]

AMPHIPOLIS (Ἀμφίπολις), a city of Macedonia, through which Paul and Silas passed on their way from Philippi to Thessalonica (Acts xvii. 1). It was distant 33 Roman miles from Philippi (*Itin. Anton.* p. 320). It was called Amphipolis, because the river Strymon flowed almost round the town (Thuc. ii. 102).

Amphipolis.

It stood upon an eminence on the left or eastern bank of this river, just below its egress from the lake Cercinitis, and at the distance of about three miles from the sea. It was a colony of the Athenians, and was memorable in the Peloponnesian war for the battle fought under its walls, in which both Brasidas and Cleon were killed (Thuc. v. 6-11). At the spot where St. Paul crossed the Strymon on his missionary journey, there had Xerxes in his invasion of Greece offered a sacrifice of white horses to the river, and buried alive nine youths and maidens (Herod. vii. 114). In Amphipolis, Paulus Aemilius, after the battle of Pydna, publicly

proclaimed the Macedonians free; and here another Paul came to proclaim another liberty, the service of perfect freedom. Its site is now occupied by a village called *Neokhória*, in Turkish *Jeni-Keni*, or "New-Town." See Conybeare and Howson, *Life and Epp. of St. Paul*, i. ch. ix (ed. 4to), and *Dict. of Geography*, s. n. [F.]

AMPLIAS (Ἀμφίας [Westcott and Hort, Ἀμφιᾶτορ]; *Amphiatus*), a Christian at Rome, saluted by St. Paul as his "beloved in the Lord" (Rom. xvi. 8). [F.]

AMRAM. 1. (אַמְרָם, *MY*.¹⁰ = *the people*: is exalted or exalted people; Nöldeke [*ZDMG*].

xl. 185] would derive it, like עֶמְרָן, from עֶמֶר; B. usually 'Αμβράμ [in Ex. vi. 20, 1 Ch. vi. 3, -γ, and in Num. 'Αμβράμ, AF. in Ex. 'Αμβράμ, in Num. 'Αμβράμ, and A. elsewhere usually 'Αμβράμ; *Amram*). A Levite, father of Moses, Aaron, and Miriam (Ex. vi. 18, 20; Num. iii. 19, xxvi. 58, 59; 1 Ch. vi. 2, 3, 18, xxiii. 12, 13, xxiv. 20). [R. W. B.] [F.]

2. עֶמְרָן; B. 'Εμεράν, A. 'Αμαδά; *Hamram*. Properly Hamran or Chamran; son of Dishon and descendant of Levi (1 Ch. i. 41); in Gen. xxi. 26 called HEMDAN, and this is the reading in 1 Ch. of many of Kennicott's MSS. and preferred by Ges. MV., though not by Dillmann.

3. עֶמְרָן; 'Αμβράμ, N. 'Αμβράμ, B. Μαρί; *Amram*. One of the sons of Bani, in the time of Ezra, who had married a foreign wife (Ezra x. 34); called OMAERUS in 1 Esd. ix. 34 (B. Μάηρος, A. Ὀμαίρος; *Abramus*). [W. A. W.] [F.]

AMRAMITES, THE (עֶמְרָמִית; *Amramitae*). A branch of the great Kohathite family of the tribe of Levi (Num. iii. 27, B. 'Αμραμῆς, A. 'Αμβράμ εἰς, F. 'Αμβράμ εἰς; 1 Ch. xxvi. 23, B. 'Αμβράμ, A. 'Αμραμῆς; descended from Amram, the father of Moses. [W. A. W.] [F.]

AMRAPHEL (עֶמְרָפֶל; 'Αμραφάδ. *Amarphal*), the name of a king of Shinar or Southern Babylonia, who aided Chedorlaomer against the kings of Sodom and Gomorrah and the cities of the plain (Gen. xiv.). The name of this king has not yet been found in the cuneiform inscriptions. It seems, however, to be Semitic, and is, perhaps, to be rendered in Babylonian Âmar-apla (Âmar-pal), "I see a son," or Âma-apla (Âma-pal), "See, a son!" Future excavations in Babylonia will probably shed new light on the early history of Babylonia, and the events of the period to which this ruler belongs. [T. G. P.]

AMULETS (φουλακτήρια) were ornaments, gems, scrolls, &c., worn as preservatives against the power of enchantments, and generally inscribed with mystic forms or characters. As such they would come under the general denunciation of heathen "abominations" specified in Deut. xviii. 10-12 (cp. Num. xxiii. 23). The "earrings" in Gen. xxxv. 4 (אָזְנֵי); *enōtria*; *enōtria*, but more properly nose-rings or forehead rings, Theod. Symm. *ἐπιβήτια*, Gen. xxiv. 47; Ezek. xvi. 12) were obviously connected with idolatrous worship, and may have been amulets taken from the bodies of the slain Shechemites. Nose-rings are subsequently mentioned among the spoils of Midian (Judg. viii. 24), and perhaps their objectionable character was one reason why Gideon asked for them. The golden calf in the wilderness (Ex. xxxii. 3), as well as Gideon's "ephod," was made of these אָזְנֵי. Again, in Hos. ii. 13, "decking herself with earrings" is mentioned as one of the signs of the "days of Baalim." Hence in Chaldee an earring is called אָזְנֵי. An amulet worn in the ear was supposed to avert the danger of curses, &c. Such earrings are denounced by St. Augustine, *Ep.* 75.

But amulets were more often worn round the neck, like the golden *bullæ* or leather *lorum* of the Roman boys (Juv. *Sat.* v. 153; cp. Plut. *Sympos.* v. 7; Varro, *de Ling. Lat.* vi. 5). Some-

times they were precious stones, supposed to be endowed with peculiar virtues. In the *Mirror of Stones* the strangest properties are attributed to the amethyst, Kinocetus, Alektorica, Kerannium, &c.; and Pliny, talking of succinum, says, "Infantibus alligare amuleti ratione prodest" (xxvii. § 50). He also speaks of cyclamen (xxv. § 115), wild vine (xxiii. § 20), jasper (xxvii. § 118), saliva (xxviii. §§ 35-39), and bats (xxix. § 83) being used for the purpose of amulets. Amulets were generally suspended as the centre-piece of a necklace, and among the Egyptians (Maspero, *L'Archéologie Égyptienne*, p. 235) often consisted of the emblems of various deities, or the symbol of truth and justice ("Thmei"). A gem of this kind, formed of sapphires, was worn by the chief judge of Egypt (Diod. i. 48, 75), and a similar one is represented as worn by the youthful deity Harpocrates (Wilkinson, *Anc. Egypt.* iii. 130, ed. 1878). The Arabs hang round their children's necks the figure of an open hand; a custom which, according to Shaw, arises from the *unluckiness* of the number 5. This principle is often found in the use of amulets. Thus the basilisk is constantly engraved on the talismanic scarabæi of Egypt, and the phallus was among the sacred emblems of the Vestals (*Dict. of Gk. and Rom. Ant.*, art. *Fascinum*). According to

Jahn (*Arch. Bibl.* § 131, Engl. tr.), the עֶמְרָםִית of Is. iii. 20 (A. V. "earrings," R. V. "amulets") were "figures of serpents carried in the hand" (more probably worn in the ears) by Hebrew women." Schröder (*de Vestitu*, pp. 168, 170) says that Arab women wore golden serpents between the breasts; a practice forbidden by Mohammed, because the serpent is an emblem of the devil (see Gesenius, s. v. עֶמְרָםִית). The word is derived from עֶמְרָםִית, *sibularit*, and means both "enchantments" (cp. Is. iii. 3; A. V. "eloquent orator," R. V. "skilful enchanter"; Aqu. *συνοδὸς ψιθυρισμῶν*; Theodot. *συνοδὸς ἐνωδῆν*). In Is. xvi. 16 it is rendered "a prayer;" *mary*. "secret speech") and the magical gems and formulae used to avert them (Gesen. s. v.). Amulets were used by the Phœnicians. Those that are found are Egyptian in type (see Perrot et Chipiez, *Hist. de l'Art dans l'Antiquité*, iii. 237).

The commonest amulets were sacred words (the tetragrammaton, &c.) or sentences, written in a peculiar manner, or inscribed in some cabalistic figure like the shield of David, and Solomon's Seal (Bartolucci, *Bibl. Rabbin.* i. 576). Another form of this figure is the pentangle (or pentacle), which "consists of three triangles intersected, and made of five lines, which may be so set forth with the body of man as to touch and point out the places where our Saviour was wounded" (Sir T. Browne's *Vulv. Errors*, i. 10). Under the head of amulets fall the Ἐφῶδια γράμματα (Acts xix. 19), and in later times the Abragic gems of the Basilidians, and the use of the word "Abracadabra," recommended by the physician Serenus Samonicus as a cure for the hemitritæus. The same physician prescribes for quartan ague:

"Mæconiaē Iliados quartum suppone timentī."

Charms "consisting of words written on folds of papyrus tightly rolled up and sewed

in linen," have been found at Thebes (Wilkinson), and our English translators possibly intended something of the kind when they rendered the curious phrase (in Is. iii. 20) רִיבֵי הַתְּבִיטִים (R. V. "perfume boxes") by "tablets." But though many scholars have understood the phrase to mean amulets (Targ. רִיבֵי, "earrings"), Schröder has proved that it means "scent-boxes" (*de Vest.* x.). It was the danger of idolatrous practices arising from the abuse of amulets that probably induced the sanction of the use of phylacteries (Deut. vi. 8; xi. 18, פְּתִילֵי תְּבִיטִים). The modern Arabs use scraps of the Koran (which they call "telesmes" or "alakakirs") in the same way.

Amulets are frequently alluded to in the Talmud under the name פְּתִילֵי. Horses had a fox's tail or a crimson ornament placed between their eyes; and cows and goats were similarly protected (*Shabbath*, f. 53, 1). An approved amulet is one which has effected three cures; and whether it consisted of written characters or of roots (see Jos. Ant. viii. 2, § 5), it was considered so important that it might be worn even on the Sabbath, provided it were attached to a chain or ring, so as to look as if it were meant for an ornament and not for a remedy (*Shabbath*, f. 61, 1, 2). The disease *cardiacus* could be cured by an amulet on which was written the name of the demon which caused the disease (*Gittin*, f. 67, 2). See Hamburger, *Talm. Wörterb.* s. v. *Kamca*.

A very large class of amulets depended for their value on their being constructed under certain astronomical conditions. Their most general use was to avert ill-luck, &c., especially to nullify the effect of the *ὀφθαλμὸς βλάκων*, a belief in which is found among all nations. (Mark vii. 22; Gal. iii. 1. See DIVINATION, § 7.) The Jews were particularly addicted to them, and the only restriction placed by the Rabbis on their use was, that none but approved amulets were to be worn on the Sabbath (Lightfoot's *Hor. Hebr.* in Matt. xxiv. 4). It was thought that they kept off the evil spirits who caused disease. Some animal substances were considered to possess a power of averting demons, as we see from Tobit. Pliny (xxviii. 47) mentions a fox's tongue worn on an amulet as a charm against blear eyes, and says (xxx. 15), "Scarabaeorum cornua alligata amuleti naturam obtinent;" perhaps an Egyptian fancy. In the same way one of the Roman emperors wore a seal-skin as a charm against thunder. Among plants, the white bryony and the Hypericon, or Fuga Daemonum, are mentioned as useful (Sir T. Browne, *vulg. Errors*, i. 10. He attributes the whole doctrine of amulets to the devil, but still throws out a hint that they may work by "imponderous and invisible emissions").

Since the use of amulets was thus common among the Jews and the heathen, it is not unnatural that it should have lingered on among some Christians. Chrysostom (*Hom.* lxiii. in *Matt.*, ed. Field, ii. p. 347) speaks of many women who used the Gospels as amulets (*εὐαγγέλια τῶν τραχέων ἐλατῶσαι*). Comp. Isidor. Pelus. ii. Ep. cl., who also alludes to these *εὐαγγέλια μικρά*. Jerome (in *Matt.* iv. 24) confesses that he once used the Gospels in this superstitious way. The Fathers denounce all

amulets, and the use of them was forbidden by the Council of Laodicea.

Amulets are still common. On the Mod. Egyptian "Hegab," see Lane, *Mod. Egypt*, c. 11; and on the African "pieces of medicine," a belief in which constitutes half the religion of the Africans, see Livingstone's *Travels*, p. 283 *et passim*. [TERAPHIM; TALISMAN.]

Amulet ("Hegab"). (From Lane's *Modern Egypt*.)

The word "amulet" is derived from the Arabic *hamdlet*, "a thing suspended." The Greek equivalent, *φουλακτήριον*, does not occur in the LXX. (but see Rosenmüller's *scholia* on Ezek. xiii. 18), and in the N. T. only in Matt. xxiii. 5. On Roman, Greek, and Christian use of amulets, see the *Dict. of Greek and Roman and Christian Antiquities*, s. v. [FRONTLETS; PHYLACTERIES.] [F. W. F.]

AM'ZI (אֲמִצִּי, *strong or valiant*; possibly an abbreviation of אֲמִצְיָה, *Jah is strong*; B. *Aesæcia*, A. *Maesolia*; *Amasai*). 1. A Levite of the family of Merari, and ancestor of Ethan the minstrel (1 Ch. vi. 46).

2. B. *Amasai*, A. *Amasai*, N. *Amsai*; A. priest, whose descendant Adaiah with his brethren served the Temple in the time of Nehemiah (Neh. xi. 12). [W. A. W.] [F.]

ANAB (אָנָב, perhaps, *place of grapes*; Ges.; *Anab*), a town in the mountains of Judah (Josh. xv. 50, B. *ʿAnab*, A. *ʿAnab*), named, with Debir and Hebron, as once belonging to the Anakim (Josh. xi. 21, AF. *ʿAnab*, B. *ʿAnab*). It has retained its ancient name, and lies among the hills to the west of *edh-Dhaheriyeh*, Debir, close to Shoco and Eshtemon (Rob. i. 494; see also *P. F. Mem.* iii. 393). The conjecture of Eusebius and Jerome (*OS.* pp. 128, 12, 240, 14) is evidently inadmissible. [G.] [W.]

ANA'EL (אָנָאֵל; Chnld. אָנָאֵל; Heb. אָנָאֵל [ed. Neubauer]; Vulg. omits). The brother of Tobit (Tob. i. 21). [G.] [F.]

ANA'H (אָנָה, meaning uncertain; *ʿAnā*: *Ana*). 1. The fourth son of Seir the Horite and a "duke" (Gen. xxxvi. 20, 29) in the land of Seir. He was the father of Aholibamah, the wife of Esau (Gen. xxxvi. 2, 14).

2. AE. *ʿAnā*, D. *ʿAnā*. The grandson of Seir, i.e. son of the "duke" Zibzon the Horite, the third son of Seir (Gen. xxxvi. 24). Of him it is told (A. V.) that he "found the mules (מִלִּיכִים, R. V. "the hot springs;" Vulg. *aquas calidas*; LXX. *ἱαμῆς*) in the wilderness." Modern scholars generally accept the rendering of the Vulgate, though the derivation is uncertain, and identify the spot with the sulphur-springs of Calirrhoe (LASHA, Gen. x. 19) on the east side of the Dead Sea (Delitzsch.

Genesis, p. 431 [1887]). Anah's discovery of these springs "as he fed the asses of Zibeon his father" was probably brought about by the wandering habits of his herd, and is compared by Riehm, Delitzsch, and others with the discovery of the waters of Carlsbad through the howling of the bound which, pursuing the stag, had fallen into some boiling springs.

Such interpretations as—(a) that of the Sam. and Targ. of Onkelos, which identifies אֲנָחִים with אֲנָחִים (Deut. ii. 10, 11), the *Emim* or *Rephaim*, the giant aborigines of the Moabite border, and whom Anah is here supposed to have met and conquered (אֲנָחִים, as in *P's.* xxi. 9), or (b) the Rabbinic translation of the word by *mules* (as in A.V.), whom Anah is supposed to have procured ("found") by the conjunction of horse and ass—may be said to find no support to-day.

No. 1 and 2 are sometimes taken to be the same person. Aholibamah is described as "the daughter of (בַּת) Anah, the daughter of (בַּת) Zibeon the Hivite" (Gen. xxxv. 2, 14). The LXX., Samar., and Peshito Versions read "son (בֶּן) of Zibeon;" others read "(grand-) daughter of Zibeon;" but in either case identify the Anah of v. 2 with the Anah of v. 24. Others, however, take the expression "daughter of Zibeon" to be equivalent to "niece of Zibeon," and keep the Anah of vv. 20, 25 distinct from the Anah of v. 24. Robertson Smith (*Journ. of Philology*, "Animal Worship and Animal Tribes," ix. p. 90) alleges the variations connected with Anah as indications of no true genealogy, but of a systematization of tribal facts. Adopting the reading "daughter of Zibeon," he deduces kinship through females among the Horites; and from the existence of a sub-clan, Anah, among the Zibeonites as well as among the Seirites, he concludes that there was "exogamy" or that law which forbade the members of the Horite clan to intermarry. This is admitted to be probable only so far as the Edomites are concerned (*Jacobs, Archaeolog. Review*, iii. p. 153).

On the identification of Anah the Horite with Beeri the Hittite, see BEERI. [F.]

ANAHARATH (אֲנָחָרָת; B. *Ἀναχαράθ*; A. *Ἀναχάριθ*; *Anaharath*), a place within the border of Issachar, named with Shibon and Rablith (*Josh.* xix. 19). It is now probably the village en-Na'arah, N.E. of Jezreel (*P. F. Mem.* ii. 85). [G.] [W.]

ANATHAH (אֲנָתָה, *Jah answers*; *Ἀναθᾶ*, B. *Ἄνῃ*; *Ania*). 1. Probably a priest; one of those who stood on Ezra's right hand as he read the law to the people (*Neh.* viii. 4). He is called ANATHAN in 1 Esd. ix. 43.

2 B. *Ἀναθᾶ*, M^a A. *Ἀνθᾶ*; *Anala*, M^a A. *Ἀνθᾶ*; *Anala*; *Anala*. One of the "heads" of the people, who signed the covenant with Nehemiah (*Neh.* x. 22). [W. A. W.] [F.]

ANAK. [ANAKIM.]

ANAKIM (אֲנָכִים; A. *Ἐνακίμ*, B. *Ἐνακί*; *Enakim*), a race of giants or Rephaim (*Deut.* ii. 10), and probably so called from their stature (*longicollis*), descendants of Arba (*Josh.*

xv. 13, xxi. 11), dwelling after the time of Abraham in the southern part of Canaan, and particularly at Hebron, which from their progenitor received the name of אֲרַבָּיִת אֲנָכִים, city of Arba. Besides the general designation Anakim, they are variously called אֲנָכִים, sons of Anak (*Num.* xiii. 33, LXX. *τοὺς γίγαντας*), אֲנָכִים, descendants of Anak (*Num.* xiii. 22), אֲנָכִים, sons of Anakim* (*Deut.* i. 28, LXX. *υἱοὺς ἄνθρωπων*). These designations serve to show that we must regard Anak as the name of the race rather than that of an individual, and this is confirmed by what is said of Arba, their progenitor, that he "was a great man among the Anakim" (*Josh.* xiv. 15). The race appears to have been divided into three tribes or families, bearing the names Sheshai, Ahiman, and Talmai. Though the warlike appearance of the Anakim had struck the Israelites with terror in the time of Moses (*Num.* xiii. 28; *Deut.* ix. 2), they were nevertheless dispossessed by Joshua, and utterly driven from the land, except a small remnant that found refuge in the Philistine cities, Gaza, Gath, and Ashdod (*Josh.* xi. 21). Their chief city Hebron became the possession of Caleb, who is said to have driven out from it the three sons of Anak mentioned above; that is, the three families or tribes of the Anakim (*Josh.* xv. 14; *Judg.* i. 20). After this time they vanish from history. [F. W. G.] [F.]

ANA'MIM (אֲנָמִים; A. *Ἐναμίμ*, B. *Ἀναμίμ*; *Anamim*), a Mizraite people or tribe mentioned only in the Noachian list (*Gen.* x. 13; 1 Ch. i. 11 [A. *Ἀναμίμ*, B. omits]). Its settlement is to be sought within the Mizraite territory, Egypt, Libya, South-west Palestine, and possibly the neighbouring islands of the Mediterranean. [MIZRAIM.]

Several identifications have been proposed in the Egyptian inscriptions. De Rougé (*Études sur les six premières Dynasties de Manéthon*, p. 6) compares this name to the Anu, a population which spread over a great part of the valley of the Nile, which gave its name to Heliopolis and Hermonthis, and which is found at last in Nubia, between the Nile and the Red Sea. The difficulty in this identification is that the sign with which the name of the Anu begins is nearly always transcribed by M. Ebers (*Aegypten und die Bücher Moses*, p. 98) translates "the wandering Amu" (Shepherds), and considers them as the inhabitants of the eastern part of the Delta, around what is now Lake Menzaleh. The chief objection is that the Amu of the sculptures are decidedly a Semitic nation, with a Semitic type. The most satisfactory identification has been pointed out by Brugsch (*Reise nach den grossen Oase*, p. 68), who, relying on the fact that the hieroglyphical *k* or *gh* is sometimes transcribed by *g*, considers the Anamim as the in-

habitants of *Kenem* or *Ghemem*, the Great Oasis of El Khargeh, in the Libyan desert. It is to be observed that the Coptic Version has a variant *midim*, which has not been explained. Both Josephus and St. Jerome confess their ignorance

* Delitzsch (*Genesis*, p. 428 [1887]), with most moderns, takes *Hivite* (חִוִּי) to be a mistake for *Horite* (חֹרִי).

* The A. V. "Anakims," which adds *s* to a plural termination (cp. also *Emims*, *cherubims*), is corrected in R. V. to *Anakim*.

no question as to the discretion of St. Peter; the Apostle is but the organ and announcer of the Divine justice (Niemeyer, *Charakteristik der Bibel*, i. p. 574). It has been supposed that the severity of the judgment was necessary to prevent persons from attempting to defraud the common fund by establishing a claim to draw upon it, while they still retained private property. But this view presumes a stricter community of goods than actually existed, and does not harmonise with St. Peter's words. Reverence for the Holy Spirit as God (v. 3, 4) was the principle in danger, and its stern vindication was necessary at a time when the presence and work of the Spirit were so near and manifest. Cp. our Lord's teaching on sin against the Holy Ghost, Matt. xii. 31, and St. Peter's own words to Simon Magnus, Acts viii. 22. [E. R. B.]

3. A Christian Jew of Damascus (Acts ix. 10-19). As in the case of Cornelius and Peter, so here two visions prepared Saul and Ananias for their interview. The natural fear of Ananias was overcome by a revelation of the work for which Saul was chosen by the counsel of God. He went as directed, and the laying on of his hands was followed by Saul's recovery of sight and by his Baptism. We cannot safely infer from the text that the power of conferring the gift of the Holy Ghost lay in Ananias, and therefore was not confined to the Apostles. The gift is indeed said to have been one of the objects of his mission, but may have been given without his instrumentality. Two other accounts of St. Paul's conversion, with some further particulars, are given by the Apostle himself (Acts xxii. 6-16, and xxvi. 12-18). In the former he naturally conciliates his Jewish audience by mentioning that Ananias was "a devout man according to the Law, well reported of by all the Jews that dwelt there." God Who sent Ananias was the "God of our fathers," and Jesus "the Righteous One." The second account before Festus and Agrippa abbreviates the story, Ananias disappears altogether, and a part of the message sent through him to Saul is directly attributed to the Lord Himself. Tradition represents Ananias as at this time already Bishop of Damascus by the appointment of St. Peter and St. Andrew, as martyred under Lucian the governor, and buried at Damascus (*Memol. Graec. Basil.* pp. 79, 80). [E. R. B.]

4. B. *Arvels*, A. *'Avvlas*; *Ananias*. The sons of Ananias to the number of 101 (Vulg. 130) are enumerated as having returned with Zorobabel (1 Ed. v. 16). No such name exists in the parallel lists of Ezra and Nehemiah.

5. *'Avvlas*; Vulg. omits. HANANI No. 3 (1 Ed. ix. 21; cp. Ezra x. 20).

6. *'Avvlas*; *Amanias*. HANANIAH No. 9 (1 Ed. ix. 29; cp. Ezra x. 28).

7. *'Avvlas*; *Ananias*. ANAIAH No. 1 (1 Ed. ix. 43; cp. Neh. viii. 4).

8. A. *'Avvlas*, B. *'Avvlas*; *Ananias*. HANAN No. 5 (1 Ed. ix. 48; cp. Neh. viii. 7).

9. "The great," father of Azarias, whose name was assumed by the Angel, Raphael (Tob. i. 12, 13. In Chald. and Heb. [ed. Neubauer] Haniel takes the place of Ananias; in Itala, *Ananias*). Ananias is accepted by Tobit as one of his "brethren."

10. RA. *'Avvlas*, B. and T. omit; in the Vulg. the name corresponding to it in point of

order is *Jamnor*, Judith viii. 1. One of the ancestors of Judith. [W. A. W.] [F.]

11. *'Avvlas*; *Ananias*. The Hebrew name of Shadrach (HANANIAH No. 7). Dan. iii. 88 (Theod., Vulg.; v. 65, LXX.). [W. A. W.]

ANANIEL (אנניאל) [ed. Neubauer], *El* is *gracious*; *'Avvlas*; Itala, *Ananikel*, forefather of Tobias (Tob. i. 1). [F.]

ANATH (אנאח), connected with the name of the Phoenician and Canaanite goddess *Anat* [CIG. 95] whose worship passed also into Egypt [Baethgen, *Beiträge z. Sem. Religionsgesch.*, pp. 52, 141]; *Anath*, father of Shamgar (Judg. iii. 31 [B. *Δευδά*, A. *'Avdθ*], v. 6 [B. *'Avdθ*, A. *Κευδθ*]). [F.]

ANATH'EMA (*ἀνθήμα*, in LXX., the equivalent for אֲנִיָּה, a thing or person devoted: in N. T. generally translated *accursed*). The more usual form is *ἀνθήμα* (*ἀνάρθημα*), with the sense of an offering suspended in a temple (Luke xxi. 5; 2 Macc. ix. 16): the Alexandrine writers preferred the short penultimate in this and other kindred words (e.g. *ἐπίθεμα*, *σύνθεμα*): but occasionally both forms occur in the MSS., as in Jud. xvi. 19; 2 Macc. xiii. 15; Luke xxi. 5: no distinction therefore existed originally in the meanings of the words, as has been supposed by many early writers. The Hebrew אֲנִיָּה is derived from a verb signifying primarily to *shut up*, and hence to (1) *devote* (R. V. text or marg.), and (2) *exterminate*. Any object so devoted to the Lord was irredeemable: if an inanimate object, it was to be given to the priests (Num. xviii. 14); if a living creature or even a man, it was to be slain (Lev. xxvii. 28, 29); hence the idea of *extermination* as connected with *devoting*. Generally speaking, a vow of this description was taken only with respect to the idolatrous nations who were marked out for destruction by the special decree of Jehovah, as in Num. xxi. 2; Josh. vi. 17. Jehovah (Is. xxiv. 2) was said to *shut up*, i.e. *place under a ban*, which necessitated the *destruction* of the nation in order to prevent all contact. The extermination being the result of a positive command (Ex. xxii. 20), the idea of a vow is excluded, although the instances referred to show how a vow was occasionally superadded to the command. Any breach with respect to the "devoted" thing was punished with death (Josh. vii. 25). It may be further noticed that the degree to which the work of destruction was carried out, varied (cp. Dillmann on Lev. xxvii. 28, 29). Thus it applied to the destruction of (1) human life alone (Deut. ii. 34); (2) all, virgins excepted (Num. xxi. 17; Judg. xxi. 11); (3) all living creatures (Deut. xx. 16; 1 Sam. xv. 3); the spoil in the former cases was reserved for the use of the army (Deut. ii. 35, xx. 14; Josh. xxii. 8), instead of being given over to the priesthood, as was the case in the recorded vow of Joshua (Josh. vi. 19). Occasionally the town itself was also utterly destroyed, the site rendered desolate (Josh. vi. 26), and the name Hormah (*'Avdθμα*, LXX.) applied to it (Num. xxi. 3; cp. Judg. i. 17). The *herem* was also resorted to by the Moabites (cp. the Mesha-Inscription, l. 17; cp. also 2 Ch. xx. 23), and the same term is used to express

the action of the Assyrians (2 K. xix. 11; Is. xxxvii. 11; 2 Ch. xxxii. 14). Cp. Riehm, *HWB*. "Bann"; Ewald, *Antiquities*, p. 75 sqq.

We pass on to the Rabbinical sense of אָנָת as referring to *excommunication*, premising that an approximation to that sense is found in Ezra x. 8, where forfeiture of goods is coupled with separation from the congregation (cp. Baxtorf. *Lex. Chald.* on the words specified; Weber, *System d. Altsynag. Paläst. Theologie*, p. 138; Schürer, *Gesch. d. Jüdischen Volkes am Zeitalter Jesu Christi*,² II. Theil. pp. 362-3). Three kinds of excommunication are enumerated (Levy, *Chald. Wörterb.* a. n. אָנָת No. ii.):—(1) אָנָת, involving various restrictions in civil and ecclesiastical matters for the space of thirty days: to this it is supposed that the terms ἀπορίσειν (Luke vi. 22) and ἀποσυρῶντες (John ix. 22) refer. (2) A repetition of the excommunication for another thirty days (or even longer), with increased penalties. (3) אָנָת, a more public and formal sentence, accompanied with curses, and involving severer restrictions for an indefinite period. The term אָנָת is common to these three kinds. Some expositors refer the terms ἀπειθήσει καὶ ἐκβάλλειν (Luke vi. 22) to the second species, but a comparison of John ix. 22 with v. 34 shows that ἐκβάλλειν is synonymous with ἀποσυρῶντες ποιεῖν, and there appears no reason for supposing the latter to be of a severe character. The phrase παραδίδόναι τῷ Σατανᾷ (1 Cor. v. 5; 1 Tim. i. 20) has been sometimes thought a reflexion of Jewish excommunication natural to the Jew St. Paul; but St. Paul's formula limiting his sentence to "the destruction of the flesh" is full of a "severe mercy of Divine discipline" (Aug.) unknown to the Rabbis (see the notes in the *Speaker's Commentary*, l. c.).

The word ἀνάθεμα frequently occurs in St. Paul's writing, and many expositors have regarded his use of it as a technical term for judicial excommunication. That the word was so used in the early Church, there can be no doubt (Bingham, *Antiq.* xvi. 2, § 16): but an examination of the passages [in each consult the admirable notes of the *Speaker's Commentary*] in which it occurs shows that, like the cognate word ἀναθεματίζω (Matt. xxvi. 74; Mark xiv. 71; Acts xxiii. 12, 21), it had acquired a more general sense as expressive either of strong feeling (Rom. ix. 3; cp. Ex. xxxii. 32), or of dislike and condemnation (1 Cor. xii. 3, xvi. 22; Gal. i. 9).

[W. L. B.] [F.]

ANATHOTH (עֲנָתוֹת, probably the pl. of the goddess-name 'Anāt [Baethgen, p. 53; see ANATH]; 'Αναθώ: *Anathoth*). I. The eighth son (in textual order) of Becher, the third son of Benjamin (1 Ch. vii. 8), perhaps connected with the place of the same name.

2. N. Αναθώθ, B. Ναθώθ (Neh. x. 19. See Swete's ed. of LXX, from which it will be seen how such variations arose). One of the heads of the people who signed the covenant in the time of Nehemiah: unless the name stands for the "men of Anathoth" mentioned in Neh. vii. 27.

[W. A. W.] [F.]

ANATHOTH (עֲנָתוֹת, עֲנָתוֹת, probably plur.

* In A.V. there are irregularities in the orthography of the gentils name "Anathothite," due to the trans-

of אָנָת [ANATH], by which name the place is called in the Talmud *Joma*, 10; 'Αναθώθ: *Anathoth*, a city of Benjamin, omitted from the list in Josh. xviii., but a priests' city; with "suburbs" (Josh. xxi. 18; 1 Ch. vi. 60). Hither, to his "fields," Abiathar was banished by Solomon after the failure of his attempt to put Adonijah on the throne (1 K. ii. 26). This was the native place of Abiezer, one of David's thirty captains (2 Sam. xxiii. 27; 1 Ch. xi. 28, xxvii. 12), and of Jehu, another of the mighty men (1 Ch. xii. 3); and here, "of the priests that were in Anathoth," Jeremiah was born (Jer. i. 1; xi. 21, 23; xxxix. 27; xxxii. 7-9).

The "men" (אָנָת, not אָנָת, as in most of the other cases; compare, however, Netophah, Michmash, &c.) of A. returned from the Captivity with Zerubbabel (Ezra ii. 23; Neh. vii. 27; 1 Esd. v. 18).

Anathoth lay on or near the great road from the north to Jerusalem (Is. x. 30); by Josephus (*Ant.* x. 7, § 3) it is placed at twenty stadia from the city, by Eusebius at three miles (*Onom.*), and by Jerome (*turris Anathoth*) at the same distance *contra septentrionem Jerusalem* (ad Jerem. cap. i.). The traditional site at Kuryet el-'Enab does not fulfil these conditions, being ten miles distant from the city, and nearer W. than N. But the real position has no doubt been discovered by Robinson at 'Anāta, on a broad ridge 2½ miles N.N.E. from Jerusalem. The cultivation of the priests survives in tilled fields of grain, with figs and olives. There are the remains of walls and strong foundations, and the quarries still supply Jerusalem with building stone (Rob. i. 437, 438; *P. F. Mem.* iii. 7, 82).

[G.] [W.]

ANCHOR. [SHIP.]

ANDREW, ST. (Ἀνδρέας; *Andreas*). The name is Greek, and occurs first in Hdt. vi. 136. It is borne by the physician of Ptolemy Philadelphus, quoted by Athenaeus (iii. p. 115), and elsewhere. A Jew of Cyrene named Andrew is mentioned by Dio Cassius (lxxviii. 32) as living in the time of Trajan. St. Andrew was of BETHSAIDA (John i. 44), defined as Bethsaida of Galilee (John xii. 21). He was brother to Simon Peter (John i. 40), and dwelt in the same house with him (Mark i. 29) at Capernaum (Mark i. 21). He was a disciple of St. John the Baptist, and, accompanied by an unnamed disciple, was the first to follow Jesus (John i. 35-40). Again, when the same followers were called to a closer allegiance, he with Peter received the first summons (Matt. iv. 18; Mark i. 16). Hence arose his title of πρωτόκλητος, not infrequent in Greek ecclesiastical writers (Stephanus, ed. Hase, s. c.). He is a link between the first and second of the three sets of four in which the twelve Apostles are presented [APOSTLE]. On the one hand, he is included in the first four. In all the lists his name follows St. Peter's, or is only separated

lators having reproduced certain modifications of form peculiar to the Hebrew, viz. Anethothite, 2 Sam. xxiii. 27; Anethothite, 1 Ch. xxvii. 12; Anethothite, 1 Ch. xl. 23, xli. 3; R.V. in each case "Anathothite." "Jeremiah of A." (Jer. xxxix. 27) should be, as in R. V., "J. the Anathothite."

from it by those of St. James and St. John. The solemn and private question as to the time of the end, which in each of the Synoptists leads to the great eschatological discourses, is according to St. Mark the question of the foremost Apostles only.—SS. Peter, James, John, and Andrew. On the other hand, St. Andrew is closely connected with the second quaternation of disciples through St. Philip, who is always placed at its head, and therefore in two lists (Mk. iii. 18; Acts i. 13) immediately follows St. Andrew. There is the local connexion of the same original home, Bethsaida, although St. Andrew had latterly lived at Capernaum. There is the slight coincidence that both have Greek names. There is the evidence of two incidents, the feeding of the 5,000 (John vi. 7, 8) and the introduction of the Greeks to Jesus (John xii. 22), in both of which St. Andrew and St. Philip are associated. In the latter instance Philip seems to be unwilling to approach the Lord with an unprecedented request without the support of one of the first four. Yet our theories of acknowledged rank and priority in the college must be modified by the reflection that Jesus Himself gave no countenance to the assumption of them (Mark ix. 34).

In the Acts of the Apostles, St. Andrew, like the majority of his colleagues, falls into the background, and is never mentioned after the list in Acts i. The evidence as to his later history is conflicting. Origen (quoted by Euseb. iii. 1) assigning Scythia as the scene of his labours, whence Russia claims him as her patron saint. This tradition seems to be followed in the apocryphal account of his sojourn among the Anthropophagi (*Acta Andreæ et Matthiæ*: Tischendorf, *Acta Apocrypha*). On the other hand, there is the evidence of Jerome (*ad Marc. c. lxx. ed. Migne*) and Theodoret (*ad Psalm. cxi.*) in favour of Achaia. At any rate, all traditions agree in assigning Patrae in Achaia as the place of his martyrdom. Of his martyrdom there are two accounts deserving of notice, and differing widely in character. (1.) The third book of the *Historia Apostolica* of Abdias (Fabricius, *Cod. Apoc. N. T.*) contains the Acts of St. Andrew. This history is said to have been written in Hebrew by Abdias, Bishop of Babylon, a contemporary of the Apostles, and translated into Latin by Julius Africanus. It is, however, a forgery of the 6th or 7th century (see Herzog, *H.E.* s. n. Abdias.) Its interest lies in the fact that it represents those earlier *Acta Andreæ* which Epiphanius (*Haeres.* xlvii. 1; lxi. 1; lxiii. 2) mentions as especially valued by the Encratites, Apostolici, and Origeniani (cp. also Euseb. *H.E.* iii. 25). It is probably a Catholic adaptation in Latin from heretical Greek documents, suppressing the evident heresy, but retaining in a modified form much of the teaching which had been valued by the heretics, and now fell in with the ascetic tendencies of the age. The legends related constantly turn upon sins of the flesh, and the relations of married persons. Reference to the passages cited from Epiphanius will show the connexion between the topics treated and the sects which are mentioned by him. A crucial instance is afforded by the martyrdom of St. Andrew, which is said in the *Historia Apostolica* to have been in part occasioned by his supposed interference between

Aegeas, the Roman governor of Patrae, and his wife Maximilla. (2.) But in the document which we have next to consider (*Acta Andreæ*: Tischendorf, *Acta Apocrypha*) the condemnation of the Saint follows on his preaching the Cross; the doctrine of reserve to unbelievers comes forward as a cause of the special anger of Aegeas or Aegeates, and a reminiscence of St. Andrew's first sight of his Master comes back touchingly in his repeated mention of the "Lamb without blemish" (cp. John i. 36). These *Acta Andreæ* purport to be a letter from the Presbyters and Deacons of the Churches of Achaia. It is throughout of a totally different character from the work of the pseudo-Abdias; it bears no traces of heretical origin, and probably has some historical value (see Tisch. Prolegg. in *Acta Apoc.* xl.—xlii.). A legend related in the *Muratorian Fragment* makes St. Andrew the recipient of a revelation about the composition of St. John's Gospel (see Tregelles' edit. note *ad loc.*). The "crux decussata" (X-shaped cross) assigned to St. Andrew has no early authority (Andrew, Festival, of *Dict. Chr. Antiq.*); but all accounts agree that he was bound, not nailed to the cross, in order to prolong his sufferings. The date of his martyrdom given in the *Letter* (Nov. 30) has been observed in the day assigned to him in the Calendar of the Church. Consult Lipsius, *Die Apokryphen Apostelgeschichten u. Apostellegenden*, i. p. 543 sq. [E. R. B.]

ANDRONICUS (Ἀνδρόνικος; Andronicus).

1. A Christian at Rome saluted by St. Paul (Rom. xvi. 7), together with Junias. The two are called his kinsmen (*συγγενεῖς*). The same term is applied in vv. 11 and 21 to four other persons, two of whom, Jason and Sosipater, may probably be identified with Jason of Thessalonica and Sopater of Berea. It is improbable that these persons belonging to other provinces were all blood relations of St. Paul, and it is better to understand "kinsmen" as simply marking them out as Jews among the Gentiles saluted with them. For this use of *συγγενεῖς* cp. Rom. ix. 3, and Josephus, *B. J.* ii. 18, 4. Also see Godef. note *ad loc.* Secondly, they are called "my fellow-prisoners." Lightfoot (*Phil. Introd.* p. 11, and Col. iv. 10, note) suggests that the word (*συναιχιδναῖος*, not *συνδείσμος*) may imply a spiritual captivity,—fellow-prisoners, as together taken captive by Christ. If a metaphorical interpretation be adopted at all, the foregoing explanation would be better than the regarding the captivity as the previous bondage of Judaism in which they had been shut up. A literal interpretation would imply a reference to an unrecorded imprisonment (*ἑτάδης δεσμῷ φερέας*, Clem. *ad 1 Cor.* v.). Thirdly, Andronicus and Junias are "of note among the Apostles" (see *APOSTLE*). Lastly, they were believers before St. Paul's own conversion. There is no tradition of any value respecting them. *Acta Sanctorum*, May 17, gives scarcely any additional circumstances. [E. R. B.]

2. An officer left as viceroy (*διαδεχόμενος*, 2 Macc. iv. 31) in Antioch by Antiochus Epiphanes during his absence (B.C. 171). Mene-laüs availed himself of the opportunity to secure his good offices by offering him some golden vessels which he had taken from the Temple. When Onias (ONIAS III.) was certainly assured

K

that the sacrilege had been committed, he sharply reproved Menelaus for the crime, having previously taken refuge in the sanctuary of Apollo and Artemis at Daphne. At the instigation of Menelaus, Andronicus induced Onias to leave the sanctuary, and immediately put him to death in prison (? *παρέκλεισεν*, 2 Macc. iv. 34). This murder excited general indignation; and on the return of Antiochus, Andronicus was publicly degraded and executed (2 Macc. iv. 30-38). Josephus places the death of Onias before the high-priesthood of Jason (*Ant.* xii. 5, § 1), and omits all mention of Andronicus; but there is not sufficient reason to doubt the truthfulness of the narrative, as Wernsdorf has done (*De fide libr. Macc.* pp. 90 f.). [B. F. W.]

3. Another officer of Antiochus Epiphanes who was left by him on Garizim (*ἐν Γαρ.* 2 Macc. v. 23), probably in occupation of the temple there. As the name was common, it seems unreasonable to identify this general with 2, and so to introduce a contradiction into the history (Wernsdorf, l. c.; Ewald, *Gesch. d. Volkes Isr.* iv. 335 n.; cp. Grimm and *Speaker's Comm.* on 2 Macc. iv. 38). [B. F. W.]

A'NEM (אָנֶם; A. 'Ανάμ, B. omits; *Anem*), a city of Issachar, with "suburbs," belonging to the Gershonites, 1 Ch. vi. 73 (Heb. r. 58). It is omitted in the lists in Josh. xix. 21 and xxi. 29, and instead of it we find En-gannim. Robinson (*Pal.* iii. 385) identifies it with *Genin*. Major Conder (*P. F. Mem.* ii. 44, 51) proposes to identify it with 'Anin, a village 8½ miles from *Jenin*, in the hills near *Ummel-Fahm*. [G.] [W.]

A'NER (אָנֶר; B. 'Ανάρ, A. 'Ενάρ; *Aner*), a city of Manasseh, west of Jordan, with "suburbs" given to the Kohathites (1 Ch. vi. 70). Some comparing the passage with Josh. xxi. 25 consider the name a corrupt reading of Taanach (תַּעֲנַח). Major Conder, however, suggests its identity with 'Ellar, a small village in the hills S.W. of Esdraelon (*P. F. Mem.* ii. 154). [G.] [W.]

A'NER (אָנֶר; AD. *Abnár*; *Aner*), one of three Hebronite chiefs who, as "confederates," aided Abraham in the pursuit after the four invading kings (Gen. xiv. 13, 24). [R. W. B.] [F.]

ANETHO'THITE, THE (אֲנֶתוֹתִיתַי; the Gk. text has the name twice, (a) B. δ' Ἀνωθετῆς, A. Ἀνωθετῆς; (b) B. τοῦ Ἀνωθετου, A. τοῦ Ἀνωθετου; de *Anathoth*). An appellative of Abiexer, an inhabitant of Anathoth of the tribe of Benjamin (2 Sam. xxiii. 27). Called also ANETHO'THITE and ANTOTHITE. [W. A. W.] [F.]

ANETO'THITE, THE (אֲנֶתוֹתִיתַי, same as ANETHO'THITE, 1 Ch. xxvii. 12; B. ζ' Ἀνωθετῆ, A. δ' Ἀ.; *Anathothites*). Called also ANTOTHITE. [W. A. W.] [F.]

ANGELS (אַנְגֵּלִים; of ἄγγελοι; often with the addition of מַלְאָכִים, or מַלְאָכִים. In some Books [Job v. 1; Ps. lxxxix. 6, 8; Dan. iv. 13, viii. 13] the word מַלְאָכִים, of ἄγγελοι, is used as an equivalent term). By the word "Angels" (i.e. "messengers" of God) we ordinarily understand a race of spiritual beings, of a nature exalted far

above that of man, although infinitely removed from that of God, whose office is "to do Him service in heaven, and by His appointment to succour and defend men on earth." The object of the present article is threefold: 1st, to refer to any other Scriptural uses of this and similar words; 2ndly, to notice the revelations of the nature of these spiritual beings given in Scripture; and 3rdly, to derive from the same source, a brief description of their office towards man. It is to be noticed that its scope is purely Biblical, and that, in consequence, it does not enter into any extra-scriptural speculations on this mysterious subject.

I. In the first place, there are many passages in which the expression the "Angel of God," "the Angel of Jehovah," is certainly used for a manifestation of God Himself. This is especially the case in the earlier Books of the Old Testament, and may be seen at once, by a comparison of Gen. xxii. 11 with v. 12, and of Ex. iii. 2 with v. 6, 14; where He, Who is called the "Angel of God" in one verse, is called "God" and even "Jehovah" in those which follow, and accepts the worship due to God alone. Contrast Ber. xix. 10, xxi. 9. See also Gen. xvi. 7, 13, xxi. 11, 13, xlviii. 15, 16; Num. xxii. 22, 32, 35, and comp. Is. lxiii. 9 with Ex. xxxiii. 14, &c. The same mode of expression is used by St. Paul (see Acts xvii. 23 as compared with xiii. 11).

It is to be observed also, that, side by side with these expressions, we read of God being manifested in the form of *man*; as to Abraham at Mamre (Gen. xviii. 2, 22; cp. xix. 1), to Jacob at Peniel (Gen. xxxii. 24, 30), to Joshua at Gilgal (Josh. v. 13, 15), &c. It is hardly to be doubted, that both sets of passages refer to the same kind of manifestation of the Divine Presence.

This being the case, since we know that "no man hath seen God" (the Father) "at any time," and that "the only-begotten Son, Which is in the bosom of the Father, hath revealed Him" (John i. 18), the inevitable inference is that by the "Angel of the Lord" in such passages is meant He Who is from the beginning the "Word," i.e. the Manifestor or Revealer of God. These manifestations are evidently "foreshadowings of the Incarnation." By these (that is) God the Son manifested Himself from time to time in that human nature, which He united to the Godhead for ever in the Virgin's womb.

This conclusion is corroborated by the fact, that the phrases used as equivalent to the word "Angels" in Scripture, viz. the "sons of God"

(בְּנֵי־הָאֱלֹהִים, Job ii. 1, xxxviii. 7; Dan. iii. 25), or even in poetry, the "gods" (Elohim), the "holy ones," &c., are names which in their full and proper sense are applicable only to the Lord Jesus Christ. As He is "the Son of God," so also is He the "Angel," or "messenger" of the Lord. Accordingly it is to His Incarnation that all angelic ministrations are distinctly referred, as to a central truth, by which alone its nature and meaning can be understood. See John i. 51, comparing it with Gen. xviii. 11-17, and especially with v. 13.

Besides this, which is the highest application of the word "Angel," we find the phrase used of any messengers of God, such as the Prophets (Is. xlii. 19; Hag. i. 13; Mal. iii. 1), the priests

(Nal. ii. 7), and the rulers of the Christian Churches (Rev. i. 20); much as, even more remarkably, the word "Elohim" is applied, in Ps. lxxiii. 6, to those who judge in God's Name.

These usages of the word are not only interesting in themselves, but will serve to throw light on the nature and the method of the ministrations of those whom we more especially term "the Angels."

II. In passing on to consider what is revealed in Scripture as to the angelic nature, we are led at once to notice, that the Bible deals with this and with kindred subjects exclusively in their practical bearings, only so far (that is) as they conduce to our knowledge of God and of ourselves, and more particularly as they are connected with the one great subject of all Scripture, the Incarnation of the Son of God. Little therefore is said of the nature of Angels as distinct from their office.

They are termed "spirits" (as e.g. in Heb. i. 14), although this word is applied more commonly, not so much to themselves, as to their power dwelling in man (e.g. 1 Sam. xviii. 10; Matt. viii. 16, &c.). The word is the same as that used of the soul of man, when separate from the body (e.g. Matt. xiv. 26; Luke xxiv. 37, 39; 1 Pet. iii. 19); but, since it properly expresses only that supersensuous and rational element of man's nature, which is in him the image of God (see John iv. 24), and by which he has communion with God (Rom. viii. 16); and since also we are told that there is a "spiritual body" as well as a "natural (*ψυχικόν*) body" (1 Cor. xv. 44), it does not assert that the angelic nature is incorporeal. The contrary seems expressly implied by the words in which our Lord declares that, after the Resurrection, men shall be "like the Angels" (*ὡς ἄγγελοι*, Luke xx. 36); because (as is elsewhere said, Phil. iii. 21) their bodies, as well as their spirits, shall have been made entirely like His. It may also be noticed that the glorious appearance ascribed to the Angels in Scripture (as in Dan. x. 6) is the same as that which shone out in our Lord's Transfiguration, and in which St. John saw Him clothed in heaven (Rev. i. 14-16); and moreover, that, whenever Angels have been made manifest to man, it has always been in human form (as e.g. in Gen. xviii. xix.; Luke xxiv. 4; Acts i. 10, &c.). The very fact that the titles "sons of God" (Job i. 6, xxxviii. 7; Dan. iii. 25 compared with v. 22*) and "gods" (Ps. viii. 5; Ps. lxxv. 7), applied to them, are also given to men (see Luke iii. 38; Ps. lxxii. 6, and cp. our Lord's application of this last passage in John x. 34-37), points in the same way to a difference only of degree, and an identity of kind, between the human and the angelic nature.

The Angels are therefore revealed to us as beings, such as man might be and will be when the power of sin and death is removed, partaking in their measure of the attributes of God, Truth, Purity, and Love, because always beholding His face (Matt. xviii. 10), and therefore being "made like Him" (1 John iii. 2). This, of course, implies finiteness, and therefore

(in the strict sense) "imperfection" of nature and constant progress, both moral and intellectual, through all eternity. Such imperfection, contrasted with the infinity of God, is expressly ascribed to them in Job iv. 18; Matt. xxiv. 36; 1 Pet. i. 12: and it is this which emphatically points them out to us as creatures, fellow-servants of man, and therefore incapable of usurping the place of gods.

This finiteness of nature implies capacity of temptation (see Butler's *Anal.* Part i. c. 5); and accordingly we hear of "fallen angels." Of the nature of their temptation and the circumstances of their fall, we know absolutely nothing. All that is certain, is that they "left their first estate" (*ῥῆν ταύτων ἀρχήν*): and that they are now "angels of the devil" (Matt. xxv. 41; Rev. xii. 7, 9), partaking therefore of the falsehood, uncleanness, and hatred, which are his peculiar characteristics (John viii. 44). All that can be conjectured must be based on the analogy of man's own temptation and fall.

On the other hand, the title especially assigned to the Angels of God, that of the "holy ones" (see e.g. Dan. iv. 13, 23, viii. 13; Matt. xxv. 31), is precisely that which is given to those men who are renewed in Christ's image, but which belongs to them in actuality and in perfection only hereafter (cp. Heb. ii. 10, v. 9, xii. 23). Its use evidently implies that the angelic probation is over, and their crown of glory won.

Thus much then is revealed of the angelic nature, as may make it to us an ideal of human goodness (Matt. vi. 10), or a beacon of warning as to the tendency of sin. It is obvious to remark that in such revelation is found a partial satisfaction of that craving for the knowledge of creatures, higher than ourselves and yet fellow-servants with us of God, which in its diseased form becomes Polytheism.^b Its full satisfaction is to be sought in the Incarnation alone; and it is to be noticed, that after the Revelation of God in the flesh, the angelic ministrations recorded are indeed fewer, but the references to the Angels are far more frequent—as though the danger of Polytheistic idolatry had, comparatively speaking, passed away.

III. The most important subject, and that on which we have the fullest revelation, is the office of the Angels.

Of their office in heaven, we have, of course, only vague prophetic glimpses (as in 1 K. xxii. 19; Is. vi. 1-3; Dan. vii. 9, 10; Rev. vi. 11, &c.), which show us nothing but a never-ceasing adoration, proceeding from the vision of God, through the "perfect love which casteth out fear."

Their office towards man is far more fully described to us. They are represented as being, in the widest sense, agents of God's Providence, natural and supernatural, to the body and to the soul. Thus the operations of nature are spoken of, as under angelic guidance fulfilling

* Gen. vi. 2 is omitted here and below, as being a controverted passage; although many MSS. of the LXX. have in ἄγγελοι instead of οἱ υἱοὶ ἡρώδου.

^b The inordinate subjectivity of German philosophy on this subject (see, e.g., Winer's *Realw.*), of course, hastens to the conclusion that the belief in Angels is a mere consequence of this craving, never (it would seem) so entering into the analogy of God's Providence as to suppose it possible that this inward craving should correspond to some outward reality.

the Will of God. Not only is this the case in poetical passages, such as Pa. civ. 4 (commented upon in Heb. i. 7), where the powers of air and fire are referred to them, but in the simplest prose history, as where the pestilences which slew the firstborn (Ex. xii. 23; Heb. xi. 28), the disobedient people in the wilderness (1 Cor. x. 10), the Israelites in the days of David (2 Sam. xxiv. 16; 1 Ch. xxi. 16), and the army of Sennacherib (2 K. xix. 35), as also the plague which cut off Herod (Acts xii. 23), are plainly spoken of as the work of the "Angel of the Lord." Nor can the mysterious declarations of the Apocalypse, by far the most numerous of all, be resolved by honest interpretation into mere poetical imagery (see especially Rev. viii. and ix.). It is evident that angelic agency, like that of man, does not exclude the action of secondary, or (what are called) "natural" causes, or interfere with the directness and universality of the Providence of God. The personifications of poetry and legends of mythology are obscure witnesses of its truth, which, however, can rest only on the revelations of Scripture itself.

More particularly, however, Angels are spoken of as ministers of what is commonly called the "supernatural," or perhaps, more correctly, the "spiritual" Providence of God; as agents in the great scheme of the spiritual redemption and sanctification of man, of which the Bible is the record. The representations of them are different in different Books of Scripture, in the Old Testament and in the New; but the reasons of the differences are to be found in the differences of scope attributable to the Books themselves. As different parts of God's Providence are brought out, so also arise different views of His angelic ministers.

In the Book of Job, which deals with "Natural Religion," they are spoken of but vaguely, as surrounding God's throne above, and rejoicing in the completion of His creative work (Job i. 6; ii. 1; xxxviii. 7). No direct and visible appearance to man is even hinted at.

In the Book of Genesis, there is no notice of angelic appearance till after the call of Abraham. Then, as the Book is the history of the *chosen family*, so the Angels mingle with and watch over its family life, entertained by Abraham and by Lot (Gen. xviii., xix.), guiding Abraham's servant to Padan-aram (xxiv. 7, 40), seen by the fugitive Jacob at Bethel (xxviii. 12), and welcoming his return at Mahanaim (xxxii. 1). Their ministry hallows domestic life, in its trials and its blessings alike, and is closer, more familiar, and less awful than in after-times (contrast Gen. xviii. with Judg. vi. 21, 22; xiii. 16, 22).

In the subsequent history, that of a *chosen nation*, the Angels are represented more as ministers of wrath and mercy, messengers of a King, rather than common children of the One Father. It is, moreover, to be observed, that the records of their appearance belong especially to two periods, that of the Judges and that of the Captivity, which were transition periods in Israelitish history, the former one destitute of direct revelation or prophetic guidance, the latter one of special trial and unusual contact with heathenism. During the lives of Moses and Joshua there is no record of the appearance of created Angels, and only obscure reference to

Angels at all. In the Book of Judges Angels appear at once to rebuke idolatry (ii. 1-4), to call Gideon (vi. 11, &c.), and consecrate Samson (xiii. 3, &c.) to the work of deliverance.

The prophetic office begins with Samuel, and immediately angelic guidance is withheld, except when needed by the prophets themselves (1 K. xix. 5; 2 K. vi. 17). During the prophetic and kingly period, Angels are spoken of only (as noticed above) as ministers of God in the operations of nature. But in the Captivity, when the Jews were in the presence of foreign nations, each claiming its tutelary deity, then to the Prophets Daniel and Zechariah, Angels are revealed in a fresh light, as watching, not only over Jerusalem, but also over heathen kingdoms, under the Providence, and to work out the designs, of the Lord (see Zech. *passim*, and Dan. iv. 13, 23; x. 13, 20, 21, &c.). In the whole period, they, as truly as the Prophets and kings themselves, are seen as God's ministers, watching over the *national life* of the subjects of the Great King.

The Incarnation marks a new epoch of angelic ministration. "The Angel of Jehovah," the Lord of all created Angels, having now descended from heaven to earth, it was natural that His servants should continue to do Him service there. Whether to predict and glorify His birth itself (Matt. i. 20; Luke i. ii.), to minister to Him after His temptation and agony (Matt. iv. 11; Luke xxii. 43), or to declare His Resurrection and triumphant Ascension (Matt. xxviii. 2; John xx. 12; Acts i. 10, 11)—they seem now to be indeed "ascending and descending on the Son of Man," almost as though transferring to earth the ministrations of heaven. It is clearly seen, that whatever was done by them for men in earlier days, was but typical of and flowing from their service to Him (see Pa. xci. 11; cp. Matt. iv. 6).

The New Testament is the history of the *Church of Christ*, every member of which is united to Him. Accordingly, the Angels are revealed now, as "ministering spirits" to each *individual* member of Christ for his spiritual guidance and aid (Heb. i. 14). The records of their visible appearance are but infrequent (Acts v. 19; viii. 26; x. 3; xii. 7; xxvii. 23): but their presence and their aid are referred to familiarly, almost as things of course, ever after the Incarnation. They are spoken of as watching over Christ's little ones* (Matt. xviii. 10), as rejoicing over a penitent sinner (Luke xv. 10), as present in the worship of Christians (1 Cor. xi. 10)^a and (perhaps) bringing their prayers before God (Rev. viii. 3, 4), and as bearing the souls of the redeemed into Paradise (Luke xii. 22). In one word they are Christ's ministers of grace now, as they shall be of judgment hereafter (Matt. xiii. 39, 41, 49; xvi. 27; xiv. 31, &c.). By what method they act we cannot know of ourselves, nor are we told, perhaps lest

* The notion of special guardian Angels, watching over individuals, is consistent with this passage, but not necessarily deduced from it. The belief of it among the early Christians is shown by Acts xii. 15.

^a The difficulty of the passage has led to its being questioned, but the wording of the original and the usage of the N. T. seem almost decisive on the point. See *Speaker's Comm.* in loco.

we should worship them, instead of Him, Whose servants they are (see Col. ii. 18; Rev. xxii. 9); but of course their agency, like that of human ministers, depends for its efficacy on the aid of the Holy Spirit.

Such is the action of God's Angels on earth, as disclosed to us in the various stages of Revelation; that of the evil angels may be better spoken of elsewhere [SATAN]: here it is enough to say that it is the direct opposite of their true original office, but permitted under God's overruling Providence to go on until the judgment day.

That there are degrees of the angelic nature, fallen and unfallen, and special titles and agencies belonging to each, is clearly declared by St. Paul (Eph. i. 21; Rom. viii. 38); but what their general nature is, it is needless for us to know, and therefore useless to speculate. For what little is known of this special nature see CHERUBIM, SERAPHIM, MICHAEL, GABRIEL. [A. B.]

On the subject generally consult Oehler, *Theology of the Old Testament* (index, s. n.); Scholtz, *A. T. Theologie* (index, s. n.); Cremer, *Bibl. theol. Wörterbuch d. N. T. Gräciat*, s. v. ἄγγελος (N. T. usage); Everling, *Die Paulinische Angelologie u. Dämonologie*; article "Angel" in *Dict. of Christian Antiq.*, *Dict. of Christian Biography*, and in *Kitto's Cyclopædia*; "Engel" in *Bissh's HWB.* (Delitzsch), Herzog, *RE.* (Kübel), *Hamburger, RE.*, Weber, *System der altkyriagalen Palästinischen Theologie* (index, s. n.). The last two writers give also the Rabbinic opinions; Wetzler u. Welte's *Kirch. Lex.* (which gives the R. C. teaching); Martensen, *Christian Dogmatics*, §§ 68-71 (Clark's For. Theol. Lib.); and the Excursus on *Angelology* in the *Speaker's Commentary* on Tobit, p. 171, &c. (which brings together the development of this subject in the O. T., the Apocrypha, pseud-epigraphic writings, later Jewish writings, and Assyrian documents). Consult also the list of works in *D. B.*, Amer. edit. [F.]

ANGLING. [FISHING.]

AN'AM (אָנאַם), Ges. = *lamentation of the people*; A. אָנאַם, B. אָנאַם; *Aniam*, name of a Manasseite, and son of Shemidah (1 Ch. vii. 19). [F.]

AN'IM (אָנִים), perhaps *springs or fountains* = אָנִים; A. אָנִים, B. אָנִים; *Anim*, a city in the mountains of Judah, named with Eshtemoth (עֶשְׁתִּמּוֹת) and Goshen (Josh. xv. 50). Arabians and Jerome (*OS.* pp. 129. 18, 240. 19, אָנִים, *Anim*) mention a place of this name in Daroma, nine miles south of Hebron (cp. also *Anab*, s. v. *Anab*). It is now possibly *Ghuwein*, about eleven miles south of Hebron and not far from עֶשְׁתִּמּוֹת (Knobel; *P. F. Mem.* iii. 403; Wilson, *Lands of the Bible*, i. 354). [G.] [W.]

ANISE [3 syll.] (ἀνιθος; *anethum*). This word occurs only in Matt. xxiii. 23, "Woe unto you, scribes and Pharisees, hypocrites! for ye pay tithe of mint and anise and cummin." ἀνιθος would probably be translated "dill" (*Anethum graveolens*); so R. V. margin—a common garden herb of the order *Umbelliferae*, which is found both wild and cultivated in Palestine. Another

claimant is the *Anise* (*Pimpinella anisum*), belonging to the same order, and also found in the country wild, though not so generally cultivated. They are inconspicuous plants, resembling the caraway, and are much alike in external character; the seeds of both, moreover, are and have been long employed in medicine and cookery, as condiments and carminatives. Celsius (*Hierob.* i. 494 sq.) quotes several passages from ancient writers to show that the dill was commonly so used. Pliny uses the term *anisum* to express the *Pimpinella anisum*, and *anethum* to represent the common dill; he enumerates as many as sixty-one diseases that the *anisum* is able to

Pimpinella anisum.

cure, and says that on this account it is sometimes called *anicetum*.^b The best anise, he adds, comes from Crete; and next to it that of Egypt is preferred (Plin. *H. N.* xx. 17). Forskål (*Descript. Plant.* 154) includes the anise (*Janisum*, Arabic) in the *Materia Medica* of Egypt. Dr. Royle is decidedly in favour of the dill^d being the proper translation, and says that the *anethum*^e is more especially a genus of Eastern cultivation than the other plant. The strongest argument in favour of the dill is the fact that the Talmud (*Tract Massroth*, c. iv.

^b From ἀν, *not*, and νικᾶν, *to conquer*. It should be noted that Dioscorides uses ἀνιθρον, for dill, and not anise.

^c انيسون, *anisum*, v. *Gol. Arab. Lex.* s. v.

^d *Dill*, so called from the old Norse word, the nurse's lullaby, *to dill* = *to soothe*. Hence the name of the carminative plant, the *dilling* or *soothing herb* (see Wedg. *Dict. Engl. Etymol.*).

^e ἀνιθος: according to an absurd etymology, ἀνὰ τὸ ἀνωθεῖν, διὰ τὴν ἐν τῷ ἀνιθῷ αὐξησιν (*Etym. Mag.* ed. Galsford).

^a Though this would normally be אָנִים.

§ 5) uses the word *shabbath* to express the dill, "The seeds, the leaves, and the stem of dill are, according to Rabbi Eliezer, subject to tithe;" and in connexion with this it should be

Common Dill (*Anethum graveolens*).

stated, that Forskål several times allude to the *Anethum graveolens* as growing both in a cultivated and a wild state in Egypt, and he uses the Arabic name for this plant, which is identical with the Hebrew word, viz. *Sjoebet*, or *Schibot* (*Descr. Plant.* 65, 109).

Celsius remarks upon the difference of opinion amongst the old authors who have noticed this plant, some maintaining that it has an agreeable taste and odour, others quite the opposite; the solution of the difficulty is clearly that the matter is simply one of opinion.

There is another plant very dissimilar in external character to the two named above, the leaves and capsules of which are powerfully carminative. This is the *aniseed-tree* (*Illicium anisatum*), which belongs to the natural order *Magnoliaceae*. In China this is frequently used for seasoning dishes, &c.; but the species of this genus are not natives of the Bible lands, and must not be confused with the Umbelliferous plants noticed in this article. [W. H.] [H. B. T.]

ANKLET (περίσκελιδες, πέδαι περιφόροι, Clem. Alex.). This word only occurs in Is. iii. 18, מְרִנִּים, A. V. "tinkling ornaments," R. V. "anklets" (and as a proper name, Josh. xiii. 16); unless such ornaments are included in מְרִנִּים, Num. xxxi. 50, which word etymologically would mean rather an anklet than a bracelet. Indeed, the same word is used in Is. iii. 20 (without the Aleph prosthetic) for the "stepping-chains worn by Oriental women, fastened to the ankle-band of each leg, so that they were forced to walk elegantly with short steps" (Gesen. s. c.). They were as common as bracelets and armlets, and made of much the same materials; the pleasant jingling and tinkling which they made as they knocked against each other, was no doubt one of the

reasons why they were admired (Is. iii. 16, 18, "the bravery of their tinkling ornaments"). To increase this pleasant sound pebbles were sometimes enclosed in them (Calmet, s. v. *Periscelis* and *Bells*). The Arabic name "khalkhál" seems to be onomatopoean, and Lane (*Mod. Egypt.* App. A) quotes from a song, in allusion to the pleasure caused by their sound, "the ringing of these anklets has deprived me of reason." Hence Mohammed forbade them in public: "Let them not make a noise with their feet, that their ornaments which they hide may [thereby] be discovered" (*Koran*, xxiv. 31, quoted by Lane). No doubt Tertullian discounts them for similar reasons: "Nescio an crus de periscelio in nervum se patiatur arctari. . . . Pedes domi figite et plus quam in auro placebunt" (*de cult. fem.* ii. 13). Clemens Alexandrinus further objects to anklets because amatory inscriptions, &c. were sometimes engraved on them (*Paed.* ii. 11).

They were sometimes of great value. Lane speaks of them (although they are getting uncommon) as "made of solid gold or silver" (*Mod. Egypt.* l. c.); but he says that the poorer village children wear them of iron. For their use among the ancient Egyptians, see Wilkinson, i. 339 (1878); and among the ancient Greeks and Romans, Plin. *H. N.* xxxiii. 12, *Dict. of G. and Rom. Ant. art. Periscelis*. They do not, we believe, occur in the Nineveh sculptures.

Modern Egyptian anklets—one-fourth of the real size. (Lane, *Mod. Egypt.*)

Livingstone writes of the favourite wife of an African chief, "She wore a profusion of iron rings on her ankles, to which were attached little pieces of sheet iron to enable her to make a tinkling as she walked in her mincing African style" (p. 273). On the weight and inconvenience of the copper rings worn by the chiefs themselves, and the odd walk it causes them to adopt, see *id.* p. 276.

Consult Ges. *Thesaur.* s. v. מְרִנִּים; Schröder, *Zeits.* p. 127; Rosenmüller, *Das alte u. h. Morgenl.* iv. 212; *id.* *Scholia in Iesaiam*, iii. 16; Bynæus, *de Calceis Hebraeorum*, i. c. viii. [F. W. F.]

AN'NA (אֲנָנָה, *grace*; 'Arva; Anna). The name occurs in Punic as the sister of Dido. 1. The mother of Samuel (1 K. i. 2 sq.). [HAXNAH.] 2. The wife of Tobit (Tob. i. 9 sq.). 3. The wife of Raguel (Tob. vii. 2 sq.; מִלְכָּה, Heb. and Chald. [ed. Neubauer]; 'Edna; Itala, Anna). 4. A "prophetess" in Jerusalem at the time of our Lord's birth (Luke ii. 36). [B. F. W.]

ANNAAS (A. *Σανδας*, B. *Σανδ*; *Anaas*), 1 Esd. v. 23. [SENAAH.]

ANNAAS. 1. *Ἀννας* or *Ἀννας*, shortened form of the fuller *Ἀναβας* employed by Josephus; Heb. *אָנָן*, *merciful*, same name as HANAN. He was the son of Seth, and was appointed high-priest by Quirinius (CYRENIUS), A.D. 6 (Joseph. *Ant.* xviii. 2, 1). He was displaced by Valerius Gratus at the beginning of the reign of Tiberius, about A.D. 15, and Ismael, son of Phabi, was appointed in his stead (Joseph. *Ant.* xviii. 2, 1). During this period the Romans appointed and removed the high-priests, either directly as was done by Quirinius and Gratus, or by delegation of their power to a native prince. Annaas was considered "very fortunate" in that he had five sons, all of whom filled the high-priestly office (Joseph. *Ant.* xx. 9, 1). They were (1) Eleazar, A.D. 16-17; (2) Jonathan, A.D. 36-37; (3) Theophilus, A.D. 37; (4) Matthias, three or four years later; and lastly, (5) Ananias, A.D. 62, who only retained office for three months. The office was also held by his son-in-law, Joseph Caiaphas, A.D. 18-36 (John xviii. 13). The notices of Annaas in the New Testament by (1) St. Luke, (2) St. John, present some difficulty. (1) St. Luke (Luke iii. 2, and Acts iv. 6) gives him the title of high-priest (*ἀρχιερεως*) at periods both of which fall after his removal from office; and in the earlier passage the year is dated as that of his high-priesthood in conjunction with Caiaphas, though the illogical form of expression (*ἐν ἀρχιερεως Ἀννα καὶ Καϊάφα*) is such as to give the notion that there were two conflicting ideas in the writer's mind; namely, one actual officiating high-priest, and two men exercising conjointly the influence of the office. (2) St. John, though not quite certainly describing Annaas as high-priest (John xviii. 15, 19), yet assigns to him the first examination of Christ after His arrest (John xviii. 13). On the place and division of the examinations, see Westcott's *Commentary*, ad loc.; and for another view, Edersheim's *Life and Times of the Messiah*, Bk. V. xiii.). The part assigned by St. John to Annaas is held by objectors (Keim, *Jesus of Nazara*) to be inconsistent with the historical fact of the high-priesthood of Caiaphas, and with the narratives of the Synoptists which omit Annaas entirely. The difficulties arising from St. Luke (the title of high-priest) and from St. John (the part taken by Annaas) will be best treated separately. (1) The title *ἀρχιερεως*—only once (Lev. iv. 3) in LXX., excluding the Apocrypha—is ambiguous in Josephus. It may mean the acting high-priest, or it may mean one of that body collectively called "the chief priests" (*οἱ ἀρχιερεως*) both in Josephus and the N. T. *passim* (but see especially Mark xiv. 53, where sing. and plur. occur in the same verse). It was a large body (*πολλοὺς τῶν ἀρχιερεων*, Joseph. *Vit.* 38), and rank was probably taken in it by age (*B. J.* iv. 4, 3). Thus Josephus mentions together as "high-priests,"

or rather "chief priests," one who had filled the office (Jonathan), and was then an influential member of "the chief priests," and Ananias, the high-priest actually in office at the time (*τοὺς ἀρχιερεως ἰωνῶν καὶ Ἀνανίαν*, *B. J.* ii. 12, 6). He assigns the first place not to the actual high-priest, but to the (probably) elder man. We have here an exact parallel to "Anas and Caiaphas" (Luke iii. 2). Another probable instance occurs (Joseph. *Vit.* 38). Annaas is called chief priest (*ἀρχιερεως*) as one of the chief priests (*ἀρχιερεως*), and not simply as a past high-priest, though that alone would be sufficient explanation. The qualifications for being reckoned one of the *ἀρχιερεως* cannot be discussed here, but see Schürer, *Neutest. Zeitgeschichte*, pp. 420-3; id. *Gesch. d. Jüdischen Volkes*,² ii. pp. 166-174. (2) The part taken by Annaas (John xviii.) in the trial of Christ was due to his dominant influence in the aristocratic (Jos. *Ant.* xx. 10) Jewish constitution. This influence was not given him by the advancement of his sons as described above, but was the cause of their advancement. Schürer instances three other past high-priests who continued after their removal to exercise an influence like that of Annaas; namely, Jonathan, Ananias, and Ananus (see his ref. to Josephus). Hence there is no occasion with Wieseler (Herzog, *RE*,² s. v. Annaas) to contend for a president of the Sanhedrin other than the high-priest, to assign this office to Annaas, and to base on this his claim to the title of *ἀρχιερεως*, and to the first examination of Christ.

On the booths of the sons of Annaas, their situation, and their identification with the Temple Market, see Edersheim, *Life and Times of the Messiah*, Bk. III. v. On the general question, see Schürer, *Neutest. Zeitgeschichte*, § 23, whose view has on the whole been adopted above, and comp. art. CAIAPHAS. See for Wieseler's view art. Annaas in Herzog, *RE*,² [E. R. B.] 2. B. *Ἀννῶν*, *Ἀννῶν*; *Annas*. In the parallel lists called HARIM (1 Esd. ix. 32; cp. Ezra x. 31).

ANNU'US (B. [v. 47] omits, A. *Ἀννονους*; *Amin* [v. 49], 1 Esd. viii. 48). Probably a misreading of *יְהוֹנָן* (A.V. "with him") in Ezra viii. 19. The translator may have read *יְהוֹנָן*.

[W. A. W.] [F.]

ANOINT (*משח*, or *חָנַךְ*; *χρίω*, *ἀλείφω*; *ungo*). Of the two Hebrew words the former is used chiefly, though not exclusively (e.g. Amos vi. 6), of religious or official anointings, whereas the latter appears to be confined to the ordinary anointing of the body. The LXX. use *χρίω* and *ἀλείφω* as the rendering of both Hebrew words, though they more frequently render *משח* by *χρίω* and *חָנַךְ* by *ἀλείφω*. In the N. T. *χρίω* and its derivatives (*χρίσμα*, *χριστός*) are used exclusively in a metaphorical or spiritual sense, *ἀλείφω* being reserved for material unction. Once (Mark xiv. 8) *μυρίω* is used. In Ps. xxiii. 5, "Thou anointest my head with oil," the Hebrew is *חָנַךְ*, "Thou hast made fat;" LXX., *ἐλάτυνας*; Vulg., *impinguasti*. In Ps. xcii. 10

(Heb. v. 11) it is *יָחַךְ*, lit. "I am drenched" (Kay: R. V. "anointed"; the word being elsewhere rendered "mingled" (Lev. ii. 4, 5; Num. vii. 13, 19).

The word "anoint" is used in Holy Scripture,

* The frequent changes may have been partly due to the fact that the office involved the practice of austerities which rich and aristocratic persons did not care to undertake for more than a year (see Derenbourg, *Essai sur l'Histoire et la Géographie de la Palestine*, xiii. p. 215, note).

I. Of a personal and social custom; II. Of a religious or inaugural rite; and III. In a metaphorical or spiritual sense.

1. *A personal and social custom.*—Amongst the Jews, as amongst other ancient nations, the practice of anointing the body by rubbing in oil or other unguents prevailed commonly (Deut. xxviii. 40; Ruth iii. 3; Mic. vi. 15). Such anointing appears to have been regarded, not only as contributing to health and comfort, and invigorating the body (comp. the use of oil in the gymnasium by the Greeks, Thucyd. i. 6; and the names *ὁ ἀλείπτης*, the trainer, *οἱ ἀλειφόμενοι*, the gymnasts), but as conducing to personal comeliness: "to make the face to shine with oil" (Ps. civ. 15. Cp. Prov. xxvii. 9).

1. *Festal.*—Hence the practice came to have a festal character, and to take its place among the rites of hospitality. With the Egyptians, though "it is probable that like the Greeks they anointed themselves before they left home, yet still it was customary for a servant to attend every guest, as he seated himself, and to anoint his head; and this was one of the principal tokens of welcome" (Wilkinson, *Ancient Egyptians*, i. 77, 78 [1878], who adds that the ointment was "sweet-scented," and "was contained sometimes in an alabaster, sometimes in an elegant porcelain vase"). In like manner with the Jews, anointing the head with oil or ointment was a mark of respect and welcome paid by a host to his guests (Ps. xxiii. 5; Matt. xxvi. 7; John xi. 2, xii. 3). The designed omission of this customary attention by the Pharisee, whose guest He was, is noticed by our Lord (Luke vii. 46). From this festal and luxurious usage, to be anointed with oil came to signify metaphorically to be in the enjoyment of success or prosperity (Ps. xcii. 10 [Heb. v. 11]. Cp. Eccles. ix. 8; Wisd. ii. 7). On the other hand, the festal character of anointing is shown by the discontinuance of it being looked upon as a sign of mourning (2 Sam. xii. 20, xiv. 2; Dan. x. 3; Matt. vi. 17).

2. *Funereal.*—The use of anointing as a mark of honour and respect, together with the desire to preserve the body from corruption, led to the practice of anointing a corpse with ointment, as well as to strewing with spices the folds of linen in which the limbs were wound. Both these processes are spoken of as "anointing" in connexion with the burial of our Lord. When the woman poured the precious ointment upon His head, He said, "In that she poured this ointment upon My body, she did it to prepare Me for burial" (Matt. xxvi. 12, R.V.). Of the holy women who came to the sepulchre we read that they "prepared spices and ointments" (Luke xxiii. 56), and that they "bought spices that they might come and anoint Him" (Mark xvi. 1).

3. *Medicinal.*—The beneficial effect of anointing with oil or ointment was not restricted to the body in health. Oil was universally believed to have curative properties in disease or sickness [ORL]. And the Jews did not differ from other nations in this particular. Thus Isaiah speaks of wounds and sores which have not been "mollified with oil" (i. 6), and the Good Samaritan pours "oil and wine" (the approved remedies of both Greek and Roman physicians) into the wounds of him who had

fallen among robbers (Luke x. 34). There was consequently a certain appropriateness, though we cannot suppose that there was any virtue, inasmuch as the cure was entirely supernatural, in the symbol chosen by our Lord and His Apostles, when they anointed the blind with clay (John ix. 6, 11), or the sick with oil (Mark vi. 13), and by St. James in his well-known direction to the elders of the Church (v. 14).

4. *Anointing the shield.*—Before going into battle it was customary to rub oil or grease into the leather or hide which was stretched over the framework of the shield, in order to make it supple, and that the strokes which fell upon it might the more readily glide off. If the shield were of metal, it was anointed to cleanse and furbish it. Cp. Virg. *Aen.* vii. 626, 627:

"Pars leves clypeos et spicula lucida tergunt
Arvina pingui."

To this custom Isaiah refers, in describing the sudden call to arms, in the midst of feasting, when Babylon was taken: "Rise up, ye princes, anoint the shield" (xli. 5; LXX. *ἐροῦσθε θυρεούς*; Vulg., *arripite clypeum*). Another allusion to it is to be found in 2 Sam. i. 21, where the words "not anointed with oil" are taken by modern commentators to refer not to Saul but to his shield, which was "cast away, not anointed with oil" [so R. V.], i.e. left stained and polluted with the blood of its owner (cp. *Speaker's Comm.* or Keil), no longer polished and ready to be worn, but lying neglected upon the mountains.

II. *Religious or inaugural.*—The earliest example in the Bible of consecration by anointing is when Jacob, awaking from his dream at Bethel, "took the stone that he had put for his pillows, and set it up for a pillar, and poured oil upon the top of it" (Gen. xxviii. 18. Cp. xxxv. 14). "In all ages of primitive history, such monuments are, if we may so call them, the earliest ecclesiastical edifices. In Greece there were rude stones at Delphi, still visible in the second century, anterior to any temple, and, like the rock of Bethel, anointed (Paus. vii. 22; x. 24) with oil by the pilgrims who came thither. In Northern Africa, Arnobius, after his conversion, describes the kind of fascination which had drawn him towards one of those aged stones, streaming and shining with the sacred oil which had been poured upon it" (Arnobius *adv. Gent.* i. 39. Cp. Stanley, *Jewish Church*, i. 60). At the introduction of the Mosiac economy, the Tabernacle and all its furniture were dedicated to the service of Almighty God by being anointed with an "oil of holy ointment," for the composition of which special directions were given (Exod. xxx. 22-29), and the employment of which for any secular purpose was to be visited with the penalty of death (vv. 31-33). No mention is made of any such anointing in the case either of the first or second Temple: but as the "anointing oil" was reckoned a part of the standing furniture of the Tabernacle (Exod. xxxix. 38), and was given perpetually in charge to the high-priest; and as moreover it was in the Tabernacle in the time of Solomon (1 K. i. 39), and was "made" by "some of the sons of the priests" (1 Ch. ix. 30) after the Captivity, it would seem probable that the ceremony was not omitted. It is, however, in the official consecration of persons that the act of

anointing attains its highest significance in the O. T. Anointing with oil was a rite of inauguration into each of the three typical offices of the Jewish Commonwealth. As anointed, the tenants of those offices were types of the Anointed One (ἁγιάζω, χριστός).

1. *Priests*.—The holy oil, which was specially compounded and used for the dedication of the Tabernacle and its furniture, was also employed in the consecration of Aaron and his sons to the priesthood (Exod. xxx. 30). At the first institution of the office, all the priests were in some sense anointed (Exod. xxviii. 41, xl. 15; Num. iii. 3), though, according to the best Hebrew authorities, the high-priest alone had the oil poured on his head (see Lev. iv. 3); and his sons were only anointed with the oil applied by the finger on the forehead (see Reland, *Antiq.* ii. 1, 3; Selden, *de Success. Pontif.* ii. 2; Keil, p. 56; Wordsworth on Lev. viii. 13). This distinction between the original anointing of Aaron and of his sons appears to be borne out by the narrative in Lev. viii., where the oil is said to have been poured upon the head of Aaron only (v. 12), whereas in the second and different action of sprinkling it upon the person and the garments (v. 30) his sons are included. That each succeeding high-priest was anointed to his office is undoubted (Lev. xvi. 32), but it has been questioned whether, after the first inauguration, the ceremony was repeated in the case of ordinary priests. The title "the priest that is anointed" (הַכֹּהֵן הַמְשֻׁחַ; LXX., ὁ ἀρχιερεύς, ἀρχιεπίσκοπος), by which the high-priest is distinguished (Lev. iv. 3, 5, 16; vi. 22 [Heb. v. 15]), may belong to him either as the sole anointed priest, or (as seems more probable from its being used at a time when we know that the common priests were anointed) in consequence of the additional anointing which we have seen that he received.

2. *Kings*.—We learn from Jotham's parable that the Jews were familiar with the idea of making a king by anointing, before the establishment of their own monarchy (Judg. ix. 8, 15; cp. 1 Sam. ii. 10). Their sojourn in Egypt would have taught them, that in that country, "one of the principal ceremonies connected with the coronation was the anointing of the king, and his receiving the emblems of majesty from the gods." The sculptures represent the gods themselves as anointing the king, but it was no doubt done by the high-priest, clad in his official robe, a leopard skin, who thus conferred upon the king the title of "The anointed of the gods" (cp. "The anointed of Jehovah," 1 Sam. xxiv. 6. Wilkinson, *Anc. Egypt.* i. 275 [1878]). The first king of Israel was anointed to his office by the express command of God (1 Sam. ix. 16; x. 1). On David, his immediate successor, the ceremony was thrice performed: first, privately by

Samuel, before the death of Saul, by way of conferring on him a right to the throne (1 Sam. xvi. 1, 13); again, as king over Judah at Hebron (2 Sam. ii. 4); and finally, as king over the whole nation (2 Sam. v. 3). Whether anointing was practised on the accession of each new king has been doubted. Besides Saul and David, Solomon, Jehu, and Joash (1 K. i. 39; 2 K. ix. 6, xi. 12) are distinctly said to have been anointed. But in these cases it is contended that disputed title to the throne, or change of dynasty, may account for the fact (Jahn, *Archaeol. Bibl.* 223). Even, however, if we admit, in accordance with Jewish tradition, that after the separation into two kingdoms the kings of Israel were not ordinarily anointed, for lack of the sacred oil which was kept in the Temple at Jerusalem, it seems much more probable that the custom still obtained with the kings of Judah. The designation of the king as "The Lord's anointed," which began with the institution of the monarchy (1 Sam. xii. 3, 5, xvi. 6, xxiv. 6, 10; 2 Sam. i. 14, xix. 21), was maintained, as it scarcely would have been if the practice of anointing had been discontinued, even to the time of the Babylonian Captivity (Ps. lxxxix. 38, 51; Lam. iv. 20). Besides Jewish kings, Hazael was to be anointed king over Syria (1 K. xix. 15), i.e. not necessarily by performance of the outward rite, but by the declared will of Jehovah (2 K. viii. 13). Similarly, Cyrus is called the Lord's "anointed," as having been raised by God to the throne for the special purpose of delivering the Jews out of Captivity (Is. xlv. 1).

3. *Prophets*.—To the remaining typical order among the Jews, that of Prophets, admission by anointing is not so clearly defined. Only one instance, that of Elisha, occurs in which it is distinctly spoken of (1 K. xix. 16); and even there the expression may perhaps be used metaphorically. Casting his mantle upon him (v. 19) is the only action which Elijah is stated to have performed, in appointing Elisha to be his successor. Elsewhere the phrase, "Mine anointed," is found in the parallelism of Hebrew poetry, as the equivalent of "My Prophets" (Ps. cv. 15; 1 Ch. xvi. 22. Cp. Gen. xxi. 7).

III. *Metaphorical or spiritual sense*.—A fit emblem in itself of spiritual influences, both by its invigorating and exhilarating effects, and by its gentle and penetrating action, anointing with oil became intimately associated with such influences, through its constant and divinely appointed use, as the symbol of consecration and equipment for the service of God. Thus the N. T. writers found the term ready to their hand when they came to speak of the bestowal of the Holy Spirit, either (1) upon Christ, or (2) upon Christians.

1. As regards our Lord Himself, He was both foretold (Dan. ix. 25, 26) and recognised (John i. 41) as the Messiah, or Christ, or Anointed. In many cases the O. T. prophecy which so describes Him is quoted and applied to Him by the writers of the N. T. (cp. Ps. ii. 2 with Acts iv. 26, 27; Ps. xlv. 7 [Heb. v. 8] with Heb. i. 9; Is. lxi. 1 with Luke iv. 18). The historical fact that the Holy Ghost came upon Him is asserted (Matt. iii. 16. Cp. John iii. 34), and is interpreted to mean that God "anointed" Him "with the Holy Ghost and with power" (Acts

* Another point of contact with the Jewish ordinance which Wilkinson points out is, that "as the Jewish lawgiver mentions the ceremony of pouring oil upon the head of the high-priest, after he had put on his entire dress, with the mitre and crown (Exod. xxix. 5, 7), so the Egyptians represent the anointing of their priests and kings after they were attired in their full robes, with the cap and crown upon their head" (cp. 2 Kings ix. 7).

x. 38). To prove that Jesus is Christ was a chief aim of the first preachers of Christianity when they dealt with Jews (Acts ix. 22; xvii. 2, 3; xviii. 5, 28). By His official name of Christ or Anointed our Lord claimed for and gathered up into Himself, as their rightful owner and true exponent, all those typical offices of the earlier dispensation to which their occupants had been admitted by the ceremony of anointing.

2. To Christians the same spiritual anointing descends from and is imparted by Him, the Head. The Psalmist already anticipates the truth, when he likens the spirit of unity among brethren to "the precious oil upon the head, that ran down upon the beard, even Aaron's beard; that came down upon the skirt of his garments" (Ps. cxxxiii. 2, R. V.). The followers of Christ are said to be "anointed" by God (2 Cor. i. 21), and to "have an unction," or "anointing," "from the Holy One" (χρίσμα, 1 John ii. 20, 27). With a reference to the medicinal properties of oil or ointment, those who lack spiritual perception are exhorted to "anoint their eyes with eye-salve" (κολλούριον ἑχρίσαι τοὺς ὀφθαλμούς, Rev. iii. 18). The actual use of anointing with oil as a material symbol of spiritual gifts, by the Christian Church at Baptism, or confirmation, or in "extreme unction," does not fall within the scope of this article. The reader is referred to the several articles in the *Dict. of Christ. Antiq.* and to Bingham's *Origines Ecclesiast.* [T. T. P.]

A'NOS ("Anos; Jonas). One of the sons of Mani, who had taken "strange wives," and put them away (1 Esd. ix. 34). [VANIAH.] [F.]

ANT (אַנְתִּי, *nemáláh*; *múrmeh*; *formica*). The ant is twice mentioned in the Book of Proverbs. In one passage it is held forth as a pattern of industry, in the other as a model of wisdom. As a pattern of industry, "Go to the ant, thou sluggard; consider her ways, and be wise: which having no guide, overseer, or ruler, provideth her meat in the summer, and gathereth her food in the harvest" (Prov. vi. 6-8). As a model of wisdom: "There be four things which are little upon the earth, but they are exceeding wise: the ants are a people not strong, yet they prepare their meat in the summer" (xxx. 24, 25). The natural interpre-

tation of both these passages is that the ant proves her industry and wisdom by storing up in summer a supply for winter use. It is well known that not only the Jews, but the ancient Greeks and Romans, were acquainted with the habit of certain ants of storing up food, which it collected in the summer, for the winter's consumption.

The earliest classical writers speak of the storing habits of the ants. Thus Hesiod (*Days*, l. 14) writes, *ὅτε τ' ἴθις σάπων ἀνῆται*, "when the provident collects its heap." Horace alludes to its foresight (*Sat.* i. 1, 33-35). So Aesop, in his familiar fable of the Ant and the Grasshopper. Plautus (*Trin.* ii. 4) speaks of money vanishing in a twinkling, like poppy-seeds thrown to the ants. Virgil, in a familiar passage (*Gen.* iv. 402-407), compares the Trojans hurrying their departure to the busy trains of harvesting ants. In fact, "As provident as an ant" was as familiar a proverb as with us "As busy as a bee." Aelian, a writer on natural history in the time of Hadrian, gives a very full and detailed account of the habits of the ant (*de Nat. Anim.* ii. 25, and vi. 43), describing, among other particulars, two very curious examples of provident instinct, which have been verified by recent observation, viz. the biting off the radicle of the root of the seed when it begins to germinate; and also the fact of some of the ants, when harvesting, climbing up the stalks and nibbling off the seed capsules, which fall among the workers below, who then detach the husk or chaff, before carrying off the grain and storing it in their subterranean granaries.

But to the Bible student the most interesting evidence of the observed habits of ants among ancient writers is to be found in the Mishna, compiled by Hillel, the Jewish Rabbi, about the time of our Saviour, and which is valuable as a record of a multitude of very ancient customs and observances, which, but for it, would probably have been long ago forgotten. The first section, called *Zeraim*, is occupied about seeds and crops. In the chapter "de Angulo" in the Latin Version, which treats of the corner of the fields bearing crops, which should be set aside for the poor, and of the rights of the gleaners, we are told that the granaries of ants (*formicarum cavernulae*) which may be found in the midst of a growing crop of corn, shall belong to the owner of the crop; but if these granaries are found after the reapers have passed, the upper part of each heap shall go to the poor, and the lower part to the owner. It is added that Rabbi Meir was of opinion that the whole should go to the poor, because whenever any doubt arose about a question of gleanings, the decision should be in favour of the gleaner. The reason for this quaint piece of legislation seems to have been this: If the stores were found among the standing corn or while the reapers were at work, the owner might undoubtedly claim them; but if they were discovered after the reapers had

* From *אַנְתִּי*, *abscessus* (Simon. *Lex. Heb.* ed. Winer). The derivation of the word is uncertain. Gesenius (*Thes.*) is inclined to derive it from the Arabic *نَمَل*, "conscendit,

pec. proreptando arborem reptandi vim habuisse videtur, unde obstrictandi potestas profecta est." Vid. *Gol. Arab. Lex.* s. v. V. conj. "moti inter esse permistique sicut *formicarum reptantium moro*." Cf. Michaelis, *Sup. Lex. Heb.* ii. 1644, and Rosenmüll. not. ad Bochart, iii. 480. Is it not probable that the name *nemáláh* (from *אַנְתִּי*, "to cut") was given to the ant from its extreme tenacity at the junction of the thorax and abdomen? If the term insect is applicable to any one living creature more than to another, it certainly is to the ant. *Nemáláh* is the exact equivalent to *insect*. Parkhurst—s. v.

אַנְתִּי (iv.)—gives a similar derivation. Another may be seen in Deltzsch on Prov. vi. 6. The English word ant appears to be an abbreviation of the form *emmet* (Sax. *aemmet*).

b "Parvula (nam exemplo est) magni formica laboris Ore trahit quodcumque potest, atque addit aceruo Quem struit, haud ignara ac non incauta futuri."

Hor. *Sat.* l. i. 33.

Cp. also Ovid, *Met.* vi. 624; Virg. *Georg.* i. 186, *Ant.* v. 402; Plin. xi. 30; Aelian, *H. A.* ii. 25, vi. 43, &c.

passed, it was presumable that the ants, who had never ceased their labours, might have collected some grains of fallen corn, which would pertain of right to the gleaners. These grains would be the last gathered, and therefore would lie on the top of the store. The regulation is not only interesting as an illustration of the microscopic habit of mind of those who "tithed mint and anise and cummin," but as proving that the harvesting ants of Syria had earned a place among these laws by amassing stores of sufficient size and so deposited as to make them worth collecting.

But why has there been any difficulty on the subject? The language of the wise man is in accordance not only with the universal belief of his time, but with the accurately ascertained facts of natural history. Much is due to the late Mr. J. T. Moggridge, who studied and elucidated the habits of the harvesting ants in his interesting volumes *Harvesting Ants and Trapdoor Spiders*, London, 1873-4. Kirby and Spence stated accurately enough that none of the northern European ants made any hoard or magazine of grain for winter use. All the English, French, and German naturalists have repeated the statement without question, of all European ants. Latreille, Huber, and others added the weight of their authority, drawn only from northern experiences; and subsequent compilers like Blanchard, and commonplace objectors to the accuracy of Holy Writ, have caught it up and generalized upon it. The result of further investigation has shown with what care the generalizations of even the ablest observers are to be received, and how often they dogmatize from insufficient data, while, as has often happened in other cases, the accuracy of Scripture and of ancient authorities has been in the end triumphantly vindicated. It is true that of the 104 species known to inhabit Europe, only three—*Atta barbara*, *Atta structor*, and *Pheidole megacephala*—are known to lay up stores for winter. How then, it may be asked, does it come that the ancients were familiar with the storing habits of the ant, while the moderns remained in ignorance of them? Simply because these species are commonest on the Mediterranean shores, and have not been noticed in the north of Europe. The long trains of harvesters remain conspicuous in the fields in the south for hours together, while *Atta structor* is in the habit of frequenting the neighbourhood and even the interior of towns, and is a familiar object to everyone on the Mediterranean coasts. Contrary to their habits in colder climates, the ants are not there dormant in winter, and among the tamarisk trees by the Dead Sea they may be seen in January actively engaged in collecting aphides and saccharine exudations, in long file passing and re-passing up and down the branches. But it is said the ants are not graminivorous, but animal feeders. True of the great family *Formica*, with the species of which we are familiar here, but the most common species of the Holy Land, *Atta barbara* and *Atta structor*, are strictly seed-feeders, and in summer lay up large stores of grain for winter use. Even recently M. G. de St. Pierre (*Ants and Spiders*, p. 29) mentions the depredations made among the corn crops at Hyères by these ants. Col. Sikes (*Trans. Ent. Soc. Lond.* ii. 103) records

the harvesting habits of an Indian species, *Atta providens*, and gives a detailed account of his observations, being, as he states, the more careful in his notes, from the denial of this habit by European naturalists. Dr. Jerdon, too, describes (*Madras Jour. Lit. and Sci.* 1851) similar storing habits in *Atta rufa* and *Oecodoma diffusa*. Mr. C. Horne (*Science Gossip*, 1872, p. 109) gives similar details of another Indian species, and Dr. Buchanan White corroborates Mr. Moggridge's account of the Italian ants (*Trans. Ent. Soc. Lond.* 1872, p. 5). The writer has been repeatedly an eye-witness of this habit in Syria.

Beyond the providence of the ant, modern research has proved its wisdom and instinct to be far in advance of that of any other known insect, not even excepting the bee. Its skill in architecture is wonderful and varied. Some species build their labyrinths of pellets of kneaded clay, arched and fitted like the most skilful masonry; others employ rafters and beams for their roofs, others cut leaves into neat circular tiles and thatch their roofs with this shingling (Bates, *Amazon*, 1-3), others excavate the trunks of trees. They fortify their passages against rain and enemies, closing them every night and opening them in the morning. Like the bees and wasps, their communities are composed of males, females, and neuters, the latter being both the workers and the rulers. These receive the eggs, watch over them with unceasing care, bring the *larvae* to enjoy the sun's warmth, and in the evening carry them back to their chambers. They gather food for them, and supply them incessantly; they tear the cases away from the cocoons when the *imago* is ready to emerge; they spread and dry the wings, which the males and females alone possess; they afterwards tend the females, feed them, wash them, and keep continual guard. They rear myriads of *aphides* or small plant parasites from the egg to supply food for the young, and keep them like cows. Some species, as the Amazon ants, organise regular marauding expeditions, attack the colonies of other ants, and carry off the *larvae* to be their slaves. In fact, had not the habits of the ants been verified by the observations of the most careful and truthful naturalists, they would have been incredible. Truly, indeed, did Agur pronounce them to be "exceeding wise."

Modern observers have recorded the extraordinary habit of the harvesting ants, of occasionally bringing their stores to the surface, and then burying them again. Many ancient writers have noticed this habit, Aelian, Plutarch, Epiphanius, and others, as well as Arabic authorities, quoted at length by Bochart (*Hieroz.* iii. 596). Whether this be to check germination, or merely to dry and preserve the seeds, is not yet ascertained. But it has been proved that the seeds do not germinate in an ant's granary; although if the place be deserted by the insects they will immediately begin to sprout. The ants have been often noticed to bite off the radicle of a sprouting seed. The observations of Mr. Moggridge led him to conclude that the ants, by this treatment, and by the exposure of the grain, actually malt it before eating it; waiting till the sprouting seed is ready to grow and has developed the saccharine matter so grateful to the tribe; not merely

keeping it till the acid has become soft and more accessible to their mandibles.

A small cricket, *Gryllus myrmecophilus*, inhabits the nests of harvesting ants, who carry it about with them in their migrations (Savi, *Bibliot. Ital.* tom. xv. p. 217).

Ants are hymenopterous insects of the family *Formicariæ*, of which there are two great divisions, *Formica*, atingless, and *Myrmica*, armed with a sting. Of each sub-family there are many genera. Most of the European species belong to *Formica*. *Formica rufa* affords the formic acid, a peculiar secretion from the glands of the abdomen. *Atta* and *Pheidole*, to which genera most of the harvesting ants belong, come under the sub-family *Myrmica*.

The Arabians held the wisdom of the ant in such estimation, that they used to place one of these insects in the hands of a newly-born infant, repeating these words, "May the boy turn out clever and skilful." Hence in Arabic, with the noun *nemleh*, "an ant," is connected the adjective *nemil*, "quick," "clever" (Bochart, *Hieroz.* iii. 494). In Rajputana to this day, the Hindoos scatter ceremonially dry rice and sugar for the ants. The Talmudists, too, attributed great wisdom to this insect. It was, they say, from beholding the wonderful ways of the ant that the following expression originated: "Thy justice, O God, reaches to the heavens" (*Chulin*, 63. See a collection of Jewish sayings on the ant in *PSBA.* iii. 68, &c.). [H. B. T.]

ANTELOPE, in R. V. (Deut. xiv. 5; 1a. li. 20); in A. V. "wild ox" (Deut.) and "wild bull" (1a.). [See BULL, WILD.]

ANTICHRIST (*δ ἀντίχριστος*). The word Antichrist is used by St. John in his first and second Epistles, and by him alone. Elsewhere it does not occur in Scripture. Nevertheless, by general consent, the term has been applied to the Man of Sin of whom St. Paul speaks in the Second Epistle to the Thessalonians, to the Little Horn and to the fierce-countenanced King of whom Daniel prophesies, and to the two Beasts of the Apocalypse, as well as to the false Christs whose appearance our Lord predicts in His prophetic discourse on the Mount of Olives. Before we can arrive at any clear and intelligent view of what Scripture teaches us on the subject of Antichrist, we must decide whether this extension of the term is properly made; whether the characteristics of the Antichrist are those alone with which St. John makes us acquainted in his Epistles, or whether it is his portrait which is drawn, darker, fuller, and larger, in some or all of the other passages to which we have referred.

(A.) The following are the passages in Scripture which ought to be carefully compared for the elucidation of our subject:—I. Matt. xxiv. 3–31. II. 1 John ii. 18–23, iv. 1–3; 2 John 5, 7. III. 2 Thess. ii. 1–12; 1 Tim. iv. 1–3; 2 Tim. iii. 1–13. IV. Dan. viii. 8–25; xi. 36–39. V. Dan. vii. 7–27. VI. Rev. xiii. 1–8; xvii. 1–18. VII. Rev. xiii. 11–18; xix. 11–21. The first of these passages contains the account of the false Christs and false prophets predicted by our Lord; the second, of the Antichrist as depicted by St. John; the third, of the Adversary of God as portrayed by St. Paul; the fourth and fifth, of the fierce-countenanced

King and of the Little Horn foretold by Daniel; the sixth and seventh, of the Beast and the False Prophet of the Revelation.

I. *The False Christs and False Prophets of Matt. xxiv.*—The purpose of our Lord in His prophetic discourse on the Mount of Olives was at once to predict to His disciples the event which would take place before the capture of Jerusalem, and those which would precede the final destruction of the world, of which the fall of Jerusalem was the type and symbol. Accordingly, His teaching on the point before us amounts to this, that (1) in the latter days of Jerusalem there should be sore distress, and that in the midst of it there should arise impostors who would claim to be the promised Messiah, and would lead away many of their countrymen after them; and that (2) in the last days of the world there should be a great tribulation and persecution of the saints, and that there should arise at the same time false Christs and false prophets, with an unparalleled power of leading astray. In type, therefore, our Lord predicted the rise of the several impostors who excited the fanaticism of the Jews before their fall. In antitype He predicted the future rise of impostors in the last days, who should beguile all but the elect into the belief of their being God's prophets, or even His Christs. We find no direct reference here to the Antichrist. Our Lord is not speaking of any one individual (or polity), but rather of those forerunners of the Antichrist who are his servants and actuated by his spirit. They are *ψευδοχριστοι*, and can deceive almost the elect, but they are not *δ ἀντίχριστος*; they are *ψευδοπροφήται*, and can show great signs and wonders, but they are not *δ ψευδοπροφήτης* (Rev. xvi. 14). However valuable, therefore, the prophecy on Mount Olivet is, as helping us to picture to ourselves the events of the last days, it does not elucidate for us the characteristics of the Antichrist, and must not be allowed to mislead us, as though it gave information which it does not profess to give.

II. *The Antichrist of St. John's Epistles.*—The first teaching with regard to the Antichrist and to the antagonist of God (whether these are the same or different we leave as yet uncertain) was oral. "Ye heard that the Antichrist cometh," says St. John (1 Ep. ii. 18, R. V.); and again, "This is the spirit of the Antichrist wherof ye have heard that it should come" (1 Ep. iv. 3, R. V.). Similarly St. Paul, "Remember ye not, that when I was yet with you I told you these things?" (2 Thess. ii. 5, R. V.). We must not therefore look for a full statement of the "doctrine of the Antichrist" in the Apostolic Epistles, but rather for allusions to something already known. The whole of the teaching of St. John's Epistle with regard to the Antichrist himself seems to be confined to the words "Ye heard," or "Ye have heard that the Antichrist cometh." The verb *ἔρχεται* here employed has a special reference, as used in Scripture, to the first and second Advents of our Lord. Those whom St. John was addressing had been taught that, as Christ was to come (*ἔρχεται*), so the Antichrist was to come likewise. The rest of the passage in St. John appears to be rather a practical application of the doctrine of the Antichrist than a formal statement of it. He warns his

readers that the spirit of the Antichrist could exist even then, though the coming of the Antichrist himself was future, and that all who denied the Messiahship and Sonship of Jesus were Antichrists, as being types of the final Antichrist who was to come. The teaching of St. John's Epistles therefore amounts to this, that *is* type, Cerinthus, Basilides, Simon Magus, and those Gnostics who denied Christ's Sonship, and all subsequent heretics who should deny it, were Antichrists, as being wanting in that divine principle of love which he has declared to be the essence of Christianity; and he points on to the final appearance of the Antichrist that was "to come" in the last times, according as they had been orally taught, who would be the *antitype* of these his forerunners and servants.

III. *The Adversary of God of St. Paul's Epistles.*—St. Paul does not employ the term Antichrist, but there can be no hesitation in identifying the Adversary (*ὁ ἀντικείμενος*, 2 Thess. ii. 4) of God with the Antichrist who was "to come." Like St. John, he refers to his oral teaching on the subject; but as the Thessalonians appeared to have forgotten it and to have been misled by some passages in his previous Epistle to them, he recapitulates what he had taught them. Like St. John, he tells them that the spirit of Antichrist or Antichristianism, called by him "the mystery of iniquity," was already working; but Antichrist himself he characterizes as "the Man of Sin," "the Son of Perdition," "the Adversary to all that is called God," "the one who lifts himself above all objects of worship;" and assures them that he should not be revealed in person until some present obstacle to his appearance should have been taken away, and until there should have occurred an *ἀνορθασία*.

From St. John and St. Paul together we learn (1) that the Antichrist should come; (2) that he should not come until a certain obstacle to his coming was removed; (3) nor till after the occurrence of the *ἀνορθασία*; (4) that his characteristics would be (a) open opposition to God and religion; (b) a claim to the incommunicable attributes of God; (c) iniquity, sin, and lawlessness; (d) a power of working lying miracles; (e) marvellous capacity of beguiling souls; (f) that he would be actuated by Satan; (g) that his spirit was already at work manifesting itself partially, incompletely, and typically, in the teachers of infidelity and immorality already abounding in the Church.

IV. *The fierce-countenanced King of Daniel.*—This passage is universally acknowledged to be primarily applicable to Antiochus Epiphanes. Antiochus Epiphanes is recognised as the chief prototype of the Antichrist. The prophecy may therefore be regarded as descriptive of the Antichrist. The point is fairly argued by St. Jerome:—"Down to this point (Dan. xi. 21) the historical order is preserved, and there is no difference between Porphyry and our own interpreters. But all that follows down to the end of the book he applies personally to Antiochus Epiphanes, brother of Seleucus, and son of Antiochus the Great; for, after Seleucus, he reigned eleven years in Syria, and possessed Judaea; and in his reign there occurred the persecution about the Law of God, and the wars of the Maccabees. But our people consider all

these things to be spoken of Antichrist, who is to come in the last time. . . . It is the custom of Holy Scripture to anticipate in types the reality of things to come. For in the same way our Lord and Saviour is spoken of in the 72nd Psalm, which is entitled a Psalm of Solomon, and yet all that is there said cannot be applied to Solomon. But in part, and as in a shadow and image of the truth, these things are foretold of Solomon, to be more perfectly fulfilled in our Lord and Saviour. As, then, in Solomon and other saints the Saviour has types of His coming, so Antichrist is rightly believed to have for his type that wicked king Antiochus, who persecuted the saints and defiled the Temple" (S. Hieron. *Op. tom. i. p. 523, Col. Agr. 1616; tom. iii. p. 1127, Paris, 1704*).

V. *The Little Horn of Daniel.*—Hitherto we have been dealing with a person, not a kingdom or a polity. This is evident from St. John's words, and still more evident from the Epistle to the Thessalonians. The words used by St. Paul could not well have been more emphatic, had he studiously made use of them in order to exclude the idea of a polity. "The Man of Sin," "the Son of Perdition," "the one who opposeth himself to God," "the one who exalteth himself above (R. V. 'against') God," the one "setting himself forth as God" (R. V.), "the lawless one . . . whose coming is according to the working of Satan with all power and signs and lying wonders" (R. V.): if words have a meaning, these words designate an individual. But when we come to Daniel's prophecy of the Little Horn this is all changed. We there read of four beasts, which are explained as four kings, by which expression is meant four kingdoms or empires. These kingdoms, represented by the four beasts, are [according to the traditional opinion] the Assyrian empire, the Persian empire, the Grecian empire, and the Roman empire. The Roman empire is described as breaking up into ten kingdoms, amongst which there grows up another kingdom which gets the mastery over nearly a third of them (three out of ten). This kingdom, or polity, is the little horn of the fourth beast, before which three of the first ten horns are plucked up. If the four "kings" (vii. 17) represented by the four beasts are really empires, if the ten "kings" (vii. 24) are monarchies or nationalities, then the other "king" who rises after them is, in like manner, not an individual but a polity. It follows that the "Little Horn" of Daniel cannot be identified with the Antichrist of St. John and St. Paul. The former is a polity, the latter is an individual.

VI. *The Apocalyptic Beast of St. John.*—A further consequence follows. For the first Beast of the Apocalypse is clearly identical with the Little Horn of Daniel. The Beast whose power is absorbed into the Little Horn has ten horns (Dan. vii. 7) and rises from the sea (Dan. vii. 3): the Apocalyptic Beast has ten horns (Rev. xiii. 1) and rises from the sea (*ibid.*). The Little Horn has a mouth speaking great things (Dan. vii. 8, 11, 20): the Apocalyptic Beast has a mouth speaking great things (Rev. xiii. 5). The Little Horn makes war with the saints, and prevails (Dan. vii. 21): the Apocalyptic Beast makes war with the saints, and overcomes them (Rev. xiii. 7). The Little Horn speaks great

words against the Most High (Dan. vii. 25): the Apocalyptic Beast opens his mouth in blasphemy against God (Rev. xiii. 6). The Little Horn wears out the saints of the Most High (Dan. vii. 25): the woman who rides on, i.e. directs, the Apocalyptic Beast, is drunken with the blood of saints (Rev. xvii. 6). The persecution of the Little Horn is to last a time and times and a dividing of times, i.e. three and a half times or years (Dan. vii. 25): power is given to the Apocalyptic Beast for forty-two months, i.e. three and a half times or years (Rev. xiii. 5). These and other parallelisms cannot be accidental. Whatever was meant by Daniel's Little Horn must also be meant by St. John's Beast. Therefore St. John's First Beast is not the Antichrist. It is not an individual like the Antichrist of St. John's and St. Paul's Epistles, but a polity like the Little Horn of Daniel.

But, though not identical, it is quite evident, and it has been always recognised, that the Antichrist of the Epistles and the Beast of the Apocalypse have some relation to each other. What is this relation? and in what relation to both does the second Apocalyptic Beast, called the False Prophet, stand? To answer this question we must examine the imagery of the Apocalypse. Shortly stated, it is, so far as concerns our present purpose, as follows. The Church is represented (Rev. xii. 5) as a woman bringing forth "a son, a man-child," who is "caught up unto God and unto His throne" from the dragon that had desired to devour him. Repelled by Christ's angelic guards (vv. 7-10), the dragon persecutes the woman, so that she is compelled to fly from him into the wilderness, where she remains for 1260 days, or three and a half times (vv. 13, 14). Foiled in his attempt to destroy the woman, as he had been foiled in his attempt against Christ, the dragon sets himself to make war with "the rest of her seed," that is, the brethren of Christ, "which keep the commandments of God and hold the testimony of Jesus" (v. 17, R. V.). At this time the Beast arises from the sea, and Satan gives to him his power, and his seat, and great authority. The length of time during which the Beast prevails is three and a half times, the same period as that during which the sufferings and trials of the woman last. During a certain part of this three and a half times the Beast takes upon its back, as its guide and ruler, a woman named "Mystery, Babylon the great, the mother of the harlots and of the abominations of the earth," by whom, as it is explained, is figured "that great city which reigneth over the kings of the earth" (xvii. 18, R. V.) from her seven hills (xvii. 9). After a time Babylon the great falls (ch. xviii.), but the Beast on whom she had ridden still survives, joins with the kings of the earth in a final desperate conflict with Christ, and, being taken, is cast into the lake of fire (xix. 19-21).

Can we harmonize this picture with the prediction of St. Paul, always recollecting that his Man of Sin is an individual, and that the Apocalyptic Beast is a polity?

As we have here reached that which constitutes the great difficulty in mastering the conception of the Antichrist as revealed by the inspired writers, we shall now turn from the text of Scripture to the comments of annotators

and essayists to see what assistance we can derive from them. We shall then resume the consideration of the scriptural passages at the point at which we now leave them. We shall classify the opinions which have been held on the Antichrist according as he is regarded as an individual, or as a polity, or as a principle. The individualists, again, must be subdivided, according as they represent him as one to come or as one already come. We have, therefore, four classes of writers on the Antichrist:—(1) those who regard him as an individual yet future; (2) those who regard him as a polity now present; (3) those who regard him as an individual already passed away; (4) those who consider that nothing is meant beyond antichristian and lawless principle, not embodied either in an individual or in a special polity.

1. The first opinion held in the Church was that the Antichrist was a real person who would appear in the world when the time of his appearance was come. The only point on which any question arose was, whether he should be a man armed with Satanic powers or Satan himself. That he would be a man armed with Satanic powers was the opinion of Justin Martyr, A.D. 108 (*Dial.* 371, 20, 21; *Thirlbit*, 1722); of Irenaeus, A.D. 140 (*Op.* v. 25, 437; *Grabit*, 1702); of Tertullian, A.D. 150 (*De Res. Carn.* c. 24; *Apol.* c. 32); of Origen, A.D. 184 (*Op.* i. 667; *Delarue*, 1733); of his contemporary, Hippolytus (if the treatise *De Antichristo* be his; *Hamburgi*, 1716); of Cyprian, A.D. 250 (*Ep.* 58; *Op.* 120, Oxon. 1682); of Victorinus, A.D. 270 (*Bibl. Patr. Magna*, iii. p. 136; *Col. Agrip.* 1618); of Lactantius, A.D. 300 (*Div. Inst.* vii. 17); of Cyril of Jerusalem, A.D. 315 (*Catech.* xv. 4); of Jerome, A.D. 330 (*Op.* iv. pars i. 209; *Parisii*, 1693); of Chrysostom, A.D. 347 (*Comm.* in 2 *Thess.*); of Hilary of Poitiers, A.D. 350 (*Comm.* in *Matt.*); of Augustine, A.D. 354 (*De Civit. Dei*, xx. 19); of Ambrose, A.D. 380 (*Comm.* in *Luc.*). The authors of the Sibylline Oracles, A.D. 150, and of the Apostolical Constitutions, Celsus (see *Orig.* c. *Cels.* lib. vi.), Ephrem Syrus, A.D. 370, Theodoret, A.D. 430, and a few other writers seem to have regarded the Antichrist as Satan himself rather than as his minister or an emanation from him. But they may, perhaps, have meant no more than to express the identity of his character and his power with that of Satan. Each of the writers to whom we have referred gives his own judgment with respect to some particulars which may be expected in the Antichrist, whilst they all agree in representing him as a person about to come shortly before the glorious appearance of Christ, and to be destroyed by His Presence. Justin Martyr speaks of him as the man of the apostasy, and dwells chiefly on the persecutions which he would cause. Irenaeus describes him as summing up the apostasy in himself; as having his seat at Jerusalem; as identical with the Apocalyptic Beast (c. 28); as foreshadowed by the unjust judge; as being the man who "should come in his own name;" and as belonging to the tribe of Dan (c. 30). Tertullian identifies him with the Beast, and supposes him to be about to arise on the fall of the Roman Empire (*De Res. Carn.* c. 25). Origen describes him in Eastern phrase as the child of the Devil and the counterpart of Christ. Hippolytus

understands the Roman empire to be represented by the Apocalyptic Beast, and the Antichrist by the False Prophet who would restore the wounded Beast by his craft and by the wisdom of his laws. Cyprian sees him typified in Antiochus Epiphanes (*Ezhort. ad Mart.* c. 11). Victorinus, with several others—misunderstanding St. Paul's expression that the mystery of iniquity was in his day working—supposes that the Antichrist will be a revived Nero—an idea taken up and enlarged upon in modern times; Lactantius, that he will be a king of Syria, born of an evil spirit; Cyril, that he will be a magician, who by his arts will get the mastery of the Roman empire. Jerome describes him as the son of the Devil sitting in the Church as though he were the Son of God; Chrysostom, as *ἀντίθεός τις* sitting in the Temple of God, that is, in all the Churches, not merely in the Temple at Jerusalem; St. Augustine, as the adversary holding power for three and a half years—the Beast, perhaps, representing Satan's empire. The primitive belief may be summed up in the words of St. Jerome. In his Commentary on Daniel he writes: "Let us say that which all ecclesiastical writers have handed down, viz. that at the end of the world, when the Roman empire is to be destroyed, there will be ten kings who will divide the Roman world amongst them; and there will arise an eleventh little king, who will subdue three of the ten kings, that is, the king of Egypt, of Africa, and of Ethiopia, as we shall hereafter show. And on these having been slain, the seven other kings will also submit. 'And behold,' he says, 'in the ram were the eyes of a man.' This is that we may not suppose him to be a devil or a demon, as some have thought, but a man in whom Satan will dwell utterly and bodily. 'And a mouth speaking great things,' for he is 'the man of sin, the son of perdition, who sitteth in the Temple of God, making himself as God'" (*Op. vol. iv.* p. 511; *Col. Agrip.* 1616). In his Comment. on Dan. xi. and in his reply to Algasia's eleventh question, he works out the same view in greater detail. The same line of interpretation continued. Andreas of Caesarea, A.D. 550, explains him to be a king actuated by Satan, who will reunite the old Roman empire and reign at Jerusalem (*in Apoc.* c. xiii.); Arethas, A.D. 650, as a king of the Romans who will reign over the Saracens in Bagdad (*in Apoc.* c. xiii.); John Damascene, A.D. 800, repeats the primitive belief (*Orth. Fid.* l. iv. c. 26); Adso, A.D. 950, says that a Frank king will reunite the Roman empire, and that he will abdicate on Mount Olivet, and that, on the dissolution of his kingdom, the Antichrist will be revealed. The same writer supposes that he will be born in Babylon, that he will be educated at Bethsaida and Chorazin, and that he will proclaim himself the Son of God at Jerusalem (*Tract. in Antichr. apud August. Opera*, tom. ix. p. 454; Paris, 1637). Theophylact, A.D. 1070, speaks of him as a man who will carry Satan about with him. Albert the Great, Cardinal Hugo, and Alexander de Hales repeat the received tradition in the 13th century. So also Thomas Aquinas, A.D. 1260, who recurs to the tradition with regard to the birth of Antichrist at Babylon, saying that he will be instructed in the Magian philo-

sophy, and that his doctrine and miracles will be a parody on those of the Lamb. The received opinion of the 12th century is brought before us in a striking and dramatic manner at the interview between King Richard I. and the Abbot Joachim at Messina, as the king was on his way to the Holy Land. "I thought," said the king, "that Antichrist would be born in Antioch or in Babylon, and of the tribe of Dan; and would reign in the Temple of the Lord in Jerusalem; and would walk in that land in which Christ walked; and would reign in it for three years and a half; and would dispute against Elijah and Enoch, and would kill them; and would afterwards die; and that after his death God would give sixty days of repentance, in which those might repent which should have erred from the way of truth, and have been seduced by the preaching of Antichrist and his false prophets." This seems to have been the view defended by the archbishops of Rouen and Auxerre and by the bishop of Bayonne, who were present at the interview; but it was not Joachim's opinion. He maintained the seven heads of the Beast to be Herod, Nero, Constantius, Mahomet, Melsemut, who were past; Saladin, who was then living; and Antichrist, who was shortly to come, being already born in the city of Rome, and about to be elevated to the Apostolic See (Roger de Hoveden in *Richard I.*, anno 1190).^{*} In his own work on the Apocalypse Joachim speaks of the second Apocalyptic beast as being governed by "some great prelate who will be like Simon Magus, and as it were universal pontiff throughout the world, and be that very Antichrist of whom St. Paul speaks." These are very noticeable words. Gregory I. had long since (A.D. 590) declared that any man who held the power which the popes of Rome soon after his time began to arrogate to themselves as Universal Bishops of the Church, would be the precursor of Antichrist. Arnulphus, bishop of Orleans (or perhaps Gerbert), in an invective against John XV. at the Council of Rheims, A.D. 991, had declared that if the Roman pontiff was destitute of charity and puffed up with knowledge, he was Antichrist—if destitute both of charity and of knowledge, he was a lifeless stone (*Mansi*, tom. ix. p. 132; *Ven.* 1774); but Joachim is the first to suggest, not that such and such a pontiff was Antichrist, but that the Antichrist would be a *Universalis Pontifex*, and that he would occupy the Apostolic See. Still, however, we have no hint of an order or succession of men being the Antichrist. It is an actual living individual man that Joachim contemplates.

The master had said that a Pope would be the Antichrist; his followers began to whisper that it was the Pope. Amalric, professor of logic and theology at Paris at the end of the 12th century, appears to have been the first to have put forth the idea. It was taken up by three different classes: by the moralists, who were scandalized at the laxity of the Papal Court; by the Imperialists, in their temporal

* The Bollandists regard the story of this interview as an invention. "But this," says Bishop Stobbe, "is extremely improbable." See *Chronicle of Roger de Hoveden*, vol. iii. p. 76, ed. Master of the Rolls.

struggle with the Papacy; and, perhaps independently, by the Waldenses and their followers in their spiritual struggle. Of the first class we may find examples in the Franciscan enthusiasts Peter John of Olivi, Telesphorus, Ubertinus, and John of Paris, who saw a mystic Antichrist at Rome, and looked forward to a real Antichrist in the future; and again in such men as Grossetête, whom we find asking, as in despair, whether the name of Antichrist has not been earned by the Pope (Matt. Par. in An. 1253, p. 871, 1640). Of the second class we may take Eberhard, archbishop of Salzburg, as a specimen, who denounces Hildebrand as "having, in the name of religion, laid the foundation of the kingdom of Antichrist 170 years ago." He can even name the ten horns. They are the "Turks, Greeks, Egyptians, Africans, Spaniards, French, English, Germans, Sicilians, and Italians, who now occupy the provinces of Rome; and a little horn has grown up with eyes and mouth, speaking great things, which is reducing three of these kingdoms—i.e. Sicily, Italy, and Germany—to subserviency, is persecuting the people of Christ and the saints of God with intolerable opposition, is confounding things human and divine, and is attempting things unutterable, execrable" (Aventinus, *Annal. Boiorum*, p. 651; Lips. 1710). The Waldenses eagerly grasped at the same notion, and from that time it has never been lost sight of. Thus we alide from the individualist view, which was held unanimously in the Church for upwards of a thousand years, to the notion of a polity, or a succession of rulers of a polity, that polity being the Church of Rome. The hitherto received opinion now vanishes, and does not appear again until the excesses and extravagances of the new opinion produced a reaction against itself.

2. The Waldenses did not deny that an individual and personal Antichrist was to be expected in the future, but they recognised many Antichrists, and by the end of the 14th century they had learnt to identify Antichrist, Babylon, the Fourth Beast, the Harlot, and the Man of Sin, with the system of Popery.^b In 1383 Wickliffe wrote his treatise *On Christ and His Adversary Antichrist* (*De Christo et suo adversario Antichristo*), in which he identifies the Pope with Antichrist for twelve reasons, most of which are applicable not only to the individual Pope with whom he was at strife, but to the Pope as such. They are as follows:—1. Christ is the Truth, the Pope is the principle of Falsehood; 2. Christ was poor, the Pope is rolling in

wealth; 3. Christ was meek, the Pope is proud; 4. Christ forbade adding to His Law, the Pope adds cruel laws; 5. Christ commanded to go about and preach, the Pope sits in his palace; 6. Christ despised secular power, the Pope seeks it; 7. Christ submitted to Caesar, the Pope has stolen away half the Roman Empire; 8. Christ had twelve simple disciples, the Pope has more than twelve ambitious cardinals; 9. Christ forbade to strike with the sword, the Pope gets up wars; 10. Christ confined Himself to Judaea, the Pope intrudes wherever gain calls him; 11. Christ was humble, the Pope is full of pomp; 12. Christ sought not fame or gold, the Pope seeks both. Huss (*De Antichristo et membrorum ejus anatomia*, and *Sermones de Antichristo*) held similar language. Lord Cobham declared at his trial that the Pope was Antichrist's head. Walter Brute, brought before the Bishop's Court at Hereford at the end of the 14th century, pronounced the Antichrist to be "the high Bishop of Rome calling himself God's servant and Christ's chief vicar in this world" (Foxe, iii. p. 131; Lond. 1844). Thus we reach the Reformation. Walter Brute (A.D. 1393), Bullinger (1504), Chytraeus (1571), Arletius (1573), Foxe (1586), Napier (1593), Mede (1632), Jurien (1685), Bp. Newton (1750), Cunningham (1813), Faber (1814), Woodhouse (1828), Habershon (1843), identify the False Prophet, or Second Apocalyptic Beast, with Antichrist and with the Papacy; Marlort (A.D. 1574), King James I. (1603), Daubuz (1790), Galloway (1803), the First Apocalyptic Beast; Brightman (A.D. 1600), Pareus (1615), Vitringa (1705), Gill (1775), Bachmair (1778), Fraser (1795), Croly (1828), Fysh (1837), Elliott (1844), both the Beast. That the Pope and his system are Antichrist, was taught by Luther, Calvin, Zwingle, Melancthon, Bucer, Beza, Calixtus, Bengel, Michælis, and by almost all Protestant writers on the Continent. Nor was there any hesitation on the part of English theologians to seize the same weapon of offence. Bp. Bale (A.D. 1491), like Luther, Bucer, and Melancthon, pronounces the Pope in Europe and Mahomet in Africa to be Antichrist. The Pope is Antichrist, say Cramer (*Works*, vol. ii. p. 46; Camb. 1844), Latimer (*Works*, vol. i. p. 149; Camb. 1844), Ridley (*Works*, p. 53; Camb. 1841), Hooper (*Works*, vol. ii. p. 44; Camb. 1852), Hutchinson (*Works*, p. 304; Camb. 1842), Tyndale (*Works*, vol. i. p. 147; Camb. 1848), Sandys (*Works*, p. 11; Camb. 1841), Philpot (*Works*, p. 152; Camb. 1842), Jewell (*Works*, vol. i. p. 109; Camb. 1845), Rogers (*Works*, p. 182; Camb. 1854), Fulke (*Works*, vol. ii. p. 269; Camb. 1848), Bradford (*Works*, p. 435; Camb. 1848). Nor is the opinion confined to these 16th century divines, who may be supposed to have been specially incensed against Popery. King James held it (*Apol. pro Juram. Fidel.*; Lond. 1609) as strongly as Queen Elizabeth (see Jewell, *Letter to Bulling*, May 23, 1559, *Zürich Letters*, First Series, p. 33, Camb. 1842); and the theologian of the 17th century did not repudiate it, though they less and less dwelt upon it as their struggle came to be with Puritanism in place of Popery. Bp. Andrews maintains it as a probable conclusion from the Epistle to the Thessalonians (*Resp. ad Bellarm.* p. 304; Oxon. 1851); but he carefully explains that King James, whom he

^b "E esser mot avias, cant venne l' Antexrist, Que nos non crean, ni a son fait, ni a son dit: Car, segont l' escriptura, son ara fait moti Antexrist; Car Antexrist son tuit aquilq que contrastan a Xrist."—*La Nobla Leyceon*, l. 456. It was long thought that this treatise was of the 12th century, owing to its containing two lines which seemed to run as follows:—

"Ben ha mil e cent an compit enterament Que fo scripta lora, Car son al derier temp."

"A thousand and a hundred years are already quite run out

Since these words were written, 'It is the last time.'"

Mr. Bradshaw, late Librarian of the Cambridge University Library, discovered by help of a magnifying-glass that the right reading was "a thousand and four hundred years."

was defending, had expressed his private opinion, not the belief of the Church, on the subject (*ib.* p. 23). Bramhall introduces limitations and distinctions (*Works*, iii. p. 520; Oxf. 1845); significantly suggests that there are marks of Antichrist which apply to the General Assembly of the Kirk of Scotland as much as to the Pope or to the Turk (*ib.* iii. 287); and declines to make the Church of England responsible for what individual preachers or writers had said on the subject in moments of exasperation (*ib.* ii. 582). From this time forward the Papal-Antichrist theory is seldom found in theologians of name in the English Church, nor indeed in the 16th century does it seem to have taken root in England. Hard names were bandied about; and the hardest of all being Antichrist, it was not neglected. But the idea of the Pope being Antichrist was not the main idea of the English Reformation, nor was it ever applied to the Pope in his Patriarchal or Archiepiscopal, but solely in his distinctively Papal, character. But though the sober and learned divines of the 17th century for the most part gave up this application of the term, it was insisted upon by a string of writers who added nothing to the interpretation of prophecy, but found each the creation of his own brain in the sacred Book of the Revelation, grouping history in any arbitrary manner that they chose around the central figure of the Papal Antichrist.

3. A reaction followed. Some returned to the ancient idea of a future individual Antichrist, as Ribera (A.D. 1592), Lacunza or Ben Ezra (A.D. 1810), De Burgh, Sammel Maitland, Newman (*Tracts for the Times*, No. 83), and Charles Maitland (*Prophetic Interpretation*). Others preferred looking upon him as long past, and fixed upon one or another persecutor or heresiarch as the man in whom the predictions as to Antichrist found their fulfilment. There seems to be no trace of this idea for more than 1600 years in the Church. But it has been taken up by two opposite classes of expounders, —by those who were anxious to avert the application of the Apocalyptic prophecies from the Papacy, by showing that they were fulfilled before the Papal power had come into being; and by others, who were disposed, not indeed to deny the prophetic import of the Apocalypse, but to confine the seer's ken within the closest and narrowest limits that were possible. Alcasar, a Spanish Jesuit, taking a hint from Victorinus, seems to have been the first (A.D. 1634) to have suggested that the Apocalyptic prophecies did not extend further than to the overthrow of Paganism by Constantine. This view, with variations by Grotius, is taken up and expounded by Bossuet, Calmet, De Sacy, Eichhorn, Hug, Herder, Ewald, De Wette, Bleek, Moses Stuart, Davidson, Renan, Renss, &c. The general view of the school is that the Apocalypse describes the triumph of Christianity over Judaism in the first, and over Heathenism in the third and fourth centuries. Mariana sees Antichrist in Nero; Bossuet in Diocletian and in Julian; Grotius in Caligula; Wetstein in Titus; Hammond in Simon Magus (*Works*, vol. iii. p. 620; Lond. 1631); Whitby in the Jews (*Comm.* vol. ii. p. 431; Lond. 1760); Le Clerc in Simon, son of Giora, a leader of the rebel Jews; Schöttgen in the Pharisees; Nösetz and Krause in

the Jewish zealots; Hardouin in the High Priest Ananias; F. D. Maurice in Vitellius (*On the Apocalypse*, Camb. 1860), Renan and Reusa (adopting the Nero fable) in Nero.

4. The same spirit that refuses to regard Satan as an individual, naturally looks upon the Antichrist as an evil principle not embodied either in a person or in a polity. Thus Koppe, Storr, Nitzsch, and Pelt (see Alsford, *Gk. Test.* iii. 69). Westcott also considers that "the term expresses the embodiment of a principle, and is not to be confined to one person" (*The Epistles of St. John*, ii. 22); "the personification of the principle shown in different Antichrists" (*ibid.* ii. 13).

We do not gain much by a review of the opinions of the commentators. In the case of prophecy, partially at least unfulfilled, little is to be expected. Of the four opinions which we have exhibited, the last is in accordance neither with St. Paul nor St. John, for St. Paul distinctly describes the Adversary as being a man; St. John speaks of the coming of Antichrist in terms similar to those used for the coming of Christ, and describes Antichristianism as τὸ τοῦ ἀντιχρίστου, thereby showing that Antichristianism is Antichristianism because it is the spirit of the concrete Antichrist. The third opinion is plainly refuted by the fact that the persons fixed upon as the Antichrist have severally passed away, but Christ's glorious Presence, which is immediately to succeed the fall of Antichrist, has not yet been vouchsafed. The majority of those who maintain the second opinion are shown to be in the wrong because they represent as a polity what St. Paul distinctly describes as a man. The majority of those who hold the first opinion are in like manner shown to be in the wrong, because they represent as an individual what the Apocalypse demonstrably pictures as a polity. We are unable to follow any one interpreter or any one school of interpreters. The opinions of the last two of the four schools we regard as erroneous: the first two appear to contain the truth between them, but so divided as to be untrue in the mouth of almost any individual expositor who has entered into details. We return to Scripture.

St. Paul says (2 Thess. ii. 3) that there are two things which are to precede the Day of Christ, the ἀποστασία and the revelation of the Adversary; he does not say that these two things are contemporary: but, on the contrary, seems to imply that there was to be a succession of events. First, it appears that an unnamed and to us unknown obstacle has to be removed: then was to follow the "Apostasy;" after this, the Adversary was to arise, and then was to come his destruction. We need hardly say that the word "apostasy," as ordinarily used, does not give the exact meaning of ἡ ἀποστασία. The A. V. has most correctly rendered the original by "falling away," having only failed of entire exactness by omitting to give the value of the article, which is supplied in the R. V.,—"the falling away." An open and unblushing denial and rejection of all belief, which is implied in our "apostasy," is not implied in ἀπο-

* For the force of the article, see Bp. Middleton ad loc. (*Gk. Art.* p. 382; Camb. 1833).

στασία. It means one of two things: (1) Political defection (Gen. xiv. 4; 2 Chron. xiii. 6; Acts v. 37); (2) Religious defection (Acts xxi. 21; 1 Tim. iv. 1; Heb. iii. 12). The first is the common classical use of the word. The second is more usual in the N. T. Cyril of Jerusalem seems to understand the word rightly when he says in reference to this passage: *Νῦν δὲ ἐστὶν ἡ ἀποστασία· ἀπέστησαν γὰρ οἱ ἄνθρωποι τῆς ὁρθῆς πίστεως . . . ἀπέστησαν γὰρ οἱ ἄνθρωποι ἀπὸ τῆς ἀληθείας . . . Αὕτη τοίνυν ἐστὶν ἡ ἀποστασία· καὶ μέλλει προσδοκᾶσθαι ὁ ἔχθρος* (Cyril. *Catech.* xv. 9, *Op.* p. 228; Paris, 1720). And St. Ambrose, "A verā religione plerique lapsi errore desciscunt" (*Comm. in Luc.* xx. 20). This "falling away" implies persons who fall away; the ἀποστασία consists of ἀποσταται. Supposing the existence of an organized religious body, some of whom should fall away from the true faith, the persons so falling away would be ἀποσταται, though still formally unsevered from the religious body to which they belonged; and the religious body itself, while from one side and in respect to its faithful members it would retain its character and name as a religious body, might yet from another side and in respect to its other members be designated an ἀποστασία. It is such a corrupted religious body as this that St. Paul seems to mean by the ἀποστασία which he foretells in the Epistle to the Thessalonians.⁴ In the Epistle to Timothy he describes this religious defection by some of its peculiar characteristics. "In the latter times some shall depart from the faith (ἀποστήσονται τινες τῆς πίστεως), giving heed to seducing spirits and doctrines of devils; speaking lies in hypocrisy; having their conscience seared with a hot iron; forbidding to marry, and commanding to abstain from meats" (1 Tim. iv. 1-3, A. V.). "In the last days perilous times shall come. For men shall be lovers of their own selves, . . . having a form of godliness, but denying the power thereof. . . . Evil men and seducers shall wax worse and worse, deceiving and being deceived" (2 Tim. iii. 1-13, A. V.).⁵ It has been usual, as we have seen, to identify the First Beast of the Apocalypse with St. Paul's Man of Sin. It is impossible, as we have said, to do so. But it is possible, and more than possible, to identify the Beast and the ἀποστασία. Can we find anything which

will serve as the antitype of both? In order to be the antitype of St. John's Beast it must be a polity, arising, not immediately, but shortly, after the dissolution of the Roman Empire, gaining great influence in the world, and getting the mastery over a certain number of those nationalities which like itself grew out of that empire (Dan. vii. 24). It must last three and a half times; i.e. nearly twice as long as the empire of Assyria, of Persia, or Grecia, to which only two times seem to be allotted (Dan. vii. 12). It must blaspheme against God; i.e. it must arrogate to itself or claim for creatures the honour due to God alone.⁶ It must be an object of wonder and worship to the world (Rev. xiii. 6). It must put forward unblushing claims on behalf of itself, and be full of its own perfections (Rev. xiii. 5). At a certain period in its history it must put itself under the guidance of Rome (Rev. xviii. 3), and remain ruled by her until the destruction of the latter (Rev. xviii. 2); its own existence being still prolonged until the coming of Christ in glory (Rev. xix. 20). To satisfy the requirements of St. Paul's description, its essential features must be a falling away from the true faith (2 Thess. ii. 3; 1 Tim. iv. 1), and it must be further characterized by the specific qualities already transcribed from the Epistles to Timothy.

The antitype may be found, it has been held, in the corrupted Church of Christ, in so far as it was corrupted. According to this view the same body, in so far as it maintained the faith and love, was the bride and the spouse, and, in so far as it "fell away" from God, was the ἀποστασία, just as Jerusalem of old was at once Zion the beloved city, and Sodom the bloody city—the Church of God and the Synagogue of Satan. On this theory the three and a half times of the Beast's continuance (Rev. xiii. 5), and of the Bride's suffering in the wilderness (Rev. xii. 6), would necessarily be continuous, for the persecuted and the persecutors would be the faithful and the unfaithful members of the same body. These times would have commenced when the Church lapsed from her purity and from her first love into unfaithfulness to God, exhibited especially in idolatry and creature-worship. It is of the nature of a religious defection to grow up by degrees; we should not therefore be able to lay the finger on any special moment at which it commenced. Cyril of Jerusalem considered that it was already existing in his time. Having quoted 2 Thess. ii. 3-10, he continues: "Thus wrote Paul, and now is the 'falling away' (ἀποστασία), for men fell away (ἀπέστησαν) from the right faith. . . . This then is the ἀποστασία, and the Enemy has soon to be looked for; already he

⁴ "It is an 'apostasy' indeed, but the same Greek word is used in Heb. iii. 12 and in 1 Tim. iv. 1, in neither of which cases will it suit the context to understand the word of an outward leaving of the Christian Church. The persons must at any rate have been Christians, or they could not be apostates. And the apostasy is all the more terrible if, while the form of the Church is kept to, there is a departure from the inward spirit. And in this case several points seem to indicate an apostasy within the Church" (Mason, *Ex-cursus on 2 Thess.* ii. 3-12, in Elliott's *N. T. Comm.*).

⁵ The R. V. of these extracts is as follows:—

1 Tim. iv. 1, &c.

"In later times some shall fall away from the faith, giving heed to seducing spirits and doctrines of devils, through the hypocrisy of men that speak lies, branded in their own conscience as with a hot iron," &c.

2 Tim. iii. 1, &c.

"In the last days grievous times shall come. For men shall be lovers of self, . . . holding a form of godliness, but having denied the power thereof. . . . Evil men and impostors," &c.

⁶ The word "blasphemy" has come to bear a secondary meaning, which it does not bear in Scripture. Schleusner (in voc.) rightly explains it, *Dicere et facere quibus magister Dei violatur*. The Jews accused our Lord of blasphemy because He claimed divine power and the divine attributes (Matt. ix. 2, xxvi. 64; John x. 33). There was nothing in our Lord's words which the most bitter malignity could have called blasphemous in the later sense which the word has come to bear. It is of course in the scriptural, not in the modern, sense that St. John attributes blasphemy to the Beast (see Wordsworth, *On the Apocalypse*, p. 528).

has begun to send his forerunners, that the prey may be ready for him at his coming." As time went on in the centuries succeeding Cyril, the *ἀντιχριστία* manifested itself still more clearly, until at length the number of the *ἀντιχρισταί* who had fallen away surpassed the number of those who were faithful to the primitive faith. When this had occurred, St. Paul's "falling away" had come, and St. John's First Beast had emerged from the sea. On the same principle of interpretation the after acquiescence of the Church in the Hildebrandine theory of the Roman Supremacy is typified by the Beast taking the woman, Babylon, who represents the seven-hilled city, on its back as its guide and director. From the 12th to the 16th century, and partially to the present day, this Hildebrandine idea has reigned over and has been the governing spirit of the corrupted Church. The fall of Babylon, rich with its spiritual wares, is according to this view in part past, in part future. After that fall has been fully accomplished, the corrupted Church will still subsist down to the day of the coming of Christ, when the three and a half times—the period of the suffering of the faithful Church—will come to an end with and by the destruction of the apostate Church.⁵

VII. *The Apocalyptic False Prophet.*—There is a second Apocalyptic Beast: the Beast from the Earth (Rev. xiii. 11), or the False Prophet (Rev. xix. 20). Can we identify this Beast either with the individual Adversary predicted by St. Paul, or with a corrupt polity such as has been described? We were compelled to regard the First Beast as a polity by its being identical with that which clearly is a polity, the Little Horn of Daniel. There is no such necessity here, and there is no reason for regarding the Second Beast as a polity, beyond the fact of its being described under a similar figure to that by which a polity had been just previously described. This presumption is more than counterbalanced by the individualizing title of the False Prophet which he bears (Rev. xvi. 13; xix. 20). His characteristics are—(1) "doing great wonders [R. V. "signs"], so that he maketh fire to come down from heaven on the earth in the sight of men" (Rev. xiii. 13). This power of miracle-working, we should note, is not attributed by St. John to the First Beast; but it is one of the chief signs of St. Paul's Adversary, "whose coming is with all power and signs and lying wonders" (2 Thess. ii. 9). (2) "He deceiveth them that dwell on the earth by the means of those miracles which he had power to do [R. V. "by reason of the signs which it was given him to do"] in the sight of the Beast" (Rev. xiii. 14). "He wrought miracles [R. V.

"the signs"] with which he deceived them that had received the mark of the Beast and them that worshipped his image" (Rev. xix. 20). In like manner, no special power of beguiling is attributed to the First Beast; but the Adversary described by St. Paul is possessed of "all deceivableness [R. V. "deceit"] of unrighteousness in them that perish [R. V. "for them that are perishing"], because they received not the love of the truth that they might be saved" (2 Thess. ii. 10). (3) He has horns like a lamb, i.e. he bears an outward resemblance to the Messiah (Rev. xiii. 11); and the Adversary sits in the Temple of God showing himself that he is God (2 Thess. ii. 4). (4) His title is The False Prophet, *ὁ ψευδοπροφήτης* (Rev. xvi. 13; xix. 20); and our Lord, Whom Antichrist counterfeits, is emphatically *ὁ προφήτης*. The *ψευδοπροφήται* of Matt. xxiv. 24 are the forerunners of *ὁ ψευδοπροφήτης*, as John the Baptist of the True Prophet. On the whole, it would seem that if the Antichrist appears at all in the Book of the Revelation it is by this Second Beast or the False Prophet that he is represented. If this be so, it follows that he is an individual person who will at some future time arise, who will ally himself with the corrupted Church, represent himself as her minister and vindicator (Rev. xiii. 12), compel men by violence to pay reverence to her (xiii. 14), breathe a new life into her decaying frame by his use of the secular arm in her behalf (xiii. 15), forbidding civil rights to those who renounce her authority and reject her symbols (xiii. 17), and putting them to death by the sword (xiii. 15), while personally he is an atheistical blasphemer (1 John ii. 22), and sums up in himself the evil spirit of unbelief which has been working in the world from St. Paul's days to his (2 Thess. ii. 7). That it is possible for a professed unbeliever and atheist to make himself the champion of a corrupt system of religion, and to become on political grounds as violent a persecutor in its behalf as the most fanatical bigot could be, has been proved by events which have already occurred, and which might again occur on a more gigantic and terrible scale. The Antichrist would thus combine the forces, generally and happily antagonistic, of Infidelity and Superstition. In this would consist the special horror of the reign of the Antichrist. Hence also the special sufferings of the faithful believers until Christ Himself once again appeared to vindicate the cause of Truth and Liberty and Religion.¹

The sum of Scripture-teaching with regard to the Antichrist, then, appears to be as follows. Already in the times of the Apostles there was the mystery of iniquity, the spirit of Antichrist, at work. It embodied itself in various shapes—in the Gnostic heretics of St. John's days, in

⁵ *Catech.* xv. 9. This lecture of Cyril's contains a very clear statement of the Patriastic view of the Antichrist.

² The only other interpretation of the First Beast and Babylon that deserves notice here is that which is maintained with considerable learning by the late Archdeacon Lee, who considers the First Beast to represent the World-power, the constant adversary of the Church, and Babylon to represent the World-city, whether that be Babylon or Rome, or any other city which concentrates in itself the power of the world at any particular period of history (*Speaker's Commentary: New Test.*, vol. iv., p. 61 sq.).

¹ Archdeacon Lee, in accordance with his system of interpretation, understands the unsanctified intellect of the world to be symbolized by the Second Beast. "The First Beast is a material political world-power; the Second Beast is a spiritual world-power—the power of learning and knowledge, of ideas, of intellectual cultivation. Both are from below, both are beasts, and therefore they are in close alliance. The worldly antichristian wisdom stands in the service of the worldly antichristian power" (*Speaker's Commentary: New Test.*, vol. iv., p. 679).

the Jewish impostors who preceded the fall of Jerusalem, in all heresiarchs and unbelievers, especially those whose heresies had a tendency to deny the Incarnation of Christ, and in the great persecutors who from time to time afflicted the Church. But this Antichristian Spirit was then, and is still, diffused. It had not, and it has not yet, gathered itself into the one person in whom it will be one day completely and fully manifested. There was something which prevented the open manifestation of the Antichrist in the Apostles' days which they spoke of by word of mouth, but were unwilling to name in letters. What this obstacle was, or is, we cannot now know for certain. The general statement of the early writers and fathers is that it was the power of secular law existing in the Roman Empire. The Roman Empire fell, and upon its fall, and in consequence of its fall, there arose a secularization and corruption of the Church, which would not have been so secularized and corrupted had it been kept in check by the jealousy of the imperial power. The secularization and corruption increasing, the Church, which from one point of view and in respect to some of its members was considered as the Church of Christ, from another point of view and in respect to others of its members came to be regarded as no better than an *ἀνομοσαστα*. Time passing on, the corrupt element, getting still more the mastery, gave itself up to be directed from the city of the seven hills, indicated by the mystical Babylon. So far of the past. It would appear further that there is to be evolved from the corrupt Church an individual Antichrist, who, being himself a scoffer and contemner of all religion, will yet act as the Patron and Defender of the corrupt Church, and compel men to submit to her sway by the force of the secular arm and by means of bloody persecutions. He will unite the old foes Superstition and Unbelief in a combined attack on Liberty and Religion. He will have, finally, a power of performing lying miracles and beguiling souls, being the embodiment of Satanic as distinct from brutal wickedness. How long his power will last we are wholly ignorant, as the three and a half times do not refer to his reign (as is usually imagined), but to the continuance of the *ἀνομοσαστα*. We only know that his continuance will be short. At last he will be destroyed together with the corrupt Church, in so far as it is corrupt, at the glorious appearance of Christ, which will usher in the millennial triumph of the faithful and hitherto persecuted members of the Church.

(B.) There are points which require further elucidation:—

1. *The meaning of the name Antichrist.* Mr. Greswell argues at some length that the only correct reading of the word is Counterfeit-Christ or *Pro-Christo*, and denies that the idea of Adversary to Christ is involved in the word. Mr. Greswell's authority is great; but he has been in this case too hasty in drawing his conclusion from the instances which he has cited. It is true that *ἀντί* is not synonymous with *κατά*, but it is impossible to resist the evidence which any Greek Lexicon supplies, that the word *ἀντί*, both in composition and by itself, and still more in composition than alone, will

bear the sense of "opponent to." It is probable that the word Antichrist combines both senses, like the word Antipope, which is very exact in its resemblance, but the primary notion which it conveys would seem rather to be that of antagonism than rivalry (see Greswell, *Exposition of the Parables*, vol. i. p. 372 sq.; Wordsworth, *On the Apocalypse*, p. 512). "It describes one who assuming the guise of Christ opposes Christ" (Westcott, *On the First Epistle of St. John*, ii. 12).

2. *The meaning of τὸ κατέχον.* What is that thing which withholdeth (2 Thess. ii. 6, R. V. "restraineth")? and why is it apparently described in the following verse as a person (*ὁ κατέχων*, A. V. "he who now letteth," R. V. "there is one that restraineth now")? There is a remarkable unanimity among the early Christian writers on this point. They explain the obstacle, known to the Thessalonians but unknown to us, to be the Roman Empire. Thus Tertullian, *De Resur. Carn.* c. 24, and *Ap. l.* c. 32; St. Chrysostom and Theophylact on 2 Thess. ii.; Hippolytus, *De Antichristo*, c. 49; St. Jerome on Dan. vii.; St. Augustine, *De Civ. Dei*, x. 19; Cyril of Jerusalem, *Catech.* xv. 6 (see Dr. H. More's Works, bk. ii. c. 19, p. 690; Mede, bk. iii. c. xiii. p. 656; Alford, *Gk. Test.* iii. 57; Wordsworth, *On the Apocalypse*, p. 520). Theodoret and Theodore of Mopsnestia hold it to be the determination of God. Theodoret's view is embraced by Pelt; the Patristic interpretation is accepted by Wordsworth. Ellicott and Alford so far modify the Patristic interpretation as to explain the obstacle to be the restraining power of human law (*τὸ κατέχον*) wielded by the Empire of Rome (*ὁ κατέχων*) in the time of the Apostles, but now by the several governments of the civilized world. The explanation of Theodoret is untenable on account of St. Paul's further words, "until he be taken out of the way," which are applied by him to the obstacle. There is much to be said for the Patristic interpretation in its plainest acceptance. How should the idea of the Roman Empire being the obstacle to the revelation of Antichrist have originated? There was nothing to lead the early Christian writers to such a belief. They regarded the Roman Empire as idolatrous and abominable, and would have been more disposed to consider it as the precursor of than as the obstacle to the Wicked One. Whatever the obstacle was, St. Paul says that he told the Thessalonians what it was. Those to whom he had preached knew; and every time that his Epistle was publicly read (1 Thess. v. 27), questions would have been asked by those who did not know, and thus the recollection must have been kept up. It is very difficult to see whence the tradition could have arisen except from St. Paul's own teaching. It may be asked, Why then did he not express it in writing as well as by word of mouth? St. Jerome's answer is sufficient: "If he had openly and unreservedly said, 'Antichrist will not come unless the Roman Empire be first destroyed,' the infant Church would have been exposed in consequence to persecution" (*Ad Algas*. Qu. xi. vol. iv. p. 209; Paris, 1706). Remigius gives the same reason, "He spoke obscurely for fear a Roman should perhaps read the Epistle, and raise a persecution against him and the other Christians."

for they held that they were to rule for ever in the world" (*Bib. Patr. Maz.* viii. 1018; see Wordsworth, *On the Apocalypse*, p. 343). It would appear then that the obstacle was probably the Roman Empire, whose very existence served as an obstruction to the development of the *ἐκκοσμία*: and on its being taken out of the way, that is, when the Byzantine Empire could no longer exercise a dominant sway in the West, its place being taken by the novel creation of Charlemagne, which, owing to the vice of its origin, had not the restraining and withholding force of the old Empire, there did occur the "falling away;" Zion the beloved city became Sodom the bloody city—still Zion though Sodom, still Sodom though Zion. According to the view given above, this would be the description of the Church in her present estate, and this will continue to be her estate until the time, times, and half time, during which the evil element is allowed to remain within her, shall have come to their end.¹

3. *What is the Apocalyptic Babylon?* There is not a doubt that by Babylon is figured Rome. The "seven mountains on which the woman sitteth" (Rev. xvii. 9), and the plain declaration, "the woman which thou sawest is that great city which reigneth" (i.e. in St. John's days) "over the kings of the earth" (Rev. xvii. 18), are too strong evidence to be gainsaid. There is no commentator of note, ancient or modern, Romanist or Protestant, who does not acknowledge so much. But *what* Rome is it that is thus figured? There are four chief opinions:—(1) Rome Pagan; (2) Rome Papal; (3) Rome having hereafter become infidel; (4) Rome as a type of the world. That it is old Pagan Rome is the view ably contended for by Bouquet and held in general by the *praeterist* school of interpreters. That it is Rome Papal was held by the Protestants of the 16th century, and by those who preceded and have followed them in their line of interpretation. That it is

Rome having lapsed into infidelity is the view of some of the *futurists*. That it is Rome as the type of the world is suggested or maintained by Tichonius, Primasius, Albert the Great, and in our own days by Dr. Arnold (*On the Interpretation of Prophecy*) and Dr. Newman (*Tracts for the Times*, No. 83). That it must be an unfaithful Church is argued by Bishop Wordsworth, from the uniform use of the word *πόρνη* (e.g. "How is the faithful city become a harlot!" Is. l. 21) in Scripture (*On the Apocalypse*, p. 376), and it is no less decisively maintained by Isaac Williams (*The Apocalypse*, p. 335). A close consideration of the language and import of St. John's prophecy appears, says Mr. Williams, to leave no room for doubt on this point. If this be so, the conclusion seems almost necessarily to follow that the Babylon of the Apocalypse is Papal Rome which gradually raised and enthroned herself on the corrupted Church represented by the First Beast. A very noticeable conclusion follows from hence, which has been little marked by many who have been most anxious to identify Babylon and Rome, viz., that it is impossible that the Pope can be the Antichrist, for Babylon the great, who is seated on the Beast, and the Antichrist are wholly distinct. After Babylon is fallen and destroyed (Rev. xviii.) the Antichrist is still found (Rev. xix.). Indeed there are but few features in the Papal system which recall the portrait of Antichrist as drawn by St. John, however close may be its resemblance to the Apocalyptic Babylon.

4. *What are we to understand by the two Witnesses?* The usual interpretation given in the early Church is that they are Enoch and Elijah, who are to appear in the days of Antichrist, and by him to be killed. St. Hilary of Poitiers substitutes Moses for Enoch; Victorinus, Jeremiah. Joachim would suggest Moses and Elijah taken figuratively for some persons, or, perhaps, orders, actuated by their spirit. Bullinger, Bale, Chytraeus, Pareus, Mede, Vitrings, and Newton understand by them the line of Antipapal remonstrants. Foxe takes them to be Haas and Jerome of Prague; Bossuet, the early Christian martyrs; Herder and Eichhorn, the chief priests Ananias and Jesus slain by the Zealots; Maurice, the priest Jeshua and the judge Zerubbabel as representing Law and Sacrifice; Tichonius and Bede among the more ancient writers, Bishops Andrewes and Wordsworth among the more modern, understand the two Testaments; others the two Sacraments. Archdeacon Lee suggests that one of the witnesses symbolises the Church's outward organization and polity, the other her spiritual and evangelical teaching. Züllig (*Die Offenbarung Johannis*, 1834), Stern (*Commentar über die Offenbarung*, 1854), Bleek (*Vorlesungen über die Apocalypse*, 1862), Reuss (*L'Apocalypse*, 1878), and Professor Sanday (*Authorship of the Fourth Gospel*) return to the idea of Moses and Elijah. Bishop Carpenter (*New Testament Commentary*) regards them as "typical representatives of those who in the strength of God have through the long ages borne witness for Christ against all wrong and falsehood, against a world in arms, or a Church in arms, or against a nominal Christianity in danger of becoming as corrupt and as cruel as heathenism." All that we are able to say is this. The time of their

¹ The latest view on this mysterious subject is one put forth with great ability by Bishop Harold Browne. Considering Antichristianism to be an approaching outbreak of the "volcanic fire of communistic anarchy, joined in close affinity with agnosticism and atheism, lying hidden, or scarcely hidden, beneath all government, and waiting to subvert and submerge all," he accepts the Patristic exposition of the *τὸ κατ'ὸν*: for "the system of law which had its origin in the Roman Republic, which developed in the Roman Empire, and which was finally stamped, sealed, and codified in the Christian Empire, may well have been esteemed a power able to restrain lawlessness of life and even atheism in religion;" but he regards the Roman Empire as not, even formally, dissolved till 1806, and lasting in its law-making effects to the present time, whereas "it would be no great prodigy if those who witness the birth of the twentieth century after Christ were to see us bereft of that power of social order and of iron law tempered by Christian faith, which has come down to us through nineteen centuries from Augustus, in whose reign the Christ was born, through Constantine and Justinian and Charles the Great, and of which even Napoleon coveted the inheritance: 'that which letteth' is apparently in the process of being 'taken out of the way,' and a spirit is growing up, silently gaining strength and ascendancy, which has well-nigh every characteristic of St. Paul's Man of Sin and of St. John's Antichrist" (*The Antichrist—a Sermon preached at the Reading Church Congress*, Oct. 2, 1883).

witnessing is 1260 days, or a time, times, and half a time. This is the same period as that during which the ἀνοστασία and the power of the Beast continue. They would seem therefore to represent all those who in the midst of the faithless are found faithful throughout that time. Their being described as "candlesticks" would lead us to regard them perhaps as Churches. The place of their temporary death, "the great city, which spiritually is called Sodom and Egypt, where also our Lord was crucified," would appear to be Jerusalem, as typifying the corrupted Church. The Beast that kills them is not Antichrist, but the faithless Church.

5. *The Number of the Beast.* Nothing whatever is known about it. No conjecture that has been made is worth mentioning on the ground of its being likely even to approximate to the truth. The usual method of seeking the solution of the difficulty is to select the name of an individual and to count the numerical values of its constituent letters. The extravagant conclusions which have been made to result from this system have naturally brought it into disrepute, but it is certain that it was much more usual, at the time that St. John wrote, to make calculations in this manner than most persons are now aware. On this principle Mercury or Iluuth was invoked under the name of 1218, Jupiter under that of 717, the Sun of 608 or XH; and our Lord's name, Jesus, in Greek letters forms 888. Mr. Elliott quotes an enigma from the Sibylline verses in some way expressing the Name of God, strikingly illustrative of the challenge put forth by St. John, and perhaps formed in part on its model:

Ἐννέα γράμματα ἔχω· τετρασύλλαβός εἰμι· νόμι με.
Αἱ τρεῖς αἱ πρῶται δύο γράμματα ἔχουσιν ἐκάστη.
Ἡ δευτέρα δὲ τὰ λοιπὰ· καὶ εἰσὶν ἀφ᾽ ἑνὸς τὰ πέντε.
Τὸν παντὸς δ' ἀριθμὸν ἑκατοντάδες εἰσὶ δις ὀκτὼ
Καὶ τρεῖς ἑρμηνεύσεις, σὺν γ' ἐπὶ τὰ ἑνὸς δὲ τίς εἰμι,
Οὐκ ἀμύητος ἔσθ' ὁ θεὸς παρ' ἐμοὶ γε σοφίης.

Sibyll. Orac. p. 171; Paris, 1699.

supposed by Mr. Clarke to be Θεὸς σωτήρ. The conjecture made on this principle with respect to the number of the Beast, most worthy of mention, is one which dates as early as the time of Irenaeus, and has held its ground down to the time of Dean Alford and Bishop Wordsworth. Irenaeus suggests, though he does not adopt, the word Λατρεύς. Bishop Wordsworth (1860) thinks it possible, and Dean Alford (1861) has "the strongest persuasion that no other can be found approaching so near to a complete solution." Of other names the chief favourites have been Τεῖταν (Irenaeus), Ἀρνούμ (Hippolytus), Λαμπρῆτις, Ἀντέμος (Tichonius), Γενσηρικος (Rupertus), Κάκος Ὁδηγός, Ἀληθῆς Βλαβερός, Παλαί Βασκανός, Ἀμνος ἀδικός (Aethas), Οὐλπίος (Grotius), Μαομετίς, Ἀροστατής, ἡ Λατὶνὴ Βασιλεῖα (Clarke), Diocles Augustus (Bossuet): Ewald constructs "the Roman Caesar" in Hebrew; Benary, Hitzig, Reuss, Renan, "the Caesar Nero" in the same language. Any one who wishes to know the many attempts that have been made to solve the difficulty—attempta aeldom even relieved by ingenuity—may consult Wolfius, Calmet, Clarke, Wrangham, and Thorn.

Men have looked for Antichrist among their foes, and have tortured the name of the person fixed upon into being of the value of 666 in Greek, Hebrew, or Latin. Hence Latinus under the Roman Emperors, Mahomet at the time of the Saracenic successes, Luther at the Reformation, Napoleon at the French Revolution. The name to be found is not that of Antichrist, but the name of the Beast, which, as we have argued, is not the same as Antichrist—a point in favour of Λατρεύς. A different method of interpretation is adopted by Mr. Isaac Williams, Bishop Wordsworth, Mr. Maurice, Lange (in Herzog's *Real-Encyclopädie*), and Bishop Carpenter (*N. T. Commentary*). There is clearly a symbolical meaning in the numbers used in the Apocalypse; and they would explain the three sixes as a threefold declension from the holiness and perfection symbolised by the number seven.¹ Similarly Dean Vaughan hazards a conjecture that the threefold reiteration of half twelve may be "the symbol of the world, as the full and perfect Twelve is of the Church" (*The Revelation of St. John*). We will add an ingenious suggestion by an anonymous writer, and will leave the subject in the same darkness in which it is probably destined to remain: "At his first appearance," says this writer, "he will be hailed with acclamations and hosannahs as the Redeemer of Israel, another Judas Maccabaeus: and either from the initials of his name, or from the initial letter of some scriptural motto adopted by him, an artificial name will be formed, a cipher of his real name. And that abbreviated name or cipher will be ostentatiously displayed as their badge, their watchword, their shibboleth, their 'Maccabi,' by all his adherents. This artificial name, this mark or symbol of the real name, will be equal by Gematria to 666" (*Jewish Missionary*, p. 52, 1848).

(C.) *Jewish and Mohammedan traditions respecting Antichrist.* The name given by the Jews to Antichrist is אַרְמִיְלִיטָא (Armillus*). There are several Rabbinical books in which a circumstantial account is given of him, such as the "Book of Zerubbabel," and others printed at Constantinople. Buxtorf gives an abridgement of their contents in his *Lexicon*, under the head "Armillus," and in the fiftieth chapter of his *Synagoga Judaica* (p. 717; cp. also *refl.* in Levy, *Chald. Wörterbuch*, and Jastrow's *Talmudic Dict.* s. n.). The name is derived from the Targum of Isaiah xi. 4, which gives "By the word of his mouth the wicked Armillus shall die," for "with the breath of his lips shall he slay the wicked." There will, say the Jews, be ten signs connected with the coming of the Messiah:—1. The appearance of three apostate kings who have fallen away from the faith, but in the sight of men appear to be worshippers of the true God. 2. A terrible heat of the sun. 3. A dew of blood (Joel ii. 30). 4. A healing

¹ An argument for this explanation of the three sixes may be drawn from the fact already mentioned, that the name Ἰησοῦς forms 888 (ιη = 18, σ = 200, ο = 78. υ = 400, ς = 200), which is at the same distance above 777 that 666 is below it.

* Explained as equivalent to Romulus or Abrian, or in other ways (see Dalman, *Der leidende u. d. sterbende Messias*, [1898.] p. 14.

dew for the pious. 5. A darkness will be cast upon the sun (Joel ii. 31) for thirty days (Is. xxiv. 23). 6. God will give universal power to the Romans for nine months, during which time the Roman chieftain will afflict the Israelites; at the end of the nine months God will raise up the Messiah Ben-Joseph, that is, the Messiah of the tribe of Joseph, named Nehemiah, who will defeat the Roman chieftain and slay him. 7. Then there will arise Armillus, whom the Gentiles or Christians call Antichrist. He will be born of a marble statue in one of the churches in Rome. He will go to the Romans and will profess himself to be their Messiah and their God. At once the Romans will believe in him and accept him for their king, and will love him and cling to him. Having made the whole world subject to him, he will say to the Idumeans (i.e. Christians), "Bring me the law which I have given you." They will bring it with their book of prayers; and he will accept it as his own, and will exhort them to persevere in their belief of him. Then he will send to Nehemiah, and command the Jewish Law to be brought him, and proof to be given from it that he is God. Nehemiah will go before him, guarded by 30,000 warriors of the tribe of Ephraim, and will read, "I am the Lord thy God: thou shalt have none other gods but Me." Armillus will say that there are no such words in the Law, and will command the Jews to confess him to be God as the other nations had confessed him. But Nehemiah will give orders to his followers to seize and blind him. Then Armillus in rage and fury will gather all his people in a deep valley to fight with Israel, and in that battle the Messiah Ben-Joseph will fall, and the Angels will bear away his body and carry him to the resting-place of the Patriarchs. Then the Jews will be cast out by all nations, and suffer afflictions such as have not been from the beginning of the world, and the residue of them will fly into the desert, and will remain there forty and five days, during which time all the Israelites who are not worthy to see the Redemption shall die. 8. Then the great Angel Michael will rise and blow three mighty blasts of a trumpet. At the first blast there shall appear the true Messiah Ben-David and the prophet Elijah, and they will manifest themselves to the Jews in the desert, and all the Jews throughout the world shall hear the sound of the trump, and those that have been carried captive into Assyria shall be gathered together; and with great gladness they shall come to Jerusalem. Then Armillus will raise a great army of Christians and lead them to Jerusalem to conquer the new king. But God shall say to Messiah, "Sit thou on My right hand," and to the Israelites, "Stand still and see what God will work for you to-day." Then God will pour down sulphur and fire from heaven (Ezek. xxxviii. 22), and the impious Armillus shall die, and the impious Idumeans (i.e. Christians), who have destroyed the house of our God and have led us away into captivity, shall perish in misery, and the Jews shall avenge themselves upon them, as it is written: "The house of Jacob shall be a fire, and the house of Joseph a flame, and the house of Esau (i.e. the Christians) for stubble, and they shall kindle in them and devour them: there shall not be any remaining

of the house of Esau, for the Lord hath spoken it" (Obad. 18). 9. On the second blast of the trumpet the tombs shall be opened, and Messiah Ben-David shall raise Messiah Ben-Joseph from the dead. 10. The ten tribes shall be led to Paradise, and shall celebrate the wedding-feast of the Messiah. And the Messiah shall choose a bride amongst the fairest of the daughters of Israel, and children and children's children shall be born to him, and then he shall die like other men, and his sons shall reign over Israel after him, as it is written, "He shall prolong his days" (Is. liii. 10), which Rambam explains to mean, "He shall live long, but he too shall die in great glory, and his son shall reign in his stead, and his sons' sons in succession" (Buxtorf, *Synagoga Judaica*, p. 717; Basil. 1661).

The Mohammedan traditions are an adaptation of Christian prophecy and Jewish legend without any originality or any beauty of their own. They, too, have their signs which are to precede the final consummation. They are divided into the greater and lesser signs. Of the greater signs the first is the rising of the sun from the West (cf. Matt. xxiv. 29). The next is the appearance of a Beast from the earth, sixty cubits high, bearing the staff of Moses and the seal of Solomon, with which he will inscribe the word "Believer" on the face of the faithful, and "Unbeliever" on all who have not accepted Islam (comp. Rev. xiii.). The third sign is the capture of Constantinople; while the spoil of which is being divided, news will come of the appearance of Antichrist (*Al Dajjal*), and every man will return to his own home. Antichrist will be blind of one eye and deaf of one ear, and will have the name of Unbeliever written on his forehead (Rev. xiii.). It is he that the Jews call Messiah Ben-David, and say that he will come in the last times and reign over sea and land, and restore to them the kingdom. He will continue forty days, one of these days being equal to a year, another to a month, another to a week, the rest being days of ordinary length. He will devastate all other places, but will not be allowed to enter Mecca and Medina, which will be guarded by Angels. Lastly, he will be killed by Jesus at the gate of Lud. For when news is received of the appearance of Antichrist, Jesus will come down to earth, alighting on the white tower at the east of Damascus, and will say him: Jesus will then embrace the Mahometan religion, marry a wife, and leave children after him, having reigned in perfect peace and security, after the death of Antichrist, for forty years (see Pococke, *Porta Moisi*, p. 258, Oxon. 1655; and Sale, *Koran, Preliminary Discourse*).

Literature.—On the subject of the Antichrist and of the Apocalyptic visions the following is a condensed list of the writers most deserving of attention:—Cyril of Jerusalem, *Catech.* xv. p. 220; Paris, 1720: S. Jerome, *Explan. in Daniel.* v. 617; Veron. 1734. These two writers are exponents of the Patristic view. Andreas, *Comm. in Apoc.*, Bibl. Patr. Max. v. 590; Arethas, *Comm. in Apoc.*, Bibl. Patr. Max. ix. 741; Abbas Joachim (founder of the Antipapal school), *Exp. Apoc.*, Venet. 1519; Wickliffe, *De Christo et suo adversario Antichristo*, Works, vol. ii. Lond. 1883; Ribera (founder of the later school of Futurists), *Comm. in Apoc.*,

Salam. 1591; Alcasar (founder of the Praerist school), *Vestigatio Arcani Sensus in Apoc.*, Antv. 1614; Pareus, *Comm. in Apoc.*, Heidelb. 1618; Cornelius a Lapide, *Comm. in Apoc.*, Antv. 1627; Mede, *Clavis Apocalypt.*, Cantab. 1632; Bossuet, *L'Apocalypse, avec une Explication*, Œuvres, vol. iii. Paris, 1819; Vitringa, *Anacrisis Apocalyps.*, Amst. 1719; Daubuz, *Comm. on Rev.*, Lond. 1720; Hug, *Einleitung in die Schriften des Neuen Test.*, Stuttg. 1821; Bengel, *Erklärte Offenbarung Johannis*, Stuttg. 1834; Herder, *Johannis Offenbarung*, Werke, xii. Stuttg. 1827; Eichhorn, *Comm. in Apoc.*, Götting. 1791; Ewald, *Comm. in Apoc.*, Lips. 1828; Lücke, *Vollständige Einleitung in die Offenbarung und die Apocalypst. Literatur*, Comm., iv., Bonn. 1834; *Tracts for the Times*, v. No. 83, Lond. 1839; Greswell, *Exposition of the Parables*, vol. i. Oxf. 1834; Moses Stuart, *Comm. on the Apoc.*, Edinb. 1847; Wordsworth, *On the Apocalypse*, Lond. 1849, and *Gk. Test.*, Lond. 1860; Elliott, *Horae Apocalypicae*, Lond. 1862; Clissold, *Apocalyptic Interpretation* (Swedenborgian), Lond. 1845; C. Maitland, *Prophetic Interpretation*, Lond. 1849; Williams, *The Apocalypse*, Lond. 1852; S. R. Maitland, *Attempt to elucidate the Prophecies concerning Antichrist*, Lond. 1853; Alford, *Greek Test. (Proleg. in Thess. et in Apoc.)*, Lond. 1866; Ellicott, *Comm. in Thess.*, Lond. 1862; Düsterdieck, *Handbuch über die Offenbarung Johannis*, 1859; Renan, *L'Antichrist*, Paris, 1873; Gebhardt, *The Doctrine of the Apocalypse* (Eng. tr., Edinb.), 1873; Reuss, *L'Apocalypse*, 1878; Mason, *Notes and Excursus on the Interpretation of the Prophecy 2 Thess. ii. 3-12*, in *Ellicott's New Testament Commentary*, Lond. (without date); Carpenter, *Notes and Excursus B. on the Revelation*, in the same; Alexander, *Note on the Man of Sin*, 2 Thess. ii. 3, in *the Speaker's Commentary*, Lond. 1881; Lee, *The Revelation of St. John the Divine*, in the same; Harold Browne, *The Antichrist*, Lond. 1883. See also article on THESSALONIANS, SECOND EPISTLE TO THE, in this Dictionary, and ANTICHRIST in the Dictionary of Christian Biography. [F. M.]

ANTILIBANUS (Ἀντιλίβανος; Antilibanus). Only occurs in Judith i. 7. The easternmost of the two parallel ranges which enclose Coele-Syria; elsewhere (Josh. xiii. 5) described as "all Lebanon, toward the sunrise." [LEBANON.] [W.]

ANTIOCH (Ἀντιόχεια). 1. In SYRIA. The capital of the Greek kings of Syria, and afterwards the residence of the Roman governors of the province which bore the same name. This metropolis was situated where the chain of Lebanon, running northwards, and the chain of Amanus, running southwards from the Taurus, are brought to an abrupt meeting. Here the Orontes breaks through the mountains; and Antioch was placed at a bend of the river, partly on an island, partly on the level which forms the left bank, and partly on the steep and craggy ascent of Mount Silpius, which rose abruptly on the south. In the immediate neighbourhood was Daphne, the celebrated sanctuary of Apollo (2 Macc. iv. 33); whence the city was sometimes called ANTIOCH by

DAPHNE, to distinguish it from other cities of the same name.

No city, after Jerusalem, is so intimately connected with the history of the Apostolic Church. Certain points of close association between these two cities, as regards the progress of Christianity, may be noticed in the first place. One of the seven deacons, or almoners appointed at Jerusalem, was Nicolas, a proselyte of Antioch (Acts vi. 5). The Christians, who were dispersed from Jerusalem at the death of Stephen, preached the Gospel at Antioch (ib. xi. 19). It was from Jerusalem that Agabus and the other prophets, who foretold the famine, came to Antioch (ib. xi. 27, 28); and Barnabas and Saul were consequently sent on a mission of charity from the latter city to the former (ib. xi. 30, xii. 25). It was from Jerusalem again that the Judaizers came, who disturbed the church at Antioch (ib. xv. 1); and it was at Antioch that St. Paul rebuked St. Peter for conduct into which he had been betrayed through the influence of emissaries from Jerusalem (Gal. ii. 11, 12).

The chief interest of Antioch, however, is connected with the progress of Christianity among the heathen. Here the first Gentile Church was founded (Acts xi. 20, 21); here the disciples of Jesus Christ were first called Christians (xi. 26); here St. Paul exercised (so far as is distinctly recorded) his first systematic ministerial work (xi. 22-26; see xiv. 26-28; also xv. 35, xviii. 23); hence he started at the beginning of his first missionary journey (xiii. 1-3), and hither he returned (xiv. 25). So again after the Apostolic Council (the decrees of which were specially addressed to the Gentile converts at Antioch, xv. 23), he began and ended his second missionary journey at this place (xv. 36, xviii. 22). This too was the starting-point of the third missionary journey (xviii. 23), which was brought to a termination by the imprisonment at Jerusalem and Caesarea. Though St. Paul was never again, so far as we know, at Antioch, it did not cease to be an important centre for Christian progress; but it does not belong to this place to trace its history as a patriarchate, and its connexion with Ignatius, Chrysostom (see *Dict. of Christian Biography*, s. n.), and other eminent names.

Antioch was founded in the year 300 B.C. by Seleucus Nicator, with circumstances of considerable display, which were afterwards embellished by fable. The situation was well chosen, both for military and commercial purposes. Jews were settled there from the first in large numbers, were governed by their own ethnarch, and allowed to have the same political privileges as the Greeks (Joseph. *Ant.* xii. 3, § 1; c. *Ap.* ii. 4). Antioch grew under the successive Seleucid kings, till it became a city of great extent and of remarkable beauty. Some of the most magnificent buildings were on the island. One feature, which seems to have been characteristic of the great Syrian cities,—a vast street with colonnades, intersecting the whole from end to end,—was added by Antiochus Epiphanes. Some lively notices of the Antioch of this period, and of its relation to Jewish history, are supplied by the Books of Maccabees (see especially 1 Macc. iii. 37, *ii.* 13; 2 Macc. iv. 7-9, v. 21, xi. 36).

It is the Antioch of the Roman period with which we are concerned in the N. T. By Pompey it had been made a free city, and such it continued till the time of Antoninus Pius. The early emperors raised there some large and important structures, such as aqueducts, amphitheatres, and baths. Herod the Great contributed a road and a colonnade (Joseph. *Ant.* xvi.

5, § 3; *B. J.* i. 21, § 11). Here should be mentioned that the citizens of Antioch under the Empire were noted for acurrilous wit and the invention of nicknames. This perhaps was the origin of the name by which the disciples of Jesus Christ were designated, and which was probably given by Romans to the despised sect, and not by Christians to themselves.

Antioch on the Orontes.

The great authority for all that is known of ancient Antioch is C. O. Müller's *Antiquitates Antiochenae* (Gött. 1839). Modern *Antakia* is a shrunken and miserable place. Some of the

view of a gateway which still bears the name of St. Paul. One error, however, should be pointed out, which has found its way into the above-named volumes from Calmet: namely, Jerome's erroneous identification of Antioch with the Riblah of the Old Testament (see *Dict. G. and R. Geog.*, art. "Antiocheia").

2. ANTIOCH IN PISIDIA (Acts xiii. 14, xiv. 19, 21; 2 Tim. iii. 11). The position of this town is clearly pointed out by Strabo in the following words (xii. p. 577):—"In the district of Phrygia called Paroreia, there is a certain mountain-ridge, stretching from E. to W. On each side there is a large plain below this ridge; and it has two cities in its neighbourhood: Philemelium on the north, and on the other side Antioch, called Antioch near Pisidia. The former lies entirely in the plain; the latter (which has a Roman colony) is on a height." The relations of distance also between Antioch and other towns are known by the Peutingerian table. Its site was discovered by Mr. Arundell, the British chaplain at Smyrna, who undertook a journey in 1833 for the express purpose of identifying the Pisidian Antioch (Arundell's *Asia Minor*, chs. xii. xiii. xiv.). The ruins are very considerable, and include those of a temple, theatre, church, and fine aqueduct. This discovery was fully confirmed by Mr. Hamilton (*Res. in Asia Minor*, vol. i. ch. 27; Vaux, *Gk. Cities and Islands of Asia Min.* p. 111). Antioch corresponds to *Yalovatch*, which is distant from *Ak-shehr* (Philomelium) six hours over the mountains.

Gate of St. Paul, Antioch on the Orontes.

walls, shattered by earthquakes, have a striking appearance on the crags of Mount Silpine. They are described in Chesney's account of the *Euphrates Expedition*, where also is given a

This city, like the Syrian Antioch, was founded by Seleucus Nicator. Under the Romans it became a *colonia*, and was also called Caesarea, as we learn from Pliny (v. 24). The former fact is confirmed by the Latin inscriptions and other features of the coins of the place; the latter by inscriptions discovered on the spot by Mr. Hamilton.

The occasion on which St. Paul visited the city for the first time (Acts xiii. 14) was very interesting and important. His preaching in the synagogue led to the reception of the Gospel by a great number of the Gentiles: and this resulted in a violent persecution on the part of the Jews, who first, using the influence of some of the wealthy female residents, drove him from Antioch to Iconium (vv. 50, 51), and subsequently followed him even to Lystra (Acts xiv. 19). St. Paul, on his return from Lystra, revisited Antioch for the purpose of strengthening the minds of the disciples (v. 21). These events happened when he was on his first missionary journey, in company with St. Barnabas. He probably visited Antioch again at the beginning of his second journey, when Silas was his associate, and Timotheus, who was a native of this neighbourhood, had just been added to the party. The allusion in 2 Tim. iii. 11 shows that Timotheus was well acquainted with the sufferings which the Apostle had undergone during his first visit to the Pisidian Antioch. See *Dict. G. and R. Geog.*, art. "Antiocheia," 7. [PHRYGIA; PISIDIA.] [J. S. H.] [W.]

ANTIO'CHIA (NA. [usually] 'Αντιόχεια, B. [1 Macc. iv. 35] 'Αντιόχεια; *Antiochia*). ANTIOCH 1 (1 Macc. iv. 35, vi. 63; 2 Macc. iv. 33, v. 21). [W. A. W.] [F.]

ANTIO'CHIANS ('Αντιόχεις; *Antiocheni*). Partisans of Antiochus Epiphanes, including Jason and the Hellenizing faction (2 Macc. iv. 9, 19). In the latter passage the Vulgate has *viros peccatores*. [W. A. W.] [F.]

ANTI'OCHIS ('Αντιόχης; *Antiochis*). The concubine of Antiochus Epiphanes (2 Macc. iv. 30). [W. A. W.] [F.]

ANTI'OCHUS ('Αντιόχος; A. 'Αντιόχος in 1 Macc. xii. 16; *Antiochus*). Father of Numenius, one of the ambassadors from Jonathan to the Romans (1 Macc. xii. 16, xiv. 22). [W. A. W.] [F.]

ANTI'OCHUS II. ('Αντιόχος, the with-stander), king of Syria, surnamed the god (Θεός) "in the first instance by the Milesians, because he overthrew their tyrant Timarchus" (App. Syr. 65), succeeded his father Antiochus (Σωτήρ, the Saviour) in B.C. 261. During the earlier part of his reign he was engaged in a fierce war with Ptolemaeus Philadelphus, king of Egypt (*totis viribus dimicavit*, Hieron. *ad Dan.* xi. 6), in the course of which Parthia and Bactria revolted and became independent kingdoms. At length (B.C. 250) peace was made, and the two monarchs "joined themselves together" (Dan. xi. 6), and Ptolemy ("the king of the south") gave his daughter Berenice in marriage to Antiochus ("the king of the north"), who set aside his former wife, Laodice, to receive her. After some time, on the death of Ptolemy (B.C. 247), Antiochus recalled Lao-

dice and her children Seleucus and Antiochus to court. Thus Berenice was "not able to retain her power;" and Laodice, in jealous fear lest she might a second time lose her ascendancy, poisoned Antiochus (him "that supported her," i.e. Berenice), and caused Berenice and her infant son to be put to death, B.C. 246 (Dan. xi. 6; Hieron. *ad Dan.* i. c.; App. Syr. 65).

After the death of Antiochus, Ptolemaeus Euergetes, the brother of Berenice ("out of a branch of her root"), who succeeded his father, Ptol. Philadelphus, exacted vengeance for his sister's death by an invasion of Syria, in which Laodice was killed, her son Seleucus Callinicus driven for a time from the throne, and the whole country plundered (Dan. xi. 7-9; Hieron. *l. c.*; hence his surname "the benefactor"). The hostilities thus renewed continued for many years; and on the death of Seleucus B.C. 226, after his "return into his own land" (Dan. xi. 9), his sons Alexander (Seleucus), Keranus, and Antiochus "assembled a great multitude of forces" against Ptol. Philopator, the son of Euergetes, and "one of them" (Antiochus) threatened to overthrow the power of Egypt (Dan. xi. 9, 10; Hieron. *l. c.*). [B. F. W.] [R.]

ANTI'OCHUS III., surnamed the Great (μέγας), succeeded his brother Seleucus Keranus, who was assassinated after a short reign in B.C. 223. He prosecuted the war against Ptol. Philopator with vigour, and at first with success. In B.C. 218 he drove the Egyptian forces to Sidon, conquered Samaria and Gilead, and wintered at Ptolemais, but was defeated next year at Raphia, near Gaza (B.C. 217), with immense loss, and in consequence made a peace with Ptolemy, in which he ceded to him the disputed provinces of Coele-Syria, Phoenicia, and Palestine (Dan. xi. 11, 12; Polyb. v. 40 ff., 53 ff.). During the next thirteen years Antiochus was engaged in strengthening his position in Asia Minor and on the frontiers of Parthia, and by his successes gained his surname of the Great. At the end of this time, B.C. 205, Ptolemaeus Philopator died, and left his kingdom to his son Ptol. Epiphanes, who was only five years old. Antiochus availed himself of the opportunity which was offered by the weakness of a minority and the unpopularity of the regent, to unite with Philip III. of Macedon for the purpose of conquering and dividing the Egyptian dominions. The Jews, who had been exasperated by the conduct of Ptol. Philopator both in Palestine and Egypt, openly espoused his cause, under the influence of a short-sighted policy ("the factions among thy people shall rise," i.e. against Ptolemy; Dan. xi. 14). Antiochus succeeded in occupying the three disputed provinces, but was recalled to Asia by a war which broke out with Attalus, king of Pergamus; and his ally Philip was himself embroiled with the Romans. In consequence of this diversion Ptolemy, by the aid of Scopas, again made himself master of Jerusalem (Joseph. *Ant.* xii. 3, 3) and recovered the territory which he had lost (Hieron. *ad Dan.* xi. 14). In B.C. 198 Antiochus reappeared in the field and gained a decisive victory "near the sources of the Jordan" (Joseph. *Ant.* xii. 3, 3; Hieron. *l. c.* "ubi Paneas nunc condita est"), and afterwards captured Scopas and the remnant of his forces which had taken refuge in Sidon

(Dan. xi. 15). The Jews, who had suffered severely during the struggle (Joseph. *l. c.*), welcomed Antiochus as their deliverer, and "he stood in the glorious land which by his hand was to be consumed" (Dan. xi. 16). His further designs against Egypt were frustrated by the intervention of the Romans: and his daughter Cleopatra (Polyb. xxviii. 17), whom he gave in marriage to Ptol. Epiphanes, with the Phœnician provinces for her dower (Joseph. *Ant.* xii. 4, § 1), favoured the interests of her husband rather than those of her father (Dan. xi. 17; Hieron. *l. c.*). From Egypt Antiochus turned again to Asia Minor, and after various successes in the Aegean crossed over to Greece, and by the advice of Hannibal entered on a war with Rome. His victorious course was checked at Thermopylae (B.C. 191), and after subsequent reverses he was finally defeated at Magnesia in Lydia, B.C. 190.* By the peace which was concluded shortly afterwards (B.C. 188) he was forced to cede all his possessions "on the Roman side of M. Taurus," and to pay in successive instalments an enormous sum of money to defray the expenses of the war (15,000 Euboic talents: App. *Syr.* 38). This last condition led to his ignominious death. In B.C. 187 he attacked a

ANTIOCHUS IV. EPIPHANES (*Ἐπιφανής, the Illustrious*, also called *Θεός*, and in mockery *ἑμμανής, the frantic*: Athen. x. 438; Polyb. xvi. 10) was the youngest son of Antiochus the Great. He was given as a hostage to the Romans (B.C. 188) after his father's defeat at Magnesia. In B.C. 175 he was released by the intervention of his brother Seleucus, who substituted his own son Demetrius in his place. Antiochus was at Athens when Selencus was assassinated by Heliodorus. He took advantage of his position, and, by the assistance of Eumenes and Attalus, easily expelled Heliodorus, who had usurped the crown, and himself "obtained the kingdom by flatteries" (Dan. xi. 21; cp. Liv. xli. 20), to the exclusion of his nephew Demetrius (Dan. viii. 7).

The accession of Antiochus was immediately followed by desperate efforts of the Hellenizing party at Jerusalem to assert their supremacy. Jason (Jesus: Jos. *Ant.* xii. 5, § 1, see JASON), the brother of Onias III., the high-priest, persuaded the king to transfer the high-priesthood to him, and at the same time bought permission (2 Macc. iv. 9) to carry out his design of habituating the Jews to Greek customs (2 Macc. iv. 7, 20). Three years afterwards Menelaus, of the tribe of Benjamin [SIMON], who was commissioned by Jason to carry to Antiochus the price of his office, supplanted Jason by offering the king a larger bribe, and was himself appointed high-priest, while Jason was obliged to take refuge among the Ammonites (2 Macc. iv. 23-26). From these circumstances and from the marked honour with which Antiochus was received at Jerusalem very early in his reign (c. B.C. 173; 2 Macc. iv. 22), it appears that he found no difficulty in regaining the border provinces which had been given as the dower of his sister Cleopatra to Ptol. Epiphanes. But his ambition led him still further, and he undertook four campaigns

Tetradrachm (Attic talent) of Antiochus III.

Obv.: Head of King to right. Rev.: ΒΑΣΙΛΕΥΣ ΑΝΤΙΟΧΟΥ. In field, two monograms. Apollo, naked, seated on cithara, to left.

rich temple of Belus in Elymais, and was slain by the people who rose in its defence (Strab. xvi. 744; Just. xxxii. 2). Thus "he stumbled and fell, and was not found" (Dan. xi. 19).

The policy of Antiochus towards the Jews was liberal and conciliatory. He not only assured to them perfect freedom and protection in the exercise of their worship, but according to Josephus (*Ant.* xii. 3, § 3), in consideration of their great sufferings and services in his behalf, he made splendid contributions towards the support of the Temple ritual, and gave various immunities to the priests and other inhabitants of Jerusalem. At the same time imitating the example of Alexander and Seleucus, and appreciating the influence of their fidelity and unity, he transported two thousand families of Jews from Mesopotamia to Lydia and Phrygia, to repress the tendency to revolt which was manifested in those provinces (Joseph. *Ant.* l. c.). Two sons of Antiochus occupied the throne after him,—Seleucus Philopator, his immediate successor, and Antiochus IV., who gained the kingdom upon the assassination of his brother.

[B. F. W.] [R.]

against Egypt, B.C. 171, 170, 169, 168, with greater success than had attended his predecessor, and the complete conquest of the country was prevented only by the interference of the Romans (Dan. xi. 24; 1 Macc. i. 16 ff.; 2 Macc. v. 11 sq.; cp. the story of Popilius Laenas, Liv. xlv. 11, 12; Polyb. xxix. 11). The course of Antiochus was everywhere marked by the same wild prodigality as had signalised his occupation of the throne (Dan. l. c.). The consequent exhaustion of his treasury, and the armed conflicts of the rival high-priests whom he had appointed, furnished the occasion for an assault upon Jerusalem on his return from his second Egyptian campaign (B.C. 170), which he had probably planned in conjunction with Ptol. Philometor, who was at that time in his power (Dan. xi. 26). The Temple was plundered, a terrible massacre took place, and a Phrygian governor was left with Menelaus in charge of the city (2 Macc. v. 1-22; 1 Macc. i. 20-28). Two years afterwards, at the close of the fourth Egyptian expedition (Polyb. xxix. 1, 11; App. *Syr.* 66; cp. Dan. xi. 29, 30), Antiochus detached a force under Apollonius to occupy Jerusalem and fortify it, and at this time he availed himself of the assistance of the ancestral enemies of the Jews (1 Macc. iv. 61, v. 3 sq.; Dan. xi. 41). The decrees then fol-

* The statement in 1 Macc. viii. 6, that Antiochus was taken prisoner by the Romans, is not supported by any other testimony.

lowed which have rendered his name infamous. The Temple was desecrated, and the observance of the Law was forbidden. "On the fifteenth day of Cisleu [the Syrians] set up the abomination of desolation (i.e. an idol altar: 1 Macc. v. 59) on the altar."* Ten days afterwards an offering was made upon it to Jupiter Olympius. At Jerusalem all opposition appears to have ceased; but Mattathias and his sons organised a resistance ("holpen with a little help," Dan. xi. 34), which preserved inviolate the name and faith of Israel. Meanwhile Antiochus turned his arms to the East, towards Parthia (Tac. *Hist.* v. 8) and Armenia (App. *Syr.* 45; Diod. *ap.* Müller, *Fragm.* ii. p. 10; Dan. xi. 40). Hearing not long afterwards of the riches of a temple of Nanea ("the desire of women," Dan. xi. 37) in Elymais, hung with the gifts of Alexander, he resolved to plunder it. The attempt was defeated; and though he did not fall like his father in the act of sacrilege, the event hastened his death. He retired to Babylon, and thence to Tabae in Persia, where he died B.C. 164, the victim of superstition, terror, and remorse (Polyb. xxi. 2; Joseph. *Ant.* xii. 8, § 1), having first heard of the successes of the Maccabees in restoring the Temple-worship at Jerusalem (1 Macc. vi. 1-16; cp. 2 Macc. i. 7-17?). "He came to his end, and there was none to help him" (Dan. xi. 45. Cf. App. *Syr.* 45; Liv. xli. 24-5, xlii. 6, xlii. 19, xlv. 11-13; Joseph. *Ant.* xii. 5, 8).

The reign of Antiochus, thus shortly traced, was the last great crisis in the history of the Jews before the coming of our Lord. The prominence which is given to it in the Book of Daniel fitly accords with its typical and representative character (Dan. vii. 8, 25, viii. 11 sq.). The conquest of Alexander had introduced the forces of Greek thought and life into the Jewish nation, which was already prepared for their operation [ALEXANDER]. For more than a century and a half these forces had acted powerfully both upon the faith and upon the habits of the people; and the time was come when an outward struggle alone could decide whether Judaism was to be merged in a rationalised Paganism, or to rise not only victorious from the conflict, but more vigorous and more pure. There were many symptoms which betokened the approaching struggle. The position which Judaea occupied on the borders of the conflicting empires of Syria and Egypt, exposed equally to the open miseries of war and the treacherous favours of rival sovereigns, rendered its national condition precarious from the first, though these very circumstances were favourable to the growth of freedom. The terrible crimes by which the wars of "the North and South" were

stained, must have alienated the mind of every faithful Jew from his Grecian lords, even if persecution had not been superadded from Egypt first and then from Syria. Politically nothing was left for the people in the reign of Antiochus but independence, or the abandonment of every prophetic hope. Nor was their social position less perilous. The influence of Greek literature, of foreign travel, of extended commerce, had made itself felt in daily life. At Jerusalem the mass of the inhabitants seem to have desired to imitate the exercises of the Greeks; and a Jewish embassy attended the games of Hercules at Tyre (2 Macc. iv. 9-20). Even their religious feelings were yielding; and before the rising of the Maccabees no opposition was offered to the execution of the king's decrees. Upon the first attempt of Jason the "priests had no courage to serve at the altar" (2 Macc. iv. 14; cp. 1 Macc. i. 43); and this not so much from wilful apostasy, as from a disregard of the vital principles involved in the conflict. Thus it was necessary that the final issues of a false Hellenism should be openly seen that it might be discarded for ever by those who cherished the ancient faith of Israel.

The conduct of Antiochus was in every way suited to accomplish this end; and yet it seems

Tetradrachm (Attic talent) of Antiochus IV. Epiphanes.

Obv.: Head of King, to right. Rev.: ΒΑΣΙΛΕΥΣ ΑΝΤΙΟΧΟΥ ΘΕΟΥ ΕΠΙΦΑΝΟΥΣ ΝΙΚΗΦΟΡΟΥ. Jupiter, seated to left, holding a Victory. In field, monogram.

to have been the result of passionate impulse rather than of any deep-laid scheme to extirpate a strange creed. At first he imitated the liberal policy of his predecessors; and the occasion for his attacks was furnished by the Jews themselves. Even the motives by which he was finally actuated were personal, or at most only political. Able, energetic (Polyb. xxvii. 17), and liberal to profusion, Antiochus was reckless and unscrupulous in the execution of his plans. He had learnt at Rome to court power and to dread it. He gained an empire, and he remembered that he had been a hostage. Regardless himself of the gods of his fathers (Dan. xi. 37), he was incapable of appreciating the power of religion in others; and, like Nero in later times, he became a type of the enemy of God [comp. LXX. Version of Dan. xi. 36 with 2 Thess. ii. 4], not as the Roman emperor by the perpetration of unnatural crimes, but by the disregard of every higher feeling. "He magnified himself above all." The real deity whom he recognised was the Roman war-god, and fortresses were his most sacred temples (Dan. xi. 38 ff.; Ewald, *Gesch. des Volkes Isr.* iv. 340).^b

* This altar is generally identified with the abomination of desolation (בְּמִקְדָּשׁ) spoken of in Dan. ix. 27, xi. 31, xli. 11 (cp. Matt. xxiv. 15), where the LXX. rendering βάβυλωνα ἐρημώσαντα is the same as that which in 1 Macc. i. 54 is applied to the altar of Zeus erected by Antiochus Epiphanes. The enormity of this insult was intensified by the fact, that Antiochus had accepted Νεαρχόπουλος as his own title, appropriating to himself the attributes of the Olympian Zeus (cp. Dan. xi. 38, 39), whose altar he erected (Joseph. *Ant.* xii. § 5). At Gerizim, the Samaritan sanctuary, he instituted the worship of Zeus Xenios. [ABOMINATION OF DESOLATION.]

^b By the Jews he was regarded as the typical Antichrist, the union of power with the defiance of every-

Confronted with such a persecutor, the Jew realized the spiritual power of his faith. The evils of heathendom were seen concentrated in a personal shape. The outward forms of worship became invested with something of a sacramental dignity. Common life was purified and ennobled by heroic devotion. An independent nation asserted the integrity of its hopes in the face of Egypt, Syria, and Rome. Cp. Schürer, *Gesch. d. Jüdischen Volkes*,² i. 147, &c.

[B. F. W.] [R.]

ANTIOCHUS V. EUPATOR (Εὐπάτωρ, of noble descent) succeeded his father Antiochus IV. B.C. 164, while still a child, under the guardianship of Lysias (App. *Syr.* 46; 1 Macc. iii. 32 f., vi. 17), though Antiochus had assigned this office to Philip, his own foster-brother, on his death-bed (1 Macc. vi. 14 f., 55; 2 Macc. ix. 29). Shortly after his accession he marched against Jerusalem with a large army, accompanied by Lysias, to relieve the Syrian garrison, which was hard-pressed by Judas Maccabaeus (1 Macc. vi. 19 ff.). He repulsed Judas at Bethzacharia, and took Bethsura (Bethzur) after a vigorous resistance (1 Macc. vi. 31-50). But when the Jewish force in the Temple was on the point of yielding, Lysias persuaded the king to conclude a hasty peace that he might advance to meet Philip, who had returned from Persia and made himself master of Antioch (1 Macc. vi. 51 sq.; Joseph. *Ant.* xii. 9, § 5). Philip was speedily overpowered (Joseph. *l. c.*); but in the next year (B.C. 162) Antiochus and Lysias fell into the hands of Demetrius Soter, the son of Seleucus Philopator, who caused them to be put to death in revenge for the wrongs which he had suffered from Antiochus Epiphanes (1 Macc. vii. 2-4; 2 Macc. xiv. 1, 2; Joseph. *Ant.* xii. 10, § 1; Polyb. xxxi. 19). [B. F. W.] [R.]

ANTIOCHUS VI. (Αλέξανδρος Ἀλεξάνδρου τοῦ νέου, App. *Syr.* 68; nicknamed Θεός,

Cleopatra (App. *Syr.* l. c.). After his father's death (146 B.C.) he remained in Arabia; but though still a child (παῖς, App. *l. c.*; παῖς δέσποινος νεώτερος, 1 Macc. xi. 54), he was soon afterwards brought forward (c. 45 B.C.) as a claimant to the throne of Syria against Demetrius Nicator by Tryphon or Diodotus (1 Macc. xi. 39; App. *Syr.* 68; Strab. xiv. p. 668, xvi. p. 752), who had been an officer of his father. Tryphon succeeded in gaining Antioch (1 Macc. xi. 56); and afterwards the greater part of Syria submitted to the young Antiochus. Jonathan, who was confirmed by him in the high-priesthood (1 Macc. xi. 57) and invested with the government of Judaea, contributed greatly to his success [ALEXANDER BALAS], occupying Ascalon and Gaza, and reducing the country as far as Damascus (1 Macc. xi. 60-2). He afterwards defeated the troops of Demetrius at Hazor (1 Macc. xi. 67; cp. *Speaker's Comm.* l. c.) near Cadash (v. 73); and repulsed a second attempt which he made to regain Palestine (1 Macc. xii. 24 sq.). Tryphon having now gained the supreme power in the name of Antiochus, no longer concealed his design of usurping the crown. As a first step he took Jonathan by treachery and put him to death, B.C. 143 (1 Macc. xii. 40 sq.); then he murdered the young king, and ascended the throne (1 Macc. xiii. 31; Joseph. *Ant.* xiii. 5, § 6; App. *Syr.* 68. Livy [*Epit.* 53] says incorrectly *decem annos admodum habens* . . .; Diod. ap. Müller, *Fragm.* ii. 19; Just. xxxvi. 1). [B. F. W.] [R.]

ANTIOCHUS VII. SIDETES (Σιδήτης, of Side, in Pamphylia: not from Σῆς, a hunter: Plut. *Apophth.* p. 34; called also Εὐσεβής, the pious, Joseph. *Ant.* xiii. 8, § 2; Euseb. *Chron. Arm.* l. 349), king of Syria, was the second son of Demetrius I. When his brother, Demetrius Nicator, was taken prisoner (c. 141 B.C.) by Mithridates I. (Arsaces VI., 1 Macc. xiv. 2) king of Parthia, he married Cleopatra (App. *Syr.* 68; Just. xxxvi. 1) and obtained possession of the throne (137 B.C.), having expelled the usurper Tryphon (1 Macc. xv. 1 sq.; Strab. xiv. p. 688). At first he made a very advantageous treaty with Simon, who was now "high priest and prince of the Jews;" but when he grew independent of his help, he withdrew the concessions which he had made and demanded the surrender of the fortresses which the Jews held, or an equivalent in money (1 Macc. xv. 26 sq.; Joseph. *Ant.* xiii. 7, § 3). As Simon was unwilling to yield to his demands, he sent a force under Cendebaeus against him, who occupied a fortified position at Cedron (?) (1 Macc. xv. 39), near Axotus, and harassed the surround-

ing country. After the defeat of Cendebaeus by the sons of Simon and the destruction of his works (1 Macc. xvi. 1-10), Antiochus, who had returned from the pursuit of Tryphon, undertook an expedition against Judaea in person. He laid siege to Jerusalem, but according to Josephus granted honourable terms to John Hyrcanus (B.C. 133), who had made a vigorous resistance (Joseph. *Ant.* xiii. 8; yet comp. Porphy. ap. Euseb. *Chron. Arm.* i. 349, *muros urbis demolitur atque electissimos eorum trucidat*).

Joseph. *Ant.* xiii. 7, § 1; and *ἐπιφανὴς Διονύσος* on coins) was the son of Alexander Balas and

thing that was divine. It has been observed that the period of three and a half years, during which the Antichrist of St. John's Apocalypse (xiii. 5) is permitted to work evil, agrees with the interval of time which, according to some Jewish traditions, elapsed between the pollution of the Temple and the death of the persecutor, or, according to others, between the pollution of the Temple and its dedication.

Antiochus next turned his arms against the Parthians, and Hyrcanus accompanied him in the campaign. But after some successes, he was entirely defeated by Phraortes II. (Arsaces VII.), and fell in the battle c. B.C. 127-6 (Joseph. l. c.; Just. xxxvi., xxxviii. 10; App. *Syr.* 68, *ἐκτείνει τὰυτὸν*). For the year of his death, cp. Niebuhr, *Al. Schrift.* i. 251 sq.; Clinton, *F. H.* ii. 332 sq.) [B. F. W.] [R.]

ANTIPAS (*Ἀντίπας*; *Antipater*). A martyr at Pergamos, and, according to tradition, Bishop of that place (Rev. ii. 13. See note in *Speaker's Commentary*). He is said to have been martyred under Domitian by being cast into a burning brazen bull (*Menol. Gr.* iii. 51). His day in the Greek calendar is April 11. [W. A. W.] [F.]

ANTIPAS. [HEROD.]

ANTIPATER (*Ἀντίπατρος*; *Antipater*), son of Jason, ambassador from the Jews to the Lacedaemonians (1 Macc. xii. 16, xiv. 22). [G.]

ANTIPATRIS (*Ἀντίπατρος*), a town on the military road from Jerusalem to Caesarea, to which St. Paul was "brought by night" (Acts xxiii. 31), when Claudius Lysias sent him, under escort, from Jerusalem to the governor of Caesarea. The escort, a mixed force of horse and foot, paraded at the third hour of the night, and, marching throughout the night, reached Antipatris next morning; the footmen then returned to Jerusalem, whilst the horsemen escorted St. Paul across the plain to Caesarea.

According to Josephus (*Ant.* xvi. 5, § 2), Antipatris was built by Herod "in the plain called Capharsaba" (*Καφαρσαβὰ* or *Χαβαρσαβὰ* in xiii. 15, § 1), and named after his father, Antipater. Though situated in the plain, it was near the mountains; it was abundantly supplied with water, "rivers in abundance;" the soil was fertile; and it was a point in the line of defence taken up by Alexander Jannaeus across the Maritime Plain to prevent the march of Antiochus southwards (*Ant.* xiii. 15, § 1; xvi. 5, § 2; —*B. J.* i. 4, § 7; i. 21, § 9). At a later period he mentions the place again in connexion with the march of Cestius to Jerusalem and his disastrous retreat (*B. J.* ii. 19, § 1; 19, § 9); and also with the military movement of Vespasian from Caesarea towards Jerusalem (*B. J.* iv. 8, § 1). Josephus states (*Ant.* xiii. 15, § 1) that Alexander's line of defence commenced at Capharsaba, "which is now called Antipatris," and this has led some authors to identify the place, erroneously, with *Kefr Saba*, a small village in the open plain, badly supplied with water, and between seven and eight miles from the point at which the Roman road, from Jerusalem to Caesarea, leaves the mountains. Capharsaba and Antipatris are both mentioned in the Talmud, and Neubauer infers (*Géog. d. Talmud.* 86-89), from the manner in which they are mentioned, that they were two separate and distinct places; and this view is supported by a comparison of *Ant.* xiii. 15, § 1, with xvi. 5, § 2.

Eusebius and Jerome (*OS²* pp. 159, 25, 254, 32) place Antipatris six miles south of Gulgula, *Kalkileh*; and in the Jerusalem Itinerary its distance from Lydda is given as ten miles. These indications are sufficient to identify Anti-

patris with a mound, crowned with the ruins of a mediaeval castle, which rises above the great springs of *Ras el 'Ain* (see *PFQS.* 1874, 192-6; and *P. F. Mem.* ii. 258-62).

Jerome (*Per. S. Paulae*, v.) calls Antipatris *semirutum oppidulum*; but in the 8th century a large number of Christians resided there, whose massacre by the Arabs in 744 A.D. is alluded to by Theophanes. During the period of the Crusades *Arsuf* was supposed to be Antipatris. Like so many other foreign names of towns in Palestine, the name is now lost. [W.]

ANTON'IA, a fortress built by Herod on the site of the more ancient Baris, on the N.W. of the Temple, and so named by him after his friend Antonius. [JERUSALEM.] The word nowhere occurs in the Bible, but the fortress is referred to in Acts xxi. 31, &c. [G.]

ANTOTH'IAH (Ges. *Thes.* = *Ἀνθία*, prayers accepted of Jehovah; B. *Ἀνθία*, *Ἀνθία*, *Ἀνθία*; A. *Anathothia*). A Benjamite, one of the sons of Shashak (1 Ch. viii. 24).

[W. A. W.] [F.]

ANTO'THITE, THE (Ἀνθιθίτης; B. *Ἀνθιθίτης*, A. *-θί*; *Anathothites*). A native of ANATHOTH (1 Ch. xi. 28, xii. 3). [W. A. W.] [F.]

A'NUB (Ἄνουβ; Ges. *Thes.* = *delicate, tender*, MV.¹⁰, from a root preserved in Aramaic = *bound together*; B. *Ἐννύβ*, A. *Ἐννύβ*; *Ἀνύβ*). Son of Cox, and descendant of Judah, through Ashur, father of TEKOA (1 Ch. iv. 8).

[W. A. W.] [F.]

A'NUS (*Banaeus*), a Levite (1 Esd. ix. 48 = Neh. viii. 7). [BANI.]

AP'AME (*Ἀρμεν*; *Apeme*), daughter of Bartacus and concubine of Darius (1 Esd. iv. 29). [G.]

APELLES (*Ἀπελλῆς*; *Apelles*), a Christian greeted by St. Paul in Rom. xvi. 10, and honoured by the designation "the approved in Christ" (ὁ δοκιμὸς ἐν Χριστῷ). Horace takes Apella (the usual Latin form) as a representative Jewish name. He is ridiculing a supposed miracle, and says it is only fit for a Jewish Apella to believe (Hor. *Sat.* i. v. 100). Apelles is one of the names occur in Rom. xvi., which Bp. Lightfoot proves b, scriptions to have been borne at different times by members of the imperial household. See his detached note on "Caesar's household," Philip. iv. 22. [E. B. B.]

¹ **APES** (Ἄπης; *hophim*; *πῆθοι*; *simia*) occurs in 1 K. x. 22, "once in three years came the navy of Tharshish, bringing gold, and silver, ivory, and apes, and peacocks," and in the parallel passage of 2 Ch. ix. 21. B., the Vat. Version of the LXX., in the first-mentioned passage omits the words "ivory, and apes, and peacocks," while A., the Alexand. Version, has them; but both these Versions have the words in the passage of the Book of Chronicles.

It would be vain to attempt to identify the Hebrew *Kōphim* with any particular species of ape or monkey. No animal of the class *Simia* is found either in Western Asia or in Egypt; though—since they were frequently brought into

the latter country, as may be seen by monuments (Wilkinson, *Anc. Egypt.* i. p. 382, ed. 1873), and are very numerous in the regions

Monkeys assisting in gathering fruit. (Benl-Hassan, Wilkinson.)

immediately south of Egypt and throughout Eastern Africa—they must have been well known to the Jews. The text, however, appears to point to Indian and not African apes. The word *kôphim*

is of foreign, not Hebrew origin, and is the representative of the Sanskrit *kapi* (ape), which is also identical with the modern Tamil word. As the words used in the same passage for "ivory" and "peacocks" are also modern Tamil, we have a very clear indication of the country whence Solomon obtained these curiosities, and that it must have been either Southern India or Ceylon. The only difficulty is that the ships which brought them are called ships of Tarshish, and Tarshish is generally identified with Tarsessus near the mouth of the Guadalquivir in South-Western Spain, which was a Phœnician colony. It is true that the Barbary ape, *Imuus sylvanus*, might have been procured from the neighbourhood of the Pillars of Hercules, but certainly neither ivory nor peacocks. Nor can we place this Tarshish in East Africa, for no peacock exists in Africa, and the Tamil name forbids us to suggest any other bird. But ships for long voyages may have been spoken of as ships of Tarshish, just as the term East India-men was often applied to ships of that class with other destinations. Sir E. Tennent has argued, with much probability, in favour of Point de Galle, in Ceylon, as the rendezvous of Solomon's eastern navy.

Elephant and Ape, from Assyrian Monuments. (Obelisk, Nimrud.)

The most common monkeys of South India and Ceylon belong to the genus *Presbytis*, of which five species are recognised from that region. There are also three species of baboon —*Imuus*, which is not uncommon, one *Macacus*,

and two *Lemuridae*—in which the tail is absent or rudimentary only.

For some attempts to identify the various kinds of *Quadrumania* which were known to the ancients, see A. A. H. Lichtenstein's work,

Baboon and Ape, from Assyrian Monuments. (Obelisk, Nimrud.)

entitled *Commentatio philologica de Simiarum quatuor veteribus innouerunt formis* (Hamb. 1791); and Ed. Tyson's *Homo sylvestris, or the Anatomy of a Pigmie* (Lond. 1699), to which he has added a Philosophical Essay concerning the Graecopoli, the Satyrs, and Sphinxes of the

ancients. Aristotle (*de Anim. Hist.* ii. 5, ed. Schneider) appears to divide the *Quadrumania* order of *Mammalia* into three tribes, which he characterises by the names *πίθηκοι*, *κῆβοι*, and *κυνοκέφαλοι*. The last-named family are no doubt identical with the animals that

form the African genus *Cynocephalus* of modern zoologists. The *κῆβοι* Aristotle distinguishes from the *πίθηκοι*, by the fact of the former possessing a tail.* This name, perhaps, may stand for the whole tribe of tailed monkeys, excluding the *Cynocephali* and the *Lemuridae*, which latter, since they belong principally to the island of Madagascar, were probably wholly unknown to the ancients.

The *πίθηκοι*, therefore, would stand as the representative of the tailless apes, such as the Chimpanzee, &c. Although, however, Aristotle perhaps used these terms respectively in a definite sense, it by no means follows that they are so employed by other writers. The name *πίθηκοι*, for instance, seems to have been sometimes used to denote some species of *Cynocephalus* (see a Fragment of Simonides in Schneider's *Annot. ad Arist. Hist. Anim.* iii. 76). The LXX. in all probability used the word in an extended sense as the representative of the Hebrew word *Κόρη*, to denote any species of *Quadrumanus* Mammalia.

In the engraving which represents the Lithostrotum Praenestinum (that curious mosaic pavement found at Praeneste), in Shaw's *Travels* (ii. 294, 8vo ed.), is to be seen the figure of some animal in a tree, with the word *KHINEN* over it. Of this animal Dr. Shaw says (p. 312),

Monkey, from the Praenestine Mosaic.

"It is a beautiful little creature, with a shaggy neck like the *Callithrix*, and shaped exactly like those monkeys that are commonly called *Marmosets*. The *KHINEN*, therefore, may be the Ethiopian monkey, called by the Hebrews *Kouph*, and by the Greeks *ΚΗΠΟΣ*, *ΚΗΦΟΣ*, or *ΚΕΙΠΟΣ*, from whence the Latin name *Cephus*." This description will be found to apply better to the figure in the 4to ed. of Dr. Shaw's *Travels* than to that in the 8vo ed. Perhaps, as Col. Hamilton Smith has suggested, the *Keipen* of the Praenestine mosaic may be the *Cercopithecus griseo-viridis*, Desmar., which is a native of Nubia, the country represented in that part of the mosaic where the figure of the *keipen* occurs.

It is very probable that some species of baboons is signified by the term *Satyr*, which occurs in the A. V. in the prophet Isaiah [SATYR]. Bishop Coverdale, or the author of the first English translation of the Bible, seems to have been a better naturalist than the company of the A. V.; for in the 1st edition, A.D. 1537, as well as in all subsequent editions, he reads (Is. xiii. 21)—where the A. V. has, "satyr [R. V. marg. *he-goats*] shall dance there"—"apes shall dance there." The ancients were no doubt acquainted with many kinds of *Quadrumanus*,

* Si mihi cauda foret cercopithecus ero."

both of the tailed and tailless kinds (see Plin. viii. c. 19, xi. 44; Aelian. *Nat. An.* xvii. 25, 39; Strab. xvii. 827; Bochart, *Hieroz.* ii. 398; cf. Mart. *Epig.* iv. 12). [W. H.] [H. B. T.]

APHAR'SATHCHITES, APHAR'SITES, APHAR'SACITES (אַפְרַסְתִּים, אַפְרַסְתִּים, אַפְרַסְאִים)

אַפְרַסְתִּים; in Ezra iv. 9, B. *Ἀφρασθαιῶν*. . . *Ἀφρασθαιῶν*, A. *Ἀφρασθαχάϊων*. . . *Ἀφρασθαιῶν*; *Apharsathachoei*. . . *Apharsoci*; in v. 6, B. *Ἀφρασακκαῖων*, A. *-χαῖων*; *Aphrasachoei*, the names of certain tribes, colonies from which had settled in Samaria under the Assyrian leader ASNAPPER (Ezra iv. 9, v. 6). The first and last are regarded as the same. Whence these tribes came is entirely a matter of conjecture (see Riehm, *HWB.* s. n.). The initial *A* is regarded as *prosthetic*; and the remaining portion of the first two names has been considered to bear some resemblance (a very distant one) to *Paracetace*, or *Paracetaceni* (Herod. i. 101), a tribe living on the borders of Media and Persia. Fried. Delitzsch (Baer's ed. of Ezra, p. ix.) finds the original form of the names in *אַפְרַסְתִּים*.

Partakka or *Partukha*, two Median cities mentioned by Sennacherib. The second name has been referred to the *Parrhasii* in Eastern Media, and by Gesenius to the *Persae*. The presence of the proper name of the Persians (𐎱𐎠𐎼𐎿) in Ezra

i. 1, iv. 3, must throw some doubt upon the conjecture of Gesenius, independently of the fact that Assyrian kings never penetrated into Persia (Schrader, *KAT.* p. 376). The conjecture of Fried. Delitzsch that the name recalls a Median tribe referred to in the *Annals* of Sennacherib and inhabitants of the land of Parsua, is at least plausible. [W. L. B.] [F.]

APHEK (אֶפֶק, from a root signifying to hold together or strengthen, Ges.), the name of several places in Palestine.

1. B. *ʿOphék*, A. *ʾApék*; *Aphec*. A royal city of the Canaanites, the king of which was killed by Joshua (Josh. xii. 18). As this is named with Tappuah and other places in the mountains of Judah, it is very probably the same as the *Aphekah* of Josh. xv. 53. A trace of the name may perhaps exist in *Wād Fūkin*, a small village in the hills west of Bethlehem.*

2. In Josh. xiii., B. *Ῥαφὲκ*, A. *ʾAphēk*; *Aphēk*. A city, apparently in the extreme north of Acher (Josh. xix. 30; *ʾApék*, *Aphēk*), from which the Canaanites were not ejected (Judg. i. 31; though here it is *Aphik*, *ῬʾPēk*; A. *ʾApék*, B. omits or has a different reading [see *APHIK*]; *Aphēk*). This is probably the same place as the *Aphēk* (Josh. xiii. 4) on the extreme north "herd of the Amorites," and apparently beyond Sidon, and which is identified by Gesenius (*Thes.* 140 a) with the *Aphaca* of classical times, famous for its temple of Venus and now *Afka* (Rob. iii. 606; Porter, ii. 295-6). *Afka*, however, lies beyond the ridge of Lebanon, on the north-western slopes of the mountain, and consequently much further up than the other towns of Asher which have been identified. On the other hand, it is hardly more to the north of the

* The LXX. reading (B.) is βασιλεία Ὀφὲκ τῆς Ἀφὲκ (A. om. τ. A.). Ἀφὲκ is taken to be a corruption of Σαρων (cp. the Heb. text), and the place here is considered the same as No. 4 (cp. Dillmann, and *QPB.* i. l.).

known limits of the tribe, than Kadesh and other places named as in Judah were to the south; and Aphek may, like many other sanctuaries, have had a reputation at a very early date, sufficient in the days of Joshua to cause its mention in company with the other northern sanctuary of Baal-gad. The northerly position is supported by the opinion that in the reign of Sethi I., Kadesh on the Orontes was an Amorite town under the jurisdiction of the Hittites.

3. A place at which the Philistines encamped, while the Israelites pitched in Ebenezer, before the fatal battle in which the sons of Eli were killed and the ark taken (1 Sam. iv. 1; 'Apék, *Aphec*). M. Cl. Ganneau (*PFQy. Stud.* 1877, 154-6) proposes to identify Ebenezer with *Deir 'Abân* near Bethshemesh, supposing that the ark would be carried back to the place where it was captured. There is much in favour of this view; but the distance, though not so great as to be impossible, is rather too remote from Shiloh and Mizpeh. Major Conder has suggested, doubtfully, *Merj Fikieh*, near *Bâb el-Wâd*, and *Deir el-'Azar* near *Kuryet el-'Enab* for the Aphek and Ebenexer of 1 Sam. iv. 1. Josephus (*B. J.* i. 19, 1) mentions a *Πύργος Ἀφεκού* near Antipatris.

4. The scene of another encampment of the Philistines, before an encounter not less disastrous than that just named,—the defeat and death of Saul (1 Sam. xxix. 1; 'Apék, *Aphec*). By comparison with ver. 11, it seems as if this Aphek were not necessarily near Shunem, though on the road thither from the Philistine district. It is possible that it may be the same place as the preceding; and if so, the Philistines were marching to Jezreel by the present road along the "backbone" of the country. *Fukûd*, on the southern slope of Mount Gilboa, has been suggested (*PF. Mem.* ii. 84) as a possible site for this Aphek; but from this place the Philistines could not have "gone up" to Jezreel (1 Sam. xxix. 11). Josephus (*Ant.* vi. 14, 1) has *Περγὰ* for Aphek.

5. In 1 K. xxi. (LXX.) B. 'Aφεκδ, A. -av; *Aphec*. A city on the military road from Syria to Israel (1 K. xx. 26). It was walled (v. 30), and was apparently a common spot for engagements with Syria (2 K. xiii. 17; 'Apék, *Aphec*). The use of the word *הַפְּתִיחַ* (A. V. "the plain") in 1 K. xx. 25 fixes the situation of this Aphek in the level down-country east of the Jordan [*MISHOR*]; and there, accordingly, it is now found in *Fik*, at the head of the *Wâdy Fit*, six miles east of the Sea of Galilee, the great road between Damascus, *Nâbulus*, and Jerusalem, still passing (Kiepert's map, 1857), with all the permanence of the East, through the village, which is remarkable for the number of inns that it contains (Burckh. 280). By Josephus (*viii.* 14, § 4) the name is given as 'Aφεκδ. Eusebius (*Onom.* 'Aφεκδ) says that in his time there was, beyond Jordan, a *κώμη μεγάλη* (Jer. *castellum grande*) called *Apheca*, near (≡) Hippos (Jer. Hippos); but he apparently confounds it with (1). Hippos was one of the towns which formed the Decapolis. *Fik*, or *Fek*, has been visited by Burckhardt, Setzen, and others (Ritter, *Pal.* 348-353), and is the only one of the places bearing this name

that has been identified with certainty. The name appears as *Aphu* in an inscription of Esarhaddon (Schrad. *KAT.* p. 204). [G.] [W.]

APHE'KAH (אֶפְכָּח; B. *Ἀφακού*, A. 'Aφάκ; *Apheca*), a city of Judah in the mountains (Josh. xv. 53), probably the same as APHEK (1). [G.] [W.]

APHEREMA (T. 'Aφείρεμα, A. 'Aφείρεμα; 'Aφείρεμα, Jos.), one of the three "governments" (*νόμους*, and once *τοπαρχίας*) added to Judea from Samaria and Galilee by Demetrius Nicator, and confirmed by Nicanor (1 Macc. xi. 34: see Jos. *Ant.* xiii. 4, § 9, and Reland, 178). The word, omitted in the Vulgate, is probably the same as Ephraim (Ophrah, *Taiyibeh*). [G.] [W.]

APHER'RA (Αφερρά; *Eura*), one of the sons of the "servants of Solomon" who returned with Zerubbabel (1 Esd. v. 34). His name does not occur in the parallel lists of Ezra and Nehemiah. [G.] [W.]

APHI'AH (אֶפְיָח; B. 'Aφék, A. 'Aφék, A. 'Aφίχ; *Aphia*), one of the forefathers of Saul (1 Sam. ix. 1). [W. A. W.] [F.]

APHI'K (אֶפְיָח; A. 'Aφék, B. *Nafé*; *Aphech*), a city of Asher from which the Canaanites were not driven out (Judg. i. 31). Probably the same place as APHEK (2). [W. A. W.] [F.]

APH'RAH, the house of (אֶפְרָח; R. V. *Beth-lo-Aphrah*, marg. "a house of dnet," so *MV.*), a place mentioned in Mic. i. 10, and supposed by some (Winer, p. 172) to be identical with Ophrah. But this can hardly be, inasmuch as all the towns named in the context are in the low country to the west of Judah, while Ophrah would appear to lie E. of Bethel [OPIRAH]. LXX. *ἐξ οἴκου κατὰ γέλωτα*; Vulg. *in domo pulveris*. [G.] [W.]

APH'SES (אֶפְסֵס; Ges. = *dispersion*; B. *Αφεσθή*, A. 'Aφείρ; *Aphses*; R. V. "Happizzex"), chief of the 18th of the 24 courses in the service of the Temple (1 Ch. xxiv. 15). [W. A. W.] [F.]

APOC'ALYPSE. [REVELATION.]

APOC'RYPHA. This article deals with the collection of books to which the term "Apocrypha" is familiarly applied in England at the present day. In other words, it treats of the fragments of Jewish literature not included in the Hebrew Canon of Scripture, which have nevertheless been preserved in the Greek and Latin Versions of the Old Testament.

Although the terms "Deutero-Canonical" and "Ecclesiastical," which are sometimes by preference given to these writings, are, as we shall see, more strictly accurate, they are never likely to supplant the less correct and now generally accepted name. But it will sometimes be necessary to make use of them, in order to avoid needless ambiguity.

The titles of the Books of the Apocrypha, according to the order in which they are placed in the English Version, are:—

- I. 1 Esdras.
- II. 2 Esdras.
- III. Tobit.
- IV. Judith.

- V. The rest of the chapters in the Book of Esther, which are found neither in the Hebrew nor in the Chaldee.
 VI. The Wisdom of Solomon.
 VII. The Wisdom of Jesne the Son of Sirach, or Ecclesiasticus.
 VIII. Baruch.
 IX. The Song of the Three Holy Children.
 X. The History of Susanna.
 XI. The History of the Destruction of Bel and the Dragon.
 XII. The Prayer of Manasses king of Judah.
 XIII. 1 Maccabees.
 XIV. 2 Maccabees.

To these may here be added 3 and 4 Maccabees, both of which appear in the LXX. of the Codex Alexandrinus, the 3rd being given also in the Codex Vaticanus, the 4th in the Codex Sinaiticus.*

In this list No. VIII., The Book of Baruch, contains as its sixth chapter "The Epistle of Jeremy;" Nos. IX., X., XI. constitute the so-called "Additions to Daniel;" "The Prayer of Azariah" is included in "The Song of the Three Holy Children." The separate books of the Apocrypha are treated of under their respective titles.

In the course of the present article the references are made from O. F. Fritzsche's *Libri Apocryphi Veteris Testamenti*, Lips. 1871.

It has been impossible to include within the limits of this article the important pseudepigraphic Apocrypha represented by such writings as the Psalms of Solomon, the Book of Enoch, the Book of Jubilees, the Assumption of Moses, &c.

The following gives in brief outline the contents of this article:—

- I. The History of the word "Apocrypha" and of its special application.
- II. The Relation of the Apocrypha to the History of the Canon in—
 - (1) the Jewish Church, p. 166.
 - (2) the Christian Church.
 - (a) to 600 A.D., p. 169.
 - (b) to the close of the 16th century, p. 173.
 - (c) to the present time, p. 175.
- III. Classification and Description of the books of the Apocrypha, p. 179.
- IV. The Apocrypha, in relation to
 - (1) Jewish Literature, p. 182.
 - (2) Jewish Theology, p. 186.
- V. The Text of the Apocrypha, p. 195.
- VI. The Literature upon the Apocrypha, p. 197.

I. *The History of the word "Apocrypha" and of its special application.*—The word ἀπόκρυφος, in classical writers, though not common, is found with (a) the simple meaning of "hidden," "concealed" (e.g. Eurip. *Herc. Fur.* 1070); (b) the secondary meaning of "recondite," "obscure," "hid from knowledge" (e.g. Xen. *Mem.* iii. 5, 14, τὴν ἀν ποιούσας ἀναλίσκειν τὴν ἀρχαίαν ἀρετήν; . . . καὶ ὁ Σωκράτης, οὐδὲν ἀπόκρυφον δοκεῖ μοι εἶναι: cf. Callimachi *Fragmenta*, 242, γράμματα ἀπόκρυφα).

In the LXX. it appears (a) rarely, as a strict adjective = "hidden," "concealed" (e.g. Isa. xlv. 3; 1 Macc. i. 23; Eccles. xxiii. 19, xlii. 9):

* For other additions to the canonical Books of the O. T. to be found in the LXX. see in that Version, Ps. cii., Job ii. 9, xlii. 17; Prov. vi. 6, ix. 12, xxiv. 22.

(b) generally with ἐν, as an adjectival substantive, meaning "a place of concealment" (e.g. Ps. ix. 29, xvi. 12, lxxii. 5; Eccles. xvi. 19; Isa. iv. 6; Deut. xxvii. 15; Job xxxix. 25). (c) The neuter plural ἀπόκρυφα is used as a substantive for "hidden resources," sometimes of material wealth (e.g. Dan. xi. 43 [Theod.], κυριεύσει ἐν τοῖς ἀπόκρυφοῖς τοῦ χρυσοῦ, where it translates עֲצָמוֹתָיו). In this form it is especially applied to materials of knowledge, hidden from the human understanding (e.g. Dan. ii. 22 [Theod.], αὐτὸς ἀποκαλύπτει βάθει καὶ ἀπόκρυφα (ΝΗ) ἡ σοφία, γνώσκων τὰ ἐν τῇ σκότητι, καὶ τὸ φῶς μετ' αὐτοῦ ἐστὶ: Eccles. xiv. 21; xxxix. 3, 7; xlii. 19; xlviii. 25; cf. xliii. 32). In these passages the prevailing idea of the word may be illustrated by the "depths" (βάθος: cf. 1 Cor. ii. 10, Rev. ii. 24), afterwards used by Gnostics to express the mysteries of knowledge.

In the New Testament the word occurs only three times: Mark iv. 22; Luke viii. 17; Col. ii. 3, ἐν ᾧ εἰσὶν πάντες οἱ θησαυροὶ τῆς σοφίας καὶ γνώσεως ἀπόκρυφοι. St. Paul, in this last passage, speaking of the "treasures" of wisdom and knowledge "hidden away in Christ," perhaps contrasts them with the esoteric doctrines on which the leaders of the Colossian heresy prided themselves (see Lightfoot's *Colossians* in loco). There is, however, no evidence to show that the word had as yet been applied in any technical sense to writings.

In Patristic Literature the word ἀπόκρυφος is technically applied to writings, Jewish, Christian and heretical. But its history is hard to trace, owing to the variety of meanings under which it appears in different authors, and even in the writings of the same author.

At the close of the 2nd century A.D., we find that books could be termed "Apocryphal" because they treated of "esoteric doctrines" or "knowledge hidden from the uninitiated." An example of this occurs in the writings of Clemens Alexandrinus (circ. 200 A.D.), who mentions that the followers of Prodicus boasted of possessing "Apocryphal books" (i.e. books containing the esoteric teaching) of Zoroaster (βιβλίου ἀποκρύφους τὰνδρος ταύδε οἱ τῶν Προδίκου μεριμνῶντες ἀρεσὴν αὐχοῦσι κεκτῆσθαι, Clem. Alex. *Strom.* i. 15, p. 357, ed. Potter). This distinction between the sacred books of a religious community, according as they were intended for the use of the uninitiated many or of the initiated few, was not uncommon during the early centuries of the Christian era. A well-known illustration is afforded by a passage in the Jewish pseudepigraphic work, 2 Esdras (xiv. 44-47), "In the course of forty days were written four and ninety" (undoubtedly the correct reading) "books. And it came to pass, when the forty days were fulfilled, that the Most High spake, saying, The first which thou hast written publish openly; and let the worthy and the unworthy read. But thou shalt keep the seventy last, that thou mayest deliver them to such as be wise among thy people; for in them is the vein of understanding, and the fount of wisdom, and the stream of knowledge." By the twenty-four Books here mentioned are meant the Books of the Hebrew Canon. The remaining "seventy" probably re-

presented, under a symbolical number, the class of mystical and Apocalyptic writings of which the Second Book of Esdras, the Book of Enoch, &c., are specimens. Whether this "seventy" included any of the books of our Apocrypha need not here be discussed. It is sufficient to observe that they were βιβλίοι ἀποκρυφoί, "apocryphal books of esoteric teaching," which only the "wise" of a religious community were permitted to read or deemed capable of understanding. When Gregory of Nyssa and Epiphanius, in the 4th century, speak of the Apocalypse as an "apocryphal" writing (Greg. Nyss. *Or. de Ordin.* ii. 44; Epiphani. *Haer.* 51), they are using the word in this originally technical sense, and only desire to imply that the book contained mysteries unintelligible to the masses.

The Christian Church afforded no scope for esoteric writings. The fullest revelation of God had been made in the writings of the Apostles and Prophets, which were read publicly in the churches. Books purporting to contain more transcendental truths, which were unintelligible to the masses and appealed only to the wise and learned, aroused suspicion. The general use, not the secrecy of a book, stamped it with the approbation of the Church (cf. Luke viii. 17). Origen, who frequently refers to "apocryphal" writings, contrasts them in a tone of depreciation with the Books of acknowledged worth or public circulation (e.g. Origen, *Comm. in Matth.* tom. x. c. 18; *Epist. ad African.* c. 9; *Comm. in Matth.* [Lat.] § 28 libri secretiores, § 117 secreta Scripturae).¹

Many of the writers of the apocryphal books, alluded to by Origen and his contemporaries, seem to have been Gnostics or visionaries, who hoped by literary forgeries to disseminate their views, without openly betraying their conflict with Scriptural doctrine. This circumstance alone was sufficient to compromise the whole class of pseudepigraphic literature. Its name became a byword of odium: Christian Fathers included the whole range of apocryphal literature in their denunciation of certain heretical writers and views (e.g. Hegesippus ap. Euseb. *H. E.* iv. 22. 8: καὶ περὶ τῶν λεγόμενων δὲ ἀποκρυφῶν διαλαβάνων, ἐπὶ τῶν αὐτοῦ χρόνων πρὸς τινὲν αἰρετικῶν ἀναπειλᾶσθαι τινὰ τούτων ἱστορεῖ. Tertull. *de Animâ*, cap. ii.: "Quid autem, si philosophi etiam illa incuraverunt, quae penes nos apocryphorum confessione damnantur").

Partly from the unsound character of the books, partly too from the Church's condemnation of their writers, the adjective "apocryphal" (ἀποκρυφός) is found at the close of the 2nd century with the meaning of "false" or "supposititious:" e.g. Iren. *Haer.* i. 20, πλῆθος ἀποκρυφῶν καὶ νόθων γραφῶν; Tertull. *de Pudicit.* cap. x. "(Scriptura Pastoris) si non ab omni concilio ecclesiarum vestrarum etiam inter apocrypha et falsa judicaretur;" Clem. *Strom.* iii. 4 (p. 524, ed. Potter), ἐρρήθη δὲ αὐτοῖς τὸ δόγμα ἕκ τινος ἀποκρυφῶν· καὶ δὲ παραθήσομαι τὴν λῆξιν τὴν τε τούτων ἀσελγείας μητέρα; Orig. *Prol. in Cant.* sub fin. "(Scripturae) quae appellantur apocryphae pro eo quod multa in iis corrupta et contra fidem veram inveniuntur a maioribus tradita."

The special application of the term ἀποκρυφός to spurious and heretical works is common in the Nicene age. Athanasius, in his threefold division of ecclesiastical writings into books "canonical," books "read in the churches," and books "apocryphal" (βιβλία κανονιζόμενα, βιβλία ἀναγινωσκόμενα, and ἀποκρυφά), characterizes the last class as the arbitrary inventions of heretics, who falsified dates in order to give their writings an appearance of antiquity (Athanas. *Epist. ad Amun. Mon.*, Opp. i. 768 D; ed. Migne, tom. ii. p. 1179).

Athanasius's use of "apocryphal" corresponds with Eusebius's application of "spurious" (νόθος) to the lowest grade of ecclesiastical books. The majority of these compositions were pseudepigraphic. Their authors were not known, but, according to the general belief in the Church, their object had been to introduce erroneous doctrines under the authority of revered names. Cp. *Apostol. Constit.* vi. 16.

In process of time, perhaps as the danger of heretical books becoming incorporated with the Canon of Holy Scriptures was no longer felt, the term "apocryphal" began to be associated with pseudepigraphic rather than with heretical writings. This was especially the case in the Western Church, where the term "apocryphal" was generally explained as denoting obscurity of origin or uncertainty of authorship: e.g. Augustine, *de Civ. Dei*, xv. 23, "Apocryphae nuncupantur eo quod earum occulta origo non clarnit patribus;" c. *Faust.* xi. 2, "Apocryphi non quod habendi sunt in aliqua auctoritate secretâ, sed quia nullâ testificatione luce declarati, de nescio quo secreto nescio quorum praesumptione prolati sunt;" Jerome, *Ep.* 107, *ad Laetam*, "(Laeta) sciat non eorum eas (Apocrypha) quorum titulus praenotetur."

The application of "apocryphal" to books excluded from the Canon is the next stage to be recorded. This was an easy transition. The word had lost its original meaning. It denoted sometimes obscurity of origin, sometimes doubtful authenticity, sometimes heretical doctrine. Now obscurity of origin was a characteristic of the second or "ecclesiastical" (ἀναγινωσκόμενα) as well as of the third or "spurious" division (ἀποκρυφά) of books according to the Athanasian classification. When therefore it was found convenient, if not necessary, to define by a single phrase the non-canonical writings of the Church, it was natural to make use of a term like "Apocryphal" which could embrace both of these divisions. The use of "Apocrypha," in the

¹ The suggestion that the early Christian use of the word ἀποκρυφός had been influenced by the Rabbinical word [סֵפֶר סְתוּם], Syr. *gnas*, "to hide," is not without evidence in its favour. The Hebrew word was technically used for the declaration that a book was uncanonical (Levy, *Kahebr. u. Chald. Wörterbuch*, Bd. I. 1876). In this sense it was used by the Rabbins of writings excluded from public use upon moral or doctrinal grounds. It may be questioned whether any official condemnation is conveyed by Origen's use of the word "apocryphal." The connexion between [סֵפֶר סְתוּם] and ἀποκρυφός rests chiefly on the similarity of their primary meanings, and on the fact that both words, technically applied to writings, convey a disparaging sense. Jewish *gnusim* were writings authoritatively removed from the use of the community. Origen's ἀποκρυφά were books not read publicly in the churches, being either esoteric in teaching or private in circulation. See Zahn, *NH. Kanon*, pp. 122, 126 (1888).

sense of "non-canonical writings read in the Churches," may be illustrated by a passage from Basil, where he enjoins that the monk should read the Canonical Books, and by no manner of means meddle with "Apocrypha:" τὰ ἐκδιδότα βιβλία ἀναγινώσκειν, ἀποκρύφους δὲ μὴ ἐντυγχάνειν (Serm. περὶ δασκείας, tom. ii. 247). But, as a general rule, the fathers of the Eastern Church, influenced by the opinion of Athanasius, took care to discriminate between the writings of his second and third divisions, restricting ἀπόκρυφα to the latter.

In the Western Church, however, the word "Apocrypha" began to be technically used of the non-canonical ecclesiastical writings. As there was a conflict of opinion with regard to the limits of the Canon itself (see below), there arose a parallel confusion with regard to the application of the word "Apocrypha."

Jerome and the divines who adhered to the Hebrew Canon of the Old Testament, used the word "Apocrypha" not only of *supposititious* works, but also of the *ecclesiastical* books, "libri ecclesiastici" as they were called by Rufinus, which were included in the LXX. Version and its Latin derivatives. The words of Jerome which exercised the most powerful influence over subsequent writers upon the subject, occur in his prologue to the Books of Samuel, the *Prologus Galeatus*. He there asserts that any book not included in the four-and-twenty Hebrew Books of the O. T. must be classed as apocryphal, "ut scire valeamus, quidquid extra hoc est, inter ἀπόκρυφα esse ponendum." Cp. Jerome, *Praef. ad Judith*, "Apud Hebraeos liber Judith inter Apocrypha (c. l. Hagio-grapha) legitur." Augustine, on the other hand, and his followers, who regard the "libri ecclesiastici" as Canonical Books, never refer to them as "apocryphal." They restrict the term to spurious and pseudepigraphic writings.* And thus it happened that both Jerome and Augustine—the one accepting the shorter Palestinian, the other the longer Alexandrine Canon of the Old Testament—assigned to ἀπόκρυφα the same meaning of "non-canonical writings." Unfortunately their difference of starting-point contributed to great confusion of thought among Western divines, who were accustomed to base opinion and phraseology upon the utterances of the two great doctors. The perplexity of mind which sought to reconcile the rival views gave rise to still more vague and inaccurate definitions. Isidore of Seville (600) introduces the previous explanations of "secret," "uncertain of origin," "untruthful," "pseudonymous," in his own definition (*Etymol.* vi. 2, §§ 51, 52): "Apocrypha autem dicta id est secreta, quia in dubium veniunt. Est enim occulta origo nec patet patribus, ex quibus usque ad nos auctoritas veracium scripturarum certissima successione pervenit. In iis apocryphis etiam invenitur aliqua veritas, tamen propter multa falsa nulla est in iis canonica auctoritas, quae recti a prudentibus

judicantur non esse eorum credenda quibus adscribuntur. Nam multa sub nominibus prophetarum et recentiorum sub nominibus apostolorum ab haereticis proferuntur, quae omnia sub nomine apocryphorum auctoritate canonica diligenti examinatione remota sunt." His own preference for the meaning "of doubtful authorship" is shown by his description of Judith, Tobit, and Maccabees, "quibus auctoribus scripti sicut minime constat" (*Etymol.* vi. 2, § 33). The variety of uses to which the word was put in the Middle Ages may be exemplified by the following quotations (see Hody, *De Bibliorum Textibus*, &c., 1705):—Alcuin (800): "Quoniam librum (Jesum f. Sirach) B. Hieronymus atque Isidorus inter Apocryphas id est dubias Scripturas deputatum esse absque dubitatione testatur" (*ado. Elephantum*, Tolet. i. 1). Petrus Comestor (1170): "Job, David, 3 libri Salomonis, Daniel, Paralipomena, Esdras, Hester, Sapientia, Ecclesiasticus, Judith, Tobias, Pastor, Machabaeorum, Apocrypha sunt, quod auctor ignoratur eorum" (*Praef. in Jos.*). "Recole supra in principio Josue dictum quod Apocryphum dicitur, vel cuius auctor incertus, vel cuius materia incerta" (*Praef. in Tob.*). Hugo de Santo Caro (1240): "Apocryphorum triplex est diversitas, scilicet cuius auctor ignoratur sed patet veritas ut Judith, et tales recipit Ecclesia. Vel cuius veritas ignoratur; et tales non recipit Ecclesia. Vel utroque modo, et neque tales recipit Ecclesia" (*Praef. in Jud.*). Gñl-Brito (1325): "Libri, qui a quibusdam secundum Esdrae, ab aliis tertius inscribitur, cum non sit in Canone, utpote Apocryphus." MS. Bodl. Hatton, 64, manu vet. (?): "Volumina, quae non sunt de Hebraica Bibliotheca, et ideo dicuntur Apocrypha, quia a synagoga non confirmantur ut quorum auctores ignorantur." Alph. Tostatus (1450): "Dicuntur Apocrypha, quia sunt istae Scripturae secretae id est veritas eorum secreta est, quia nescitur an verae an falsae sint. Sciendum tamen, quod Scriptum vocatur Apocrypha vel non est in Canone S. Scripturae propter duo, scilicet vel quia dubitatur de veritate ejus, vel quia dubitatur de auctore."⁴

In the Middle Ages we find no trace of any deliberate intention to limit the term "Apocrypha" to the "Ecclesiastical" books, to the exclusion of books which would seem to have a better title to the name (such as the Book of Enoch, the Testaments of the Twelve Patriarchs, the Apocryphal Gospels and Apocalypses). But these last-named books were little known and little used. Moreover, with rare exceptions, they were not included in copies of the Bible. It was therefore inevitable that a tendency to narrow the application of "Apocrypha" to the Ecclesiastical books should arise.

The way was thus prepared for the special use of the word, which, having been adopted by

* A good illustration is supplied by a passage from Leo (460), *Ep.* xv. § 15: "Apocryphae autem Scripturae quae sub nominibus Apostolorum multarum habent seminarium falsitatum non solum interdicendae sunt sed etiam penitus auferendae sunt, atque ignibus concremandae," where the context shows that the heretical writings of Priscillianists are referred to.

⁴ A characteristic definition is given by Hugo de St. Victoris († 1141): "Apocrypha, id est dubia et abscondita, liber duobus modis dicitur; vel quia auctor ejus incertus, vel quia communi assensu fidelis synagoga vel ecclesiae non est receptus et confirmatus, et nihil in eo [pari] reperitur. Unde et liber Job Apocryphus est, quia dubitatur auctor; in canone tamen confirmatus est auctoritate fidelis synagoga" (*De Scriptur. et Scriptor. Sac.*, cap. xii.).

the leading Reformers, has ever since obtained familiar acceptance in England and America, and in the Reformed Churches on the Continent.

The Reformers used the term "Apocrypha" to represent the books which they found in their Bibles, but which they excluded from their Canon of Holy Scripture. In this usage they were influenced partly, no doubt, by the fact that they were here supported, in their controversy with Rome, by an authority of so much weight and eminence as Jerome. The earliest and best known definition proceeding from this quarter, that of Bodenstein of Carlstadt in his *De Canonicis Scripturis libellus*, Wittenberg, 1520, expresses dissatisfaction with Augustine's explanation of the word (cited above), and adopting Jerome's position pronounces that exclusion from the Hebrew Canon constitutes the true test of an apocryphal work: "Constat incertitudinem autoris non facere apocrypha scripta, nec certum autorem reddere canonicas Scripturas, sed quod solus canon libros quos respicit Apocrypha facit sive habeant auctores et nemina sive non."

Luther's complete edition of the German Bible (1534) contained the books Judith, Wisdom, Tobias, Ecclesiasticus, 1 & 2 Maccabees, Additions to Esther and Daniel, and the Prayer of Manasseh, grouped together as a distinct collection under the general title of "Apocrypha; i.e. Books which are not of like worth with Holy Scripture, yet are good and useful to be read." From that time the special application of the word came into general use among the Reformers.

The decision of the Council of Trent in 1546 (see below) led to several counter dogmatic definitions from the Reformed Churches, in which the "Apocryphal" are identified with the "Ecclesiastical" or "Deutero-Canonical" books of the Latin Bible, e.g. *Belgic Confession*, Art. vi. (1561): "We distinguish these sacred books from the Apocryphal, viz. the third and fourth Book of Esdras, the Books of Tobias, Judith, Wisdom, Jesus Sirach, Baruch, the Appendix to the Book of Esther, the Song of the Three Children in the Furnace, the History of Susanna, of Bel and the Dragon, the Prayer of Manasseh, and the two Books of Maccabees." Cp. *Second Helvetic Confession* (1566), cap. i. 9: "Interim nihil dissimulamus, quosdam Veteris Testamenti libros a veritibus nuncupatos esse apocryphos, ab aliis ecclesiasticos." *Irish Articles*, Art. iii. (1615): "The other books (cp. Art. vi. in the XXXIX. of the Church of England and *Confess. Gal.* iv. 'alii libri'), commonly called 'Apocryphal,' such are these following: 'The Third Book of Esdras, the Fourth Book of Esdras, the Book of Tobias, the Book of Judith, Additions to the Book of Esther, the Book of Wisdom, the Book of Jesus the Son of Sirach called Ecclesiasticus, Baruch with the Epistle of Jeremiah, the Song of the Three Children, Susanna, Bel and the Dragon, the Prayer of Manasseh, the First Book of Maccabaeus, the Second Book of Maccabaeus.'"

At the close of the 16th century the title of "Apocrypha" had in England and in the Reformed Churches on the Continent become so firmly attached to the "Ecclesiastical" or "Deutero-Canonical" books, that no doubts expressed as to its fitness on the score of either

past history or original signification could have availed to alter its application. Theologians found themselves compelled to acquiesce in a popular usage, which they knew to be inaccurate, as may be shown by the well-known passage in Hooker's *Ecclesiastical Polity*, bk. v. xx. 7 (ed. Kable), the importance of which will justify its quotation in this place: "Now, besides the Scripture, the books, which they called Ecclesiastical, were thought not unworthy sometimes to be brought into public audience, and with that name they entitled the books, which we call Apocryphal. Under the selfsame name they also comprised certain no otherwise annexed unto the New than the former unto the Old Testament, as a Book of Hermas, Epistles of Clement, and the like. According, therefore, to the phrase of antiquity, these we may term the New and the other the Old Ecclesiastical books or writings. For we, being directed by a sentence (I suppose) of St. Jerome, who saith 'that all writings not canonical are apocryphal' (Hieron. *Prolog. Galeat.*), use not now the title 'apocryphal' as the rest of the Fathers ordinarily have done, whose custom is so to name for the most part only such as might not publicly be read or divulged."

In the Eastern Church, during the Middle Ages, the title of "Apocrypha" continued to be reserved for Athanasius's third division of ecclesiastical writings, such as the Book of Enoch and the Apocryphal Gospels. But early in the 17th century the influence of Western controversies began to make itself felt in the Greek Church. The Confession of Cyril Lucar (Latin, 1629; Greek, 1633), Patriarch of Constantinople, who was well known for his Western predilections, defines "Apocrypha" as "books not having the ratification from the all-holy Spirit in the manner of the genuinely and indisputably Canonical Books." This description did not, however, continue long in favour, and in 1672 it was condemned by the Council of Jerusalem. From that date onward the Greek Church returned to the Athanasian use, applying the title of "Apocrypha" to a class distinct from and inferior to the Deutero-Canonical books (*ἀναγινωσκόμενα*).

By the Church of Rome also the word "Apocrypha," though not occurring in the Decrees of the Council of Trent, is used without fear of ambiguity, in reference to books not included in the Tridentine Canon. Dens' *Theologia (de Virtute Fid. No. 61, de Divis. Script. Sacr.)* gives the following definition of Apocryphal books: "To the Canonical Books are opposed the apocryphal books, which are so called because the Church has failed to find a sufficiently sure foundation for the tradition respecting them, although some Fathers have at times hesitated as to their divine origin. Such are the 3rd and 4th Books of Esdras, 3rd and 4th of Maccabees, the Prayer of King Manasseh the captive, &c. Among apocryphal books some are positively apocryphal or condemned (*reprobati*), such as those which Pope Gelasius condemns, *Can. Sancta Rom.* dist. 15; others are negatively apocryphal, that is, by the Church neither approved nor condemned in their claim to be of divine origin (*tantum divini*)." It is further asserted that a positively apocryphal book is always apocryphal; but a negatively apocry-

phal book may be apocryphal only through the ignorance of the Church, and is capable of becoming canonical at a subsequent time, as had been the case with Esther and Judith.

It will be seen then that (1) the title "Apocrypha," in its technical application by the Reformed Churches to the Ecclesiastical or Deutero-Canonical books, differs from the usage of both Greek and Roman Churches, and is inaccurate,* if judged by the standard of historical criticism; (2) in its wider application to "uncanonical" books it is used by the Reformed and Roman Churches alike, with so much difference only as is caused by the difference in their Canons of Scripture; (3) lastly, it is used by Reformed, Greek, and Roman Churches, as by Athanasius of old, with reference to the forgeries and the supposititious writings that at an early time flooded the Church.

To sum up the foregoing sketch, it appears that the word "Apocrypha" has at different times in the history of the Church been applied to *writings* in the sense of (1) "secret," "mysterious," "not to be read by the profane public;" (2) "false," "sham," "supposititious;" (3) "obscure," "doubtful," "pseudonymous," "of unknown origin;" (4) "uncanonical," i.e. (a) ecclesiastical writings not included in the LXX. and Vulgate Canon (so Augustine and Roman Church); (b) ecclesiastical writings not included in the Hebrew Canon (so Jerome and his followers); (5) "Deutero-Canonical," i.e. the books of the Greek and Latin Bibles which were not included in the Hebrew Canon (so Reformed Churches). Under this last and historically least accurate meaning, the word "Apocrypha" is most familiar to English readers.

It is a matter of regret that the word, applied in the 16th century to the "Ecclesiastical" or "Deutero-Canonical" collection of books, should have possessed so deprecatory a meaning. The adjective "apocryphal" imparted its sense of "sham," "fictitious," to the name "Apocrypha," and helped to hinder the impartial treatment of the books at the hands of the Reformers, while the controversy with Rome respecting their canonicity added to their unpopularity.

To this day the title has had the effect of repelling, where there has rather been the need of inviting, the study of books, which, as the next section will show, the Church of Rome reckons as canonical, and which the Greek and the Reformed Churches have recommended to be read for edification and instruction.

II. *The Relation of the Apocrypha to the History of the Canon of the Old Testament.*—This branch of the subject will come more fully under consideration in the article CANON. But the present description of "the Apocrypha" would be incomplete without some notice of its history in relation to (1) the Canon of the Jewish Church, (2) the Canon of the Christian Church.

1. *The Apocrypha and the Jewish Canon.*—

* It is worthy of remark that in the Old Catholic Agreement, 1874, signed at Bonn by Old Catholics, Greeks, English and American Episcopalians, the words of the first Article, "the Apocryphal or Deutero-Canonical books of the Old Testament," explain the Reformers' usage by a more accurate alternative title which would commend itself both to the Greek Church and to the reforming party of the Roman Church.

Under this head has to be considered (a) whether any of the books of the Apocrypha were ever admitted into the Hebrew or Palestinian Canon, (b) the cause of their exclusion, (c) their treatment by Alexandrian Jews.

(a.) The theory that books of the Apocrypha were at any time reckoned as Canonical by the Palestinian Jews seems to be contradicted by the statement of Josephus, who (*contr. Apion.* i. 8) speaks of the books "justly believed divine" as twenty-two in number, probably classing Ruth with Judges and Lamentations with Jeremiah. His testimony tallies with the lists of the Old Testament Scriptures given by Melito (who, however, omits Esther), Origen (*ap. Eus. H. E.* iv. 26; vi. 25), and Jerome (*Prolog. Galeat.*)—men who professed to derive their information from contemporary Jews. It is supported by the list of the Hebrew Scriptures contained in the *Baba Bathra*, 14 b, 15 a, and by the common Talmudic title "The Twenty-four" (וארבעה עשר), applied to the complete Jewish Scriptures of Law, Prophets, and Writings. The testimony of Josephus is the more important, inasmuch as there is no doubt that he was well acquainted with some of the books of our Apocrypha. He quotes them and makes use of them in his history (*eg.* 1 Macc., 1 Esdras, Additions to Esther), but shows no sign of including them in the Jewish Canon. Such evidence as there is, corroborates the view favoured by the words of Josephus. Even if, as is very possible, the Jewish Canon was not finally determined until the Synod of Jamnia, A.D. 90 (?), there still remains no satisfactory proof that the Jewish Canon in its incomplete stage ever contained books in excess of or different from those which have been handed down to us as canonical. We take the evidence supplied by the writings of the New Testament, by 2 Esdras, and by Jewish tradition.

(a.) The Books of the New Testament in all probability contain no *direct citations* from the Apocrypha, although, as will be seen below, the books of Eccclus., Wisd., and 1 Macc. may have been familiar to some of the apostolic writers. Taken by itself, this absence of citation would no more be an argument for excluding books of the Apocrypha from the Jewish Canon than it would be for excluding Judges, the Song of Solomon, Ecclesiastes, Esther, Ezra, and Nehemiah, which also are not quoted in the New Testament. But the fact acquires fresh significance when viewed in conjunction with other considerations, i.e. (1) the testimony of Josephus already referred to; (2) the numerous citations made by Christian writers from Eccclus., Wisd., 1 Macc., Bar., and Tob. as soon as the Alexandrine Version of the O. T. began to receive recognition; (3) the strong presumption, based on the writings of the New Testament, that the Canon of the Jews was complete, even if not authoritatively defined, in our Lord's time. This last point deserves especial attention. It is the impression produced as much by the terms in which the authority of the Jewish Scriptures as a whole is invoked, as by the testimony afforded by individual passages. On the one hand, it is natural to see in "the Scriptures," which are so frequently and reverently cited, a final collection of writings, whose pre-eminent authority was universally acknowledged, and

the limits of whose contents were also popularly known and generally recognised (cf. Matt. xxii. 29; Mark xiv. 49; Luke xxiv. 27, 32, 45; John r. 39; Acts xvii. 2, 11, xviii. 24, 28). There is no hint of their incompleteness. The appeal to them is final. Their unique position in the estimation of the people placed them out of reach of rivalry, and precluded the possibility of change either by addition or removal. On the other hand, although the reference in Luke xxiv. 44 to "the Law of Moses and the Prophets and the Psalms" does not necessarily imply that the collection of the Hagiographa was complete, the citation from Daniel (Matt. xxiv. 15, cp. Dan. ix. 27, xii. 11) and the allusion to the Book of Chronicles (Matt. xxiii. 35; 2 Ch. xxiv. 21) favour the presumption that this was the case.

(8) The passage in the Second Book of Esdras xiv. 44-47, quoted above (p. 162, col. 2), supplies, according to the true reading (94 not 104), clear testimony that the Jewish writer, who lived probably at the close of the 1st century A.D., knew of no more than four-and-twenty books included in the Jewish Canon.

(9) Jewish tradition, taken as a whole, disapproves us with the meagre character of its evidence. The contents of the Canon were evidently frequently discussed, though on most uncritical principles, by the Jewish Rabbis. Fragmentary notices of these discussions have recorded the doubts that were felt by some as to the authenticity of certain Books of the O. T. (e.g. Ecclesiastes and the Song of Solomon, see article CANON); but, in the scanty allusions to the books of the Apocrypha, their existence is as a rule only mentioned for the purpose of rejecting their authority. The one book about which a doubt seems at any time to have been seriously entertained is Ecclesiasticus, and the earnestness of the protest made against its canonicity leads us to suspect how favourably it must have been regarded in some quarters; perhaps it indicates an actual dispute whether or no it should be numbered among the sacred Books: "Neither the books of Sirā (Ecclesiasticus) nor any of the books which were written from that time onward defile the hands" (i.e. are canonical: see art. CANON. *Yadaim*, iii. fol. 141 a). With this dictum may be compared the harsh saying of Rabbi Akiba (circ. 130 A.D.), recorded by the Jerusalem Talmud, that the man who read the "extraneous" (i.e. the apocryphal) books has no part in the world to come.

The fact that no early Targum or Chaldean paraphrase of an apocryphal book (save possibly that of the Book Tobit) has been preserved, is strongly confirmatory of the general tenor of Jewish tradition, that neither the Book of Ecclesiasticus (though for some time its claims may have been seriously canvassed), nor any other book of our Apocrypha, found a footing in the Palestinian Canon.

It may be mentioned that Jul. Fürst is of opinion that the Additions to Esther and Daniel originally belonged to the Jewish Canon; that having been removed thence on the occasion of a strict revision by the Jerusalem Sanhedrin, they have only been preserved to us by the Alexandrian Version, in consequence of the lax notions prevalent among the Egyptian Jews (Ezra. A. T. p. 142, § 102). A comparison of the Additions to Esther, in which the title of "God" (הוה) occurs twenty-one times, "the Lord" (ה' יהוה) four times, "Lord" (יהוה) eleven times, "Lord God" (יהוה יהוה) once, "Lord the God" (יהוה ה' יהוה) once, with the Canonical Book, where the name of the Deity does not occur, does not favour Fürst's view in the one case. In the other case, there is no sort of proof that the Additions to Daniel were ever ranked by the Jews along with the Canonical Book. The style is very different. External evidence to support the theory is wholly wanting.

(6.) In the case of the majority of the apocryphal books, no difficulty is raised by their exclusion from the Canon. Their character and contents sufficiently account for the position which they held in the estimation of the Jews. But with regard to the most important writings of the collection—Ecclesiasticus, Wisdom, and 1 Maccabees—the case is different. The question may well be asked, how these books were excluded from the Jewish Canon, when the books of Esther, Song of Solomon, and Ecclesiastes were admitted.

Two explanations, which have popularly been given at different times, have proved to be insufficient for their purpose. (a) The first of these explanations, based upon the Jewish legend, that the Canon of the Old Testament was concluded by the labours of Ezra, Nehemiah, and "the men of the Great Synagogue," supposed that all books written at a later date than the Book of Malachi were necessarily excluded. This legend, however, is now generally abandoned [see art. CANON], as devoid of historical worth; and along with it, the explanation referred to falls to the ground. On its own merits it was inadequate; for it assumed an early date of composition for such disputed Books as Daniel, Esther, Ecclesiastes, Chronicles; it left unexplained the order of Books in the Jewish Bible; it ignored the evidence for a later revision of the Canon supplied by e.g. the Psalter and the Book of Nehemiah. (b) The second explanation, based on the very probable supposition that only Hebrew books were admitted into the Jewish Canon, assumed that the apocryphal books were excluded on the ground either of their having been originally written in Greek, or of their Hebrew originals having dropped out of sight at an early date. It might be conceded that the Jewish Canon would probably only contain books written in the sacred language of the nation, and that therefore the Book of Wisdom, which was written in Greek, could never take rank among the canonical Scriptures. But there is undoubted proof that both the Book of Ecclesiasticus and the First Book of Maccabees were composed in Hebrew, while there is no sufficient evidence for the assertion that their originals must have been lost at an early date. The very opposite might be inferred from the Rabbinical quotations respecting the Book of Ecclesiasticus, and from the positive statements of Origen and Jerome respecting either a Hebrew original or an Aramaic Version of 1 Maccabees.

An explanation for the exclusion of these books is to be sought for on other grounds. In all probability it is to be found in the internal condition of the Jewish nation at and after the time of their composition; and, as a consequence, in the relation of the books themselves to the religious thought of the people.

four times, "Lord" (יהוה) eleven times, "Lord God" (יהוה יהוה) once, "Lord the God" (יהוה ה' יהוה) once, with the Canonical Book, where the name of the Deity does not occur, does not favour Fürst's view in the one case. In the other case, there is no sort of proof that the Additions to Daniel were ever ranked by the Jews along with the Canonical Book. The style is very different. External evidence to support the theory is wholly wanting.

If it be granted that Ecclesiasticus was written about 180 B.C., 1 Maccabees between 110 B.C. and 60 B.C., Wisdom between 100 B.C. and 50 B.C., it will be seen that this period produced the development of Judaism, which culminated in the division of the people into the opposing factions of Pharisees and Sadducees. The persecution of Antiochus Epiphanes, followed by the heroic Maccabean revolt, revived in the heart of the people a jealous watchfulness over the national Scriptures. The power of the scribes who belonged to either faction, was in the ascendant. The schools of the Rabbins multiplied rapidly. Veneration for the letter was exaggerated into idolatrous superstition. At a time of faction and controversy, all parties would appeal to the national Scriptures. A new book issuing with the favour of one party would be greeted with the keenest criticism from the other. Its inclusion within the Canon, except under favouring circumstances of an altogether exceptional character, amounted to an impossibility. The books of the Hagiographa, which had been the last to be admitted into the Jewish Canon, had all enjoyed some exceptional cause of recommendation. In each case some distinctive religious element, connected with either the faith, the worship, the patriotism, or the antiquities of the people, prepared the way for their public recognition, and facilitated their admission into the Canon. On the other hand, the three apocryphal books made no fresh addition to the religious conceptions of the people. The Books of Ecclesiasticus and Wisdom were regarded as having been written upon similar lines of thought to the Books of Proverbs, Job, and Ecclesiastes. The First Book of Maccabees was a patriotic chronicle of recent events; it lacked the warrant of antiquity, it conveyed no fresh revelation of the Divine economy towards the chosen race. Not only, however, did they fail to introduce any distinctive religious conception, but two out of the three failed to satisfy the doctrinal test of the most powerful faction. Thus the Book of Ecclesiasticus, which, as perhaps earliest in date and most Jewish in tone of all the apocryphal books, stood the best chance of admission into the Canon, possibly owed its exclusion not merely to its evidently recent composition but also to the antipathy of the Pharisees, on the ground that it nowhere mentions the doctrine of the resurrection from the dead, and even seems to dispute the doctrine of man's immortality (e.g. xvii. 30). The First Book of the Maccabees, which glorifies the deeds of the patriotic brothers, and whose silence on the subject of the resurrection stands in such marked contrast to the tone of the Second Book of the Maccabees, was even less likely to become regarded as canonical, so long as the Pharisaic faction, bitterly incensed against the Asmonæan house, continued to maintain their ascendancy over the people. The Book of Wisdom, written originally in Greek, at a late date, for the benefit of Alexandrian Jews, tinged also with the influence of Greek philosophical schools, would from the first be viewed with suspicion by the stricter Jews on account of its foreign origin, and, whatever its intrinsic merits, had never any prospect of being received among the sacred Books of the Palestinian Canon.

Such, then, were some of the causes which

tended to exclude the most eminent of the apocryphal books from the limits of the Jewish Canon. It would be unnecessary to pursue the inquiry into the claims of the other books, for the most part signally inferior both in actual power and in public estimation.

(c.) In Alexandria, the relation of the apocryphal books to the writings of the O. T. was very different. Little or no direct evidence is forthcoming in pre-Christian times. But at the first emergence of the Christian Church, its Greek Old Testament Scriptures, which it had received from Alexandrian Jews, already contained the apocryphal additions to the Palestinian Canon. Some have conjectured that the Jews of Alexandria acknowledged a different Canon from that of the Jews of Palestine; and the conjecture is so far rendered plausible by the fact, that the LXX. Version from the earliest time, at which we have accurate knowledge of its collective existence, not only contains apocryphal writings added to and interspersed among those of the Jewish Canon, but also presents us with the Books of the Jewish Canon subjected to a re-arrangement of order. The order of the Books, however, in the MSS. of the LXX. Version varies so greatly, that it would be unsafe to rest any theory of a separate Canon upon such uncertain evidence. Moreover, the writings of Philo lend no countenance to the conjecture. Philo's quotations are chiefly drawn from the Pentateuch, but he refers also with special deference to at least *twelve* other Books of the Old Testament. Although he was acquainted with some of the apocryphal books, he treats them with no special veneration (cf. Hornemann, *Observat. ad illustrat. doctr. de Can. Vet. Test. ex Philone*, 1775; Siegfried's *Philo*, Jena, 1875).

But while there is no sufficient ground for supposing the existence of an independent Jewish Canon at Alexandria, there is no doubt that the national Scriptures were handled in a more lax spirit by the Jews in Egypt than by the Jews in Palestine, and that the Books of the Apocrypha certainly obtained a recognition in the colony, which in the mother-country would have been impossible. A view of inspiration—an offshoot of Greek philosophy—which took root among the Alexandrine Jews, not only countenanced the admission of the apocryphal books to higher consideration, but practically set no limits of time to the possible extension of the Canon. This thought, first hinted at in the Book of Wisdom (vii. 27), appears as an important element of Philo's teaching (cp. *Quis rer. div. Haer.* § 52; *de Cherub.* § 9; *de Praem. et Poen.* § 16). According to Philo, Moses was the true Arch-Prophet (ἀρχιπροφήτης) of God: David, Solomon, and all other holy men of ancient or recent time, were his disciples and followers (ἐπαυλοὶ, φοιτητα Μωϋσεως). The Pentateuch was the one true authoritative canon. Around it as a nucleus might be collected the writings of Prophets and holy men of every age, inspired by the ever-present wisdom of God to form a wider and more comprehensive canon, which would receive Alexandrine as well as Palestinian writings, and would welcome Apocrypha as freely as Hagiographa.

Greek language, no less than Greek thought,

favoured the cause of the apocryphal books at Alexandria. The influence of the Septuagint Version broke down one of the chief safeguards of the Palestinian Canon. As the original language of the Hebrew Scriptures became lost to view, there disappeared simultaneously a principal feature of distinction between the more ancient and the more recent writings incorporated in the Alexandrine Version. The Hebrew arrangement of the Books was partially abandoned; the traditional order of the Books in the second and third divisions (the N'biim and C'thubim) was broken up. Popular Graeco-Judaic books were intermingled with the Books of the Palestinian Canon (cp. Codd. M, A, and B). No indication seems to have been given that the more recent books were considered to occupy a lower footing than the older books of the collection. The result seems to have been precisely what might have been expected. The Greek-speaking Jews of the Dispersion of the 1st century A.D., who were dependent upon the Septuagint for their acquaintance with their national Scriptures, having learned to recognise the whole contents of the Alexandrian Version as equally inspired and authoritative, transmitted them as such into the hands of the infant Church of Christ.

2. *The Apocrypha and the O. T. Canon in the Christian Church.*—(a.) To 600 A.D. The majority of the Fathers in the early Christian Church seem to have known the Old Testament in the LXX. Version only, and practically to have drawn no distinction between the Books of the Palestinian Canon and the apocryphal writings.

Thus in the earliest age Clement of Rome (circ. 95 A.D.) quotes Judith (1 *Ep. ad Cor.* lv., τοῦτο ἡ ψαλμία) as an example of patriotic courage, mentioning her before Esther, and combines a citation from Job with another from the Book of Wisdom (xvii. 5; cp. Job xi. 12 and Wisd. xi. 22). The *Teaching of the Twelve Apostles* (iv. 5, circ. 100 A.D.?) and the *Epistle of Barnabas* (xix. 9, circ. 80–120 A.D.?), drawing probably from the same intermediate source, use the same words, *μη γίνου πρὸς μὲν τὸ λαβεῖν ἱερέων τὰς χεῖρας πρὸς δὲ τὸ δοῦναι συσπῆν*, while they cite (? a proverbial saying recorded in) the Book of Ecclesiasticus (iv. 31). Polycarp's "Quia elemosina de morte liberat" (*Ep. ad Phil.* c. x.) is clearly taken from Tobit xii. 9, which he quotes in the same way as a passage from 1 Peter in the succeeding sentence.

In such passages the absence of any formula of citation agrees with the prevailing habit of the age. It cannot at any rate be adduced as a proof that the apocryphal books were not regarded as of equal authority with the Books of the Hebrew Canon. This is confirmed by the writers of the following age, who show conclusively that they regarded some apocryphal books as inspired, and employ in their quotations from them the regular formulae of citation from Holy Scripture. The following instances exemplify their practice.

Irenaeus (circ. 180) refers to the Additions to Daniel and the Book of Baruch as he does to the authoritative writings of Daniel and Jeremiah: cp. *adv. Haer.* iv. 5, "Daniel propheta significavit," quoting LXX. Dan. xiv. 4, 5; *adv. Haer.* v. 35, "significavit Jeremias propheta," quoting

Baruch iv. v. Wisdom (vi. 19) is quoted *adv. Haer.* iv. 38.

Clement of Alexandria (circ. 200) uses the words "the divine wisdom saith" when he is quoting the Book of Wisdom (iii. 2–4), quotes Eccles. as Solomon, and speaks of "the divine scripture" when he is quoting from Baruch iii. (cp. *Strom.* iv. p. 609, and *Pedag.* ii. 3, p. 189, ed. Potter). Clement also cites Tobit as "Scripture" (*Strom.* ii. 23, vi. 12), and quotes as Daniel's the Song of the Three Children (*ex Script. Prop. Eccl.* cap. i.).

Tertullian (ii. 5, p. 441, circ. 160–240) prefaces a quotation from Ecclesiasticus with the words "sicut scriptum est," and appeals to Wisdom as the writing of Solomon, "ut docet sophia non quidem Valentini sed Salomonis" (*Exhort. ad Cust.* c. 29; *adv. Valent.* c. 2). He quotes Baruch as Jeremiah (*Scorp.* viii.), and refers to the Song of the Three Children as Daniel (*adv. Hermog.* xlv.).

It is noteworthy that such quotations can generally be explained by the incorporation of Baruch with Jeremiah, and by the pseudonymous authorship of the Additions to Daniel, Wisdom, and Ecclesiasticus. But in the works of Cyprian († 254) we seem to advance further. We find, as might be expected, many such expressions as "per Hieremiam quoque haec eadem spiritus sanctus suggerit et docet dicens" (*de Orat. Dominici.*), and "apud Ieremiam" (*Test.* ii. 6), where the reference is to the Book of Baruch, "per Salomonem spiritus sanctus ostendit" (*Exhort. ad Mart.* xii. *de Mortal.* sub fin.), "secundum fidem sanctae scripturae" (*Ep. ad Demetr.* xxiv.), where the reference is to the Book of Wisdom. Ecclesiasticus, too, is quoted as Scripture, "cum scriptum sit" (*Ep.* v. 2), "scriptura divina" (*de Mortal.* ix.). "Susanna" (*Ep.* xl. 4) and the Song of the Three Children (*de Unit. Eccl.* xii.) are also cited as Scripture. But Cyprian goes further, when he uses the words "scriptura divina" of 1 Maccabees (*Ep.* lix.) and "scriptura divina instruit" (*de Orat. Dom.* xxxii.) of the Book of Tobit; and his use of the Apocrypha shows that he drew no line of distinction between the canonicity of the various books of the Alexandrine Version.

Of the Ante-Nicene Fathers only one or two seem to have known of the shorter Hebrew Canon, and to have resisted the unquestioning and uncritical recognition of all the books contained in the Alexandrine Version.

And here the testimony of Justin Martyr († circ. 145), though negative, is of the greatest importance, on account both of his residence in Palestine and of his acquaintance with Jewish thought. He makes no reference to any apocryphal books of the Old Testament, and, if from his silence we are to understand that he did not rank them with Holy Scripture, his evidence derives peculiar importance from his well-known reverence for the Septuagint Version.

Melito, bishop of Sardis (circ. 170), adopted, as the result of his personal investigations in the East, the Hebrew Canon of the O. T. (with the possible omission of the Book of Esther), and in his list makes no allusion to the Apocrypha (cp. *Eus. H. E.* iv. 26).

Origen's list of Old Testament Books given by Eusebius (*Hist. Eccl.* vi. 25) agrees with the

Hebrew Canon. His own writings, however, give no sign of his having excluded the Apocrypha from the rank of Holy Scripture. Thus he appeals to the Books of Maccabees as if they were Scripture (*de Principiis*, ii. 1; *Opp.* i. 79: "ut ex Scripturarum auctoritate hoc ita se habere credamus, audi quoque in Maccabaeorum libris"). The Books of Wisdom and Ecclesiasticus he calls "the divine word" (ὁ θεῖος λόγος, *contr. Cels.* iii. 72, viii. 50); "scripture" ("scriptura," *Cant. Cant.* iii. p. 49; *Hom. in Ezech.* ix. 2; in *Jud.* iii. 1; *Ep. ad Rom.* lib. iii. 2 and 7: *γραφή*, *Hom. in Jer.* xvi. 6). The Book of Tobit is called "ascripture" (*Comm. in Rom.* viii. 11; *de Orat.* xi.). He quotes Baruch (*in Jer.* xxxi.). The History of Susanna is cited as the writing of Daniel, ἡ τοῦ Δανιὴλ γραφή (*Ep. ad African.*). In his Epistle to Africanus, Origen defends the Septuagint Canon generally, and the retention of the History of Susanna in particular. He suggests that it had been struck out of the Canon by the Jewish doctors as being likely to depreciate the authority of elders in the eyes of the people. The inconsistency of these expressions with his adhesion to the Hebrew Canon (quoted by Eusebius) cannot entirely be attributed to unguarded writing. It implies rather that though personally, as a scholar and a theologian, he preferred the shorter Hebrew Canon of the O. T., he yet accepted as Scriptura the Septuagintal additions in deference to general ecclesiastical usage. This principle he seems to avow in another part of the same letter. "Touching which matter, it were expedient for us to know that the Hebrews make no use of Tobit nor even of Judith, for they do not even include them among apocryphal writings in the Hebrew tongue; and this we know by actual inquiry from them. But inasmuch as the Churches make use of Tobit, we must know," &c.

The testimony, therefore, of Origen (186-253) shows that the apocryphal books were generally, though loosely, accepted by the Church, and that, although his own scientific judgment was adverse to their full recognition, he practically acquiesced in the custom of referring to all the contents of the LXX. as inspired Scripture.

In the 4th century, under the influence of Athanasius, more definite efforts were made to determine the limits of the Canon of Holy Scripture. If the number of apocryphal and heretical Gospels, Acts, Epistles, &c., had made this necessary in the case of the N. T., it was not less necessary in the case of the O. T. Even supposing that the majority of divines accepted the scriptural authority of the Books of Ecclesiasticus and Wisdom, of Tobit and of Baruch, could these books be separated from *e.g.* 1 Esdras, and the Additions to Daniel? And further, what position should be assigned to works such as the Book of Enoch, and the Psalms of Solomon? To such questions an answer had sooner or later to be given either by the tacit usage of Churches or by the direct utterance of theologians. The investigations of Melito and Origen, as reported by Eusebius in his History, appear to have drawn attention to the difference that existed between the Hebrew and the Septuagintal Canon. The scholarly judgment of Origen carried immense weight in this as in all Biblical questions. From

the point of view also of practical expediency, the Hebrew Canon, with its fixed number of Books, as enumerated by Origen, compared favourably with the Septuagintal list, which admitted of an indefinite enlargement. But, as a rule, the fact of inclusion within the Greek Scriptures was a presumption in favour of the disputed Books outweighing every other consideration.

In the Eastern Churches, the lists of the O. T. Canonical Books drawn up during the 4th century are found sometimes to exclude the books of the Apocrypha (*e.g.* Cyril of Jerusalem, Gregory of Nazianzum, and Amphilochius), sometimes to enumerate them as a subordinate class. This latter method was adopted by Athanasius, and was afterwards generally received in the East, and in the West by the supporters of the Hebrew Canon (*cp.* Rufinus and Jerome). Athanasius divided the ecclesiastical writings of his day into three classes: (1) Canonical Books, (2) books read in the Churches, (3) apocryphal books. The books of the Apocrypha he relegated to the second class with the title of ἀναγνωσκίσματα, distinct from the κανονικά on the one side, and from the ἀπὸκρυφα on the other. In his 39th Festal Letter (Migne's ed., tom. ii. p. 117) he specifies under this second class "the Wisdom of Solomon and the Wisdom of Sirach, and Esther and Judith and Tobias, and the Teaching of the Apostles and the Shepherd" (*i.e.* of Hermas).

It is clear, however, from the writings of the Greek Fathers themselves, that they did not consider themselves bound by their more scholarly utterances upon the subject of the apocryphal books. Cyril of Jerusalem (†386) (*Catech.* iv. 35) lays down the precept, "Read the two-and-twenty books, but meddle not with the apocryphal writings," with which his own practice is far from being consistent. Both Cyril and Athanasius practically accepted the LXX. Version as their O. T., and treated all the books of this Version as divinely inspired Scripture. They quoted from apocryphal books, and based arguments upon apocryphal quotations, just as if they drew no distinction between them and the books of the Hebrew Canon.

The 59th Canon of the Council of Laodicea, about 360, gives (in a list of doubtful authenticity, though probably of the same century) the Hebrew Canon of the O. T., with the addition of the Book of Baruch. This addition makes it probable that the Greek Additions to Daniel, Esther, and Ezra, were also included in the list. The Apostolical Canons (Canon LXXXVI.) include the Book of Judith and three Books of the Maccabees in the O. T. Canon of Scripture, and recommend Ecclesiasticus for the education of the young.

Epiphanius (†403), who sometimes follows the Hebrew Canon (*cp. de Mens. et Pond.* § 23), elsewhere (according to Dindorf's text), reckons Tobit and Judith with Esther as the last or 27th book, and includes under Jeremiah, Baruch, and "the Epistle" (*Haer.* 8, i. 6); and although he speaks of Wisdom and Ecclesiasticus as ἐν ἀμφότερον χωρὶς ἄλλων τῶν βιβλίων ἐναποκρυφίων (*Haer.* 8, i. 6), in another place he calls them "Divine Scriptures," classing them strangely enough as an appendage to the N. T. (compare the position of Wisdom in the Muratorian Fragment. *Haer.* 76, i. 941).

The views of the Antiochene school may perhaps be represented by the *Synopsis Sacrae Scripturæ*. (Chrys. *Opp.* tom. vi. pp. 313-386). But the text of that document is so corrupt in its present state, that we can only for certain gather that it included Ecclesiastical, and that in all probability the Book of Daniel included Bel and the Dragon.^a

Chrysostom (†407) himself speaks of Wisdom as the writing of Solomon, and constantly quotes the Books of Wisdom and Ecclesiastical as "Scripture." He quotes Baruch as the writing of Jeremiah (*Hom. in Isa.* cap. i. tom. vi. p. 17). He refers to the Song of the Three Children and the Story of Bel and the Dragon as the works of Daniel (e.g. *Hom. in 1 Cor.* xv. 4; *Hom.* 38. 4).

The Peshitto (Syriac) Version of the O. T. was originally a translation from the Hebrew books only. The apocryphal books were probably not added until the 4th century, when most of them were rendered from the LXX. into Syriac (Ecclus. being from the Heb.). The Ambrosian MS. (probably of the 6th century) contains various apocryphal books, i.e. Wisdom, Ep. of Jeremiah, 1 and 2 Epp. of Baruch, Additions to Daniel, Judith, Ecclesiastical, Apocalypse of Baruch, 2 Esdras, 1. II. III. IV. V. Maccabees.

It appears, therefore, that the Eastern Church followed no very definite principle with respect to the apocryphal books. Being generally ignorant of Hebrew, the Greek Fathers made almost exclusive use of the Greek Version, and their use of the *βιβλία ἀναγινωσκόμενα* shows a preference for those books which either were associated with an honoured name (e.g. Wisdom of Solomon, Letter of Jeremiah, Baruch, Additions to Daniel), or incalculated special virtues (e.g. almsgiving in Tobit), or contributed to the knowledge of God's dealings with the Jewish people (e.g. Additions to Esther and Books of Maccabees).

In the West, a few of the most learned theologians upheld the Hebrew Canon, and in so doing opposed the general usage. The O. T. was popularly read in the *Vetus Italica* or some similar translation into Latin, of which the LXX. Version had been the original. No distinction was preserved in these Versions between the books of the Apocrypha and those of the Hebrew Canon. Jerome, Hilary, and Rufinus are the chief representatives of those who preferred the shorter list of Scripture; but even in them we find inconsistencies of expression, which betray how generally the LXX. Version had accustomed the Church to receive the apocryphal books.

Jerome (†420), as we have seen above, expressed his view, destined to be so often repeated as to be almost authoritative, in his *Prologus Galeatus in libr. Reg.*, that the Books of the O. T. were the Hebrew twenty-four, which he specified;

that all others were "Apocrypha;" and therefore that Wisdom, Ecclus., Judith, Tobit, Shepherd (i.e. of Hermas), and Maccabees were not canonical: "Hic prologus scripturarum quasi galeatum principium omnibus libris quos de Hebraeo vertimus in Latinum convenire potest, ut scire valeamus, quicquid extra hos est inter apocrypha seponendum. Igitur Sapientia, quae vulgo Solomonis inscribitur et Hiesu filii Sirach liber et Judith et Tobias et Pastor non sunt in Canone. Maccabaeorum primum librum Hebraicum reperi, secundum Graecus est, quod ex ipsa quoque phrasi probari potest," &c. In other important passages he affirms his preference for the Hebrew as distinguished from the Septuagint Canon. *Praefat. in Ezram* (Div. Biblioth.): "Let no one be enamoured of the dreamings of the apocryphal third and fourth books (of Esdras); ... and all that does not belong to the four-and-twenty elders is to be absolutely rejected (*procul abicienda*)." Cp. ii. 420, "apocryphorum deliramenta"; vii. 660, "apocryphorum ineptiae". *Ep. cvii. ad Laetam*: "Let her (Laeta) beware of all apocryphal writings; and if at any time she should wish to read them, for the confirmation not so much of her faith as of her reverence for the men of old time,^b let her know that they are not the writings of those by whose names they are designated, and that much that is harmful is mixed with them, and that it requires great skill to seek for 'gold in the dirt.'"

On the other hand, he often refers to Ecclesiastical (e.g. *twice in Ep. cxlviii.*; cp. lvi.) as "Scriptura." The Books of Judith and Wisdom are frequently referred to and quoted, but the scriptural authority of both is qualified by the phrase, "if however you please to accept the book" (*si cui tamen placet librum recipere*: cp. *Comment. in Zech.* lib. iii. cap. xii. § 902). In his Preface to the Book of Tobit, he points out that it was excluded from the Canon by the Jews, and that not being written in Hebrew it did not strictly fall within the scope of his translation ("librum Tobiae quem Hebraei de catalogo divinarum Scripturarum secantes, his quae apocrypha [v. l. hagiographa] memorant manciparunt"). In his Preface to the Book of Judith he first states the fact that it was placed by the Jews among the Apocrypha, and then accounts for his acceding to a pressing demand for its translation, though the book was extant in Chaldaean only and not in Hebrew, on the ground that the Council of Nicaea was said to have reckoned it among the Books of Holy Scripture ("sed quia hunc librum Synodus Nicaena in numero sanctorum Scripturarum legitur computasse"), a statement which appears to be devoid of foundation.

Hilary (†368), whose devotion to Origen perhaps accounts for the fact, also upheld the Hebrew Canon, reckoning "the Epistle" with Jeremiah; but he testifies to the desire on the part of some to augment it with the Books of Tobit and Judith to make the number up to 24 (*Proleg. in Ps.* § 15).

Rufinus (†410) designates Wisdom, Ecclesiastical, Tobit, Judith, and Maccabees as a class distinct from the Canonical Books by the title of

^a Reading "seniorum." "Signorum" of the text is untranslatable.

^b There is good reason to suppose that the portions of this document relating to *Wisdom*, *Tobit*, and *Judith* are interpolations. There is no allusion made to these three books in the "Protheoria." And while the "Protheoria" is wanting in the Cod. Lugdunensis, the other text Cod. Cotelianianus, which contains the "Protheoria," lacks several of the Synopses, e.g. on Chron., Esth., Tob., Jud., Job, Wisd., Prov. (see *Introd.* in Migne's *Ed.*).

"libri ecclesiastici" (*Comm. in Symb.*). But he must have received the Books of the Hebrew Canon in the form derived from the LXX. Version, as we find him delivering an assault upon Jerome for having cancelled the History of Susanna from the list of canonical writings (cp. Jerome's *Apologia adv. Ruf.*).

The reverence for the traditional Canon of the LXX. Version remained too firmly seated in men's minds to be upset by the judgment of the few, who either knew a little Hebrew or were acquainted at second hand with the existence of the Hebrew Canon. The prevalent opinion finds expression in the writings of Augustine, and was first authoritatively confirmed by the councils of Hippo (393) and Carthage (397), which were held under the shadow of his commanding influence.

Augustine, in his *de Doctrinâ Christ.* ii. 8, discusses the "whole Canon of Scripture." He divides the Books of the Old Testament into historical, miscellaneous, and prophetic classes. In the miscellaneous class he places Job, Tobit, Esther, two Books of the Maccabees and two of Esdras; the prophetic class he begins with the Book of Psalms, three Books of Solomon, and the Books of Wisdom and Ecclesiasticus.

The Council of Hippo, 393 (see Hefele, *Con-*

cilien), giving a list of canonical Scriptures, speaks of five Books of Solomon, and includes also Tobit, Judith, and two Books of Maccabees. This Canon was ratified by the Council of Carthage (397), and appears in a letter "Ad Exuperium," attributed to Pope Innocent I. (†416), and in the problematical "Decretum Gelasii."

Leo (450) constantly quotes Wisdom and Ecclesiasticus as "scripture." Referring to Eccles. xviii. 30, he says it is declared "by the Holy Spirit" (*Sermo lxxi.* 2). In another passage he calls it the writing of "sapientissimus Salomon" (*Sermo xxxix.* 3, quoting Eccles. ii. 4).

It is most reasonable to suppose that this Canon of the O. T., being virtually that of the LXX. Scriptures, reckoned the Book of Baruch with the prophecy of Jeremiah, and included the apocryphal Additions in the Books of Daniel and Esther. This ascription of canonicity to the apocryphal books was most generally accepted at the close of the 4th century, and receives confirmation from the earliest extant MSS. of the O. T. (see below), which present us with the apocryphal books intermingled with and undistinguished from the other books of the O. T. But a degree of uncertainty is betrayed by the want of uniformity in the arrangement and order of the books.

Tobit.

Judith.

Esther (with Additions).

Ezra, Nehemiah.

Maccabees 1, 2.

(b.) *To the Age of the Reformation.*—In the interval between the 6th century and the age of the Reformation, little or no change is to be observed in the relation of the apocryphal books to the Canon of Old Testament Scripture.

In the *East* the opinion of Athanasius acquired increasing influence, and seems to have been regarded as little less than authoritative.

Junilius (6th century?), who by freely translating Paul of Nisibis practically represents Theodore of Mopsuestia, furnishes testimony of peculiar interest. After enumerating the books containing the "Divina historia" (Gen.-Kings), he says, "Adjungunt plures Paralipomena II., Job I. (Tobiae I.), Hesdrae primum (or I.), Judith I., Hesther I., Maccabeorum II." In the "proverbialis species" he includes only Proverbs and Ecclesiasticus. Some, he says, add Wisdom and Canticles. Ecclesiastes he places in the Canon among books which simply *teach*. (*De part. div. leg.* lib. i. § 2.)

Leontius of Byzantium (about 590) maintained the Hebrew Canon, omitting the Book of Esther (*De Sectis Act.* ii.).

Anastasius Sinaita (?) divided ecclesiastical books into three classes—Biblical, Extra Biblical, and Apocryphal—and reckoned in his second class Wisdom, Ecclesiasticus, four Books of Maccabees, Esther, Judith, and Tobit.

John of Damascus (†750), paraphrasing Epi-phanus, calls the apocryphal books Wisdom-Eccles. "excellent and beautiful, but they are not numbered (in the Canon), nor were they laid up in the ark" (*ἀνάστροι καὶ καὶ οὐκ ἐναρμόνιζαν οὐδὲ ἐκείντοι ἐν τῇ κιβώτῃ. De Fid. Orth.* lib. iv. § 17).

Nicephorus (†828), who maintains the number of twenty-two Canonical Books, admits Baruch, 1 Esdras (? and Additions to Daniel), and excludes Esther. He gives the title of "Antilegomena" to 3 Books of Maccabees, Wisdom, Ecclesiasticus, Psalms of Solomon, Esther, Judith, along with certain Apocalypses of Peter and John, the Epistle of Barnabas, and Gospel according to the Hebrews.

Zonaras (1150), commenting on the 85th Apostolic Canon, mentions that "some" allow to be read "the Wisdom of Solomon and Judith and Tobias and the Apocalypse of the Θεολόγος."

Alexius Aristenus (about 1180), dealing with the subject of the same Canon, includes in his O. T. three books of Maccabees, and adds, "Moreover, besides these (*ἐξωθεν δὲ τούτων*), also the Wisdoms of the learned Sirach."

In the *West*, theologians were divided in opinion. They were perplexed by the opposition between Augustine and Jerome, the two most influential Fathers of the Church. They were

unwilling to run counter to the *dicta* of either the one or the other. The claims of the Hebrew Canon were always well represented by scholars and divines, who relied on the learning of Jerome. But the influence of the Latin Version (in which, in spite of Jerome's well-known views, ecclesiastical usage had caused the insertion of the apocryphal books), the popularity of Augustine's works, and the general ignorance of Hebrew, combined to procure the more general assent to the use of the LXX. Canon, and to the recognition of the apocryphal books.

The following are some of the scholars whose testimony may be cited in favour of the Hebrew Canon, to the exclusion of the Apocrypha.¹

Gregory the Great (†604), speaking of the Books of the Maccabees, uses the words "from books which, although not canonical, were nevertheless composed for the edification of the Church" ("*ex libris licet non canonicis sed tamen ad ecclesiae aedificationem editis*," *Moral. in Job xxx.*, chap. xix.). With respect to the Books of Tobit, Wisdom, and Ecclesiasticus, he quotes them at times as "Scripture" and of Solomonic authorship; at other times as the writings of "wise men."

Nutker, of St. Gall (†912), speaks of "the Book of) Wisdom as wholly rejected by the Hebrews and held uncertain among us; still because our forefathers were accustomed to read it for the usefulness of its teaching, while the Jews have it not, it is called an ecclesiastical book also among us. It is right, too, that you should hold the same opinion about the Book of Jesus the Son of Sirach, except that that is read and quoted by the Hebrews" (quoted in Westcott's *Bible in the Church*, p. 207). He classes Judith along with Esther and Chronicles as books whose text had no authority save as a record to keep alive the reverent recollection of the past; and he hints that the Books of the Maccabees fell under a similar suspicion: "quum etiam in eis littera non pro auctoritate sed tantum pro memoria et admiratione habeatur . . . idem de libris Machabaeorum suspicari poteris" (*De Vir. illustr.*).

Hugo de St. Victore (†1141) says: "There are besides (i.e. not in the Canon) certain other books—such as the Wisdom of Solomon, the Book of Jesus the Son of Sirach, and the Book of Judith and Tobias, and the Books of the Maccabees—which are indeed read, but are not written in the Canon;" i.e. read in the Churches, but are not strictly Canonical Scripture ("qui leguntur quidem sed non scribuntur in Canone," *De Scripturis et Scripturibus sacris*, c. 6). Cp. c. 12, "leguntur tamen et ad Vetus Testamentum pertinent, sed non sunt confirmati in Canone."

Peter of Clugny (†1146) says: "After these authentic Books there remain six Books (Wisdom, Ecclesiasticus, Judith, Job, 1 and 2 Maccabees) which must not be passed over in silence; for although they could not attain the lofty dignity of those mentioned above, they have nevertheless deservedly been received by the Church on account of their admirable and most indispens-

able teaching" (*Ep. contr. Pctrob.* ed. Migne, p. 751).

John of Salisbury (†1172), after recording the Hebrew Canon of twenty-two Books, adds: "Now the Books of Wisdom and Ecclesiasticus, Judith, Tobias, and 'the Shepherd' (Hermas) are not reckoned in the Canon; nor again is the Book of the Maccabees, which is divided into two volumes" (*Ep.* 172).

Hugo de Santo Caro (†1260), after detailing the three divisions of Law, Prophets, and Hagiographa, adds: "Still there remain the Apocrypha—Jesus, Wisdom, and Shepherd, the Books of Maccabees, and Judith, and also Tobias. These, because they are doubtful, are not to be held of the Canon; but because their song is true, the Church receives them" ("hi quia sunt dubii sub Canone non numerantur, sed quia vera canunt Ecclesia suscipit illos," *Prolog. Jos.*).

Thomas Aquinas (†1274) speaks rather hesitatingly of the Book of Wisdom: "from which it is clear that the Book of Wisdom is not yet reckoned among the canonical Scriptures." He also raises the question as to the Book of Ecclesiasticus, "because it is not reckoned by the Jews among canonical Scriptures" (*In Dionys. de div. Nom.* c. 4, lect. 9).

Nicolaus de Lyra (†1340) condemns the canonicity of Tobit, Wisdom, Ecclesiasticus, Baruch, and the Additions to Daniel and Esther (*Præf. in Tob.*).

John Wycliffe's (†1384) Preface to his Translation says, "Whatever book in ye elde Testament ye out of yes xiv. byfore sayd, shall be sette among apocria, that ys withoute autorite of bylene;" mentioning Wisdom, Ecclesiasticus, Tobit and Judith and Maccabees, along with Jerome's words in his *Prologus Galeatus*.

Antoninus, Archbishop of Florence (†1459), in one passage uses the words: "They (the Jews) make twenty-two authentic Books. The fourth part they call Apocrypha, to wit, the Book of Wisdom, Ecclesiasticus, Tobit, and 1 and 2 Maccabees. The Holy Church, however, also receives them as true . . . and reveres them as useful and moral works, although for controversy upon the things which belong to the faith not conclusive in proof" (*Chron. Pont.* 1, tit. 3, cap. 9, § 12). In another passage, after quoting Jerome upon the subject, he adds, "And the same thing is said also by Thomas (ii. 2) and by Nicolaus de Lyra concerning Tobias; namely, that they are not of such authority that an effectual argument could be drawn from them in the matters which concern the faith, as could be drawn from the other Books of Holy Scripture. Hence they have perhaps the like authority to the sayings of the holy doctors approved by the Church."

On the other hand, the great mass of testimony is found to support the LXX. Canon, which had been upheld by Augustine and confirmed by the Council of Carthage (398).

Throughout the whole of this long period, the ignorance of the real question can hardly be overstated. Even men with the highest claims to learning contributed little but the reiteration of former views. Attempts at combining the Hieronymian and Augustinian positions were constantly made. At one time, though the canonicity of the Apocrypha is denied, its Books are declared to be received by the Church: at another, though the Apocrypha is regarded as

¹ For a full list of passages from representative Scholars of the Middle Ages, the reader should refer to Hody's great work, *De Testibus*, &c., and Westcott's *Bible in the Church*.

Canonical Scripture, it occupies a lower level of canonicity than the Books of the Hebrew Canon. It was recognised by the few supporters of the Hebrew Canon that the apocryphal Books were useful for edification, although without authority for purposes of controversy. On the other side, an interpolation of "Agiographa" for "Apocrypha" in Jerome's Prefaces to Judith and Tobit (still to be found in the margin of the text) helped to modify Jerome's unfavourable estimate of the Apocrypha. The question was really removed from the sphere of argument by the influence of the Latin Vulgate, in which it was customary to include the apocryphal Books. According to the MSS. there seems to have been little uniformity in their order of arrangement. In some copies they appear as an appendix to the O. T. Scripture. In others they are interspersed amongst the other Books. When Wisdom and Ecclesiasticus were, as was very generally the case, placed after the Book of Ecclesiastes, Tobit and Judith next to Esther or Job, the Book of Baruch after the prophet Jeremiah, the two Books of the Maccabees after the Minor Prophets, only the learned few could distinguish between the acknowledged and the disputed books of the O. T. Canon; and even when the Apocrypha was added as an appendix to the O. T., there was usually no indication given of any distinction in value or authority.

(c) *The Reformation*.—The age of the Renaissance, with the revival of Greek and Hebrew learning, introduced a healthier phase of biblical study. The position of the Apocrypha with respect to the Canon of Scripture was very early brought under discussion.

Roman Catholic divines and men of the New Learning alike treated the subject with courage and independence. Cardinal Ximenes (1517) in his edition of the Complutensian Polyglott keeps the Apocrypha separate from the other Books, and speaks of them as Books outside the Canon of Scripture, received by the Church for edification, not for authority in matters of doctrine (*Prolog.* iii. 6). Cardinal Cajetan (Thomas del Vio, 1533), defending his exclusion of the Apocrypha from his Commentary on the Scriptures, uses the remarkable words: "Nor be ye disturbed by the strangeness of the thing, if ye find anywhere those Books (*i.e.* Judith, Tobit, Maccabees, Wisdom, and Ecclesiasticus) reckoned among the canonical writings either in the holy councils or in the works of holy doctors. For the words of councils and doctors alike must be brought back to Jerome's file," *i.e.* criticised upon Jerome's principles (*ad fin. Comm. in Esther*). Again in another place (*Comm. in Ep. ad Hebr.* cap. 1) he says, "In order not to err in our discrimination of Canonical Books, we follow the rule of St. Jerome. What he handed down as canonical we accept as canonical; what he separated from the canonical we hold outside the Church" (quoted by Salmon, *Gen. Introd.* to Apoc., *Speaker's Comm.*).

Erasmus censures the prevalent ecclesiastical usage with respect to the apocryphal books. In the year 1516 we find him saying in his *Scolia in Hieron. Prolog. in Esdras*: "Strange, when Jerome reckons the 3rd and 4th Books of Esdras among the Apocrypha, and terms what is written in them dreams, how it should have

come to pass that the same Books are now read by us and no question asked" ("citra discrimen ullum," *Schol. ad Prolog. in Tob.*). "Although this Book (Susanna) has no place among the Jews, and on the authority of Jerome is reckoned among the Agiographa (*sic*), it has nevertheless been received by us among the principal Books" (*Schol. in Prolog. in Dan. de Hist. Susanne*). "Strange that what Jerome transfixes with his 'spit' (*i.e.* 'obelisk,' as uncanonical) is now generally read and sung in the Churches as fact of the first importance. . . . Verily we read without exercising discrimination ('nullo delectu legitimus') Bel and the Dragon, which Jerome did not shrink from pronouncing a fable." In 1525 he says: "It is not yet agreed in what spirit the Church now holds in public use Books which the ancients with great consent reckoned among the Apocrypha. Whatever the authority of the Church has approved I embrace simply as a Christian man ought to do. . . . Yet it is of great moment to know in what spirit the Church approves anything. For allowing that it assigns equal authority to the Hebrew Canon and the Four Gospels, it assuredly does not wish Judith, Tobit, and Wisdom to have the same weight as the Pentateuch" (cited in Westcott's *Bible in the Church*, p. 252). He speaks more cautiously at a later date (1533) in his *Explan. Symbol. Cat.* 4: "But now there have been admitted into ecclesiastical usage both the Book of Wisdom and the Book of Ecclesiasticus; there have been admitted also the Books of Tobias and of Judith and of Esther, and the two Books of the Maccabees. There have been admitted also the two histories which are attached to the Book of Daniel, the one concerning Susanna, the other concerning Bel and the Dragon. But whether the Church has received these Books upon the same authority as she has the others, the spirit of the Church knoweth."

The Reformed Churches.—The leading Reformers shared the opinions of Erasmus, and excluded the Apocrypha from the Canon of the Old Testament. Their fundamental position was the rejection of human authority, and the assertion that the authority of Scripture was derived from God alone. They rejected the Apocrypha from their Canon of Scripture on the ground that it was not included in the Hebrew Canon, and that the contents of the Hebrew Canon alone had been divinely ratified by our Lord and the inspired Apostles. Proof of this last assertion was forthcoming from the quotations of the New Testament. The mistake has sometimes been made of supposing that the Reformers' position was rendered logically untenable by the analogous absence of reference in the New Testament to certain books included in the Hebrew Canon. But the question turned upon the Apostolic appeal, not to individual books, but to groups of books. The fact, too, that no "Apocryphal" book is directly cited in the New Testament is unanswerable.

Luther assigned to the Apocrypha the position of an appendix to the Old Testament of his translation (1534). In his free criticisms upon Scripture, he expressed high approbation of the Books of Wisdom and Ecclesiasticus; he considered the Prayer of Manasse as useful for purposes of penitential devotion; he severely censured the Books of Baruch and 2 Maccabees,

and omitted altogether 1 and 2 Esdras in his translation, on the ground that they contained "nothing that could not be better found in Esop, or yet more trivial books." He said also that 2 Esdras consisted of "mere dreams."

The general view of the earlier Reformers was expressed in the inscription of the old Zürich Bibles (1529)—"These are the Books which with the men of old time were not counted among biblical writings, and moreover are not found among the Hebrews."

The early Genevan Bibles asserted that "the books called the Apocrypha were at all times distinguished from those which without difficulty were regarded as Scripture," and compared the former to "escriitures privées et non pas authentiques comme sont les instruments publiques." The authoritative edition of 1588 defines the position of the Apocrypha thus:—"These books are not divinely inspired like the rest of the Holy Scripture, and being of private composition, they ought not to be received nor produced publicly in the Church, so as to serve, as a rule, for the articles of our faith. At the same time we may use them privately to draw instruction from them, as much because of several fine examples set forth in them, as because of notable passages which they contain."

In England the translations of the Bible will best illustrate the position assigned to the Apocrypha. Tyndale did not live to complete his translation of the Old Testament; but his rendering of certain apocryphal lessons was executed with as much care and skill as that of the Canonical Books (see Westcott's *Hist. of Eng. Bible*). Coverdale's Bible (printed at Zürich, 1535) appeals in the titlepage of the Apocrypha, which forms a separate collection at the close of the O. T., to the authority of the Fathers and of the Hebrew Canon: "Apocripha. The bokes and treatises, which amonge the Fathers of olde are not rekened to be of like authority with the other bokes of the Byble, neither are the fofde in the Canon of the Hebrew." The Prefaces to Coverdale's Bible, Matthew's Bible (1537), and the Great Bible (1539), reproduce the opinions of the chief Reformers with moderation and clearness.

It is important to remember that, although the Reformed position showed a diminished reverence for the Apocrypha, there was no departure from ecclesiastical usage. The Reformers strongly expressed their sense of the inferiority of the books of the Apocrypha as compared with the Canonical Books of the Old and New Testaments. But they included the Apocrypha in the Bibles which they placed in the hands of the people. The Apocrypha stood between the Old and New Testaments. It was printed in the same type. Its value was thus admitted and its historical position recognised, although its canonicity was rejected.

In the Revision in 1553 of the Articles of Reli-

gion of the Church of England, Article VI. (formerly V.), which contained a definition of Holy Scripture, adds: "As for the other bookes (as Jerome saith) the Church doth reade them for example, and for good instruction of lyvvyng, but yet doth it not apply them to establish any doctrine. Such are these following. 3 and 4 of Esdras. Judith. The booke of Wisdome. Tobias. Jesus the sonne of Syrach. Machabies 2" (English edition of 1563=Latin MS. 1562). The revision of the same clause in 1571 added certain other books, and runs as follows:—"And the other bookes (as hierom saith) the Church doth read for example of lief and instruction of manners; But yet doth it not apply them to establishe any doctrine. Such are these folowyng. The third booke of Esdras. The booke of Wisdome. Of Bel and the Dragon. The forth booke of Esdras, Jansu the Sonn of Sirack. The Praier of Manasses. The booke of Tobias. Baruch, "the Prophet" added. Jewel, 1571. The first booke of Machabies. The booke of Judith. The song of the 3 Children. The second booke of Machabies. The rest of the booke of Heat'. The Storie of Susanna." (MS. of Convocation, 1571).

The decision of Article VI. was final as regards the Canon of the O. T. in the English Church. In the Authorized Version of 1611 it was unnecessary to append any further explanatory note as to the collection of apocryphal Books. Selections from the Apocrypha were admitted into the Book of Common Prayer, e.g. the Benedicite or the Song of the Three Children, two verses from Tobit iv. in the offertory sentences, the Daily Lessons from September 27 (morning) to November 23 (evening), when the Books of Tobit, Judith, Wisdom, Ecclesiasticks, Baruch, History of Susanna, and Bel and the Dragon were ordained to be read in church; to which were added selections from the Apocrypha as Proper Lessons for the following Saints' Days: Innocents' Day, the Purification of the Blessed Virgin Mary, St. Matthias, Annunciation of our Lady, St. Barnabas, St. Peter, St. James, St. Bartholomew, St. Matthew, St. Luke, and All Saints' Day. The reference to the story of Tobit in the Benediction of the Marriage Service appeared in the Prayer Book of 1549, but not in later editions.

The defence of the treatment of the Apocrypha by the Reformed English Church is to be found in Book v. chap. 20 of Hooker's *Ecclesiastical Polity*. Hooker there vindicates the usage of the English Church against the great Elizabethan Puritan, Thomas Cartwright, who took exception to the reading in church of either Homilies or the Apocryphal Books. On three subsequent occasions—i.e. the Hampton Court Conference, 1603, the Savoy Conference, 1661, and in 1688—the Puritan objections were renewed (see Cardwell's *Conferences: Hampton Court*, chap. iv. pp. 193, 194; *Savoy Conf.* vii. pp. 274, 307; Reply, p. 341 [1688]; i. p. 430).¹

* The third edition of the Great Bible (Tunstall and Heath's, Nov. 1540) omits the Preface to the Apocrypha, and there is no hint given that it is inferior in authority to the books of the Hebrew Canon. The later editions of the Great Bible generally have the word "Hagiographa" in the place of "Apocrypha." Taverner's translation, revised by Becke (J. Day, 1551), adds for the first time the 3rd Book of Maccabees.

¹ At the Synod of Dort (1618) a determined effort was made by Gomarus and certain others to procure the removal from the Bible of Esdras, Tobit, Judith, Bel and the Dragon (Session x.). The effort was unsuccessful. But the Synod expressed itself to the effect that a very careful distinction should be made in the printed Bibles between Canonical and apocryphal Books.

The substance of these objections is incorporated in the measured language of the Westminster Confession (1647), c. 1, § 3: "The Books commonly called Apocrypha, not being of Divine inspiration, are no part of the Canon of the Scripture; and therefore are of no authority in the Church of God, nor to be any otherwise approved or made use of than other human writings." The attempts in the 17th cent. to change the attitude of the English Church in respect of the public use of the Apocrypha failed. These attempts were clearly prompted and justified by a sincere regard for the highest edification of the people in Divine worship. It was honestly felt that the reading of chapters from what was not Holy Scripture tended to confuse human and Divine authority in the minds of the congregations. Unhappily the objections were not always very wisely or temperately stated, nor always listened to in a conciliatory spirit. By the Church it was held that so long as passages from the Apocrypha could honestly be read for example of life and instruction in manners, their retention in the kalendar was in accordance with the spirit of the Articles. It should, however, be remarked that Laud's Scottish Prayer Book (1637) so far recognised the existence of a legitimate grievance as to reduce the public use of the Apocrypha to six lessons for Saints' days, taken from Wisdom and Ecclesiasticus (see Procter, *History of the Book of Common Prayer*, p. 220 n.). The present century has seen the removal of the chief cause of offence. Recent concessions have been prompted by considerations of taste and public expediency. The compilers of the Revised Lectionary of 1867 recognised the manifest unsuitableness of many of the old apocryphal lessons for public reading. They retained only selected passages from the Books of Wisdom, Ecclesiasticus, and Baruch, for the Daily Lessons which are read from October 27 (evening) to November 17 (evening), and the old Proper Lessons for the festivals above mentioned.

The American Church has restricted the lessons from the Apocrypha to a few Holy Days; the Irish Church has struck out all apocryphal lessons from her Lectionary.

The Roman Church.—The attitude of the Reformed Churches towards the Apocrypha in the 16th and 17th centuries was in a great measure due to the action of the Roman Church. The 4th Session of the Council of Trent (held April 8, 1546), when only fifty-three members were present, declared by a small majority that all the Books contained in the Latin Vulgate were canonical Scripture. In the enumeration of the Books of the Old Testament, Nehemiah is followed by Tobit and Judith; Canticles by Wisdom and Ecclesiasticus; Jeremiah by Baruch; Malachi by 1 and 2 Maccabees. Here it should be noted (1) that the Books of the Vulgate include under Daniel and Esther the apocryphal additions to those two Books; (2) that no sort of

distinction is drawn between the Apocrypha and the other writings of the Vulgate; (3) that 1 and 2 Esdras, the Prayer of Manasse, and 3 Maccabees are not included in the Tridentine Canon.

In accordance with the Tridentine decree, the official edition of the Vulgate (1592) contains, after Nehemiah, the Books of Tobit and Judith; after Esther, the apocryphal additions; after Canticles, Wisdom and Ecclesiasticus; after Jeremiah and Lamentations, the Book of Baruch and the Epistle of Jeremy; after Daniel, the apocryphal additions; after the Minor Prophets, 1 and 2 Maccabees; and, as an appendix to the whole Bible, after the New Testament, the Prayer of Manasse and 1 and 2 Esdras, with an explanatory note to the effect that they were placed there apart (in order to prevent their total loss) inasmuch as they were frequently found in MSS. and in printed copies of the Bible.

The controversy arising from the Tridentine decree, between Rome and the Reformed Churches, was maintained by Cardinal Bellarmine on the one side, by Rainolds and by Whitaker on the other. The Reformed Churches denied the right of the Church of Rome to add new Articles of faith or to authoritatively declare books canonical whose canonicity had always been opposed by learned Fathers of the Church, and had never been acknowledged by any of the Six Oecumenical Councils.

The Church of Rome claimed (1) that the Council was within its right when it declared the Apocrypha canonical; (2) that the gradual development of the N. T. Canon was a sufficient justification for the tardy recognition of the canonicity of the apocryphal Books; (3) that the indiscreet language of the Reformers made it necessary to affirm more stringently the general tradition of the Church.

The term "Deutero-Canonical," having been applied to the apocryphal books, proved to be convenient, on account of its ambiguity; for it implied canonicity of either later date or of less authority than the Books of the Hebrew Canon. No hint is given in the Tridentine decree or in recent authoritative utterances that the Deutero-Canonical Books are of inferior authority. This has, nevertheless, been asserted by some Roman Catholic divines, e.g. Bern. Lamy, *Apparat. bibl.* ii. c. 5, p. 333, ed. Lugdun., 1723: "Accordingly the Books which are in the second Canon, although united with the others of the first Canon, are nevertheless not of the same authority." Cp. Bellarmine, *de Verb. Dei*, i. 4, 10, 11; Jahn, *Einleit.* i. 119, 132, 140-143.

It is more generally maintained by Roman Catholic theologians that the Deutero-Canonical Books, which once were unequal, have become, since the Council of Trent, equal in authority to the Proto-Canonical Books. This is shown by the words of Anton. a. Matre Dei, *Praelud. isag.* Mogunt. 1670 (p. 55): "Although these books (i.e. the proto-canonical and deutero-canonical) are now equally to be believed, yet their authority was not always the same." Dens' *Theologia* (Mechlin, 1809, vol. ii. *de Virtute Fid.*; No. 61, *de Divis. Script. Sacr.*), after mentioning that the Canon of the O. T. was twofold, Jewish and Christian, goes on to say that "the sacred Books, received as such by the Church,

N

by means of intermediate spaces, by explanatory titles, and by smaller type; and that notes of warning and explanation should be appended, wherever the Apocrypha contained errors of fact or doctrine. The Belgian section of the Synod decreed that the Apocrypha should be relegated to the last pages of the Bible, i.e. at the close of the New Testament.

are, some of them, called Proto-Canonical, others Deutero-Canonical. The latter are those Books which have recently been admitted into the Canon of sacred books, but about which it was disputed in old time, whether or no they were Holy Scripture." This class consisted of the O. T. Apocrypha and the N. T. Antilegomena. The writer does not admit that the deutero-canonical books are subordinate in authority to the proto-canonical.

The decision of the Council of Trent is defended by Vincenzi (*Sessio Quarta Conc. Trid. Vindicata*, Rom. 1842) as the opportune and necessary development of the Church's teaching (see Wordsworth "On Inspiration," Appendix): "For the Church in the earliest ages deferred the solution of this problem, and did not consider it opportune; . . . although the Church was fully persuaded thereon and held firmly the truth and divinity of the Deutero-Canonical Scriptures. . . . But when she perceived her opportunity for maintaining their divine inspiration and for confronting Luther and Calvin and their comrades, who openly denied that the Divine breath was in them (and at the present day they use every effort to oppose the idea), the Church gave her judgment against these same men; and resting upon a continuous and constant tradition, she declared in a public and general decree the authority of the Deutero-Canonical Scriptures (*Deuterarum Scripturarum*), and that their authors wrote by the inspiration of the Holy Spirit."

The Vatican Council, 1870, recognised no distinction between Proto-Canonical and Deutero-Canonical writings, and merely re-affirmed the Tridentine decree and the authority of the Vulgate: "And these Books of the Old and New Testament are to be received as sacred and canonical, in their integrity, with all their parts as they are enumerated in the decree of the said Council, and are contained in the ancient Latin edition of the Vulgate" (cap. ii.).

Kaalen (*Eineleitung in d. heil. Schrift*. 1884) explains the "Deutero-Canonical" to be the Books which belonged to a different Canon from the Jewish, the contents of the Jewish being only called "Proto-Canonical" from a misunderstanding (p. 21). "The Church therefore has only expressed the invariable tradition when in her official utterances she makes no difference between Deutero-Canonical and Proto-Canonical Books, and in her teaching upon the Canon expressly reckons the former in the number of the inspired writings" (p. 24).

The Eastern Church.—In the Eastern Church the question of the O. T. Canon and the true position of the apocryphal books was revived in the 17th century. At first, under the influence probably of persons favourable to the Reformation movement of Western Europe, it was declared that the apocryphal books, though not rejected from use, were not to be accounted canonical. Thus Metrophanes Critopulus: "But the remaining books, which some desire to include in Holy Scripture, as the Book of Tobit, of Judith, the Wisdom of Solomon, the Wisdom of Jesus the son of Siri, Baruch, and the Books of the Maccabees, we do not indeed consider to be rejected, but as canonical the Church of Christ never received them (*ἀποβλητοὺς μὲν οὐκ ἡγουμένα . . . ὡς κανονικάς δὲ . . . οὐδέποτε*)

ἀπεδέξατο ἡ τοῦ Χριστοῦ ἐκκλησία). Cyril Lucar, Patriarch successively of Alexandria and Constantinople, published his "Orientalium Professio" (in Latin in 1629, in Greek in 1633), which illustrates the well-known sympathy of the writer with the Western Reformers. Of the apocryphal books he says: "But the writings which we call 'apocryphal' have not the ratification from the all-holy Spirit in the manner of the genuinely and indubitably Canonical Books." This "Profession," however, was too Reforming in tone. It was opposed by Synods at Constantinople (1638) and at Jaffa (1642); and was reversed by the Council at Jerusalem (1672) held under the presidency of Dosithheus. Dosithheus' own Confession went to the opposite extreme. It was directed against the Reformers; it adopted the teaching of the Tridentine decree, and declared the apocryphal Books to be canonical. In answer to question iii., "Which Books do you call by the name of Holy Scripture?" Dosithheus' Confession begins, "Following the rule of the Catholic Church, we call by the name of Holy Scripture all those writings which Cyril (Lucar) borrowing from the Council of Laodicea enumerates, and in addition to them the books which he in stupidity and ignorance, or even in intentional malice, designated 'apocryphal'; to wit, the Wisdom of Solomon, Judith, Tobit, the Story of the Dragon, the Story of Susanna, the Maccabees, and the Wisdom of Sirach. For we judge these to be genuine parts of Scripture along with the other genuine Books of Scripture. . . . But if they do not all of them seem to be universally reckoned (among the Books of Scripture), they are, however, none the less reckoned and classed with the whole body of Scripture by Synods and many theologians, and they the most ancient and approved theologians of the Catholic Church; all of which Books we ourselves judge to be Canonical, and we confess them to be the Holy Scripture." Dosithheus' appeal to "Synods" and "the most ancient and approved divines" was indefinite enough. But so great was his influence that his "Confession" was regarded as authoritative in the Greek Church until the beginning of the present century. Philaret's Longer Catechism of the Orthodox Catholic Eastern Church, published at Moscow, 1839, is reputed the chief standard of doctrine in the Russian Church, and represents by the two following questions and answers a complete change of opinion from the Confession of Dosithheus: Q. "Why is there no notice taken in this enumeration (i.e. by Cyril and Athanasius) of the (22) Books of the O. T., of the Book of the Wisdom of the Son of Sirach, and of certain others?"—Ans. "Because they do not exist in the Hebrew." Q. "How are we to regard these last-named Books?"—Ans. "Athanasius the Great says that they have been appointed of the Fathers to be read by proselytes, who are preparing for admission into the Church" (i.e. 2 Macc. xii. 43, in support of prayers for the dead), although quotations from the Fathers are comparatively numerous. From the Catechism of Philaret it would appear that the Greek Church regards the Apocrypha in the same light as does the English Church. It excludes the Apocrypha from the Canon on the ground that it formed no part of the Hebrew Canon, and appeals in support of this view to the

authority of Athanasius, in the same way as the English Church makes her appeal to the authority of Jerome.

The Bible of the Greek Church of Russia (St. Petersburg, 1876) contains, besides the Books of the Hebrew Canon, the Prayer of Manasses at the close of 2 Chronicles, the LXX. 1 Esdras at the close of Nehemiah, followed by Tobit and Judith; after Canticles, the Books of Wisdom and Ecclesiasticus; after Lamentations, the Epistle of Jeremy and Baruch; after Malachi, three Books of the Maccabees and 4 Esdras.

The Old Catholic Union at Bonn in 1874 showed the degree of agreement existing at the present time between Old Catholics, Greeks, and Anglo-Catholics upon the subject of the Apocrypha. The first of the fourteen Theses agreed upon at the Conference contains the following statement:—"We agree that the apocryphal or Deutero-Canonical books of the Old Testament are not of the same canonicity as the Books contained in the Hebrew Canon."

The preceding sketch of the history of the apocryphal books, in their relation to the O. T. Canon, reveals the unsatisfactory character of the patristic and mediæval testimony. In their references to apocryphal books, the Fathers and mediæval divines make use of important words (e.g. "Scripture," "Canon") in a vague, loose, and often inconsistent manner. They had little appreciation of the issue, and made no attempt at careful definition. They had no principles of historical criticism to guide them. No amount of inferiority in style or subject-matter could, from their point of view, outweigh ecclesiastical usage and precedent. Criticism was powerless when the allegorical system of interpretation could exalt the Additions to Daniel to an equal degree of spiritual significance with the Psalter or the Pentateuch. The minds of all were prejudiced by the universal use of the LXX. and Vulgate Versions or by a belief in the fiction of Aristæus. Even the few who, like Melito, Origen, and Jerome, followed the Hebrew Canon and originated the tradition in its favour, were in no sense of the word Hebrew scholars; they derived their information at second hand. They imagined that the appeal to the Hebrew Canon closed the door to further investigation. In reality it was but pushed a step farther back.

The vital question remained to be asked, whether the Christian Church received the Old Testament Scriptures (1) on the ground of their definite citation by our Lord and His Apostles, or (2) on the ground of their recognition by the Fathers of the early Church, or (3) on the ground that the Hebrew Scriptures were accepted *à bloc* by the Christian Church because they were the recognised Canon of the Jewish Church?

According to (1), the books of the Hagiographa not quoted in the N. T. would have less claim to canonical recognition than the other Books of the O. T.; their place would belong more strictly to the collection of deutero-canonical Books. According to (2), the books of the Apocrypha cited by the Fathers of the first three centuries (especially Wisd., Eccclus., Bar., 1 Macc.) would have a stronger claim to canonical recognition than many of the books of the Hagiographa.

Again, according to (1), a smaller O. T. would be selected from the Hebrew Canon. According to (2), the Hebrew Canon would be amplified by books whose position in the O. T., justified by no authority but Alexandrian usage, would be derived from the quite inadequate cause of temporary popularity among the members of a local Christian community.

According to (3) alone are we enabled to take a consistent position with regard to both the O. T. and the Apocrypha. The Hebrew Canon is the *authoritative* Scripture of the Judaism which prepared the way for the New Covenant, the record of the continuous Revelation made through the chosen people, the Canon of the Jewish Church acknowledged by our Lord and His Apostles. The apocryphal books illustrate, they do not add to its message. They testify to the close of the Old and to the need of the New Dispensation.

In the present day, the relation of the Apocrypha to the O. T. Canon is popularly judged, not by appeal to authority but by the character of the writings themselves. It is the same standard as was used by the Jews of old. The Jewish legend, that the tongue of prophecy was dumb after the days of Malachi, and that thenceforward Divine Revelation was no longer vouchsafed to the people of Israel (cf. 1 Macc. iv. 46; ix. 27; xiv. 41), poetically represents the result of comparison between the Books of the Hebrew Canon and the books of the Apocrypha. Nor could stronger confirmation be required for the Hebrew Canon, for the Athanasian view in the Eastern Church, for the Hieronymian view in the Western Church, for the decision of the Reformed Churches, than is afforded by an investigation of the books themselves, of their character and style, and of their place in the literature of the Jewish nation. "They prove by contrast that the Books of the Hebrew Canon, as a whole, are generically distinct from the ordinary religious literature of the Jews, and establish more clearly than anything the absolute originality of the Gospel." (Westcott, *Bible in the Church*, p. 291.)

III. *Classification and Description of the apocryphal books.*—The books of the Apocrypha have been preserved to us mainly on account of their incorporation with the Septuagint Version, as together making up the Greek Old Testament. Their history is for the most part buried in obscurity. With one exception (Ecclesiasticus) the names of the writers are unknown. The contents of the books and the style of the writing afford generally the only clue to the determination of their date, of their country, and of the circumstances under which they were composed. It is however clear, both from this internal evidence and from the quotations made from them in Jewish and early Christian literature, that they belong, roughly speaking, to the interval of three hundred and fifty years between 200 B.C. and 150 A.D. It is customary to describe the literary activity of the Jews, of which these apocryphal writings are the chief surviving specimens, as partly Palestinian, but mainly Egyptian, in character. In both types the influence of Greek life and thought makes itself very distinctly felt, though most prominently in the Egyptian. The Palestinian books reflect the Jewish reverence for the past and the

revived hope of national independence. In the Egyptian books, the desire to assimilate Mosaism with Greek Philosophy appears side by side with the assertion of Jewish Monotheism.

So vague and indefinite, however, is our information, so much room is left for speculation and conjecture, that no classification of the books according to date or place of composition can be safely relied upon. A chronological classification is unsatisfactory, since accurate data are forthcoming only in the case of Ecclesiasticus; and, if we may approximately determine the age of 1 Maccabees, Wisdom, and 2 Esdras, we are wholly dependent upon conjecture in the case of the other books. A geographical classification is hardly less unsatisfactory. The Babylonian origin of Baruch and the Persian origin of Tobit have at different times been maintained, but on insufficient grounds; and, although in some cases the Palestinian origin of a book (e.g. 1 Maccabees), and in others the Egyptian (e.g. of Wisdom), is indisputable, it frequently seems impossible to distinguish under what local or national influences other writings were composed, e.g. Additions to Daniel and Esther, Baruch (pt. ii.), 2 Esdras. (For the place and date of their composition, see the Articles upon the separate Books.)

The subject-matter of the books furnishes, on the whole, the most convenient means of classifying the Apocrypha. The only objection that can be raised against this method has arisen from the uncertainty which has been felt as to the true character of certain books, e.g. Judith, Tobit, and Susanna. At the present day, however, their unhistorical character is generally recognised by scholars. It is only in the quarter where their inspiration and canonicity are maintained, that the attempt is also made to insist upon their literal veracity (see the position of the Roman Church moderately and ably represented in Kaulen's *Einkleitung*). According to the classification by subject-matter, the books may be divided into, (a) historical, (b) prophetic, (c) didactic writings.

(a) The *historical* books comprise: (1) the genuine history of 1 Maccabees; (2) the semi-legendary history of 2 Maccabees, 1 Esdras, and the Additions to Esther; (3) the fabulous narratives contained in the Additions to Daniel and 3 Maccabees.

(b) Under the head of *prophetic* books may be classed the writings which seek to reproduce varieties of ancient Israelite literature: i.e. (1) prophetic, the Book of Baruch (parts i. and ii.), the Epistle of Jeremy; (2) poetical, the Prayer of Manasses, the Song of the Three Children, and the 151st Psalm; (3) Apocalyptic, 2 Esdras.

(c) The *didactic* books fall into two minor groups, of which one consists of the strictly sapiential or gnomic books, Ecclesiasticus, Wisdom, and 4 Maccabees; the other of the two didactic romances, Judith and Tobit.

According to this classification, it will be seen that the First Book of Maccabees alone supplies us with exceptionally trustworthy information. It is singularly free from attempts to exaggerate facts or to obtrude the marvellous. The partisanship of the author for the Asmonean house

is undisguised (e.g. v. 62; x. 17, 20; xi. 30, 47; xii.; xiv. 16-20; xv. 15-24). This will account for exaggerations in the number of the slain in certain passages; and very possibly we must attribute either to this cause or to the licence permitted by custom to ancient historians, the so-called treaties with Rome (ch. viii.) and with Sparta (ch. xii.), and such letters as those of kings Alexander and Demetrius (ch. x.), Arins (ch. xii.), and Antiochus (ch. xv.). But the fabrication of some of these documents may reasonably be supposed to rest upon a substratum of fact. And the same may be said of the suspicious account of Antiochus Epiphanes' repentance recorded in ch. vi. In the main, however, facts and dates are found to be corroborated by other testimony; and Josephus, who knows no other source of information for this period, appears to have been fully justified in the confidence which he reposed in the Book. Its excellence in chronology deserves particular mention. Its constant reference of facts to a particular foreign era (the Seleucid, i.e. 312 B.C.) adds greatly to the historical importance of the record, and marks a distinct advance upon the custom of earlier Jewish writers (e.g. i. 10, 54; ii. 70; iv. 52; vi. 16, 20; vii. 1; ix. 3; x. 1; xi. 19; xiii. 42; xiv. 1, 27; xv. 10; xvi. 14). It is clear from xiii. 42, that in the Maccabean era the nation was still accustomed to reckon chronology by the high-priesthood; while xiv. 27 indicates how the new secular era was beginning to emerge.

The Second Book of Maccabees is quite independent of the First Book, and is much inferior to it in historical merit. It is most improbable that the two letters prefixed to the Book (i.-ii. 18) are genuine. The rest of the work professes to be an epitome of five books written by one Jason of Cyrene, which sketches the chief events in Jewish history between 175 B.C. and 161 B.C. It is a valuable contribution to the history of this short period; but its credibility is marred by a large infusion of the legendary element (iii. 2; x. 29, 30; xi. 6, 8; xiv. 45, 46; xv. 11-16); by the wildest exaggerations of numbers (v. 14; viii. 24, 30; x. 17, 20, 31; xi. 4; xiii. 23, 26, 28; xv. 27). The historical character of the work is further compromised by such rhetorical passages as the description of the martyrdoms in ch. vi., vii., the death and repentance of Antiochus Epiphanes in ch. ix., and the suicide of Razis in ch. xiv., partly too by the ferocity of the language directed against the foes of the Jews (cp. iv. 19; v. 8, 9; viii. 34, 36; ix. 8, 15; xiii. 8). Nevertheless, the Second Book of Maccabees, though inferior to the First Book, is of a stamp considerably superior to the other so-called historical books of the Apocrypha.

The First Book of Esdras is merely a loose revision of the canonical Book of Ezra, to which has been prefixed the legend of the Three Pages. The legend implies the influence of the sapiential literature of the period, and illustrates the tendency of Jewish writers to invest the events of their national history with a glamour of imaginary magnificence.

The Additions to Esther represent a revision of the canonical work, with numerous amplifications.

The Third Book of Maccabees represents pto-

torially the temper and feelings of the Alexandrian Jews at some unknown crisis; but otherwise it has little claim to be regarded as a work of history. The description of the persecution and the deliverance of the Jews in the days of Ptolemy IV. Philopator may possibly have been based upon events in the early imperial age, of which no other tradition has been preserved.

The Additions to the Book of Daniel are devoid of any historical value. Bel and the Dragon represents a class of Jewish fable, probably written with the intention of making idolatry ridiculous. The Story of Susanna was a favourite national legend, perhaps originally composed with no higher purpose than to illustrate the meaning of the name Daniel, by an event in the early life of the national hero. (On the theory of its being an "Anti-Sadducean *Tendenz-Schrift*," see *Speaker's Comm.*, Apocrypha, ii. 325-330.)

In the *prophetical* section of the classification given above, the Baruch literature, i.e. Parts 1 and 2 of Baruch and "The Epistle of Jeremy" (= Baruch vi.), is composed in imitation of the writings of Jeremiah and Daniel. The Book of Baruch itself is a vigorous reproduction of the thought, and frequently also of the phraseology, of the canonical Scriptures. The Epistle of Jeremiah is a monotonous rhetorical declamation against idolatry.

Of the poetical writings, the Prayer of Azarias and the Song of the Three Children are found among the Additions to Daniel, but they clearly have no connexion with either Bel and the Dragon, or the Story of Susanna. They are both lacking in originality, and are only a cento of scriptural phrases. The Song itself however (the "Benedicite"), by its recognition of the divine mission of the forces of nature, embodies an idea worthy of the highest flights of Hebrew poetry.

The Prayer of Manasses is a powerful psalm of repentance, which tradition has connected with the account given of Manasses the king in 2 Ch. xxxiii. 11-13, 18, 19. There is nothing in the Prayer to countenance the tradition of its origin beyond its penitential character and the allusion in ver. 10 to "the iron chain," while other expressions occur (e.g. ver. 8) which render such antiquity an impossibility. It was composed upon the model of the Penitential Psalms; but whether it originally belonged to some legendary history of Manasses' repentance, is a question which we have no means of deciding.

Psalm cli., preserved in the LXX. Version of the Psalms, purports to be David's song of triumph after his victory over Goliath. It does not exist in the Hebrew, and was composed in imitation of the canonical Psalms. Its preservation is due, not to any intrinsic merit, but to the popularity of the event which it celebrates.

The *apocalyptic* writings, which play so important a part in Jewish literature during the century succeeding the destruction of Jerusalem by the Romans, are represented in the Apocrypha by the so-called Second Book of Esdras. In this book, as in the lately discovered Apocalypse of Baruch, the more recent disasters of the nation are referred to under the image of the former overthrow by the Chaldeans. By a series of seven visions, which recall the visions of Daniel and the Apocalypse of St. John, the mysteries

of the last days are revealed to Ezra. It is acknowledged that the children of Israel have justly been punished for their sins. But a day of retribution is at hand. The coming and the reign of the Messiah upon earth is shortly to take place. The foes of Israel are to be consumed in terrible punishment. But the Twelve Tribes are to be restored to their country, and "the daughter of Sion" is to be reinstated in Jerusalem. The close similarity of the Book to the Apocalypse of Baruch deserves remark; it would seem not unlikely that the last-named work was known to the writer of the Second Book of Esdras.

It should be observed that the two introductory and the two concluding chapters in the Latin Version do not strictly belong to the Apocalypse of Esdras. Fritzsche places them together as the Fifth Book of Esdras. They represent a late accretion. The date of these interpolations cannot be earlier than the 3rd century A.D.

In the *didactic* group stand the two Books of Ecclesiastians and Wisdom, which are, with the possible exception of 1 Maccabees, the most important works of the whole apocryphal collection. They mark the process of transition from the sapiential thought (the "Chokhmah" of the Jews) of Proverbs, Job, and Ecclesiastes, to the Graeco-Jewish philosophy of Philo. Ecclesiasticus represents purely Palestinian thought; Wisdom is almost as distinctly Alexandrian. In the latter, we find the strong influence of Greek philosophy beginning to make itself felt. Both books are rich in gnomic sayings of worldly prudence, based upon the Mosaic law. Both have many passages which are of great poetical beauty (e.g. Eccles. xxiv. xliii. l.; Wisd. v. vii. ix.). Their impersonation of Divine Wisdom, as will be noticed below, almost anticipates in language, though not in thought, the Christian treatment of the Logos.

The so-called Fourth Book of Maccabees must be classed with the didactic books. It is of the nature of an oration in support of the "thesis" that "the religious faculty" (*δ εὐσεβὴς λογισμὸς*) is completely master of the passions. This is accordingly made the subject of a moral discourse in the earlier portion of the Book (i.-iii. 18), and is illustrated throughout the remaining portion by protracted descriptions of the martyrdoms of the Jews. The Book was for a long time believed to have been written by Josephus, but this theory has been proved to be quite baseless.

The Books Tobit and Judith it is best to place in a separate group representing romance written with a didactic purpose. Their historical accuracy (that of Judith more especially) has often been defended, but it is impossible to find either dates or facts which will correspond with either of the two narratives. It is of course possible, though not probable, that a nucleus of fact underlies each story. But the literary treatment belongs to the region of romance. Their power and interest lie in the vivid and natural description of the scenes; their value in their teaching. The Book of Tobit was, we may imagine, partly written for the sake of inculcating the duties of prayer and almsgiving. The Book of Judith, of which the story is morally indefensible, incites to a higher

standard of patriotism based on a simple trust in the power of Jehovah.

The Apocrypha may also be conjecturally divided into Jewish and Graeco-Jewish writings. The distribution may roughly be made as follows. Of the *historical* books, the First Book of Maccabees and the First Book of Esdras are Jewish in origin, the Second and Third Books of Maccabees are Graeco-Jewish. Of the *prophetic* books, Part 1 of Baruch and 2 Esdras are almost certainly Jewish in origin; Part 2 of Baruch, the Epistle of Jeremy, the Additions to Daniel and Esther, the Song of the Three Children, the Prayer of Manasses, and the 151st Psalm are probably Graeco-Jewish. Of the *didactic* books, Ecclesiasticus, Judith, and probably Tobit, are Jewish; Wisdom and the Fourth Book of Maccabees are Graeco-Jewish.

In hazarding this general distinction between the books we are partly guided by their character and subject-matter, but chiefly by the indications given of the language in which they were originally written. Thus, although, with the exception of the Second Book of Esdras, the Apocrypha was preserved to the Church in the Greek language, in numerous instances it can be shown that the Greek Version is merely a translation from a Hebrew or Aramaic original. The prologue to the Book of Ecclesiasticus expressly asserts, what is patent in other ways, that it is a translation from the Hebrew. The First Book of Maccabees, according to the probable testimony of Origen (*ap. Euseb. H. E. vi. 25*) and the direct statement of Jerome (*Prolog. Gal. ad Lib. Reg.*), was extant in their day in Hebrew; and though it is possible, as some have asserted, that Origen and Jerome were acquainted with Chaldee Versions only, the theory of a Hebrew original is the most natural explanation of the style, both in its simplicity and in its difficulties. The Book of Judith was extant in Chaldee in Jerome's days; and, although there is no sufficient ground for supposing that the Chaldee Version, with which he was acquainted, was anything but a mere translation, the Hebraisms and manifest errors in rendering, apparent in the Greek, make its Hebrew origin almost incontestable. The Book of Tobit, likewise, was extant in Chaldee in Jerome's days. The undoubtedly Hebraistic character of the Greek makes it clear that we have in it only a translation. The Chaldee text which has recently been edited by Neubauer, is claimed by some to be the original. At any rate, the existence of a rival text in Chaldee by the side of a Hebrew text will go far to account for the great variations of reading in both Greek and Latin Versions.

The First Book of Esdras and the earlier portion of Baruch are also, in all probability, translations from the Hebrew.

On the other hand, 2, 3, 4 Maccabees, Wisdom, the Additions to Daniel and Esther, and the latter portion of Baruch, were all probably composed in Greek.

The translation of the Pentateuch into Greek supplied the Jews of Alexandria with the strongest, if not with the first, stimulus to turn the universal language to the advantage of their own religion.

The characteristic features of the LXX. Version left deep their impress upon all subsequent Graeco-Jewish literature. It was followed by a copious stream of Jewish writings, in which history and romance, polemics and apologetics, religion, morals, and philosophy, were severally represented, and often fantastically blended. Specimens of this phase of literature are preserved to us by several of the apocryphal Books, and by such varied writings as the so-called Epistle of Aristaeus, the verses ascribed to Phocylides, the fragments of Aristobulus, no less than by the works of Philo and Josephus.

Whatever be the distinctive character of a Graeco-Jewish writing, its essentially Jewish form is never obscured by the Greek colouring. Sometimes it asserts itself in intellectual sympathy with Greek philosophy (*e.g.* with Plato in the Book of Wisdom, with the Stoics in the Fourth Book of the Maccabees); sometimes in religious polemic it champions the national Monotheism against pagan idolatry (*e.g.* in the latter portion of the Book of Wisdom, in the Epistle of Jeremy, and in the Additions to Daniel); sometimes in the form of an appeal to the sufferings and persecutions which the people had undergone in past times, the endeavour is made to keep alive the ardour of patriotism and to quicken the trust in Jehovah (*e.g.* in the Book of Baruch, the Second and Third Books of Maccabees).

IV. (1) *The Apocrypha in relation to Jewish Literature.*—The books of the Apocrypha help to depict for us the fusion of Jewish and Greek thought. They help to unfold the process of preparation, by which Graeco-Jewish thought and language grew to be the chief instrument, in the writings of the Apostles and in the preaching of the early Christians, for the spread and development of a new and a universal religion. They illustrate the condition of the Jewish people, their habits of thought, their literary taste and skill, their mental training, their historical judgment at or about the Christian era. Herein consists the real value of the Apocrypha. The intrinsic merits of the books bear no proportion to their value as a literary record of their time. The most cursory comparison with the writings of either the Old or the New Testament is sufficient to impress the reader with a sense of the feebleness which characterizes the greater part of the apocryphal collection.

The Apocrypha belongs to that class of Jewish literature which the Jewish teachers called Haggada in distinction from that which they called Halacha. While both terms express a position relative to the Canonical Scriptures, Haggada stands opposed to Halacha as "comment" to "definition," and as "illustration" to "formal rule." Under Haggadic literature are to be included writings so varied as comment, dogma, ethics, history, mysticism, allegory. The books of the Apocrypha present us with at least three prominent types of Haggada,—the historical, the ethical, and the allegorical,—all of which were employed to illustrate the text of Scripture and the multiple expansion of the law embodied in the Halacha. But the defects of the Haggadic literature are only too conspicuous in the apocryphal writings. They are lacking in spontaneity, simplicity, and moral earnestness.

Compared with the writings of the O. T. or the N. T., their style is for the most part artificial. When they reproduce the language or thought of the older Books, they rarely reproduce their spirit. The writers seem to be conscious of their own weakness, and acknowledge it (cp. 1 Macc. iv. 46, ix. 27, xiv. 41; Ecclus. xxxvi. 15). The want of creative power is indicated by imitations of the ancient literature, and by a rhetorical tone very different from the simplicity and robustness of the canonical Scriptures.

A serious moral blot, characteristic, however, of the writing of the age, is the apparent manufacture of false letters and false documents (e.g. the letters and treaties in 1 Esdras and (?) 1 Maccabees), and the embellishment of history by incidents, &c., calculated to magnify the importance of the nation and its rulers (e.g. 1 Esdras and 2 and 3 Maccabees). Under this head must be classed such distortions of fact and exaggerated descriptions as those connected with the Plagues of Egypt and the Wonders in the Desert, contained in the Book of Wisdom; and the details of the Additions to the Books of Esther and Daniel.

Another point which will strike the reader of the Apocrypha is the inferiority of the imaginative writings. The shallowness and moral feebleness of the fables preserved in Bel and the Dragon, and of the legend of Susanna, place them in the lowest level of literature. The absence of all higher moral feeling in the Book of Judith, and the admixture of the magical element in the Book of Tobit, detract from the merits attaching to the one as a vivid tale of patriotism, and to the other as a touching and in places humorous story of domestic life. In legend and in romance, we may possibly distinguish a reaction from the literature of mere legalism. Exaggeration and invention formed by contrast the natural extreme to the pedantic literalism of the Scribes.

No unprejudiced reader would attempt to maintain the moral or intellectual equality of the Apocrypha with the Canonical writings. The Canonical Books of the O. T. and N. T. spring from periods of creative power and life. The apocryphal books belong to the artificial and imitative period which intervenes. But while it is not hard to lay a finger upon defects in the apocryphal works, it is matter for congratulation that they have preserved to us Jewish historical records so valuable as those contained in the two Books of the Maccabees, Jewish poetry so noble and sentiments so lofty as are contained in the Books of Wisdom and Ecclesiasticus, Jewish imaginative writing so natural and vivid as is found in the Books of Tobit and Judith.

There remain to be noticed very briefly three points of interest: (a) the influence of the Apocrypha upon the writings of the New Testament; (b) traces of its position in Jewish literature; (c) special instances of its estimation in Christian literature.

(a). Cp. *Speaker's Comm.* i. pp. xl.-xlii. It is a remarkable fact that the writers of the Greek Testament, although they constantly make citations from the LXX., never directly quote from any of the apocryphal books. The instances which have been adduced to prove the contrary

(e.g. Luke xi. 49 with Wisdom ii. 12-20; Matt. xiii. 42-50 with Judith xvi. 17; Jas. i. 19 with Ecclus. v. 11), are very far from being convincing. They are chiefly resemblances in thought and expression, some of which might be due to a training in the same O. T. Scriptures and in the same schools of thought, others which might be paralleled in non-Jewish writings. Numerous expressions, especially in the Books of Ecclesiasticus, Wisdom, and Judith, will call to mind passages from the New Testament, and illustrate their meaning (e.g. Ecclus. vii. 14 with Matt. vi. 7; vii. 34 with Rom. xii. 15; xiv. 1 with Jas. iii. 2; Jud. ix. 12 with Acts iv. 24; Wisdom vi. 18 with John xv. 21-24; Tobit iv. 15 with Luke vi. 31). This is only what we should expect from nearly contemporary writings of the same nation. On the other hand, it is certainly true, that (1) the writer of the Epistle to the Hebrews (Heb. xi. 35) might with as much probability have derived his facts from 2 Macc. vi. and vii. as from other narratives or traditions, and have also perhaps been acquainted with the Book of Wisdom (vii. 26, cf. Heb. i. 3); (2) the Epistle of St. James contains coincidences of language with Ecclesiasticus, as also possibly with Wisdom; (3) the Epistles of St. Paul contain language so similar to that which is found in the Book of Wisdom, that it is not unnatural to suppose his familiarity with its contents (e.g. Wisd. v. 17, 18, cp. Eph. vi. 13; Wisd. ix. 15, cp. 2 Cor. v. 1-4; Wisd. xiii. 1, cp. Rom. i. 19, 20; Wisd. xv. 7, cp. Rom. ix. 21). The quotations in the so-called 5 Esdras (= 2 Esd. i., ii., xv., xvi.) are due to the late and Christian origin of the interpolated passages (e.g. 2 Esd. i. 30, cp. Matt. xxiii. 37; 2 Esd. xvi. 18, cp. Matt. xxiv. 8; 2 Esd. xvi. 44, cp. 1 Cor. vii. 29).

(b). Some doubt exists whether the apocryphal books were reckoned by the Jews among the "S'pharim g'auzim, libri absconditi" (ספריים ג'אוזים, libri absconditi), books withdrawn from public reading, or among the "S'pharim chitzonim, libri externi" (ספריים חיצוניים, libri externi), "extraneous or foreign books," sometimes entitled "Siphre Mian, libri hareticorum" (ספרי מניין, libri hareticorum), "books of the heretics," composed by Greeks, Jewish Christians, or Gnostic heretics.

In the former class seem to have been placed, at different times, the Song of Songs, Esther and Ecclesiastes, and such other books as from time to time gave rise to doubts among the Rabbinic doctors, on the ground that they contradicted the Law of Moses; they were then either temporarily (as in the case of Canonical Books above mentioned) or permanently withdrawn from public use. In the latter class seem to have been placed the poems of Homer, the books of certain Greek writers, of the Sadducees and of the Christians. On the one hand, on account of the similarity of the name, it would be natural to range the Apocrypha among the "g'nuzim" of which some were finally recognised as Canonical. On the other hand, it may be shown that the writings of the Son of Sirach (בן סירא) were classed among the "external books," and that to this group belong also other late Jewish writings, such as the "Megillath Taanith" or "Book of Fasting," the Sadducee "Megillath Asmon," &c. See Fürst's *Der Kanon d. A. T.*

During the first two centuries of the Christian era, many of the apocryphal books seem to have been known and read by the Jews. Thus, Josephus makes use of 1 Maccabees, 1 Esdras, and the Additions to Esther. The Book of Ecclesiasticus, or, at any rate, a different recension of the Hebrew original, was frequently quoted by the early Rabbins. The stories of Judith, Tobit, and the Additions to Daniel were accepted by Jewish writers; Judith and Tobit were known in Hebrew and Aramaic Versions; Hebrew MSS. preserve portions of the Additions to Esther, e.g. the Prayer of Mordecai, the Prayer of Esther, the Dream of Mordecai; the Song of the Three Children was received into the Jewish Liturgy. Not until the 2nd century A.D. were prohibitions uttered by the Palestinian Rabbis against the reading of the Apocrypha. Such sentences as "He who readeth a verse that is not of the twenty-four Books of Holy Scripture, his sin is as if he had read in the extraneous or foreign writings," and "He that bringeth into his house more than the twenty-four Books of the Bible, bringeth confusion into his house," testify to the determination of the Rabbis to exclude from use whatever literature was foreign in character to the strangely exaggerated Mosaicism which they tried to guard in purity. In Babylon, where Judaism was stronger, there was not the same need for such stringent regulations; and in the 4th century, we hear of the words of the Son of Sirach being read, e.g. "The good doctrines in the Book of Sirach we may moreover employ in our addresses" (*Sanh.* 100).

(c). In the Christian Church, the Apocrypha was generally received along with the other Books of the LXX. Version as equally inspired of God. The position of the Apocrypha in relation to the Canon of Scripture has been already discussed.

Special reverence was paid to the Books of Ecclesiasticus and Wisdom, not only on account of their intrinsic interest and importance, but also on account of the Solomonic authorship traditionally ascribed to them, and on account of their treatment of the subject of Divine wisdom, in which the Fathers discerned a Messianic reference (see below). Certain passages in the Book of Baruch (iii. 36, 37; v. 1-3) and 1 Esdras (iv. 36) are constantly referred to for the same reason. The Second Book of Maccabees acquired a specially high repute in the 4th century, when the subject of honours paid to martyrdom began to attract attention. In later times prayers for the dead were defended by an appeal to 2 Macc. xii. 44, 45. The prominence given to the subject of almsgiving and fasting in the Books of Ecclesiasticus and Tobit caused particular passages to be frequently quoted by Christian writers. The 151st Psalm and the Song of the Three Children were included in the Appendix to the Ancient Latin Psalter. The 151st Psalm, the Prayer of Manasses, the Prayer of Azarias, and the Song of the Three Children appear in the Appendix to the Ancient Greek Psalter (see Churton, *Uncanonical and Apocryphal Scriptures*, pp. 364, 365).

Criticism upon the style and language of the apocryphal writings belongs more properly to a survey of the whole LXX. Version, or to a

detailed examination of the separate Books. We will content ourselves therefore at this point with brief general observations.

1. *As to Style.*—The Books of the Apocrypha, as preserved to us, are, with the exception of 2 Esdras, written in the current popular form of Greek, representing generally the intermediate stage of dialect between the LXX. Version of the O. T. and the writings of the New Testament. The books that have been translated from the Hebrew are naturally more Hebraic in colouring than the writings of the N. T.; on the other hand, the purely Alexandrian books are written in a style of Greek less Hebraic, more free, and often more debased, than those of the N. T.

The books translated from the Hebrew (e.g. 1 Macc., Eccus., Judith) are as a rule characterized by a greater simplicity in vocabulary and idiom than the books originally composed in Greek, such as Wisdom and 2 Maccabees. This simplicity of style is well illustrated by the Book of Judith, in which the absence of the ordinary particles and the connexion of sentences by the copula *καί* are particularly noticeable. In a less marked degree it may be observed in the Book of Tobit. In both Books the language is admirably adapted to the purposes of popular narrative. The Book of Ecclesiasticus adheres to the parallelism of the Hebrew gnomic writing, and as a rule sacrifices smoothness to faithfulness in translation. The First Book of Maccabees presents a most favourable specimen of rendering from the Hebrew; it combines purity of diction with vigour and ease of expression. The Hebraic colouring is unmistakable; but the style, always temperate and well-restrained, is rarely bald or clumsy: in some passages it becomes almost poetical (iii. 3-9; vii. 38, 39).

Errors of translation may be detected in the translated books. Well-attested instances are to be found in Bar. i. 10; Judith i. 8, iii. 9; Eccus. xxiv. 27, xxv. 15, xlv. 18, xlvii. 17; 1 Macc. ii. 8, iii. 3, iv. 19, 24.

The Graeco-Jewish books are smoother and more ornate in style than the books of Palestinian origin, but, in common with much of the Alexandrine writing of the age, lose in force by the tendency to be florid and rhetorical. This defect appears to an exaggerated degree in the bombastic royal rescripts of the Additions to Esther (e.g. ii. 1-7; vi. 2, &c.), and is conspicuous in the inflated writing of the Third Book of the Maccabees. Better Greek is found in the Books of Wisdom, 2 and 4 Maccabees. But even in the Book of Wisdom, which as a rule excels in poetical feeling and elegance of language, the style is frequently marred by far-fetched and fanciful expressions (especially from ch. xi. to end). The Second Book of Maccabees is sometimes disfigured (e.g. xiii. 9-26, xiv. 25) by condensed and confused writing, which is due probably to carelessness on the part of the epitomizer of Jason's five volumes. The philosophical style which prevails in the earlier part of the Fourth Book of Maccabees lapses into "fine writing" in the description of the martyrdoms, of which a striking example is to be found in ch. vii. 1-5.

2. *As to Language.*—The Hebrew and Alexandrine elements in the Hellenistic dialect are conspicuous for peculiarities, the one in idiom, the other in vocabulary.

Under the class of Hebraic idiom are to be classed such expressions as *ἐν χειρὶ, διὰ χειρός*, *ἐκ τοῦ προσώπου, ἐπὶ πρόσωπον, ἐν στόματι βοφάλας*, *ἀπὸ μικροῦ ἕως μεγάλου, ἐκ τούτων καὶ ἐκ τούτων*; idiomatic expressions such as *εἶναι* or *γίγνεσθαι* *eis*, *ἀρκεῖν* *ἐνώπιον*, *λαμβάνειν* *πρόσθεν*, *δίδουαι* *eis* *διέλεον*, *ὡς ἡ ἡμέρα αὕτη*; the otiose demonstrative following the relative (e.g. *Ecclus. xiv 2*; *Judith v. 19, vii. 10*; *Bar. ii. 13, 17*; *1 Ed. iii. 5, 9*); the participle or cognate substantive added to the finite verb for emphasis, representing the Hebrew Infinit. Absol. (e.g. *Judith ii. 13, vi. 4*; *Ecclus. v 3*; *1 Macc. ii. 67, 68, 70, iii. 13, v 40*); the common use of *τοῦ* with the infin.; the *ἡ* following the positive as the sign of the comparative (e.g. *Tob. iii. 6*; *iii. 8*); the infinitive of the main verb following the finite tense of the verb defining or limiting the action, e.g. with *προστίθισθαι* (*1 Macc. iii. 15, ix. 1*; *Tob. xiv. 2*), *συντελεῖν* (*1 Ed. i. 53*); *ἀναμμεῖν* (*1 Ed. viii. 86*), *δομεῖν* (*1 Ed. ii. 18*); the genitive of quality in the place of adjective, e.g. *ἀνὴρ βουλῆς* (*1 Macc. ii. 65*), *ὄνομα ἀγαμέμνους* (*Ecclus. xvii. 8*); the negative before *πᾶς* (e.g. *1 Ed. iii. 19*).

The vocabulary of the apocryphal Books, and particularly that of 2, 3, 4 Maccabees, Wisdom, and Ecclesiasticus, abounds in strange compounds, many of them more suited for poetry than prose. The following are characteristic instances:—*ἀδρανής* (*Wisd.*), *αἰμβόρος* (*4 Macc.*), *ἀερώεις* (*2 Macc.*), *ἀκηλίδωτος* (*Wisd.*), *ἀκροτηρῶς* (*2 Macc.*), *ἀκύναντος* (*Add. Esth.*), *ἀλδωρ* (*2 Macc.*, *4 Macc.*), *ἀλλοφυλισμός* (*2 Macc.*), *ἀμβρόσιος* (*Wisd.*), *ἀμυώδης* (*Ecclus.*), *ἀμφιλόης* (*Wisd.*), *ἀναβρόζω* (*Wisd.*), *ἐκβρόζω*, *συνβρόζω* (*2 Macc.*), *ἀναμοχλεύς* (*4 Macc.*), *ἀνομήρις* (*Ecclus.*), *ἀντοφθαλμῶς* (*Ecclus.*), *ἐντροπής* (*2 Macc.*), *ἐπλετος* (*3 Macc.*), *ἀποκοσμή* (*2 Macc.*), *ἀποσυνθί* (*4 Macc.*), *ἀποτραπίζουαι* (*Tob.*), *ἀρδαλῶς* (*Ecclus.*), *ἀρθρέμβοις* (*4 Macc.*), *ἀσυνής* (*3 Macc.*), *ἀσυνής* (*4 Macc.*), *ἐχωνής* (*Ecclus.*), *βαρβαρόν* (*2 Macc.*), *βαρνηχίς* (*3 Macc.*), *βυθοτρεφής* (*3 Macc.*), *γαλακτοτόν* (*4 Macc.*), *γενεσιόαρχης*, *-ουργός* (*Wisd.*), *γηγετής* (*Tob.*), *γλωσσώδης* (*Ecclus.*), *δοφλῆς* (*Wisd.*, *1 Macc.*), *δελανθρῶς* (*2 Macc.*), *δεκαπλασιῶς* (*Bar.*), *δευτερολογῶς* (*2 Macc.*), *δημιελέης* (*3 Macc.*), *διαμασόμεαι* (*Ecclus.*), *δικαιοκρίτης* (*2 Macc.*), *δορυδάτωτος* (*2 Macc.*, *3 Macc.*), *δυσάκωτος* (*3 Macc.*), *δυροκοπέης* (*Ecclus.*, *3 Macc.*), *ἐθαλοκοφῶς* (*Ecclus.*), *ἐθνόπληκτος* (*4 Macc.*), *εἰδωλόθυτος* (*4 Macc.*), *ἐλιερίης* (*Wisd.*), *ἐκβολῶς* (*Judith*), *ἐκδειματόν* (*Ecclus.*), *ἐκμυσῆς* (*Wisd.*), *ἐκτόπις* (*2 Macc.*), *ἐνέμετος* (*4 Macc.*), *ἐντροχῆς* (*Ecclus.*), *ἐνωτί* (*Ecclus.*, *Ecclus.*), *ἐξαλλος* (*Wisd.*, *3 Macc.*), *ἐχάτης* (*1 Macc.*), *ἐρχατόγυρος* (*Ecclus.*), *ἐπιδάτειν* (*Judith*), *ἡβολογῶς* (*4 Macc.*), *θανατηφόρος* (*4 Macc.*), *θεομαχῶς* (*2 Macc.*), *ἱεροπρεπής* (*4 Macc.*), *ιοβόλος* (*Wisd.*), *ισοπλάς* (*4 Macc.*), *ιπνέτης* (*3 Macc.*), *καταβάσιος* (*Wisd.*), *κατανοή* (*Judith*), *κρυσταλλοειδής* (*Wisd.*), *λαυμαγία* (*4 Macc.*), *λαογραφία* (*3 Macc.*), *μακροβύσις* (*Bar.*), *μακρομμενῶν*, *-σις* (*Ecclus.*), *μεγαλοφθονῶς* (*Judith*), *μεσοπορεύς* (*Ecclus.*), *μεταγενέστερος* (*1 Ed.*), *μετακρινῶς* (*Wisd.*), *μεταλλῶς* (*Wisd.*), *μυροφαγία* (*3 Macc.*), *μικρολόγος* (*Ecclus.*), *μίσυβρις* (*3 Macc.*), *νηπίδκτονος* (*Wisd.*), *ἱστολογῶς* (*1 Macc.*), *ξενοτροφῶς* (*2 Macc.*), *ὠπτηλάσις* (*4 Macc.*), *οἰονόβρωτος* (*2 Macc.*), *3 Macc.*, *ὄλοσφύρητος* (*Ecclus.*), *ὄλοσχερῶς*

(*1 Ed.*), *ὁμοιοπαθῆς* (*Wisd.*), *ὀπλοδοτέω* (*1 Macc.*), *ὀπλολογῶς* (*2 Macc.*), *οὐραγῶς* (*Ecclus.*), *οφίδηκτος* (*Wisd.*), *παντελίσκοπος* (*Wisd.*), *πηδαιουχῶς* (*4 Macc.*), *προεμτροφῶς* (*2 Macc.*), *πολυπραγμανῶς* (*2 Macc.*), *προαλής* (*Ecclus.*), *πυριφλεγής* (*4 Macc.*), *πύρπυρος* (*4 Macc.*), *προκατασκιρῶν* (*4 Macc.*), *προτῆλαστος* (*Wisd.*), *ροδοφόρος* (*3 Macc.*), *σαββατί* (*1 Ed.*, *2 Macc.*), *σαρκοφαγία* (*4 Macc.*), *σευρηνῶς* (*4 Macc.*), *σιδηρῶδεις* (*3 Macc.*), *σπλαγχνοφάγος* (*Wisd.*), *συγκιρανῶν* (*Wisd.*), *συμβολοκοτέω* (*Ecclus.*), *συμμοσπονηρῶς* (*2 Macc.*), *σχεδιά* (*Bar.*), *τερατένομαι* (*2 Macc.*), *τετράστιχος* (*Wisd.*), *τρίαλῆστιος* (*2 Macc.*, *Add. Esth.*), *ὀακίνθινος* (*Ecclus.*), *φωτασιοσκοπέω* (*Ecclus.*), *χαμαιπετής* (*1 Ed.*), *ψηφολογῶς* (*Tob.*), *ψυχολυκῶς* (*3 Macc.*).

To this list we subjoin another, consisting of unusual substantives, which will help to illustrate the language of the apocryphal Books:—*ἄβρα* (*Judith*, *Add. Esth.*), *ἀκηδία* (*Bar.*, *Ecclus.*), *ἀκινάκης* (*Judith*), *ἀλογιστία* (*Judith*, *2 Macc.*, *3 Macc.*), *ἀμξία* (*2 Macc.*), *ἀναβίσιος* (*2 Macc.*), *ἀνδότεμα* (*Judith*), *ἀντίπωμα* (*Ecclus.*), *ἀπαύγασμα* (*Ecclus.*), *αἰθινία* (*3 Macc.*), *ἀφαίρεμα* (*1 Macc.*), *ἄφημα* (*1 Macc.*), *ἀφύσιος* (*Prol. Ecclus.*), *ἀχῆ* (*Ecclus.*), *ἄωρια* (*1 Ed.*), *βελόστασις* (*1 Macc.*), *βιβλιοθήκη* (*2 Macc.*), *βόμβησις* (*Bar.*), *βρόμος* (*Wisd.*), *βῶλος* (*Ecclus.*), *γαυρία* (*Judith*, *Wisd.*, *Ecclus.*), *διάγνωσις* (*Wisd.*), *δοκιμασία* (*Ecclus.*), *ἐγκαινισμός* (*1 Macc.*, *2 Macc.*), *εἰδῆχθια* (*Wisd.*), *εἰδῆσις* (*Ecclus.*), *εἰρώνεια* (*2 Macc.*), *ἐμβίσιος* (*Ecclus.*, *3 Macc.*), *ἐνδελειχισμός* (*Ecclus.*), *ἐξέρεσις* (*Bar.*), *ἐπαγωγῆ* (*Ecclus.*), *ἐργολάβεια* (*Ecclus.*), *ἐτοιμασία* (*Wisd.*), *ζβύνη* (*Judith*), *ζωγρίας* (*2 Macc.*), *θειότης* (*Wisd.*), *θελητής* (*1 Macc.*), *θεσις* (*Wisd.*, *3 Macc.*), *θημωρία* (*Ecclus.*, *1 Macc.*), *θιότης* (*Wisd.*, *3 Macc.*), *Ἰνδαλμα* (*Wisd.*), *Ἰη* (*2 Macc.*), *ἰουδαϊσμός* (*2 Macc.*), *καθαριότης* (*Ecclus.*), *καμφάκης* (*Judith*), *κανθός* (*Tob.*), *κατόστασις* (*Ecclus.*), *κυνόβαλον* (*Wisd.*), *κωνοπίον* (*Judith*), *λιτανεία* (*2 Macc.*, *3 Macc.*), *μαρσῦπειον* (*Ecclus.*), *νομός* (*1 Macc.*, *3 Macc.*), *ὀμαλισμός* (*Bar.*), *παράστασις* (*Ecclus.*), *περισπασμός* (*2 Macc.*), *περίψημα* (*Tob.*), *πέτασος* (*2 Macc.*), *προμαχῶν* (*Tob.*), *ρεμβασιμός* (*Wisd.*), *σανίδωμα* (*3 Macc.*), *σέβασμα* (*Wisd.*), *σπλαγχνισμός* (*2 Macc.*), *ὑπερασπισμός* (*Ecclus.*), *ὑπόστασις* (*Ecclus.*), *φρικασμός* (*3 Macc.*), *ψυχαγωγία* (*2 Macc.*).

It may be interesting to illustrate by a few selected references the use, in the apocryphal Books, of some of the chief words which acquired a new significance in Christian writings:—

ἀποκάλυψις (*Ecclus. xi. 25*; *xxii. 20*; *xii. 23*).
ἀποστολή (*1 Ed. ix. 54*; *Bar. ii. 25*; *1 Macc. ii. 18*, *2 Macc. iii. 2*).
ἄφεςις (*1 Ed. iv. 62*; *Judith xi. 14*; *1 Macc. x. 34*, *xiii. 34*).
βαπτίζω (*Ecclus. xxxiv. 25*; *Judith xii. 7*).
βασίλεια τοῦ θεοῦ (*Wisd. x. 10*; *Song of the Three Holy Children, v. 31*).
δαμονίων (*Bar. iv. 7, 35*; *Tob. iii. 8, 17*; *vi. 7, 14, 16*; *viii. 3*).
διακονία (*1 Macc. xi. 58*).
δικαίως (*Tob. xii. 4*; *Ecclus. i. 19*, *xviii. 2, 21*).
δοίκτης (*Tob. i. 21*).
ἐκκλησία (*Judith vi. 16*; *1 Macc. ii. 55*; *Ecclus. xxiv. 2*, *xxvi. 5*, *i. 13*).
ἐκλεκτοί (*Ecclus. xlix. 6*; *Wisd. iii. 9*).
εἰσκόπος (*1 Macc. i. 51*).
ἐπιφάνεια (*2 Macc. ii. 21*, *iii. 24*, *v. 4*, *xii. 22*; *3 Macc. ii. 9*; *Add. Esth. v. 6*).

εὐχαριστία (2 Macc. ii. 27).
 ἱλασμός (2 Macc. iii. 33).
 ἱλαστήριον (4 Macc. xvii. 22).
 κανών (Judith xlii. 6; 4 Macc. vii. 21).
 κλήρος (Add. Esth. vii. 7, 8; Wisd. ii. 9; Ecclus. xiv. 16).
 λειτουργία (Wisd. xlviii. 21; Ecclus. i. 19; 2 Macc. iii. 3, iv. 14).
 παρουσία (Judith x. 18; 2 Macc. viii. 12, xv. 21).
 πίστις (Ecclus. xv. 15; xlii. 21; Wisd. iii. 14; 4 Macc. xv. 21).
 σωτήρ (Wisd. xvi. 17; Ecclus. ii. 1; 1 Macc. iv. 30; 3 Macc. vii. 16). σωτηρία (Wisd. xvi. 6; 2 Macc. iii. 29, 32; vii. 25).
 χάρις (Ecclus. iii. 18, 29. xx. 12, xxi. 15, xxx. 6; Wisd. viii. 21; 4 Macc. xi. 12).
 χριστός (2 Macc. i. 10).

(2.) *The Apocrypha in relation to Jewish Theology.*—In the light which they throw upon Jewish theology, the apocryphal books contain information of peculiar interest. We take in order the subjects of (i.) the Deity, (ii.) the doctrine of Angels, (iii.) the Messianic idea, (iv.) the Creation and the origin of evil, (v.) personal and national religion, (vi.) eschatology, as illustrated in the books of the Apocrypha.

(The limits of space compel us to employ the utmost condensation in the treatment of a most extensive subject.)

(i.) The teaching of the Apocrypha upon the subject of the Deity. The unity of God is often and very distinctly affirmed (e.g. Ecclus. xxiii. 5=xxxvi. 5, A. V.^m; Bar. iii. 35; Pr. Azar. v. 22; 2 Macc. vii. 37; 3 Macc. ii. 2). From the idea of unity is derived that of perfect all-sufficiency (e.g. 2 Macc. xiv. 35; 3 Macc. ii. 9). The attributes of majesty and power are alluded to with special distinctness, in contrast to the weak and depressed condition of the Jewish people. The God of the nation was the all-powerful God of the world; "the Lord of all" (*ὁ πάντων δεσπότης*, Ecclus. xxiii. 1=xxxv. 1, A. V.); "the Creator" (Judith ix. 12; Ecclus. xxiv. 8; 2 Macc. i. 24, vii. 23; cp. 1 Esd. vi. 13); "Highest" or "the Highest" (*ὑψιστος* or *ὁ ὑψιστος*, especially in Ecclus. some forty times; 2 Esd., "altissimus" some sixty-six times); "Almighty" (*παντοκράτωρ*, esp. in 2 Macc.; *θεὸς σαβαὶθ παντοκράτωρ*, 1 Esd. ix. 46); "Supreme" (*μεγαλοκράτωρ*, 3 Macc. vi. 2); "King of kings" (2 Macc. xiii. 4); "Lord of all might" (*πάσης ἐξουσίας δυνάστης*, 2 Macc. iii. 24); "the Great Sovereign of the world" (*ὁ μέγας τοῦ κόσμου δυνάστης*, 2 Macc. xii. 15).

Great stress is laid upon the attributes of *omnipresence* and *omniscience*. The former is expressed in the remarkable words of Wisdom xii. 1 (*τὸ γὰρ ἀβαρτὸν σου πνεῦμα ἐστὶν ἐν πᾶσι*; cp. i. 7), and may be illustrated by a magnificent passage in Ecclesiasticus (xlii. 15—xliii. 33). The expressions made use of in these two Books sometimes border on pantheism (though Ecclus. xliii. 27 be excluded), and were destined to be still further developed in that direction by later Alexandrine Judaism (see Philo, *de Confus. Linguar.* i. 325). The more general statements of omnipresence (Ecclus. xvii. 13, 15 = 15, 19, A. V.; xxiii. 19) belong equally to the attribute of *omniscience*. That God both

sees and knows all is a favourite thought (cp. Bar. iii. 32; Susann. v. 42; 2 Macc. ix. 5, xii. 22, xv. 2; Judith ix. 5, 6; Ecclus. xlii. 18—21; Add. Esth. v. 2).

Another attribute of the Deity is expressed by the title which describes the *eternal* existence, "the Eternal" (*ὁ αἰώνιος*). This title appears with special frequency in the Book of Baruch (iv. 8, 10, 14, 20, 22, 24, 35; v. 2), but occurs also repeatedly elsewhere (e.g. Hist. of Sus. v. 42; Wisd. xvii. 2; 2 Macc. i. 25; 3 Macc. vi. 12, vii. 16; Ecclus. xviii. 1, xxxvi. 22 = 17 A. V.). The essential Being of the Deity is spoken of as *ὁ ὢν* in Wisd. xiii. 1.

The title of "the Holy One" occurs frequently (e.g. Baruch iv. 22, 37, v. 5; Ecclus. iv. 14, xliii. 10, xlvii. 8, xlviii. 20; Tobit xii. 12, 15; 2 Macc. xiv. 36; 3 Macc. ii. 2, v. 1). But the attribute of holiness is not asserted so prominently as that of power, although it is everywhere presupposed. In His relation to mankind, the Deity receives the attribute of *Fatherhood*, as the Author of all being and the God of the chosen race of Israel (e.g. Wisd. xiv. 3; Ecclus. xxiii. 1, 4, li. 10; Tob. xiii. 4; 3 Macc. vi. 3, 8). But in Wisd. ii. 16, where He is spoken of as the Father of the just, there is a hint of that wider conception which the New Covenant revealed.

The title of *Saviour* (*σωτήρ*) is frequently used of God, generally carrying with it the idea of a material and strictly national deliverance (e.g. Baruch iv. 22; Jud. ix. 11; Additions to Esth. v. 2; 1 Macc. iv. 30; 3 Macc. vii. 16). In one passage (Ecclus. li. 1) God is addressed under this title as a personal Saviour; in another passage (Wisd. xvi. 7) as "the universal Saviour," *ὁ πάντων σωτήρ* (cp. 1 Tim. iv. 10); but in both instances the epithet seems to imply the preservation of life and health rather than spiritual deliverance.

The *goodness*, *mercy*, and *compassion* of God are constantly spoken of, perhaps most frequently in the Book of Ecclesiasticus (cp. ii. 18, v. 6, xvi. 12, xviii. 13, xxxi.=xxxiv. A. V. 16, xxxix. 22, xlvii. 22, xlviii. 20; cp. also Tob. vi. 17, vii. 12; 2 Macc. xi. 9; Wisd. xv. 1). There is, however, no advance here upon the language of the O. T. Scriptures; and although the Divine mercy is compared in Ecclus. xxxii.=xxxv. A. V. 20 to "clouds of rain in a season of drought" (*ὡς νεφέλαι δετοῦ ἐν καιρῷ ἀβροχίας*), reminding us of our Lord's words in Matt. v. 45, the stress of the metaphor is laid upon the reinvigorating, not upon the impartial, character of the gift. In another place, Ecclus. xviii. 1—7, where the mercy of God is made dependent upon the merciful spirit of man, the forgiveness of heaven upon the forgiveness of earth, there is a resemblance to our Lord's words in Matt. vi. 14, 15, xviii. 35, but the context shows that the resemblance is in the letter and not in the spirit of the passage. In contrast to the mercy and compassion (*ἔλεος*) of God stands, as in the Old and New Testaments, the *wrath* (*ὁ ὀργή*) of God. By this phrase is expressed most frequently the strictly national view of God's attitude towards the foes of Israel, at other times the wider conception of His attitude towards sin generally, whether in the nation or in the individual. "The wrath" implied on the one hand the punishment of the heathen (cp.

= Ecclus. xviii. 2, xxiv. 24, are later insertions.

Eclus. xxix. 23; Judith ix. 9; Wisd. v. 20); on the other hand, the punishment of sin and impurity (cp. Wisd. xviii. 23, 25; Eclus. v. 6, 7, vii. 16, xlv. 17; Pray. Manas. rr. 5, 10, 13). The disasters of Israel were regarded as God's just punishment for national sin (cp. 1 Ead. viii. 86; Tob. iii. 3, 6, xiii. 5; Judith xi. 10; 2 Macc. vi. 12, vii. 18, 32, x. 4) and the expression of the Divine retribution (1 Macc. i. 64; 2 Macc. viii. 5; Bar. i. 13, ii. 13). The perfect justice in the dispensation of reward and punishment, the equipoise of Almighty love and power, is expressed by the quality of equity or forbearance, *ἐμελέκεια* (cp. Wisd. xii. 18; 2 Macc. ii. 22, x. 4; Bar. ii. 27; Song of the Three Children, v. 18). Divine justice is a frequent subject of thankful praise (cp. Eclus. xxiii. = xxiv. A. V. 12-20, xxiv. 15=xxiii. A. V. 16; Wisd. v. 18, xii. 21, 22; Tob. iii. 2; 2 Macc. vii. 36, xii. 6; 2 Ead. vii. 19), by comparison with the failure of earthly justice and the oppression of the innocent by the powerful and wealthy (e.g. Wisd. vi. 4, 5; Eclus. viii. 14, xi. 9, xx. 3=4 A. V.; 1 Macc. ii. 29-38; 2 Macc. iv. 47; Sus. v. 53).

The anthropomorphic expressions of the Canonical writings which describe the being and operation of the Almighty, were necessarily reproduced in the books of the Apocrypha. "The hand of God" describes the power of His operation (e.g. Eclus. ii. 18, x. 4, xxiii. = xxvi. A. V. 6, xxvii.=xxiii. A. V. 13, xliii. 12; Wisd. iii. 1, v. 16, vii. 16, x. 20, xiv. 6, xix. 8; Bar. ii. 11; 3 Macc. ii. 8): "the eye of God," His Almighty providence and wisdom (Eclus. xi. 12, xv. 19, xvii. 15, xliii. 19, xxi. =xxiv. A. V. 16; Bar. ii. 17; 2 Macc. iii. 39): "the voice or word of God," the declaration of His will (Eclus. xliii. 26, xlv. 17; Bar. i. 18, ii. 22, iii. 4). The use of "the word or 'Logos' (*λόγος*) of God" as the instrument of the Divine command (cp. Wisd. ix. 1, xii. 9; Eclus. xxix. 17, xlii. 15, xliii. 5, 10, 26; cf. xlviii. 3, 5) deserves especial notice, inasmuch as its more natural signification of the uttered Word gradually lost favour, and in later times, as the writings of Philo testify, became blended with that of the abstract personification of Divine Reason (see Wisd. xvi. 12, xviii. 15).

The tendency to avoid anthropomorphisms, to keep the Creator and the created more distinctly asunder, belongs to the whole period during which the books of the Apocrypha were written, and we can trace its influence (a) sometimes in the avoidance of the Sacred Name, (b) sometimes in the substitution of an abstract expression denoting quality, principle or force, (c) sometimes in the personification of a Divine attribute.

(a) The Divine Name nowhere, according to the best text, occurs in the First Book of Maccabees. In ch. iii. 18 the Name of God is omitted in three of the best MSS., and the following verse, where "heaven" and not "God" is the source of strength, makes the correctness of the omission highly probable. In xvi. 3 the rendering of the A. V., "by God's mercy," has introduced the Divine Name, which does not appear in the original (*ἐν τῷ ἐλέει*). The Name of "Lord," which is read by A. V. in vii. 37 and 41, is also omitted by four or five of the best MSS., and is in all probability due to the interpolation

of a scribe. With these possible exceptions the First Book of Maccabees, like the canonical Book of Esther, has presumably, in a spirit of reverence, abstained from all use of the sacred Name. The Name of "God," which appears in the English Version of 1 Macc. ii. 21, iii. 53, 60, iv. 55, ix. 10, has no place in the original.

(b) In the place of the Sacred Name some indefinite expression was often introduced. Thus, in 1 Macc. iii. 19 the omission is supplied by "heaven" (*οὐρανός*) or "the heaven" (*ὁ οὐρανός*), as the personified recipient of prayer (cp. 1 Macc. iii. 50; iv. 10, 55; xii. 15. Cp. Landan, *Synonyma für Gott*, p. 14). Sometimes Justice (*ἡ δική*) seems to be so used (Wisd. i. 8; 2 Macc. viii. 13; and esp. 4 Macc. iv. 13, 21; viii. 13, 20; ix. 9, 15; xi. 3; xii. 12; xviii. 22). More frequently repetition of the Sacred Name is avoided by the usage of epithets: the most familiar are "the Most High" (esp. Eclus. forty-three times; and 2 Ead. sixty-six times); "the Almighty" (*ὁ παντακράτωρ*), "the Master" (*ὁ δεσπότης*, esp. 2 Macc.), "the Eternal" (*ὁ αἰώνιος*, esp. Baruch), "the Holy One," "the Creator" (*ὁ ἄγιος*, Tob. xii. 12, 15; Eclus. iv. 14, xliii. 10, xlvii. 8, xlviii. 20; Bar. iv. 22, 37, v. 5). In later times the expression "the Name" (*ὄνομα*) became with the Jews a common synonym for the sacred title of "Jehovah," which they shrank from uttering; and the frequent use of *τὸ ὄνομα* as the sum total of the Divine attributes, familiar to us in the N. T., foreshadowed the later usage. Indications of this may frequently be noticed in the O. T., and there are many examples of its occurrence in the apocryphal books: e.g. Wisd. x. 20; 3 Macc. ii. 9; Tob. xi. 14; Bar. ii. 11, iii. 5 (cp. Pr. Azar. v. 29; Pray. Manas. v. 3; Judith ix. 8, xvi. 2; 2 Macc. viii. 15; Eclus. xvii. 8 = 10 A. V., xxix. 35, xlvii. 10, 18, li. 1). "The Name" (*τὸ ὄνομα*) was employed to convey the idea of Divine Majesty, and to obviate the necessity of using either the title of God or the repeated personal pronoun, e.g. 1 Macc. iv. 33.

(c) Anthropomorphism was also avoided by the personification of the Divine attributes. The prominence given to abstract agencies, coupled with the philosophical depreciation of matter, doubtless prepared the way for later Alexandrine theosophies, for Gnostic theories of aeons and emanations. In the apocryphal books this tendency, the germs of which may first be noticed in the language of Proverbs and Job, has just begun to emerge more distinctly. We may detect it in the references to "the Spirit of God," "the truth," "Wisdom," and "the Word." Thus "the Spirit of God," without attributes of personality, is, in its usage familiar to us from the canonical O. T. Scriptures, mentioned frequently in the Apocrypha (cp. Wisd. i. 7; Eclus. xlviii. 12 (?); Judith, xvi. 14). But here it begins to receive a new character; "the spirit of holiness" is a principle or power distinct, yet emanating, from and sent forth by the Almighty (see Wisd. i. 5, vii. 22, ix. 17). Yet more striking is the identification of the attribute or quality of "Wisdom" with the operation of the Divine Will. Thus "Wisdom" is the first of creatures (Eclus. i. 4, 7); she is a loving spirit (Wisd. i. 6); she came forth from the mouth of the Almighty (Eclus. xxiv. 3); she is the instrument of

creation (Eccles. xiv.). She dwells with Israel, she is identified with the Spirit of the Law (Bar. iii. 36, 37), she is the effulgence of Divine glory (Wisd. vii.-viii. 3). To be allied unto her is immortality (Wisd. viii. 17). In other passages she appears as "the truth" (1 Esd. iv. 33-40; cp. Eccles. iv. 25, xxvii. 9); and again, in another remarkable passage, the same Divine agency of might and glory is described as "the all-supreme word" (*παντοδύναμος λόγος*, Wisd. xviii. 15), where we may see an anticipation of Philo's use of *λόγος προφορικὸς* (*de Vita Mos.* iii. 672).

The personification of Divine attributes stands in close relation to the two points which come next under discussion, having been on the one hand somewhat rashly identified by Christian writers with the doctrine of the Messiah, with which it possesses remarkable though delusive points of resemblance; on the other hand, being a subject immediately allied to that of intermediate beings and the doctrine of Angels.

(ii.) Allusions to the *Messianic idea* in the Apocrypha are so few and meagre, that some have even denied their existence at all. But it will be seen that these allusions do exist; and that to a certain degree the very scantiness of reference to the doctrine is in accordance with the true position of the Apocrypha in the history of Jewish Theology.

In the Book of Eccles. (c. 180 B.C.; *al.* 235) we find allusions to the promise made unto Abraham, xlv. 21 ("therefore He assured him by an oath that nations should be blessed in his seed"); to the Lord's covenant with David, xlvii. 11 ("He gave him [David] a covenant of kings and a throne of glory in Israel"); to the future coming of Elias, xlviii. 10, who was written of in reproofs for specified times, to pacify wrath before its outbreak, "to turn the heart of the father to the son, and to restore the tribes of Jacob" (cp. Mal. iv. 5, 6). We have in these passages reference to the Messianic economy generally; but not to the belief in a personal Messiah. It is also worthy of remark that in the commemorative list of famous men (xlv.-l.) there is no allusion made to One who might be looked for as the future Leader and Saviour of the nation. One passage (li. 10), "I called upon the Lord, the Father of my Lord"—the original text of which, as recovered from the Syriac (see *Speaker's Comm.* in loco), signified "I called unto the Lord, my father, O Lord"—is to be noted as a striking exception to the absence of personal allusion. The phrase is so exceptional in pre-Christian literature, that many have supposed it a mistranslation of the original, or a textual error; but it is best explained as a reminiscence of the language occurring in the Messianic Psalm cx. 1.

The Book of Wisdom presents no trace of any expectation of a personal Messiah. The expressions in ch. iii. and v. respecting the judgment are too vague in character to support such a view; and the most definite of the passages which have been adduced for the purpose (iii. 8), "And their Lord shall reign for ever," cannot, with any regard for the context, be connected with the Messiah of Jewish prophecy. The Christian Fathers delighted to regard the description (Wisd. ii. 12-21) of the sufferings of

"the just man" (*ὁ δίκαιος*) at the hands of the wicked as an inspired prediction of the Saviour's Passion. The words "he calleth himself a child of the Lord" (c. 13) were seized on as a forecast of the Gospel narrative. For this view there is no warrant, except so far as the whole passage may be an imitation of the liii. chapter of Isaiah; or is to be considered as a sketch of an ideal Just One. In the latter case it may well be paralleled with Plato's immortal picture of the Just Man in the Republic, which was most probably well known to the author of Wisdom, although it may not necessarily have influenced his treatment of the passage in question. Again, Christian theologians have seen a personal Messianic reference in the noble personifications of "Wisdom" (e.g. Wisd. vii. 7-11; Eccles. i. 1-9, 14-20, vii. 18-31, xiv. 20-xv. 8, xxiv. 1-34; 1 Esd. iv. 34-41; Bar. iii. 37, iv. 1) and in the mention of "the Logos" (Wisd. xviii. 15, *ὁ παντοδύναμος σου λόγος ἐκ οὐρανῶν ἐκ θρόνων βασιλείων*). But the zeal of apologetics appears to have led them astray. Nowhere in these passages is the conception of a personal revelation hinted at. The importance of these and similar passages to the understanding of the Messianic doctrine does not consist in prognostication, but in the development of thought, which, having shaped the religion and enriched the speculation of Philo, became a life-giving message in the historical testimony of St. John's Gospel (*ὁ λόγος σὰρξ ἐγένετο*). The "Wisdom" and "Logos" of the Apocrypha are not prediction. They mark a climax in the preparation of thought and phrase for the description of the final Revelation in the Incarnate Word.

The First Book of Maccabees, pervaded though it is by the spirit of patriotism, contains no direct allusion to the Messianic hope. The passages iv. 46, "until there should come a prophet to give answer concerning them" (*μέχρι τοῦ παραγενέσθαι προφήτην τοῦ ἀποκριθῆναι περὶ αὐτῶν*), and xiv. 41, "until there arise a trustworthy prophet" (*ὥς τοῦ ἀναστῆναι προφήτην πιστόν*), have at different times received a directly Messianic interpretation; and this reference to the "prophet" has been compared with the expectation of the coming of "the prophet" (*ὁ προφήτης*) in John i. 21 and vi. 14, who was looked for as the forerunner of the Messiah. But this view is most certainly incorrect. Even if it were not out of harmony with the whole spirit and character of the Book, the Greek in the above passages cannot admit of such an interpretation. In both cases the word "prophet" is used indefinitely (*προφήτης*—not *ὁ προφήτης*, as in the quotation from St. John's Gospel), and the most natural explanation is the most probable, according to which the cessation of the gift of prophecy is (cp. also ix. 27) alone remarked upon, and the yearning of the nation expressed for a new revelation. Any Messianic reference, therefore, is only obtainable indirectly, by implication (cf. also 1 Esd. v. 40; Pray. of Azarias, c. 14). One passage (ii. 57), "David through his mercy possessed the throne of an everlasting kingdom" (*Δαυὶδ ἐν τῷ ἐλέει αὐτοῦ ἐκληρονόμησε θρόνον βασιλείας εἰς αἰῶνα αἰῶνος*), may fairly be regarded as a half-unconscious echo of the general belief that the Messiah should be a king of David's seed, but the

vagueness of the words implies how little practical significance they were intended to convey. Otherwise, no other passage, not even the dying speech of Mattathias (ii. 49-69) nor the patriotic utterances of his sons (e.g. iii. 18-22; iv. 30-33; vii. 41, 42)—where, if anywhere, some Messianic allusion would be looked for—contains any reference to the doctrine. Strange as this appears at first sight, it admits of a natural explanation. The Messianic hope was bound up with the thought of deliverance from tyranny and oppression, with the idea of a material and national salvation. It was in the times of almost political annihilation, in the days of their most deep despair, that the Jewish prophets had foretold most clearly the coming of the Deliverer. Again, it was afterwards in the days of Herodian and Roman oppression that the apocalyptic literature of the nation pointed most clearly to the advent of a Messiah. But in the days of the Maccabean struggle for independence, the hopes of the people were personified in her living heroes. The doctrine of deliverance was being practically realized on the narrow platform of the combat with the powers of Syria. To the Maccabean chronicler the idea of national salvation was being fulfilled before his eyes by the successes of the Asmonean house both in diplomacy and in war. The Messianic hope of the Palestinian Jews was throughout this period centred in the efforts of living champions; their range of view was limited to the brief struggle, which typified the eternal truth.

In the Book of Baruch iv. 21, &c., there is a description of the people of Israel restored to their country and of the city of Sion rebuilt and beautified; in Tobit xiii. 8-18, xiv. 5, 7; Eccles. xxxiii. 1-11 and xxxvi. 18-22 = xxxvi. 1-17, a picture of the conversion of the heathen. But none of these passages present us with any expectation of a personal Messiah; they reproduce in general terms the utterances of the old Prophets concerning the final glories of the chosen race; and if they can be said to refer to a Messianic future, it is only by an indefinite and indirect allusion.

With the exception of the Second Book of Esdras, no other Book of the Apocrypha throws light upon the teaching of a personal Messiah. The subject-matter and character of the Books in a large measure account for the omission. If in the writings of Palestinian origin the subject was overshadowed by the predominant hope of a political deliverance, in the writings of Græco-Judaic origin the infusion of Hellenic philosophy tended to merge the Messianic idea in abstract speculation, recognising it, if at all, only in the attributes of self-manifestation inherent in the Divinity.

In the apocalyptic writings, the literature of the saddest century in the Jewish annals, it is quite otherwise. The coming of a personal Messiah to reinstate Israel and take vengeance on her foes is the one prevailing idea which runs through the Second Book of Esdras, and forms a prominent feature in the Books of Enoch, of Jubilees, the Apocalypse of Baruch, and the Sibylline Oracles. The Second Book of Esdras is the one most pervaded by a spirit of gloom and bitterness. The coming of the Messiah is to be preceded by untold misery, calamity

and crime—the woes of the Messiah. In the third vision the reign of the Messiah is described as lasting for 400 years, at the end of which period the Messiah himself should die (vii. 28, 29). In the fifth vision the Messiah, the Anointed, is depicted as the lion (xi. 37) with a man's voice, who should rebuke unrighteousness and restore his people (vv. 31-34). In the sixth vision he is described as a man arising out of the sea and flying with the clouds of heaven, who hewed for himself a mountain (i.e. Sion) and overthrew the multitudes that came against him, and defended his people that remained (cf. ch. xiii.). The statement that the Messiah should die "along with all the men that have breath" (vii. 29) is most startling, and more especially surprising in a Jewish writing. It is perhaps best explained as a crowning expression of the despair which characterizes this Apocalypse.

Except in certain well-recognised passages of 2 Esdras, the Apocrypha has no trace of Christian interpolation in support of the Messianic character of Jesus. The passage in Wisdom xiv. 7, "For blessed is the wood whereby cometh righteousness" (εὐλόγηται γὰρ ξύλον δι' οὗ γίνεται δικαιοσύνη), has indeed been claimed on the one side as predictive of the Cross of Christ, and has been in consequence assailed on the other side as a Christian gloss. We may, however (cp. *Speaker's Comm.* i. c.), as seems more natural, see in "the wood" an allusion to "the ark," and in "righteousness" a reference to Noah, who is elsewhere described (Wisd. x. 4; Eccles. xlv. 17) as the "righteous," and in Heb. xi. 7 as "becoming the heir of the righteousness that is by faith" (τῇ κατὰ πίστιν δικαιοσύνῃ ἐγένετο κληρονόμος). The words of Baruch iii. 37, "Afterwards did it show itself upon the earth and held converse with men" (μετὰ τοῦτο ἐπὶ τῆς γῆς ὤφθη καὶ ἐν τοῖς ἀνθρώποις συναεστράφη), have a striking resemblance to Christian teaching, and many scholars have suspected it of being a Judæo-Christian interpolation. The verse does not refer to "the Messiah," but to "Wisdom," who, after being given by God to Israel, became thenceforward manifested among men in the chosen race (see *Speaker's Comm.* in loco).

(iii.) The Jewish doctrine of Angels, which in later times was destined to take so prominent a part in Rabbinic teaching, received a powerful impulse at the period of the Captivity. This may be recognised in the writings of Ezekiel, the post-exilic Zechariah, and in the Book of Daniel. The Apocrypha, although two Palestinian books (1 Maccabees and Judith) show no trace of it, presents us with a more fully-developed stage of this belief than any which may be found in the canonical writings. To a certain degree the angelology of the Apocrypha is due to the tendency which has already been noticed; the ministration of angelic beings formed a useful safeguard against anthropomorphism. Thus the Angel of the Lord is frequently mentioned (as in the O. T.) as the instrument of Divine justice or the agent of Divine protection (cp. Eccles. xlviii. 21; Song of the Three Children, v. 26; Susan, v. 55, 59; Bel, vv. 34, 36, 39; Bar. vi. 7; 1 Esd. i. 48; Additions to Esth. v. 12; Pray. of Azar. vv. 25, 35). The Second Book of Maccabees refers to angelic

manifestations as "the manifest signs that came down from heaven unto those that made it their pride to deal manfully for Judaism" (ii. 21); and the history of this Book is plentifully embellished with legendary deliverances effected by angelic interposition (cf. iii. 1; v. 2; x. 29, 30; xi. 6, 8; xiv. 15; xv. 11-16). An exaggerated instance of this use of angelology is to be found in 4 Macc. iv. 10, where the sudden apparition of the forces of heaven, mounted and clad in glittering armour, seems to be a materialistic reminiscence of the passage in 2 K. vi. 17. The title which is given to the Almighty in 2 Macc. iii. 24, by some MSS., "the Lord of Spirits," is probably another illustration of the prevalent belief (cp. Heb. xii. 9). The word *πνεύματα* in Ecclus. xxxix. 28 is by some translated, "There are winds which have been created for vengeance," &c., rather than as the A. V. "There be spirits," &c. (cp. Pray. of Azar. cv. 42, 63); but the A. V. rendering is supported by the list of such spirits in cv. 29, 30. Certain natural phenomena and the like are personified (cp. *Speaker's Comm.* in loco).

The Jewish belief of the post-Captivity period that each nation had its guardian Angel, which finds so distinct expression in the Book of Daniel, ch. x., and forms the point of the remarkable reading of the LXX. Version in Deut. xxxii. 8, 9, is perhaps alluded to in the Apocrypha, e.g. in Ecclus. xvii. 14 (= 17 A. V.), "He appointed a ruler for every nation, and Israel is the Lord's portion" (*ἐκάστην ἔθνην κατέστησεν ἡγούμενον, κ.τ.λ.*), where by the "ruler" some understand the guardian Angel; others, however, refer the expression to secular princes (cp. *Speaker's Comm.* in loco). With greater probability, the same idea is found in Baruch vi. 7, "for my Angel is with you and himself (not as A. V. 'I myself') caring for (*ἐκτρέφει*) your souls," where the people of Jehovah are reminded of the continual presence of their guardian Angel, "the Angel of the Lord."

The foregoing references are not different in kind from O. T. narratives of angelic appearances. But the angelology of the Book of Tobit may bear traces of a new and possibly Persian influence. At any rate its most marked feature is the prominence which it gives to the current belief in opposing spiritual powers of good and evil. The idea underlying the story of the Book is that the care of individuals as well as of nations is committed to the charge of angelic beings. The description of Raphael, who was one of "the seven Angels who stand in the presence of the glory of the Lord" (xii. 15), and who is sent upon earth to act as the guardian and protector of Tobias and to restore the eyesight of Tobit, will illustrate the words which our Lord Himself uses in Matt. xviii. 11, "Take heed that ye despise not one of these little ones; for I say unto you that [in heaven] their Angels do always behold the face of My Father Which is in heaven." The name of Raphael is clearly connected with his healing power (cp. ii. 17, *ἰασάσθαι*), and the formation of the word must be compared with the names of Uriel (2 Esd. iv. 1), Jeremiel (2 Esd. iv. 36), "Ramiel," who is over the visions of truth (Apoc. Bar. lv.), and Michael the Archangel (Jude v. 9). The opposition between the spirits of good and the spirits of evil is brought out in

the course of the same book; thus, while in v. 21 we have the mention of a "good Angel" (*ἄγγελος ἀγαθός*; cp. also 2 Macc. i. 6, sv. 23), in other passages we find also mention of "the evil daemon" (*τὸ δαιμόνιον τὸ πονηρὸν*, iii. 8, 17; vi. 7) or "the daemon" (*τὸ δαιμόνιον*, vi. 15, 17; viii. 3). The name of this "evil spirit" is given, i.e. Asmodeus, and is supposed to be derived either from the Hebrew *ʾšm*, in which case its meaning would be "the Destroyer" (= Apollyon), or from some doubtful Persian root. The description of this daemon in ch. iii. agrees with the New Testament term of "unclean spirit;" and the fanciful account of his baleful influence over Sara (Tobit vi. 13, 14) may have arisen from the Jewish legends concerning the "loves of the angels," based upon Gen. vi. 2. The power of the evil spirit is subdued by a charm revealed by the good Angel Raphael. The evil spirit flies to the upper parts of Egypt and is there bound by the Angel (viii. 3). Desolate places were tenanted according to Jewish views of demonology by evil spirits (cp. Matt. xii. 43). The punishment of banishment from the country should be compared with the words of St. Mark v. 10, "they besought Him much that He would not send them *αὐτοὺς* out of the country;" and that of "binding" with the words of Rev. ix. 2, "he laid hold on the dragon, that old serpent, and bound him a thousand years."

The personal spirit of evil is rarely alluded to in the apocryphal books. The name of "Satan" occurs in Ecclus. xxi. 27 (*ἐν τῇ καταρῶσει ἀσεβῆ τὸν σατανᾶν, ἀλλὰ καταρῶται τὴν ἑαυτοῦ ψυχὴν*), but the context is thought by some to leave it uncertain whether "the spirit of evil" or a man's individual adversary (cf. Additions to Esther, δ *διάβολος*, vii. 4) is intended. The former view (cp. *Speaker's Comm.* in loco) seems preferable for the following reasons. (1) The fact that the word *σατανᾶς* appears nowhere else in the apocryphal writings favours the view that it occurs here as a proper name. (2) In the LXX. Version of the O. T. the word *σατανᾶς* does not occur, but the word *σατάν* is found three times in one chapter (1 K. xi. 14, 23, 25) for a human adversary, but without the article. In the New Testament the word occurs some thirty-five times (twenty-seven times with the article) in the sense of a spiritual adversary. (3) It was the natural transliteration of *שָׂטָן*, as soon as the idea of a personal Spirit of Evil had become established. We are therefore inclined to translate the word in this its usual sense, and to compare the whole passage, which is somewhat obscure, with our Lord's words recorded in John viii. 44. Another passage (Wisd. ii. 24) repeats the Rabbinical belief that death entered into the world through the envy of the devil (*φθόνῳ διαβόλου*). Again, in 4 Macc. xviii. 8, the Evil One is spoken of as "the pestilent serpent of deceit" (*ἀμειβὼν ἀνδρὶν ὄφης*; cp. Apoc. ix. 2).

In conclusion, it may be remarked that the general tone of the allusions to angelic beings in 2 and 3 Maccabees, Tobit, and the Additions to Daniel, seems to presuppose that they were of bodily shape and of material substance.

(iv.) *Creation and man's nature.* The work of Creation, according to the Palestinian books of the Apocrypha, is a creation of the whole uni-

verse out of nothing by the absolute power of God. The Genesis account is distinctly affirmed in the Book of Ecclesiasticus xvi. 24-27, xvii. 1, xviii. 1 (the words of which, *ἔκτισε τὰ πάντα κελεύθῳ*, do not support the theory of simultaneity in the work of Creation; cp. *Speaker's Comm.* in loco); in Wisdom ii. 23; and in 2 Esd. iii. 4-6, vi. 38.

In the Alexandrine books two passages bearing upon this subject have received more especial attention. In 2 Macc. vii. 28 where we read, "God made them (i.e. heaven and earth) of things that were not" (*ἐξ οὐκ ὄντων ἐποίησεν αὐτὰ ὁ θεός*), we should probably adopt the variant reading supported by good authorities (*οὐκ ἐξ ὄντων*, MSS.), and compare for the transposition of the negative the well-known passage in Heb. xi. 3. It is a mistake to see in these words an allusion to the Platonic terminology, which spoke of "the things that are not" (*τὰ μὴ ὄντα*) as the matter out of which the universe was formed.

The case is different with the Book of Wisdom, the writer of which was deeply imbued with Hellenic thought. In xi. 17 (*ἡ παντοδύναμη σου χεὶρ . . . κτίσασα τὸν κόσμον ἐξ ἀνόρφου ὕλης*) the world is stated to have been formed out of "formless matter;" and although this expression may require some modification in the light of other passages in the same Book (ix. 1; xii. 9), it is best understood as a fusion of the description contained in Genesis (i. 2) with the Platonic belief in the eternity of matter expressed in technical language (cp. *Speaker's Comm.* in loco).

So far as the subject of the origin of evil is touched upon, the views expressed in the apocryphal writings seem to follow the Genesis account of the Fall. Thus in Eccles. xxv. 24 we find the words, "Of the woman came the beginning of sin, and through her we all die;" and in Wisd. ii. 24, "through envy of the devil came death into the world." The writer of the latter book seems to accept the theory of the pre-existent state of souls (viii. 19), and regards the soul alone as the real man to whose true development the body acts as a clog and a hindrance (i. 4, viii. 20, ix. 15; cp. the Essenes, Joseph. *Bell. Jud.* ii. 8, § 11), but he nowhere, like Philo, speaks of matter as inherently evil. The primeval condition of man before the fall—"the image of God's being"—is described in noble and striking words (ii. 23), which imply that the result of the fall is the loss of the image of God. God did not create death; He created all things that they might exist (i. 13).

Man's freedom of will is stated in most unqualified terms in Eccles. xv. 11-20 (see especially v. 14), "He Himself made man from the beginning and left him to his free choice (*ἔφηκεν αὐτὸν ἐν χειρὶ διαβούλου αὐτοῦ*); if thou wilt, thou shalt keep the commandments; and to act with fidelity is matter of liking. He set before thee fire and water. Thou shalt stretch forth thy hand, wherever thou wilt (*οὗ δὲν θέλῃς*). Before men is the life and the death, and whichever he liketh shall be given him (*καὶ ὃ ἐὰν εὐδοχήσῃ, δοθήσεται αὐτῷ*). The possession of free-will (*διαβούλου*) is described among God's gifts to mankind (xvii. 6); virtue and happiness are dependent on the exercise of the powers of will or choice. This testimony de-

mands the more careful attention, when reviewed by the side of passages in the same Book in which good and evil are, as it were, set over against each other by the rigid predetermination of God: e.g. xxxvi.=xxxiii. A.V. 13-15; xlii. 24. Another passage, which appears in the A. V. as xi. 16 (*πᾶσι καὶ σκότος ἁμαρτωλοῖς συνέκτισται*), "error and darkness have been created together with sinners," is omitted in the best text and is probably a gloss.

According to the Book of Wisdom, man enters upon life free from disposition to sin, with his moral nature a "tabula rasa." The writer describes his own soul as being good and his body undefiled (*ψυχὴ ἀγαθὴ, σῶμα ἀμικτὸν*), but he admits that wisdom—the fountain of Divine life—came not to him naturally; she could be procured only through prayer, "with his whole heart" (viii. 20, 21). A doctrine of predestination of Israel's foes to sin and evil finds support in Wisd. xii. 11.

The doctrine of "original sin" is nowhere definitely stated except in 2 Esd. iii. 21, 22, 26; iv. 30; vii. 46-53; though it may be held that the expression in Wisd. i. 4 (*σῶμα ἁμαρτίας καταχρῶς*) embodies the same idea.

We do not find any very exalted moral standard in the Apocrypha. There is little conception of sin beyond the infringement of an actual law, and little conception of virtue beyond the outward rectitude of legalism. Virtues and vices are classified according as the former are more profitable, the latter more harmful to society (Eccles. xviii. 20; Wisd. viii. 7). Account is taken of actions, not of motives. A material view of life runs through all the Books; virtue will bring its own reward, vice its own punishment on earth; the individual lives and dies to himself. As a rule, too, the recompense spoken of is a material one to be meted out on earth; earthly prudence is made the basis of morality. In some exceptional passages (e.g. Tob. xii. 14; Wisd. i. 15, iii. 1, vi. 18; Eccles. iii. 18; Baruch v. 2), the reward is that which is granted in the spiritual life; and a higher demand is made upon the exercise of faith. But we find, on the whole, few traces of thought in which approach is made to the loftiest standards of human morality, such as is presented in the description of "the just man" (Wisd. ii.).

The judgment to be passed upon men is a judgment according to works (Eccles. xvi. 12, 14). A man's own deeds can justify him before God: his sins are forgiven for the honour which he pays to his parents (Eccles. iii. 3, 14); for his almsdeeds (Eccles. iii. 30, xxix. 12; Tob. iv. 10, xii. 9, xiv.). The martyr's sufferings on earth will receive their recompense in the world to come (2 Macc. vii. 2, 11, 14). By the meritoriousness of good works a man not only lays up treasure for himself (Eccles. iii. 4), but may even benefit the future condition of the departed (2 Macc. xii. 44).

The less attractive aspect of Judaism frequently obtrudes itself. Even the most Hellenic book in the Apocrypha, the Book of Wisdom, speaks of the Jews as "the sons of God," "undefiled seed," "holy people and blameless seed," &c. (e.g. Wisd. ix. 4-7; x. 15; xii. 19; xv. 2; xviii. 1). The Second Book of Maccabees breathes a spirit of vehemently

patriotic hatred against the foes of Israel (cp. iv. 1-19; v. 9; viii. 34-36; ix. 8-13; xii. 35; xiii. 4; xiv. 27; xv. 37). The morality of the Book of Judith could only be defended by a parallel with the deed of Jael; her very deceit is described as piety (ix. 13; xi. 5-8). An austerity destined to be dispelled by the New Covenant appears even in the best apocryphal writings. Thus charity should not be shown to the sinner (Ecclus. xii. 3-7; Tob. iv. 17); the harshest treatment is recommended as the best training for children (Ecclus. xxx. 9-12); the curse pronounced upon the wicked is extended to the wives and children (Ecclus. xl. 15; Wisd. iii. 12, 13); the ferocity of the patriarch Simeon is applauded (Judith ix. 2).

(v.) In their representation of *personal and national religion* the books of the Apocrypha reflect the spirit of the age in which the Jewish religion was impersonated by the scribe more truly than by the priest. The daily actions of the layman no less than the functions of the priest were regulated by rule. Legalism had invaded every relation of life.

The Book of Tobit, which presents so attractive a picture of family relations, makes mention of the three elements of the devout life—prayer, fasting, alms (xii. 8), destined to receive our Lord's exposition in the Sermon on the Mount (Matt. vi. 1-18).

Prayer occupies a most prominent part in the religious duties of the people. In every Book of the Apocrypha its necessity and efficacy are illustrated (e.g. 1 Esd. viii. 53, 75-90; 2 Esd. vii. 36-41; Additions to Esth. iv. 16; Tob. xii. 8, 15, xiii.; Judith lx., xvi. 1-17; Wisd. ix., xviii. 21; Ecclus. xxxii.—xxxv. A. V. 13-17; The Prayer of Azarias; The Song of the Three Children; The Prayer of Manasses; 1 Macc. vii. 37, xi. 71; 2 Macc. x. 16, 25; 3 Macc. vi. 1-15; Bar. ii. 14, iii. 1-8). In times of tyranny and oppression it was the only weapon in the hand of the poor and defenceless (Ecclus. iv. 6; xxi. 5; xxxii. 13-17).

In two passages we have an allusion to the "places of prayer" (τόπος προσευχῆς), or "prayer" (προσευχή, *proseucha*), where the Jews used to assemble for their devotions. In 1 Macc. iii. 46, Mizpah is mentioned as having been in old time a place of resort for purposes of prayer; in 3 Macc. vii. 20, the thankful Jews are said to have built a "proseucha" by the side of a monument erected on the banks of the Nile to commemorate their preservation. "Hallelujah" (ἁλληλουία) is the cry of public thanksgiving (Tob. xiii. 18; 3 Macc. vii. 13). The response of the people in public prayer, "Amen," is noticed in Tob. viii. 8; 1 Esd. ix. 47; 3 Macc. vii. 23; 4 Macc. xviii. 23; cp. Judith xiii. 20, xv. 10.

Great importance is attached to fasting. The Apocrypha shows how prevalent and important an element of religious life this custom had become. The Book of Tobit ranks fasting with prayer (xii. 8). Of Judith we are told, "She fasted all the days of her widowhood, save on eves of sabbaths and sabbaths, and eves of new moons and new moons, and feasts and festival days of the house of Israel" (Jud. viii. 6). Fasting is often mentioned as accompanying special supplication (1 Esd. viii. 50, ix. 2; 2 Macc. xiii. 12; Ecclus. xxxiv. 26; 2 Esd. vi. 31, 35; Baruch i. 5;

Judith iv. 13). The view that fasting was something meritorious in itself is asserted in the passage Tob. xii. 8. The writer of Ecclesiasticus however protests that the act of fasting without moral change and moral abstinence was a hollow unreality (Ecclus. xxxi.—xxxiv. A. V. 26), and by his protest implies the prevalence of an abuse for which our Lord a few generations later rebuked the Pharisees (Matt. vi. 1, 2, 16).

Almsgiving seems to have held a position very similar to that of fasting, and to have been exposed to the same peril of perversion. The Book of Tobit, which abounds with allusions to it (e.g. i. 3, 16; iv. 7, 8), makes use of the most exaggerated expressions in its commendation. It "saves from death;" "it purges away every sin;" "they who practise it shall be filled with life" (xii. 8, 9; xiv. 10). The same view of the meritoriousness of almsgiving appears in the Book of Ecclesiasticus, e.g. "almsgiving maketh atonement for sins" (iii. 30). "Shut up alms in thy storehouse, and it shall deliver thee from all affliction" (xxix. 12). "Brethren and help are against time of trouble, but alms deliver more than both," xl. 24 (cp. vii. 9, 10, 32, 33; xii. 3-5; xvi. 14; xvii. 17; xxix. 8; xxxiv.—xxxv. A. V. 11; xl. 17). So highly was this virtue prized that the Hebrew word for "righteousness" (ῥηδυν) became narrowed down in its application so as to mean "almsgiving" only. An early hint of this use of "righteousness" (δικαιοσύνη) in the sense of "mercy," "charity," may be seen in Tob. ii. 14; Ecclus. xlii. 10; see also Daniel iv. 27. The suggestion, however, that "righteousness" occurs in the sense of "almsgiving," in Wisdom viii. 7, is quite untenable.

The importance of such religious duties grew in the estimation of the people, as it became evident that the strict observance of the Temple ceremonial was impossible for the multitude of Jews who formed the Diaspora (2 Macc. i. 27; Judith v. 19) and lived at great distances from Palestine, "the dispersed among the Gentiles." The Book of Tobit describes how a Naphtalite received the reward of a religious life of prayer and almsgiving. The Book of Judith shows how God manifested His power not to priests and elders and men of renown, but to a Simeonite woman, on account of her unwavering faith and her life of fasting and prayer and purity. But, although the moral is exalted above the ceremonial (Jud. xvi. 16; Ecclus. xxii. 18-26), the Law of Moses is in no way depreciated. Tobit is described as going often to Jerusalem at the feasts, bearing the necessary offerings and tithes, as ordained by the Law of Moses (i. 6, 7); he abstains from eating the bread of the Gentiles for fear of pollution (i. 12). Judith too is most scrupulous lest she should contract ceremonial defilement by eating anything unclean, at the very time when she seems to set every moral restraint at defiance in order to compass her daring purpose (Judith xii. 2). The dread of this particular source of ceremonial defilement is the sign of the pious Jew; death or starvation is preferred to it (see Jud. xi. 12, xii. 2; 1 Macc. i. 63; 2 Macc. v. 27; σκληρονομία, 2 Macc. vi. 7, 8, 21, vii. 41; and μαρμαρυγία, 4 Macc. v. 26, vi. 19, &c.: cp. Daniel i.). The same spirit of legalism animated the most

ardent and religious minded of the race, who were termed *Assideans* or "Puritans" [see art. *ASSIDEANS*]. One thousand of these forerunners of the Pharisaic party preferred to suffer death rather than to raise a hand in self-defence upon the Sabbath, and so pollute the sacred day (1 Macc. ii. 34-38). The regard for the Sabbath day appears in 2 Macc. vi. 6; viii. 26; xii. 38; xv. 2. The rite of circumcision was strictly continued by pious Jews in face of fierce opposition (1 Macc. i. 60, 61). Proselytes were subjected to it (Jud. xiv. 10). The Maccabean patriots zealously purified the Temple and restored its sacrificial system (1 Macc. iv. 36-56).

The two didactic books, as might be expected, emphasize the moral aspect of religion. The Book of Wisdom practically omits all reference to Levitical worship (except xviii. 21-24); the Book of Ecclesiasticus, which from its eulogy of Aaron (xlv. 6-22) and of Simon the Just (l. 1-22) is by some supposed to have been written by one of the priestly caste, only once or twice elsewhere touches upon the subjects of the priesthood (lxxvi. 22 = 17 A. V.), of ceremonial worship (vii. 29-31; xiv. 11; xxi. = xxiv. A. V. 18; xxvii. = xxv. A. V. 8), of Jerusalem, and the Temple services (xxiv. 10, 11). The true sacrifice is the keeping of the Law and righteousness of life (Ecclus. xxxii. = xxv. A. V. 1-12; Wisd. iii. 6). The glory of the scribe (Ecclus. x. 5; xxxviii. 24; xxxix. 1-11; xlv. 4: cf. 2 Macc. vi. 18) has begun to eclipse the glory of the priest. True "wisdom" in both Books is identical with "the fear of God," and "the fear of God" (referred to at least forty-four times in Ecclesiasticus) with the teaching of the Law (Ecclus. xxiii. 27). The knowledge of it is the possession of the wise man. It is bound up in proverbs (Ecclus. viii. 8; xviii. 27, 28; xxxix. 2, 3; xlvii. 17); it belongs to the "mysteries of God" (Wisd. ii. 22: cf. vi. 22); it is hidden in parables which the sagacious man will ponder well (Ecclus. iii. 27 = 29 A. V.), and of which the discovery is laborious (xiii. 25 = 26 A. V.). At the foundation of all life, public and domestic, lie the Law and the Commandments of God (e.g. Ecclus. ii. 16; xxiv. 22-27; xxv. = xxxii. A. V. 23; xxxvi. = xxxiii. A. V. 2, 3; xxvii. = xxv. A. V. 1; xxxix. 1, 8; xlii. 2; xlv. 20; xlv. 5; xlix. 4; li. 19). The Law of Moses was still the standard of Jewish national life (1 Macc. i. 52; ii. 27; xiv. 14).

Other books record for us the general veneration for the service of the national sanctuary. The safety of Jerusalem and the Temple is uppermost in Jewish thought (Jud. iv. 2). Jerusalem is "the holy city" (2 Macc. ix. 14; Ecclus. xxxiii. 18 = xxxvi. 13 A. V.). The war of independence was waged for "the people and the sanctuary" (1 Macc. iii. 58, 59). Jerusalem is spoken of as the place where all the tribes assemble for sacrifice at the Feasts (ep. Tobit i. 4, v. 13; Judith xvi. 18; Bar. i. 10). The restitution of full honour to Jerusalem is the prayer of the Jew in captivity (Bar. v. and Tobit xiii.). The First Book of Esdras is wholly devoted to the subject of the restoration of the Temple. The First and Second Books of the Maccabees abound in allusions to the national importance of the sanctuary at Jerusalem, the maintenance of the Levitical worship, the distinction between clean and unclean, the obser-

vance of the Sabbath, &c. (e.g. 1 Macc. i. 44-47, 62, 63; iv. 37-60; vii. 33, 36, 49; x. 34; xii. 11, &c.). On the other hand the memorable principle that God chose the place for the people, not the people for the place, is stated in 2 Macc. v. 19 (ἀλλ' οὐ διὰ τὸν τόπον τὸ ἔθνος ἀλλὰ διὰ τὸ ἔθνος τὸν τόπον ὁ κύριος ἐξελέξατο). The conduct of the apostate high-priests Jason and Alcimus and the Hellenizing faction created a powerful reaction in favour of the old Mosiac worship and the old religious customs. The men who were ready to renounce their country's God and worship, abolish the ancient rite of circumcision (1 Macc. i. 11-15), and introduce the shame of the gymnasium within the precincts of Jerusalem, were denounced as apostates (1 Macc. ii. 15; 2 Macc. v. 8). In the First Book of Maccabees, the epithets "transgressors" (ὑπερβητοί, 1 Macc. i. 11, 34; x. 61; xl. 21), "lawless" (ἀνομοί, ii. 44; iii. 5, 6; vii. 5; ix. 23, 58, 69; xi. 25), "impious" (ἀσεβεῖς, iii. 15; vi. 21; vii. 5; ix. 25, 73) are regularly applied to the Hellenizing faction and their supporters.

We catch glimpses of the pre-eminent authority of the high-priests (Ecclus. l., Simon the Just; 2 Macc. xv. 12, Onias), as well as of the harm they could do their country by a betrayal of their trust (e.g. Jason and Alcimus, 1 and 2 Macc.). They were assisted by a Senate, "the Sanhedrin" (ὑπεροβία, Judith iv. 8, xi. 14, xv. 8; 1 Macc. xii. 6; 2 Macc. i. 10, iv. 44, xi. 27; 3 Macc. i. 8: cp. *πρεσβύτεροι*, 2 Macc. xiii. 13). The establishment of synagogues, presided over by elders, secured the municipal administration (cp. Judith vi. 16, and the Story of Susanna).

The danger of idolatry in its old form was no longer the besetting temptation of the Jews of Palestine. "The apostates" in the Maccabean age desired the favour of the Greeks, not the privilege of their worship. The secret of their apostasy lay in commercial, social, and political, not in religious, motives. The apocryphal writings directed against idolatry to bring it into contempt and ridicule (i.e. Bel and the Dragon, the so-called Epistle of Jeremy = Baruch vi.) seem by their very feebleness to indicate that they could never have been written to meet any urgent religious crisis. The former contains humorous legends; the latter is a monotonous diatribe. The probability that in Alexandria more enticing forms of idolatrous worship were presented to the Jewish populace, may account for the indignant outburst against paganism which distinguishes the latter portion of the Book of Wisdom (see more especially chaps. xii. to xv.). "For the worshipping of idols is the beginning, the cause, and the end of all evil," is the epitome of the indictment (xv. 27).

One more point under this head deserves attention, i.e. the veneration of the Jews for their sacred Books. The orders of Antiochus Epiphanes to destroy and burn all "the Books of the Law" (τὰ βιβλία τοῦ νόμου) or any "Book of the Covenant" (βιβλίον διαθήκης) that might be found among the Jews (see 1 Macc. i. 56, 57), coupled with the unpatriotic conduct of the Hellenizers, only served to heighten the national devotion to the Scriptures. The public unrolling of the Book of the Law was looked on as a religious ceremony in a time of distress (1 Macc.

iii. 48). The possession of "the holy Books" (τὰ ἅγια βιβλία), "the Law and the Prophets," was regarded as a source of strengthening and comfort in the hour of danger (1 Macc. xii. 9; 2 Macc. xv. 9). Another passage (2 Macc. viii. 23) relates that Eleazar, a brother of Judas the Maccabee, was appointed "to read the holy Book" (τὸ ἅγιον βιβλίον) for the Jewish forces, and that the appointment to this office was esteemed so highly as to be recorded side by side with the appointment of captains to the three divisions of the army (cp. the title of Ezra, ἀναγνώστης νόμου κυρίου, 1 Esd. viii. 8, 19; ix. 39, 42, 48, 49).

We find in the Apocrypha, too, the first certain intimations of the final stage in the formation of the O. T. Canon. The Prologue to the Book of Ecclesiasticus refers to a triple division of the Hebrew Scriptures into the Law, the Prophets, and the Writings (e.g. διὰ τοῦ νόμου καὶ τῶν προφητῶν καὶ τῶν κατ' αὐτοὺς ἠκολουθηκόντων, τοῦ νόμου καὶ τῶν προφητῶν καὶ τῶν ἄλλων πατρῶν βιβλίων, ὁ νόμος καὶ αἱ προφητεῖαι καὶ τὰ λοιπὰ τῶν βιβλίων). The Second Book of Maccabees (ii. 13) is supposed by some to contain a genuine tradition as to the formation of the Canon by Nehemiah. It describes how Nehemiah, "founding a library, gathered together the acts of the kings and the prophets and the writings of David, and the epistles of the Kings concerning the holy gifts," alluding probably to the work of collecting the sacred writings, which tradition with good reason assigned to the age of Nehemiah. The same epistle (2 Macc. ii. 14) records that Judas Maccabaeus made a similar effort to collect the sacred writings which had been lost or scattered during the war with Syria. The legend that, after the destruction of the Temple and the burning of the sacred Books by the Chaldeans, Ezra was endowed with Divine power to restore the twenty-four Canonical Books of Scripture, besides seventy books of esoteric learning, is based upon 2 Esd. xiv.

The writers of the apocryphal books frequently cite from the Old Testament and from the LXX. Version, and thus supply important indirect evidence as to the date both of the completion of the Canon and of the Alexandrine Version. Among the more important of these quotations and allusions in the earlier Books of the Apocrypha are Wisd. iv. 10 = Gen. v. 24 (LXX.); Eccles. ii. 18 = 2 Sam. xxiv. 14; Eccles. xvii. 17 = Deut. xxiii. 8, 9 (LXX.); Eccles. xlv. 16 = Gen. v. 24 (LXX.); 1 Macc. vii. 17 = Ps. lxxix. 2, 3 (LXX.); 2 Macc. vii. 6 = Deut. xxiii. 36 (LXX.); 3 Macc. vii. 8 = Jonah ii. 1 (LXX.); 1 Macc. i. 54 cp. Dan. ix. 27, xi. 31 (LXX.). The story of Daniel is referred to in 1 Macc. ii. 59, 60; of Esther, in 2 Macc. xv. 36. The words of Amos (viii. 10) are directly cited (? from LXX.) in Tob. ii. 6. Eccles. xxvii. 26 appears to quote the LXX. of Eccles. x. 8, though it is possible that both passages may accidentally present the same proverbial expression (cp. Prov. xxvi. 27) in the same words.

An acquaintance with the earlier books of the Apocrypha may perhaps be traced in the books of later composition. The formation of 3 and 4 Maccabees presupposes an acquaintance with one or both of the earlier volumes; a remark-

able correspondence of ideas may be seen in 2 Macc. ii. 2 with the Epistle of Jeremiah; the words of 3 Macc. vi. 6 recall the Greek of The Song of the Three Children v. 27.

(vi.) The subject of *eschatology* acquired increasing importance as the political independence of the people declined. More definitely referred to in the Apocrypha than in the Canonical Books of the O. T., it engrosses the main portion of the apocalyptic literature composed at the time of, or shortly after, the nation's overthrow by Titus.

Before "the last things" the "full measure of time" is to be fulfilled, Tob. xiv. 5 (ἐν τοῦ χρόνου οὗ ἂν πληρωθῇ ὁ χρόνος τῶν καιρῶν). But the knowledge of it is hidden from the sons of men (2 Esd. vi. 10; xiii. 52). The woes—the sign of the Messiah's coming—are described (2 Esd. ii. 27; xv. 5, 24). Elijah was to be the forerunner (Ecclus. xlviii. 10). The glorious renovation of Israel is pictured in Judith xvi. 15–17; Ecclus. i. 23, 24; and the restoration of the scattered tribes to the land of their fathers is a frequent theme of patriotic prayer (Tob. xiii. 10, xiv. 5; Baruch ii. 34, iv. 37, v. 5; 2 Macc. ii. 18; Ecclus. xxxiii. 11 = xxxvi. A. V. 11; xxxvi. 16–22 = 11–17 A. V.).

How material a conception this national hope must have been, is indicated by the fact that the possibility of a future state is nowhere realized in the books of Palestinian origin. "Hades" in these books is merely a vague region of death (Ecclus. ix. 12; xiv. 12, 16; xvii. 22; xxi. 10; xxviii. 21; xli. 4; xlviii. 5; li. 5;—Bar. ii. 17; iii. 11, 19). There is no thought of a *future* life in the Books of Baruch and Judith, unless the title of "Eternal" applied to the Almighty be deemed an exception (Baruch). In the First Book of Maccabees there is no allusion to the condition after death; and the reference to it which some have found in "an eternal name" (ὄνομα αἰώνιον, ii. 51; vi. 44; xiii. 29), "an eternal priesthood" (ἱερουσύνη αἰώνια, ii. 54)—phrases based on O. T. language—is not strictly relevant. In the Book of Ecclesiasticus we have an allusion to "eternal joy" (εὐφροσύνη αἰώνια, ii. 9), but, in the face of such passages as xvii. 22–26, xli. 4, it is scarcely probable that the writer was acquainted with a positive doctrine of immortality. The passage in xlviii. 11 which appears in the A. V., "Blessed are they that saw Thee and slept in love" (ἐν ἀγαθῇ ἐκκοιμημένοι), is due to a corruption in the text. The right reading gives us "and are adorned with love" (ἐν ἀγαθῇ κεκοσμημένοι), which seems to have been altered in later times in support of the doctrine of the Resurrection. The circumstances of death are the test of life (Ecclus. xi. 23–26); "the last things" (ἐσχάτα) of a man are his departure from earth (ii. 3; iii. 24; vi. 27; vii. 36; xiv. 7; xxi. 10; xxviii. 6; xxx. 1; xxxviii. 20; xlviii. 24).

In Alexandria the doctrine of the immortality of the soul naturally accompanied the view which regarded death as the soul's release from the prison-house of the flesh. The Book of Wisdom asserts the immortality of man (ii. 23; iii. 4; v. 15; vi. 20; viii. 13, 17); and although it is stated that "to know the power of God is the root of immortality" (xv. 3), the Book does not deny, as some have maintained, the future existence of the wicked. The denial

of immortality is part of the presumptuous utterance of the ungodly (ii. 1-5). The future life of the righteous is pictured in several passages (iii. 7, 14; iv. 2, &c.; v. 15, &c.). But the doctrine of the immortality of the soul does not, in the Book of Wisdom, include the doctrine of the resurrection of the body. The Second Book of Maccabees shows, however, how strongly the thought of the resurrection had fastened itself into the minds of some among the Jews (vii. 9); "the King of the world will raise us up, who have died for His laws, unto an eternal renewal of life" (*εἰς αἰώνιον ἀναβίωσιν* (*σῶν*, cp. vii. 11, 14, 36; xiv. 46). It even gave rise to prayers and offerings for the dead that their sins might be forgiven. The famous passage illustrating this application of the doctrine relates how Judas Maccabeus sent 2000 drachms "to Jerusalem to offer a sin-offering, doing therein very well and honestly, in that he was mindful of the resurrection. For if he had not hoped that they that were slain should have risen again, it had been superfluous and vain to pray for the dead... Whereupon he made a reconciliation for the dead, that they might be delivered from sin" (xii. 43-45). At first the application of the doctrine of the resurrection seems to have been limited only to the Jewish race, and is directly denied in the case of Antiochus Epiphanes, the persecutor of the nation (vii. 36, 37). The Fourth Book of Maccabees constantly refers in very concrete terms to the doctrine of eternal happiness and of eternal punishment.

The Final Judgment appears as an earthly visitation in the Book of Judith, and the vengeance exacted upon the wicked is described under the imagery of "the fire and the worm" (Judith xvi. 17; cp. Eccles. vii. 17). In the Book of Wisdom the day of judgment is probably implied in the expressions *ἐν καιρῷ ἐπισκοπῆς αὐτῶν* (iii. 7), *ἐν ἡμέρᾳ διαγνώσεως* (iii. 18), *ἐν συλλογισμῷ ἀμαρτημάτων αὐτῶν* (iv. 20). The future condition of the wicked is described as hopeless (iii. 18; v. 14), "full of suffering" (iv. 19), "enveloped in darkness" (xvii. 20; cp. Bar. vi. 71; Tob. iv. 10). The eternal punishment of the lost is reiterated with terrible vehemence in the Fourth Book of Maccabees (ix. 9; x. 11, 15; xii. 12; xiii. 14; xviii. 5, 22).

The Second Book of Esdras foretells that, after the Messiah had reigned for 400 years, both he and all living flesh should die; that then the Most High should be revealed upon the throne of judgment; that the lake of torment should appear and over against it the place of rest—the Gehenna and the Paradise of delight, into which the Hades of departed spirits should be divided (vii. 29-42).

V. *The Text of the Apocrypha.*—The books of the Apocrypha have been preserved to us mainly through the preservation of the Alexandrine Version of the Old Testament. The MSS. of the Apocrypha are, therefore, generally MSS. of the LXX., and are very considerable in number. Unfortunately nearly all these MSS. are cursives. Only nine uncials MSS. are known to contain the Apocrypha or portions of it.

(1) Of these uncials MSS. by far the most important is the Codex Vaticanus (=II. in Holmes and Parsons, and Fritzsche) of the 4th century, which originally contained the whole of the Old

and New Testaments. It has preserved to us the text of 1 Esdras, Wisdom, Ecclesiasticus, Additions to Esther, Judith, Tobit, Baruch with the Epistle of Jeremiah, the Additions to Daniel. The Books of Maccabees are wanting.

(2) The Codex Sinaiticus (cent. iv.) at St. Petersburg and (Cod. Frederico-Augustanus) at Leipzig (=X. in Fritzsche), which also originally contained the whole of the Old and New Testaments, has the Additions to Esther, Tobit, Judith, 1 and 4 Maccabees, Wisdom, and Ecclesiasticus.

(3) The Codex Alexandrinus (cent. v.) at the British Museum (=III. in Holmes and Parsons, and Fritzsche), which originally contained the whole of the Old and New Testaments, has preserved to us the entire Apocrypha, i.e. Baruch with Epistle of Jeremiah, Additions to Daniel, Additions to Esther, Tobit, Judith, 1 Esdras, 1, 2, 3, 4 Maccabees, the Prayer of Manasses, Wisdom, and Ecclesiasticus.

(4) The Codex Ephraemi (cent. v.) at Paris (=C in Fritzsche), a palimpsest, in the Old Testament contains only fragments of the poetical books, including about half of Wisdom and the greater part of Ecclesiasticus.

(5) The Codex Venetus (cent. ix.), an uncial MS. in the library of St. Mark's, Venice (=23 in Holmes and Parsons, and Fritzsche; V. in Lagarde), has Wisdom, Ecclesiasticus, Baruch with the Epistle of Jeremiah, Additions to Daniel, Tobit, Judith, 1, 2, and 3 Maccabees.

(6) The Codex Basiliano-Vaticanus, 2106 (cent. ix.) at the Vatican (=XI. in Holmes and Parsons, and Fritzsche), has 1 Esdras (except viii. 1-5 and ix. 2-55), and the Additions to Esther.

(7) The Codex Marchalianus (Vaticanus, 2125; cent. vii.=XII. in Holmes and Parsons, and Fritzsche) has Baruch with Epistle of Jeremiah, and Additions to Daniel.

(8) The Codex Cryptoferratensis (cent. viii.), a palimpsest, edited by Jos. Cozza at Rome, 1867, has fragments of Baruch with Epistle of Jeremiah and the Additions to Daniel.

(9) Another uncial MS. (cent. vii.?) at St. Petersburg, discovered by Tischendorf, not yet collated, contains fragments of Wisdom and Ecclesiasticus.

The extant cursive MSS. have preserved to us great varieties of text, the discussion of which belongs rather to the articles upon the separate books of the Apocrypha and to the article SEPTUAGINT.

One point of interest which has been established by recent researches deserves to be noticed here. Field (*Prolegg. in Hexapla Originis*, pp. lxxxvii., lxxxviii., 1875) has pointed out that certain cursives and the texts used by Chrysostom and Theodoret represent the revision of the LXX. Version by Lucian of Antioch. It has not yet been ascertained how far traces of such a revision can be found in the Apocrypha. But it may be useful to note that of the MSS. which Field has thus identified, the following contain portions of the apocryphal Books:—

19 = Cod. Bibl. Chig. Rome (cent. x.) contains 1 Esdras ii. 16-ix. 36, the Additions to Esther, Judith, 1, 2, 3 Maccabees.

22 = Brit. Mus. (cent. xi.) contains Baruch.

36 = Cod. Vat. No. 347 (cent. xiii.), 48 = Cod. Vat. No. 1794 (cent. xi.), 51 = Cod. Medic. Lib. (cent. xi.),

90 = Cod. Bibl. Laurent. (cent. ix.), 147 = Cod. Bodl.

- Oxf. (cent. xiii.), 233 = Cod. Vat. No. 2067 (cent. xii.) contain Baruch with Ep. of Jeremiah and Additions to Daniel.
- 62 = Cod. Oxf. (cent. xiii.) contains Baruch with Ep. of Jeremiah, Additions to Daniel, 1, 2, 3 Maccabees.
- 93 = Cod. Aroudel, Brit. Mus., contains Esdras, Additions to Esther, 1, 2, 3 Maccabees.
- 108 = Cod. Vat. No. 330 (cent. xv.) contains Esdras, Additions to Esther, Judith, Tobit.
- 308 = Cod. Vindob. contains Ecclesiasticus.

Versions.—For more detailed information upon these versions, consult the articles **VERSIONS (ANCIENT) and VULGATE.**

Under the head of the Latin translators, the work of Jerome must be carefully distinguished from the Old Latin Version. It is well known that Jerome's celebrated revision of the Old Testament was based upon the Hebrew original, and that he did not consider himself concerned with books which were not extant in Hebrew. He consented, however, at the urgent entreaty of two bishops, Chromatius and Heliodorus, to undertake the revision of two apocryphal books, Tobit and Judith (see Hieron. *Praefat. in vers. libri Tob., in vers. libri Judith*), on the ground that they were extant in Chaldee. The work was executed hastily and carelessly. Upon his version of Judith he spent one night (*hinc unam lucubratiunculam dedi*), and treated Tobit in the same perfunctory way (*unius diei laborem arripui*). The text shows strange and arbitrary variations, for which the Chaldee can hardly be held accountable. He did not attempt to translate literally (*non ex verbo verbum transferens*), and the general result is that of an unsatisfactory paraphrase.

Besides the Books of Judith and Tobit, he introduced into his version a rendering of the Greek Additions to Esther and Daniel, which he took care to distinguish from the translation of the Hebrew text by the mark of an obelisk ("obelus + id est veru praenotavimus"). The Additions to Esther he did little more than paraphrase; but, in his rendering of the Additions to Daniel, he followed Theodotion's Version, and was more literal.

The Vulgate Version therefore contains four books of the Apocrypha (Tobit, Judith, Additions to Esther, Additions to Daniel), which represent Jerome's work. It has been a disputed point whether his revision is to be traced in any other books. Jerome himself says in his Preface to the Books of Solomon, "In the case of the Book which by many is entitled the Wisdom of Solomon, and in the case of Ecclesiasticus, which all know is the work of Jesus, the son of Sirach, I have withheld my pen, wishing to revise for you the canonical Scriptures only," which seems to put it beyond all doubt that Wisdom and Ecclesiasticus were left untouched by him; and if these two Books were excluded from his project, it is not likely that he would have paid attention to the other apocryphal writings. It is best, therefore, to explain the presence of a double Latin text in the Books of 1 Esdras, Baruch, and 1 and 2 Maccabees, not by Hieronymian revision, but by the existence of various (e.g. African, Italian, Gallican) recensions of the Old Latin, or by renderings of variant editions of the LXX. text (e.g. Hexaplar and Lucian).

The remaining apocryphal books of the Latin

Vulgate Bible belong in like manner to a recension of the Old Latin Version, while in most cases a second recension earlier or later of the Old Latin Version has also come down to us. Thus 1 Esdras is preserved not only by the Vulgate, but also, in a later revision, by the Codex Colbertinus, 3703; Baruch has two recensions of the Old Latin, one preserved in the Vulgate, another a later revision edited by Sabatier. The Vulgate has a later and more polished recension of the earlier Old Latin Version of 1 Macc., which is found in Codex Sangermanensis 15. An earlier recension of 2 Macc. than the Vulgate is given in Codex Ambrosianus E. 76.

The Book of Tobit has come down to us in two recensions of the Old Latin; a rougher and older one preserved in Codex Ambrosianus E. 76, the other a more polished revision of it in Vaticanus 7. The Book of Judith is preserved in the old Version in five MSS. given by Sabatier. The Additions to Esther appear in Codex Corbeiensis, and show a marked resemblance to the Lucianic revision of the LXX. given by Codd. 19, 93*, 108*. The Additions to Daniel are only fragmentally preserved in quotations as collected by Sabatier; like Jerome's rendering, they are based upon Theodotion's Version.

Wisdom and Ecclesiasticus are preserved in the Vulgate recension of the Old Latin.

The Third and Fourth Books of Maccabees do not appear in the Vulgate Bible, and are not extant in any ancient Latin Version. The Second Book of Esdras (not extant in the Greek) is preserved in an early recension of the Old Latin. The lacuna in the text of Codd. Sangermanensis, Turicensis, and Dresdensis was happily supplied by Bensly's discovery of the missing fragment in the Amiens Codex. Two other MSS. have since confirmed the restoration of the text. On the history of this discovery, see R. L. Bensly's "Missing Fragment."

The Syriac translation of the Apocrypha is also extant in two forms, (1) the Peshitto or Syriac Vulgate, (2) the Hexaplar.

(1) The Peshitto Syriac (given in Walton's *Polyglott*, and Lagarde's *Livr. Vet. Test. Apoc. Syriace*) contains Wisdom, the Epistle of Jeremy, Baruch, Additions to Daniel, Judith, Ecclesiasticus, Apocalypse of Baruch, 2 Esdras, 1, 2, 3, 4, 5 Macc. (4 Macc. being the history of Eleazar and Samana, 5 Macc. the so-called 6th Book of Josephus' *De Bell. Jud.*).

(2) The Hexaplar Syriac, or Origen's Hexaplar Version of the LXX. translated into Syriac, is of the highest value for the determination of the text. The greater portion is preserved in the Codex Syro-Hexaplaris Ambrosianus (C. 313 inf.; cent. viii.) at Milan, which contains Wisdom, Ecclesiasticus, Baruch, the Epistle of Jeremy, and the Additions to Daniel. There is good reason to suppose that the Version included also 1 Esdras, Tobit, Judith, Additions to Esther, 1, 2, 3 Macc., and the Prayer of Manasse.

There exist also Arabic, Ethiopic, and Coptic Versions based upon the LXX. of which the full value has not yet been ascertained. [See art. **VERSION.**]

Two Hebrew Versions of the Book of Tobit were edited in comparatively recent times: that of Paul Fagius, Constantinople, 1517; and

that of Sebastian Münster, Basle, 1542. The old Chaldee Version of Tobit, edited by Neubauer (Book of Tobit, Oxf. 1878), has been a discovery of great interest and importance.

A good critical edition of the text of the books of the Apocrypha is still much needed. Special difficulties are presented by the number of interpolations (particularly in Ecclesiasticus) which have found their way into the text, and by the rival texts, of which we have extant specimens in Tobit, Judith, and the Additions to Esther.

The English Version.—The choice of books admitted into the Apocrypha of the English Version was apparently determined by the contents of the ordinary MSS. of the Vulgate. Hence 2 Esdras was included, although it was not extant in the Greek; and on the other hand 3 Maccabees was excluded. The Prayer of Manasse, omitted by Coverdale, was inserted in Matthew's Bible, and, though again omitted in the Geneva Bible, has retained its place in all the authoritative revisions. The plan of translating the Apocrypha from the Greek Version, where possible, instead of from the Vulgate, was first adopted in the Geneva Bible (1560), and was followed in the subsequent English translations. The translators of the Authorized Version of 1611 depended for their text upon the Complutensian Polyglot (1517), the Aldine edition of the LXX. (1518), and Junius' Latin translation (which he made for his father-in-law Tremellius, 1589). No systematic investigation of the text was made, but changes of reading were sporadically introduced. Many purely Latin readings were permitted to remain.

A fresh revision of the Apocrypha is in course of preparation, as part of the Revised Version of the Bible.

VI. Literature.—For editions of the text see under art. SEPTUAGINT. The most useful separate edition of the books of the Apocrypha is that of O. F. Fritzsche, *Libri Apocryphi Veteris Testamenti Græce* (Lipsiæ, 1871), whose text is followed in this article; but unfortunately the collation of the Vatican MS. is not complete, and the readings copied from Holmes and Parsons cannot always be relied upon for accuracy, while the evidence of Versions and quotations is comparatively speaking neglected. The separate edition of Apel (Lips. 1837) deserves notice as having been the most serviceable until that of Fritzsche appeared.

The best modern commentary upon the books of the Apocrypha is Grimm and Fritzsche's *Handbuch* (3 vols., Leipzig, 1851–1860), containing a minute and searching investigation into almost every verse, and careful *prolegomena* of each book. In English, Bisell's *Apocrypha of the Old Testament*, in Lange's *Commentaries* (T. T. Clark & Son, Edinburgh), which is largely indebted to the German work, is a helpful contribution to the exegesis of the books. A popular commentary has been brought out by the S. P. C. K. Older Commentaries are by Cornelius a Lapide, Antwerp, 1664; Grotius, Paris, 1644; Arnold, London, 1744. An edition for English readers, containing all "the additional matter found in the Vulgate and other ancient Versions," is supplied by Churton's *Uncanonical and Apo-*

crystal Scriptures (Whitaker: London, 1884), which also contains a useful, concise introduction to the whole collection, and to the several books. Wahl's *Clavis* is a valuable lexicon to the Apocrypha, though far from accurate or complete; Schleusner's *Lexicon* is a storehouse of good materials for the language; Trimmius's *Concordance* is indispensable, but sadly defective. Winer's *Grammar of N. T. Greek* (Moulton's edition) is also of great service.

The substance of this article was written some time before the appearance of the *Speaker's Commentary on "The Apocrypha,"* 2 vols. (Murray, London, 1888). Although the treatment of the various books is somewhat unequal, this work must be welcomed as by far the most important investigation of the Apocrypha that has ever appeared in the English language. It opens with a masterly "General Introduction" from the pen of Dr. Salmon.

Schürer's *Geschichte des Jüdischen Volkes in Zeitalter Jesu Christi* (Leipzig, 1886) contains most valuable assistance for the study of Jewish apocryphal literature.

Of other books which have been consulted for the purposes of this article, the following require more especial notice:—

Herzog-Plitt's *Real-Encyclopædie*; Hamburger's *Real-Encyclopædie für Bibel u. Talmud*; Smith's *Bible Dict.* (ed. 1); *Einleitungen*, by Eichhorn, Bertholdt, De Wette-Schrader (1871), Bleek (ed. Wellhausen, 1886), Kaulen; Zöckler's *Handbuch*; *Histories of Israel*, by Ewald, Grätz, Herzfeld, Reuss; Hody, *De Textibus*; Westcott's *Hist. of the Canon, History of the English Bible, Introduction to the Study of the Gospels*; Charteris, *Canonicity*; Reuss, *History of the Canon*; Wordsworth, *On Inspiration*; Cosin, *On the Canon*; Prideaux's *Connexion*; Fürst, *Kanon d. A. T.*, 1868; Bloch, *Studien zur Geschichte der Sammlung der Althebr. Lit.* 1876; Nöldeke, *Jüdische Literatur*, 1878; Hansrath, *N. T. Zeitgeschichte*; Drummond, *Jewish Messiah*; Edersheim, *Life and Times of Jesus the Messiah*; Taylor, *Sayings of the Jewish Fathers*. [H. E. R.]

APOLLONIA (Ἀπολλωνία), a city of Macedonia, through which Paul and Silas passed on their way from Philippi and Amphipolis to Thessalonica (Acts xvii. 1). It was in the district of Mygdonia (Plin. iv. 10, s. 17), and according to the *Antonine Itinerary* was distant 30 Roman miles from Amphipolis and 37 Roman miles from Thessalonica (Conybeare and Howson, *The Life and Epistles of St. Paul*, i. p. 340, 4th ed.). In other authorities (e.g. the Peutinger Table and the Jerusalem Itinerary) there is a slight difference. The city is to be placed somewhere on the Via Egnatia, where that road crosses from the gulf of the Strymon to that of Thessalonica, but its exact site has not been ascertained. A little village, *Pollonia*, south of Lake Bechik (the Bolbe of Aesch. Pers. 490), possibly perpetuates the ancient name. Others prefer *Klisali*, a post station seven hours from *Saloniki*. This city must not be confounded with the more celebrated Apollonia in Illyria. See *Dict. of Anc. Geography* and Murray's *Idbk. of Greece*, s. n. [F.]

APOLLONIUS (Ἀπολλώνιος). 1. The son of Thraseas, governor of Coele-Syria and Phoenice, under SELEUCUS IV. PHILOPATOR, B.C. 187 sq.,

a bitter enemy of the Jews (2 Macc. iv. 4), who urged the king, at the instigation of Simon the commander (*στρατηγός*) of the Temple, to plunder the Temple at Jerusalem (2 Macc. iii. 5 ff.). The writer of the Declaration on the Maccabees, printed among the works of Josephus, relates of Apollonius the circumstances which are commonly referred to his emissary Heliodorus (*De Macc.* 4; cp. 2 Macc. iii. 7 sq.).

2. An officer of Antiochus Epiphanes, governor of Samaria (Joseph. *Ant.* xii. 5, § 5; 7, § 1), who led out a large force against Judas Maccabaeus, but was defeated and slain B.C. 166 (1 Macc. iii. 10-12; Joseph. *Ant.* xii. 7, § 1). He is probably the same person who was chief commissioner of the revenue of Judaea (*ἑρχων φορολογίας*, 1 Macc. i. 29; cp. 2 Macc. v. 24), who spoiled Jerusalem, taking advantage of the Sabbath (2 Macc. v. 24-26), and occupied a fortified position there (B.C. 168; 1 Macc. i. 30 sq.).

3. The son of Menestheus (possibly identical with the former), an envoy commissioned (B.C. 173) by Antiochus Epiphanes to congratulate Ptolemaeus Philometor on his being enthroned (2 Macc. iv. 21). An ambassador of the same name was at the head of the embassy which Antiochus sent to Rome (Liv. xlii. 6).

4. The son of Gennaueus (*δ τοῦ Γενναίου*: it seems impossible that this can be *des edlen Apoll. Sohn*, Luth.), a Syrian general under Antiochus V. Eupator, c. B.C. 163 (2 Macc. xii. 2).

5. THE DAIAN (*Δάος*, Joseph. *Ant.* xiii. 4, § 3, i.e. one of the Dahae or Dai, a people of Sogdiana), a governor of Coele-Syria (*τὴν ὄντα ἐπὶ κ. κ.*, 1 Macc. x. 69) under Alexander Balas, who embraced the cause of his rival Demetrius Nicator, and was appointed by him to a chief command (1 Macc. i. c. *κατέστησε*, Vulg. *constituit ducem*). If he were the same as the Apollonius whom Polybius mentions as foster-brother and confidant of Demetrius I. (probably a son of 3, *δυοῖν ὑπαρχόντων ἀδελφοῖν, Μελέδρου καὶ Μενεσθέως*, Polyb. xxxi. 21, § 2), his conduct is easily intelligible. Apollonius raised a large force and attacked Jonathan, the ally of Alexander, but was entirely defeated by him (B.C. 147) near Azotus (1 Macc. x. 70 sq.). Josephus (*Ant.* xiii. 4, § 3 sq.) represents Apollonius as the general of Alexander at the time of his defeat; but this statement, though it has found advocates (Wernsdorf, *de fide libr. Macc.* p. 135, yet doubtfully), appears to be untenable on internal grounds. Cp. Grimm and *Speaker's Commentary* on 1 Macc. x. 69. [B. F. W.]

APOLLOPH'ANES (*Ἀπολλοφάνης*; *Apollorphanes*), a Syrian, killed by Judas Maccabaeus (2 Macc. x. 37). [G.]

APOLLOS (*Ἀπολλῶς*, shortened form of *Ἀπολλώνιος*, which is the reading of Cod. D, Acts xviii. 24; *Apollon*).

Setting aside as an open question the conjecture that Apollos wrote the Epistle to the Hebrews [HEBREWS, EPISTLE TO THE], we have two principal sources of information concerning him: (1) Acts xviii. 24-28, and (2) scattered notices in 1 Cor. From the former we learn that he was an Alexandrian Jew, who came to Ephesus between St. Paul's first and second visits. (For the probable influence of his native city upon his studies and faith, see ALEXANDRIA.) He is described as *ἀνὴρ λόγιος*. There is no doubt

that in later Greek (e.g. Plutarch, *Pompeius*, 51) this word meant "eloquent," but the earlier and more frequent sense of "learned" is fully as suitable in this instance. He had already been instructed in the way of the Lord, and began at once to teach the things concerning Jesus (so R. V.; *Ἰησοῦ*, not *Κυρίου*, is undoubtedly the true reading), so that it cannot be alleged that his teaching was only concerned with Messianic hopes which he did not know to be fulfilled. But he knew only the baptism of John. The essential differences between the baptism of John and Christian Baptism appear to be that the former was not (like the latter, Acts ii. 38) a baptism in the name of Jesus, nor was it accompanied by the gift of the Holy Spirit. Apollos' ignorance of this higher Baptism implies not merely that he had not personally received it, but that he had not learnt the kind of faith in Jesus which such Baptism implies. Probably, while accepting Him as the Messiah, he had very inadequate conceptions of His person and work (Acts xviii. 26). Further he was probably not aware of the gift of the Holy Spirit bestowed on the baptized. The case of the twelve Ephesian disciples which follows immediately (Acts xix. 1-7) must be taken in close connexion with the account of Apollos. Either they were disciples of Apollos, or they were at any rate in much the same position. That their Baptism is mentioned, and not that of Apollos, seems to be due to the fact that they only were at Ephesus when St. Paul came back, and therefore they only at that time received the gift of the Spirit after their Baptism, which is the point of the narrative. We are not to conclude with Ewald (*Geschichte des N. T.* vi. 474) that there could be no question of baptizing again such a man as Apollos. "Fervent in spirit" (cp. Rom. xii. 11) does not imply the possession of the distinct and, at that time, unmistakable gifts of the Holy Spirit. His addresses in the synagogue attracted the notice of Priscilla and Aquila [AQUILA]. When more fully instructed, he desired a new field of work, and would naturally be directed by his instructors to their old home, Corinth, the capital of Achaia. Thither he went with commendatory letters. It is instructive to compare the departure of Apollos, not an Apostle, to his work, with the mission of the Apostles Barnabas and Saul (Acts xiii. 1-3). Here we have Apollos setting out by his own wish (*βουλόμενος*), and the brethren are merely described as encouraging him (*προτρέψαντες*). His success at Corinth was great, especially in controversy with the Jews. His activity was not confined to the synagogue or private houses, but, like St. Paul, he spoke in public (*δημοσίᾳ*; cp. Acts x. 20).

We now take up the second but earlier source of information (1 Cor.), written after Apollos had returned to Ephesus. Here we find that a party had formed at Corinth which took the name of Apollos (1 Cor. i. 12); that Apollos had watered what St. Paul had planted (1 Cor. iii. 6); that St. Paul had wished Apollos to go to Corinth, but had been refused (1 Cor. xvi. 12). These are the facts stated, but further inferences can be drawn from the first four chapters. Exaggerated statements with regard to the Corinthian parties (for a good summary of views see Schenkel, *Bibel-Lex.* art. *Korintherbriefe*) must not drive us into the other extreme of

denying the existence of real divisions under definite names. The fact of an Apollos party does not inculpate Apollos in its formation. In chapters i.-iv. St. Paul is mainly dealing with just such a form of opposition as might have been expected to develop itself from an exaggeration of the views and methods of a learned Alexandrian Christian. Without adopting the absurd suggestion of a paronomasia in i. 19, it seems difficult to deny that the presumable methods of Apollos, exactly a contemporary and a fellow-citizen of Philo, would encourage the Corinthians to desire that *σοφία λόγου* which St. Paul so emphatically disclaims, contrasting it with his own preaching of an objective Christ. "Christ sent me not to baptize, but to preach the Gospel: not in wisdom of words, lest the Cross of Christ should be made void" (1 Cor. i. 17). Some have gone further, and have seen in the verse a rebuke of such a disproportionate view of the place of Baptism in evangelistic work as would be natural in a mere disciple of the Baptist. Whatever occasion Apollos may have involuntarily given to error and party-spirit in the Church, which he had "helped much through grace," we know distinctly that he stood aloof from those who claimed his name, and was entirely trusted by St. Paul. St. Paul "brought" Apollos "much" to join the mission which was to go to Corinth for the good of the Church. The request was worthy of St. Paul's generous and discriminating wisdom, but it was refused by Apollos with self-denying prudence; "It was not at all his will to come now" (1 Cor. xvi. 12). It is easy to guess that he feared that his presence might stimulate party-feeling instead of allaying it. Once again his name meets us in Tit. iii. 13. He is in Crete with Titus, and the latter is charged to send him on his way with necessary provision.

On the whole we may conclude that the appearance of Apollos formed a crisis in the history of the Church, which was mercifully brought to a good issue. First the spread of a rudimentary faith and an imperfect baptism is prevented by the agency of Priscilla and Aquila, and secondly the growth of an unsubstantial allegorising Christianity is checked by St. Paul himself, without losing the loyalty of the brilliant teacher who had occasioned it. Nothing is known of the later history of Apollos. Tradition makes him bishop of Caesarea (*Ménol. Græc. Basil.* ii. 17).

See Neander, *Planting and Training*, Bk. III. c. vii.; Conybeare and Howson, vol. ii. c. xiv.; Apollos in Schenkel's *Bibel-Lex.* [E. R. B.]

APOLL'YON (Ἀπολλών; *Apollyon*), or, as it is literally in the margin of the A. V. and R. V. of Rev. ix. 11, "a destroyer," is the rendering of the Hebrew word ABADDON, "the angel of the bottomless pit." The Vulgate adds, "Latine habens nomen Exterminans." The Hebrew term is really abstract, and signifies "destruction" in which sense it occurs in Job xvi. 6, xxviii. 22; Prov. xv. 11, and other passages. The angel Apollyon is further described as the king of the locusts which rose from the smoke of the bottomless pit at the sounding of the fifth trumpet. From the occurrence of the word in Ps. lxxviii. 11, the Rabbis have made Abaddon the nethermost of

the two regions into which they divided the under world. But that in Rev. ix. 11 (see *Speaker's Commentary*, note) Abaddon is an angel, and not an abyss, is perfectly evident in the Greek. There is no authority for connecting it with the destroyer alluded to in 1 Cor. x. 10; and the explanation, quoted by Bengel, that the name is given in Hebrew and Greek, to show that the locusts would be destructive alike to Jew and Gentile, is farfetched and unnecessary. The Semitic etymology of Asmodeus, the king of the demons in Jewish mythology, seems to point to a connexion with Apollyon, in his character as "the destroyer," or the destroying angel. See also Wisd. xviii. 22, 25. [ASMODEUS.] [W. A. W.] [F.]

APOSTLE (ἀπόστολος, *apostolos*). It will be convenient to divide this article into (I.) a discussion of the term and its usage; (II.) a brief account of the apostolic college.

I. (1) *Usage outside the N. T.*—The Greek word from which the Latin and English forms come is an adjective derived from ἀποστέλλω, and means "sent," but "sent with a commission to act," delegated. As ἀποστέλλω means more than πέμπω (Westcott, *Gospel of St. John*, xx. add. note), so ἀπόστολος is more than ἄγγελος. In classical Greek ἀπόστολος accidentally became limited to a special meaning, "a naval expedition," and so gives no help for the sense of "Apostle" in the N. T. But passages quoted by Bp. Lightfoot (*Galatians* i. detached note) show that the word ἀπόστολος was in use among the Jews to designate persons "despatched from Jerusalem by the rulers of the race on any foreign mission, especially such as were charged with collecting the tribute paid to the Temple service."

(2) *Usage in the N. T.*—The sense in which the word is used in the N. T. has, with one exception to be mentioned below (c), no connexion with either of the special usages above mentioned, and is drawn simply from the etymology of the word, whether πᾶσι or ἀποστόλος. It will be evident that the use of ἀποστέλλω, as well as that of ἀπόστολος, must be kept in view throughout the inquiry. Three uses may be distinguished by having regard to the Person or Persons by whom the "Apostle" is commissioned. (a) Sent by the Father. In this view Christ Himself is an Apostle (Heb. iii. 1; cp. Luke iv. 43, John xvii. 18). And in Luke xi. 49 the term is apparently applied to God's human messengers sent before the Incarnation. (b) Sent by Christ, either directly or through the agency of the Spirit. This is the application which we have to discuss. (c) Sent by men, as were the brethren mentioned in 2 Cor. viii. 23, and there described as ἀπόστολοι ἐκκλησιῶν, "apostles or delegates of the Churches." Again, Epaphroditus is called δὲ μὲν ἀπόστολον, "your delegate" (Phil. ii. 25), as being the bearer of the contributions of the Philippian. Probably Andronicus and Junias, who are described (Rom. xvi. 7; R. V.) as being ἐπίσημοι ἐν τοῖς ἀποστόλοις, "of note among the apostles," were also apostles in this sense, i.e. delegates of a Christian Church, though other explanations are admissible. On the whole it would appear that this sense of the word may have been borrowed from the Jewish usage

mentioned above, as both the Jewish and Christian delegates were occupied with the care of contributions. The account given by Philo (*de Monarchia*, ii. 3) of the selection by merit of the most approved persons to carry the contributions of the Dispersion to Jerusalem, shows that this system was before St. Paul's mind in his institution of messengers (*ἀπόστολοι*) of the Churches to take charge of the alms (see 2 Cor. viii. 18-23).

We may now dismiss (a) and (c), and confine our attention to (b) Apostles sent by Christ. The usage of the title with regard to these persons is not uniform in N. T. authors. With St. Luke it is in frequent use, in the Acts almost exclusively, and in his Gospel concurrently with *οἱ μαθηταί* (the disciples) and *οἱ δώδεκα* (the twelve). As might be expected, the usage of St. Paul's Epistles agrees with that of St. Luke. On the other hand, St. John never employs *ἀπόστολοι* (the Apostles) as the title of the Twelve, but describes them as "the disciples." Between these two extremes stand the Gospels of St. Matthew and St. Mark. Each of these uses the term "the Apostles" once only: St. Matthew at the moment of their first mission, and St. Mark at its close. In both cases it is plain that the use of the substantive *ἀπόστολοι* is in close connexion with the use of the verb *ἀποστέλλω*, and with the fact of the mission. The divergence of usage noticed above may perhaps be explained as follows. The name of "Apostles" was conferred on the twelve disciples by Jesus Himself (Luke vi. 13), with immediate reference to their first mission, and also with a view to their ultimate work. It did not come into prominence until, after the Ascension, their calling as disciples gave way to their work as missionaries. St. Luke's use of the name "Apostles" in his Gospel is due to the usage of the time in which he wrote, and is not rigidly accurate. But in the period covered by the Acts this name had become the recognised title of the Twelve. It was thus that the Church avoided the inconvenience of a merely numerical designation, which was liable at any time to become incorrect by the death of members of the college. The title "the disciples" had of course become too general to be sufficiently definite, although St. John, writing much later, adheres to it for the sake of historical exactness. But it was not long before circumstances showed that the title thus substituted for "the Twelve" was not equivalent, but had a wider range. The Twelve were the antitypes of the twelve patriarchs, and the spiritual progenitors of the new Israel (see Matt. xix. 28; Luke xxii. 30; Rev. xxi. 12, cp. v. 14). But the Gentile world was included in the Gospel, and also needed its Apostles. Notwithstanding their commission to "all the nations" (Matt. xxviii. 19), the Twelve act as if only conscious of an apostleship to the Jews, though of course this appearance may be due to our lack of information. It was therefore absolutely necessary that other apostles should be appointed who were not of the Twelve. Two of the prophets and teachers of Antioch, Barnabas and Saul, were separated and sent forth by express direction of the Holy Spirit (Acts xiii. 1-3). Henceforth they are both called Apostles (Acts xiv. 4, 14; 1 Cor. ix. 5, 6). More doubtfully, but probably, Silvanus or Silas is also

included by St. Paul among "the Apostles of Christ" (1 Thess. ii. 6; and perhaps 1 Cor. iv. 9). A distinct apostolate of or to the Gentiles, of which St. Paul is a member, is affirmed by him in Rom. xi. 13 and (by implication) in Gal. ii. 9. We have then two opposite tendencies at work, one tending to appropriate and limit the wider name "Apostles" to the Twelve, against which St. Paul vigorously protests by his constant claim of the title. On the other hand, out of this protest of St. Paul, and out of the increasing importance of the Gentile Church, arises a second tendency, just discernible in the N. T., to include in the apostolate all duly authorised missionary teachers. The evidence for this wider significance lies in 2 Cor. xi. 13 and Rev. ii. 2, which prove that the limits of the apostolate were not so definite as to prevent interlopers claiming to belong to it. The question who these interlopers were, and what is the meaning of "the very chiefest Apostles" (2 Cor. xi. 5; xii. 11), belongs to the exegesis of 2 Cor. and requires fuller discussion than can be given here (see *Speaker's Commentary* in locis). It is probable, as Seuffert (*Ursprung des Apostolates*) maintains, that the strife whether St. Paul was an Apostle or not, to which 2 Cor. testifies, may have tended to define and enhance the office of the apostolate in the eyes of the Church. Seuffert's view, however, goes a great way beyond this. According to him, the apostolate as a corporate institution is not to be explained as an appointment of Christ Himself, but simply as a defensive reaction in Jerusalem against St. Paul's free work among the heathen. And on the other hand it was St. Paul who, by defending his right to belong to the apostolate, exalted and stereotyped the later and narrower conception of the office which had originated with his opponents.

(3) *Usage in later authors.*—The *Teaching of the Twelve Apostles* (see *Dict. of Christian Biog.* s. n. "Teaching" &c.), dating probably from the beginning of the 2nd century, shows the tendency to extend the term "Apostle" much more fully developed (*Teaching*, xi. 3-6). Harnack goes so far as to say that its language puts an end to the fable which has until now prevailed with respect to the signification of the word "Apostle" in the earliest times (*Lehre der zwölf App.* Harnack, p. 115). It is at any rate clear from the passage referred to (xi. 3-6) that early in the 2nd century there were travelling teachers known as "apostles," and ranking as such above "prophets," who were entirely distinct from the administrative officers of the Church, such as Bishops and Deacons. But it must be noted that the very document which gives us this evidence, witnesses by its title to the special character attributed in the Church to the apostolate of the Twelve, growing in significance, and co-existing with the laxer use of the name "apostle." The patristic usage does not come within the scope of this article, but the following summary of the evidence given by Bishop Lightfoot, *Gal.*,^a pp. 99, 100, may be added as confirmatory of the views stated above:—"At an early date we find the title applied to the Seventy, without however placing them on the same level with the Twelve. This application occurs even in Irenaeus (ii. 21, 1) and Tertullian (*ado. Marc.* iv. 24). About the same time

Clem. Alex. not only calls Barnabas 'an apostle,' but confers the title on Clement of Rome also. Origen (in *Joann.* tom. iv. p. 430, ed. Delarue) discusses the term as capable of a very wide application; and Eusebius, *H. E.* i. 12, accounting for St. Paul's expression (1 Cor. xv. 7), speaks of numberless apostles besides the Twelve."

II. Having thus attempted to deal with the usage and connotation of the name, we must give a brief account of the collective history of the Apostles, including the apostolic commission and privileges, and the work of the apostolate in the development of the Church. The history of the men themselves must be sought under their several names. Our concern will be with the college as a whole, its training and its activity.

(1) *Training.*—The call of the individuals, their selection as a body, and their mission to preach and heal, must be regarded as separate events. The call of the individuals will be omitted here, as belonging to their personal histories. The choice of the Twelve as a body, according to the narrative of St. Luke (vi. 12 sq.), was made by Jesus Himself after a night of prayer, and was followed by the Sermon on the Mount. The mission did not take place immediately (Luke ix. 1 sq.; Mark vi. 7 sq.). For the mission was not the only or immediate object of the choice, as we learn clearly from St. Mark, who places the "being with Jesus" as His first aim in choosing them, and their mission to preach as the second. St. Matthew does not record the choice, but only their summons to receive a charge before going forth. The very words used seem to imply that the Twelve had been previously set apart (Matt. x. 1). A main object of their mission was to "preach the kingdom of God" (Luke ix. 2), and for this they had been prepared by our Lord's parables of the kingdom, delivered for the most part to the multitude, but privately interpreted to the Apostles. They had received an esoteric teaching, which was nevertheless not properly esoteric, for it was only hidden that it might afterwards be made known, and those to whom it was addressed were not selected as intellectually capable of advanced teaching, but, so far as mental gifts went, were samples of the average intelligence of the nation. They were armed for their mission with supernatural gifts and protection, and to emphasise these were forbidden to make the commonest provision for the journey. No details are given of the events of their mission. It cannot be doubted that its object was much more the preparation of the Apostles for their subsequent employment (cp. Luke xxii. 35, 36) than any immediate result. The next point of importance is the confession of St. Peter at Caesarea Philippi (Matt. xvi. 13, and parall.). Their recognition of their Master as the Messiah was followed by the announcement of His coming sufferings, and by the seal of His Messiahship afforded by the Transfiguration. Taken together, these events imply a great advance in the training, though even till the last days (Luke xviii. 31-34) the reality of the Passion was very imperfectly apprehended by them. The next step is marked by the Last Discourses recorded by St. John only (John xiii.-xvi.), which have well been called the Self-revelation of Jesus to His disciples. The Resur-

rection and the conversations of the great forty days form another stage. Then follows the day of Pentecost, which crowns their slowly acquired faith and knowledge with new and instantaneous gifts. And the last step is reached when St. Peter's account of his mission to Cornelius silenced Judaic objectors, and they "glorified God, saying, Then to the Gentiles also hath God granted repentance unto life" (Acts xi. 18).

(2) *The active work of the college dates of course from their first mission, and runs parallel with their training.* Neither the gift of the Spirit bestowed by the risen Lord (John xx. 22), nor that given by the ascended Lord (Acts ii.), are to be understood as confined to the Apostles. But the narrative of the Acts shows them as taking the lead in the most decisive way. It is they who preach (Acts ii. 14), who work miracles (v. 12), who withstand opposition (v. 29), who receive the contributions of believers (iv. 35), who establish a new ministry and consecrate those who are to fulfil it (vi. 2 sq.). They remain in Jerusalem when the rest of the Church is scattered after the death of St. Stephen (viii. 1). They, with the brethren, receive St. Peter's report of the conversion of Cornelius (Acts xi. 1), and as a natural consequence dispatch Barnabas on his mission to Antioch (xi. 22). Now comes a new epoch. The lost history of Apollonius, quoted by Euseb. *H. E.* v. 18, preserves the tradition that "the Saviour had commanded His Apostles not to depart from Jerusalem for twelve years." This period would be complete about the time of the martyrdom of James the brother of John, and the persecution which accompanied it. A withdrawal of the remaining Apostles from Jerusalem at this time would fall in with indications in the narrative, especially with the prominence into which the elders (of *ἡγεμόνες*) advance, who have not hitherto been heard of in the Church. To the elders are brought the alms from Antioch (xi. 30). The Apostles and elders receive Paul and Barnabas (xv. 2, 4), and "are gathered together to consider of this matter" (xv. 6). In xxi. 18, we have reached a further stage. The elders are no longer merely associated with the Apostles as the governing body of the Church of Jerusalem, but altogether take their place under the presidency of James. On the important question of the relation of James to the apostolic college, and his position at Jerusalem, we must refer to another article [JAMES THE SON OF ALPHEUS].

Apostolic commission and privileges.—The original commission of the Twelve has already been noticed, but we have also two instances of supplementary appointments. (a) The choice of Matthias to fill the place of Judas (Acts i. 15-26) is regarded as made by the Lord Himself, the lot being only His instrument (v. 24). The office of the Twelve is here (v. 25) definitely described as *ἀποστολή* (mission or apostleship), and not only as *διακονία* (ministry). A qualification is required: namely, membership of the band who had followed Jesus in His ministry from the very beginning (v. 21). And a new feature is added to the work, that of witnessing to the Resurrection of the Lord (v. 22). (b) The appointment of Barnabas and Saul (Acts xiii. 1-3) has fresh features. The initiative is given by the direct prompting of the Holy Spirit.

There is no mention of a vacancy to be filled up, but the commission is given with a view to the work to be done. It is accompanied with fasting, prayer, and imposition of hands. The event is not distinctly described as an admission to the apostolate, but the two have not gone far on their journey before they are spoken of as Apostles (xiv. 4). It is instructive to compare with this narrative the mission of Apollos to Corinth (xviii. 27). Here is no apostleship. He went "when he was minded," and the brethren merely "encouraged" him. Contrast with this "they being sent forth by the Holy Ghost" (xiii. 4). This mission by the Holy Ghost is the fulfilment of the Lord's promise to Paul, "I will send thee forth (ἐξαποστείλω) far hence unto the Gentiles" (Acts xxii. 21).

The essential mark of an Apostle was the commission from Jesus Himself, or from the express direction of His Spirit. But St. Paul appears to imply (1 Cor. ix. 1) that having seen the Lord was also requisite. This must mean the Risen Lord, and, so understood, accords exactly with St. Peter's definition, "a witness with us of His Resurrection" (Acts i. 22). The prominence given to the subject by St. Paul in his preaching shows that he regarded this as a main part of his apostolic duty. Other marks of an Apostle were the power to communicate the gift of the Spirit (Acts viii. 17; xix. 6); to perform miracles (Matt. x. 1; 2 Cor. xii. 12); and to win converts (1 Cor. ix. 1). The first of these seems to have been an exclusive characteristic. When given mediately by human agents, the Apostles were the agents. De Wette (*Apostelgeschichte*, p. 123) forcibly insists on this point, but of course with his usual object of discrediting the narrative. In one case it is distinctly stated that the appointment of elders was made by Apostles, namely by Paul and Barnabas, Acts xiv. 23; but in Tit. i. 5 the same function is delegated to Titus. A marked privilege of an Apostle, though extended in the Pastoral Epistles to elders, was sustentation by the Church. This privilege was no doubt based on the terms of the original commission, Matt. x. 10. It is fully stated by St. Paul in 1 Cor. ix., but only that he may renounce the use of it. We gather that his self-denial was represented by his opponents as a flaw in his claim to the apostolate.

Work of the apostolate in the development of the Church.—Both St. John and St. Paul take up the symbolic language of our Lord to St. Peter (Matt. xvi. 18), and use it to set forth the relation of the Church to the collective apostolate (Rev. xxi. 14; Eph. ii. 20). The Church was built on the testimony of the Apostles, and its organisation was determined by them. But beyond this, two points may be noticed to which St. Luke specially calls attention. It depended on the Apostles for its unity in doctrine and in fellowship. "They continued stedfastly in the Apostles' teaching and fellowship" (Acts ii. 42). There was a "teaching" of the Apostles. During their long stay at Jerusalem, and in the course of their work there, it is probable that that common oral Gospel took shape which preceded the written narrative of the Synoptists (Westcott, *Introd. Study of Gospels*, iii.). The collective action of the Apostles prevented inaccurate and divergent

views of our Lord's life and work from obtaining currency in the Church. (On the essential unity of apostolic teaching, see Neander, *Pflanzung und Leitung*.) There was also a "fellowship" of the Apostles. They formed a personal centre to which all Christians and all congregations of Christians attached themselves. The Church was apostolic first and catholic afterwards. Not only the college but the individual Apostles secured this unity by their action. A common relation to St. Paul was the outward link of unity between the Churches which acknowledged him as their founder. And the important body of apostolic delegates, such as Timothy and Titus (Rothe, *Anfänge Chr. Kirche*, § 36), were subordinate links of unity.

In conclusion, it should be observed that a fundamental difficulty besets the question of the nature of the apostolate. Our knowledge of its authority and activity is derived in great measure from one instance only, that of St. Paul. Certain things were done by St. Paul, and in virtue, as he constantly asserts, of his apostolic office; but this scarcely enables us to generalise with regard to the other Apostles. The office was of Divine appointment and carried recognised rights, but its signification depended on the man who exercised it and the special gifts imparted to him. We cannot suppose that the unrecorded lives of apostles barely known by name would show an activity like that of the Apostle of the Gentiles, though such a belief probably contributed to the composition of the fictions known as *Acta Apostolorum Apocrypha* (ed. Tischendorf; cp. R. A. Lipsius, *Die Apokryphen Apostelgeschichten u. Apostellegenden*). St. Paul's own words are no empty boast, "I laboured more abundantly than they all: yet not I, but the grace of God which was with me" (1 Cor. xv. 10).

On the name and office of an apostle see Bishop Lightfoot, *Galatians*, detached note, which has been freely used in this article; also Harnack, *Lehre der Zwölf App.*, pp. 111-118. For the history of the Apostles and their work, see especially Neander, *Pflanzung und Leitung* (*Planting of the Christian Church*, Bohn's transl.), *passim*. Dr. A. B. Bruce, *Training of the Twelve*, is lengthy but useful. Rothe, *Anfänge Chr. Kirche*, § 36, should be referred to. Seuffert's *Der Ursprung und die Bedeutung des Apostolates* is worth reading, but its extravagant paradoxes are based on the assumption that the evidence of the Gospels and Acts on the subject deserves no confidence: Harnack's criticism (*Theol. Literaturzeitung*, 1887, No. 20) should be read with the book. Weiszäcker, *Das Apostolische Zeitalter*, pp. 606-613, is more cautious. The literature of the subject is scanty. [E. R. B.]

APOTHECARIES. In Neh. iii. 8, Hananiah, one of the repairers of the wall of Jerusalem, is described as "the son of one of the apothecaries" (בֶּן דִּרְקָחִים, R. V. marg. "perfumers"; cp. the fem. in 1 Sam. viii. 13. The "son of" indicates membership in a guild; cp. בֶּן הַגִּבִּי'אִים. The LXX., arguing from the analogy of the other names, took the word for a proper name, and reads A. Πικελῶ, B. Ἰωαννῆς; Vulg. *filius pigmentarii*. The marg. rendering of R. V. is that adopted by all moderns. [S. R. D.]

APPALM (D'EN, *the nostrils*; A. Ἀφφίμ, B. Ἐφφίμ; *Apphaim*), son of Nadab, and descended from Jerahmeel, the founder of an important family of the tribe of Judah (1 Ch. ii. 30, 31). The succession fell to him, as his elder brother died without issue. [W. A. W.] [F.]

APPEAL. In the patriarchal times, appeal would lie to the head of a family, and (if necessary) to the yet higher authority of the patriarch or head of the tribe, from whose decision there would be no appeal. This was the practice of a nomadic people. It is illustrated in the case of Tamar. Appeal was made to Judah as the head of the family, and he gave his decision (Gen. xxxviii. 24). Had Tamar failed in her appeal to his sense of justice (ca. 14, 26), the matter would in all probability have been tried before Jacob, as the head of the tribe. During the period of the bondage in Egypt "the elders of Israel" (Ex. iii. 16, 18, iv. 29, xii. 21) were the recognised authorities, and it remained only for Moses to elaborate—under the guidance of Jehovah—a scheme ancestral and acceptable (Num. xi. 16, 24; cp. Ex. xviii. 13–26). In this scheme the principle of appeal will be seen to have a recognised place. A central court was established under the presidency of the judge or ruler for the time being, before which all cases too difficult for the local courts were to be tried (Deut. xvii. 8, 9; xix. 16). Winer, indeed, infers from Josephus (*Ant.* iv. 8, § 14, ἀναγκαστικῶν, *ac. of duress*) that this was not a proper court of appeal, the local judges and not the litigants being, according to the above language, the appellants; but these words, taken in connexion with a former passage in the same chapter (cf. τῶν . . . τῶν ἀρχῶν ἀποφάσεις), may be regarded simply in the light of a general direction. According to the above regulation, the appeal lay in the time of the Judges to the judge (Judg. iv. 5; cp. 1 Sam. viii. 4, 5), and under the monarchy to the king, who appears to have deputed certain persons to inquire into the facts of the case, and record his decision thereon (2 Sam. xv. 3). Jehoshaphat delegated his judicial authority to a court permanently established for the purpose, and presided over by the high-priest for all matters spiritual, and by "the ruler of the house of Judah" for matters temporal (2 Ch. xix. 8–11). During the Exile, "the elders" once more represented the principal judicial authority (cp. Jer. xxix. 1; Ezek. xiv. 1, xx. 1); but after the return similar courts to those of Jehoshaphat were re-established by Ezra (Ezra vii. 25). After the institution of the Sanhedrin the final appeal lay to them, and the various stages through which a case might pass are thus described by the Talmudists—from the local consistory before which the case was first tried, to the consistory that sat in the neighbouring town: thence to the courts at Jerusalem, commencing in the court of the 23 that sat in the gate of Shushan, proceeding to the court that sat in the gate of Nicanor, and concluding with the great council of the Sanhedrin that sat in the room Gazith (Carpzov. *Appor.* p. 571).

A Roman citizen under the republic had the right of appealing in criminal cases from the decision of a magistrate to the people; and as

the emperor succeeded to the power of the people, there was an appeal to him in the last resort. Cp. Pliny, *Ep.* x. 97. See *Dict. of Ant.* art. APPELLATIO; Pauly, *R. E.* s. v. *Appellatio*.

St. Paul, as a Roman citizen, exercised the right of appeal from the jurisdiction of the local court at Jerusalem to the emperor (Acts xxv. 11). But as no decision had been given, there could be no appeal, properly speaking, in his case: the language used (Acts xxv. 9) implies the right on the part of the accused of electing either to be tried by the provincial magistrate, or by the emperor. Since the procedure in the Jewish courts at that period was of a mixed and undefined character, the Roman and the Jewish authorities co-existing and carrying on the course of justice between them, Paul availed himself of his undoubted privilege to be tried by the pure Roman law. The history of appeal as it affected the Israelites may be studied in Schnell, *Das Israelit. Recht in seinen Grundzügen dargestellt*; Salvador, *Institutions de Moïse*; Pastorel, *Législation des Hébreux*; Castelli, *La legge del popolo Ebreo*. See also the authorities in Zückler, *Hdb. d. theolog. Wissenschaften*, i. pp. 283, 295–6. [W. L. B.] [F.]

APPHIA (Ἀφφία; *Appia*). A Christian woman whose name occurs between the names of Philemon and Archippus in the address of the Epistle to Philemon (Philem. v. 2). From the position of her name it is probable that she was wife of Philemon and mother of Archippus. At any rate she was a member of Philemon's family, as the letter is of a private character. Bp. Lightfoot (*Coloss. and Philem.*, Introduction to Philem.) has overthrown the view that Apphia is only a Greek form of the Latin name Appia. By references to Boeckh (*Corp. Inscr.*) and other sources he has abundantly proved that Apphia is a native Phrygian name, the root of which (with its kindred forms) is probably some Phrygian term of endearment or relationship. We thus gain a fresh testimony to the genuineness of the Epistle, since Colossae, the home of Apphia, was a Phrygian city. [E. R. B.]

APPHUS (T. Ἀφφούς, A. Ζαφφούς, B. Ζαφφούς; *Apphus*), surname of Jonathan Maccabaeus (1 Macc. ii. 5). [G.] [F.]

APPIL FORUM (Ἀππίου φόρον, Acts xviii. 15) was a very well-known station (as we learn from Hor. *Sat.* i. 5, and Cic. *ad Att.* ii. 10) on the Appian Way, the great road which led from Rome to the neighbourhood of the Bay of Naples. St. Paul, having landed at Puteoli (v. 13) on his arrival from Malta, proceeded under the charge of the centurion along the Appian Way towards Rome, and found at Appil Forum a group of Christians, who had come to meet him. The position of this place is fixed by the ancient Itineraries at forty-three miles from Rome (*Itin. Ant.* p. 107; *Itin. Hier.* p. 611). The Jerusalem Itinerary calls it a *mutatio*. Horace describes it as full of taverns and boatmen. This arose from the circumstance that it was at the northern end of a canal which ran parallel with the road, through a considerable part of the Pomptine Marshes. There is no difficulty in identifying the site with some ruins near *Treponti*; and in fact the forty-third mile-

stone is preserved there. The name is probably due to Appius Claudius, who first constructed this part of the road: and from a passage in Suetonius, it would appear that it was connected in some way with his family, even in the time of St. Paul. [THREE TAVERNS.] [J. S. H.] [W.]

APPLE-TREE, APPLE (ἄμϐλον,* *tappûach*; *μήλον*; *μῆλα*, Sym. in Cant. viii. 5; *malum, malus*). Mention of the apple-tree occurs in the A. V. and R. V. in the following passages. Cant. ii. 3: "As the apple-tree among the trees of the wood, so is my beloved among the sons. I sat down under his shadow with great delight, and his fruit was sweet to my taste." Cant. viii. 5: "I raised thee up under the apple-tree: there thy mother brought thee forth" [cp. R. V.]. Joel i. 12, where the apple-tree is named with the vine, the fig, the pomegranate, and the palm-trees, as withering under the desolating effects of the locust, palmer-worm, &c. The fruit of this tree is alluded to in Prov. xxv. 11: "A word fitly spoken is like apples of gold in pictures [R. V. baskets; marg. or, *filigree work*] of silver." In Cant. ii. 5: "Comfort me with apples, for I am sick of love:" vii. 8, "The smell of thy nose [R. V. breath] shall be like apples."

It is a difficult matter to say with any degree of certainty what is the specific tree denoted by the Hebrew word *tappûach*. The LXX. and Vulg. afford no clue, as the terms *μήλον, malum*, have a wide signification, being used by the Greeks and Romans to represent almost any kind of tree-fruit; at any rate, the use of the word is certainly generic. From the passages in which the word occurs we gather (1) that it supplied a grateful shade; (2) that it had a peculiar fragrance or perfume; (3) that it was sweet and agreeable to the taste; (4) that it had a beautiful appearance, its fruit contrasting with the foliage—"apples of gold in pictures of silver." What fruit-tree growing in Syria will meet all these conditions? Critics and commentators have roamed through the orchards of Europe and Asia to identify the fruit indicated, but none of their guesses meet the requirements of the case. The quince, the citron, the orange, the apple, have all had their advocates. We may examine the claims of each, and first the apple. Our apple is not a native of Syria, and it can scarcely exist in so warm a climate. The German colonists at Jaffa have attempted to introduce it, and it barely exists there, represented by a few sickly cankered trees with small woody fruit. Dr. Thomson, who, unfortunately, is generally incorrect in any statement on natural history, writes (*Land and Book*, p. 544) that Askalon is celebrated for its apples, which would not disgrace an American orchard. Unfortunately, as I can vouch from personal examination, there is not an apple-tree near Askalon. The learned doctor mistook quinces for apples. The pear is wild in Galilee, Gilead, and Lebanon on very high elevations, but neither it nor the apple can possibly be cultivated with success in Palestine or elsewhere. As for the orange, though it now thrives on the coast plains, and the oranges of Jaffa are among the finest in the

world, we have not the slightest ground for believing that it had been introduced into Palestine till many centuries later than the time of Solomon. Its congener, the citron, may have been known, since it is a native of Media, as its name *Citrus medica*, *μήλον τὸ Μηδικόν* (Theophr. *Hist. Plant.* iv. 4) implies; but, as Theophrastus in the same passage remarks, though valued, like its leaf, for its perfume, it is not eaten, and only used in decoctions (*φάρμακον*). It is the handsomest and largest of the orange tribe in hot climates, and has a dense shade, but it never could be said of it, "his fruit was sweet to my taste." The Jews value this citron and carry the fruit on its stalk at the Feast of Tabernacles, a custom which is alluded to by Josephus, who states (*Ant.* xiii. 13, § 5) that citron boughs were ordered to be carried on this occasion. There remains the quince, which Celsus and most subsequent writers following him have assigned to the *tappûach*; but though it is fragrant, and "its scent," says Abn'l Fadli, "cheers my soul, renews my strength, and restores my breath," though it was sacred among the ancients to the goddess of Love, who is often represented as holding it in her hand,* no one would sit down under a quince-tree, and pronounce the fruit sweet to the taste. Nor does the quince-tree afford so good a shade as most other fruit-trees. It has often struck us that most of the difficulties of expositors on the point have arisen from their ignorance of the country itself.

There is one fruit, however, which is not otherwise mentioned in Scripture, which is most abundant in the Holy Land, which meets all the requirements of the context, and the only one which will do so—the *Apricot*. It is true there are no wild apricots in Palestine, but neither is the apple, quince, or citron wild there: and the apricot is known to be a native of the neighbouring country of Armenia, and therefore probably introduced as early as the vine, which was brought originally from the same regions, and is certainly not a native of Palestine. The apricot is, with the exception of the fig, perhaps the most abundant fruit of the whole country, and the cakes of sun-dried apricots, called "Mish-mash," are to be found in every bazaar in great quantities. In highlands and lowlands alike, in the nooks of Judaea, in the recesses of Galilee, and the orchard forests of Damascus, the apricot flourishes and yields a crop of prodigious abundance. Many times have we pitched our tents under its shade, and spread our carpets secure from the rays of the sun. There can scarcely be a more deliciously perfumed fruit than the apricot, and what can better fit the imagery of Solomon, "apples of gold in pictures of silver," than this golden fruit, as its branches bend under the weight of their crop in its setting of bright yet pale foliage? The fruit has given its name to two villages, Tappuah, one in Judah and the other in Ephraim (Josh. xv. 34; xvi. 8 [cp. xii. 17]). As to the APPLES OF SODOM, see VINE OF SODOM.

The expression "apple of the eye" occurs in

* From ἴδω, *spiravit*, in allusion to the perfume of the fruit. Houghton (*PSBA.* xii. 42, &c.) still prefers the quince.

b Hence the act expressed by the term *μυροβολεῖν* (Schol. ad Aristoph. *Nub.* p. 180; Theocr. *Id.* iii. 10, v. 88, &c.; Virg. *Ecl.* iii. 64) was a token of love. For numerous testimonies, see Celsus, *Hierob.* i. 265.

Dent. xxii. 10; Ps. xvii. 8; Prov. vii. 2; Lam. ii. 13; Zech. ii. 8. The word is the representative of an entirely different name from that considered above: the Hebrew word being 'ishôn, "little man"—the exact equivalent to the English *pupil*, the Latin *pupilla*, the Greek κόρη. It is curious to observe how common the image ("pupil of the eye") is in the languages of different nations. Gesenius (*Thes.* p. 86) quotes from the Arabic, the Syriac, the Ethiopic, the Coptic, the Persian, in all of which tongues an expression similar to the English "pupil of the eye" is found. It is a pity that the same figure is not preserved in the A. V. and R. V., which invariably use the expression "apple of the eye" (in allusion to its shape), instead of giving the literal translation from the Hebrew. [H. B. T.]

AQUILA (Ἀκύλα; *Aquila*). Ἀκύλας is merely the Graecised form of the common Latin name *Aquila*, with which the purely Latin name of his wife *Prisca* or *Priscilla* agrees. The form *Prisca* instead of *Priscilla* has MS. support in three passages. So in Latin authors, *Livia* and *Livilla*, &c., occur indiscriminately of the same person. The name of the wife is placed before that of the husband in Acts xviii. 18 and 26, Rom. xvi. 3, and 2 Tim. iv. 19. It may perhaps be inferred that she was the first and more earnest convert. *Aquila* is described as Ποντίας τῷ γένει. On the one hand, the occurrence of the cognomen *Aquila* in the *Gens Pontia* has led critics rashly to assert that the N. T. *Aquila* was a freedman who had taken the name of *Pontius Aquila*, and that St. Luke had by mistake explained his name from the name of the province [PONTUS]. But, on the other hand, there is quite as remarkable a coincidence in the fact that we know of another *Aquila* from Pontus, the author of the earliest Greek Version of the O. T. after the Christian era [VERSIONS, ASCENT (Greek, *Aquila*); (Targum, Onkelos)]. As in the cases of *Barnabas* and *Apollos*, "by race" (τῷ γένει) indicates only the place of ancestral settlement, and not nationality, for *Aquila* was a Jew. As a Jew, he with *Priscilla* had left Rome under the edict of *Claudius* (prob. A.D. 52), referred to by *Suet. Claud.* 25: "Judaeos impulsore Chresto assidue tumultuantes Roma expulit." [CLAUDIUS.] St. Paul found them at Corinth on his first visit, and worked with them at their common trade of tent-making, the material employed being probably goat's-hair cloth, "cilicium," the product of St. Paul's native province (Smith's *Dict. Class. Antig.* s. v. *Cilicium*). There is no evidence that *Aquila* and his wife were baptized when St. Paul joined them, but they must at any rate have been Christians when, on St. Paul's departure from Corinth, they accompanied him to Ephesus, and were "left" by him there. It is however possible that *Aquila* was in part attracted to Ephesus as a centre of his own trade, though both the passages quoted by *Lewin* only refer to one event, the present of a tent to Alcibiades by the Ephesians. The vow performed at Cenchree before sailing may be referred to *Aquila* instead of St. Paul, so far as grammatical construction

is concerned, but it is most improbable that so small a detail should have been thought worth relating, unless it had concerned the main character in the narrative. At Ephesus *Priscilla* and *Aquila* soon found important work in teaching *Apollos*, who had already been "instructed in the way of the Lord," but needed to have it "more accurately set forth" to him. They were still in Ephesus when St. Paul, having returned thither, wrote 1 Corinthians towards the end of his three years' stay in the spring of A.D. 57. It had already become customary for Christians to assemble for worship in their house at Ephesus (1 Cor. xvi. 19), as afterwards in their house at Rome (Rom. xvi. 5. For τὴν κατ' οἶκον αὐτῶν ἐκκλησίαν, see Lightfoot, *Colossians*, iv. 15, note). But at the date of the Epistle to the Romans, probably early in A.D. 58, they are in Rome, and are given a marked pre-eminence among the Christians dwelling there (Rom. xvi. 3-5). They are the Apostle's "fellow workers" by a double title, that of manual and that of spiritual labour. They are also described by St. Paul in this salutation as having "laid down their own neck for his life." It is probable that this refers to some courageous act during those outbreaks of hostility at Ephesus of which one scene only is given us in Acts xix. 23 sq. It is evident from Acts xx. 19 and 1 Cor. xv. 32 that St. Paul's life at Ephesus was one of suffering and danger. It is also noticeable that the next name in the salutation is that of *Epaenetus*, who had probably followed *Prisca* and *Aquila* from Ephesus to Rome (Asia, not Achaia, is the true reading in Rom. xvi. 5. So R. V.). The last notice of them is a salutation in 2 Tim. iv. 19, which points to their being at that time with Timothy, and probably again at Ephesus. The tradition that they were beheaded seems to be illogically derived from the suggestion of Rom. xvi. 4. The Greek and Roman calendar both commemorate them as martyrs, the former on Feb. 13, the latter on July 8. [E. R. B.]

AR (ʾ) and AR OF MOAB (אַר מֹאָב. Sam. Vera. ʾאַר; Num. xxi. 15, ʾHr; Deut. ii. 9, 18, Aʼ. ʾAroḥ, B. ʾAroḥ; v. 29, B. ʾAroḥ. A. ʾAroḥ; Ar), one of the chief places of Moab (Is. xv. 1; Num. xxi. 28).^a From the *Onomasticon* (OS.³ p. 121, 6), and from Jerome's Com on Is. xv. 1, it appears that in his day the place was known as *Areopolis*^a and *Rabbath-Moab*, "id est, grandis Moab" (Reland, p. 577; Rob. ii. 166, note).^a The site is still called *Rabba*; it

^a According to Gesenius (*Jesaja*, 515), an old, probably Moabite, form of the word ʾר, "a city."

^b Samaritan Codex and Version, "as far as Moab," reading ʾר for ʾר; and so also LXX. ʾר M.

^c We have Jerome's testimony (OS.³ p. 133, 18) that *Areopolis* was believed to be so called ἀπὸ τοῦ Ἄρου, i.e. from Mars. This is a good instance of the tendency which is noticed by Treuch (*English Past and Present*, 218, 220) as existing in language to tamper with the derivations of words. He gives another example of it in "Hierosolyma," quasi ἱερός, "holy."

^d Ritter (*Syrien*, pp. 1212-13) tries hard to make out that *Areopolis* and *Ar-Moab* were not identical, and that the latter was the "city in the midst of the wady" [Aroḥ]; but he fails to establish his point. The argument for supposing Ar to have been on the Arnoo is well stated in Zeller's *Bibl. Wörtl.* p. 95.

^e ʾר. homunculus. ʾר ʾר ʾר. homunculus omni, i.e. popilla, in qua tanquam in speculo hominis imaginem conspicimus" (Ges. *Thes.* s. v.).

lies about half-way between *Kerek* and the *Wady Mójib*, ten or eleven miles from each, the Roman road passing through it. The remains are not so important as might be imagined (Irby, p. 140; Burckh. p. 377; De Sauley, ii. 44-46, and Map 8); but they bear all the marks of a city of the late Roman period, with abundant traces of an earlier epoch (Tristram, *Land of Moab*, p. 111).

In the books of Moses Ar appears to be used as a representative name for the whole nation of Moab: see Deut. ii. 9, 18, 29; and also Num. xxi. 15, where it is coupled with a word rarely if ever used in the same manner, אֶרֶץ, "the dwelling of Ar." In Num. xxii. 36 the almost identical words מִן אֶרֶץ are rendered "a city of Moab," following the Sam. Vers., the LXX., and Vulgate. [G.] [W.]

ARA' (אַרָא', Ges. perhaps = אֶרֶץ, a lion; Ἀρά; Ara), one of the sons of Jether, the head of a family of Asherites (1 Ch. vii. 38). [W. A. W.] [F.]

ARA'B (אַרָב, Ges. = *ambush*; A. Ἐρέβ, B. Αἰρέμ; Arab), a city of Judah in the mountainous district, probably in the neighbourhood of Hebron. It is mentioned only in Josh. xv. 52, and is now probably *Kh. er Rabyeh*, south of Hebron and near *ed Dámeh* (Dumah. P. F. Mem. iii. 311, 360). [ARABITE.] [G.] [W.]

ARABAH (עֲרָבָה; B. Βαυδάβα; *campes- tria*), Josh. xviii. 18; possibly in this verse a town (cp. LXX. and xv. 6, 61). Although this word appears in the A. V. in its original shape only in the verse above quoted, yet in the Hebrew text it is of frequent occurrence; and has, except in cases 1 and 3, been retained in the R. V.

1. If the derivation of Gesenius (*Thes.* p. 1066) is to be accepted, the fundamental meaning of the term is "burnt up" or "waste," and thence "sterile," and in accordance with this idea it is employed in various poetical parts of Scripture to designate generally a barren, uninhabitable district,—"a desolation, a dry land, and a desert, a land wherein no man dwelleth, neither doth any son of man pass thereby" (Jer. li. 43: see a striking remark in Martineau, p. 395; and amongst other passages, Job xxiv. 5, xxxix. 6; Is. xxxiii. 9, xxxv. 1).

2. But within this general signification it is plain, from even a casual examination of the topographical records in the earlier Books of the Bible, that the word has also a more special and local force. In these cases it is found with the definite article הָעֲרָבָה, ha-'Arabah), "the Arabah" (R. V.), and is also so mentioned as clearly to refer to some spot or district familiar to the then inhabitants of Palestine. This district—although nowhere expressly so defined in the Bible, and although the peculiar force of the word 'Arabah appears to have been disregarded by even the earliest commentators and interpreters of the Sacred Books—"has within our own times

been identified with the deep sunken valley or trench which forms the most striking among the many striking natural features of Palestine, and which extends with great uniformity of formation from the slopes of Hermon to the Elanitic Gulf of the Red Sea: the most remarkable depression known to exist on the surface of the globe (Humboldt, *Cosmos*, i. 150, ed. Bohn; see also p. 301). Through the northern portion of this extraordinary fissure the Jordan rushes through the lakes of Huleh and Gennesareth down its tortuous course to the deep chasm of the Dead Sea. This portion, about 150 miles in length, is known amongst the Arabs by the

name of el-Ghor (الغور), an appellation which

it has borne certainly since the days of Abulfeda.^a The southern boundary of the Ghor has been fixed by Robinson to be the wall of cliffs formed by the ancient deposits of the Dead Sea, which closes in the marshy plain of the *Sabbah*, about nine miles south of the Lake. Down to the foot of these cliffs the Ghor extends; from their summits, southward to the Gulf of 'Akabah, the valley changes its name, or, it would be more accurate to say, retains its old name of Wady el-'Arabah (وادي العرب).

Looking to the indications of the Sacred Text, there can be no doubt that in the times of the conquest and the monarchy the name 'Arabah was applied to the valley in the entire length of both its southern and northern portions. Thus in Deut. i. 1, probably, and in Deut. ii. 8, certainly (A. V. "plain" in both cases), the

district the name Aulon, *vallis grandis aque campestris*; but he preserves no such name in the Vulgate, and renders Arabah by *planities, solitudo, campestris, desertum*, by one or all of which he translates indiscriminately Mishor, Bikhah, Midbar, Shefele, Jabilmon, equally unimpartial of the special force attaching to several of these words. Even the accurate Aquila has fallen in this, and uses his favourite ἡ ἐρημία indiscriminately. The Talmud, if we may trust the single reference given by R. Elad (p. 365), mentions the Jordan valley under the name Beasah, a word at that time of no special import. The Samaritan Version^b and the Targums apparently confound all words for valley, plain or low country, under the one term Mishor, which was originally confined strictly to the high smooth downs east of Jordan on the upper level (Mishas).

In the LXX. we frequently find the words Ἀραβία and Ἀραβίς; but it is difficult to say whether this has been done intelligently, or whether it is an instance of the favourite habit of these translators of transferring a Hebrew word literally into Greek when they were unable to comprehend its force. (See some curious examples of this—to take one Book only—in 2 K. ii. 14, ἀράβας; III. 4, ἀραβίς; Iv. 39, ἀραβίς; v. 19 [cp. Gen. xxxv. 18], ἀραβίς; vi. 8, ἀραβίς; ix. 13, γαλαί, &c. &c.) In the latter case it is evidence of an equal ignorance to that which has rendered the word by δουραί, αὐτὸν ἱερὸν, and Ἀραβία. In Gen. xxxv. 27 it is possible that the LXX. have treated the very distinct עֲרָבָה (Arba) as if עֲרָבָה, and have explained it τοῦ ὁρίωνος (ARAB).

^a By Abulfeda and Ibn Hukal the word el-Ghor is used to denote the valley from the Lake of Gennesareth to the Dead Sea (Ritter, *Sinai*, pp. 1059, 1060). Thus each word was originally applied to the whole extent, and each has been since restricted to a portion only (see Stanley, App. 487). The word *Ghor* is interpreted by Freytag to mean "locus depressior inter montes."

^a The early commentators and translators seem to have overlooked or neglected the fact, that the Jordan valley and its continuation south of the Dead Sea had a special name attached to them, and to them only. By Josephus the Jordan valley is always called the *μεγάλη ὁρμή*; but he applies the same name to the plain of Esdraelon. Jerome (*OS*, p. 123, 10) gives to this

allusion is to the southern portion, while the other passages in which the name occurs point with certainty—now that the identification has been suggested—to the northern portion. In *Deut.* iii. 17, iv. 49; *Josh.* iii. 16, xi. 2, xii. 3; and 2 *K.* xiv. 25, both the Dead Sea and the Sea of Cinneroth (Gennesareth) are named in close connexion with the 'Arabah. The allusions in *Deut.* xi. 30; *Josh.* viii. 14, xii. 1, xviii. 18; 2 *Sam.* ii. 29, iv. 7; 2 *K.* xxv. 4; *Jer.* xxxix. 4, lii. 7, become at once intelligible when the meaning of the 'Arabah is known, however puzzling they may have been to former commentators.* In *Josh.* xi. 16 and xii. 8 the 'Arabah takes its place with "the mountain," "the lowland" plains of Philistia and Esdraelon, "the south" and "the plain" of Coele-Syria, as one of the great natural divisions of the conquered country.

3. But further the word is found in the plural followed by a genitive אֲרָבוֹתָא, *Arboth*), always in connexion with either Jericho or Moab, and therefore doubtless denoting the portion of the 'Arabah near Jericho: in the former case on the west, and in the latter on the east side of the Jordan; the *Arboth-Moab* being always distinguished from the *Sêdê-Moab*—the bare and burnt-up soil of the sunken valley, from the cultivated pasture or corn-fields of the downs on the upper level—with all the precision which would naturally follow from the essential difference of the two spots. See *Num.* xxii. 1, xvi. 3, 63, xxxi. 12, xxxiii. 48, 49, 50, xxxv. 1, xxxvi. 13; *Dent.* xxxiv. 1, 8; *Josh.* iv. 13, v. 10, xii. 32; 2 *Sam.* xv. 28, xvii. 16; 2 *K.* xv. 5; *Jer.* xxxix. 5, lii. 8.

The word 'Arabah does not appear in the Bible until the Book of Numbers. In the allusions to the valley of the Jordan in *Gen.* xiii. 10, &c., the curious term *Ciccar* is employed. This word and the other words used in reference to the Jordan valley, as well as the peculiarities and topography of that region—in fact of the whole of the Ghor—will be more appropriately considered under the word JORDAN. At present our attention may be confined to the southern division, to that portion of this singular valley which has from the most remote date borne, as it still continues to bear, the name of 'Arabah.

A deep interest will always attach to this remarkable district, from the fact that it must have been the scene of a portion of the wanderings of the children of Israel after their repulse from the south of the Promised Land. Wherever Kadesh and Hormah may hereafter be found to lie, we know with certainty, even in our present state of ignorance, that they must have been to the west of the 'Arabah; and that "the way of the Red Sea," by which they journeyed "from Mount Hor to compass the land of Edom," after the refusal of the king of Edom to allow them a passage through his country, must have been southwards, down the 'Arabah towards the head of the Gulf, till, as is nearly certain, they turned up one of the Wâdys on the left, and so made their way by the back

of the mountain of Seir to the land of Moab on the east of the Dead Sea.

More accurate information will no doubt be obtained before long of the whole of this interesting country, but in the meantime as short a summary as possible of what can be collected from the reports of the principal travellers who have visited it is due.

The direction of the Ghor is nearly due north and south. The 'Arabah, however, slightly changes its direction to about N.N.E. by S.S.W. (*Rob.* i. 162, 3). But it preserves the straightness of its course, and the general character of the region is not dissimilar from that of the Ghor (*Ritter, Sinai*, p. 1132; *Irbý*, p. 134) except that the soil is more sandy, and that, from the absence of the central river and the absolutely desert character of the highland on its western side (owing to which the Wâdys bring down no fertilising streams in summer, and nothing but raging torrents in winter), there are very few of those lines and "circles" of verdure which form so great a relief to the torrid climate of the Ghor.

The 'Arabah forms part of the remarkable natural feature which, under the form of a fissure, probably coincident with a fracture of the earth's crust, commences with the Gulf of 'Akabah, and thence stretches northwards along the line of the 'Arabah itself, and of the valleys of the Jordan, Litany, and Orontes to the foot of the Taurus mountains. The 'Arabah proper extends from the head of the Gulf of 'Akabah to the cliffs of marl and gravel, nine miles south of the Dead Sea, a distance of 103 miles. In breadth it varies; at the Gulf the opening to the sea is about five miles; but north of Petra, fifty miles inland, it widens to fourteen miles (*Map of P. E. Fund*). Forty-five miles from the Gulf of 'Akabah a ridge, or saddle, known to the Bedawin as *el-Sateh*, "the roof," divides the 'Arabah into two sections, the *W. el-'Akabah* and the *W. el-'Arabah*, draining respectively to the Gulf and to the Dead Sea. This ridge, which connects the cretaceous-mammulitic rocks of the *Tih* plateau with the mountains of Idumaea, consists of a compact, grey limestone, almost marble, underlying a bed of gravel from twenty to thirty feet thick; the lowest point is about 660 feet above the sea-level (*Lartet, Géologie de la Palestine*, 17, 190; *Hull, P. E. F. Qy. Stat.* 1884; and *P. F. Mem.* "Geology").

The surface of the *W. el-'Akabah* is variously covered by loam, gravel, and blown sands, which are often piled up in great dunes covering large areas; and at the foot of the eastern hills there is an accumulation of boulders and débris brought down by the winter torrents. There is no perennial stream, but the water from some brackish springs and from the valleys on either side percolates beneath the sand, and forms a salt marsh about twenty miles north of 'Akabah. There is a striking contrast between the two sides of the *W. el-'Akabah*; the eastern is the grander of the two, except close to the Gulf, where both sides are formed of granite and porphyry, rising into bold and rugged ridges. On the western side these rocks soon pass below beds of sandstone, and afterwards limestone, which break off in steep escarpments with grand headlands and bastions. There is a slight dip northwards, which ultimately brings the lime-

* See the mistakes of Michaelis, Marius, and others who identified the 'Arabah with the Bih'ah (i.e. the plain of Coele-Syria, the modern *el-Bukâa*), or with the Mishor, the level down country on the east of Jordan (*Keil*, pp. 205, 226).

stone down into the plain opposite 'Ain Ghurundel, and at this spot there is an easy approach to the Tih plateau. The escarpments, which have an altitude of from 1900 to 2,400 feet, are broken at distant intervals, by winding valleys of which the Wādys Hendis, Nimreh, Ghudyān, Sha'ib, and Beyaneh are the most important. "On the eastern side the mountains of granite and porphyry behind 'Akabah, intensely red in colour, so as to give rise to the name *Jebel en-Nūr*, mountain of fire, gradually decline in elevation northwards, and several outliers of the desert sandstone are seen capping the higher elevations of the older rocks towards the head of *W. Turban*. Soon afterwards the sandstone formation descends to lower levels, breaking off in abrupt walls and precipices, and forming the escarpment of *Jebel Harūn*, Mount Hor, which towers conspicuously above all the other heights" (Hull, *Mount Seir*, p. 81). The valleys which at once drain and give access to the interior of these mountains are in strong contrast to those on the west. In almost all cases they contain streams which, although in the heat of summer small, and losing themselves in their own beds, or in the sand of the 'Arabah, "in a few paces," after they forsake the shadow of their native ravines (Laborde, p. 141), are yet sufficient to keep alive a certain amount of vegetation—rushes, tamarisks, palms, and even oleanders, lilies, and anemones, while they form the resort of the numerous tribes of the children of Esau, who still "dwell (Stanley, p. 87, and *MS. Journal*; Laborde, p. 141; Mart. p. 396) in Mount Seir, which is Edom" (Gen. xxxvi. 8). The most important of these valleys are *W. Ithm*, *W. el-Muhtedy*, *W. Durba*, *W. Turban*, *W. Khameh*, and *W. Ghurundel*. The first enters the mountains close to 'Akabah and leads, by the back of the range, to Petra, and thence by *Shobek* and *Tufleik* to the country east of the Dead Sea. Traces of a Roman road exist along this route (Laborde, 203; Rob. ii. 161); by it Laborde returned from Petra, and there can be little doubt that it is the one by which the Israelites took their leave of the 'Arabah when they went to "compass the land of Edom" (Num. xxi. 4). The last has at its entrance some ruins, possibly the remains of a fort which guarded the road up its bed to Petra. The springs of the *W. el-Akahab* are those of *W. el-Hendis* and *W. Ghudyān* on the west; and 'Ain Ghurundel and 'Ain Tabā on the east.

North of the dividing ridge is the great plain of the *W. el-Arabah*, formed of sand and gravel composed of great varieties of stones, such as granite, porphyry, feldstone, quartz, sandstone and limestone. Along its western side limestone cliffs rise in terraces to the desert of the Tih and the hills of the Negeb; whilst on the eastern side red sandstone cliffs, sometimes resting on a foundation of older crystalline rocks, attain an altitude of 2,000 feet above the Dead Sea. Then succeed beds of variegated colours surmounted by the limestone of the table-land, which stretches away eastward into the Syrian desert. The plain is traversed by the *Wādī el-Jeib*, which, rising near the southern extremity of the Tih plateau, enters the 'Arabah north of the dividing ridge; and then, after receiving the drainage of the hills to the east and west, discharges its waters into the Dead Sea. On

the west its most important affluent is the *W. el-Jerifeh*, which gives access to the Negeb; on the east it receives the drainage of *W. Abū Kusheibeh* and *W. el-Abyadh*, which rise at the foot of Mount Hor and of the Wādys *el-Weibeh*, *Fedan*, *Salamān*, *Dhalal*, &c. The streams which descend these valleys after rain have cut deep channels in the plain, and exposed to view beds of breccia conglomerate, coarse gravel, sand, and gypseous marls, which have been recognised by Lartet as ancient deposits of the Dead Sea; according to the most recent explorer, Prof. Hull, these deposits show that the waters of the Dead Sea stood, at one period, at a higher level than those of the Mediterranean (*P. F. Mem. "Geology"*). The springs of *W. el-Arabah* are 'Ain *el-Weibeh*, 'Ain *Ghamr*, 'Ain *Melihi*, and 'Ain *el-Buceirdeh*: these with the exception of 'Ain *Melihi* give sweet water, and the first, from its copious supply, is supposed by Robinson to be the site of Kadesh-Barnes.

The country west of the 'Arabah is, in every respect, a contrast to that on the east. On the one hand the sterile, desolate plateau of the Tih and the arid mountains of the Negeb; on the other the mountains of Edom, here covered with vegetation, there cultivated and yielding good crops, abounding in "the fatness of the earth" and the "plenty of corn and wine" which were promised to the forefather of the Arab race as a compensation for the loss of his birthright (Rob. ii. 154; Laborde, pp. 203, 263). In these mountains there is a plateau of great elevation from which again rise the mountains, or rather the downs (Stanley, p. 87), of *Sherāh*. Though the district is now deserted, yet the ruins of towns and villages with which it abounds show that at one time it must have been densely inhabited (Burckh. pp. 435, 436).

The surface of the 'Arabah presents, in places, a dreary and desolate aspect. "A more frightful desert," says Dr. Robinson (ii. 121), "it had hardly been our lot to behold... loose gravel and stones everywhere furrowed with the beds of torrents... blocks of porphyry brought down by the torrents among which the camels picked their way with great difficulty... a lone shrub of the ghaddah, the almost only trace of vegetation." This was at the ascent of the *Wādī el-Jeib* to the floor of the great valley itself. Further south, near 'Ain *el-Weibeh*, it is a rolling gravelly desert with round naked hills of considerable elevation (ii. 173). At *Wādī Ghurundel* it is "an expanse of shifting sands, broken by innumerable undulations and low hills" (Burckh. p. 442), and "countersected by a hundred water-courses" (Stanley, p. 87). Nor is the heat less terrible than the desolation, and all travellers, almost without exception, bear testimony to the difficulties of journeying in a region where the sirocco appears to blow almost without intermission (Schub. p. 1016; Burckh. p. 444; Mart. p. 394; Rob. ii. 123).⁴

However, in spite of this heat and desolation, there is a certain amount of vegetation, even in

⁴ The wind in the Eilatian arm of the Red Sea is very violent, constantly blowing down the 'Arabah from the north. The navigation of these waters is on that account almost proverbially dangerous and difficult (see the notice of this in the *Bibl. Rev.* vol. ciii. 225).

the open 'Arabah, in the driest parts of the year. Schubert in March found the *Arta* (*Calligonum com.*), the *Anthia variegata*, and the *Coloquinta* (Ritter, p. 1014), also tamarisk-bushes (*tarfu*) lying thick in a torrent-bed" (p. 1016); and on Stanley's road "the shrubs at times had almost the appearance of a jungle," though it is true that they were so thin as to disappear when the "waste of sand" was overlooked from an elevation (p. 85; see Rob. i. 163, 175).

It is not surprising that after the discovery by Burckhardt in 1812, of the prolongation of the Jordan valley in the 'Arabah, it should have been assumed that this had in former times formed the outlet for the Jordan to the Red Sea; or that various theories, such as intense volcanic activity at the time of the destruction of the Cities of the Plain, should have been advanced to account for the interruption of the communication. Recent exploration has, however, disproved these theories, and shown (1) that the Sea of Galilee is 682 feet and the Dead Sea 1292 feet below the sea-level, and that consequently the Jordan could never, in historical times, have discharged its waters into the Gulf of 'Akaba; (2) that the ridge dividing the two seas is formed of cretaceous rocks (limestone with baculites), which are covered with their own debris, and not by any more recent marine deposit; (3) that the more recent deposits north of the ridge, towards the Dead Sea, are ancient alluvions brought down from the south; (4) that these deposits show no trace of having been elevated; (5) that the volcanic rocks are porphyries of an earlier date than the cretaceous rocks; and (6) that the Dead Sea basin is shut in and isolated from other basins by cretaceous rocks, and that there is an entire absence in the 'Arabah of all marine deposits later than these rocks (Hall, P. F. *Mem. "Geology," and Mount Sîn*).

Considerable interest attaches to the course of the roads, or trade routes, which traversed the 'Arabah when, during the reign of Solomon, and also at a later period, Elath was a commercial port; and when, still later, Petra became one of the principal depôts for the trade between India and the West. These roads, as far as they can at present be ascertained, were (1) the road from Haila (Elath) to Clyma, which ascended to the *Tih* plateau by the pass *es-Nagb*, and followed the line of the present Hajj route by *Nakhil*, to the vicinity of Suez; (2) the road from Haila to Jerusalem by Dianna (*Ain el-Ghudyan*), Rasa, Cypsoria (W. *Ghubey*), Lusa (*Ek. Lussân*), Oboda (*Abdek*), and Elusa (*Khulashah*), whence a branch road led to Gaza; (3) the road from Haila to Petra and Jerusalem, which appears to have run up the 'Arabah and

W. *Ghurundel* by Dianna (*Ain el-Ghudyan*), Presidio, Haurana, and Zadogatha (*Ain Dalagheh*) to Petra, and thence by *Ain el-Weibeh* and the pass *es-Sufâh* to Hebron, where it seems to have joined (2); (4) the road from Haila to Damascus, which ran at the back of the mountains by Petra, Rabbath Moab, Kerak, and Rabbath Ammon; (5) the road from Petra to Rhinocolura (*el-Arish*), which passed along the foot of *Jebel Magrah*; (6) the road from Petra to Gaza by Eboda (*Abdek*) and Elusa (*Khulashah*), which was partly followed by the late Prof. Palmer; and (7) the direct road from Petra to the Egyptian frontier, near *Ismailiyeh*, which was followed by the late Rev. F. W. Holland, and is possibly "the way to Shur" (Gen. xvi. 7). Of these roads (2) and (3) appear to have been those by which the produce of the East was carried to Jerusalem during the reign of Solomon; and (4) to have been that by which the Israelites approached the Promised Land after their wanderings in the desert; and at a later period, Rezin, king of Syria, advanced upon Elath (2 K. xvi. 6). [G.] [W.]

ARABAT'TINE (ה' אַרְבַּטְטִינָה; *AN. 'Arabat'tin, N. d-ard; Acrabattane*), in Idumaea (1 Mac. v. 3). [AKRABBIM. See the note to that article.] [G.] [W.]

ARABIA (אַרְבִּיָּא, Gal. i. 17; iv. 25), a country known in the O. T. under two designations:—1. אֶרֶץ קְדִמָּה, *the east country* (Gen. xxv. 6); or perhaps קְדִמָּה (Gen. x. 30; Num. xiii. 7; Is. ii. 6); and אֶרֶץ בְּנֵי קְדִמָּה (Gen. xix. 1); gent. n. בְּנֵי קְדִמָּה, *sons of the East* (Judg. vi. 3 sq.; 1 K. iv. 30 [v. 10 Heb.]; Job i. 3; Is. xi. 14; Jer. xlii. 28; Ezek. xxx. 4). If usually translated by the LXX. (e.g. *Avatoal*) and in Vulg., it is sometimes transcribed *Kelem* by the former. From these passages it appears that אֶרֶץ קְדִמָּה and אֶרֶץ בְּנֵי קְדִמָּה indicate, primarily, the country east of Palestine, and the tribes descended from Ishmael and from Keturah; and that this original signification may have become gradually extended to Arabia and its inhabitants generally, though without any strict limitation. The third and fourth passages above referred to, as Gesenius remarks (*Lex.*, ed. Tregelle, in voc.), relate to Mesopotamia and Babylonia (comp. *Avatoal*, ה' *Avatoal*, Matt. ii. 1 sq.). Winer considers Kelem, &c., to signify Arabia and the Arabians generally (*Realwörterbuch*, in voc.); but a comparison of the passages on which his opinion is founded has led us to consider it doubtful. [BENE-KEDEM.] 2. עֲרַב (2 Ch. ix. 14) and עֲרַב (Is. xxi. 13; Jer. xxv. 24; Ezek. xxvii. 21); gent. n. עֲרָבִי (Is. xlii. 20; Jer. iii. 2); and עֲרָבִי (Neh. ii. 19); pl. עֲרָבִים (2 Ch. xxi. 16; xlii. 1), and עֲרָבִים (2 Ch. xvii. 11; xxvi. 7). LXX. *'Arabia*, &c.; Vulg. *Arabia*, &c. These seem to have the same geographical reference as the former names to the country and tribes east of the Jordan, and chiefly north of the Arabian peninsula. In the N. T. *'Arabia* cannot be held to have a more extended signification than the Hebrew equivalents in the O. T. עֲרַב (Ex. xii. 38; Neh. xiii. 3) and עֲרָב (1 K. x. 15; Jer. xxv. 20, l. 37; Ezek. xxx. 5), rendered in the A. V. "a mixed

* The bees whose hum so charmed him (p. 1017) must be his description have been in a side Wady, not in the 'Arabah itself.

† See Burckhardt, pp. 441, 442. The sagacity of Ritter had led him earlier than this to infer its existence from the remarks of the ancient Mahometan historians (Rob. ii. 1-7).

‡ This theory appears to have been first announced by Col. Leake in the preface to Burckhardt's *Travels* (see p. vi.). It was afterwards espoused and dilated on, among others, by Lord Lindsay (ii. 23), Dean Milman (*Hist. of Jews*, Allen, 241), and Stephens (*Incidents of Trav.*, ii. 41).

multitude" (Ex. xii. 38, here followed by 27), "the mixed multitude," kings of "Arabia" (so Vulg. in 1 K. x. 15, and in Heb. in corresponding passage in 2 Ch. ix. 14), and (in the last two instances) "the mingled people," have been thought to signify the Arabs. The people thus named dwelt in the deserts of Petra. By the

Arabs the country is called **بِلَادُ الْعَرَبِ** (Bilād El-'Arab), "*the country of the Arabs*," and **جَزِيرَةُ الْعَرَبِ** (Jeziret El-'Arab), "*the peninsula of the Arabs*," and the people **عَرَب** ('Arab); "Bedawy" in modern Arabic, and

"A'rāb" (**أَعْرَابُ**) in the old language, being applied to people of the desert, as distinguished from townspeople. They give no satisfactory derivation of the name Arab, that from Yaarub being puerile. The Hebrew designation, 'Ereb, has been thought to be from 'Arabah, "a desert," which, with the article, is the name of an extensive district in Arabia Petraea.

Geographical Divisions.—Arabia was divided by the Greeks into *Arabia Felix* (ἡ εὐδαίμων Ἀραβία), *Arabia Deserta* (ἡ ἔρημος Ἀραβία, Strab. xvi. 767; Plin. vi. 28, § 32; Diod. Sic. ii. 48 sq.), and *Arabia Petraea* (ἡ Περπαλα Ἀραβία, Ptol. v. 17, § 1). The first two divisions were those of the earlier writers; the third being introduced by Ptolemy. According to this geographer's arrangement, they included, within doubtful limits, 1, the whole peninsula; 2, the Arabian desert north of the former; and 3, the desert of Petra, and the peninsula of Sinai. It will be convenient in this article to divide the country, agreeably to these natural divisions and the native nomenclature, into *Arabia Proper*, or Jeziret El-'Arab, containing the whole peninsula as far as the limits of the northern deserts; *Northern Arabia*, or El-Bādiyeh, bounded by the peninsula, the Euphrates, Syria, and the desert of Petra, constituting properly Arabia Deserta, or the great desert of Arabia, the so-called "Syrian desert," reaching to about 35° N.; and *Western Arabia*, the desert of Petra and the peninsula of Sinai, or the country that has been called Arabia Petraea, bounded by Egypt, Palestine, Northern Arabia, and the Red Sea.

Arabia Proper, or the Arabian peninsula, consists of high table-land, some 3,000 feet above the sea-level, declining towards the north; its most elevated portions are in the chain of mountains that runs nearly parallel to the Red Sea, and attains the height of 8,500 feet, and in the territory east of the southern part of this chain. Its greatest length, from Suez to Ras-el-Hadd, is about 1800 miles; and the mean breadth between the Red Sea and the Persian Gulf, about 600 miles. The total area may be placed at a million square miles, and the population at about five millions. The high land is encircled from the 'Akabah to the head of the Persian Gulf by a belt of low littoral country with few islands or inlets; on the west and south-west the mountains fall abruptly to this low region; on the opposite side of the peninsula the fall is generally gradual. So far as the

interior has been explored, it consists of desert tracts, crossed by mountain ridges, and relieved by large districts under cultivation, well peopled, watered by wells and streams, and enjoying periodical rains. It is estimated that these numerous cultivated districts amount to about two-thirds of the whole area, leaving not more than one-third of absolutely desert wastes, chiefly in the south (Kean, *Asia*, p. 113). The watershed, as the conformation of the country indicates, stretches from the high land of the Yemen to the Persian Gulf. From this descend the torrents that irrigate the western provinces, while several considerable streams—there are no navigable rivers—reach the sea in the opposite direction: two of these traverse 'Oma; and another, the principal river of the peninsula, enters the Persian Gulf on the coast of El-Bahrein, and is known to traverse the inland province called Yemāneh. The geological formation is in part volcanic, and the mountains are basalt, schist, granite, as well as limestone, &c.; the volcanic action being especially observable about Medina on the north-west, and in the districts bordering the Indian Ocean. The most fertile tracts are those on the south-west and south. The modern Yemen is especially productive, and at the same time, from its mountainous character, picturesque. The settled regions of the interior also are more fertile than is generally supposed; and after the rains the deserts afford a fair pasturage. The principal products of the soil are date-palms, tamarind-trees, vines, fig-trees, tamarisks, acacias, the banana, &c., and a great variety of thorny shrubs, which, with others, supply pasture for the camels; the chief kinds of pulse and cereals (except oats), coffee, spices, drugs, gums and resins, cotton and sugar. Among the metallic and mineral products are lead, iron, silver (in small quantities), sulphur, the emerald, onyx, &c. The products mentioned in the Bible as coming from Arabia will be found described under their respective heads. They seem to refer, in many instances, to merchandise of Ethiopia and India, carried to Palestine by Arab and other traders. Gold, however, was perhaps found in small quantities in the beds of torrents (comp. Diod. Sic. ii. 50; iii. 45, 47); and the spices, incense, and precious stones, brought from Arabia (1 K. x. 2, 10, 15; [2 Ch. ix. 1, 9, 14.] Is. lx. 6; Jer. vi. 20; Ezek. xxvii. 22), were probably the products of the southern provinces, still celebrated for spices, frankincense, ambergris, &c., as well as for the opals and other precious stones. Among the more remarkable of the wild animals of Arabia (besides the usual domestic kinds, and of course the camel and the horse, for both of which it is famous) are the wild ass, the musk-deer, wild goat, wild sheep, several varieties of the antelope, the hare, monkeys (in the south, and especially in the Yemen); the boar, leopard, wolf, jackal, hyaena, fox; the eagle, vulture, several kinds of hawk, the pheasant, red-legged partridge (in the peninsula of Sinai), sand-grouse (throughout the country), the ostrich (abundantly in Central Arabia, where it is hunted by Arab tribes); the tortoise, serpents, locusts, &c. Lions were formerly numerous, as the names of places testify. The sperm-whale is found off the coasts bordering the Indian Ocean. Great

and Roman writers (Herod., Agatharch. *ap.* Müller, Strab., Diod. Sic., Q. Curt., Dion. Perieg., Heliod. Aethiop., and Plin.) mention most of the Biblical and modern products, and the animals above enumerated, with some others (see the *Dictionary of Geography*).

Arabia Proper may be subdivided into five principal provinces: the Yemen; the districts of Hadramaut, Mahreh, and 'Omān, on the Indian Ocean and the entrance of the Persian Gulf; El-Bahreyn, towards the head of the Gulf; the great central country of Nejd and Yemāneh; and the Hijāz and Tihāneh on the Red Sea. The Arabs also have five divisions, according to the opinion most worthy of credit: Tihāneh, the Hijāz, Nejd, El-'Arūd (the provinces lying towards the head of the Persian Gulf, including Yemāneh), and the Yemen (including 'Omān and the intervening tracts). They have, however, never agreed either as to the limits or the number of the divisions. It will be necessary to state in some detail the positions of these provinces, in order to the right understanding of the identifications of Biblical with Arab names of places and tribes.

The Yemen embraced originally the most fertile districts of Arabia, and the frankincense and spice country. Its name, signifying "the right hand" (and therefore "south"; comp. Matt. xii. 42), is supposed to have given rise to the appellation *εὐδαίμων* (Felix), which the Greeks applied to a much more extensive region. At present, it is bounded by the Hijāz on the north, and Hadramaut on the east, with the sea-board of the Red Sea and the Indian Ocean; but formerly it appears to have extended at least so as to include Hadramaut and Mahreh (Jbn-El-Wardī MS.; Yāqūt's *Mushārak* and *Majma*, and *Marāsīd*, passim; from which authorities and Fresnel's *Lettres* the geographical data of this article are mainly derived). In this wider acceptance, it embraced the region of the first settlements of the Joktanites. Its modern limits include, on the north, the district of Khawālin (not, as Niebuhr supposes, two distinct districts), named after Khawālin the Joktanite (Caussin de Perceval, *Essai sur l'Hist. des Arabes avant l'Islamisme*, i. 113); and that of Nejra, with the city of that name founded by Nejra the Joktanite (Caussin, i. 60, and 113 sq.), which is, according to the soundest opinion, the Negra of Aelius Gallus (Strab. xvi. 782; see Jomard, *Études géogr. et hist. sur l'Arabie*, appended to Mengin, *Hist. de l'Égypte*, &c., iii. 385-6).

Hadramaut, on the coast east of the Yemen, is a cultivated tract contiguous to the sandy deserts called El-Ahkāf, which are said to be the original seats of the tribe of 'Ad. It was celebrated for its frankincense, which it still exports, and formerly it carried on a considerable trade, its principal port being Dhafār, between Mirbat and Ras Sājir, which is now composed of a series of villages. To the east of Hadramaut are the districts of Shihr, which exported ambergris, and Mahreh (so called after a tribe of Kudāh, and therefore Joktanite), extending from Seyhūt to Karwān. 'Omān forms the easternmost corner of the south coast, lying at the entrance of the Persian Gulf. It presents the same natural characteristics as the preceding districts, being partly desert with large

fertile tracts. It also contains some considerable lead mines.

The highest province on the Persian Gulf is El-Bahreyn, between 'Omān and the head of the Gulf, of which the chief town is Hajar (according to some, the name of the province also). It contains the towns (and districts) of Katif and El-Ahsā, the latter not being a province as has been erroneously supposed. The inhabitants of El-Bahreyn dwelling on the coast are principally fishermen and pearl-divers. The district of El-Ahsā abounds in wells and possesses excellent pastures, which are frequented by tribes of other parts.

The great central province of Nejd and that of Yemāneh, which bounds it on the south, are little known from the accounts of travellers. Nejd signifies "high land," and hence its limits are very doubtfully laid down by the Arabs themselves. It consists of cultivated table-land, with numerous wells, and is celebrated for its pastures; but it is intersected by extensive deserts. Yemāneh appears to be generally very similar to Nejd. On the south lies the great desert called Er-Ruba el-Khāly, uninhabitable in the summer, but yielding pasturage in the winter after the rains. The camels of the tribes inhabiting Nejd are highly esteemed in Arabia, and the breed of horses was formerly the most famous in the world; but according to Mr. W. S. Blunt, the explorer, they are now rare in Nejd and of an inferior breed. In this province are said to be remains of very ancient structures, similar to those east of the Jordan.

The Hijāz and Tihāneh (or El-Ghōr, the "low land") are bounded by Nejd, the Yemen, the Red Sea, and the desert of Petra, the northern limit of the Hijāz being Eyleh. The Hijāz is the holy land of Arabia, its chief cities being Mekka and Medina; and it is traditionally the first seat of the Ishmaelites in the peninsula. The northern portion is in general sterile and rocky; towards the south it gradually merges into the Yemen, or the district called El-'Asir, which is but little noticed by either eastern or western geographers. The province of Tihāneh extends between the mountain-chain of the Hijāz and the shore of the Red Sea; and is sometimes divided into Tihāneh of the Hijāz and Tihāneh of the Yemen. It is a parched, sandy tract, with less rain and fewer pastures and cultivated portions than the mountainous country.

Northern Arabia, or the Arabian Desert

(البادية), is divided by the Arabs (who do not consider it as strictly belonging to their country) into Bādiyet Esh-Sham, "the Desert of Syria," Bādiyet El-Jezireh, "the Desert of Mesopotamia" (not "of Arabia," as Winer supposes), and Bādiyet El-'Irāk, "the Desert of El-'Irāk." It is, so far as it is known to us, a high, undulating, parched plain, of which the Euphrates forms the natural boundary from the Persian Gulf to the frontier of Syria, whence it is bounded by the latter country and the desert of Petra on the north-west and west, the peninsula of Arabia forming its southern limit. It has few oases, the water of the wells is generally either brackish or undrinkable, and it is visited by the sand-wind called *Samūm*, of which

however the terrors have been much exaggerated. The Arabs find pasture for their flocks and herds after the rains, and in the more depressed plains; and the desert generally produces prickly shrubs, &c., on which the camels feed. The inhabitants were known to the ancients as *ακνηῖται*, "dwellers in tents," or perhaps so called from their town *al Ḥanval* (Strab. xvi. 747, 767; Amm. Marc. xxiii. 6; comp. Is. xiii. 20; Jer. xlix. 31; Ezek. xxxviii. 11); and they extended from Babylonia on the east (comp. Num. xxiii. 7; 2 Ch. xxi. 16; Is. ii. 6, xiii. 20), to the borders of Egypt on the west (Strab. xvi. 748; Plin. v. 12; Amm. Marc. xiv. 4, xxii. 15). These tribes, principally claiming descent from Ishmael

and from Keturah, have always led a wandering and pastoral life. Their predatory habits are several times mentioned in the O. T. (2 Ch. xxi. 16, 17; xxvi. 7; Job i. 15; Jer. iii. 2). They also conducted a considerable trade of merchandise of Arabia and India from the shores of the Persian Gulf (Ezek. xxvii. 20-24), whence a chain of oases still forms caravan-stations (Burckhardt, *Arabia*, Appendix vi.); and they likewise traded from the western portions of the peninsula. The latter traffic appears to be frequently mentioned in connexion with Ishmaelites, Keturahites, and other Arabian peoples (Gen. xxxvii. 25, 28; 1 K. x. 15; [2 Ch. ix. 14; Is. lx. 6; Jer. vi. 20], and probably consisted of

Map of Arabia.

the products of Southern Arabia and of the opposite shores of Ethiopia: it seems, however, to have been chiefly in the hands of the inhabitants of Idumaea; but it is difficult to distinguish between the references to the latter people and to the tribes of Northern Arabia in the passages relating to this traffic. That certain of these tribes brought tribute to Jehoshaphat is stated in 2 Ch. xvii. 11; and elsewhere there are indications of such tribute (cp. passages referred to above).

Western Arabia includes the peninsula of Sinai [SINAI], and the desert of Petra, corresponding generally with the limits of Arabia Petraea. The latter name is probably derived from that of its chief city, not from its stony

character. It was in the earliest times inhabited by a people whose genealogy is not mentioned in the Bible, the Horites or Horim (Gen. xiv. 6, xxxvi. 20-22; Deut. ii. 12, 22). [HORITES.] Its later inhabitants were in part the same as those of the preceding division of Arabia, as indeed the boundary of the two countries is arbitrary and unsettled; but it was mostly peopled by descendants of Esau, and was generally known as the land of Edom, or Idumaea [EDOM], as well as by its older appellation, the desert of Seir, or Mount Seir [SEIR]. The common origin of the Idumaeans from Esau and Ishmael is traced to the marriage of the former with a daughter of the latter (Gen. xxviii. 9, xxxvi. 3). The Nabathaeans succeeded to the Idumaeans,

and Idumaea is mentioned only as a geographical designation after the time of Josephus. The Nabatheans had always been identified with Nebaioth, son of Ishmael (Gen. xxv. 13; Is. lx. 7), until Quatremère (*Mémoire sur les Nabatéens*) advanced the by-no-means accepted theory that they were of another race, and a people of Mesopotamia. [NEBAIOTH.] Petra was in the great route of the western caravan-traffic of Arabia, and of the merchandise brought up the Eilat Gulf. See preceding section, and LDM, ELATH, EZIONGEBER, &c.

Inhabitants.—The Arabs, like every other ancient nation of any celebrity, have traditions representing their country as originally inhabited by races which became extinct at a very remote period. These were the tribes of 'Ad, Thamûd, 'Ameyim, 'Abil, Tasm, Jedîs, 'Emlik (Amalek), Jerhum (the first of this name), and Webârî: some omit the fourth and the last two, but add Jâsim. The majority of their historians derive these tribes from Shem; but some, from Ham, though not through Cush.^a Their earliest traditions that have any obvious relation to the Bible refer the origin of the existing nation in the first instance to Kahtân, whom they and most European scholars identify with Joktan; and secondly to Ishmael, whom they assert to have married a descendant of Kahtân, though they only carry up their genealogies to 'Adnân (said to be of the twenty-first generation before Muhammad). They are silent respecting Cushite settlements in Arabia; but modern research, we think, proves that Cushites were among its early inhabitants. Although Cush in the Bible usually corresponds to Ethiopia, certain passages seem to indicate Cushite peoples in Arabia; and the series of the sons of Cush should, according to recent discoveries, be sought for in order along the southern coast, exclusive of Sebâ (Meroë), at one extreme of their settlements, and Nimrod at the other. The great ruins of Ma-rib or Sebâ, and of other places in the Yemen and Hadramaut, are not those of a Semitic people; and further to the east, the existing language of Mahreh (the remnant of the language of the inscriptions found on the ancient remains just mentioned) is in so great a degree apparently African, as to be called by some scholars *Cushite*; while the settlements of Khamah and those of his (tribal) sons Sheba and Idîs are probably to be looked for towards the head of the Persian Gulf, bordered on the north

by the descendants of Keturah, bearing the same names as the two latter. In Babylonia also, independent proofs of this immigration of Cushites from Ethiopia have, it is thought, been lately obtained. The ancient cities and buildings of Southern Arabia, in their architecture, the inscriptions they contain, and the native traditions respecting them, are of the utmost value in aiding a student of this portion of primeval history. Indeed they are the only important archaic monuments of the country; and they illustrate both its earliest people and its greatest kingdoms. Ma-rib, or Sebâ* (the Mariaba of the Greek geographers), is one of the most interesting of these sites (see Michaelis' *Questions*, No. 94, &c. in Niebuhr's *Arabia*). It was founded, according to the general agreement of tradition, by 'Abd-eh-Shems Sebâ, grandson of Yaarub the Kahtânite; and the Dyke of El-'Arim, which was situate near the city, and the rupture of which (A.D. 150–170, according to De Sacy; 120, according to Caussin de Perceval) formed an era in Arabian history, is generally ascribed to Lukmân the Greater, the 'Adite, who founded the dynasty of the 2nd 'Ad. 'Adites (in conjunction with Cushites) are supposed to have been the founders of this and similar structures, and were succeeded by a predominantly Joktanite people, the Biblical Sheba, whose name is preserved in the Arabian Sebâ, and in the *Sabaei* of the Greeks. But it should be remarked that El-Beladhory states that the 'Adites dwelt between Syria and the Yemen, and there is really no authority for assigning to them a southern habitat (Sprenger, *Alté Geographie Arabiens*, p. 199). It has been argued (Caussin, *Essai*, l. 42 sq.; Renan, *Langues Sémitiques*, l. 300) that the 'Adites were the Cushite Sebâ; but this hypothesis, which involves the question of the settlements of the eldest son of Cush, and that of the descent of the 'Adites, rests solely on the existence of Cushite settlements in Southern

Arabia, and of the name of Sebâ (سَبَأ) in the Yemen (by these writers inferentially identified with سَبَأ; by the Arabs, unanimously, with Sebâ the Kahtânite, or سَبَأ; the Hebrew *shin* being, in by far the greater number of instances, represented by *sin* in Arabic); and it necessitates the existence of the two Biblical kingdoms of Sebâ and Sheba in a circumscribed province of Southern Arabia, a result which we think is irreconcilable with a careful comparison of the passages in the Bible bearing on this subject. [CUSH; SEBA; SHEBA.] Neither is there evidence to indicate the identity of 'Ad and the other extinct tribes with any Semitic or Hamitic people: they must, in the present state of knowledge, be classed with the Rephaim and other peoples whose genealogies are not known to us.

The several nations that have inhabited the country are divided, by the Arabs, into extinct and existing tribes; and these are again distinguished as 1. El-'Arab el-'Aribeh (or El-'Arab el-'Arbâ, or El-'Arab el-'Aribeh), the Pure or Genuine Arabs; 2. El-'Arab el-Muta'arribeh; and 3. El-'Arab el-Musta'ribeh, the Instituted,

^a In this section is included the history. The Arab materials for the latter are meagre, and almost purely traditional. The chronology is founded on genealogies, and is too intricate and unsettled for discussion in this article; but it is necessary to observe that "son" should often be read "descendant," or "tribe descended from," and that the Arabs ascribe great length of life to the ancient people. The early sites of the Arab tribes and their identity with the names mentioned by Ptolemy have been exhaustively discussed by Sprenger, *Die alte Geographie Arabiens*, Bern, 1875, to which the student may refer for the details and theories necessarily excluded from the present article.

^b This enumeration is from a comparison of Arab authors. Caussin de Perceval has entered into some detail on the subject (*Essai*, t. ii-35), but without satisfactorily reconciling contradictory opinions; and his identifications of these with other tribes are purely hypothetical.

* Sebâ was the city of Ma-rib, or the country in the Yemen of which the city was Ma-rib. See also SHANA.

or Naturalised, Arabs. Of many conflicting opinions respecting these races, two only are worthy of note. According to the first of these, El-'Arab el-'Aribeh denotes the extinct tribes, with whom some conjoin Kahtân; while the other two, as synonymous appellations, belong to the descendants of Ishmael.⁴ According to the second, El-'Arab el-'Aribeh denotes the extinct tribes; El-'Arab el-Muta'arribeh, the unmixed descendants of Kahtân; and El-'Arab el-Musta'arribeh, the descendants of Ishmael, by the daughter of Mudâd the Jokranite. That the descendants of Joktan occupied the principal portions of the south and south-west of the peninsula, with colonies in the interior, is attested by the Arabs and supported by historical and philological researches. It is also asserted that they have been gradually absorbed into the Ishmaelite immigrants, though not without leaving strong traces of their former existence. Fresnel, however (1^{re} *Lettre*, p. 24), says that they were quite distinct, at least in Mohammad's time, and it is not unlikely that the Ishmaelite element has been exaggerated by Mohammadan influence.

Respecting the Joktanite settlers, we have some Biblical evidence. In Genesis (x. 30) it is said, "and their dwelling was from Mesha, as thou goest unto Sephar, a mount of the east [Kedem]." The position of Mesha is very uncertain; it is most reasonably supposed to be the western limit of the first settlers [MESHA]: Sephar is undoubtedly Dhafâri, or Zafâri, of the Arabs (probably pronounced, in ancient times, without the final vowel, as it is at the present day), a name not uncommon in the peninsula, but especially that of two celebrated towns—one being the seaport on the south coast, near Mirbât; the other, now in ruins, near San'â, and said to be the ancient residence of the Himyarite kings (Es-Sâghâne, MS., &c.). Fresnel (4^{re} *Lettre*, p. 516 sq.) prefers the seaport, as the Himyarite capital, and is followed by Jomard (*Études*, p. 367), whence we learn that the inhabitants call this town "Isfôr." Considering the position of the Joktanite races, this is probably Sephar; it is situate near a thuriferous mountain (*Mardsid*, in voc.), and exports the best frankincense (Niebuhr, p. 148): Zafâri, in the Yemen, however, is also among mountains [SEPHAR]. In the district indicated above are distinct and undoubted traces of the names of the sons of Joktan mentioned in Genesis, such as Hadramaut for Hazarmaveth, Azâl for Uzal, Sebâ for Sheba, &c. Their remains are found in the existing inhabitants of (at least) its eastern portion, and their records in the numerous Himyarite ruins and inscriptions.

The principal Joktanite kingdom, and the chief state of ancient Arabia, was that of the Yemen, founded (according to the Arabs) by Yaarub, the son (or descendant) of Kahtân (Joktan). Its most ancient capital was probably

San'â, formerly called Azâl (أزال, or أوزال) in the *Mardsid*, in voc. San'â), after Azâl, son of Joktan (Yâkoot). [UZAL] The other capitals

⁴ El-'Arab el-'Aribeh is conventionally applied by the lexicographers to all who spoke pure Arabic before its corruption began.

were Ma-rib, or Sebâ, and Zafâri. This was the Biblical kingdom of Sheba. Its rulers, and most of its people, were descendants of Sebâ (= Sheba), whence the classical *Sabaici* (Diod. Sic. iii. 38, 46). Among its rulers was probably the Queen of Sheba who came to hear the wisdom of Solomon (2 K. x. 1-4). The Arabs call her Bilkis, a queen of the later Himyarites; but their traditions respecting her are not worthy of credit. [SHEBA.] The dominant family was apparently that of Himyar, son (or descendant) of Sebâ. A member of this family founded the more modern kingdom of the Himyarites. The testimony of the Bible, and of the classical writers, as well as native tradition, seems to prove that the latter appellation superseded the former only shortly before the Christian era: i.e. after the foundation of the later kingdom. "Himyarite," however, is now very vaguely used.—Himyar, it may be observed, is perhaps

"red" (أحمر, حمرة, or حمير). and several places in Arabia whose soil is red-

dish derive their names from A'far (أفقر).

"reddish." This may identify Himyar (the *red man*?) with Ophir, respecting whose settlement and the position of the country called Ophir the opinion of the learned is widely divided [OPHIR]. The similarity of signification with *φωκὺς* and *ἐρυθρὸς* lends weight to the tradition that the Phœnicians came from the Erythraean Sea (Herod. vii. 89). The maritime nations of the Mediterranean who had an affinity with the Egyptians appear to have been an offshoot of an early immigration from Southern Arabia, which moved northwards, partly through Egypt. It is noticeable that the Shepherd invaders of Egypt are said to have been Phœnicians; but Manetho, who seems to have held this opinion, also tells us that some said they were Arabs (Manetho, *ap. Cory, Anc. Fragments*, 2nd ed., p. 171), and the hieroglyphic name has been supposed to correspond to the common appellation of the border Arabs. In the opposite direction, an early Arab dominion of Chaldaea is mentioned by Berosus (*Cory*, p. 60), as preceding the Assyrian dynasty. All these indications, slight as they are, must be borne in mind in attempting a reconstruction of the history of Southern Arabia.—The early kings of the Yemen were at continual feud with the descendants of Kahlân (brother of Himyar until the fifteenth in descent (according to the majority of native historians) from Himyar united the kingdom. This king was the first Tubba', a title also distinctive of his successors, whose dynasty represents the proper kingdom of Himyar, whence the *Homarite* (Ptol. vi. 7; Plin. vi. 28). Their rule probably extended over the modern Yemen, Hadramaut, and Mäzreh. The fifth Tubba', Dhu-l-Adhâr, or Zâl-Azâr, is supposed (Cassin, i. 73) to be the Ilsear of Aelius Gallus (A.D. 24). The kingdom of Himyar lasted until A.D. 525, when it fell before an Abyssinian invasion. Already, about the middle of the 4th century, the kings of Axum appear to have become masters of part of the Yemen (Cassin, *Essai*, i. 114; *Zeitschrift d. Deutsch. Morgenländ. Gesellschaft*, vii. 17 sq.).

si. 338 sq.), adding to their titles the names of places in Arabia belonging to Himyar. After four reigns they were succeeded by Himyarite princes, vassals of Persia, the last of whom submitted to Mohammad. Kings of Hadramaut (the people of Hadramaut are the classical *Chatramotitæ*, Plin. vi. 28; comp. *Adramitæ*) are also enumerated by the Arabs (Ibn-Khaldûn, *op. Caussin*, i. 135 sq.) and distinguished from the descendants of Yaarub; an indication, as is remarked by Caussin (*l. c.*), of their separate descent from Hazarmaveth [HAZARMAVETH]. The Greek geographers mention a fourth people in conjunction with the Sabaei, Homeritæ, and Chatramotitæ,—the *Minaei* or *Minnaei* (Strab. vii. 768, 776; Ptol. vi. 7, § 23; Plin. vi. 32; Diod. Sic. iii. 42), who have not been identified with any Biblical or modern name, though Sprenger compares them with the Kindites. Some place them as high as Mekka, and derive their name from Minâ (the sacred valley N.E. of that city), or from the goddess Menâh, worshipped in the district between Mekka and Medina. Fresnel, however, places them in the Wâdee Du'an in Hadramaut, arguing that the Yemen anciently included this tract, that the *Minaei* were probably the same as the *Rhabanitæ* or *Rhamanitæ* (Ptol. vi. 7, § 24; Strabo, xvi. 782), and that *'Paquaviræ'* was a copyist's error for *Ipaqviræ*.

The other chief Joktanite kingdom was that of the Hijâz, founded by Jurhum, the brother of Yaarub, who left the Yemen and settled in the neighbourhood of Mekke. The Arab lists of its kings are inextricably confused; but the name of their leader and that of two of his successors was Mudâd (or El-Mudâd), who probably represents Almodad [ALMODAD]. Ishmael, according to the Arabs, married a daughter of the first Mudâd, whence sprang 'Adnân the ancestor of Mohammad. This kingdom, situate in a less fertile district than the Yemen, and engaged in conflict with aboriginal tribes, never attained the importance of that of the south. It merged, by intermarriage and conquest, into the tribes of Ishmael (Kutb-ed-Din, ed. Wüstenfeld, pp. 35 and 39 sq.; *cp.* authorities quoted by Caussin). Fresnel cites an Arab author who identifies Jurhum with Hadoram [HADORAM].

Although these were the principal Joktanite kingdoms, others were founded beyond the limits of the peninsula. The most celebrated of these were that of El-Hireh in El-'Irâk, and that of Ghassân on the confines of Syria; both originated by emigrants after the Flood of El-'Arim. El-Hireh soon became Ishmaelitic; Ghassân long maintained its original stock. Among its rulers were many named El-Hârith. Respecting the presumed identity of some of these with kings called by the Greeks and Roman Aretas, and with the Aretas mentioned by St. Paul (2 Cor. xi. 32), see ARETAS.

The *Ishmaelites* appear to have entered the peninsula from the north-west. That they have spread over the whole of it (with the exception of one or two districts on the south coast which are said to be still inhabited by unmixed Joktanite peoples), and that the modern nation is predominantly Ishmaelite, is asserted by the Arabs. They do not, however, carry up their genealogies higher than 'Adnân (as we have already said), and they have lost the names of

most of Ishmael's immediate and near descendants. Such as have been identified with existing names will be found under the several articles bearing their names. [See also HAGARENES.] They extended northwards from the Hijâz into the Arabian desert, where they mixed with Keturahites and other Abrahamic peoples; and westwards to Idumæa, where they mixed with Edomites, &c. The tribes claiming descent from Ishmael have always been governed by petty chiefs or heads of families (sheykhs and emirs); they have generally followed a patriarchal life, and have not originated kingdoms, though they have in some instances succeeded to those of Joktanites, the principal one of these being that of El-Hireh. With reference to the Ishmaelites generally, we may observe that although their first settlements in the Hijâz, and their spreading over a great part of the northern portions of the peninsula, are sufficiently evident, there is doubt as to the wide extension given to them by Arab tradition. Mohammad derived from the Jews whatever tradition he pleased, and silenced any contrary by the Korân or his own dicta. This religious element, which does not directly affect the tribes of Joktan (whose settlements are independently identified), has a great influence over those of Ishmael. They therefore cannot be certainly proved to have spread over the peninsula; but from the concurrent testimony of the Arabs and other considerations it is probable that they now form the predominant element of the Arab nation.

Of the descendants of *Keturah* the Arabs say little. They appear to have settled chiefly north of the peninsula in Desert-Arabia, from Palestine to the Persian Gulf; and the passages in the Bible in which mention is made of Dedan (except those relating to the Cushita Dedan, Gen. x. 7) refer apparently to the tribe sprung from this race (Is. xxi. 13; Jer. xxv. 23; Ezek. xxvii. 20), perhaps with an admixture of the Cushita Dedan, who seems to have passed up the western shores of the Persian Gulf. Some traces of Keturahites, indeed, are asserted to exist in the south of the peninsula, where a king of Himyar is said to have been a Midianite (El-Mea'ûdy, *op. Schultens*, pp. 158-9); and where one dialect is said to be of Midian, and another of Jokshan son of Keturah; but these traditions must be ascribed to the Rabbinical influence in Arab history. Native writers are almost wholly silent on this subject; and the dialects mentioned above are not, so far as they are known to us, of the tribes of Keturah. [KETURAH, &c.]

In Northern and Western Arabia are other peoples which, from their geographical position and mode of life, are sometimes classed with the Arabs. Of these are AMALEK, the descendants of ESAU, &c.

Religion.—The most ancient idolatry of the Arabs we must conclude to have been little advanced beyond mere fetichism, of which there are striking proofs in the sacred trees and stones of historical times, and in the worship of the heavenly bodies, or Sabæism. With the latter were perhaps connected the temples (or palace-temples) of which there are either remains or traditions in the Himyarite kingdom; such as Beyt Ghumdân in San'â, and those of Reydân,

Be'yūnūch, Ru'eyn, 'Eyneyr, and Riām. The names of the objects of the earlier fetishism, the stone-worship, tree-worship, &c., of various tribes, are too numerous to mention. One, that of Maot, the goddess worshipped between Mekka and Medina, has been compared with Meni (Is. lxx. 11, R. V. "Deatoy." Cp. for an summary, Baethgen, *Beitr. z. Sem. Religionsgesch.* pp. 109, &c., 115, &c., and especially Wellhausen, *Skizzen und Vorarbeiten*, iii. [*Reste Arabischen Heidentumes*], 1887). Magism, an importation from Chaldaea and Persia, must be reckoned among the religions of the Pagan Arabs; but it never had many followers. Christianity was introduced into Southern Arabia towards the close of the 2nd century, and about a century later it had made great progress. It flourished chiefly in the Yemen, where many churches were built (see Philostorg. *Hist. Eccles.* iii.; Sozomen, vi.; Ewgr. vi.). It also rapidly advanced in other portions of Arabia, through the kingdom of Hireh and the contiguous countries, Ghassān, and other parts. The persecutions of the Christians, and more particularly of those of Nejran by the Tubba' Zu-n-Nuwās, brought about the fall of the Himyarite dynasty by the invasion of the Christian ruler of Abyssinia. Judaism was propagated in Arabia, principally by Karaites, at the Captivity, but it was introduced before that time: it became very prevalent in the Yemen, and in the Iliāz, especially at Kheybar and Medina, where there are said to be still tribes of Jewish extraction. In the period immediately preceding the birth of Mohammad another class (the Hanifs) had sprung up, who, disbelieving the idolatry of the greater number of their countrymen, and with leanings towards Judaism, looked to a revival of what they called the "religion of Abraham" (see Sprenger's *Leben und Lehre Mohammeds*, 2nd ed. i. 13-134). The promulgation of the Mohammadan religion overthrew paganism, and almost wholly superseded the religions of the Bible in Arabia.

Language.—Arabic, the language of Arabia, is the most developed and the richest of the Semitic languages, and the only one of which we have an extensive literature: it is, therefore, of great importance to the study of Hebrew. Of its early phases we know nothing. We have, indeed, archaic monuments of the Himyaritic (the ancient language of Southern Arabia), though we cannot usually fix their precise ages. Of the existence of Hebrew and Chaldee (or Aramaic) in the time of Jacob there is evidence in Gen. xxi. 47; and presumably Jacob and Laban understood each other, the one speaking Hebrew and the other Chaldee. It seems also from the notice in Judg. vii. 9-15, that Gideon overheard the conversation of the "Midianites, and the Amalekites, and all the children of the east" (מִדְיָנִים וְאַמְלֵקִיטִּים וְכָל בְּנֵי מִזְרָח), that in the 14th or 13th cent. n.c. the Semitic languages differed much less than in after-times. But it appears from 2 K. xviii. 26, that in the 8th century n.c. only the educated classes among the Jews understood Aramaic. With these evidences before us, and making a due distinction between the archaic and the known phases of the Aramaic and the Arabic, we believe that the Himyaritic is to be regarded as a sister of the Hebrew. and the Arabic (commonly so called) as a sister of the Hebrew and the Aramaic, or, in its classical

phase, as a descendant of a sister of these two. The division of the Ishmaelite language into many dialects is to be attributed chiefly to the separation of tribes by uninhabitable tracts of desert, and the subsequent amalgamation of those dialects, to the pilgrimage and the annual meetings of 'Okāz and other fairs where literary contests took place, and where it was of the first importance that the contending poets should deliver themselves in a language perfectly intelligible to the mass of the people congregated. Many of the meanest of the Arabs, utterly ignorant of reading and writing, were quite capable of judging of the merits of these compositions, and often formed the best authorities consulted by the lexicologists when the corruption of the language had commenced, i.e. when the Arabs, as Mohammadans, had begun to spread among foreigners.

Respecting the Himyaritic,* until lately little was known; but monuments bearing inscriptions in this language have been discovered in the southern parts of the peninsula, principally in Hadramaut and the Yemen, and some of the inscriptions have been published by Fresnel, Arnaud, Wellsted, Cruttenden, and Müller; while Fresnel found a dialect still spoken in the district of Mahreh and westwards as far as Kishim, that of the neighbourhood of Zafāri and Mirbāt being the purest, and called "Ekhilli;" and this is supposed with reason to be the modern phase of the old Himyaritic (4^e *Lettre*). Fresnel's alphabet has been accepted by the learned. The dates found in the inscriptions range from A.D. 30 (on the dyke of Ma-rib) to 604 at Hiss Ghorāb, but what era these represent is uncertain. Ewald (*Ueber die Himyarische Sprache* in Hoefer's *Zeitschrift*, i. 295 seq.) thinks that they are years of the Rupture of the Dyke, while acknowledging their apparent high antiquity; but the difficulty of supposing such inscriptions on a ruined dyke, and the fact that some of them would thus be brought later than the time of Mohammad, make it probable that they belong rather to an earlier era, perhaps that of the Himyarite empire, though what point marks its commencement is not determined. The Himyaritic in its earlier phase probably represents the first Semitic language spoken in Arabia.

The manners and customs of the Arabs† are of great value in illustrating the Bible; but supposed parallels between the patriarchal life of the Scriptures and the state of the modern Arabs must not be hastily drawn. It should be remembered that this people are in a degraded condition; that they have been influenced by Jewish contact, especially by the adoption, by Mohammad, of parts of the ceremonial law, and of rabbinical observances; and that they are not of the race of Israel. They must be regarded, 1st, as Bedawis, or people of the desert; and 2ndly, as settled tribes or townspeople.

The Bedawis acknowledge that their ancient

* I.e. the ancient language of Southern Arabia generally, not that of the Himyarites only. [Supplement from Stade, *Lehrb. d. Heb. Gr.* I. 4; the authorities in *M.V.* 10, p. xxviii.; and *Corp. Inscr. Sem.* lv. 1.—S. R. D.]

† The Arabs have impressed their national characteristics on every people whom they have conquered, except the Tartar races. The modern Egyptians are essentially an Arab people.

excellence has greatly declined since the time of Mohammad, and there cannot be a doubt that this decline began much earlier. Though each tribe boasts of its unadulterated blood and pure language, their learned men candidly admit the depreciation of national character. Scriptural customs still found among them must therefore be generally regarded rather as indications of former practices, than as being identical with them. The Bible always draws a strong contrast between the character of the Israelites and that of the descendants of Ishmael, whom the Bedawis mostly represent. Yet they are, by comparison with other nations, an essentially conservative people, retaining a primitive, pastoral life, and many customs strikingly illustrating the Bible. They are not so much affected by their religion as might be supposed: many tribes disregard religious observances, and even retain some pagan rites. The Wahhâbis, or modern Arab puritans, found great difficulty in suppressing by persuasion, and even by force of arms, such rites; and where they succeeded, the suppression was, in most cases, only temporary. Incest, sacrifices to sacred objects, &c., were among these relics of paganism. The less changed a tribe, however, the more difficulty is there in obtaining information respecting it: such a one is very jealous of intercourse with strangers even of its own nation. In Southern Arabia, for instance, is a tribe which will not allow a guest to stay within its encampments beyond the three days demanded by the laws of hospitality. This exclusion undoubtedly tends to preserve the language from corruption, and the people from foreign influence; but it probably does not improve the national character.

To the settled Arabs these remarks apply with the difference that the primitive mode of life is in a great degree lost, and Jewish practices are much more observable; while intermixture with foreigners, especially with Abyssinian and Negro concubines in the Yemen and the Hijâz, has tended to destroy the purity of blood. A Bedawî will scarcely marry out of his tribe, and is not addicted to concubinage; he considers himself, and is, quite distinct from a townsman, in habits, in mode of thought, and in national feeling. Again, a distinction should be made between the people of Northern and those of Southern Arabia; the former being chiefly of Ishmaelite, the latter of Joktanite descent, and, in other respects than settlement and intermarriage with foreigners, further removed from the patriarchal character.

Regarded in the limits we have indicated, Arab manners and customs, whether those of the Bedawis or of the townspeople, afford valuable help to the student of the Bible, and testify to the truth and vigour of the Scriptural narrative. No one can mix with this people without being constantly and forcibly reminded either of the early patriarchs or of the settled Israelites. We may instance their pastoral life, their hospitality (most remarkable of desert virtues [HOSPITALITY]), their universal respect for age (comp. Lev. xix. 32), their familiar deference (comp. 2 K. v. 13), their superstitious regard for the beard. On the signet-ring, which is worn on the little finger of the right hand, is usually inscribed a sentence expressive of submission to God, or of His perfection, &c., ex-

plaining Ex. xxxix. 30, "the engravings of a signet, Holy to the Lord" (R. V.), and the saying of Christ (John iii. 33), "He . . . hath set his seal to this, that God is true" (R. V.). As a mark of trust, this ring is given to another person (as in Gen. xli. 42). The inkhorn worn in the girdle is also very ancient (Ezek. ix. 2, 3, 11), as well as the veil. (For many illustrations, see Lane's *Modern Egyptians*.) A man has a right to claim his cousin in marriage, and he relinquishes this right by taking off his shoe, as the kinsman of Ruth did to Boaz (Ruth iv. 7, 8; see Burekhardt's *Notes on the Bedouins and Wahabys*, p. 65).

References in the Bible to the Arabs themselves are still more clearly illustrated by the manners of the modern people, in their predatory expeditions, their mode of warfare, their caravan journeys, and the like. To the interpretation of the Book of Job, an intimate knowledge of this people and their language and literature is essential.

The commerce of Arabia especially connected with the Bible has been referred to in the sections on Western and Northern Arabia, and incidentally in mentioning the products of the peninsula. Direct mention of the commerce of the south does not appear to be made in the Bible: it seems to have passed to Palestine principally through the northern tribes. Passages relating to the fleets of Solomon and to the maritime trade, however, bear on this subject, which is a curious study for the historical inquirer. The Joktanite people of Southern Arabia have always been, in contradistinction to the Ishmaelite tribes, addicted to a seafaring life. The latter were caravan merchants; the former, the chief traders of the Red Sea, carrying their commerce to the shores of India, as well as to the nearer coasts of Africa. Their own writers describe these voyages; since the Christian era especially, as we might expect from the modern character of their literature. The classical writers also make frequent mention of the commerce of Southern Arabia. It was evidently carried to Palestine by the two great caravan routes from the head of the Red Sea and from that of the Persian Gulf: the former taking with it chiefly African produce; the latter, Indian. It should be observed that the wandering propensities of the Arabs, of whatever descent, do not date from the promulgation of Islâm. All testimony goes to show that from the earliest ages the peoples of Arabia formed colonies in distant lands, and have not been actuated only by either the desire of conquest or by religious impulse in their foreign expeditions, but rather by restlessness and commercial activity.

The principal European authorities for the history of Arabia are. Schultens, *Hist. Imp. Vetus. Jactanidarum*, Hard. Gel. 1786, containing extracts from various Arab authors, and his *Monumenta Vetustiora Arabiæ*, Lug. Bat. 1740; Eichhorn, *Monumenta Antiquiss. Hist. Arabum*, chiefly extracted from Ibn-Kuteybeh, with his notes, Goth. 1775; Fresnel, *Lettres sur l'Hist. des Arabes avant l'Islamisme*, published in the *Journal Asiatique*, 1838-53; Quatremère, *Mémoire sur les Nabatéens*, 1835; Caussin, *Essai sur l'Hist. des Arabes avant l'Islamisme*, Paris, 1847-48; for the geography, Niebuhr, *Description*

de l'Arabie, Amst. 1774; Burckhardt, *Travels in Arabia*, Lond. 1839; Wellsted, *Narrative of a Journey to the Ruins of Nakeb-al-Hajar*, in *Journ. of R. G. S.*, vii. 20; his copy of Inscription, in *Journ. of Asiat. Soc. of Bengal*, iii. 1834; and his *Journal*, Lond. 1838;—Cruttenden, *Narrative of a Journey from Mokhdā to San'd*; Jouanl, *Études géogr. et hist.* appended to Mengin, *Hist. de l'Égypte*, vol. iii. Paris, 1839; Sprenger, *Das Leben und die Lehre Mohammed's*, 1869, and *Die alte Geographie Arabiens*, 1875; Müller, *Himyaritische Sage*; Pridaux, *Life of the Himyarites*; Robinson, *Biblical Researches*; Stanley, *Sinai and Palestine*; Tuch, *Essay on the Sinaitic Inscriptions*, in the *Journal of the German Oriental Soc.* xiv. 129 sq.; Palmer, *The Desert of the Exodus*; Palgrave, *Journey to Arabia*; Blunt (W. S.), *Visit to Nejd*; Doughty, *Travels in Arabia Deserta*. See also the list of works in Herzog, RE², s. v. *Arabien*. Strabo, Ptolemy, Diodorus Siculus, Pliny, and the minor geographers, should also be consulted:—for the *manners and customs of the Arabs*, Burckhardt, *Notes on the Bedouins and Wahabys*, 8vo, 1831; and for Arab life in its widest sense, Lane, *Notes on the Thousand and One Nights*, now collected under the title of *Arabian Society in the Middle Ages*, ed. by S. Lane-Poole (1883); and his *Modern Egyptians*, ed. 1860.

Some of the most important native works are still untranslated, and but few of them are edited. Abu-l-Fidā, *Hist. Antislamica*, has been edited and translated by Fleischer, Lips. 1831; and El-Idrisi, *Géographie*, translated by Jaubert, and published in the *Recueil de Voyages et de Mémoires*, by the Geogr. Soc. of Paris, 1836. Of those which have been edited are Yāqūt's Homonymous Geographical Dictionary, entitled *El-Mushtarak wa'an wa-l-Muftarak Suk'an*, ed. Wüstenfeld, Gütt. 1845; the same geographer's *Mo'jam el-Buldān*, ed. Wüstenfeld, 4 vols. Leipz. 1866-9; the *Marāsīd el-Itihād*, probably an abridgment by an unknown hand of the *Mo'jam*, ed. Juynboll, Lug. Bat. 1852-4; the *Chroniken der Stadt Mekka*, ed. and transl. Wüstenfeld, 1857-8; El-Bekry's *Geogr. Wörterbuch*, ed. Wüstenfeld, 1876; the *Biblioth. geogr. arab.* ed. De Goeje, 1876-87; Ibn-Khaldūn's *Prolegomena*, ed. Quatremère, Paris, 1858; and El-Mes'ūdī's *Prairies d'Or*, 9 vols. 1861-77.

[E. S. P.]

ARABIAN, THE (אֲרָבִי, Neh. ii. 19, vi. 1; אֲרָבִי, N-^{es}, Arabs: אֲרָבִי, Is. xiii. 20; Jer. iii. 2 [LXX. κοπόνη]: 'Araβer; *Arabes*); ARABIANS, THE (אֲרָבִיָּם, 2 Ch. xvii. 11; אֲרָבִיָּם, 2 Ch. xxi. 16, xxii. 1, xxvi. 7 (*Arvi*); Neh. iv. 1 [LXX. and A. V. v. 7]: of 'Araβer; *Arabes*). The nomadic tribes inhabiting the country to the east and south of Palestine, who in the early times of Hebrew history were known as Ishmaelites and descendants of Keturah. Their roving pastoral life in the desert is alluded to in Is. xiii. 20, Jer. iii. 2, 2 Macc. xii. 11; their country is associated with the country of the Dedanim, the travelling merchants (Is. xxi. 13), with Dedan, Tema, and Bax (Jer. xxv. 24), and with Dedan and Kedar (Ezek. xxvii. 21), all of which are supposed to have occupied the northern part of the peninsula later known as Arabia. During the prosperous reign of Jehoshaphat,

the Arabians, in conjunction with the Philistines, were tributary to Judah (2 Ch. xvii. 11), but in the reign of his successor they revolted, ravaged the country, plundered the royal palace, slew all the king's sons with the exception of the youngest, and carried off the royal harem (2 Ch. xxi. 16, xxii. 1). The Arabians of Gur-baal were again subdued by Uzziah (2 Ch. xxvi. 7). During the Captivity they appear to have spread over the country of Palestine, for on the return from Babylon they were among the foremost in hindering Nehemiah in his work of restoration, and plotted with the Ammonites and others for that end (Neh. iv. 7, A. V.). Geshem, or Gashinu, one of the leaders of the opposition, was of this race (Neh. ii. 19, vi. 1). In later times the Arabians served under Timotheus the Ammonite in his struggle with Judas Maccabaeus, but were defeated (1 Macc. v. 39; 2 Macc. xii. 10). The Zabadaeans [in Josephus, the Nabatheans, as in 1 Macc. v. 25], an Arab tribe, were routed by Jonathan, the brother and successor of Judas (1 Macc. xii. 31). The chieftain or king of the Arabians bore the name of Aretas as far back as the time of Antiochus Epiphanes and Jason the high-priest (2 Macc. v. 8; cp. 2 Cor. xi. 32). Zabdiel, the assassin of Alexander Balas (1 Macc. xi. 17), and Simaleue [in Josephus, Malchus; Vulg. *Emalchue*], who brought up Antiochus, the young son of Alexander (1 Macc. xi. 39), afterwards Antiochus VI., were both Arabians. In the time of the N. T. the term appears to have been used in the same manner (Acts ii. 11). [ARABIA.] [W. A. W.] [F.]

ARABIC LANGUAGE. See ARABIA, p. 216, and SHEMITIC LANGUAGES.

ARABIC VERSION. [VERSIONS, ASCIENT.]

ARAD (אֲרָד; A. 'Araδ, B. 'Ophp; *Arad*). A Benjamite, son of Beriah, who drove out the inhabitants of Gath (1 Ch. xvii. 15). [W. A. W.]

ARAD (אֲרָד; 'Araδ; *Arad*; exc. in Josh., where we find A. βασιλεία 'Adep, B. βασιλεία Aipδ, βασιλεία 'Araδ; *Heder*), a royal city of the Canaanites, named with Hormah and Libnah (Josh. xii. 14). The Jerus. Targum on Gen. xx. 2 has Arad for the Gerar of the Heb. text. The wilderness of Judah was to "the south of Arad" (Judg. i. 16). It is also undoubtedly named in Num. xxi. 1 (cp. Hormah in v. 3) and xxxiii. 40, "the Canaanite, the king of Arad," R. V., instead of the reading of the A. V., "king Arad the Canaanite" (see the translations of Zunz, De Wette, &c.). Jerome and Eusebius mention it (*OS.* s. nn. Arath [p. 123, 22] and 'Araḡ [p. 236, 55]), as a city of the Amorites, near the desert of Kaddes, 4 miles from Malatha (Moladah), and 20 from Hebron. This agrees with the conjecture of Robinson (ii. 101, 201, 202), who identifies it with a hill, Tell 'Arāḡ, 7½ miles from Mith (Moladah), and 16 miles from Hebron (*P. F. Men.* iii. 403, 415). [G.] [W.]

ARADUS ('Araδos; *Arados*), included in the list of places to which the decree of Lucius the consul, protecting the Jews under Simon the high-priest, was addressed (1 Macc. xv. 23). The same place as ARAD. [G.] [W.]

ARAH (אַרָה, *traveller*; Ὀρέχ; *Arce*).
1. Aa Asherite, of the sons of Ulla (1 Ch. vii. 38, LXX. c. 39. In c. 38 LXX. and Vulg. have Ἀρά, *Ara*, as renderings of אַרָה, one of the sons of Jether).

2. B. Ἦπά, *A. Apes; Area*. The sons of Arah returned with Zerubbabel, in number 775, according to Ezra ii. 5, but 652 according to Neh. vii. 10. One of his descendants, Shechiah, was the father-in-law of Tobiah the Ammonite (Neh. vi. 18). The name is written ARAS in 1 Esd. v. 10. [W. A. W.] [F.]

ARAM (אַרָם, a name of uncertain meaning [see Nöldeke, s. n. in Schenkel's *Bib.-Lex.*], the derivation "height" hardly applying to a people found chiefly in lowlands). 1. The name by which the Hebrews designated, generally, the parts of Syria lying to the north-east of Palestine, and the greater part of Mesopotamia.* It included the whole elevated region which, rising with sudden abruptness from the Jordan and the very margin of the lake of Genesareth, stretches to the banks of the Euphrates itself, contrasting strongly with the low land bordering on to the Mediterranean, the "land of Canaan," or the low country (Gen. xxi. 18; xxxiii. 18, &c.). Throughout the A. V. the word is, with only a very few exceptions (Num. xxiii. 7; 1 Ch. ii. 23; Ps. lx. title), rendered as in the Vulgate and LXX.—SYRIA, or SYRIANS, a name which, it must be remembered, does not convey the same meaning to our ears that Aram did to the Jews. [SYRIA.]

Its earliest occurrence in the Book of Genesis is in the form of Aram-naharaim, i.e. the "highland of or between the two rivers" (Gen. xiv. 10, A. V. "Mesopotamia"), but in other parts of the Pentateuch the word is used without any addition, sometimes for Aram-naharaim (cp. Num. xxi. 7 with Deut. xxi. 4; and Judg. iii. c. 10 with c. 8), and sometimes to designate a dweller in Aram-naharaim—Leban or Bethuel—"the Aramean" (see Gen. xiv. 20, xviii. 5, xxi. 20, 24; Deut. xvi. 5). Aram-naharaim was the country between the Euphrates and the Tigris; and Padan- or accurately Paddan-Aram (אֲרָם) [see the commentaries of Dillmann and Delitzsch [1887] on Gen. xiv. 20] was either another designation for this district, or more probably the name of a limited extent of flat country round HARAN (see Gen. xiv. 20; xviii. 2, 5-7; xxi. 18; xxxiii. 18; xxxv. 9, 26; xlviii. 7). In Hos. xii. 12, אֲרָם, the "field" or "plain of Aram" (A. V. the country of Syria), has been supposed to be a translation or paraphrase of Paddan-Aram. [ARAM-NAHARAIM; PADAN-ARAM; SADEH.]

Later in the history we meet with a number of small nations or kingdoms forming parts of the general land of Aram:—1. Aram-zobah (Ps. lx. title; 2 Sam. x. 6, 8), or simply Zobah, אֲרָם (1 Sam. xiv. 47; 2 Sam. viii. 3; 1 Ch. xviii. xix.). [ARAM-ZOBAB; ZOBAB.] 2. Aram

Beth-rehob (2 Sam. x. 6), or Rehob, רֶהוֹב (x. 8). In 1 Ch. xix. 6, Aram-naharaim takes the place of Beth-rehob and Ishtob. [BETH-REHOB; REHOB.] 3. Aram-maachah (1 Ch. xix. 6), or Maachah only, מַאֲחָה (2 Sam. x. 6). [ARAM-MAACHAH; MAACHAH.] 4. Geshur, "in Aram" (2 Sam. xv. 8), usually named in connexion with Maachah (Deut. iii. 14; Josh. xiii. 11, 13, &c.). [GESHUR.] 5. Ishtob, properly "the men of Tob," and so in R. V. (2 Sam. x. 6, 8 Judg. xi. 3, 5). [ISHTOB; TOB.] 6. Aram-Dammasek (Damasus; 2 Sam. viii. 5, 6; 1 Ch. xviii. 5, 6). The whole of these petty states are spoken of collectively under the name of "Aram" (2 Sam. x. 13), but as Damascus increased in importance it gradually absorbed the smaller powers (1 K. xx. 1), and the name of Aram was at last applied to it alone (Isa. vii. 8; also 1 K. xi. 25, xv. 18, &c.).

The exact position and limits of these small states cannot be defined. Aram-zobah appears to have been situated eastward of Coele-Syria, and to have extended N.E. and E. to the Euphrates; it probably included the eastern slopes of Anti-Lebanon, the highlands about Aleppo,^b and the northern part of the Syrian desert. To the S. of Zobah were Maachah and Beth-rehob, the latter bordering on the Euphrates, the former lying more to the W. and adjoining Geshur. Maachah and Geshur were closely connected (Deut. iii. 14; Josh. xii. 5, xiii. 11, 13), and formed part of the territory allotted to Manasseh, but they were never completely conquered by that tribe. Dammasek was the rich country round Damascus, and Tob probably lay eastward of *Jebel Hauran*.

In the Assyrian inscriptions the term *Aramu* or *Arimu* is applied to Mesopotamia, and to the people living on the W. bank of the Euphrates, S. of the river *Sajur*, and never to the western Aramean states. Aram-naharaim appears under the form *Naharaina* on the Egyptian monuments of the 18th and 19th dynasties; and in the reigns of Thothmes I. and III., it offered a stubborn resistance to the advance of the Egyptians in Asia. One of its kings, Chushan-rishathaim, extended his conquests to Palestine, not long after the occupation of that country by the Israelites, and held it for eight years (Judg. iii. 8, 10). At a later period the small principalities of Aram-naharaim, the *Nahiri* or *Nairi* of the Assyrian monuments, were engaged in constant wars with the Assyrian monarchs and became tributary to them. In the 11th cent. B.C., a period which synchronises with a temporary decline in the Assyrian power, Zobah was split up into several small states (1 Sam. xiv. 47); but these were consolidated into a powerful kingdom under Hadadezer, who opposed David, and was conquered by him in the war which resulted in an extension of the Jewish empire to the Euphrates (2 Sam. viii.). David also defeated the Arameans of Damascus, who had advanced to the assistance of Hadadezer, and occupied Damascus (2 Sam. viii. 5, 6); but after his death the city was wrested from Solomon by Rezon, and never retaken (1 K. xi. 23-25). Under the successors of Rezon the power of Damascus rapidly increased, and even-

* The name Aram probably appears also in the Homeric names Ἀράμους (Il. ii. 783) and Ἐπαρφοί (Od. iv. 84). Cp. Strab. xvi. 786; Grote, *Hist. of Greece*, iii. 391. On the name in the cuneiform inscriptions, see Schrader, *KAT.* on Gen. x. 22, and Fried. Delitzsch, *Paradies*, p. 257 sq.

^b Benjamin of Tudeia (*E. Trav.* 93) identifies Aram-zobah with Aleppo.

tually the name Aram was applied to it alone. [DAMASCUS.]

The Arameans were an important factor in the Assyrian state, and many of them were employed in the government service. In the reign of Sennacherib they formed part of the population of several Babylonian towns, and at a later period "bands of Syrians" were sent by Nebuchadnezzar against Jehoiakim (2 K. xxiv. 2; cp. Jer. xxxv. 11). The worship of the Aramean gods is first mentioned in connexion with Gilead, and it appears to have been introduced amongst the Jews, after the death of Jair, through the trans-Jordanic tribes which were in more immediate contact with the Aramean states (Judg. x. 6). The Aramean form of worship was adopted and introduced into Judaea by Ahaz, who sacrificed to the "gods of the kings of Syria" (2 Ch. xxviii. 23), and had an altar made after the pattern of one that he had seen at Damascus (2 K. xvi. 10-16). "In the later days of the Assyrian empire, Aramaic, the language of Aram, became the common language of trade and diplomacy, which every merchant and politician was supposed to learn, and in still later times succeeded in supplanting Assyrian in Assyria and Babylonia, as well as Hebrew in Palestine, until in its turn it was supplanted by Arabic." (Sayce, *Fresh Light from the A. Monts.* 44.) It was in this language that Rabshakeh was requested to speak (2 K. xviii. 26), and that the officers of the Persian government in Samaria wrote to king Ahasuerus (Ezra iv. 7). The Hebrew terms "to divine" (*kasom*), which is also Arabic, "to practise magic" (Deut. xviii. 10), and "idoltrous priests" (*chemarim*, 2 K. xxiii. 5), and other similar words are of Aramean origin.

According to the genealogical table in Gen. x. Aram was the son of Shem, and his brethren were Elam, or the mountainous region E. of Babylonia; Asshur, or Assyria; Arphaxad, or Chaldaea; and Lud. The children of Aram, or, according to 1 Ch. i. 17, his brothers, were Uz, and Hul, and Gether, and Mash or Meshech. The last has been identified with the mountain country, *Mons Masius*, N. of Nisibis; and Hul with Hulija, mentioned on the Assyrian monuments, as being situated in the same district.

In 2 K. xvi. 6, the Syrians are said to have come to Elath (on the Red Sea). The word rendered Syrians (R. V.) is אַרְמִיִּים, *Aromim*, which in the Keri is read *Adomim*, Edomites.

In 2 Ch. xxii. 5, the name is presented in a shortened form as Ram, אַרְמִיִּים; comp. Job xxii. 2.

2. Σύροι; *Syri*. Another Aram is named in Gen. xxii. 21 as a son of Kemuel, and descendant of Nahor. From the mention of the name with Uz and Buz it is probably identical with the tribe of Ram, to the "kindred" of which belonged "Elibu, the son of Barachel the Buzite," who was visiting Job in the land of Uz (Job xxii. 2). It is also worthy of notice that among the other descendants of Nahor are named Tebach (comp. Tibhath, 1 Ch. xix. 18) and Manach; so that the tribe was possibly one of the smaller divisions of Aram described above.

3. A. 'Αραμ, B. 'Αραμν; *Aram*. An Asherite, one of the sons of Shemer (1 Ch. vii. 34).

4. The son of Esrom, or Hexroo; elsewhere called RAM (Matt. i. 3, 4; Luke iii. 33). In

Luke, Tischendorf, Westcott and Hort, with MBZXT, read (instead of 'Αραμ) 'Αδμειρ, τοῦ 'Απρεῖ. The R. V. has Ram (marg. Aram) in Matt.; and Arni (marg. Aram) in Luke.

[G.] [W.]

ARAMITESS (אַרְמִיִּיָּה; Σύρα; *Syra*); i.e. a female inhabitant of Aram (1 Ch. vii. 14). In other passages of the A. V. the ethnic of Aram is rendered Syrian. [W. A. W.]

ARA'M-MA'ACHAH. R. V. in 1 Ch. xiv. 6. A. V. has Syria-mnachah. [ARAM (1); MAACHAH.] [W. A. W.]

ARA'M-NAHARA'IM (אַרְמִיִּי־נָהָרִים; *Aram of the two rivers*; ἡ Μεσοποταμία Σύρας; *Mesopotamia Syriac*). Ps. lx. title. Elsewhere in A. V. Mesopotamia (Gen. xxi. 10; Deut. xxiii. 4; Judg. iii. 8; 1 Ch. xix. 6). The northern portion of the country between the Euphrates and Tigris. In Dent. xxiii. 4 Pethor is said to be in Aram-naharaim; it was on the W. bank of the Euphrates, near the mouth of the R. *Sijar*, and rather in Aram-zobah. [ARAM (1); MESOPOTAMIA.] [W.]

ARA'M-ZO'BAH (אַרְמִיִּי־צוֹבָה; *Syria Zo-bal*). Ps. lx. title. In 2 Sam. x. 6, 8, A. V. has "Syrians of Zobah." An Aramean state situated eastward of Coele-Syria, and extending N.E. and E. to the Euphrates; it is elsewhere called simply ZOBAH (1 Sam. xiv. 47; 2 Sam. viii. 3, 5, 12, xxiii. 36; 1 K. xi. 23; 1 Ch. xviii. 3, 5, 9; xix. 6). [ARAM (1).] [W.]

ARA'N (אַרְן, wild goat, Sam. אַרְן; D. 'Αραμ. A. 'Αραμ, in 1 Ch. 'Αραμν; *Aran, Aram*), name of a Horite (Gen. xxxvi. 28; 1 Ch. i. 42).

[W. A. W.] [F.]

ARARAH, or more correctly ARARATH (T. 'Αραράθ; Ἀ. 'Αραράτ). A form only in Tob. i. 21 for ARARAT; cp. 2 K. xix. 37. [W.]

ARARAT (אַרְרָט; 'Αραράτ; *Ararat*), a mountainous district of Asia mentioned in the Bible in connexion with the following events:—(1) As the resting-place of the ark after the Deluge (Gen. viii. 4, "upon the mountains of Ararat," A. V.; *super montes Armeniae*, Vulg.); (2) as the asylum of the sons of Sennacherib (2 K. xix. 37; Is. xxxvii. 38; the LXX. have eis 'Αρραβαν in the latter, and the Vulg. in *terram Armeniorum* in the former passage; in both A. V. has "the land of Armenia," and R. V. "the land of Ararat"); (3) as the ally, and probably the neighbour, of Minni and Ashchenaz (Jer. li. 27). [ARMENIA.] The expression used in Gen. xi. 2, that after the Flood mankind journeyed "from the East," is explained by the cuneiform inscriptions in which the peak of Rowandiz, whereon the ark of the Chaldean Noah rested, is identified with *Kharsak Awra*, "the mountain of the East" (p. 221, n. a).

The name Ararat was unknown to the geographers of Greece and Rome (except, as Sir H. Rawlinson has shown, under the form of Alardians, Hdt. iii. 94), as it still is to the Armenians of the present day; but that it was an indigenous and an ancient name for a portion of Armenia, appears from the statement of Moses of Chorene, who gives Araratia as the designation of the

central province, and connects the name with an historical event reputed to have occurred B.C. 1750 (*Histor. Armen.* Whiston, p. 361). Jerome identified it with the great plain of the Araxes; but this view is not in accordance with the Assyrian inscriptions, in which Urardhu or Urartu (Ararat) is the country S. and E. of Lake Van, which is called Bianias on the native monuments; it would, however, be more correct to consider the name in its Biblical sense as descriptive generally of the Armenian highlands—the lofty plateau which overlooks the plain of the Araxes on the N., and of Mesopotamia on the S. We shall presently notice the characteristics of this remarkable region, which adopted it to become the cradle of the human race, and the central spot whence, after the Deluge, the nations were to radiate to different quarters of the world. It is, however, first necessary to notice briefly the opinions put forth as to the spot where the ark rested, as described in Gen. viii. 4, although all such speculations, from the

indefiniteness of the account, cannot lead to any certain result. Berosus, the Chaldaean, contemporary with Alexander the Great, fixes the spot in the Gordyean* mountains (*πρὸς τῇ ὑπὲρ τῶν Κορδυλων*, Joseph. *Ant.* i. 3, § 6), which appear to have been in Armenia, or in the modern Kurdistan, to the E. or N.E. of Assyria, and to have formed the boundary between the two countries. Berosus seems to have obtained his information from the Chaldaean records, which state that the ark of Xisuthrus or Sisuthrus rested on the mountain of Nizir, which lay east of Assyria between 35° and 36° N. lat. (*Trans. Soc. Bib. Arch.* ii. 231. See also Delitzsch, *Wo lag das Paradies*, p. 105, &c.) His opinion is followed by the Syriac and Chaldee Versions, which give ܢܝܪ as the equivalent for Ararat in Gen. viii. 4, and in a later age by the Koran. Tradition still points to the *Jebel Judi* as the scene of the event, and maintains the belief, as stated by Berosus, that fragments of the ark exist on its summit. The selection of this range was natural

Ararat.

to an inhabitant of the Mesopotamian plain; for it presents an apparently insurmountable barrier on that side, hemming in the valley of the Tigris with abrupt declivities so closely that only during the summer months is any passage afforded between the mountain and river (*Ainsworth's Travels in the track of the Ten Thousand*, p. 154). Josephus also quotes Nicolaus Damascenus to the effect that a mountain named Baris, beyond Minyas, was the spot. This has been identified with Varaz, a mountain mentioned by St. Martin (*Mém. sur l'Arménie*, i. 265) as rising to the north of Lake Van, and which appears to be the same as the modern *Sipan Daghi*. Baris, however, appears in the Book of Jubilees (ch. 5) under the fuller form of Lubar, which Epiphanius (*Adv. Haer.* i. 5) makes the boundary between Armenia and the Kurds; and the Minyas of Nicolaus Damascenus is the kingdom of the Minni (called Mana in the Vonnici inscriptions), which adjoined Ararat or Bianias (whence the modern Van) on the south-east. That the scene of an event so deeply interesting to mankind had

even at that early age been transferred, as was natural, to the loftiest and most imposing mountain in the district, appears from the statement of Josephus (*Ant.* i. 3, § 5) that the spot where Noah left the ark had received from the Armenians a name descriptive of that event, which he renders *Ἀνοβαθήριον*, and which may possibly be identical with *Nachtijevan*, on the banks of the Araxes. To this neighbourhood all the associations connected with Noah are now assigned by the native Armenians, and their opinion has been so far endorsed by Europeans that they have given the name Ararat exclusively to the mountain which is called *Massis* by the Armenians; *Aghri-Dagh*, i.e. *Painful Mountain*, by the

* The name Gordyene appears in the Karduchi of Xenophon and Strabo, and in the modern Kurds and Kurdistan. Kurdistan is represented by the Accadian Gutium, within the limits of which "the mountain of Nizir" or Rowandis was situated, and the Assyrian Kulu. Urardhu or Ararat seems to be connected with the Assyrian Urduhu, which an old geographical list (*W. A. J.* ii. 48, 13) interprets by *tilla*, "highlands."

Turks; and *Koh-i-Nûh*, i.e. *Noah's Mountain*, by the Persians. It rises immediately out of the plain of the Araxes, and terminates in two conical peaks, named the Great and Little Ararat, about seven miles distant from each other, the former of which attains an elevation of 17,000 feet above the level of the sea, and about 14,000 above the plain of the Araxes, while the latter is lower by 4,000 feet. The summit of the higher is covered with eternal snow for about 3,000 feet of perpendicular height. That it is of volcanic origin, is evidenced by the immense masses of lava, cinders, and porphyry with which the middle region is covered; a deep cleft on its northern side has been regarded as the site of its crater, and this cleft was the scene of a terrible catastrophe which occurred July 2, 1840, when the village of *Arghuri* and the *Monastery of St. James* were buried beneath the debris brought down from the upper heights by a violent earthquake. The summit of Ararat was long deemed inaccessible, and the Armenians still cling to this belief. It was first ascended in 1829 by Parrot, who approached it from the N.W.; he describes a secondary summit about 400 yards distant from the highest point, and on the gentle depression which connects the two eminences he surmises that the ark rested (*Journey to Ararat*, p. 179. See also Bryce, *Transcaucasia and Ararat*, p. 278). The region immediately below the limits of perpetual snow is barren, and unvisited by beast or bird. Wagner (*Reise*, p. 185) describes the silence and solitude that reigned there as quite overpowering. *Arghuri*, the only village known to have been built on its slopes, was the spot where, according to tradition, Noah planted his vineyard. Lower down, in the plain of Araxes, is *Nachtijevan*, where the patriarch is reputed to have been buried.

Returning to the broader signification we have assigned to the term "the mountains of Ararat," as co-extensive with the Armenian plateau from the base of *Ararat* in the N. to the range of *Kurdistan* in the S., we notice the following characteristics of that region as illustrating the Bible narrative:—(1) *Its elevation*. It rises as a rocky island out of a sea of plain to a height of from 6,000 to 7,000 feet above the level of the sea, presenting a surface of extensive plains, whence, as from a fresh base, spring important and lofty mountain-ranges, having a generally parallel direction from E. to W., and connected with each other by transverse ridges of moderate height. (2) *Its geographical position*. The Armenian plateau stands equidistant from the Euxine and the Caspian seas on the N., and between the Persian Gulf and the Mediterranean on the S. With the first it is connected by the *Acampsia*, with the second by the Araxes, with the third by the Tigris and Euphrates, the latter of which also serves as an outlet towards the countries on the Mediterranean coast. These seas were the high roads of primitive colonization, and the plains watered by these rivers were the seats of the most powerful nations of antiquity, the Chaldeans, the Assyrians, the Medes, and the Colchians. Viewed with reference to the dispersion of the nations, Armenia is the true *ὀμφαλὸς* of the world: and it is a significant fact that at the present day Little Ararat is the

great boundary-stone between the empires of Russia, Turkey, and Persia. (3) *Its physical formation*. The Armenian plateau is the result of volcanic agencies: the plains as well as the mountains supply evidence of this. Armenia, however, differs materially from other regions of similar geological formation, as, for instance, the neighbouring range of Caucasus, inasmuch as it does not rise to a sharp, well-defined central crest, but expands into plains or steppes, separated by a graduated series of subordinate ranges. Wagner (*Reise*, p. 263) attributes this peculiarity to the longer period during which the volcanic powers were at work, and the room afforded for the expansion of the molten masses into the surrounding districts. The result of this expansion is that Armenia is far more accessible, both from without and within its own limits, than other districts of similar elevation: the passes, though high, are comparatively easy, and there is no district which is shut out from communication with its neighbours. The fall of the ground in the centre of the plateau is not decided in any direction, as is demonstrated by the early courses of the rivers—the Araxes, which flows into the Caspian, rising westward of either branch of the Euphrates, and taking at first a northerly direction—the Euphrates, which flows to the S., rising northward of the Araxes, and taking a westerly direction. (4) *The climate* is severe. Winter lasts from October to May, and is succeeded by a brief spring and a summer of intense heat. The contrast between the plateau and the adjacent countries is striking: in April, when the Mesopotamian plains are scorched with heat, and on the Euxine shore the azalea and rhododendron are in bloom, the Armenian plains are still covered with snow; and in the early part of September it freezes keenly at night. (5) *The vegetation* is more varied and productive than the climate would lead us to expect. Trees are not found on the plateau itself, but grass grows luxuriantly, and furnishes abundant pasture during the summer months to the flocks of the nomad Kurds. Wheat and barley ripen at far higher altitudes than on the Alps and the Pyrenees: the volcanic nature of the soil, the abundance of water, and the extreme heat of the short summer bring the harvest to maturity with wonderful speed. At Erzurum, about 5,750 feet above the sea, the crops appear above ground in the middle of June, and are ready for the sickle before the end of August (Wagner, p. 255). The vine ripens at about 5,000 feet, while in Europe its limit, even south of the Alps, is about 2,650 feet.

The general result of these observations as bearing upon the Biblical narrative would be to show that, while the elevation of the Armenian plateau constituted it the natural resting-place of the ark after the Deluge, its geographical position and its physical character secured an impartial distribution of the families of mankind to the various quarters of the world. The climate furnished a powerful inducement to seek the more tempting regions on all sides of it; and the character of the vegetation was remarkably adapted to the nomad state in which we may conceive the early generations of Noah's descendants to have lived. [W. L. B.] [W.]

ARAU'NAH (אֲרָוֶנָה); Ges., comparing the Syriac, suggests = *titulus*; 'Opyd; Joseph. 'Opon-
rds; *Areuna*), a Jebusite who sold his threshing-
floor on Mount Moriah to David as a site for
an altar to Jehovah, together with his oxen,
for 50 shekels of silver (2 Sam. xxiv. 18-24),
or (according to 1 Ch. xxi. 25) for 600 shekels
of gold by weight. The inference from the
A. V. of 2 Sam. xxiv. 23, "these things did
Arannah, the king, give unto the king," that
he was one of the royal race of the Jebusites,
is not supported by the R. V. "All this, O king,
doth A. give," &c. His name is variously
written: אֲרָוֶנָה (2 Sam. xxiv. 16); אֲרָוֶנָה
(xiv. 18); אֲרָוֶנָה (1 Ch. xxi.; 2 Ch. iii. 1).
[ORANAN.] [R. W. B.] [F.]

ARBA (אַרְבָּא, Ges. perhaps = *homo quad-*
ratus; *Cariath-Arbe*), the progenitor of the sons
of Anak, and described as "the greatest (i.e. the
most celebrated) man among the ANAKIM;" after
him their chief city HEBRON received its name
of Kirjath-arba (Josh. xiv. 15 [B. 'Αργόβα, A.
'Αρβό], xv. 13 [B. 'Αρβόκ, A. -εκ], xxi. 11
[B. 'Αρκαρβόκ, A. 'Αρκαρβ-]). [F. W. G.] [F.]

ARBA, the city of (אַרְבָּא, A. 'Αρκαρ-
αβόκ, B. 'Αρκαρβόκ; *Cariatharbe*), Josh. xv.
13, xxi. 11. In both cases the A. V. marg. has
"Kirjath-arba," and the R. V. "Kirjath-arba"
in text; but R. V. has "the city of Arba" in
marg. of xv. 13. In Josh. xxi. 11 the A. V.,
ed. 1611, reads "the citie of Arbah," marg.
"Kirjath-arbah." [KIRJATH-ARBA.] [W.]

ARBA'H, the city of (אַרְבָּא, A. 'Αρκαρ-
αβόκ, B. 'Αρκαρβόκ; *Cariatharbe*), Josh. xv.
13, xxi. 11. In both cases the A. V. marg. has
"Kirjath-arba," and the R. V. "Kirjath-arba"
in text; but R. V. has "the city of Arba" in
marg. of xv. 13. In Josh. xxi. 11 the A. V.,
ed. 1611, reads "the citie of Arbah," marg.
"Kirjath-arbah." [KIRJATH-ARBA.] [W.]

ARBA'THITE, THE (אַרְבָּא, A. 'Αρκαρ-
αβόκ, B. 'Αρκαρβόκ; *Cariatharbe*), Josh. xv.
13, xxi. 11. In both cases the A. V. marg. has
"Kirjath-arba," and the R. V. "Kirjath-arba"
in text; but R. V. has "the city of Arba" in
marg. of xv. 13. In Josh. xxi. 11 the A. V.,
ed. 1611, reads "the citie of Arbah," marg.
"Kirjath-arbah." [KIRJATH-ARBA.] [W.]

ARBAT'TIS (T. 'Αρβάττις, N. 'Αρ-
βάτις, AN. 'Αρβάκτις; *Arbatis*), a district of
Palestine named in 1 Macc. v. 23 only. Ewald
conjectured (*Geschichte*, iv. 359, note), resting
on the reading of the Peshito Syriac (ܐܪܒܬܝܬ,
Arb), that the district N. of the Sea of
Galilee, part of which is still called *Ard el-*
Batnah, was here intended. But it seems at
least equally probable that the word is merely
a corruption of 'Αρκαρβίτιν, the province or
toparchy which lay between Neapolis and
Jericho (Reland, 192; Joseph. B. J. iii. 3, §§ 4,
5, &c.). [AKRABIM.] [G.] [W.]

ARBE'LA (ἐν Ἀρβήλοις; in *Arbellis*), men-
tioned in the Bible only in 1 Macc. ix. 2, and
there only as defining the situation of Masaloth,
a place besieged and taken by Bacchides and
Alcimus at the opening of the campaign in

which Judas Maccabaeus was killed. According
to Josephus (*Ant.* xii. 11, § 1), this was at
Arbela of Galilee, ἐν Ἀρβήλοις πόλει τῆς
Γαλιλαίας, a place which he elsewhere states to
be near Sepphoris, on the lake of Gennesareth,
and remarkable for certain impregnable caves,
the resort of robbers and insurgents, and the
scene of more than one desperate encounter
(comp. *Ant.* xiv. 13, §§ 4, 5; B. J. i. 16,
§§ 2, 3; ii. 20, § 6; *Vita*, § 37). These topo-
graphical requirements are fully met by the
existing *Irbid*,^a a site with a few ruins, including
those of a synagogue, west of *Mejdel*, on the
south-east side of the *Wady Hamām*, at the
eastern extremity of a small plain at the foot of
the hill of *Kurūn Hattin*, and overlooking the
ravine. The caverns are in both faces of the
ravine, and bear the name of *Ku'at Ibn Ma'an*
(Rob. ii. 398; Burckh. p. 331; Irby, p. 91).

There seems no reason to doubt the sound-
ness of this identification.^b The army of Bac-
chides was on its road from Antioch to the land
of Judaea (γῆν 'Ιουδα), which they were
approaching "by the way that leadeth to
Galgala" (Gilgal);^c that is, by the valley of the
Jordan in the direct line to which *Irbid* lies.^d
Ewald, however (*Geschichte*, iv. 370, note),
insists, in opposition to Josephus, that the
engagements of this campaign were confined to
Judaea proper, a theory which drives him to
consider "Galgala" as the *Jiljila* north of
Gophna. [GILOAL.] But he admits that no
trace of an Arbela in that direction has yet
come to light.

Arbela may be the Beth-arhel of Hos. i. 14,
but there is nothing to ensure it. [G.] [W.]

ARBITE, THE (אַרְבִּי, A. 'Αρβί; *de Arbi*). Paari
the Arbite was one of David's guard (2 Sam.
xxiii. 35). The word, according to Ges. and
Fürst, probably signifies a native of ARAB.
In the parallel list of Chronicles it is given as
(Ben-)Ezbai, by a change in letters not unfre-
quently occurring. [EZBAI.] The LXX. is
very corrupt: A. φαραί δ' Ἀραχεσίς, B. τοῦ
Ούραιοερχε (as if Ὀρβί); See Kennicott, *Dis-*
sert. on 2 Sam. xxiii. p. 210). [G.] [W.]

ARBO'NAI, Judith ii. 24. [See ABRONAS.]

ARCHELA'US (Ἀρχέλαος; *Archelaus*), son
of Herod the Great by Malthaké, a Samaritan,
who was also the mother of Herod Antipas.
They were brought up at Rome (Jos. *Ant.* xvii.
1, § 3). Archelaus was the elder of the two (Jos.

^a The Arbela of Alexander the Great is called *Irbid*
by the Arabic historians (Rob. ii. 399). The change
of l to d is not frequent. Moreover, the present
Irbid is undoubtedly mentioned in the Talmud as
Arbel (see Schwarz, p. 189; Reland, p. 368; Rob. iii. 343,
note).

^b First suggested in the Munich *Gel. Anzeigen*, Nov.
1836, and eagerly laid hold of by Robinson.

^c Some MSS. and the important version of the Syriac
Peshito read "Gilead;" in which case the Arbela be-
yond Jordan must be thought of. But it is hardly likely
that Josephus would be inaccurate in his topography, in
a part of the country which he knew so thoroughly.

^d The importance of the *Wady Hamām* in a military
point of view, as commanding the great north road, the
Sea of Galilee, and the important springs in the plain of
Gennesareth, is not lost sight of by Wilson (*Lands of*
the Bible, in Ritter, *Jordan*, p. 328).

B. J. i. 32, 7, and 33, 7). In an earlier will Antipas had been named king, but a later disposition, only a few days before Herod's death, took away the succession from Antipas, left him the tetrarchy of Galilee and Perea, and transferred the richer districts of Judaea and Samaria to Archelaus, with the title of king. But the inheritance was dependent on the ratification of Augustus, and the first step was to go to Rome and obtain it. Before Archelaus could do this his government was tarnished at the outset by bloodshed. The cruelties of Herod's reign began to bear fruit, and especially vengeance was demanded on the counsellors responsible for the death of the Zealots who had destroyed the eagle above the Temple gate (Jos. Ant. xvii. 6, § 3). The demand grew to a tumult; a cohort sent to quell it was atoned, and order was restored only by the slaughter in the Temple of about 3000 Jews. And then Archelaus was free to depart. At Rome, although opposed by his brother Antipas, he found favour with Augustus, who declared him the most worthy competitor (*ἀξιότατον τῆς βασιλείας*, Jos. Ant. xvii. 9, § 7), but postponed the final decision. Now came the news from Judaea of worse disorders. Another struggle had taken place again at a feast and again in the Temple. Sabinus, the Roman procurator during the interregnum, had burned the Temple courts, plundered the treasure, and was now himself besieged. Judas, the robber captain, was master of Galilee; and Simon, Athronges, and Herod's dismissed soldiers, all contributed to the disorder. Peace was restored by Varus, legate of Syria, at the head of a powerful army, and 2000 of the rebels were crucified. It was time that the question of the succession should be settled. Archelaus, Antipas, and Philip were all present to plead their cause; but besides these, an embassy of fifty Jews, backed by 8000 of their countrymen in Rome, came to pray to be delivered from such rulers as Herod and Archelaus, and to be placed under the direct government of Rome, as an appendage (*προσθήκη*) to the province of Syria. The message (*πρεσβεία*) sent after Archelaus, "We will not have this man to reign over us," puts it beyond a doubt that his journey to receive a kingdom suggested a feature in the parable of Luke xix. 12 sq. The sacred use made of the history of a bad man finds a parallel in the case of the "unjust judge" in the preceding chapter (Luke xviii. 3). Augustus now decided the matter by confirming the division appointed by Herod's final will. Archelaus retained Judaea, Idumaea, and Samaria, with a revenue three times as large as that of Antipas. But his title was to be ethnarch, and that of king was only promised conditionally on his showing he deserved it (Jos. Ant. xvii. 11, § 4). So Asander had been ethnarch of the Bosphorus, and was promoted by Augustus to be "king" of the same district (Lucian, *Macrob.* 17, quoted by Anger). At this point Matt. ii. 22 may be noticed, though the exact period of Archelaus' government at which Joseph returned from Egypt is not ascertained. At any rate it took place after sufficient evidence had been given of Archelaus' cruel disposition, either by his massacres (Passover, B.C. 4), or in other ways. But the difficulty of the text lies in the word "reigns" (*βασιλεύει*). Archelaus was never

king as Herod intended him to be. Augustus made him ethnarch, and as ethnarch he is described on his coins. It may here be added that on these coins he bears the family name of Herod (see Madden, *Coins of the Jews*, p. 117). However, inasmuch as his assumption of the dignity of king was a principal ground of Antipater's attack upon him (*ἐπικαλῶν προδοθῆσιν ἐπὶ θρόνου βασιλείου, καὶ δικῶν διαλύσει ὡς ὑπὸ βασιλέως γενομένης*, Jos. Ant. xvii. 9, § 5), he may well have been popularly known as *βασιλεύς*, and indeed Josephus himself (Ant. xviii. 4, 3) speaks of him under that title. Herod Antipas the tetrarch is also called "the king" (*ὁ βασιλεύς*, Matt. xiv. 9; Mark vi. 14). The rule of Archelaus lasted ten years, B.C. 4 to A.D. 6. Like all the Herods, he was a great builder, but beyond this we know little of his public acts. In his private life he gave cause of offence to his subjects by divorcing his wife Mariamme to marry Glaphyra, who had been the wife, first of his brother Alexander, and then of Juba, king of Mauretania. The fact that there was issue of her marriage with Alexander prevented her marriage with Archelaus being admissible under the law of Levirate. Finally, A.D. 6, another deputation both from Judaea and Samaria went to Rome, and their complaints of his cruelty led Augustus to send at once for Archelaus. He confronted him with his accusers, condemned him, and sentenced him to banishment at Vienne (Jos. Ant. xvii. 13, § 2), where he died (Strabo, xvi. 2, 46). His tomb however was shown near Bethlehem (Jerome, *OS.* p. 135, 12, s. r. Bethlehem). On his coins he is called "Herod, Ethnarch" (Madden, *Coins of the Jews*, p. 115), and Dio Cassius (lv. 27) calls him "Herod the Palestinian." See Schörer, *N. T. Zeitgesch.* § 17. [E. R. B.]

ARCHERY. [ARMS.]

AR'CHEVITES (אַרְכֵּי־וֵיטָי [Archi]; B. אַרְכֵּי־וֵיטָי. A. Ἀρχαῖοι; *Archuæi*), the inhabitants of ERECH or Warka, one of the Babylonian cities mentioned in Gen. x. 10 (Schrader, *KAT.* p. 94, &c.); some of whom had been placed as colonists in Samaria (Ezra iv. 9. Cp. Berthelemy, *Ryssel in loco*). [W. L. B.] [F.]

AR'CHI (אַרְכִּי; B. Χαταρθεῖ, A. Ἀρχαταρθεῖ; *Archi*), Josh. xvi. 2. [ARCHITE.] [W. A. W.]

ARCHIPPUS (Ἀρχιππος; *Archippus*), a Christian entrusted with office (*διακονία*) in the Church to the discharge of which he is bid to take heed (Col. iv. 17). In respect of his ministry he is a fellow-soldier (*συνστρατιώτης*) of St. Paul and Timothy, and is thus greeted by them (Philem. 2). In the verse quoted his name follows those of Philemon and Apphia, and he must therefore from the private character of the letter have been closely connected with Philemon, perhaps his son. The return of Onesimus to Colossae (Col. iv. 9) has been held to prove that Philemon, and therefore also Archippus, lived there. But as this proof is not conclusive respecting Philemon, so it is still less so respecting Archippus. He may have been greeted in a letter to Philemon, even though not habitually resident in his house. Laodicea is "within a walk" from Colossae.

The message in Col. iv. 17 is apparently the last clause of a message to Laodicea, which is to be conveyed by the Colossians, "Greet them, cause them to read your letter, and say to Archippus." We may follow Wieseler in this view of the passage, and conclude with him that Archippus' ministry was exercised at Laodicea, without going on to Wieseler's further conclusion that Philemon therefore also lived at Laodicea, and that "the Epistle from Laodicea" was the Epistle to Philemon, a wholly untenable suggestion. It is impossible to fix the nature of the *καστορία* exercised by Archippus. Bp. Lightfoot suggests that he was either a presbyter or an evangelist, not a deacon. He also calls attention to the coincidence between this warning to the pastor of Laodicea and the warnings to the same church, Rev. iii. 14-19 (see Bp. Lightfoot, *Epp. Cl. and Philm.*, Philem. Introduction, whose view has been followed throughout; also Wieseler, *Chron. Ap. Zeitalt.* p. 452). Tradition makes Archippus bishop of Laodicea, e.g. *Apost. Const.* vii. 46. There is a story of his martyrdom at Chonae near Laodicea. He was buried (χώνευται) up to his middle in a pit, pricked by the thorns by their pencils (γυφασία), and finally stoned (*Mem. Græc. Basil.* i. 206). [E. R. B.]

ARCHITE, THE (אֲרִיכִי, as if from a place named Erech, אֶרֶךְ; 2 Sam. xv. xvi., B. δ' ἀρχιτέρας (A. ἀρχιτέρας, for δ' Ἀρχι, τέρας); 2 Sam. xvii., A. δ' Ἀραχί, B. -χει; 1 Ch. δ' ἄραχτορ φίλος; *Archites*), the usual designation of David's friend Hushai (2 Sam. xv. 32, xvi. 16, xvii. 5, 14; 1 Ch. xxvii. 33).

The word also appears (somewhat disguised, it is true, in the A. V.) in Josh. xvi. 2, where "the borders of Archi" (i.e. "the Archite," R. V. "the Archites") are named as on the boundary of the "children of Joseph," and in the neighbourhood of Bethel. The name appears to be preserved in *Ain Arik*, a small village 5 miles W.S.W. of Bethel, which is marked on the map of Marino Sanuto, 1321 A.D., as *Archia* (P. F. Mem. iii. 7). No town of the name of אֲרִי appears in Palestine. Is it possible that, as in the case of the Gerizi, the Zamarites and the Jebusites, we have here the last faint trace of one of the original tribes of the country? [G.] [W.]

ARCHITECTURE. The Book of Genesis appears to divide mankind into two great characteristic sections, viz. the "dwellers in tents" and the "dwellers in cities;" it tells us further, that Cain was the founder of a city, and that among his descendants one, Jubal, was the "father" of the tent-dwellers, while Tubal-cain was the "instructor of every artificer in brass and iron" (Gen. iv. 17-22). These last are probably for the most part dwellers in towns; and thus the arts of architecture and metallurgy became from the earliest times characteristic of the city-dwelling, as distinguished from the nomadic tendency among the races of mankind.

To the race of Ham, and especially to Nimrod, is attributed, in Gen. x. 10, 11, the founda-

tion of the cities of Babylon, Erech, Accad, and Calneh, in the plain of Shinar; while to that of Shem, especially to Asshur, is assigned the foundation of Nineveh, Calah, Resen, and Rehoboth. Whether by this last name a separate city be meant, or only the suburbs of one of the other places named, is not important to consider here (see Schrader, *KAT.* pp. 100, 101). Of Resen (possibly the Risin of the Assyrian Monuments, Schrader, *l. c.*) the writer says that it was a "great city," viz. at the time at which he wrote, i.e. probably as early as the 13th century B.C., if not still earlier. From the same Book we obtain an account of the earliest recorded building, and of the materials employed in its construction, the so-called Tower of Babel, with which the structure called Birs-Nimroud was long believed to be identical. For descriptions of the several towns mentioned above the reader is referred to the separate articles under their names; but of the ruined Birs-Nimroud, which beyond all doubt represents both in site and in plan a previous structure of a much earlier date, the remark may be made which applies to most other remains of ancient buildings in Southern Chaldaea and Mesopotamia, that it was mainly constructed of brick. The greater part of the structure of the Birs-Nimroud has been reduced by fire to an almost shapeless mass of ruin, though vast numbers of bricks have been drawn out of it inscribed with the name of Nebuchadnezzar, its builder. In other structures masses of walling still remain composed of bricks, many of them dried in the sun, but many carefully burnt in the kiln, highly glazed and coloured, and bearing inscriptions; and in some cases laid with reeds between the courses, and firmly cemented with bitumen, the "slime" with which the valley of the Euphrates so remarkably abounds, and which gives its name to the ruined city of Mugheir ("city of bitumen." Cp. Gen. iv. 17, 20, 22, x. 8-12, xi. 2, 3-11; Bohm, *Early Travellers*, p. 100; Vaux, *Nin. and Persep.* pp. 173, 178; Pietro della Valle, *Viaggi*, vol. ii. 844, 862; Loftus, *Chald.* p. 198; Perrot et Chippiez, *Hist. de l'Art dans l'antiquité*, passim; Layard, *Nineveh*, ii. 221, 249, 278; *Nin. and Bab.* p. 531; Rawlinson, *Anc. Mon.* ii. 534; Babelon, *Man. d'Archéologie Orientale*, passim).

Whether the Cushite race by which lower Chaldaea was colonised and Babel built was imported into that country from Africa is not a question to be discussed here, but we see plainly that both they and the dominant race of the Egyptian people were alike descended from Ham, while that of Asshur, the inhabitants of the upper region in which Nineveh, though perhaps not built by them, was situated, was derived from Shem (Gen. x. 6, 10, 11, 22). Certain it is that strong resemblances exist between the Assyrian architecture of Nineveh and that of Egypt (Layard, ii. 206 sq.), and thus the oldest known architecture in the world is beyond all doubt connected in style also with that which appears to come next to it in the order of historical record. We may say then that, so far as is known at present, the race of Ham were the earliest builders among the human race, as in some respects their buildings surpass in grandeur and impressive solemnity, as some of them surpass greatly in size, any now

Q

* Compare Josh. xviii. 18, where "Jebusi" should be translated "the Jebusite" (R. V.), as it has been in xv. 8.

BIBLE DICTIONARY.—VOL. I.

remaining that have come after them. We may add that from the same original stock came the races denoted by the names Canaan and Sidon, of whose architectural works in some form or other remains may perhaps still be traced in Syria, and whose towns, many of them fortified, were planted over the country long before the occupation of it by the Israelites. Of towns in one part or other of that region two at least may claim a very remote but well authenticated antiquity: Damascus, whose origin, probably Semitic, is earlier in date than the time of Abraham; and Hebron, of Hittite (i.e. Canaanite) origin, which is said to have been built seven years before Zoan in Egypt. If the identification of Zoan or Tanis with Avaris, the city founded by the shepherd kings, be accepted, this date would carry back the origin of Kirjath-arba or Hebron to a period not later than 2,000 B.C. (Gen. xiii. 18, xiv. 13; Num. xiii. 22; Josh. xiv. 15; 1 K. iv. 13; Manetho, *apud* Joseph. c. Ap. i. 14; Fergusson, *Hist. of Arch.* i. 112). The Israelites were by occupation shepherds, and by habit dwellers in tents (Gen. xlvii. 32; xlviii. 3), and the "house" built by Jacob at Succoth is probably no exception to this statement (Gen. p. 192), but during their slavery in Egypt they were compelled, together with other Egyptian captives, to labour at the buildings of their Egyptian masters, for whom it is said that they built the cities of Pithom and Raameses (Ex. i. 11; P. Smith, *Hist. of World*, i. 147; Wilkinson, *Anc. Egypt*, ii. 195 [1878]). When they entered Palestine, we know that in many cases they occupied the cities which they found there, but in some of the low lands they perhaps built for themselves abodes of sun-dried bricks, whose ruins may still perhaps be found in the "tells" or heaps of rubbish in the plain of Esdraelon, and in the Jordan valley (Deut. vi. 10; Josh. xxiv. 13; *Survey of Western Pal.* vol. ii. p. 129; Conder, *Tent Life*, ii. 46). The native limestone which abounds in Palestine would supply a ready material for building (Deut. xxii. 8), but, from some reason or other, the Israelites do not appear to have undertaken any great architectural work until the time of David. Even the ark of God dwelt "within curtains" (2 Sam. vii. 2); but David made large collections of materials, and prepared careful plans for a sumptuous building to contain it, which however it was reserved for Solomon to complete, in great measure, with imported materials and foreign workmen (1 K. v.-x.; 1 Ch. xxviii. xxix.). Besides the Temple and his other great works of various kinds in and near Jerusalem, Solomon built fortresses and cities in various places, among which the names and sites of Balaith and Tadmor are in all probability represented by the modern superstructures of Baalbek and Palmyra (1 K. ix. 15, 24). Among the succeeding kings of Israel and of Judah more than one is recorded as a builder: Asa (1 K. xv. 23), Baasha (xvi. 17), Omri (xvi. 24), Ahab (xvi. 34, xxii. 39), Hezekiah (2 K. xx. 20; 2 Ch. xxxii. 27, 30), Jehoash and Josiah (2 K. xii. 11, 12; xxii. 6); and, lastly, Jehoiakim, of whose winter palace, or apartments, mention is made (Jer. xxii. 14; xxxvi. 22. See also Hos. viii. 14; Amos iii. 15).

On the return from the Captivity the chief care of the Jewish rulers was to rebuild the

Temple and the walls of Jerusalem in a substantial manner with stone and timber from Lebanon (Ezra iii. 7-10, v. 8; Neh. ii. 8, iii. 7-10), and no doubt both in public and in domestic architecture about this time the Jews borrowed much from the people among whom they had lived (Ezek. viii. 10, xxiii. 14, 15; Hagg. i. 4; Layard, *Ninveh*, ii. 307, 308). During the government of the Maccabees the fortress (Baris), called afterwards by Herod Antonia, was erected for the defence of the Temple and of the city (1 Macc. iv. 60; Joseph. *Ant.* xiii. 11, § 2; xv. 11, § 4); but the reigns of Herod and his successors were especially remarkable for display in architecture. The Temple was restored with great magnificence, and Jerusalem was strengthened with fortifications and embellished with public buildings. Besides these great works, Caesarea was built on the site of Strato's tower, aqueducts for the town and a harbor constructed, Samaria enlarged and the name Sebaste given to it, and the town of Agrippium built; and Herod the Great carried his love of architecture, combined with a desire to gratify his Roman patrons, so far as even to adorn with buildings cities not within his own dominions (Joseph. *Ant.* xv. 9, §§ 5, 6; 11, § 4; xvi. 5, § 3;—*B.J.* i. 21, §§ 1, 2, 10, 11). His son Philip, the tetrarch, enlarged the old Greek colony of Paneas, and called it in honour of Tiberius, Caesarea, to which his own name was added, while his brother Antipas founded the city of Tiberias, and adorned the towns of Sepphoris in Galilee and Betharamphtha beyond Jordan, giving to the latter the name Julius, or Livias, in honour of the mother of Tiberius (Joseph. *Ant.* xviii. 2, 1; Hieron. *de Sit. et Nom.* vol. iii. 173, 174; Reland, *Geog.* p. 497).

Of these buildings, including aqueducts, which perhaps may be regarded rather as engineering than as architectural works, remains exist in a more or less imperfect condition in various places, especially Jerusalem, Sebastieh (Samaria), Jebel Fureidis (Herodium), Sebbeh (Masada), Hebron, and others, besides the outlying but much more perfect and magnificent remains of Roman construction at Baalbek and Palmyra. The huge stones employed in the Assyrian, Egyptian, and Persepolitan buildings find their parallel in the substructions of Baalbek, more ancient than the superstructure, and also in those of the Temple at Jerusalem, relics of the building either of Herod or even perhaps of Solomon (Layard, *Nin.* ii. 317, 318; Robinson, i. 286, iii. 511). But though Palestine is a land of ruins, not many connected relics of public buildings of a more remote antiquity than the time of Herod can be traced; nevertheless, in tombs excavated from the rock, in cisterns and reservoirs, in towers built in vineyards, and in rock-cut wine-presses, but especially in the watercourse beneath the Temple lately explored, the remains of construction of a more ancient date must be acknowledged. Perhaps also some traces of Phœnician or Canaanite work in the neighbourhood of Tyre may be believed to exist (*Survey of Western Pal.* i. 63, 80, 81, 184; ii. 211, 350; iii. 85, 90, 335, 441; Thomson, *Land and Book*, xiii. 178-194, 468). But after the Roman conquest, during the 2nd and 3rd centuries A.D., while Galilee was inhabited by Jews, they built many synagogues, of which the re-

mains exist, some of them of considerable importance, and in a tolerable state of preservation. In these Greek and Roman styles of architecture are combined with features which are especially Jewish; and although they probably belong to dates later than that of any Book in the sacred Volume, they doubtless reproduce some of the national characteristics of the earlier period, and are thus of great service in illustrating the history of its architecture (*Survey of Pal.* i. 232 and iii.; *Notes on Architecture*, p. 441 sq.). The extent to which the architecture of Palestine was indebted to foreign models as well as foreign workmen has already been noticed. We may add that the Books of Nehemiah and Esther make mention of the palace at Susa, in which the Persian kings resided during the spring months, and where Artaxerxes Longimanus was residing when he gave Nehemiah permission to undertake his work (*Neh.* i. 1), while the Book of Esther describes some of its arrangements (*Esth.* i. 2, 6). The books of Judith and Tobit also mention, and to some extent describe, the city of Ecbatana, the royal city of the Median monarchs (*Jud.* i. 1-4; *Tob.* iii. 7, xiv. 14; *Herod.* i. 98; *Fergusson, Hist. of Architecture*, i. 200, 201; *Loftus, Chaldaea*, pp. 339-380; *St. Clair, Buried City of Jerusalem*, p. 25). See CITIES, FENCED CITIES, HOUSE, POOLS, SYNAGOGUES, BABYLON, JERUSALEM, &c. [H. W. P.]

ARCTURUS. The Hebrew words אֲרִכְתָּר, 'Ash, and אֲרִכְתָּר, 'Aish, rendered "Arcturus" in the A. V. of Job ix. 9, xxxviii. 32, in conformity with the Vulg. of the former passage [*in xxxviii. 32*, the Vulg. has a different rendering, *esperum super filios terrae*], are now generally believed to be identical, and to represent the constellation Ursa Major, known commonly as the Great Bear, or Charles's Wain (R. V. "the Bear" in both passages. See Ges. s. n., and Delitzsch on Job ix. 9). Niebuhr (*Desc. de l'Arab.* p. 101) relates that he met with a Jew at Samā, who identified the Hebrew 'Ash with the constellation known to the Arabs by the name *Om en-na'sh*, or *Na'sh* simply, as the Jew of Bagdad informed him. The four stars in the body of the Bear are named *En-na'sh* in the tables of Ulugh Beigh, those in the tail being called *el Benāt*, "the daughters" (cp. Job xxxviii. 32, אֲרִכְתָּר, A. V. "his sons," R. V. "her train"). The ancient Versions differ greatly in their renderings. In the LXX. of Job ix. 9 the word corresponding in order to 'Ash is Πλειάδα, the "Pleiades" (Ἀρκτοῦρον corresponding to אֲרִכְתָּר; in the A. V. and R. V. "Pleiades"), and in the LXX. of Job xxxviii. 32 the word corresponding to 'Aish is Ἑσπερον, "Hesperus," the evening star. In the former they are followed or supported by the Chaldee, in the latter by the Vulgate. R. David Kimchi and the Talmudists understood by 'Ash the tail of the Ram or the head of the Bull, by which they are supposed to indicate the bright star Aldebaran in the Bull's eye. But the greatest difficulty is found in the rendering of the Syriac translators, who give as the equivalent of both

'Ash and 'Aish the word לוֹחֵץ, *Iyutho*, which is interpreted to signify the bright star Capella in the constellation Auriga (see Ges.),

and is so rendered in the Arabic translation of Job. On this point, however, great difference of opinion is found. Bar Ali conjectured that *Iyutho* was either Capella or the constellation Orion; while Bar Bahlul hesitated between Capella, Aldebaran, and a cluster of three stars in the face of Orion. Following the rendering of the Arabic, Hyde considered 'Ash and 'Aish distinct; the former being the Great Bear, and the latter the bright star Capella, or α of the constellation Auriga. [W. A. W.] [F.]

ARD (אֲרָד; 'Apδδ; *Ard*). 1. The youngest son of Benjamin (*Gen.* xli. 21), according to the Heb. and Vulg. texts; but according to the LXX. son of Gera, grandson of Bela, and great-grandson of Benjamin. Cp. 1 Ch. vii. 6, viii. 1-3. 2. Son of Bela, and grandson of Benjamin (*Num.* xxvi. 40; LXX. v. 44, B. 'Aδδρ, AF. 'Aδδρ; *Herod.*), written Addar in 1 Ch. viii. 3 (אֲרָד; A. 'Apδδ, B. 'Aδδ; *Addar*). His descendants are called THE ARDITES (אֲרִידִיתִים; *Num.* xxvi. 40. [W. A. W.] [F.]

AR'DATH—"the field which is called Ardath"—2 Esdras ix. 26. In the Syriac and Aethiopic Versions it is called ARPHAD (cp. Is. x. 9; *Jer.* xlix. 23). Volkmar (*Eind. in d. Apokr.* ii. 131) and others take the name to be a corruption for Arbath, "desert," and to be expressive of the then condition of the land (cp. 2 Esd. x. 21, 22). [F.]

ARDITES, THE. [ARD.]

AR'DON (אֲרִדֹן; BA. 'Opρά, T. 'Apδών; *Ardon*), the son of Caleb, the son of Hezron, by his wife Azubah (1 Ch. ii. 18). [W. A. W.]

ARE'LI (אֲרֵלִי, perhaps son of a hero; Sam. אֲרֵלִי; *Arel*), a son of Gad (*Gen.* xli. 16, A. 'Aρρηλῆς, D. 'Aρηλῆς; *Num.* xvi. 17, LXX. v. 26, B. 'Aρηλῆ, A. omits). His descendants are called THE ARELITES (*Num.* xxvi. 17, LXX. v. 26, B. δ 'Aρηλῆ, A. omits). [W. A. W.] [F.]

AREOPAGITE (Ἀρεοπαγίτης; *Areopagita*). A member of the court of Areopagus (*Acts* xvii. 34). [See DIONYSIUS.] [W. A. W.]

AREOPAGUS or **MARS' HILL** (δ 'Aρεος πᾶγος, i.e. the hill of Ares or Mars; *Areopagus*, Vulg.) was a rocky height in Athens, opposite the western end of the Acropolis, from which it is separated only by an elevated valley. It rises gradually from the northern end, and terminates abruptly on the south, over against the Acropolis, at which point it is about fifty or sixty feet above the valley already mentioned. Of the site of the Areopagus, there can be no doubt, both from the description of Pausanias and from the narrative of Herodotus, who relates that it was a height over against the Acropolis, from which the Persians assailed the latter rock (*Paus.* i. 28, § 5; *Herod.* viii. 52). According to tradition it was called the hill of Mars (Ares), because this god was brought to trial here before the assembled gods by Neptune (Poseidon), on account of his murdering Halirrhothius, the son of the latter. The spot is memorable as the place of meeting of the Council of Areopagus (ἡ ἐν 'Aρείῳ πᾶγῳ βουλῆ), frequently called the Upper

Council (ἡ ἑνὴς βουλῆς) to distinguish it from the Council of Five Hundred, which held its sittings in the valley below the hill. It existed as a criminal tribunal before the time of Solon, and was the most ancient and venerable of all the Athenian courts. It consisted of all persons who had held the office of Archon, and who were members of it for life, unless expelled for misconduct. It enjoyed a high reputation, not only in Athens, but throughout Greece. Before the time of Solon the court tried only cases of wilful murder, wounding, poison, and arson; but he gave it extensive powers of a censorial and political nature. The Council is mentioned by Cicero (*ad Fam.* xiii. 1; *ad Att.* i. 14, v. 11), and continued to exist even under the Roman

emperors. Its meetings were held on the south-eastern summit of the rock. There are still sixteen stone steps cut in the rock, leading up to the hill from the valley of the Agora below; and immediately above the steps is a bench of stones excavated in the rock, forming three sides of a quadrangle, and facing the south. Here the Areopagites sat as judges in the open air (*ὁπαλοῖσι ἐδιδάκτο*, Pollux, viii. 118). On the eastern and western side is a raised block. The blocks are probably the two rude stones which Pausanias saw there, and which are described by Euripides as assigned, the one to the accuser, the other to the criminal, in the cases which were tried in the court (*Iph. T.* 951). The Areopagus possesses peculiar interest to the

Areopagus or Mars' Hill at Athens, showing the steps that led from the Agora to the top of the hill.

Christian, as the spot from which St. Paul delivered his memorable address to the men of Athens (*Acta* xvii. 22-31). It has been supposed by some commentators that St. Paul was brought before the Council of Areopagus; but there is no trace in the narrative of any judicial proceedings. St. Paul "disputed daily" in the "market" or Agora (xvii. 17). [See *ATHENS*.] Attracting more and more attention, "certain philosophers of the Epicureans and of the Stoicks" brought him up from the market-place, probably by the stone steps already mentioned, to the Areopagus above, that they might listen to him more conveniently. Here the philosophers probably took their seats on the stone benches usually occupied by the members of the Council, while the multitude stood upon the steps and in the valley below. For details,

see *Dict. of Gr. and Rom. Ant.* art. *Areopagus*; *Dict. of Gr. and Rom. Geogr.* i. p. 281. [W. S.]

A'RES (*Apes*; *Ares*). *ARAH* No. 2 (1 Esd. v. 10). [W. A. W.]

AR'ETAS (*Apéras*; in inscriptions *ΑΡΕΤΑΣ* with distinctive title *ΦΙΛΟΣ* *ΕΘΝΟΥ*, "friend of his people" [Doughty, quoted below]), a common appellation of several Nabathean kings. (For Nabathæan, see *ΝΕΒΑΙΟΤΗΝ*.) Their capital was Petra [*SELA*].

1. The contemporary of Antiochus Epiphanes (B.C. 170) and of Jason (2 Macc. v. 8). [B. F. W.]

2. "Aretas the king" (2 Cor. xi. 32). The ethnarch of this Aretas endeavoured to arrest St. Paul in Damascus, but he was let down the wall in a basket and escaped his enemies. [W.]

must now endeavour to identify this Aretas, and fix his date. Josephus (*Ant.* xvi. 9, § 4) mentions the accession of Aeneas, who thereupon changed his name to Aretas. This happened B.C. 7. Herod Antipas married the daughter of an Aretas, and had lived with her "a long time" (*Jos. Ant.* xviii. 5, § 1), when he determined to divorce her to make room for Herodias (prob. A.D. 29, Wieseler). If Aretas Aeneas and Aretas the father-in-law of Antipas are the same man, his reign must have lasted from 40 to 50 years, as the revenge of the latter took place A.D. 36. This has received confirmation from the recent discoveries of Doughty (*Documents épigraphiques recueillis dans le Nord de l'Arabie*, Paris, 1884). Inscription 3 is dated in the 48th year of this Aretas, i.e. A.D. 40. In A.D. 41 he was succeeded by Malku (*Inscr.* 1). The difficulty is how it came about that, at the date of St. Paul's escape, Damascus was again a part of the Nabathean kingdom, as is implied by the rule there of the ethnarch of Aretas. [For Ethnarch, see GOVERNOR.] It had been part of that kingdom under an earlier Aretas (*Jos. Ant.* xiii. 15, § 2), B.C. 85. Since that date it had changed masters five times (Anger, *de Temp.* p. 175), reverting after Cleopatra's rule to the Romans. The difficulty to be dealt with arises from conflicting hypotheses as to the way in which Damascus passed to Aretas.

1. The first hypothesis is that it was taken by force. In support of this view the coincidence is alleged that in A.D. 36, shortly before the probable time of St. Paul's escape, Aretas, father-in-law of Antipas, irritated by the insult to his daughter and by boundary disputes, had sent an army into the territories of the latter and had won a great victory (*Jos. Ant.* xviii. 5, § 1). This campaign of Aretas has a special interest, as Josephus tells us (*Ant.* xviii. 5, § 2) that it was believed by the populace to be a Divine punishment for Antipas' murder of John the Baptist; while Hauerath (*Zeit der Apostel*, i. p. 207) sees in it the explanation of the subsidence of all the popular excitement produced by the Messianic expectations aroused by John the Baptist and Jesus Himself. Vitellius, legate of Syria, was then commanded by Tiberius to help Antipas, and to bring Aretas dead or alive. Vitellius advanced, but hearing at Jerusalem, March, A.D. 37, that Tiberius was dead, he returned to Antioch. It is suggested that either at the time of the Nabathean invasion, or after the retirement of Vitellius, an officer of Aretas may have occupied and retained Damascus. The objection to this view lies in the fact that the Legate of Syria would scarcely have permitted part of a Roman province to be seized and held by the Nabatheans (R. Anger, *de Temp.* p. 179).

2. The second hypothesis is that it was granted to Aretas by the Roman emperor. In support of this view it is alleged that the Emperor Caligula, A.D. 38, did make several changes in the East, including a grant to Soemus of Itaræa, a district not very remote from Damascus (Dio Cassius, lix. 12). He may, it is said, have granted Damascus to Aretas at the same time; and this grant is the more probable, because on the fall and exile of Antipas, A.D. 37, Aretas, who had been his bitter enemy, might naturally be received into favour, and receive a substantial token of Roman friendship.

It is evident that both these explanations, however probable, are pure hypotheses. We can only say that there is nothing unlikely in the fact that a city which had at one time belonged to the Nabathean kingdom, which lay not very far from its northern border, and which had frequently changed hands, should again for a time, either by conquest or grant, have become subject to the king of Petra. The history of Herod the Great shows the Arabs ever on the watch for opportunities of encroachment along the whole eastern border of Palestine from north to south.

No explanation is tenable which represents the ethnarch in any other light than that of a governor holding the city for Aretas. The fact that in Acts ix. 24 the watching of the gates is attributed to the Jews and not to the ethnarch, does not prove him to have been a Jewish officer. The union between the Nabathean civil government and the Jews to oppose Christianity in Damascus presents an exact parallel with the union between Romans and Jews in Jerusalem for the same purpose.

One fact must be added which tends to show that Damascus was not in Roman hands at this time. We have Damascene coins of Augustus and Tiberius, and again of Nero and his successors, but none of Caius and Claudius. This is a negative confirmation of St. Paul's statement.

For the hypothesis of conquest, see Winer, *RWB.* art. Aretas; for that of gift, see Wieseler, *Chronologie des Apost. Zeitalters*, pp. 167-175. Wieseler's view is adopted by Conybeare and Howson, *Life of St. Paul*, vol. i. chap. iii. For the coinage of the several kings bearing the name of Aretas, see Langlois, *Numismatique des Arabes*, p. 20, who disposes of Wieseler's account of a dated coin of Aretas synchronising with the occupation in St. Paul's time. See also Conybeare and Howson, *l. c.*, note at end of chapter iii. [E. R. B.]

ARE'US, a king of the Lacedaemonians, whose letter to the high-priest Onias is given in 1 Macc. xii. 20 sq. He is called *Areus* in the E. V. in v. 20 and in the margin of v. 7; but in the Greek text he is named 'Ovidpn̄s in v. 20, and Δαρείος in v. 7: there can be little doubt, however, that these are corruptions of 'Apeus. Thus 'Ovidpn̄s, which appears in B. in the form 'Oviadpn̄s, indicates the two names Onias and Areus (see *Speaker's Commentary*, note in loco). In Josephus (*Ant.* xii. 4, § 10; 5, § 8) the name is written 'Apeios, and in the Vulgate *Arius*. There were two Spartan kings of the name of Areus, of whom the first reigned B.C. 309-265, and the second, the grandson of the former, died when a child of eight years old in B.C. 257. There were three high-priests of the name of Onias, of whom the first held the office B.C. 323-300. This is the one who must have written the letter to Areus I., probably in some interval between B.C. 309 and 300 (see Grimm, *zu Macc.* p. 185; *Speaker's Commentary* on 1 Macc. xii. 7). [ONIAS.] [F.]

AR'GOB (אֲרֻגּוֹב, once with the def. article אֲרֻגּוֹבָה = "the stony," from אֲרֻגּוֹב, Ges. *Thes.* p. 1260; 'Αργόβ; *Argob*), a tract of country on the east of the Jordan, in Bashan, in the kingdom

of Og, containing sixty "great" and fortified "cities" (צָרָה). Argob was in the portion allotted to the half-tribe of Manasseh, and was taken possession of by Jair, a chief man in that tribe. [JAIR; BASHAN; HAVOTH-JAIR.] It afterwards formed one of Solomon's commissariat districts, under the charge of an officer whose residence was at Ramoth-Gilead (Deut. iii. 4, 13, 14; 1 K. iv. 13). In later times Argob was called Trachonitis, apparently a mere translation of the older name. [TRACHONITIS.] In the Samaritan Version it is rendered רִיגוֹבָאִי (Rigobahh)*; but in the Targums of Onkelos and Jonathan it is טַרְחוֹנַיָּא (i.e. Trachonitis). Later on we trace it in the Arabic Version of Sandiash as موجب (Mujeb, with the same meaning); and it is now apparently identified with the Lejah, اللجاة, a very remarkable district

south of Damascus, and east of the Sea of Galilee, which has been visited and described by Burckhardt (pp. 111-119), Seetzen, Porter (vol. ii. specially pp. 240-245), Wetzstein, Merrill, and others. This extraordinary region—a great lava bed some 350 square miles in extent—is elevated about 20 feet above the surrounding plain. The surface is described by a recent traveller as being black, and as having the "appearance of the sea when it is in motion beneath a dark, cloudy sky, and when the waves are of good size but without any white crests of foam. But the sea is motionless, and its great waves are petrified" (Merrill, *East of Jordan*, p. 11). The lava bed has been formed by the junction of two streams of lava from the Jebel Hauran: one proceeding from the craters of *Abu Tūnus*, *Garara*, *Gimel*, and *Shihān*; the other from *El-Kleb* (Wetzstein, *Reisebericht*). The whole of the *Lejah* is a vast labyrinth of clefts and crevasses, formed whilst the lava was cooling, in which soil of surprising fertility is found; it is full of caves which have been occupied as dwellings, and in which robber bands lurk at the present day, and, at many points, there are copious living fountains in which the water is not only abundant but cool and sweet (Merrill, p. 14; see also Wright in *Leisure Hour*, 1874, p. 380). The rock is filled with little pits and air-bubbles; it is as hard as flint, and emits a sharp metallic sound when struck (Porter, ii. 241). The edge of the lava bed is like some rugged shore, with occasional black promontories of rock jutting out into the plain; there are few openings to the interior, which is so difficult of access that roads have had to be excavated to the towns situated within it. Wetzstein mentions fifty-one of these towns, and there were others which he did not visit. A Roman road runs through the district from S. to N., probably between Bosra and Damascus. On the outer boundary of the *Lejah* are situated, amongst others, the towns known in Biblical history as Kenath and Edrei. In the absence of more conclusive evidence on the point, a strong presump-

tion in favour of the identification of the *Lejah* with Argob arises from the peculiar Hebrew word constantly attached to Argob, and in this definite sense apparently to Argob only. This word is חֶבֶל (Chebel), literally "a rope" (σχοῖνα, ὑπερμετρον, *funiculus*), and it designates with charming accuracy the remarkably defined boundary-line of the district of the *Lejah*, which is spoken of as "a rocky shore"; "sweeping round in a circle clearly defined as a rocky shore line"; "resembling a Cyclopean wall in ruins" (Porter, ii. 19, 219, 239, &c.); "rope-like lip" (Wright, l. c.). The extraordinary features of this region are rendered still more extraordinary by the contrast which it presents to the surrounding plain of the Hauran, a high plateau of waving downs of the richest agricultural soil stretching from the Sea of Galilee to the *Lejah*, and beyond that to the desert, almost literally "without a stone"; and it is not to be wondered at—if the identification proposed above be correct—that this contrast should have struck the Israelites, and that their language, so scrupulous of minute topographical distinctions, should have perpetuated in the words Mishor, Argob, and Chebel, at once the level downs of Bashan [MISHOR], the story labyrinth which so suddenly intrudes itself on the soil (Argob), and the definite fence or boundary which encloses it [CHEBEL]. [G.] [W.]

ARGOB (2 K. xv. 25), perhaps a Gileadite officer. According to one interpretation of this passage, Argob and Arieh were accomplices of Pekah in the murder of Pekahiah; but according to others (Thenius, Keil), Argob and Arieh were more probably two princes of Pekahiah, whose influence Pekah feared, and whom he therefore slew with the king. The LXX agrees with the latter view, while the Vulg. joins Argob et iuxta Arie takes the names as localities. Klostermann (*Kgf. Komm.* in loco, edd. Strack u. Zöckler) collects various solutions of a passage difficult and suspicious, and of which no very plausible emendation has yet been proposed. [W. A. W.] [F.]

ARIARATHES (properly Mithridates. Diol. xxxi., X., p. 25, ed. Bip.) VI., PHILOPATOR (T. Ἀριαράθης, A. Ἀρδαθής; *Ariarathes*, probably signifying "great" or "honourable master," from the roots existing in *aryas* [Sanskrit], "honourable," and *rata* [head], "master"; Smith, *Dict. Biogr.* a.v.), king of Cappadocia, B.C. 163-130. He was educated at Rome (Liv. xlii. 19); and his whole policy was directed in accordance with the wishes of the Romans. This subservience cost him his kingdom, B.C. 158; but he was shortly afterwards restored by the Romans to a share in the government (App. *Syr.* 47; cp. Polyb. xiii. 20, 23; Polyb. iii. 5); and on the capture of his rival Olophernes by Demetrius Soter, he regained the supreme power (Just. xxxv. 1). He fell in B.C. 130, in the war of the Romans against Aristonicus, who claimed the kingdom of Pergamus on the death of Attalus III. (Just. xxxiii. 1, 2). Letters were addressed to him from Rome in favour of the Jews (1 Macc. xv. 22; see *Speaker's Commentary* in loco), who, in aftertimes, seem to have been numerous in his kingdom (Acts ii. 9; cp. 1 Pet. i. 1). [B. F. W.]

* This name probably appears in the *Payaṣā* of Josephus (*Ant.* xiii. 16, § 5), where Alexander died. Eusebius states (*OS.* p. 237, 97) that in his day there was a village called Ἐργά, 16 miles W. of Gerasa.

† Jonath. אַרְגוֹב; Jerus. אַרְגוֹבָא.

ARIDAI (אֲרִידַי; T. Ἀρδαίος, A. Ἀρδαίος; *Aridai*), ninth son of Haman (Esth. ix. 9). The origin of the name is uncertain, but probably Persian (Ges., Oppert) = *Ariyadaya* = *desire of Hari* (Vishnu). Cp. Bertheau-Ryssel and Oettli in loco; Ἀρδαίος. See ARIDATHA. [F.]

ARI-DATHA (אֲרִידַתָּה; *Σαρβανδ*; *Aridatha*), sixth son of Haman (Esth. ix. 8). Ges. = *giten of Hari* (Vishnu). Cp. Bertheau-Ryssel, Oettli (in Strack u. Zöckler's *Kyf. Komm.*), and Cassel (*Das Buch Esther*, p. 288). The curious Rabbinical reflections connected with the death (by hanging) of the sons of Haman are collected in the *Speaker's Comm. on the Apocrypha*, "Additions to Esther," xvi. 18, add. note (d). [F.]

ARIEH (אֲרִיֶה, *lion* = hero; B. Ἀρειδ, A. Ἀρεί; *Aric*). Probably called "The Lion" from his daring as a warrior: either one of the accomplices of Pekah in his conspiracy against Pekahiah, king of Israel, or, as is more probable, one of the princes of Pekahiah, who was put to death with him (2 K. xv. 25). Rashi explains it literally of a golden lion which stood in the castle. See ARGOB. [W. A. W.] [F.]

ARIEL (אֲרִיאֵל, *lion of God* = great hero, or *hearth of God*; Ἀρηλ; *Ariel*).

1. As the proper name of a man (where the meaning no doubt is the first of those given above) the word occurs in Ezra viii. 16. This Ariel was one of the "chief men" who under Ezra directed the caravan which he led back from Babylon to Jerusalem.

The word occurs also in reference to two Moabites slain by Benaiiah, one of David's chief captains (2 Sam. xxiii. 20; 1 Ch. xi. 22). Gesenius and many others agree with our A. V. in regarding the word as an epithet, "two lion-like men of Moab;" but Thenius, Winer, Keil, R. V. and others regard it as a proper name, and translate "two [sons] of Ariel," supplying the word אֲרִיאֵל with B. (*ἀνδράζειν τοὺς δύο υἱοὺς Ἀρηλ*). A. omits the words in 2 Sam.). See another suggestion in W. R. Smith, *The Religion of the Semites*, i. 469.

A similar word occurs in Num. xxvi. 17,

ARELI (אֲרֵאֵל), as the name of a Gadite, and head of one of the families of that tribe. Both the LXX. and the Vulg. give Ariel for this word, and Winer without remark treats it as the same name.

2. A designation given by Isaiah to the city of Jerusalem (Is. xxix. 1 bis, 2 bis, 7) as a symbol of hope. Its meaning is obscure. We must understand by it either "Lion of God" (i.e. a hero)—so Gesenius, Ewald, Hävernick, Chérne, and others—or, with Targ., Umbreit, Knobel, Delitzsch, Bredenkampf, and most of the ancient Jewish expositors, "Hearth of God," tracing the first component of the word to the

Arabic *ḥār*, a fire-place or hearth (Gesen. *Thes.*).

On the Mesha-stone (l. 12; Neubauer in *Records of the Past*, N. S. ii. 201, n. 8. See Driver, *Notes on Samuel*, pp. lxxxvi., xc.). אֲרֵאֵל signifies probably "altar-hearth" (cp. Baethgen, *Beitr. z. Sem. Religionsgesch.* p. 14, n. 1). This latter

meaning is suggested by the use of the word in Ezek. xliii. 15, 16, as the name of a part of the altar of burnt offering (R. V. "altar-hearth," which should also probably be read in v. 15*; see Smend or Cornill in loco). Some think it most probable that the words used by the two Prophets are different in derivation and meaning, and that as a name given to Jerusalem Ariel means "Lion of God," whilst as used by Ezekiel it means "Hearth of God." [F. W. G.] [F.]

ARIMATHAE' A (Ἀριμαθαία, Matt. xxvii. 57; Luke xxiii. 51; John xix. 38), the birth-place, or at least the residence, of Joseph, who obtained leave from Pilate to bury our Lord in his "new tomb" at Jerusalem. St. Luke calls this place "a city of Judaea;" but this presents no objection to its identification with the prophet Samuel's birth-place, the Ramah of 1 Sam. i. 1, 19, which is named in the Septuagint Armathaim (Ἀρμαθαίμ), and by Josephus, Armatha (Ἀρμαθᾶ, *Joseph. Ant.* v. 10, § 2). The Ramathem of the Apocrypha (Ῥαμαθέμ, 1 Macc. xi. 34) is probably the same place. [RAMAH.] Eusebius (*OS.* p. 281, 10) identifies Arimathaea with Ἀρία, then called Πευφίς, near Diospolis, Lydda; Jerome (*OS.* p. 178, 25) gives the form Remfthis; it is now *Kuntieh* on the plain N. of Lydda. [G.] [W.]

ARTOCH (Ἀρτοχ, the Ḫri-aku [probably Akkadian, and equivalent to the Assyrian Arad-siu = servant of the Moon-god] of the Inscriptions [Schrader, *MV.* 11, Friedr. Delitzsch]; Ἀρτωχός, LXX. in Dan. only; Ἀρτώχ, Theodot.; *Artioch*, Vulg.). 1. King of ELLASAR (Gen. xiv. 1, 9. See Delitzsch [1887] on v. 1).

2. "The captain of the guard" of Nebuchadnezzar (Dan. ii. 14 ff. See *Speaker's Commentary* on "Daniel," add. n. to ch. i.). [B. F. W.] [F.]

3. BA. Ἀρτώχ; *Erioch*; called in Judith i. 6 "king of the Elymeans," probably equivalent to Elam (so Syr.), i.e. Susiana. The "Elymeans" were the people of Elymais, a Persian district (see *Speaker's Commentary* in loco). Junius and Tremellius identify him with Dioces, king of part of Media. [W. A. W.] [F.]

ARI'SAI (Ἀρισαί; Πουφαίος; *Arisai*), eighth son of Haman (Esth. ix. 9). See ARIDATHA. [F.]

ARISTARCHUS (Ἀριστάρχος; *Aristarchus*), a Jew (cp. Col. iv. 10 with v. 11) of Thessalonica (Acts xx. 4, xxvii. 2), and a devoted follower of St. Paul. He is first mentioned at Ephesus (together with Gaius the Macedonian) as a companion of the Apostle's travels (*συνέδημος*) and as being dragged into the theatre by the rioters (Acts xix. 29). We next hear of him as accompanying St. Paul on his departure from Macedonia for Jerusalem at the close of the third missionary journey (Acts xx. 4). Apparently he remained in Judaea during St. Paul's imprisonment, and may have been one of those who were suffered to minister to him (Acts xxiv. 23). We find him embarking with the Apostle on his voyage to Rome (Acts xxvii. 2). Bp. Lightfoot thinks he may have left St. Paul at Myra, and returned to Thessalonica for a time (Lightfoot, *Philippians*, Introduction, i. p. 34, note 2). However this may be, he is

with him at the date of the Epistles to the Colossians and to Philemon, and sends greetings in both (Col. iv. 10; Philem. v. 24). On the term "fellow-prisoner" applied to him (Col. iv. 10), see ANDRONICUS. The presence of Aristarchus with St. Paul at Caesarea and Rome makes against the figurative interpretation. The warm personal affection expressed in 1 Thess. for that church falls in with the place taken by Aristarchus and other Thessalonians among St. Paul's companions. [E. R. B.]

ARISTOBULUS (Ἀριστόβουλος; *Aristobulus*). St. Paul greets "them which are of the household of Aristobulus" (τοὺς ἐκ τῶν Ἀριστοβούλου, Rom. xvi. 10). The household of Aristobulus (cp. τῶν Ναρκίσσου, v. 11, and τῶν Χλόης, 1 Cor. i. 11) were probably the slaves of a man of that name. "Them" is not defined in this instance, but by comparison of v. 11 it clearly means "them which are in the Lord," the Christians among the slaves of Aristobulus. Their master may probably have been Aristobulus the younger, brother of Herod Agrippa I. (Acts xii. 1). He lived and probably died at Rome in a private station (Jos. B. J. ii. 11, 6). As the household of this Aristobulus would naturally be composed in a large measure of Jews, the Gospel would the more easily be introduced to their notice. Aristobulus was still living A.D. 45 (Jos. Ant. xx. 1, § 2); but the date of his death is unknown. Even after his death his slaves would, according to Roman usage, be designated by his name, Aristobuliani, of which Ἀριστοβούλου appears to be a translation. Bp. Lightfoot conjectures that they may have passed (by legacy or otherwise) into the imperial household, as Aristobulus lived on terms of close intimacy with Claudius (Jos. Ant. l. c.). In this case they would be members of "Caesar's household" (Phil. iv. 22). See also HERODION. The foregoing remarks are entirely taken from Bishop Lightfoot's *Philippians*, detached note on Caesar's Household. [E. R. B.]

ARK, NOAH'S. [NOAH.]

ARK OF THE COVENANT, or "OF THE TESTIMONY" (יָדִיעוּת). This, taken generally together with the mercy-seat, was the one piece of the Tabernacle's furniture especially invested with sacredness and mystery, and is therefore the first for which precise directions were delivered (Ex. xxv.). The word signifies a mere chest or box, and is (as well as the word אֲרֹן, "ark" of Noah) rendered by the LXX. and N. T. writers by *κιβώτις*. We may remark: I. its material dimensions and fittings; II. its design and object, under which will be included its contents; and III. its history.

I. It appears from Ex. xxv. to have been an oblong chest of shittim (acacia) wood, 2½ cubits long by 1½ broad and deep. Within and without gold was overlaid on the wood; and on the upper side or lid, which was edged round about with gold, was placed the mercy-seat, supporting the Cherubim one at each end, and regarded as the symbolical throne of the Divine Presence [CHERUBIM and MERCY-SEAT]. Over this, when the ark was in *situ*, a luminous cloud, to be distinguished from that raised by

the incense (Lev. xvi. 13), was from time to time visible [SHECHINAH]. The ark was fitted with rings, one at each of the four lower corners, and therefore two on each side, and through these were passed staves of the same wood similarly overlaid. By these staves, which always remained in the rings, the Levites of the house of Kohath, to whose office the care of it and all the sacred furniture especially appertained, bore it in its progress (Num. iii. 31). Probably, however, its removal from its proper position within the veil, in the most Holy place, was managed by the hands of the priests (Num. iv. 5, 19, 20; vii. 9; x. 21; 1 K. viii. 3, 6); at any rate from Num. iv. 17-20 it is clear that the "holy things," before their transport by the Levites, were covered over by the priests. The ends of the staves were visible without the veil in the Holy place of the Temple of Solomon, the staves being drawn to the ends, apparently, but not out of the rings. The ark, when transported, was enveloped in the "veil" of the dismantled Tabernacle, in the curtain of badgers' skins ("sealskins," R. V.), and in a blue cloth over all, and was therefore not seen. The expression ascribed to Josiah in 2 Ch. xxxv. 3, "Put the holy ark in the house. . . : there shall no more be a burden upon your

Egyptian Ark. (Rommelin, p. 99.)

shoulders" (R. V.), seems to mean that there were only two places where the ark could properly rest, the one being the shrine proper to it, the other the shoulders of the Levites.

II. Its purpose or object was to contain inviolate the Divine autograph of the two tables, that "Covenant" from which it derived its title, the idea of which was inseparable from it, and which may be regarded as the *depositum* of the Jewish dispensation. The perpetual safe custody of the material tables no doubt suggested the moral observance of the precepts inscribed. It was also probably a reliquary for the pot of manna and the rod of Aaron. We read in 1 K. viii. 9, that "there was nothing in the ark save the two tables of stone which Moses put there at Horeb." Yet the author of Heb. ix. 4 asserts that, beside the two tables of stone, the "pot of manna" and "Aaron's rod that budded" were inside the ark, which were directed to be "laid up" and "kept before the testimony," i.e. before the Tables of the Law (Ex. xl. 20); and probably, since there is no mention of any other receptacle for them, though another view of Heb. ix. is adopted by others, the statement of 1 K. viii. 9 may imply that by Solomon's time these relics had disap-

peared. The expression אֲרֹן הַבְּרִית in the direction for the custody of the Book of the Law in *Ibent.* xxi. 26, obscurely rendered "in the side of the ark" (A. V.), merely means "beside" it (R. V. "by the side"). The sword of Goliath, "wrapped in a cloth behind the ephod" (1 Sam. xxi. 9), is another trace of the use of the sanctuary or some of its sacred appurtenances as a reliquary; and similarly the "brazen serpent" may have been preserved until destroyed by Hezekiah (2 K. xviii. 4). The words of the A. V. in 1 Ch. xiii. 3 seem to imply the use of the ark for the purpose of an oracle; but this is probably erroneous, and "we sought not unto it" (R. V.) is the meaning; so the LXX. renders it: see Gesenius, *Lxx. a. v.* (עֲלֵה). Joshua certainly appears prostrating himself before it in contrite supplication, with all the elders of Israel, "until the eventide," and then obtaining a response, as though by a voice direct from the shrine (*Josh.* vii. 6-15); even as Moses had "heard the voice of one speaking unto him from off the mercy-seat" (*Num.* vii. 89), where that Presence [SUECHINAI] was to be looked for (*Ex.* xiv. 22; *Num.* vii. 89), which the high-priest might not approach "at all times," but only in solemn rite after sin-offering duly paid (*Lev.* xvi. 3 sq.).

Occupying the most holy spot of the whole sanctuary, it tended to exclude any idol from the centre of worship. And Jeremiah (iii. 16, the only distinct mention of it in any Prophet) looks forward to the time when even the ark should be "no more remembered," as the climax of spiritualized religion apparently in Messianic times. It was also the support of the mercy-seat, materially symbolizing, perhaps, the "covenant" as that on which "mercy" rested. It also furnished a legitimate vent to that longing after a material object of reverential feeling which is common to all religions. It was, however, never seen, save by the high-priest, and resembled in this respect the Deity Whom it symbolized, Whose face none might look upon and live (*Winer, ad loc. note*). That this reverential feeling may have been impaired during its absence among the Philistines, seems probable from the example of Uzzah. For its local separation for a while from the Tabernacle and the double worship thence arising, see *TABERNACLE II.* (5).

III. The chief facts in the earlier history of the ark (see *Josh.* iii. iv. and vi.) need not be recited. We may notice, however, a fiction of the Rabbis that there were two arks, one which remained in the shrine, and another which preceded the camp on its march, and that this latter contained the broken tables of the Law, as the former the whole ones. In the early days of the conquest by Joshua the ark must necessarily have been within the headquarters of the camp, whether close beside Jericho, or, as later, at Gilgal (*Josh.* vi. 11; vii. 2, 6; x. 15, 43). After its share in the capture of Jericho, it appears at the solemnity on Ebal (*viii.* 30-33), but with a hint that a permanent place was to be provided (*ix.* 27). That place is fixed (*xviii.* 1) at Shiloh, which is therefore dignified by Jeremiah (*vii.* 12) as "the place where I caused My Name to dwell at the first." The expression "the Sanctuary of the Lord," where the "great

stone" was set up under an oak by Joshua in the last scene of his life, being at Shechem (*xiv.* 26), does not imply the presence of the ark there, but only a local sanctity attaching to the spot from earlier traditions [*SHECHEM*]. A similar term* is applied to other places traditionally holy. The confusion of the period of the Judges affected the abode of the ark at that epoch. In the closing episode of the Benjamite civil war our A. V. seems to imply that it was at Mizpeh. But the A. V. "the House of God" should be corrected as in R. V. by the proper name "Bethel" (*Judg.* xx. 18, 26, 31; *xii.* 2).^b The question mainly depends on the force of the expression "went up and came to" (*xx.* 26). But whether Mizpeh, the unquestionable centre to which the nation rallied [*MIZPAH*], or Bethel, was the actual abode of the ark, intended by the words "the ark of the Covenant of God was there in those days," the distance between them is slight, as is that of both from Shiloh, in which last spot the site of "the camp" is fixed, and where there was a yearly feast. Thus the sojourn may have been only temporary, and due to the demands of a civil war then raging in the very neighbourhood, and thus Shiloh may be taken as the normal abode (1 Sam. iv. 3, 4). In the decline of religion during this period a superstitious security was attached to its presence in battle. Yet, though this was rebuked by its permitted capture, when captured its sanctity was vindicated by miracles, as seen in its avenging progress through the Philistine cities; the facts of which, including the mutilation of Dagon, are too well known to need recital (1 Sam. iv.-vi.). But the separate "coffer" for the jewels, as a tribute to the ark's sanctity, is noteworthy (*vi.* 11). It returned first to Bethshemesh, a city of the priests in eastern Judah [*BETHSHEMESH*]. There "on a great stone" (*vi.* 14, R. V. *ABEL*) it was set down and honoured with sacrifice. But, priestly though the city was, the profane curiosity of the inhabitants brought a plague upon them (1 Sam. vi. 11-20). Here by invitation, founded perhaps on local superstition, it was transported to Kirjath-jearim [*KIRJATH-JEARIM*], and placed under the guardianship of Eleazar, probably a Levite, if not a priest, "where it abode twenty years" (*vii.* 1, 2). A difficulty here occurs. Samuel was apparently still young when the ark was thus returned. He grows old, and anoints Saul, who reigns forty years. David succeeds him and reigns seven years in Hebron, and then fetches the ark from Kirjath-jearim. The whole interval should thus be nearer a century than "twenty years" (which is also the number in the LXX. and the Vulg.). Whether or not the ark had other places of sojourn not mentioned, is open to conjecture. To Kirjath-jearim "all the house of Israel" resorted (not as A. V. and R. V. text "lamented") to seek Jehorah; and

* Thus אֲרֹן הַבְּרִית, *Amos* vii. 9, and אֲרֹן הַבְּרִית, *e.* 13. The first word in each phrase is the same as that referred to above.

^b The stone of Bethel is made by Jewish tradition the pedestal of the ark in the later Temple [*BETHEL*].

* R. V. in marg. reads, *was drawn together*. The LXX. has ἐνέβηκε was εἰς οἶκος ἱεραγῆ.

Josephus (*Ant.* vi. 2, 1) speaks of their pilgrimages thither. And thus in the early part of Saul's reign Abiah was "the Lord's priest in Shiloh" (1 Sam. xiv. 3); and the ark, which he was bidden to "bring hither" (v. 18),^a as if for the purpose of divination, is expressly said to have been "at that time with the children of Israel" (1 Sam. xiv. 18; cp. *cc.* 36, 37) [אַהִיָּא]. The episode of Ahimelech and massacre at Nob (xxi. 6, 9; xxii.) may possibly suggest that the sanctuary and therefore the ark at that time were there. What became of it in this catastrophe we know not, nor how far the reverses of Saul's later reign and the renewed successes of the Philistines affected it. The statement of David (1 Ch. xiii. 3), "We sought not unto it in the days of Saul," is quite consistent with 1 Sam. vii. 2, cited above, which may easily refer to the time of Samuel's rule. The next notice of it is in 2 Sam. vi. 2-17, being its removal by David, now king, from "the house of Abinadab that was in the hill" (R. V.) at Baale of Judah (i.e. Kirjath-jearim; cp. 1 Sam. vii. 1). The doom of Uzzah, there recorded, delayed the completion of David's purpose for three months, during which the ark sojourned with Obed-Edom (cp. 1 Ch. xiii. xv.); and when it came to Jerusalem it did not take its place in the Tabernacle, but dwelt in curtains, i.e. in a separate tent pitched for it in Jerusalem by David (2 Sam. vii. 2; 1 Ch. xvi. 1). Its bringing up by David thither was a national festival, and its presence there seems to have suggested to his piety the erection of a house to receive it. Subsequently that house, when completed, received, in the installation of the ark in its shrine, the signal of its inauguration by the effulgence of Divine glory instantly manifested (1 K. viii. 1-11, 21; 2 Ch. v. 2-14). Several of the Psalms contain allusions to these events (*e.g.* xxiv., xlvii., cxxxii. 8; cp. 2 Ch. vi. 41, 42), and the first fifteen verses of Ps. cv. appear in 1 Ch. xvi. 8-22 as sung on the occasion of the first of them. This period, "when the ark had rest" after its previous removals, marks an epoch in the history of the worship (1 Ch. vi. 31); and all the places of its sojourn became from that fact "holy," even if not, as some of them were, esteemed local sanctuaries before (2 Ch. viii. 11). In David's flight from Absalom the ark was prepared to accompany him, but he bade Zadok "carry it back into the city," staking the favour of God on the hope of seeing it again. It accordingly was taken back. This incident was remembered by Solomon in Abiathar's favour afterwards, when the latter was implicated in the rebellion of Adonijah (2 Sam. xv. 24 ff.; 1 K. ii. 26).

When idolatry became more shameful in the kingdom of Judah, Manasseh placed a "carved image" in the "House of God," and probably removed the ark to make way for it. His evil example was also followed by Amon, his son. This may account for the subsequent statement that the ark was reinstated by Josiah (2 Ch. xxxiii. 7; xxxv. 3). It was probably taken captive or destroyed by the Chaldeans (2 K.

xxv. 9. Cp. 2 Esd. x. 22). Prideaux's argument that there *must* have been an ark in the second Temple is of no weight against express testimony, such as that of Josephus (*B. J.* v. 5, § 5) and Tacitus (*Hist.* v. 9, *mania arcana*), confirmed also by the Rabbins, who state that a sacred stone, called by them שֵׁטֶן, "stone of drinking," stood in its stead; as well as by the marked silence of those apocryphal books which enumerate the rest of the principal furniture of the sanctuary as present, and by the positive statement of 2 Esdras above quoted.

To the Prophet Jeremiah was ascribed by later tradition (2 Macc. ii. 4 foll.) the concealment, under Divine command, of the ark in some cavern of Mount Pisgah, before the Chaldeans finally spoiled the first Temple. But it was added that the priests, by whom the concealment was witnessed, could not afterwards find the exact spot. Some have contrariwise supposed that the ark was included among "the goodly vessels of the House of the Lord" (2 Ch. xxxvi. 10) captured by Nebuchadnezzar and restored (Ezra i. 7) by "Cyrus the king." But these, as enumerated in the latter passage, are purely metallic "chargers, basons," &c.

The last mention of the ark in Scripture is in Rev. xi. 19. There, when the time has at last come for the final vindication of the law of God in His judgment upon man and His recompense to His saints, the Seer beholds "the Temple (*naos*) of God opened in heaven," and he adds, "There was seen in His Temple the ark of His Covenant." That ark which had all along been a secret from every eye save the high-priest's is visible at last, and the shrine which had been guarded from all access is thrown open. The Law and the testimony thus stand ready to be applied to those who are to be "judged according to their works."

The ritual of the Etruscans, Greeks, Romans, and other ancient nations, included the use of what Clemens Alexandrinus calls κίονα ποταμικὰ (*Protrept.* p. 12); but especially that of the Egyptians, in whose religious processions, as represented on monuments, such an ark, surmounted by a pair of winged figures like the cherubim, constantly appears (Wilkinson, *Asc.*

Egyptian Ark. (Wilkinson, *Asc. Egypt.*)

Egypt. i. pp. 267, 268). The same Clemens (*Strom.* v. 578) also makes an allusion to a proverbial character to the ark and its rites, which seems to show that they were popularly known, where he says that "only the master (*διδάσκαλος*) may uncover the ark" (*κιβώτιος*). In Latin also, the word *arcanum*, connected with *arca* and *arceo*, is the recognised term for a

^a But here the LXX. reads "ephod" for "ark of God;" and this reading is adopted by Thénius, Keil, Wellhausen, Klostermann, &c., and is placed by the R. V. in the marg. The ark probably remained at Kirjath-jearim (see *Speaker's Comm.* in loco).

sacred mystery. Illustrations of the same subject occur also in Plut. *de Is. et Os.* c. 39; Or. *Ars Am.* ii. 609, &c.; Euseb. *Praep. Evang.* ii. 3; Catull. *l.* xiv. 260-1; Apul. *Met.* xi. 362. [H. H.]

ARKITE, THE (אַרְכִי, Sam. Cod. אֲרִכִּי:

Ἀρκαῖος; *Arcaeus*), one of the families of the Canaanites (Gen. x. 17; 1 Ch. i. 15), and from the context evidently located in the north of Phoenicia. Josephus (*Ant.* i. 6, § 2) gives the name as Ἀρκαῖος, and as possessing Ἀρκην τὴν ἐν τῷ Λιβάνῳ. He also again mentions the place (Ἀρκαία, *B. J.* vii. 5, § 1) in defining the position of the Sabbatical river. The name is found in the Assyrian inscriptions, *Arkā* (Schrader, *KAT.* p. 104), in Pliny (v. 16), and Ptolemy (v. 15); and Aelius Lampridius (*Alex. Sen.*) states that the *Urbs Arcena* contained a temple to Alexander the Great. It was the birthplace of Alexander Severus, and was thence called Caesarea Libani. Arca was well known to the Crusaders, who under Raimond of Toulouse besieged it for two months in 1099 in vain; it was, however, afterwards taken by William of Sartanges. In 1202 it was totally destroyed by an earthquake. The site which now bears the name of *Arka* (عرقا) lies on the coast, 2 to 2½ hours from the shore, about 12 miles north of Tripoli, and 5 south of the *Nahr el-Kabir* (Eleutherus). The great coast road passes halfway between it and the sea. The site is marked by a rocky tell rising to the height of 100 feet close above the *Nahr Arka*. On the top of the tell is an area of about two acres, and on this and on a plateau to the north the ruins of the former town are scattered. Among them are some columns of granite and syenite (*Rob.* iii. 579-81; *Ges.* p. 1073; *Winer*, s. v.; *Reiland*, p. 575; *Burckhardt*, p. 162; *Diet.* of *Gr. and Rom. Geogr.*, art. *Arca*). [G.] [F.]

ARMAGED'DON or HAR-MAGEDON (Ἀρ Μαγεδών [Westcott and Hort], Rev. xvi. 16):

It would be foreign to the purpose of this work to enter into any of the theological controversies connected with this (see *Speaker's Commentary* in loco). Whatever its full symbolical import may be, the image rests on a geographical basis: and the locality implied in the Hebrew term here employed (τὸν τόπον τὸν καλούμενον Ἐβραϊστὶ Ἀρ Μαγεδών) is the great battle-field of the Old Testament, where the chief conflicts took place between the Israelites and the enemies of God's people. The passage is best illustrated by comparing a similar one in the Book of Joel (iii. 2, 12), where the scene of the Divine judgments is spoken of in the prophetic imagery as the "valley of Jehoshaphat," the fact underlying the image being Jehoshaphat's great victory (2 Ch. xx. 26, see Zech. xiv. 2, 4). So here the scene of the struggle of good and evil is suggested by that battle-field, the plain of Esdraelon, which was famous for two

great victories, of Barak over the Canaanites (*Judg.* iv., v.), and Gideon over the Midianites (*Judg.* vii.); and for two great disasters, the death of Saul, in the invasion of the Philistines (1 Sam. xxxi. 8), and the death of Josiah in the invasion of the Egyptians (2 K. xxiii. 29, 30; 2 Ch. xxxv. 22). With the first and fourth of these events, Megiddo (Μεγεδδὼ in the LXX. [BA.] of *Judg.* v. 19, and Μαγεδδὼ [or -εδων] in the LXX. of 2 K. and 2 Ch. and in Josephus) is especially connected. Hence Ἀρ-μαγεδών, "the hill of Megiddo." (See Bähr's *Excursus* on Herod. ii. 159.) The same figurative language is used by one of the Jewish Prophets (*Zech.* xii. 11). As regards the Apocalypse, it is remarked by Stanley (*Sinai and Palestine*, p. 330) that this imagery would be peculiarly natural to a Galilaean, to whom the scene of these battles was familiar. [MEGIDDO.]

[J. S. H.] [F.]

ARME'NIA (Ἀρμενία) is the classical equivalent of the Hebrew Ararat. Ararat is the Urardhu of the Babylonians and Assyrians, and was the name given by the latter to the country which stretched away from the shores of Lake Van, and roughly corresponded with the Armenia of classical geography. It did not, however, extend northward beyond Mount Ararat and the Araxes, or southward beyond the mountains of Kurdistan, while it was bounded on the west by the 59th degree of longitude. On the east it bordered on the kingdom of Mana, called Mannā in the Assyrian inscriptions and Minni (מִנִּי) in the Old Testament (*Jer.* li. 27), which occupied the district on the north-western side of Lake Urumiyeh, and was separated from Ararat by the Kotür range. Minni was the Minyas of Nicolaus Damascenus (*ap. Joseph. Ant.* i. 3; Euseb. *Praep. Ev.* 9), who says that the ark had rested there on Mount Baris (now probably Rowandiz). Baris is called Lubar in the Book of Jubilees (ch. v.), and Lubar is made by Epiphanius (*adv. Haer.* i. 5) the boundary between Armenia and Kurdistan.

The native name of the kingdom of Ararat was Biainas, the original of the modern Van (*Báana* in Ptolemy, v. 13). The capital, which occupied the site of Van, was called Dhuspas, whence the *Θωστία* of Ptolemy (v. 13, 19) and the *Tosp* of Moses of Khorene, which is now the name of the whole province. The cuneiform system of writing was introduced into Biainas in the time of king Sar-duria I. (B.C. 835), and both he and his successors have left many written memorials of their buildings and campaigns on rocks and stones. His grandson, Mennas, erected a palace near the modern Erzerüm, and carried his arms far to the east, setting up a monument in the pass of Kel-shin, under Rowandiz, 12,000 feet above the level of the sea. Ararat and Assyria were engaged in almost constant war, which was, however, checked for a short time by the devastation of the country about Van by Tiglath-pileser III. in B.C. 735. Esar-haddon was engaged in a campaign against Eri-men-as of Biainas when his father Sennacherib was murdered; and it was to Eri-men-as, accordingly, that the murderers, Nergal-sharezzer and Adar-melech, fled. The people of Biainas spoke a language which, though inflectional, had no connexion with either the Aryan or the Semitic family of

* The difference in the aspirate makes a difference in the meaning. Armageddon = עִיר מְגִדּוֹן, "the city of Megiddo;" Har-Magedon = הַר מְגִדּוֹן, "the mountain of Megiddo;" and this difference is not without its bearing upon the interpretations connected with the word.

speech, and seems to have been the ancestor of the modern Georgian. This language was still spoken in the country as late as B.C. 640, so that the arrival of the Aryan immigrants, the forefathers of the modern Armenians, could not have taken place until after this date. The name Armenia (*Armaniya*) first occurs in the Persian inscriptions of Darius Hystaspis, but the origin of it is quite unknown. See Sayce, *The Cuneiform Inscriptions of Van, deciphered and translated*, in the *Journal of the Royal Asiatic Society*, xiv. 3, 4, 1882.

Togarmah (תֹּגַרְמָה; *Θογαρμά* and *Θοργομά*; Gen. x. 3; Ezek. xxvii. 14, xxxviii. 6) has no connexion with Armenia, as was sometimes supposed before the decipherment of the cuneiform inscriptions, but is probably to be sought in Eastern Asia Minor, in the neighbourhood of Meshech and Tuhul, with whom (as persons) Togarmah is associated by Ezekiel. Lagarde compares the name of the Teukrians. Friedrich Delitzsch suggests that of Til-garimmu, a town in Melitene. Togarmah is a son of Gomer or the Cimmerians in Gen. x. 3, and Gomer is mentioned along with "the house of Togarmah of the extremities of the north" in Ezek. xxxviii. 6. [A. H. S.]

ARMLET (אַרְמִיל; *φέλιον*; Num. xxxi. 50, *χλιδῶνα* or *χλιδῶν*; 2 Sam. i. 10, *βραχιδῶνα*; *Aquila, brachiale armilla*;—properly a fetter, from *אַרְמִי*, a step; comp. Is. iii. 20, and **ANKLET**), an ornament universal in the East, especially among women; used by princes as one of the insignia of royalty, and by distinguished persons in general. The word is not used in the A. V. or in the R. V., as even in 2 Sam. i. 10 they render it by "the bracelet on his arm." Sometimes only one was worn, on the right arm (*Eccles. xxi. 21*). From Cant. viii. 6, it appears that the signet sometimes consisted of a jewel on the armlet.

Assyrian Armlet. (From Nineveh Marbles, British Museum.)

These ornaments were worn by princes in ancient times. They are frequent on the sculptures of Persepolis and Nineveh, and were set in rich and fantastic shapes resembling the heads of animals (Layard, *Nineveh*, ii. 298). The kings of Persia wore them, and Astyages presented a pair among other ornaments to Cyrus (*Xen. Cyr. i. 3*). The Ethiopians, to whom some were sent by Cambyes, scornfully characterised them as weak fetters (*Herod. ii. 23*). Nor were they confined to the kings, since Herodotus (viii. 113) calls the Persians generally *φέλιφοροι*. In the Egyptian monuments "kings are often represented with armlets and bracelets, and in the Leyden Museum is one bearing the name of the third Thothmes." (A gold armlet figured below. Cp. Wilkinson's *Anc. Egypt. ii. 336* [1878].) They were even used by the old British chiefs (Turner, *Angl. Sax.*

i. 383). The story of Tarpeia shows that they were common among the ancient Sabines, but

Egyptian Armlet. (From the Leyden Museum.)

the Romans considered the use of them effeminate, although they were sometimes given as military rewards (*Liv. x. 44*). Finally, they are still worn among the most splendid regalia of modern Oriental sovereigns, and it is even said that those of the king of Persia are worth a million sterling (*Kitto, Pict. Hist. of Pal. i. 499*). They form the chief wealth of modern Hindoo ladies, and are rarely taken off. They are made of every sort of material from the finest gold, jewels, ivory, coral, and pearl, down to the common glass rings and varnished earthenware bangles of the women of the Deccan. Now, as in ancient times, they are sometimes plain, sometimes enchased; sometimes with the ends not joined, and sometimes a complete circle. The arms are sometimes quite covered with them; and if the wearer be poor, it matters not how mean they are, provided only that they glitter. It is thought essential to beauty that they should fit close, and hence Harmer calls them "rather manacles than bracelets," and Buchanan says "that the poor girls rarely get them on without drawing blood, and rubbing part of the skin from the hand; and as they wear great numbers, which often break, they suffer much from their love of admiration." Their enormous weight may be conjectured from Gen. xxiv. 24. [F. W. F.]

ARMO'NI (אַרְמוֹנִי = Palace-born, Palatinus; B. *Ἐρμωνος*, A. -*ῆς*; *Armoni*), son of Saul by Rizpah, one of those delivered by David to the Gibeonites (2 Sam. xxi. 8). [F.]

ARMOURY. The "tower of David" (*Song of Songs iv. 4*) was used for this purpose (cp. *Neh. iii. 19*). The "thousand bucklers, all shields of mighty men," hung there. It appears to have been not far from the Water-gate (cp. Sayce, *Intro. to the Books of Ezra, Nehemiah, and Esther*, p. 87; Bertheau-Ryssel in *Neh. l. c.*). Gesenius thought it the same building as "the house of the forest of Lebanon" in which Solomon placed his targets and shields (1 K. x. 17). [F.]

ARMS, ARMOUR. In the records of a people like the Children of Israel, so large a part of whose history was passed in warfare, we naturally look for much information, direct or indirect, on the arms and modes of fighting of the nation itself and of those with whom it came into contact.

Unfortunately, however, the notices that we

find in the Bible on these points are extremely few and meagre, while even those few, owing to the uncertainty which rests on the true meaning and force of the terms, do not convey to us nearly all the information which they might. This is the more to be regretted because the notices of the history, scanty as they are, are literally everything we have to depend on, inasmuch as they are not yet supplemented and illustrated either by remains of the arms themselves, or by those commentaries which the sculptures, vases, bronzes, mosaics, and paintings of other nations furnish to the notices of manners and customs contained in their literature.

In remarkable contrast to Greece, Rome, Egypt, and Assyria, Palestine has yielded but few vestiges of the implements or utensils of life or warfare of its ancient inhabitants; nor, with the exception of a few fragments found during the excavations at Jerusalem, has a single sculpture, piece of pottery, coin, or jewel, been discovered of that people with whose life, as depicted in their literature, we are more familiar than with that of our own ancestors. Even the relations which existed between the customs of Israel and those of Egypt on the one hand, and Assyria on the other, have still to be investigated, so that we are prevented from applying to the history of the Jews the immense amount of information which we possess on the warlike customs of these two nations, the former especially. Perhaps the time will arrive for investigations in Palestine of the same nature as those which have given us so much insight into Assyrian manners; but in the meantime all that can be done here is to examine the various terms by which instruments of war appear to be designated in the Bible, in the light of such help as can be got from the comparison of parallel passages, from the derivation of the words, and from the renderings of the ancient Versions.

The subject naturally divides itself into—
I. Offensive weapons: Arms. II. Defensive weapons: Armour.

1. *Offensive Weapons.*—1. Apparently the earliest known, and most widely used, was the *Chereb* (כֶּרֶב), "SWORD," from a root signifying "to lay waste."

Its first mention in the history is in the narrative of the massacre at Shechem, when "Simeon and Levi took each man his sword, and came upon the city boldly and slew all the males" (Gen. xxxiv. 25). But there is an allusion to it shortly before in a passage undoubtedly of the earliest date (Ewald, i. 446, note): the expostulation of Laban with Jacob (Gen. xxxi. 26). After this, during the account of the conquest and of the monarchy, the mention of the sword is frequent, but very little can be gathered from the casual notices of the text as to its shape, size, material, or mode of use. Perhaps if anything is to be inferred it is that the *Chereb* was not either a heavy or a long weapon. That of Ehud (Judg. iii. 21) was only a cubit, i.e. 18 inches long, so as to have been concealed under his garment, and nothing is said to lead to the inference that it was shorter than usual, for the "dagger"

of the A. V. (R. V. "sword") is without any ground, unless it be a rendering of the *μάχαιρα* of the LXX. But even assuming that Ehud's sword was shorter than usual, yet a consideration of the narratives in 2 Sam. ii. 16 and xx. 8-10, and also of the ease with which David used the sword of a man so much larger than himself as Goliath (1 Sam. xvii. 51; xxi. 9, 10), goes to show that the *Chereb* was both a lighter and a shorter weapon than the modern sword. What frightful wounds one blow of the sword of the Hebrews could inflict, if given even with the left hand of a practised swordman, may be gathered from a comparison of 2 Sam. xx. 8-12 with 1 K. ii. 5. A ghastly picture is there given us of the murdered man and his murderer: the unfortunate Amasa actually disembowelled by a single stroke, and "wallowing" in his blood in the middle of the road—the treacherous Joab standing over him bespattered from

Egyptian stabbing an enemy with a sword or dagger.
(Thebes: Wilkinson.)

his "girdle" to his "shoes" with the blood which had spouted from his victim!

The *Chereb* was carried in a sheath (שֶׁכֶּתֶם) 1 Sam. xvii. 51; 2 Sam. xx. 8, only: יָרֵךְ, 1 Ch. xxi. 27, only), along by a girdle (1 Sam. xxv. 13), and resting upon the thigh (Pa. xiv. 3; Judg. iii. 16) or upon the hips (2 Sam. xx. 8). "Girding on the sword" was a symbolical expression for commencing war, the more forcible because in times of peace even the king in state did not wear a sword (1 K. iii. 24); and a similar expression occurs to denote those able to serve (Judg. viii. 10; 1 Ch. xxi. 5). Other phrases, derived from the *Chereb*, are, "to smite with the edge (literally 'mouth,' στόμα, and cp. 'devour,' Is. i. 20) of the sword"—"slain with the sword"—"men that drew sword," &c.

Swords with two edges are occasionally referred to (Judg. iii. 16; Pa. cxlix. 6), and allusions are found to "whetting" the sword (Deut. xxxii. 41; Pa. lxiv. 3; Ezek. xxi. 9). There is no reference to the material of which it

* The Circassians carry their *Kama*, which is not unlike the *Chereb*, in the same way slung by a girdle and resting on the hip.

was composed (unless it be Is. ii. 4; Joel iii. 10); doubtless it was of metal, from the allusions to its brightness and "glittering" (see the two

Assyrian sheathed sword.
(Konyunlik; Layard.)

Egyptian unsheathed dagger.
(Thebes; Wilkinson.)

passages quoted above, and others) and the ordinary word for blade, viz. להב, "a flame." From the expression in Josh. v. 2, 3, "swords of

Assyrian foot spearman. (Time of Sargon.)

rock," A. V. "sharp knives," we may perhaps infer that in early times the material was flint (so R. V.).

2. Next to the sword was the SPEAR: and of this weapon we meet with at least three distinct kinds.

a. The *Chanith* (חנית), "a spear," and that of the largest kind, as appears from various circumstances attending its mention. It was the weapon of Goliath—its staff like a weaver's beam, the iron head alone weighing 600 shekels,

Assyrian foot spearmen. (Time of Sennacherib.)

about 25 lbs. (1 Sam. xvii. 7, 45; 2 Sam. xxi. 19; 1 Ch. xx. 5), and also of other giants (2 Sam. xxiii. 21; 1 Ch. xi. 23) and mighty warriors (2 Sam. ii. 23, xxiii. 18; 1 Ch. xi. 11, 20). The *Chanith* was the habitual companion of king Saul—a fit weapon for one of his gigantic stature—planted at the head of his sleeping-place when on an expedition (1 Sam.

Egyptian spearmen. (Thebes; Wilkinson.)

xxvi. 7, 8, 11, 12, 16, 22), or held in his hand when mustering his forces (xxii. 6); and on it the dying king is leaning when we catch our last glimpse of his stately figure on the field of Gilboa (2 Sam. i. 6). His fits of anger or madness become even more terrible to us, when we find that it was this heavy weapon (R. V.

"spear") and not the lighter "javelin" (A. V.) that he cast at David (1 Sam. xviii. 10, 11; xix. 9, 10) and at Jonathan (xx. 33). A striking idea of the weight and force of this ponderous arm may be gained from the fact that a mere back thrust from the hand of Abner was enough to drive its butt end through the body of Asahel (2 Sam. ii. 23). The *Chanith* is mentioned also in 1 Sam. xiii. 19, 22, xxi. 8; 2 K. xi. 10; 2 Ch. xxiii. 9, and in numerous passages of poetry.

b. Apparently lighter than the preceding, and in more than one passage distinguished from it, was the *Cidôn* (צידון), or "javelin" (Ewald, *Wurfspiesse*). It would be the appropriate weapon for the manœuvring described in Josh. viii. 14-27, and could with ease be held outstretched for a considerable time (cc. 18, 26; A. V. "spear," R. V. "javelin"). When not in action the *Cidôn* was carried on the back of the warrior—between the shoulders (1 Sam. xvii. 6, A. V. "target," *misrg*, "gorget," R. V. "javelin"). Both in this passage and in v. 45 the *Cidôn* (R. V. "javelin") is distinguished from the *Chanith*. In Job xxxix. 23 (R. V. "javelin") the allusion seems to be to the quivering of a javelin when poised before hurling it.

c. Another kind of spear was the *Romach* (רומח); Arabic *Rumh*. In the Historical Books it occurs in Num. xxv. 7 (A. V. "javelin," R. V. "spear"); Jud. v. 8; 1 K. xviii. 28 ("lanceets," R. V. "lances"). Also frequently in the later books, especially in the often recurring formula for arms, "shield and spear:" 1 Ch. xii. 8, 24; 2 Ch. xi. 12, xiv. 8, xxv. 5; Neh. iv. 13, 16-21; and Ezek. xxxix. 9, &c.

d. A lighter missile or "dart" was probably the *Shelach* (שלח). Its root signifies to project or send out, but unfortunately there is nothing beyond the derivation to guide us to any knowledge of its nature. See 2 Ch. xxiii. 10 ("weapon"), xxxii. 5 (A. V. "darts," R. V. "weapons"); Neh. iv. 17 (R. V. "weapon"); Job xxiii. 18 ("sword"), xxxvi. 12 ("sword"); Joel ii. 8 (R. V. "weapons").

e. *Sheket* (שקט), a rod or staff, with the derived force of a baton or sceptre, is used once only as an arm, for the "darts" with which Jabb dispatched Absalom (2 Sam. xviii. 14).

3. Of missile weapons of offence the chief was undoubtedly the Bow, *Kesheth* (קשת); it is met with in the earliest stages of the history, in use both for the chase (Gen. xxi. 20; xxvii. 3) and war (xviii. 22). In later times archers accompanied the armies of the Philistines (1 Sam. xxi. 3; 1 Ch. x. 3) and of the Syrians (1 K. xii. 34). Among the Jews its use was not confined to the common soldiers, but captains high in rank, as Jehu (2 K. ix. 24), and even kings' sons (1 Sam. xviii. 4) carried the bow,

and were expert and sure in its use (2 Sam. i. 22). The tribe of Benjamin seems to have been especially addicted to archery (1 Ch. viii. 40, xii. 2; 2 Ch. xiv. 8, xvii. 7); but there were

Assyrian archers on horseback, one drawing the bow and the other holding the reins. (Nimrud: Layard.)

also bowmen among Reuben, Gad, Manasseh (1 Ch. v. 18), and Ephraim (Ps. lxxviii. 9).

The bow was in like manner extensively used by the Assyrians and Egyptians. On the Assyrian monuments archers are represented not only on foot and in chariots, but also on horse-

Egyptian archers. (Thebes: Wilkinson.)

back. [CHARIOT.] On the Egyptian monuments archers appear on foot and in chariots, but not on horseback.

Of the form or structure of the bow we can gather almost nothing. It seems to have been bent with the aid of the foot, as now, for the word commonly used for it is קָדַח, "to tread" (1 Ch. v. 18, viii. 40; 2 Ch. xiv. 8; Is. v. 18;

Pa. vii. 12, &c.). Bows of steel (R. V. brass, *הַיְּחָדִים*) are mentioned as if specially strong (2 Sam. xxii. 35; Ps. xviii. 34). The string is occasionally named *קֶרֶן* or *קֶרֶן*. It was probably at first some bindweed or natural cord, since the same word is used in Judg. xvi. 7-9 for "green withs" (R. V. marg. *new bow-strings*).

In the allusion to bows in 1 Ch. xii. 2, it will be observed that the sentence in the original stands, "could use both the right hand and the left in stones and arrows from the bow" (R. V.).

Assyrian archer. (Time of Sennacherib.)

the words "slinging" and "shooting" being added to give sense. It is possible that a kind of bow for shooting bullets or stones (cp. Job xli. 20) is here alluded to, like the pellet-bow of India, or the "stone-bow" in use in the Middle Ages—to which allusion is made by Shakespeare (*Twelfth Night*, ii. 5), and which in Wisd. v. 22 is employed as the translation of *πετροβόλος*. This latter word occurs in the LXX. of 1 Sam. xiv. 14 [T.] but absent from

BA. The Heb. (see R. V.) is very different, probably as a gloss on *κόχλαξ* (Wellhausen)—*ἐν βολίσι, καὶ ἐν πετροβόλοις, καὶ ἐν κόχλαξ τοῦ πεδίου*: "with arrows, and with stone-bows, and with flints (?) of the field." If this be accepted as the true reading, we have here by comparison with xiv. 27, 43, an interesting confirmation of the degree to which the Philistines had deprived the people of arms (xiii. 19-22); leaving to the king and Jonathan the spear and the sword (xiii. 22), and to Jonathan a staff (xiv. 27, A. V. "rod").

The ARROWS, *Chitzim* (*חִצִּים*), were carried in a quiver, *Theli* (*תֵּלִי*, Gen. xxvii. 3, only), or *Ashpah* (*אַשְׁפָּה*: Is. xxii. 6, xlii. 2; Ps. cxvii. 5). [QUIVER.] From an allusion in Job vi. 4, they would seem to have been sometimes poisoned; but the passage in Ps. cxi. 4 hardly justifies the deduction that there was a practice of using arrows with some burning material attached to them.

4. The SLING, *Kela'* (*קֶלַע*), is first mentioned in Judg. xx. 16, where we hear of the 300 Benjamites who with their left hand could "sling stones at an hairbreadth, and not miss." The simple weapon with which David killed the Philistine giant was a usual accompaniment of a shepherd, whose duty it was to keep at a distance and drive off anything attempting to molest his flocks. The sling would be familiar to all shepherds and keepers of sheep, and therefore the bold metaphor of Abigail has a natural propriety in the mouth of the wife of a man whose possessions in flocks were so great as those of Nabal: "As for the souls of thine

Assyrian archer. (Konyunlik.)

Egyptians strapping the bow. (Thebes and Beni-Hassan.)

An Assyrian slinger. (Konyunlik: Layard.)

enemies, them shall God sling out from the hollow of a sling" (1 Sam. xxv. 29, R. V.). Later in the monarchy, slingers formed part of the regular army (2 K. iii. 25), though it would seem that the slings there mentioned must have been more ponderous than in earlier times, and that those which could break down the fortifications of so strong a place as Kir-haraseh must have been more like the engines which king Uziah contrived to "shoot great stones" (2 Ch. xxvi. 15). In v. 14 of the same chapter we find an allusion (now made clear

in the R. V.) to stones specially adapted for slings—"Uziah prepared . . . for all the host shields and spears, . . . bows and stones for slinging."

Slings are still used in Palestine by those who watch the flocks, and in Egypt by the men who keep the birds from the fields. [SLING.]

II. Passing from weapons to armour—from offensive to defensive arms—we find several references to what was apparently armour for the body.

1. The *Shiryon* (*שִׁירְיוֹן*); or in its modified

form שָׁרְיוֹן , and once שָׁרְיוֹן); according to the LXX. $\theta\acute{\alpha}\rho\alpha\varsigma$, Vulg. *lorica*, — a BREASTPLATE. This occurs in the description of the arms of Goliath— $\text{שָׁרְיוֹן קָשָׁיִם}$, a “coat of mail,” literally a “breastplate of scales” (1 Sam. xvii. 5), and further (r. 38), where Shiryon alone is rendered “coat of mail.” It may be noticed in passing that this passage contains the most complete inventory of the furniture of a warrior to

Egyptian corslet with metal scales. (Tomb of Rameses III., Thebes; Wilkinson.)

be found in the whole of the sacred history. Goliath was a Philistine, and the minuteness of the description of his equipment may be due either to the fact that the Philistines were usually better armed than the Hebrews, or to the impression produced by the contrast on this particular occasion between this fully-armed champion, and the wretchedly appointed soldiers

Sleeve of Assyrian coat of mail. (Nimrud.)

of the Israelite host, stripped as they had been very shortly before both of arms, and of the means of supplying them, so completely, that no smith could be found in the country, nor any weapons seen among the people, and that even the ordinary implements of husbandry had to be repaired and sharpened at the forges of the

conquerors (1 Sam. xiv. 19–22). *Shiryon* also occurs in 1 K. xxii. 34 = 2 Ch. xviii. 33. The last cited passage is very obscure; the A. V. and R. V. text follow the Syriac “between the joints of the harness,” but the real meaning is probably that of R. V. *marg*. “lower armour and the breastplate” (cp. LXX. and Vulgate, “between the lungs and the breastbone”). The word is further found in 2 Ch. xxvi. 14 and Neh. iv. 16 (“habergeons,” R. V. “coats of mail”), also in Job xli. 26 and Is. lix. 17, but with no consistency of translation. This word (spelt שָׁר) was the Sidonian name of Mount Hermon (Deut. iii. 9; Ps. xxix. 6; Stanley, 403), a parallel to which is found in the name $\theta\acute{\alpha}\rho\alpha\varsigma$ given to Mount Sipylus in Lydia. It occurs in the Inscriptions as *Sirara* (Schrader, KAT. p. 159).

Assyrian helmets. (Layard.)

Egyptian helmets. (Wilkinson.)

2. Another piece of defensive armour was the *Tachra* (טַחְרָה), which is mentioned but twice (Ex. xxviii. 32, xxxix. 23)—namely, in reference to the *Meil* or gown of the priest, which is said to have had a hole in the middle for the head, with a hem or binding round the hole, “as it were the ‘mouth’ of an *habergeon*” (R. V. “coat of mail”) to prevent the stuff from tearing. The English “habergeon” was the diminutive of the “hsuerk,” and was a quilted shirt or doublet put on over the head.

3. The *HELMET* is but seldom mentioned. The word for it is *Coba*’ (כֹּבַע , or twice קֹבַע), possibly from a root signifying to be high and round. Reference is made to it in 1 Sam. xvii. 5; 2 Ch. xxvi. 14; Ezek. xxvii. 10, &c.

4. *GREAVER*, or defences for the front of the “legs” (as in the A. V. and R. V.)— מִצְחָה . *Mitzchah*, made of brass, נְחָשֶׁת —are named in 1 Sam. xvii. 6 only.

Of the defensive arms borne by the warrior the notices are hardly less scanty than those just examined.

5. Two kinds of *SHIELD* are distinguishable.

a. The *Tzinnah* (צִנָּה ; from a root צָנַן , “to protect”). This was the large shield, encompassing (Ps. v. 12) and forming a protection for the whole person. When not in actual conflict, the *Tzinnah* was carried before the warrior

R

(1 Sam. xvii. 7, 41). The definite article in the passage of 1 Sam. ("the" shield, R. V. v. 41) denotes the importance of the weapon. The word is used with *Romach* (1 Ch. xii. 8, 14; 2 Ch. xi. 12, &c.) and *Chanith* (1 Ch. xii. 34) as a formula for weapons generally.

b. Of smaller dimensions was the *Magen* (מָגֵן, from מָגַן, to cover), a buckler or target, probably for use in hand-to-hand fights. The difference in size between this and the *Tzinnah* is evident from 1 K. x. 16, 17; 2 Ch. ix. 15, 16, where a much larger quantity of gold is named as being used for the latter than for the former. The portability of the *magen* may be inferred from the notice in 2 Ch. xii. 9, 10; and perhaps also from 2 Sam. i. 21. The word is a favourite one with the poets of the Bible (see Job xv. 26; Ps. iii. 3, xviii. 2, &c.). Like *Tzinnah*, it occurs in the formulaic expressions for weapons of war, but usually coupled with light weapons—such as the bow (2 Ch. xiv. 8, xvii. 17) and darts,

מִגְדָּן (2 Ch. xxxii. 5). [SHIELD.]

Assyrian convex shield.
(Konynjlik.)

Egyptian convex shield.
(Thebes.)

6. Authorities are not agreed as to what kind of arm the *Shelet* (שֵׁלֶט) was (see Rödiger's comments in Ges. *Thes.* a. n.). The word is found in the plural only. By some translators it is rendered "quivers," by some "weapons," but by most "shields" (A. V. and R. V.). It is clear that the word had a very individual sense at the time; it denoted certain special weapons taken by David from Hadadezer king of Zobah (2 Sam. viii. 7; 1 Ch. xviii. 7), and dedicated in the Temple, where they did service on the memorable occasion of the proclamation of Joash (2 K. xi. 10; 2 Ch. xxiii. 9), and where their remembrance long lingered (Cant. iv. 4). From the fact that these arms were of gold, it would seem that they cannot have been for offence.

In the two other passages of its occurrence (Jer. li. 11, here only R. V. *marg.* "suits of armour;" Ezek. xxvii. 11) the word has the force of a foreign arm. [G.] [W.]

ARMY. I. JEWISH ARMY.—The military organisation of the Jews commenced with their departure from the land of Egypt, and was

adapted to the nature of the expedition on which they then entered. Their wars, as directed against the heathen, were religious wars, "wars of the Lord" (Num. xxi. 14; 1 Sam. xviii. 17); "the Lord of hosts, the God of the armies of Israel" (1 Sam. xvii. 45), "the Lord mighty in battle" (Ps. xxiv. 8), was their Captain. He went with them, He saved them, and He delivered their enemies into their hand (Num. x. 35; Deut. xx. 4; 2 Sam. v. 24; Ps. lx. 12).

Every man above 20 years of age was a soldier (Num. i. 3; according to Josephus [*Antiq.* iii. 12, § 4], from 20 to 50 years of age). The priests and Levites were exempted (Num. ii. 33). Each tribe formed a regiment, with its own banner and its own leader (Num. ii. 2, x. 14): their positions in the camp or on the march were accurately fixed (Num. ii.): the whole army started and stopped at a given signal (Num. x. 5, 6): and thus they came up out of Egypt ready for the fight (Ex. xiii. 18). That the Israelites preserved the same exact order throughout their march, may be inferred from Balaam's language (Num. xxiv. 6). On the approach of an enemy, a conscription was made from the general body under the direction of a muster-master (originally named מִסְתָּר, Deut. xx. 5, "officer," afterwards מִסְתָּר, 2 K. xxv. 19, "the scribe, the captain of the host," R. V. [Lucian's Recension of the LXX. and the Vulg. advocate here a proper name, *Σαφὴρ*, *Sopher*], both terms occurring, however, together in 2 Ch. xxvi. 11, the meaning of each being primarily a *writer* or *scribe*), by whom also the officers were appointed (Deut. xx. 9). From the number so selected, some might be excused service on certain specified grounds (Deut. xx. 5-8; 1 Mac. iii. 56). The army was then divided into thousands and hundreds and fifties

under their respective captains (שָׂרֵי הָאֲלָפִים, שָׂרֵי הַמֵּאוֹת, שָׂרֵי הַכִּסְדִּים, Num. xxxi. 14; 1 Sam. viii. 12; 2 K. i. 9. In 1 Mac. iii. 55, "captains over tens" are mentioned), and still further into families (Num. ii. 34; 2 Ch. xiv. 5, xxvi. 12)—the family being regarded as the unit in the Jewish polity. From the time the Israelites entered the land of Canaan until the establishment of the kingdom, little progress was made in military affairs: their wars resembled *border forays*, and the tactics turned upon stratagem rather than upon the discipline and disposition of the forces. Skillfully availing themselves of the opportunities which the country offered, they gained the victory sometimes by an ambush (Josh. viii. 4); sometimes by surprising the enemy (Josh. x. 9, xi. 7; Judg. vii. 21); and sometimes by a judicious attack at the time of fording a river (Judg. iii. 28, iv. 7, vii. 24, xii. 5). No general muster was made at this period, such a number only being selected as was deemed sufficient for the purpose (Num. xxxi. 1-8; Josh. vii. 3; Judg. vii. 1-8); but, when necessary, combatants could be summoned on the spur of the moment by trumpet-call (Judg. iii. 27), by messengers (Judg. vi. 35), by some significant token (1 Sam. xi. 7), or, as in later times, by the erection of a standard (צִי, Is. xviii. 3; Jer. iv. 21, li. 37), or by a beacon fire on an eminence (Jer. vi. 1).

Refusal to obey the summons was sometimes punished by extermination (Judg. xxi. 8-15).

With the kings began the practice of maintaining a body-guard, which formed the nucleus of a standing army (1 Sam. viii. 11, 12), mainly for defensive purposes. Thus Saul had a band of 3000 select warriors (1 Sam. xiii. 2, xiv. 52, xiv. 2). David himself, before his accession to the throne, had a band of 600 (1 Sam. xxiii. 13, xiv. 13). This band—perhaps the *גִּבּוֹרִים*, the “mighty men” of 2 Sam. x. 7 (Keil)—he retained after he became king, and added the *CHERETHITES* and *PELETHITES* (2 Sam. xv. 18, x. 7) together with another class, whose name

Shalishim (Ex. xiv. 7, *שָׁלִישִׁים*; *τριῶντάς*, LXX.; A. V. and R. V. “captains”) has been variously interpreted to mean (1) a corps of veteran guards = Roman *trarii* (Winer, s. v. *Kriegsherr*); (2) chariot-warriors, as being three in each chariot (Gesen. *Thes.* p. 1429); (3) officers of the guard, thirty in number (Ewald, *Gerch.* ii. 601). The fact that the Egyptian war-chariot, with which the Jews were first acquainted, usually contained but two warriors (three being the exception; see *Monuments de l'Égypte*, i. pl. 28, 31, iv. pl. 328), forms an objection to the second of these opinions (Wilkinson, *Anc. Egypt*, i. 335), and the frequent use of the term in the singular number (2 K. vii. 2, ix. 25, xv. 25) [CHARIOT] is opposed to the third. Whatever be the meaning of the name,* it is evident that it grew to indicate officers of high rank, the chief of whom (*הַשָּׁלִישִׁים*, A. V. “a lord,” R. V. “the captain,” 2 K. vii. 2, or *רָאשֵׁי הַשָּׁלִישִׁים*, “chief of the captains,” 1 Ch. xii. 18, *Keri* [Heb. v. 19], R. V. text “chief of the thirty”) was immediately about the king's person, as adjutant or secretary-at-war. David further organised a national militia, divided into twelve regiments, each of which was called out for one month in the year under their respective officers (1 Ch. xxvii. 1); at the head of the army when in active service he appointed a commander-in-chief (*שֹׁרֵץ הַצֶּהָר*, “captain of the host,” 1 Sam. xiv. 50; Jer. lii. 25, R. V.).

Hitherto the army had consisted entirely of infantry (*רִגְלִי*, 1 Sam. iv. 10, xv. 4; cp. Num. ii. 21), the use of horses having been restrained by Divine command (Dent. xvii. 16), and the leaders being mounted on asses or mules (Judg. v. 10, x. 4; 2 Sam. xiii. 29, xviii. 9). The Jews had, however, experienced the great advantage to be obtained by chariots, both in their encounters with the Canaanites (Josh. xvii. 16; Judg. i. 19), and at a later period with the Syrians (2 Sam. viii. 4, x. 18). The interior of Palestine was indeed generally unsuited to the use of chariots: the Canaanites had employed them only in the plains and valleys, such as Jerzeel (Josh. xvii. 16), the plain of Philistia

(Judg. i. 19; 1 Sam. xiii. 5), and the upper valley of the Jordan (Josh. xi. 9; Judg. iv. 2). But the border, both on the side of Egypt and Syria, was admirably adapted to their use; and accordingly we find that as the foreign relations of the kingdoms extended, much importance was attached to them. David reserved a hundred chariots from the spoil of the Syrians (2 Sam. viii. 4): these, if not the same as those used by Absalom (2 Sam. xv. 1) or Adonijah (1 K. i. 5), probably served as the foundation of the force which Solomon afterwards enlarged through his alliance with Egypt (1 K. x. 28, 29), and applied to the protection of his border, stations or barracks being erected for them in different localities (1 K. ix. 19). The force amounted to 1400 chariots, 4000 horses, at the rate (in round numbers) of three horses for each chariot, the third being kept as a reserve, and 12,000 horsemen (1 K. x. 26; 2 Ch. i. 14). For further particulars on the use of chariots and cavalry, see *CHARIOT*, *HORSE*, *HORSEMAN*. At this period the organisation of the army was complete; and we have, in 1 K. ix. 22, apparently a list of the various gradations of rank in the service, as follow:—(1) *אֲנָשֵׁי הַמִּלְחָמָה*, “men of war” = *privates*; (2) *עֲבָדִים*, “servants,” the lowest rank of officers = *lieutenants*; (3) *שָׂרִים*, “princes” = *captains*; (4) *שָׂרֵי הַצִּבָּרִים*, “captains,” already noticed, perhaps = *staff-officers*; (5) *שָׂרֵי הָרֶכֶב* and *שָׂרֵי הַפָּרָשִׁים*, “rulers of his chariots and of his horsemen” = *cavalry officers*.

It does not appear that the system established by David was maintained by the kings of Judah; but in Israel the proximity of the hostile kingdom of Syria necessitated the maintenance of a standing army. The militia (*עַם הַמִּלְחָמָה*, 2 K. xxv. 19) was occasionally called out in times of peace, as by Asa (2 Ch. xiv. 8), by Jehoshaphat (2 Ch. xvii. 14), by Amaziah (2 Ch. xxv. 5), and lastly by Uzziah (2 Ch. xxvi. 11): but these notices prove that such cases were exceptional. On the other hand, the incidental notices of the body-guard lead to the conclusion that it was regularly kept up (1 K. xiv. 28; 2 K. xi. 4, 11). Occasional reference is made to war-chariots (2 K. viii. 21), and it would appear that this branch of the service was maintained, until the wars with the Syrians weakened the resources of the kingdom (2 K. xiii. 7): it was restored by Jotham (Is. ii. 7), but in Hezekiah's reign no force of the kind could be maintained, and the Jews were obliged to seek the aid of Egypt for horses and chariots (2 K. xviii. 23, 24). This was an evident breach of the injunction in Dent. xvii. 16, and met with strong reprobation on the part of the prophet Isiah (xxxi. 1).

The army usually took the field in the spring (2 Sam. xi. 1), and never without asking counsel of God. In the older time this was done by the high-priest by means of the Urim and Thummim (Judg. i. 1, xx. 18; 1 Sam. xiv. 37, xxiii. 2; 2 Sam. v. 19), in later times by a prophet (1 K. xii. 5, &c.; 2 K. xix. 2, &c.). In the earlier wars the ark accompanied the army (Num. x. 35; Josh. vi. 6; 1 Sam. iv. 4, &c.), but this probably ceased after the

* Blehm (*HWB*, s. n. *Krieg*), comparing 2 K. ix. 25 and the frequent representations of three in a chariot on the Assyrian monuments, inclines to the view that the *Shalish* was originally the third (perhaps the shield-bearer) in the chariot, and that, from that restricted sense, the title gradually passed into the general meaning of a chief officer.

building of the Temple. With the ark went the priests, and their attendance was continued after the practice of bringing the ark was dispensed with. It was their duty to blow the silver trumpets (Num. x. 8, 9, xxxi. 6; 2 Ch. xiii. 12, 14) in summons of God's help, to make the offering before the battle (1 Sam. vii. 9, &c.; xiii. 9, &c.), and encourage by stirring words

Assyrian warriors forming a phalanx. (Layard.)

the armies of the Lord (Deut. xx. 2-4; cp. 2 Ch. xx. 21, 22).

With regard to the arrangement and manœuvring of the army in the field, we know but little. A division into three bodies is frequently mentioned (Judg. vii. 16, ix. 43; 1 Sam. xi. 11; 2 Sam. xviii. 2), but sometimes the division was into two (1 K. xx. 27), sometimes into four bodies (2 Macc. viii. 22). The triple division served various purposes: in action there would be a centre and two wings; in camp, relays for the three night-watches (Judg. vii. 19); and by the combination of two of the divisions, there would be a main body and a reserve, or a strong advanced guard (1 Sam. xiii. 2, xxv. 13). In Jehoshaphat's time the army was numbered, "according to their fathers' houses," in five bodies, corresponding, according to Ewald (*Geschichte*, iii. 192), to the geographical divisions of the kingdom at that time: yet even here the threefold principle of division may be noticed, the heavy-armed troops of Judah being considered as the proper army, and the two divisions of light-armed of the tribe of Benjamin as an appendage (2 Ch. xvii. 14-18).

In battle-array, the troops stood and moved at first in something like regimental order (2 Ch. xxvi. 11, Heb.); and possibly the Egyptian phalanx of eight rows of ten men [see cut under EGYPT], or the Assyrian of two rows of spearmen (the first kneeling, the second half-kneeling) and archers protected by shield-bearers, may have had their parallels among the Israelites. The signal for attack, halting,

and retreat was given by the trumpet (Josh. vi. 4, 5, 16; Judg. vii. 18, &c.; 2 Sam. ii. 23, xviii. 16, xx. 22; 1 Macc. xvi. 8). The attack was made with loud shouts (Josh. vi. 16; Amos i. 14. Cp. Is. v. 29; Jer. xlix. 2, l. 42; Ezek. xxi. 22), and sometimes with a definite watch-word (e.g. "The sword of the Lord and of Gideon," Judg. vii. 18, 20). In actual battle,

the troops did not always preserve their serried form; and hand-to-hand encounters testing the strength, skill, equipment, and valour of individual warriors were very frequent; the general engagement being sometimes preceded by single combats, such as that of David and Goliath (1 Sam. xvii.; cp. 2 Sam. xxi. 18, &c.), or that of the twelve of Benjamin and the twelve of the servants of David (2 Sam. ii. 12, &c.). The country, or camp, or place to be attacked was usually well reconnoitred (Josh. ii.; Judg. vii. 11, &c.; 1 Sam. xxvi. 4); ambushes were frequent, led up to by simulated flight (Josh. viii.; Judg. xx. 29, &c.; 1 Sam. xv. 5; 2 Ch. xiii. 13); the assault was often made simultaneously in front and in the rear (2 Ch. xiii. 13, &c.), and night-attacks were common (Gen. xiv. 15; Josh. x. 9, xi. 7; Judg. vii. 16, &c.; 2 Sam. xvii. 1, &c.). Deeds of valour were rewarded by promotion

Assyrian scribes writing down the number of the slain. (Layard.)

(1 Ch. xi. 6), freedom (1 Sam. xvii. 25; cp. 1 Sam. viii. 11, &c.), gifts of land (Josh. xv. 13) and of money (1 Sam. xvii. 25; 2 Sam. xviii. 11), and even by the hand of a princess (Josh. xv. 16; 1 Sam. xvii. 25, xviii. 25). From and after David's time the spoil was fairly divided between those who fought and those

who watched the camp (1 Sam. xxx. 24, 25). "No quarter" was the rule in the wars of extermination (e.g. 1 Sam. xv. 3); in the international and even other wars the slaughter, if great (2 Sam. xviii. 7; 1 K. xx. 21, 29), was not so ruthless (1 K. xx. 31; cp. 2 Ch. xxv. 22). The head of the opponent chief was sometimes brought in as a trophy (1 Sam. xvii. 51, 54, xxxi. 9; 2 Sam. xx. 22; cp. Judith xiii. 9, &c.), and we also find on one occasion the Assyrian practice of collecting the heads and so numbering the slain (cp. 2 K. x. 7, 8); but this practice, and the Egyptian custom of attaining the same end by cutting off the hands, were not in vogue among the Israelites, if traces are to be found among them of a not less ghastly form of mutilation (1 Sam. xviii. 25, 27).

It was counted a sacred duty to bury any Israelitish soldier who fell in battle (1 K. xi. 15; 2 Macc. xii. 39), and the chiefs were followed to their graves with tears and lamentations (2 Sam. iii. 31), their "weapons of war" being buried with them (Ezek. xxii. 27). Burial was also accorded to the dead soldiers of an enemy (Ezek. xxxix. 11, &c.), unless Is. xxx. 33 be a hint that cremation was sometimes adopted (see Cheyne and Orelli in loco). Prisoners of war were variously treated. The ferocity characteristic of foreign foes (e.g. 2 K. viii. 12) was not

without its parallel in Israel (2 K. xv. 16); blinding was common (Judg. xvi. 21; 1 Sam. xi. 2; 2 K. xxv. 7). As a rule death was the lot of leader and soldier; often, in the case of the former, preceded by the humiliation so common in Egypt and Assyria, which bade the conqueror set his foot on the neck of the

Enemies at the footstool of a king. (Thebes.)

conquered (Josh. x. 24; cp. Pa. cx. 1), and even by mutilation similar to that previously inflicted on his foes by the vanquished (Judg. i. 6, 7). Instances are on record of conquered

Assyrians slaying their prisoners alive and carrying away heads of the slain. (Layard.)

populations subjected to terrible tortures (2 Sam. xii. 31), and flung down precipices (2 Ch. xxv. 12); but instances are also furnished of remarkable mercifulness and generosity (1 K. xi. 31, &c.; 2 K. vi. 22, 23). Captives were bound in fetters (Ps. cxlix. 8; 2 K. xxv. 7), as we see in Egyptian and Assyrian monuments. "In a bas-relief discovered at Khorsabad were represented captives led before the king by rings of iron passed through their noses and lips, to which a cord was attached, thus illustrating the passage (2 K. xix. 28; cp. Is. xxxvii. 29), 'I will put my hook in thy nose and my bridle in thy lips'" (Layard). Slavery was the alternative of death. Men, women, and children, bareheaded and bereft of their outer garments, sometimes chained and bound, were either sold or enslaved; mercy tempering the condition of the latter (Deut. xxi. 10, &c.). The warriors of Israel, if victorious, were greeted on their return with music, songs, and dances (Judg. xi. 34; 1 Sam. xviii. 6, &c.; 2 Ch. xx. 26,

28; 1 Macc. iv. 24), as in Assyria. Portions of the spoil were offered to God (2 Sam. viii. 11, &c.); trophies were deposited in the sanctuary (1 Sam. xxi. 9; 2 K. xi. 10), and memorials of victory were erected to the glory of God (1 Sam. vii. 12) and to the honour of the conquerors (1 Sam. xv. 12).

The maintenance and equipment of the soldiers at the public expense dates from the establishment of a standing army: before which time each soldier armed himself and obtained his food from his home (1 Sam. xvii. 17, 18), or by voluntary offerings (2 Sam. xvii. 28, 29), or by forced exactions (1 Sam. xxv. 13), or by the natural resources of the country (1 Sam. xiv. 27). On one occasion only do we hear of any systematic arrangement for provisioning the host (Judg. xx. 10). It is doubtful whether the soldier, if rewarded by his share of any booty taken, ever received pay even under the kings (the only instance of pay mentioned applies to mercenaries, who were dismissed at the admoni-

tion of the prophet, 2 Ch. xxv. 6): but that he was maintained while on active service, and provided with arms, appears from 1 K. iv. 27, x. 16, 17; 2 Ch. xxvi. 14: notices occurring of an arsenal or armoury, in which the weapons were stored (1 K. xiv. 28; Neh. iii. 19; Cant. iv. 4). Foreigners (*e.g.* Philistines) were admitted into the national army, and some—Zelek the Am-

Captives secured by handcuffs. (Wilkinson.)

monite, Uriah the Hittite (2 Sam. xxiii. 37, 39)—rose to positions of distinction.

The numerical strength of the Jewish army cannot be ascertained with any degree of accuracy: the numbers as given in the text are manifestly very high, and the discrepancies in the various statements difficult of reconciliation. At the Exodus the number of the warriors was 600,000 (Ex. xii. 37), or 603,350 (Ex. xxxviii. 26; Num. i. 46); at the entrance into Canaan, 601,730 (Num. xxi. 51). In David's time the

army amounted, according to one statement (2 Sam. xxiv. 9), to 1,300,000, viz. 800,000 for Israel and 500,000 for Judah; but according to another statement (1 Ch. xxi. 5, 6) to 1,470,000, viz. 1,000,000 for Israel and 470,000 for Judah. The militia at the same period amounted to 24,000 \times 12 = 288,000 (1 Ch. xxvii. 1 ff.). At a later period the army of Judah under Abijah is stated at 400,000, and that of Israel under Jeroboam at 300,000 (2 Ch. xiii. 3). Still later, Asa's army, derived from the tribes of Judah and Benjamin alone, is put at 530,000 (2 Ch. xiv. 8), and Jehoshaphat's at 1,160,000 (2 Ch. xvii. 14 sq.).

Little need be said on the army with regard to the period that succeeded the return from the Babylonian Captivity until the organisation of military affairs in Judaea under the Romans. Jews were to be found serving as mercenaries in the armies of Alexander the Great, Seleucus Nicator, Ptolemy Soter, Ptolemy Philadelphus (Josephus, *Ant.* xi. 8, § 5; xii. 2, § 5, 3, § 1), and Alexander Balas (1 Macc. x. 26). The system adopted by Judas Maccabaeus was in strict conformity with the Mosaic law (1 Macc. iii. 55): and though he maintained a standing army, varying from 3000 to 6000 men (1 Macc. iv. 6; 2 Macc. viii. 16), yet the custom of paying the soldiers appears to have been still unknown, and to have originated with Simon (1 Macc. xiv. 32). The introduction of merce-

naries (probably Arabian) commenced with John Hyrcanus, who, according to Josephus (*Ant.* xiii. 8, § 4), rifled the tombs of the kings in order to pay them: the intestine commotions that prevailed in the reign of Alexander Jannaeus obliged him to increase the number to 6,200 men (Joseph. *Ant.* xiii. 13, § 5, 14, § 1): and the same policy was followed by Queen Alexandra (*Ant.* xiii. 16, § 2) and by Herod the Great, who had in his pay Thracian, German, and Gallic troops (*Ant.* xvii. 8, § 3). The

Assyrian musicians coming out to meet the conquerors. (Layard.)

discipline and arrangement of the army was gradually assimilated to that of the Romans, and the titles of the officers borrowed from it (Joseph. *B. J.* ii. 20, § 7).

II. ROMAN ARMY.—The Roman army was divided into legions, the number of which varied considerably, each under six tribuni (*χαλιπαρχος*, "chief captain," i.e. the tribune in command of the cohort, about 1000 foot and 150 horsemen,

being one-sixth of a legion, Acts xxi. 31), was commanded by turns. The legion was subdivided into ten cohorts (*οκείρα*, "band," Acts x. 1), the cohort into three maniples, and the maniple into two centuries, containing originally 100 men, as the name implies, but subsequently from 50 to 100 men, according to the strength of the legion. There were thus 60 centuries in a legion, each under the command of a centurion.

(ἐκατόνταρχος, Acts x. 1, 22; ἐκατόνταρχος, Matt. viii. 5, xxvii. 54). In addition to the legionary cohorts, independent cohorts of 500 volunteers, divided into 6 centuries, served under the Roman standards; and Biscoe (*History of Acts*, p. 220) supposes that all the Roman forces stationed in Judaea were of this class. Josephus speaks of five cohorts as stationed at Caesarea at the time of Herod Agrippa's death (*Ant.* xix. 9, § 2), and frequently mentions that the inhabitants of Caesarea and Sebaste served in the ranks (*Ant.* xx. 8, § 7). One of these cohorts was named the Italian (Acts x. 1), not as being a portion of the Italica legio (for this was not embodied until Nero's reign), but as consisting of volunteers from Italy ("Cohors militum voluntaria, quae est in Syria," Gruter, *Inscr.* i. 434). This cohort probably acted as the body-guard of the procurator. The cohort named after "Augustus" (ὁρεῖρα Σεβαστή, Acts xviii. 1) may have consisted of the volunteers from Sebaste (*B. J.* ii. 12, § 5; Biscoe, p. 223; *Speaker's Commentary* in loco; or may have acquired that name as an appellation, as other cohorts were named Victrix, Pia, Fidelis [Schürer in Riehm, *HWB.* s. v. *Römer*]). Winer, however, thinks that it was a *cohors Augusta*, similar to the *legio Augusta* (*RWB.* s. v. *Römer*). The head-quarters of the Roman forces in Judaea were at Caesarea. A single cohort was probably stationed at Jerusalem in the Tower of Antonia as the ordinary guard. At the time of the great Feasts, however, and on other public occasions, a larger force was sent up, for the sake of preserving order (*B. J.* ii. 12, § 1; 15, § 3). Frequent disturbances arose in reference to the images and other emblems carried by the Roman troops among their military ensigns, which the Jews regarded as idolatrous: deference was paid to their prejudices by a removal of these objects from Jerusalem (*Ant.* xviii. 3, § 1; 5, § 3). The ordinary guard consisted of four soldiers (*τετρακτίων*, "quaternion"), of which there were four, corresponding to the four watches of the night, who relieved each other every three hours (Acts xii. 4; cp. John xix. 23; Polyb. vi. 33, § 7). When in charge of a prisoner, two watched outside the door of the cell, while the other two were inside (Acts xii. 6). The δρεῖοι λαοὶ (*lancearii*, Vulg.; "spearmen," A. V. and R. V.), noticed in Acts xiii. 23, appear to have been light-armed, irregular troops: the origin of the name is, however, quite uncertain (see Alford's *Com.* and *Speaker's Com.* in loco).

Consult Winer, *RWB.*²; Herzog, *RE.*²; Riehm, *HWB.* s. v. *Krieg*. [W. L. B.] [F.]

AR'NA (*Arna*), one of the forefathers of Ezra (2 Esd. i. 2), occupying the place of Zerabiah (Ezra vii. 4) or Zairias (1 Esd. viii. 2) in his genealogy. [W. A. W.]

AR'NAN (אַרְנָן; 'Oprā; *Arnan*). In the received Hebrew text "the sons of Arnan" are mentioned in the genealogy of Zerubbabel (1 Ch. iii. 21). But according to the reading of the Greek, Vulgate, and Syriac Versions, which Houbigant adopts, Arnan was the son of Rephaiah (B. 'Ραφαῖλ). The text is much disputed (see *Comm.*, Keil, Bertheau, *Speaker's*, and Oettli in loco). [W. A. W.] [F.]

AR'NON (אַרְנוֹן; derivable, according to Gesenius, *Thes.* 153 [DIV.¹ and Fürst] from roots signifying "swift" or "noisy," either suiting the character of the stream; Ἀρνών; *Arnon*), the river (נָחַל, accurately "torrent," but rendered "valley" in R. V.) which formed the boundary between Moab and the Amorites, on the north of Moab (Num. xxi. 13, 14, 24, 26; Judg. xi. 22), and afterwards between Moab and Israel (in the territory of Reuben: Deut. ii. 24, 36, iii. 8, 12, 16, iv. 48; Josh. xii. 1, 2, xiii. 9, 16; Judg. xi. 13, 26). From Judg. xi. 18, it would seem to have been also the east border of Moab.⁴ See also 2 K. x. 33; Jer. xlviii. 20. In many of the above passages it occurs in the formula for the site of Arzer, "which is by the brink of the river Arnon." In Numbers it is simply "Arnon," but in Deut., Joshua, Judges, Isaiah, Jeremiah, and Kings "the river A." (A. V. sometimes "river of A."). Isaiah (xvi. 2) mentions its fords; and in Judg. xi. 26 a word of rare occurrence (רַי, hand, comp. Num. xiii. 29) is used for the *sides* of the stream. The "high places of A." (בְּמִזְבְּחֵי, a word which generally refers to worship. Cp. Baethgen, *Beiträge z. Semit. Religionsgeschichte*, p. 213) are mentioned in Num. xxi. 28. In the inscription on the "Moabite stone," king Mesha states that he made the "highway in" Arnon and built Arzer (*Records of the Past*, N. S., ii. 202). By Josephus (*Ant.* iv. 5, § 1) it is described as rising in the mountains of Arabia and flowing through all the wilderness (ἐρημος) till it falls into the Dead Sea. In the time of Jerome it was still known as Arnon; but in the Samaritan-Arabic Version of the Pentateuch by Abū Saïd (10th to 12th cent.) it is given as *el-Mojib*. There can be no doubt that the *Wādī el-Mojib* of the present day is the Arnon. It has been visited and described by Burckhardt (pp. 372-375); Irby (p. 142); and Seetzen (*Reise*, 1854, ii. 347; see also Ritter, *Syria*, p. 1195). The ravine through which it flows is still the "locum vallis in praerupta demersae satis horribilem et periculosum" which it was in the days of Jerome (*OS.*² p. 121, 7). The Roman road from *Rabba* to *Dhibān* crosses it at about two hours' distance from the former. On the south edge of the ravine are some ruins called *Mehatet el Hajj*, and on the north edge, directly opposite, are those still bearing the name of 'Arā'ir [ARZER]. The level plain comes close to the abrupt descent which breaks away in limestone precipices to a great depth, so that no idea of the ravine can be formed until the very edge is reached. The width across, from crest to crest, is about three miles (Burckhardt says about two miles). The descent on the south side, which is 200 ft. higher than the north, is 2150 ft.; it is "extremely steep" (Jer., "per abrupta descendens"), and in places almost impassable "with rocks and stones." On each face of the ravine traces of the paved Roman road are still found, with milestones; and the piers of the Roman bridge still stand in the stream.

⁴ This appears to have been the branch called the *Sail es-Sa'idah*, which flows N.W. from *Ku'at el-Kutrinah*, joining the *Wādī Mojib*, two or three miles east from 'Arā'ir.

The river runs through rich tropical vegetation; water never fails; and the pools are full of fish (Tristram, *Land of Moab*, pp. 125-129). Above the bridge is a small cave with figures in red paint and a half-obliterated Nabathæan inscription (*PEFQY. Stat.* 1871, p. 69). A section of the ravine is given by Latet (*Géologie de la Palestine*, p. 159).

Where it bursts into the Dead Sea this stream is 82 ft. wide and 4 ft. deep,^b flowing through a chasm with perpendicular sides of red, brown, and yellow sandstone, 97 ft. wide (*romantische Felsen Thor*: Seetzen). It then runs through the delta in a S.W. course, narrowing as it goes, and is 10 ft. deep where its waters meet those of the Dead Sea (Lynch, *Report*, May 3, 1847, p. 20).

According to the information given to Burckhardt, its principal source is near *Kutrāneh* on the Haj route. Hence, under the name of *Seil es-Sa'ideh*, it flows N.W. to its junction with the *W. Enkeilch* one hour E. of 'Arā'ir, and then, as *W. Mojib*, more directly W. to the Dead Sea. The *W. Mojib* receives on the North the streama of the *Seil Heidan*, and on the South those of *W. el-Weil* and *W. Salikeh*.

At its junction with the *Enkeilch* is a piece of pasture ground, in the midst of which stands a hill with ruins on it (Burckh. p. 374). May not these ruins be the site of the mysterious "city that is in the midst of the river" (Josh. xiii. 9, 16; Deut. ii. 36), so often coupled with Aroer? From the above description of the ravine, it is plain that that city cannot have been situated immediately below Aroer, as has been conjectured. Tristram (*Land of Moab*, p. 128) identifies this city with "some faint remains of early buildings" above the ruins of the Roman bridge. [G.] [W.]

AROD (אֲרֹד, Ges. perhaps = עָרֹד, *wild ass*; B. 'Apoðel; Bāb (vid) 'Apoðel; AF. -ðl; Arod), a son of Gad (Num. xxvi. 17; LXX. v. 26), called Arodi (אֲרֹדִי) in Gen. xlii. 16, and his family THE ARODITES (Num. xxvi. 17). [G.] [F.]

ARO'DI (אֲרֹדִי; A. 'Apoðis, D. Αὐράρις; Arodi) = AROD (Gen. xlii. 16).

ARO'DITES, THE (אֲרֹדִיתַי; B. δ 'Apoðel [see var. s. n. AROD]; Aroditæ). Descendants of Arod the son of Gad (Num. xxvi. 17 [LXX. v. 26]). [W. A. W.] [F.]

ARO'ER (אֲרֹעַר, occasionally אֲרֹעַר = ruins, places of which the foundations are laid bare, Gesenius*; 'Apoð; Aroer), the name of several towns of Eastern and Western Palestine.

1. In Josh. xii. 2, AF. 'Apoð, B. 'Apoð; in Jer. xlviii. (LXX. xxxi.) 19, BNA. 'Apoð. A city "by the brink," or "on the bank of" (both the same expression—"on the lip"), or "hy" the torrent Arnon, the southern point of the territory

of Sihon king of the Amorites,^b and afterwards of the tribe of Reuben (Deut. ii. 36, iii. 12, iv. 48; Josh. xii. 2, xiii. 9, 16; Judg. xi. 26; 2 K. i. 33; 1 Ch. v. 8), but later again in possession of Moab (Jer. xlviii. 19). It was built or rebuilt by king Mesha (*Records of the Past*, N. S., ii. 202). It is described (OS² p. 122, 25) as "usque hodie in vertice montis," "super ripam (χελος) torrentis Arnon," an account agreeing exactly with that of the ruins of 'Arā'ir on the old Roman road, upon the very edge of the precipitous north bank of the *Wady Mojib*. [ARNON.] The ruins are featureless, but contain several wells and cisterns (Tristram, *Land of Moab*, pp. 130, 131). Aroer is often mentioned in connexion with the city that is "in," or "in the midst of, the river." The nature of the cleft through which the Arnon flows is such that it is impossible there can have been any town in such a position immediately near Aroer; but a suggestion has been made above [ARNON], which on investigation of the spot may clear up this point.

2. In Josh. xiii. 25, A. 'Apoð, B. 'Apoð. Aroer "that is 'facing' (עַל־פָּנֵי) Rabbah" (Rabbah of Ammon), a town "built" by and belonging to Gad (Num. xxiii. 34; Josh. xiii. 25; 2 Sam. xxiv. 5). This is possibly the place mentioned in Judg. xi. 33, which was shown in Jerome's time (OS² p. 131, 5) "in monte, vigesimo ab Aelia lapide ad septentrionem." Ritter (*Syria*, p. 1130) suggests an identification with *Ayra*, found by Burckhardt 2½ hours S.W. of *es-Salt*. There is considerable difference however in the radical letters of the two words, the second Ain not being present.

3. Aroer, in Is. xvii. 2, if a place at all,^c must be still further north than either of the two already named, and dependent on Damascus. Gesenius (*Jesaja*, p. 556), however, takes it to be Aroer of Gad, and the "forsoaken" state of its cities to be the result of the deportation of Galilee and Gilead by Tiglath-pileser (2 K. xv. 29).

4. A town in Judah, named only in 1 Sam. xxi. 28. Robinson (ii. 199) has identified it with the water pits and ruins of 'Arārah in the valley of the same name on the road from Petra to Gaza, about 11 miles E.S.E. of *Bir es-Saba*, a position which agrees very fairly with the slight indications of the text. Palmer (*Desert of the Erodus*, p. 404) speaks of "a few wells." [G.] [W.]

ARO'ERITE (אֲרֹעַרִי; A. 'Apoð; B. pel. B. 'Apd; Aroerites). Hothan the Aroerite was the father of two of David's chief captains (1 Ch. xi. 44). [W. A. W.]

^b From the omission of the name in the remarkable fragment, Num. xxi. 27-30, where the principal places taken by the Amorites from Moab are named, Aroer would appear not to be one of the very oldest cities. Possibly it was built by the Amorites after their conquest, to guard the important boundary of the Arnon.

^c In this place the letters of the name are transposed. עָרֹד.

^d The LXX. have καταλειμμένη εἰς τὸν αἰῶνα. apparently reading עָרִי עָרִי for עָרִי עָרִי. The Vulgate (Aroer) agrees with the Hebrew text, which is followed by Delitzsch, Cheyne, *Speaker's Commentary*, and all modern critics.

^b Seetzen found the stream 40 ft. wide and 3 ft. deep in January (ii. 368).

^c May it not with equal probability be derived from עָרִי, juniper [so Lagarde with Targ., Vulg. myrica (Jer. xlviii. 6)], the modern Arabic *Arar* (see Rob. ii. 124, note)? Comp. Luz, Rimmon, Tappuch, and other places deriving their names from trees.

AROM ('Αρόμ; Asonus). The "sons of Arom," to the number of 32, are enumerated in 1 Esd. v. 16 among those who returned with Zorobabel. Unless it be a mistake for Asom, and represents Hasmim in Ezra ii. 19, it has no parallel in the lists of Ezra and Nehemiah. [W. A. W.]

ARPAD (Ἀρπάδ. Ges. connects it with ἄρπ, and takes it as "belonging to a couch," hence a "support" = a strong city; 'Αρπάδ, 'Αρπάδ, A. 'Αρπάδ, &c.; Arphad), a city or district in Syria, invariably named with Hamath (now Hamah, on the Orontes. Jer. xlix. 23; 2 K. xviii. 34, xix. 13; Is. x. 9, xxxvi. 19, xxxvii. 13; in the last two passages it is rendered in the A. V. Arphad). Arpad is several times mentioned in the Assyrian inscriptions under the form Ar-pad-da, and it was taken, B.C. 740, by Tiglath-pileser II., after a siege of three years, previous to his campaign against Azariah (Uzziah) king of Judah; it has been identified with Tell Erfád about thirteen miles north of Aleppo (Schrader, *KAT.* pp. 223, 324, 328, 487). [G.] [W.]

AR'PHAD. [ARPAD.]

ARPHAX'AD (Ἀρφαξάδ; 'Αρφαξάδ; Jos. 'Αρφαξάδης; Arphaxad), the third son of Shem and the ancestor of Eber (Gen. x. 22, 24, xi. 10), and said to be of the Chaldeans (Joseph. *Ant.* i. 6, § 4). Bochart (*Phaleg*, ii. 4) supposed that the name was preserved in that of the province Arrapachitis ('Αρραπαχίτις, Ptol. vi. 1, § 2) in Northern Assyria (cp. Ewald, *Gesch. d. Völk. Isr.*, i. 378); and this opinion, indicating the not infrequent practice of a geographical becoming in the course of time a personal name, has been accepted by Lagarde, Nöldeke, Delitzsch (*Genesis*, p. 222 [1887]), Kautzsch (Riehm, *HWB.* a. n.), and Spiegel (Herzog, *KE.* a. n.). Other interpretations of the name have been given. Schrader (*KAT.* pp. 112, 612), Ges., &c., suppose it to mean the border of the Chaldees (Ἀρὰ [cp. Arab. راف]) and כשד or Babylonia (see against this Spiegel, *l. c.*). Fried. Delitzsch (*Wo lag das Paradies*, pp. 225-6) connects it with arba-Kisádi, and renders it the "Viergötterstadt."

2. ARPHAXAD, a king "who reigned over the Medes in Ecbatana, and strengthened the city by vast fortifications" (Judith i. 1-4). In a war with "Nabuchodonosor, king of Assyria," he was entirely defeated "in the great plain in the borders of Ragau" (Ῥάγας, Raga, Tobit i. 14, &c.), and afterwards taken prisoner and put to death (Judith i. 13-15). From the passage in Judith (i. 2, ἀρπαξάδης ἐστὶν Ἐκβαράδων) he has been frequently identified with Deioces (Artaxius, Ctes.), the founder of Ecbatana (Herod. i. 98); but as Deioces died peacefully (Herod. i. 102), it seems better to look for the original of Arphaxad in his son Phraortes (Artynes, Ctes.), who greatly extended the Median empire, and at last fell in a battle with the Assyrians, 633 B.C. (Herod. i. 102, αὐτὸς τε διεφθάρη . . . καὶ δὲ σφόδρα αὐτοῦ δὲ πολλὰς). Niebühr (*Gesch. Assur's*, p. 32) endeavours to identify the name with Astyages = Ashdohak, the common title of the Median dynasty, and refers the events to a war in the twelfth year of Nebuchadnezzar, king of Baby-

lon, B.C. 592 (*Ibid.* pp. 212, 285). Schrader (Riehm, *HWB.* a. n.) considers the name (like Arioch in i. 6) a poetical creation of the writer of the book, and recalled into existence from Gen. x. 22. Others (e.g. Volkmar) identify Arphaxad with Artavasdes (Dio Cass. xl. 49, &c.) the Parthian, or with Arbaces, the first king of the Medes and the conqueror of Sardapanalus. Lupton is disposed to compare the name with that of Arsaces (i.e. Mithridates; see *Speaker's Comm.* on Judith i. 1). [B. F. W.] [F.]

ARROWS. [ARMS.]

ARSA'CES VI., a king of Parthia, who assumed the royal title Arsaces ('Αρσάκης, Armen. *Arschag*, probably containing the roots both of *Arya* and *Sacae*) in addition to his proper name, MITHRIDATES I. (Phraates, App. *Syr.* 67, from confusion with his successor), according to universal custom (Strab. xv. p. 702), in honour of the founder of the Parthian monarchy (Justin. xii. 5, 5). He made great additions to the empire by successful wars; and when Demetrius Nicator entered his dominions to collect forces or otherwise strengthen his position against the usurper Tryphon, he despatched an officer against him who defeated the great army after a campaign of varied success (Justin. xxxvi. 1), and took the king prisoner, B.C. 138 (1 Macc. xiv. 1-3; Joseph. *Ant.* xiii. 5, § 11; Justin xxxvi. 1, xxxviii. 9). Mithridates treated his prisoner with respect, and gave him his daughter in marriage (App. *Syr.* 67, 68), but kept him in confinement till his own death, c. B.C. 130 (App. *Syr.* 68; Diod. *ap. Müller, Fragm. Hist.* ii. 19). [B. F. W.]

Coin of Artaxerxes. (British Museum.)

AR'SARETH, a region beyond Euphrates, apparently of great extent (2 Esd. xiii. 45, only). The word is a version of ארץ ארתר, "another land," Deut. xxix. 28 (Schiller-Szinessy. See *Speaker's Comm.* on 2 Esd. i. c.). Volkmar (*Ueb. d. Einl. in die Apokr.* ii. 193) supposes the word to represent ארת ארץ, "Land of Arat," or "Ararat." [G.] [W.]

ARTAXER'XES (Ἀρταξέρξης, Artakhastā

[Ezra iv. 7 a], or ארשטאר - [Ezra iv. 7 b], or ארשטאר - [Ezra iv. 8, vii. 1, and onwards; Neh. ii. 6: see Baer's text in *locis*], Artakhast. The LXX. has such variations as the following:—A. 'Αρτασασθδ [usually]; B. 'Ασπαρσθδ [Ezra iv. 7 a], 'Ασπαρδ [Ezra iv. 8], 'Αρταρσθδ [Neh. ii. 1]; * c. a (ubique) 'Ασπαρσθδ, * c. b 'Αρταρσθδ [Neh. ii. 1]; Artaxerxes, the name probably of two different kings of Persia mentioned in the Old Testament. The word, according to Herod. vi. 98, means δ μέγας ἀρχιεὺς, the great warrior [so Ges. and Lassen, *Zeitschr. z. Kunde d. Morgenl.* vi. p. 161, &c.]. The name arose from the old

Pers. *Artakhschathra* [Spiegel, *Eran. Alterthumskunde*, ii. 410], and is compounded of *arta* [as in Artabanus, Artaphanes], great or honoured (cp. 'Αρταιος, Herod. vii. 61, the old national name of the Persians, also *Arii*, and the Sanscrit *Arya*, which is applied to the followers of the Brahminical law), and *hkschathra*, a kingdom. The later Persians derived from it *Ardeshir*, the Armenians *Artakša*, the Greeks *Artaxerxes* [see reff. to Burnouf and Lagarde in *MV.*¹⁰]. On the Babylonian monuments it is written *Artakassu*, *Artakšitsu*, and *Artakassu* (Fr. Delitzsch, Pref. p. ix. to Baer's edit. of *Daniel, Ezra, und Nehemia*).

1. The first Artaxerxes is mentioned in Ezra iv. 7, as induced by "the adversaries of Judah and Benjamin" to obstruct the rebuilding of the Temple, and appears identical with Smerdis, the Magian impostor, and pretended brother of Cambyses. This identification is dependent upon the presumption that the Ahasuerus of Ezra iv. 6 is Cambyses, and that the Darius of iv. 24 is Darius Hystaspis, so that the intermediate King must be the pseudo-Smerdis who usurped the throne B.C. 522, and reigned eight months (Herod. iii. 61, 67 sq. So Ewald, Hitzig, and *Speaker's Comm.*). We need not wonder at this variation in his name. Artaxerxes may have been adopted or conferred on him as a title, and we find the true Smerdis called Tanyoxares (the younger Oxares) by Xenophon (*Cyrop.* viii. 7) and Ctæsius (*Pers.* fr. 8-13), and Oropastes by Justin (*Hist.* i. 9). Oxares appears to be the same name as Xerxes, of which Artaxerxes is a compound.

2. In Neh. ii. 1 we have another Artaxerxes, who permits Nehemiah to spend twelve years at Jerusalem, in order to settle the affairs of the colony there, which had fallen into great confusion. We may safely identify him with Artaxerxes Macrocheir or Longimannus, the son of Xerxes, who reigned B.C. 464-425. And we believe that this is the same king who had previously allowed Ezra to go to Jerusalem for a similar purpose (Ezra vii. 1). There are indeed some who maintain that as Darius Hystaspis is the king in the sixth chapter of Ezra, the king mentioned next after him, at the beginning of the seventh, must be Xerxes, and thus they distinguish three Persian kings called Artaxerxes in the Old Testament: (1) Smerdis in Ezra iv., (2) Xerxes in Ezra vii., and (3) Artaxerxes Macrocheir in Nehemiah. But it is almost demonstrable that Xerxes is the Ahasuerus of the Book of Esther [AHASUERUS], and it is hard to suppose that in addition to his ordinary name he would have been called both Ahasuerus and Artaxerxes in the O. T. It seems also very probable that the policy of Neh. ii. was a continuation and renewal of that of Ezra vii., and that the same king was the author of both. Now it is not possible for Xerxes to be the Artaxerxes of Nehemiah, as Josephus asserts (*Ant.* xi. 5, § 6), for Xerxes only reigned 21 years, whereas Nehemiah (v. 14) speaks of the 32nd year of Artaxerxes. Nor is it necessary to believe that the Artaxerxes of Ezra vii. is necessarily the immediate successor of the Darius of Ezra vi. The Book of Ezra is not a continuous history. It is evident from the first words of ch. vii. that there is a pause at the end of ch. vi. Indeed, as ch. vi. concludes in the 6th year of Darius, and ch. vii. begins with the

7th year of Artaxerxes, we cannot even believe the latter king to be Xerxes, without assuming an interval of 36 years (B.C. 515-479) between the chapters, and it is not more difficult to imagine one of 58, which will carry us to B.C. 457, the 7th year of Artaxerxes Macrocheir. We conclude therefore that this is the king of Persia under whom both Ezra and Nehemiah carried on their work; that in B.C. 457 he sent Ezra to Jerusalem; that after 13 years it became evident that a civil as well as an ecclesiastical head was required for the new settlement, and therefore that in 444 he allowed Nehemiah to go up in the latter capacity. From the testimony of profane historians this king appears remarkable among Persian monarchs for wisdom and right feeling, and with this character his conduct to the Jews coincides (Diod. xi. 71).

Hengstenberg (*Christologie*, iii. p. 143, &c.), Schrader (Riehm's *HWB.* a. n.), Sayce (*Ezra, Nehemiah, and Esther*, p. 23 [see index]), and Oettli (Strack u. Zöckler's *Kyf. Komm.*) do not accept the views expressed above. They consider the Artaxerxes mentioned in the Bible to be the name of but one and the same person, viz. Artaxerxes Longimannus. [G. E. L. C.] [F.]

ARTEMAS (Ἀρτεμᾶς, i.e. Ἀρτεμίδωρος), a companion of St. Paul (Tit. iii. 12). According to tradition, he became bishop of Lystra. The name,—"the gift of Artemis," is said to have been a common one among the Greeks. [G.]

ARUBOTH (The Arubboth, as in R. V. אֲרֻבוֹת; A. *Aruboth* [B. altogether different; *Aruboth*], the third of Solomon's commissariat districts (1 K. iv. 10). It included Sochoh in the rich corn-growing country of the Shefelah and the land of Hephra, probably near Hebron. Josephus calls the district the toparchy of Bethlehem (*Ant.* viii. 2, § 3), and it appears to have been co-extensive with the territory assigned to Judah. The significance of the word is entirely lost at present. [G.] [W.]

ARUMAH (אֲרֻמָּה; B. *Arumah*, A. *Arumâ*; in *Ruma*), a place apparently in the neighbourhood of Shechem, at which Abimelech resided (Judg. ix. 41). It is conjectured that the word in verse 31, אֲרֻמָּה, rendered "privily," and in the margin "at Tormah," should be read "at Arumah" by changing the מ to an נ, but for this there is no support beyond the apparent probability of the change. Arumah is possibly the same place as Ruma, under which name it is given by Eusebius and Jerome in *OS.* (pp. 174, 24; 281, 10). According to them, it was called Arimathæa [ARIMATHÆA]. But this is not consonant with its apparent position in the story. Tristram (*Bible Places*, p. 192) identifies it with *Tell el-'Orneh* (comp. Van de Velde, *Mém.* p. 225) to the S.E. of the plain of Shechem (*P. F. Mon.* ii. 387, 402). [G.] [W.]

ARVAD (אֲרָוָד [ed. Baer]; Egypt. *Arvadu*; Assyrian, *Arvadu* and *Arvad*; Greek, *Opusolia*), a city in Phœnicia, the men of which are named in close connexion with those of Zidon as the navigators and defenders of the ships of Tyre in Ezek. xxvii. 8, 11. In agreement with this is the mention of "the Arvadite" (אֲרָוָדִי) in Gen. x. 18, and 1 Ch. i. 16, as a son of Canaan,

with Zidon, Hamath, and other northern localities. The LXX. (A.) has in each of the above passages 'Αρδύος, and in Josephus (*Ant.* i. 6, § 2) we find 'Αρυνδαίος 'Αραβον την νῆσον ἔχον. There is thus no doubt that Arvad is the island of *Ruād* (رواد), which lies off Tortosa

(*Tartús*), two or three miles from the Phœnician coast, (not at, but) some distance above the mouth of the river Eleutherus, now the *Nahr el-Kebir* (Maund. p. 403; Burckh. p. 161), and at the northern extremity of the great bay which stretches above Tripoli (Kiepert's Map, 1856). The island is high and rocky, but very small, hardly a mile in circumference (see Maund. p. 399; "800 yards in extreme length," Allen, ii. 178). According to Strabo (xvi. 2, § 13) Arvad was founded by fugitives from Sidon, and he testifies to its prosperity, its likeness to Tyre, and especially to the well-known nautical skill of the inhabitants* (see the notices by Strabo, Pliny, and others in Gesenius, p. 1269, Winer, and Riehm, *Arvaditen*). Opposite Arvad, on the mainland, was the city Antaradus (*Tartús*), by which name the Targum Jerus. renders the name Arvad in Gen. z. 18. [ARADUS.] Numerous antiquities of the Phœnician period have been discovered at Ruād and Tartús, as well as at Amrit, the ancient Marathus, over which town, together with Karné, Arvad held rule. Some of these contain the names of early Arvadite kings written in Egyptian hieroglyphics. Arvad was conquered by Thothmes III. of the 18th dynasty, and appears as an ally of the Hittites in their wars against Ramses II. and Ramsee III. of the 19th and 20th dynasties. Matan-baal of Arvad, like Ahab of Israel, assisted Rimmon-idri (Benhadad II.) of Damascus in the battle of Karkar, in which he was defeated by the Assyrians B.C. 854. Other Arvadite princes submitted to Tiglath-pileser III. (B.C. 732) and Sennacherib (B.C. 701); and Assur-bani-pal, about B.C. 665, married the daughter of the king of Arvad, and on the death of the latter selected his successor from among his ten sons [see the names in Schrader, *KAT.* p. 105]. A plan of the island will be found in Allen's *Dead Sea*, end of vol. ii.; also in the Admiralty Charts, 2050, "Island of Ruād," and a description of the island in *PEFQy. Stat.* 1875, pp. 218-221. [A. H. S.]

ARVA'DITE, THE (הַרְוֹדִי; δ' *Arδδύος*; *Aradus*). One of the families of Canaan (*Gen.* i. 18; 1 Ch. i. 16), and probably inhabitants of the island *Aradus*, or *Ruād*. [ARVAD.] [W. A. W.]

AR'ZA (אַרְצָא; B. 'Arza, A. 'Arza; *Arsa*). Prefect of the palace at Tirzah to Elah king of Israel, who was assassinated at a banquet in his house by Zimri (1 K. xvi. 9). In the Targum of Jonathan the word is taken as the name of an idol, and in the Arabic version in the London Polyglot the rendering of the last clause is, "which belongs to the idol of Beth-Arza." [W. A. W.] [F.]

A'SA (אַסָּא, meaning uncertain: perhaps [from the Aram.] *physician*; 'Asá; Jos. 'Asa-

vos; *Asa*), son of Abijah, and third king of Judah after the separation of the kingdom of Israel, was conspicuous for his earnestness in supporting the worship of God, and rooting out idolatry with its attendant immoralities (1 K. xv. 9-24; 2 Ch. xv. 1-19); and for the vigour and wisdom with which he provided for the prosperity of his kingdom (2 Ch. xiv. 1-7). In his zeal against heathenism he did not spare his grandmother MAACHAH, who occupied the special dignity of "King's Mother," to which great importance was attached in the Jewish court, as in Egypt, Babylonia (cp. Dan. v. 10), and Persia, and to which parallels have been found in modern Eastern countries, as in the position of the Sultana Valide in Turkey (see 1 K. ii. 19; 2 K. xxiv. 12; Jer. xxix. 2; also Calmet, *Fragm.* xvi.; and Bruce's *Travels*, vol. ii. 537, and iv. 244). She had set up some impure worship in a grove (the word translated

idol, 1 K. xv. 13, is in Hebrew *horror* [מַסֵּהָ, R. V. "an abominable image;" Schultz and others=a Phallus-statue. Klostermann's alteration of the text is unnecessary]; LXX. *σύνδοξον*: the Vulgate reads, *ne esset [Maacha] princeps in sacris Priapi*); but Asa burnt the symbol of her religion, and threw its ashes into the brook Kidron, as Moses had done to the golden calf (*Ex.* xxxii. 20), and then deposed Maachah from her dignity. He also placed in the Temple certain gifts which his father had dedicated, probably in the earlier and better period of his reign [ABIJAH], and which the heathen priests must have used for their own worship, and renewed the great Altar which they apparently had desecrated (2 Ch. xv. 8). Besides this, he fortified cities on his frontiers, and raised an army, amounting, according to 2 Ch. xiv. 8, to 580,000 men. Thus Asa's reign marks the return of Judah to a consciousness of the high destiny to which God had called her, and to the belief that the Divine Power was truly at work within her. The good effects of this were visible in the enthusiastic resistance offered by the people to Zerah, an invader, who is called a Cushite or Ethiopian, and whom Ewald (*Gesch. des V. I.* iii. p. 470), Kleinert (in Riehm's *HWB.* s. n.), and Ebers (Riehm, *HWB.* s. n. Serach) identify with Osorkon I., the second king of the 22nd dynasty of Egypt, inheritor therefore of the quarrel of his father Shishak, to whom Asa had probably refused to pay tribute. [ZERAH. Lenormant, Schrader, and Lauth prefer to identify Zerah with Azerch-Amen. See "Aethiopien" in Riehm's *HWB.*] At the head of an enormous host (a million of men, we read in 2 Ch. xiv. 9) he attacked Mareshah or Marissa in the S.W. of the country, near the later Eleutheropolis (Robinson, *B. R.*, ii. 67), a town afterwards taken by Judas Maccabæus (1 Macc. v. 65), and finally destroyed by the Parthians in their war against Herod (*Joseph. Ant.* xiv. 13, § 9). There he was utterly defeated, and driven back with immense loss to Gerar. As Asa returned laden with spoil, he was commended and encouraged by the prophet Azariah, son of Oded (2 Ch. xv. 1), and on his arrival at Jerusalem convoked an assembly of his own people and of many who had come to him from Israel, and with solemn sacrifices and ceremonies renewed the covenant

* These nautical propensities remain in full force (see Allen's *Dead Sea*, II. 193).

by which the nation was dedicated to God. The peace which followed this victory, and this reformation-movement which centralized worship again at Jerusalem, were interrupted by the attempt of Baasha of Israel to fortify Ramah as a kind of Decleia, "that he might not suffer any to go out or to come in unto Asa king of Judah" (2 Ch. xvi. 1; cp. xv. 9). To stop this he purchased the help of BENHADAD I. king of Damascus, by a large payment of treasure left in the Temple and palaces from the Egyptian tribute in Rehoboam's time. This alliance with those whose forefathers David had smitten (2 Sam. x. 15, &c.), and who were so sore an adversary to Israel all the days of Solomon (1 K. xi. 25), was the subversion of all recognised rule; but by it Asa forced Baasha to abandon his purpose. Asa destroyed the works which Baasha had begun at Ramah, using the materials to fortify two towns in Benjamin, Gela (*the hill*) and Mizpeh (*the watch-tower*), as checks to any future invasion. The wells which he sunk at Mizpeh were famous in Jeremiah's time (xli. 9). The means by which he obtained this success—reliance on the king of Syria, and not on the LORD God (2 Ch. xvi. 7)—were censured by Hanani the seer, who seems even to have excited some discontent in Jerusalem, in consequence of which he was imprisoned and some other punishments inflicted (2 Ch. xvi. 9). The prophet threatened Asa with war, which appears to have been fulfilled by the continuance for some time of that with Baasha, as we infer from an allusion in 2 Ch. xvii. 2 to the cities of Ephraim which he took, and which can hardly refer to any events prior to the destruction of Ramah.

In his old age Asa suffered from the gout, and it is mentioned that "he sought not to the Lord but to the physicians." He acted, *i.e.*, without seeking God's blessing on their remedies (Ecclus. xxxviii. 1-8). He died greatly loved and honoured in the 41st year of his reign; and that reign was therefore contemporaneous with the reigns of Jeroboam I., Nadab, Baasha, Elah, Zimri, Omri, and Ahab, kings of Israel. There are difficulties connected with its chronology, arising principally from differences in the text of Kings and Chronicles. For instance, in 2 Ch. xvi. 1, we read that Baasha fortified Ramah in the 36th year of Asa's reign. In 1 K. xv. 33, Baasha is said to have died in the 26th [20th, A. V. ed. 1611, after LXX. A. (var. 28th)]; B. and Luc. Rec. omit the number]. The explanation given in the margin of the A. V. (2 Ch.), but absent from the R. V., that the Chronicler is referring to the years not of Asa's reign, but of the separate kingdom of Judah, is now generally given up as wrong and impossible (Keil and Oettli), and the date of Kings preferred. According to Usher, the date of Asa's accession was B.C. 955. In his fifteenth year (B.C. 941) was the great festival after the defeat of Zerah. In B.C. 940 was the league with Benhadad, and in B.C. 914 Asa died. Kamphausen, correcting the old chronology by the Assyrian inscriptions, dates Asa's reign from B.C. 917 to B.C. 876. [G. E. L. C.] [F.]

2. B. 'Ossad; A. 'Aod. Ancestor of Berechiah, a Levite who resided in one of the villages of the Netophathites after the return from Babylon (1 Ch. ix. 16). [W. A. W.]

ASADI'AS (אֲסַדִּי'אֵשׁ, *Jah loveth or is gracious*). Cp. his brother's name יְהוֹשָׁפָאֵשׁ, *Jushabhesed*; B. 'Aasāḏid, A. 'Aasāḏid; *Hasadiah*. 1. 1 Ch. iii. 20, where in A. V. and R. V. it is written Hasadiah. One of the descendants of Jeconiah. [B. F. W.] [F.]

2. T. 'Aasāḏas, A. *Sadālas*; *Sedous*. Son of Chelcias, or Hilkiash, and one of the ancestors of Baruch (Bar. i. 1). The name is probably the same as that elsewhere represented by Hasadiah (1 Ch. iii. 20). [W. A. W.]

ASA'EL (אֲסָאֵל, ed. Neub. Chald. omits; T. 'Asāḥal; Vulg. omits; Itala, *Asikel*), of the tribe of Naphtali, and forefather of Tobit (Tob. i. 1). [F.]

ASA'HEL (אֲסָאֵל, *God hath made*; 'Asāḥal; *Asael*). 1. Nephew of David, being the youngest son of his sister Zeruiah. He was celebrated for his swiftness of foot, a gift much valued in ancient times, as we see by the instances of Achilles, Antilochus (Hom. *Il.* xv. 570), Papirius Cursor (Liv. ix. 16), and others. He was one of the thirty heroes of David (2 Sam. xxiii. 24) and captain of the fourth division (each division numbering 24,000) of David's army (1 Ch. xxvii. 7). When fighting under the command of his brother Joab against Ishboaheth's army at Gibeon, he pursued ABNEB, who, after vainly warning him to desist, was obliged in self-defence to kill him, though with reluctance, probably on account of his youth (2 Sam. ii. 18 sq.). [G. E. L. C.] [F.]

2. B. 'Iasēḥal, A. 'Iasēḥal; *Asael*. One of the Levites in the reign of Jehoshaphat, who went throughout the cities of Judah to instruct the people in the knowledge of the Law, at the time of the revival of the true worship (2 Ch. xvii. 8).

3. 'Asāḥal; *Asael*. A Levite in the reign of Hezekiah, who had charge of the tithes and dedicated things in the Temple under Cononiah and Shimei (2 Ch. xxxi. 13).

4. B. 'Aḥḥal, N. 'Aḥḥal, N. 'A. 'Asāḥal; *Azael*. A priest, father of Jonathan in the time of Ezra (Ezra x. 15), called AZAEL in 1 Esd. ix. 14 (B. 'A(ḥ)alos; *Ezelus*). [W. A. W.] [F.]

ASAHIAH, or ASATIAH (אֲסָחִי'אֵשׁ, *Jah hath made*; B. 'Aasāḥal, A. [2 K. xxii. 12] 'Iasael; *Asaia*). A servant of king Josiah, sent by him, together with others, to seek information of Jehovah respecting the Book of the Law which Hilkiash found in the Temple (2 K. xxii. 12, 14; also called Asaiah, 2 Ch. xxxiv. 20, B. 'Iasias, A. 'Aasāḥal). [R. W. B.] [F.]

ASATIAH (אֲסָחִי'אֵשׁ [see ASAHIAH]; B. 'Aasid; *Asaia*). 1. A prince of a Simeonite family, who in the reign of Hezekiah drove out the Hamite shepherds from Gedor (1 Ch. iv. 36).

2. *Asaia*. A Levite in the reign of David, chief of the family of Merari (1 Ch. vi. 30, A. 'Aasid, B. 'Aasid). With 120 of his brethren he took part in the solemn service of bringing the ark from the house of Obed-edom to the city of David (1 Ch. xv. 6 [A. 'Aasid, B. 'Aasid], 11 [A. 'Aasid, B. -d]).

3. B. 'Aasid, A. 'Aasid; *Asaia*. The firstborn of "the Shilonite," according to 1 Ch. ix. 5, who with his family dwelt in Jerusalem after

the return from Babylon. In Neh. xi. 5 he is called MAASEIAH [see var. readings of Gk. MSS. in Swete], and his descent is there traced from Shiloni, which is explained by the Targum of R. Joseph on 1 Ch. as a patronymic from Shelah the son of Judah, by others as "the native or inhabitant of Shiloh."

4. *Asas*. 2 Ch. xxxiv. 20. [ASAHIAH.] [W. A. W.] [F.]

A'SANA (B. 'Assad; A. 'Asa-; *Asana*). One of the Nethinim or servants of the Temple who returned from the Captivity (1 Esd. v. 31). [ASHNAH.] [F.]

A'SAPH (אֶסָפִי, collector; 'Asaf; *Asaph*).

1. A Levite, the son of Berechiah, and lineally descended from Gershon, the second son of Levi (1 Ch. vi. 39, &c.). David set him "over the service of song after that the ark had rest . . . in the midst of the tent that David had pitched for it" in Zion (1 Ch. vi. 31, xvi. 1). There he and his brethren "ministered continually, as every day's work required" (1 Ch. xvi. 37); his colleagues Heman and Jeduthun (or Ethan) doing the like office in the high place at Gibeon (1 Ch. xv. 17, xvi. 39-41). But Asaph was something more than "the chief" (שֹׁרֵט) of singers (1 Ch. xvi. 5) and a musician (1 Ch. xvi. 5; cp. 1 Ch. xv. 16, 17); like Samuel, Gad, and Heman, he was "the seer" (חֹזֶה, 2 Ch. xix. 30); and the title not inaptly defines the prophetic tone (cp. Riehm, *HWB*. s. n.; Schultz u. Strack, *Die Psalmen*, p. 12 in Strack u. Zöckler's *Akf. Komm.*) of the twelve Psalms which the superscriptions assign to him (Pss. 1, lxiii.-lxxxiii.). These Asaph-Psalms form the bulk of what is generally called the third Book of the Psalms. They are marked by special peculiarities [PSALMS, BOOK OF], and—in common with those of Bk. ii. generally—by a preference of the name Elohim for God (cp. e.g. Delitzsch, Herzog's *RE*.² s. n. *Psalmen*, p. 317); but many, if not all, are considered the compositions of Asaph's descendants or school rather than of the master himself. This school had a great reputation in the days of the kings Jehoshaphat, Hezekiah, and Josiah. It was in the days of king Jehoshaphat that Jahaziel, "a Levite of the sons of Asaph," speaking under the influence of "the Spirit of God," proclaimed the deliverance of Judah through the self-destruction of the invading hosts of Moab and Ammon (2 Ch. xx. 1-30). The very first year of Hezekiah's reign was signalled by the purification of the House of God, and in this work "Zechariah and Mattaniah of the sons of Asaph" took part, as well as joined in the king's command to the Levites "to sing praise unto the Lord with the words of David and of Asaph the seer" (2 Ch. xix. 13, 30). In fact, in the days of these two kings, Psalmody seems to have revived under the influences of ecclesiastical reform and in commemoration of deliverances granted to the former in the case already named and to Hezekiah from the armies of Sennacherib. Again, in the record of the great Passover held at Jerusalem by Josiah in the 18th year of his reign (2 K. xxiii. 21-23), "the singers, the sons of Asaph," were in their place in that memorable assemblage (2 Ch. xxxv. 15). After the Captivity, 123 (Ezra ii. 41; or, according to Neh. vii. 44,

148) singers, "the children of Asaph," returned with Zerubbabel and Jeshua. It was a time of revival of Temple Psalmody and music, and on the festal day when the foundation of the new Temple was laid "the Levites, the sons of Asaph," were present "with cymbals to praise the Lord after the ordinance of David, king of Israel" (Ezra iii. 10). About a hundred years later, "sons of Asaph" were "singers over the business of the House of God" (Neh. xi. 22), and in the solemnities connected with the dedication of the walls "priests' sons with trumpets" are included, who trace their descent lineally from Asaph (Neh. xii. 35). It is difficult, if not impossible, to assign the Asaph-Psalms to specific periods of the existence of the school (see PSALMS). [F.]

2. *Asaph*. The father or ancestor of Joah, who was recorder or chronicler to the kingdom of Judah in the reign of Hezekiah (2 K. xviii. 18 [BA. 'Iwasaḥdār], 37 [B. Ṣafār, A. 'Asaf]; Is. xxxvi. 3, 22 [T. 'Asaf]). It is not improbable that this Asaph is the same as the preceding, and that Joah was one of his numerous descendants known as the Bene-Asaph.

3. 'Asaf; *Asaph*. The keeper of the royal forest or "paradise" of Artaxerxes (Neh. ii. 8). His name would seem to indicate that he was a Jew, who, like Nehemiah, was in high office at the court of Persia.

4. 'Asaf; *Asaph*. Ancestor of Mattaniah, the conductor of the Temple-choir after the return from Babylon (1 Ch. ix. 15; Neh. xi. 17 [BN*A. om.]). Most probably the same as 1 and 2. [W. A. W.] [F.]

ASAR'AEL. [AZARAE.]

ASAR'EEL (אֶסְרָאֵל; B. 'Isepaḥā, A. 'Esepaḥā; *Asrael*). A son of Jehaleleel, a name abruptly introduced into the genealogies of Judah (1 Ch. iv. 16). [W. A. W.] [F.]

ASARE'LAH (אֶסְרָאֵלָה; [ed. Baer]; B. 'Epaḥā, A. 'Iesāḥā; *Asarela*). One of the sons of Asaph, set apart by David to "prophesy with harps and with psalteries and with cymbals" (1 Ch. xxv. 2; in v. 14 JESHARELAH). [W. A. W.] [F.]

ASBAZ'ARETH. [So A. V., ed. 1611, for AZBAZARETH.]

AS'CALON. [ASHKELON.]

ASE'AS ('Asalas; *Asas*), name of a man who put away his "strange wife" (1 Esd. ix. 32).

ASEBE'BIA ('Aseβēbia; *Sebebias*), a Levite who went up with Ezra from the Captivity (1 Esd. viii. 47). [SHEREBIAH.]

ASE'BIA ('Aseβia; *Asbia*), a Levite who returned with Ezra (1 Esd. viii. 48). [W. A. W.] [F.]

A'SENATH (אֶסְנַת; 'Asenēth [usually; E. 'Asenēth in Gen. xli. 45]; *Aseneth*), daughter of Potipherah, priest of On [POTIPHERAH], wife of Joseph (Gen. xli. 45, 50, xlv. 20), and mother of Manasseh and Ephraim (xli. 50, xlv. 20). The name of Potipherah, signifying "the gift of the sun," is specially appropriate to a priest of the City of the Sun [ON], and Joseph's consideration

for the priesthood would make his marriage with a priest's daughter easy, there being in Egyptian manners nothing to forbid the alliance. It is therefore unlikely that the ancient alternative rendering of אֲשֶׁר, "prince," is here worth taking into account.

It is possible that there was a political reason for the marriage of Joseph with the daughter of the high-priest of On. The college of priests of Heliopolis was the most ancient and one of the most powerful of the country; and judging from the name of Potipherah, it seems that it had remained in the hands of the Egyptians of pure origin even during the reign of the Hyksos, who belonged to a foreign race. It may be that the Pharaoh of Joseph wished to put in that venerated college a man he could rely upon, and thus to create a link between his government and the priests of Ra.

The name of Asenath has been generally thought to be Egyptian. It is very likely the common name *Sent* or *Senat*, which means "a sister," and which occurs as early as the 13th dynasty. It has been slightly altered so as to give it a Semitic form. Asnah, אֲשֶׁנַּח, occurs as the proper name of a man (Ezra ii. 50). It is explained to mean a "storehouse" or "thorn-bush". [ASNAH.] Asenath, if Hebrew, could be a feminine form. [E. N.]

A'SER (אֲסֶר; *Naasson*). A town of Galilee (Tob. i. 2), probably a corruption of Hazer. [HAZOR; THISEE.] [W.]

A'SERER (אֲסֶרֶר; *Saree*), name of a man whose sons went up with Zerubbabel from the Captivity as servants of the Temple (1 Esd. v. 32). [SISERA.] [F.]

ASH (אֵשׁ, *'oren*; *πλνς*; *pinus*) occurs only in Ia. xlv. 14, as one of the trees out of the wood of which idols were carved: "He heweth him down cedars, and taketh the cypress and the oak, which he strengtheneth for himself among the trees of the forest; he planteth an ash (R. V. "fir-tree"), and the rain doth nourish it." It cannot be our ash-tree *Ornus Europæus*, which is not a native of Palestine, though perhaps the A. V. adopted the translation from the similarity of the Hebrew *'oren* to the Latin *ornus*. It is impossible to determine what is the tree denoted by the Hebrew word *'oren*; the LXX. and the Vulg. understand some species of pine-tree, and this rendering is supported by many learned commentators, amongst whom may be named Munster, Calvin, Bochart, and Ges. The etymology is not known, that suggested by Ges. being admitted by himself to be hypothetical. MV.¹⁰ (following Schrader, *KAT.*³ in loc.) compare the word with Assyrian *irinu*, and think that it denotes a kind of cedar or pine. Some of the Jewish Rabbis, according to Celsius (*Hierob.* i. 191), believe that the *'oren* is identical with the Arabic *sansaver*, a kind of pine,* and assert that the *aran* is often coupled with the *arex* and

beresch,^b as though all the three trees belonged to the same family. Luther understands the cedar by *'oren*.^c Rosenmüller thinks that the stone-pine (*Pinus pinea*, Linn.) is the tree denoted, but this tree scarcely comes into the region and has probably been introduced. Celsius is inclined to think that the *'oren* is identical with a tree of *Arabia Petraea*, of which Abu'l Fadli makes mention, called *aran*. Of the same opinion are Michaelis (*Supp. ad Lex. Heb.* 129), Dr. Royle (*Encyc. Bib. Lit.*, art. *Oren*), and Dr. Lee (*Lex. Heb.* s. v.). This tree is described as growing chiefly in valleys and low districts; it is a thorny tree, bearing grape-like clusters of berries, which are noxious and bitter when green, but become rather sweet when they ripen and turn black.

Until future investigation acquaints us with the nature of the tree denoted by the *aran* of Abu'l Fadli, it will be far better to adopt the interpretation of the LXX., and understand some kind of pine to be the *'oren* of Scripture. *Pinus halepensis* may be intended. Celsius (*Hierob.* i. 193) objects to any pine representing the *'oren*, because he says pines are difficult to transplant, and therefore that the pine would ill suit the words of the prophet, "he planteth an *'oren*." This, however, is not a valid objection: the larch, for instance, is readily transplanted, and grows with great rapidity, but it is not a native of Syria. *Pinus halepensis* is extensively planted on the coast, to resist the encroachment of the sand drifts. [W. H.] [H. B. T.]

A'SHAN (אֲשָׁן, *smoke*; *Asan*), a city in the low country of Judah named with Libnah and Ether in Josh. xv. 42 (Heb. text. The Greek text is corrupt: B. *Ασάν*, A. *Ασσαν*). In Josh. xix. 7 (B. *Ασάν*, A. *Ασάν*), and 1 Ch. iv. 32 (B. *Ασάν*, A. *Ασάν*), it is mentioned as belonging to Simeon, but in the Hebrew text (not Greek) in company with Ain and Rimmon, which (see Josh. xv. 33) appear to have been much more to the south. In 1 Ch. vi. 59 (LXX. v. 44, *Ασάν*) it is given as a priests' city, occupying the same place as the somewhat similar word Ain (אֵין) does in the list of Josh. xxi. 16. [AIN, 2.]

In 1 Sam. xxx. 30, CHOR-ASHAN is named with Hormah and other cities of "the South."

Eusebius and Jerome (*OS.*² pp. 128, 8; 240, 9) mention a village named Bethasan as 15 miles west of Jerusalem; but this, though agreeing sufficiently with the position of the place in Josh. xv. 42, is not far enough south for the indications of the other passages; and indeed Euseb. and Jer. discriminate Bethasan from "Asan of the tribe of Simeon." It is possibly *Deir el-'Asi* on the road from Hebron to Gaza. [G.] [W.]

ASHBE'A (אֲשֶׁבַע; *Esoβá*; [in *domo*] *Juramenti*). A proper name, but whether of a man or place is uncertain (1 Ch. iv. 21). Houbigant would understand it of the latter, and would render "the house of Ashbea" (A. V. and R. V.) by Beth-Ashbea. The whole clause is obscure.

• ۞ ۞ ۞

• صُوفِر, *pinus*, *alhis ejus nuce* (Gol. L. Arab.).

Dr. Wilson (*Lands of the Bible*, ii. 392) identifies the common "fir" (*Pinus sylvestris*) with the *berosh* of Scripture, mistaking for this tree, which does not exist there, the *Pinus halepensis*, which is the fir of Palestine.

^b אֲשֶׁר and בְּרֹשׁ, cedar and cypress.

^c Reading אֲשֶׁר instead of אֲשֶׁן, "quia אֲשֶׁן non fuit minusculum, in multis codicibus Ebraei editionibus scribitur, quod q̄ *Sain* similimum est" (*Hierob.* i. 191).

The Targum of R. Joseph (ed. Wilkins) paraphrases it, "and the family of the house of manufacture of the fine linen for the garments of the kings and priests, which was handed down to the house of Eshba." [W. A. W.] [F.]

ASH'BEL (אַשְׁבֵּל; *Asbel*), a son of Benjamin (Gen. xlii. 21 [אַשְׁבָּל]; Num. xxi. 38 [LXX. r. 42, 'Ασβήρ]; 1 Ch. viii. 1 [B. Σαβδ, A. 'Ασβήλ]). Respecting the sons of Benjamin, see BECHER. [W. A. W.] [F.]

ASHBELITES (אַשְׁבֵּלִי; B. δ 'Ασβηλι, A. -πι; *Ashbelitae*). The descendants of Ashbel the son of Benjamin. [W. A. W.] [F.]

ASH'CHENAZ (אַשְׁכְּנַז; B. 'Ασχανδς, A. -χενί; *Ascenez*), 1 Ch. i. 6; Jer. li. 27 (LXX. xxi. 27), BKA. τοῖς Ἀσχαναζίοις [A. -χα-]). See ASHKENAZ. [W. A. W.] [F.]

ASH'DOD, or **AZO'TUS** (אַשְׁדֹד; perhaps *stronghold*; 'Αζωτος, LXX. and N. T.), one of the five confederate cities of the Philistines,

situated about 30 miles from the southern frontier of Palestine, 3 from the Mediterranean Sea, and nearly midway between Gaza and Joppa. It stood on an elevation overlooking the plain, and the natural advantages of its position were improved by fortifications of great strength. For this reason it was probably selected as one of the seats of the national worship of Dagon (1 Sam. v. 5). It was assigned to the tribe of Judah (Josh. xv. 47), but was never subdued by the Israelites: it appears on the contrary to have been the point for conducting offensive operations against them, so much so, that after Uzziah had succeeded in breaking down the wall of the town, he secured himself against future attacks by establishing forts on the adjacent hills (2 Ch. xxvi. 6); even down to Nehemiah's age it preserved its distinctiveness of race and language (Neh. xiii. 23). But its chief importance arose from its position on the high-road from Palestine to Egypt, commanding the entrance to or from the latter country: it was on this account taken by

Ashdod.

Tiglath-pileser II. and again by the Tartan, or general, of the Assyrian king, Sargon, about B.C. 711, apparently to frustrate the league formed between Hezekiah and Egypt (Is. xx. 1). Sargon deposed the king, Azuri, and set up one of his brothers, Akhimiti, in his place; but the people revolted and made Yavan, or Jaman, king, who, however, fled on the approach of the Assyrians to Ethiopia. In the annals of Sennacherib and Esarhaddon mention is made of two kings of Ashdod, Mitinti and Ahimilki (Schrader, *KAT.* pp. 162, 163). Its importance as well as strength is testified by the protracted siege which it afterwards sustained under Psammetichus, about B.C. 630 (Herod. ii. 157), the effects of which are incidentally referred to by Jeremiah (xxv. 20). That it recovered from this blow appears from its being mentioned as an independent power in

alliance with the Arabians and others against Jerusalem (Neh. iv. 7). It was destroyed by the Maccabees (1 Macc. v. 68, r. 84), and was separated from Judaea by Ptolemy, who added it to the province of Syria (Joseph. *B. J.* i. 7, § 87); it lay, however, in ruins until it was restored by Gabinus, B.C. 55 (Joseph. *Ant.* xiv. 5, § 3; *B. J.* i. 8, § 4), and was one of the towns assigned to Salome after Herod's death (Joseph. *Ant.* xvii. 8, § 1). The only notice of Azotus in the N. T. is in connexion with Philip's return from Gaza (Acts viii. 40). It is now an insignificant village, with no memorials of its ancient importance, but is still called *Esdud* (see *P. F. Mem.* ii. 409, 421). [G.] [W.]

ASHDODITES, THE (אַשְׁדֹדִי; Nc. a ms. inf. of 'Αζωτιοι; *Azotii*), inhabitants of

Ashdod (Neh. iv. 7 [Heb. r. 1]), called ASDOTHITES in Josh. xiii. 3. [W. A. W.] [F.]

ASH'DOTH PIS'GAH (אֲשֶׁדּוֹת הַפִּסְגָּה), from אֲשַׁךְ, in Aram. "to pour forth;" Ἀσθῶθ φασγά, once τῆν φασγά; *radices montis Phasga, Ascdoth Phasga*, a curious and (since it occurs in none of the later Books) probably a very ancient term, found only in Deut. iii. 17, iv. 49; Josh. xii. 3, xiii. 20; A. V. (Deut.), "springs of Pisgah;" (Josh.) Ashdodth-P.^a In the two passages from Deuteronomy the words form part of a formula, by which apparently the mountains which enclose the Dead Sea on the east side are defined. Thus in iii. 17 we may translate, "the 'Arabah' also (i.e. the Jordan valley) . . . and the 'border,' from Cinnereth (Sea of Galilee) unto the sea of the 'Arabah,' the Salt Sea, under Ashdodth hap-Pisgah eastward;" and so also in iv. 49, though here our translators have varied the formula. The same intention is evident in the passages quoted from Joshua; and in x. 40 and xii. 8 of the same Book, Ashdodth is used alone—"the springs," to denote one of the main natural divisions of the country. The only other instance of the use of the word [אֲשַׁךְ] is in the highly poetical passage, Num. xxi. 15, which may be rendered, "the 'pouring forth' of the 'torrents,' which extendeth to Shebeth-Ar" [R. V. "the slope of the valleys, that inclineth toward the dwelling of Ar"]. This undoubtedly refers also to the east of the Dead Sea. Ashdodth Pisgah appears to be the 'Ayn Mûsa, "springs of Moses," which burst forth from the limestone rock in a ravine to the north-west of *Jebel Neba* (Neba). The springs are numerous and differ in level as much as 100 ft.: the highest has an altitude of 1690 ft., that of Neba being 2770 ft.; and the water runs down in a succession of cascades 20 ft. to 30 ft. high. The valley, in which the springs rise, forms the northern boundary of *J. Neba*; it is a marked natural feature, visible from *Neba Mûsa* in the hills west of Jordan, and it reaches the plain east of the river immediately to the north of the Dead Sea. All this agrees well with the position indicated for Ashdodth Pisgah in the Bible. The ravine is extremely picturesque, and the vegetation and abundant water are in striking contrast to the arid bluffs around (Tristram, *Land of Moab*, pp. 335-337; Warren, *Letter 35 in PEFQy. Stat.* 1869; De Sauncy, *Voyage en Terre Sainte*, p. 289; *American Qy. Stat.* No. III. pp. 48, 49). [G.] [W.]

ASHDOTHITES, THE (אֲשֶׁדּוֹתִים; B. δ' Ἀσθῶθιαι, A. -οις; Ἀσθῶθι [plur.]); inhabitant (or, collectively, inhabitants) of Ashdod (Josh. xiii. 3). [W. A. W.] [F.]

A'SHER, Apocr. and N. T. A'SER (אָשֶׁר; Ἀσῆρ, T. Ἀσῆρ in Ezek. xlviii. 2, 3 [BA. Ἀσῆρ]; Aser), the 8th son of Jacob, by Zilpah, Leah's handmaid (Gen. xxx. 13). The name is interpreted as meaning "happy," in this passage full of the paronomastic turns which distinguish these very ancient records: "And Leah said, 'In

my happiness am I (אָשֶׁר אֲנִי), for the daughters will call me happy' (אֲשֶׁר יִקְרְאוּ), and she called his name Asher" (אָשֶׁר), i.e. "happy" (cp. Baethgen, *Beiträge z. Semit. Religionsgesch.* p. 161). A similar play occurs in the blessing of Moses (Deut. xxxiii. 24). Gad was Zilpah's other and elder son, but the fortunes of the brothers were not at all connected. Of the tribe descended from Asher no action is recorded during the whole course of the sacred history. The name is found in the various lists of the tribes which occur throughout the earlier Books, as Gen. xxxv. xli., Ex. i., Num. i., ii., xiii., &c., and like the rest Asher sent its chief as one of the spies from Kadesh-Barnea (Num. xiii.). During the march through the desert Asher's place was between Dan and Naphtali on the north side of the Tabernacle (Num. ii. 27); and after the conquest he took up his allotted position without any special mention.

The limits of the territory assigned to Asher are, like those of all the tribes, and especially of the northern tribes, extremely difficult to trace. This is partly owing to our ignorance of the principle on which these ancient boundaries were drawn and recorded, and partly from the absence of identification of the majority of the places named. The general position of the tribe was on the sea-shore from Carmel northwards, with Manasseh on the south, Zebulun and Issachar on the south-east, and Naphtali on the north-east (Joseph. *Ant.* v. 1, § 22). The boundaries and towns are given in Josh. xix. 24-31, xvii. 10, 11, and Judg. i. 31, 32. From a comparison of these passages it seems plain that Dor (*Tanûra*) must have been within the limits of the tribe, in which case the southern boundary was probably the *Nahr ez-Zerka*, *Crocodilôn*, which is specified by Pliny the Elder as being the southern boundary of Phœnicia, and which is possibly the "fines Syriæ et Palestinæ" of the Jerusalem Itinerary. From the *Nahr ez-Zerka* the boundary passed over the ridge of Carmel, and crossed the Kishon at the gorge west of *Tel Keimân*, Jokneam, so as to include the lower Kishon valley and the Plain of Acre, which seem to be the localities alluded to by Josephus (*Ant.* v. 1, § 22). Thence it passed west by *Beit-Lahm*, Bethlehem, and east of *Kâbûl*, Cabul, and running northwards reached Zidon by Kanah (a name still attached to a site six miles inland from *Saida*), whence it turned and came down by Tyre to Achzib (Ecdippa, now *ez-Zif*). The alternative view of the south boundary of Asher is that it was the *Nahr N'amein* (Belus), immediately south of Acre, which has been identified by some authorities with SHIHOR^b LIBNATH, one of the points on the boundary, the next being Beth Dagon, which is placed at *Kh. Dâk*, south-east of Acre. It may perhaps be inferred from the intimate connexion of Asher with Phœnicia, and the apparent absorption of the tribe by the Phœnicians, that the boundaries

^a Bethlehem (*Beit-Lahm*) is ten miles inland from the shore of the bay of *Haifa* (Rob. p. 113); and as it was in Zebulun, it fixes the distance of Asher's boundary as less than that from the sea.

^b Shihor, one of the names of the Nile, the home of the crocodile, may perhaps have been applied to the *Nahr ez-Zerka*.

^a The R. V. translates in every case, "the slopes of Pisgah" (sometimes in marg. *the springs of P.*); these slopes would be the western face of *J. Neba*, overlooking the Jordan.

were conterminous, and that the territory assigned to Asher extended to the *Nahr el-Kebir* (Eleutherus), the northern limit of the Promised Land in its widest sense.

Map of the Tribe of Asher.

This territory contained some of the richest soil in all Palestine (Stanley, p. 265; Kenrick, *Phoen.* p. 35), and in its productiveness it well fulfilled the promise involved in the name "Asher," and in the blessings which had been pronounced on him by Jacob and by Moses. Here was the oil in which he was to "dip his foot," the "bread" which was to be "fat," and the "royal dainties" in which he was to indulge; and here in the metallic manufactures of the Phoenicians (Kenrick, p. 38) were the "iron and brass" for his "shoes." The Phoenician settlements were even at that early period in full vigour;⁴ and it is not surprising that Asher was soon contented to partake of their luxuries and to "dwell among them," without attempting the conquest and extermination enjoined in regard to all the Canaanites (Judg. i. 31, 32). Accordingly he did not drive out the inhabitants of Acccho, nor Dor,* nor Zidon, nor Ahlab, nor Achzib, nor Helbah, nor Aphik, nor Rehob (Judg. i. 31), and the natural consequence of

this inert acquiescence is immediately visible. While Zebulun and Naphtali "jeopardied their lives unto the death" in the struggle against Sisera, Asher was content to forget the peril of his fellows and stay in the creeks and harbours of his new allies (Judg. v. 17, 18). At the numbering of Israel at Sinai, Asher was more numerous than either Ephraim, Manasseh, or Benjamin (Num. i. 32-41); but in the reign of David, so insignificant had the tribe become, that its name is altogether omitted from the list of the chief rulers (1 Ch. xxvii. 16-22); and it is with a kind of astonishment that it is related that "divers of Asher and Manasseh and Zebulun" came to Jerusalem to the Passover of Hezekiah (2 Ch. xxx. 11). With the exception of Simeon, Asher is the only tribe west of the Jordan which furnished no hero or judge to the nation.⁵ "One name alone shines out of the general obscurity—the aged widow, 'Anna the daughter of Phanuel of the tribe of Aser,' who in the very close of the history departed not from the Temple, but 'served God with fastings and prayers night and day'" (Stanley, 265).

[G.] [W.]

ASHER (עֲשֵׂר; Vat. *Ἀσῆρ*, A. *ἀπὸ Ἀσῆρ* *Μαχάθ*; *Aser*). A town named, only in Josh. xvii. 7, as a point on the boundary of Manasseh. If, as there seems reason to suppose, the boundary described here be that between Manasseh and Ephraim, then Aaser must have been situate between Michmethah, not far from Shechem, and Taanath Shiloh; cp. Josh. xvii. 7 with xvi. 6-8. Reland takes it, in connexion with the following word, to be a double name, Asher ham Michmethah (*Pal.* p. 596), and this is the view taken by Schwarz (p. 147) [*MICH-METHAH*]. Eusebius and Jerome place it on the road from Neapolis to Scythopolis, 15 miles from the former, a position which agrees with that of the Aser of the Jerusalem Itinerary and of the modern *Telâsir*, but this is too far north for a common point on the boundary of Ephraim and Manasseh.

[G.] [W.]

ASHERAH (אֲשֵׁרָה). In the O. T. especially, if not exclusively, the term expresses a symbol which was venerated. The A. V., following the LXX. (*ἄλσος*) and Vulgate (*lucus*), renders the word "grove," perhaps from a mistaken apprehension of Deut. xvi. 21. The R. V. has rectified this. Asherah had her "houses" (2 K. xiii. 7, בֵּיתִים; A. V. and R. V. "hangings"), her image (1 K. xv. 13; 2 K. xxi. 7; 2 Ch. xv. 16), her vessels for service (2 K. xxiii. 4), and her "prophets" (1 K. xviii. 19). She was the goddess of fertility (Sayce), the happy and happy-making one (MV.¹¹), who connects it with the Assyrian *asîrat*, and Baudissin; a sense not accepted by Schlottmann). Asherah as a symbol or image is of frequent occurrence both in the singular and plural (e.g. Ex. xxxiv. 13; Deut. vii. 5; Judg. vi. 25; 1 K. xiv. 15, 23; 2 K. xiii. 6; Is. xvii. 8; Jer. xvii. 2; Mic. v. 13); it is coupled with מַצֵּבוֹת and הַפְּסִלִּים; it is set up, pulled down, and burnt.

* For the crops, see Rob. iii. 102: for the oil, Kenrick, p. 31; Reland, p. 817.

⁴ Zidon was then distinguished by the name *Rab-bah* = "the Great." Josh. xix. 28.

⁵ Added by the LXX. Cp. Josh. xvii. 11.

¹¹ This would be well compensated for if the ancient legend could be proved to have any foundation, that the parents of St. Paul resided at Giscala, or Gush Chaleb, i.e. the Ahlab of Asher (Judg. i. 31). See Reland, p. 813.

The image was usually made of wood (Dent. xvi. 21; Judg. vi. 25-30; 2 K. xxiii. 6), and was probably connected with the sacred symbolical tree, the representation of which occurs frequently in Assyrian sculptures (see *Babylonian Record*, ii. 138 sq., iii. 7 sq., iv. 64 sq.).

The worship of the Asherah attracted rebellious Israel from the times of the conquest of Canaan (Judg. iii. 5, vi. 25, &c.); it was advocated in Judah by Maacah, mother of Abijam the grandson of Solomon (1 K. xv. 13). It was the religion of the court probably during the reigns of Ahaziah, Athaliah, and Ahaz, and certainly during that of Manasseh (2 K. xxi. 3, 7). In the kingdom of Israel, Jeroboam introduced her worship (1 K. xiv. 15), and it especially flourished under Jezebel and Ahab (1 K. xvi. 33, xviii. 19; 2 K. xxi. 3). If occasionally put down, it appears never to have been permanently or effectually abolished in that kingdom (2 K. xvii. 16). The cultus was held on high hills and under green trees (2 K. xvii. 10; Jer. xvii. 2); and, if resembling that of other Phœnician and Syrian goddesses, must have been lustful and licentious; but on this point positive information is wanting. Baudissin and Sayce unite in distinguishing the Asherah from Ashtarte. Schlottmann and MV.¹¹ take the two words to be but variant forms used to describe one and the same Canaanitish goddess. See Baudissin in Herzog, *RE*.² "Ashtarte u. Aschera;" Schlottmann in Riehm, *HWB*. do.; Sayce, s. v. ASHTORETH. [F.]

[It is held by some that the Asherah was not the name of a divinity but only a pole, which symbolized the sacred tree. See Wellhausen, *Hist.* p. 235; Stade, *Gesch. d. V. I.* pp. 184, 460 sq.; W. R. Smith, *The Rel. of the Semites*, i. 171 sq.: on the other hand, see Cheyne, *Isaiah*,³ li. 303; Schrader, *ZA*. iii. 363 sq. The terms in which the Asherah is alluded to in the O. T. lend support to the former view. The identification of Asherah with Ashtoreth rests upon insufficient grounds. It is possible that the Asherah may have been regarded as a symbol of Ashtoreth; but there is no evidence that the emblems referred to by Renan, *Hist. du peuple d'Israël*, i. 230, notes 1 and 2, were connected with either one or the other. The term אֲשֵׁרָה has been found (hitherto) twice in Phœnician, though with uncertain signification: see *ZDMG*. 1881, p. 424 sq. (Citium); Ganneau, *Rev. d'Archéol.* pp. 81, 83 (Ma'sab, near Tyre).—S. R. D.]

ASHES. The ashes on the altar of burnt-offerings were gathered into a cavity in its surface on a heap called the apple (אֵפֶל), from its round shape (Cramer, *de Ara exteriori*), said to have sometimes amounted to 300 cors; but this Maimonides and others say is spoken hyperbolically. On the days of the three solemn Festivals the ashes were not removed; but the accumulation was taken away afterwards in the morning, the priests casting lots for the office (*Mishna Temid*. i. 2, and ii. 2). [To the north of Jerusalem are several mounds of ashes. These have been thought to represent the accumulated matter, but it seems more probable that they are the ashes of the soap manufactories formerly in Jerusalem.—D. B. Amer. ed.] The ashes of a red heifer burnt entire, according to regulations prescribed in Num. xix., had the ceremonial efficacy of purifying the unclean (Heb. ix. 13),

but of polluting the clean [SACRIFICE]. Ashes about the persons, especially on the head, were used as a sign of sorrow [MOURNING]; and the sitting upon ashes (Job ii. 8) also expressed grief. The use made of "ashes of the furnace" by Moses in the sixth plague (Ex. ix. 8 sq.) is remarkable, whether merely symbolical, or as a material means; especially as the word for "ashes" here is אֵפֶר, wholly different from the usual אֵשֶׁת, and *unice lectum* here. Although referred by Gesen. to Heb. אָהַב, "to blow," it may yet possibly be wholly distinct and Egyptian, and the act itself be borrowed from Egyptian ritual. The various figurative associations of the word are exemplified in Gen. xiii. 27; Job xxx. 19; Is. xlv. 20; Mal. iv. 3. The pouring away the ashes in 1 K. xiii. 3 appears to express the desecration of the altar; and here note that the word used, as also in Lev. i. 16, vi. 10 (Heb.), is not the usual אֵשֶׁת, but אֵפֶר (rendered אֵפֶרֶת by LXX.), which seems to express specially the ashes of animals offered upon the altar of burnt-offering, and has a kindred verb, אָפַר, "to remove ashes," Ex. xxvii. 3; Num. iv. 13.^a [H. E.]

ASHIMA (אֲשִׁימָה; Ασμή; *Asima*), a god worshipped by the people of Hamath. The worship was introduced into Samaria by the Hamathite colonists whom Sargon settled in the land (2 K. xvi. 30). The name occurs only in this single instance. According to the Talmudists, the deity was represented by the figure of a hairless goat; but this statement is founded on a false etymology. Hamath was once occupied by the Hittites, and it is therefore possible that Ashima is of Hittite origin. Melito, in his *Apology* (*Spicileg. Solesmense*, ii. p. xlv.), states that Simi, the daughter of the supreme god Adad or Hadad at Hierapolis, put an end to the attacks of a demon by filling the pit in which he lived with water. [A. H. S.]

ASH'KELON, AS'KELON, Apoc. AS'CALON (אַשְׁכְּלוֹן; once "the Eshkalonite," אֲשִׁיכְלוֹנִי; Ασκληων; Saad. عسقلان [note the change from Aleph to Ain]; *Ascalon*), one of the five cities of the lords of the Philistines (Josh. xiii. 3; 1 Sam. vi. 17), but less often mentioned, and, apparently, less known to the Jews than the other four. This, doubtless, arose from its remote situation, alone of all the Philistine towns, on the extreme edge of the shore of the Mediterranean (Jer. xlvii. 7), and also well down to the south. Gaza, indeed, was still further south, but then it was on the main road from Egypt to the centre and north of Palestine, while Ashkelon lay considerably to the left. The site, which retains its ancient name, fully bears out the above inference: but some indications of the fact may be traced, even in the scanty notices of Ashkelon which occur in the Bible. Thus, the name is omitted from the list in Josh. xv. of the Philistine towns falling to the lot of Judah (but comp. Jos. As.

^a In 1 K. xx. 38, 41, the word אֵפֶר, "headband or turban," is in A. V. wrongly rendered "ashes," by confusion with אֵשֶׁת. The error is rectified in R. V.

r. 1, § 22, where it is specified), although Ekron, Ashdod, and Gaza are all named. Samson went down from Timnath to Ashkelon, when he slew the thirty men and took their spoil, as if to a remote place whence his exploit was not likely to be heard of; and the only other mention of it in the historical books is in the formalistic passages, Josh. xiii. 3 and 1 Sam. vi. 17, and in the casual notices of Jud. ii. 28, 1 Macc. x. 86, xi. 60, xii. 33. The other Philistine cities are each distinguished by some special occurrence or fact connected with it; but except the one exploit of Samson, Ashkelon is to us no more than a name. In the poetical books it occurs 2 Sam. i. 20; Jer. xrv. 20, xlvii. 5, 7; Amos i. 8; Zeph. ii. 4, 7; Zech. ix. 5.

Iskaluna, Ascalon, is mentioned in the Assyrian inscriptions, and the names of four of its kings, Sidka, Sarludari, Rukibti, and Mitinti, appear in the annals of Sennacherib and Esarhaddon (Schrader, *KAT.* pp. 165, 166). It twice submitted to Jonathau (1 Macc. x. 86, xi. 60), and was adorned with baths, fountains, and public buildings by Herod (Jos. B. J. i. 21, § 11), who is said to have been born there (Win. R. L. 481, Ann. 5). Augustus presented the royal palace at Ashkelon to Salome (B. J. ii. 6, § 3), but the town was afterwards burned by the Jews (B. J. ii. 18, § 1). At the commencement of the war Ashkelon was twice attacked by the Jews, who on each occasion were signally defeated by the Roman garrison (B. J. iii. 2, § 1).

In the post-biblical times Ashkelon rose to considerable importance. Near the town—though all traces of them have now vanished—were the temple and sacred lake* of Derceto, the Syrian Venus; and it shared with Gaza an infamous reputation for the steadfastness of its heathenism and for the cruelties there practised on Christians by Julian (Reland, pp. 588, 590). "The soil around the town was remarkable for its fertility; the wine of Ascalon was celebrated, and the *Al-henna* plant flourished better than in any other place except Canopus" (Kenrick, p. 28). It was also celebrated for its cypresses, for figs, olives, apples, and pomegranates, and for its bees, which gave their name to a valley in the neighbourhood (Kenrick, p. 28; Edrisi and Ibn Batuta in Ritter, *Paläst.* p. 89). Its name is familiar to us in the "Eschalot" or "Shallot," a kind of onion, first grown there, and for which this place was widely known (cp. Strabo, xvi. 2, 29, *κρομμύον* τ' ἀγαθὸς ἐστὶν ἡ χώρα τῶν Ἀσκαλωνιτῶν). "The sacred dories of Venus still fill with their cooings the luxuriant gardens which grow in the sandy hollow within the ruined walls" (Stanley, p. 257). Ascalon played a memorable part in the struggles of the Crusades. "In it was entrenched the hero of the last gleam of history which has thrown its light over the plains of Philistia, and within the walls and towers now standing Richard held his court" (Stanley, *ib.*). By the Mahomedan geographers it was called "the bride of Syria" (Schultens, *Index Geogr.*). In it, according to Ibn Batuta, was at one time deposited the head of the celebrated Hussain, son of Ali.

* Possibly the name *El-Jurah*, "the hollow," applied to the village outside Ashkelon, may preserve a tradition of this lake.

The town, now called '*Askalan*,' is situated on the sea-coast, and surrounded by walls, now in ruins, and partially covered by drifting sand; it is semicircular in form, and the diameter, or sea-front, is $\frac{1}{2}$ mile long; the total circumference is $1\frac{1}{2}$ miles. There is no harbour, but on the coast are rocky precipices from 20 to 70 feet high. To the south is a jetty, constructed with the shafts of granite columns, whence steps lead up the side of the precipice to the sea-gate (P. F. *Mem.* iii. 237–247; see also Guérin, *Judee*, ii. 135–171, and Thomson, *L. and B.* ii. 328).

There would appear to have once been a harbour or Maïumas of Ashkelon distinct from the city itself, as a synodical letter, signed by the bishop of each place, is inserted in the acts of the Council of Constantinople, and a Maïuma Ascalonis is mentioned by Ant. Mart. (*Itin.* 33). Ben. of Tudela (*Early Trav.* pp. 87, 88) specifies two Ashkelons, but in one case he probably refers to *Kh. 'Askalan* between '*Ain Shems*, Bethshemesh, and *Beit Jibrin*, Eleutheropolis. The position of the Maïumas is unknown; if it were situated near the town, it must have been destroyed or covered by drifting sand.

In the time of Origen some wells of remarkable shape were shown near the town, which were believed to be those dug by Isaac, or, at any rate, to be of the time of the Patriarchs. Comp. the "puteus pacis in modum theatri factus" of Ant. Mart. (*Itin.* 33); the *Btr Ibrahim al-Khahl* of Ben. of Tudela (*Early Trav.* p. 88) and the *Btr Ibrahim el-Haurani* of Guérin (*Judee*, ii. 145). In connexion with this tradition may be mentioned the fact that in the Samaritan Version of Gen. xx. 1, 2, and xxvi. 1, Askalon (אשקלון) is put for the "Gerar" of the Hebrew text. [G.] [W.]

ASH'KENAZ (אשכנז; Ἀσκαναζ; *Ascenez*), one of the three sons of Gomer, son of Japhet (Gen. x. 3); that is, one of the peoples or tribes belonging to the great Japhetic division of the human race, and springing immediately from that part of it which bears the name of GOMER or Cimmerians. Jeremiah (li. 27) makes Ashkenaz follow, in geographical order, Ararat and Minni, from which we may infer that the district lay to the south of Lake Urumiyeh, between the Minni and the Medes. This is precisely the position assigned by Sargon in his inscriptions to the kingdom of Asguza, which seems merely another form of Ashkenaz. In rabbinical phraseology the Jews of Germany are termed Ashkenazim. [A. H. S.]

ASH'NAH (אשנא, Ges. *the strong, firm*), the name of two cities of Judah, both in the Shefelah or lowland: (1) named in the same group with Eshtalot and Zorah; now probably *Al-Hasan* N.N.W. of *Sura*, Zorah, and the Bethsanan of the *Onomasticon* (O.S. p. 128, 9; Josh. xv. 33; B. *'Asad*; A. *'Asad*; *Asena*); and (2) in the same group with Jiphthah and Nexib (Josh. xv. 43; B. *'Iard*; A. *'Aswad*; *Esna*). The name has not been recovered, but it was probably near *Beit Nuzib*, Nexib, $5\frac{1}{2}$ miles east of *Beit Jibrin*. Eusebius names another place, *'Asad*, but with no indication of position. [G.] [W.]

ASH'PENAZ (אשפנאז, of uncertain origin; perhaps akin in form to the Ashkenaz of Gen. S 2

x. 3, the primary form of which has been discovered in the monuments [see ASHKENAZ]; LXX. 'Ασιεσθρί; Ασφαυέ, Theodot.; *Asphaz, Abiezer*, Syr.), the master of the eunuchs of Nebuchadnezzar (Dan. i. 3). Some connect the first part of the word with the Sanscrit *aspa*, a horse, and identify the name with the Persian official Ασπακας; Ασπαθίης being the Greek equivalent (Herod. iii. 70). A Babylonian etymology is more probable; and in default of a better, Lenormant's conjecture deserves mention (*La Divination*, p. 182). The LXX. 'Ασιεσθρί, if possibly a corruption of Aba(i)-Istar, the astronomer of the goddess Istar, indicated to Lenormant by the final ρ that Asphenaz is a shortened form of Asphenazar. If so, it would be a transcript of the Babylonian name, Asa-ibni-zir. [F.]

ASHRI'EL (אַשְׂרִיֵּל; B. 'Ασσειήλ, A. 'Εσριήλ; *Esriel*). Properly ASRIEL, the son of Manasseh (1 Ch. vii. 14). [W. A. W.] [F.]

ASH'TAROTH, and (once) AS'TAROTH (אַשְׁתָּרֹת; Ασταρώθ; *Astaroth*: in Josh. xiii. 31, A. Ασθαρώμ; in 1 Ch. vi. 71 [LXX. v. 56], Ασρηώθ; A. Παμώθ), a city on the E. of Jordan, in Bashan, in the kingdom of Og, probably a seat of the worship of the goddess Ashtoreth. [In Judg. x. 6 *al.* Ashtaroth is the plural form of Ashtoreth.] It is generally mentioned as a description or definition of Og,—who "dwelt in Ashtaroth in Edrei" (Dent. i. 4), "at Ashtaroth and at Edrei" (Josh. xii. 4, xiii. 12), or "who was at Ashtaroth" (ix. 10). It fell into possession of the half tribe of Manasseh (Josh. xiii. 31), and was given with its suburbs or surrounding pasture-lands (שְׂדֵה) to the Gershonites (1 Ch. vi. 71 [56]), the other Levitical city in this tribe being Golan. In the list in Josh. xxi. 27, the name is given as Beeshterah (quasi 'B N' = "house of Astarte": Reland, p. 621; Ges. *Thes.* pp. 175 a, 196 uu, 1083, and MV. 1). Nothing more is heard of Ashtaroth. It is not named in any of the lists, such as those in Chronicles, or of Jeremiah, in which so many of the trans-Jordanic places are enumerated. Eusebius (*OS.* p. 235, 35) places it 6 miles from Adraa, a place 15 miles from Bostra; Jerome (*OS.* p. 122, 31), 6 miles from Adar, which was 25 from Bostra. Eusebius and Jerome further (*OS.* pp. 120, 5; 209, 61) speak of two *κωμᾶι*, or castella, which lay 9 miles apart, "inter Adaram et Abilam civitates." These two sites have been recovered in Tell 'Ashterah and Tell 'Asherah, 7 miles apart, to the east of the Sea of Galilee. The former, which appears to be Ashtaroth, is described by Capt. Newbold (*R. G. S. Journal*, 1846) as a large mound partly natural, partly artificial, standing in the middle of the plain about 7½ miles S.S.W. of *Naua*. The mound is from 50 to 100 feet high, and at its base are ancient foundations of massive stones and copious springs of water. See also Merrill (*East of Jordan*, p. 329). Uzzia the Ashterathite is named in 1 Ch. xi. 44. [G.] [W.]

ASHTERATHITE (אַשְׁתָּרֹתִית; B. δ' Ασταρωθελ [A. -θελ], N. Θεσταρωθελ; *Asterothites*). A native or inhabitant of Ashtaroth (1 Ch. xi. 44) beyond Jordan. Uzzia the Ashterathite was one of David's guard. [W. A. W.] [F.]

ASHTEROTH-KARNA'IM (אַשְׁתָּרֹת כַּרְנַיִם; אֲשֶׁתֶּרֶת כַּרְנַיִם = "Ashtaroth of the two horns or peaks;")

Sam. Vers. עֲשִׂינִיתָ; Saad. الصنمين; A. Ασταρώθ Καρνάιν, E. και Νδιν [*? Karnin*]; *Astaroth Carnaim*, a place of very great antiquity, the abode of the Rephaim at the time of the incursion of Chedorlaomer (Gen. xiv. 5), while the cities of the plain were still standing in their oasis. The name reappears but once, and that in the later history of the Jews as Carnaim, or Carnion (1 Macc. v. 26, 43, 44; 2 Macc. xii. 21, 26; Jos. *Ant.* xii. 8, § 4), "a strong and great city," "hard to besiege," with "a temple (τὸ τέμενος) of Atargatis" (τὸ Ἀταργατείον), but with no indication of its locality, beyond its being in "the land of Galaad," and not far from a stream.

It has been usually assumed to be the same place as the preceding [ASHTAROTH], but the few facts that can be ascertained are all against such an identification. 1. The affix "Karnaim," which certainly indicates some distinction,* and which in the times of the Maccabees, as quoted above, appears to have superseded the other name. 2. The fact that Eusebius and Jerome (*OS.* pp. 142, 17; 269, 97), though not very clear on the point, yet certainly make a distinction between Ashtaroth and A.-Carnaim, describing the latter as a *κωμὴ μεγίστη τῆς Ἀραβίας*, vicus grandis in angulo Batanaeae. 3. Some weight is due to the renderings of the Samaritan Version and of the Arabic Version of Saadiah, which give Ashtaroth as in the text, but A.-Karnaim by entirely different names (see above). The first of these, *Aphinit*, is identified by Porter (*Hdth.* p. 501) with 'Aphinek on the S.W. declivity of *Jebel Hawran*, about eight miles from Bostra; the second, *es-Sunamein*, can hardly be other than the still important place which continues to bear precisely the same name, on the Haj route, about twenty-five miles south of Damascus, and to the N.W. of the *Lejah* (Burckh. p. 55; Ritter, *Syria*, p. 812). Perhaps it is some confirmation of this view that while the name Karnaim refers to some double character in the deity there worshipped, *es-Sunamein* is also dual, meaning "the two idols." A.-Karnaim has been identified by Oliphant (*Land of Gilead*, pp. 87-95) with 'Asherah, a village crowning a Tell about seventy feet high on the south side of the main branch of the Yarmuk. There are here remains of an ancient city, so strongly fortified in the rear by three walls as to be almost impregnable (see also Schumacher, *Across the Jordan*, p. 203). This agrees with the indications in 1 Macc. v., where Judas, after taking Bosor, is said to have "encamped against Raphon beyond the brook" (v. 37), and to have recrossed (vv. 42, 43) the "brook," which was probably the main branch of the Yarmuk, to attack Karnaim. Compare Josephus (*Ant.* xii. 8, § 4). Leake (*Pref.* to Burckh. p. 12) identifies it with *el-Mezareib*, not far from Tell 'Asherah; Robinson

* This was held by the Jews at the date of the Talmud to refer to its situation between two high-peaked hills (see *Sukkah*, fol. 2), though it more probably alludes to the worship of the horned goddess, the "mooned Ashtaroth," or perhaps to the two high mounds on which the Ashtaroths were built.

(*Arabic Lists*, 2) with *el-Kurnein* in the *Belka*, east of *es-Salt*. [G.] [W.]

ASHTORETH (אֲשֶׁת־וֶרְתָּ; *ʾAshtartē*; *Astartē*) was the principal female divinity of the Canaanites or Phoenicians, as Baal was the principal male divinity. She was, in fact, the double or reflection of the Sun-god Baal: just as the wife exists by the side of the husband or the woman by the side of the man, Ashtoreth existed by the side of Baal. Hence, as there were Baalim, there were also Ashtaroth or "Ashtoreths," representing the various forms under which the goddess was worshipped in different localities (*Judg.* x. 6; *1 Sam.* vii. 4, xii. 10, &c.). At Carthage she had the special name of "the face of Baal," according to the most probable interpretation.

In Ashtoreth, accordingly, we have to see the personification of the female principle of productivity in nature. But as the male principle of productivity had its visible seat in the sun, so the female principle was identified with the moon. Ashtoreth, or "Astartē with the

the planet Venus. The female divinity, however, occupied a very subordinate place in Canaanite theology, and in Canaan accordingly Ashtoreth lost her individual character and became the mere reflection of the Sun-god.

Assyrian Ashtoreth. (Layard.)

The result of this was her identification with the moon, which was a male deity among the Assyrians. It was only in certain districts that she preserved her attributes as goddess of love and war. Thus she seems to have presided over war among the Philistines (*1 Sam.* xxi. 10), and she was still regarded as the goddess of love at Ashkelon, where she was called Derketō or Semiramis, and at Paphos, where she was adored under the form of a conical meteoric stone. Hommel has shown that not only the person, but also the name of the Greek Aphrodite was derived from the Phoenician Ashtoreth, who was known in later times among the Greeks as "the Heavenly" (*Οὐρανία*).

In Phoenicia the worship of Ashtoreth was necessarily as wide-spread as that of Baal, and she was addressed by various epithets, such as Naamah, "the delightful one" (Greek *Ἀστρομένη*, the mother of Eshmun and the Kabeiri). She was at once the mother and bride of TAMMUZ (*q. v.*) or Adonis, and prostitution was practised in her honour by unmarried girls in Babylonia, Assyria, Cyprus, and Canaan (see *Dent.* xxiii. 18, and *cp. Num.* xxv. 1-5). Doves were sacred to her.

Ashtoreth must be carefully distinguished from ASHERAH (*q. v.*), a word which is mis-translated "grove" in the A. V. Asherah was the goddess of fertility among the southern Canaanites, and was worshipped under the form of a conical stone or a trunk stripped of its branches. There were Asherim just as there were Ashtaroth, and the name frequently denotes both the goddess herself and the symbol that

Ashtoreth or the Moon Goddess. (Assyrian Cylinder: Layard.)

crescent horns," was therefore the goddess of the moon—the pale reflection of the sun—quite as much as she was the goddess of productive power. So we find Lucian (*de Syr. Dea*, 4) saying: *Ἀστάρτη δ' ἐγὼ δοκῶ Σεληναίην ἔμμεναι*, and Herodian (v. 6, 10) asserts that *Οὐρανίαν φασκεῖ Ἀστροδάρχην νομίζουσι, σελήνην εἶναι θέλοντες*. As the moon-goddess, Ashtoreth was symbolised by the cow, since the lunar crescent in a southern country lies on its back, and thus resembles the horns of a cow (*cp.* the name Ashtaroth-Karnaim [A. V. and R. V.], "Ashtoreth of the two horns," *Gen.* xiv. 5).

The name and conception of Ashtoreth were borrowed by the northern branch of the Semites from the old Accadian population of Chaldaea, and she appears in Assyrian under the form of Istar. The Accadian language possessed no genders; and Istar accordingly, though denoting a female deity, has no feminine suffix in Assyrian. This was added by the Canaanites, among whom Istar became Ashtor-eth. On the Moabite Stone, however, Ashtar is used and identified with the male divinity Chemosh, women and maidens being said to have been "devoted to Ashtar-Chemosh." In the Himyaritic inscriptions of Southern Arabia, also, we find 'Aṭṭār; and an Assyrian tablet states that Istar was andro-gynous.

Among the Accadians and Assyrians, Istar was the virgin goddess of love and war, and in the astro-theological system was identified with

Assyrian Istar. (Layard.)

represented her. Asherah was unknown in Phoenicia proper.

In Syria Ashtoreth was generally known as ATARGATIS (q. v.). [A. H. S.]

ASHUR (אַשּׁוּר; B. Ἀσσυρία, A. Ἀσσορία in 1 Ch. ii. 24; B. Ἀσσυρία, A. Ἀσσορία in 1 Ch. iv. 5; Ashur, Assur), the "Father of Tekoa," which may mean that he was the founder of that village. [W. A. W.] [F.]

ASHURITES, the (אַשּׁוּרִי; B. τῶν Ασσυρίων; A. Ασσυρίων; Gessur). This name occurs only in the enumeration of those over whom Ishbosheth was made king (2 Sam. ii. 9). By some of the old interpreters—Syriac, Arabic, and Vulgate Versions—who are followed in modern times by Ewald (*Gesch.* iii. 145), Theulux, and Wellhausen, the word is read as Geshurites, the members of a small kingdom to the S. or S.E. of Damascus, one of the petty states which were included under the general title of Aram. [ARAM; GESHUR.] The difficulty in accepting this substitution is that Geshur had a king of its own, Talmi, whose daughter moreover was married to David somewhere about this very time (1 Ch. iii. 2, compared with v. 4), a circumstance not consistent with his being the ally of Ishbosheth, or with the latter being made king over the people of Geshur. Talmi was still king many years after this occurrence (2 Sam. xiii. 37). In addition, Geshur was surely too remote from Mahanaim and from the rest of Ishbosheth's territory to be intended here.

[Köhler, Kirkpatrick, and Klostermann prefer to follow the Targum of Jonathan, which has "those of the house of Asher," and to punctuate אַשּׁוּרִי. "The Asherites" will then denote the whole of the country west of the Jordan above Jezreel (the district of the plain of Esdraelon), and the enumeration will proceed regularly from north to south, Asher to Benjamin. The form "Asherite" occurs in Judg. i. 32. The reading of the LXX. points to אַשּׁוּר, but affords no basis for a plausible restoration of the text.—S. R. D.]

There is clearly no reference here to the Ashurim of Gen. xiv. 3. [G.] [W.]

ASHVATH (אַשּׁוּת; BA. Ἀσούθ; Asoth). One of the sons of Japhlet, of the tribe of Asher (1 Ch. vii. 33). [W. A. W.]

ASIA (ἡ Ἀσία; Asia). The passages in the N. T. where this word occurs are the following: Acts ii. 9, vi. 9, xvi. 8, xix. 10, 22, 26, 27, xx. 4, 16, 18, xxi. 27, xxvii. 2; Rom. xvi. 5 (where the true reading is Ἀσῶας); 1 Cor. xvi. 19; 2 Cor. i. 8; 2 Tim. i. 15; 1 Pet. i. 1; Rev. i. 4, 11. [CHIEF OF ASIA; see ASIARCHAE.] In all these passages it may be confidently stated that the word is used, not for "the continent of Asia," nor for what we commonly understand by "Asia Minor," but for a Roman province which embraced the western part of the peninsula of Asia Minor, and of which Ephesus was the capital [*Speaker's Comm.* on Acts ii. 4]. This province originated in the bequest of Attalus, king of Pergamum, or king of Asia, who left by will to the Roman Republic his hereditary dominions in the west of the peninsula (B.C. 133). Some rectifications of the frontier were made, and "Asia" was constituted a province. Under

the early Emperors it was rich and flourishing, though it had been severely plundered under the Republic. In the division of senatorial and made by Augustus imperial provinces, it was placed in the former class, and was governed by a proconsul (hence ἀστυκράτωρ, Acts xix. 38, and on coins). It contained many important cities, among which were the seven Churches of the Apocalypse, and it was divided into assize districts for judicial business (hence ὑποπαῖσι, i.e. ὑμῶν, Acts, *ibid.*). It is not possible absolutely to define the inland boundary of this province during the life of St. Paul: indeed the limits of the provinces were frequently undergoing change; but generally it may be said that it included the territory anciently subdivided into Aeolia, Ionia, and Doris, and afterwards into Mysia, Lydia, and Caria. [MYRIA, LYCIA, BITHYNIA, PAPHLAGIA, GALATIA.]

The view of Meyer and De Wette on Acts xxvii. 2 (and of the former on Acts xix. 10), viz. that the peninsula of Asia Minor is intended, involves a bad geographical mistake: for this term "Asia Minor" does not seem to have been so applied till some centuries after the Christian era. Moreover the mistake introduces confusion into both narratives. It is also erroneous to speak of Asia in the N. T. as a *proconsularis*; for this phrase also was of later date and denoted one of Constantine's subdivisions of the province of which we are speaking.

In the books of Maccabees, where reference is made to the pre-provincial period of this district (B.C. 200–150), we frequently encounter the word Asia in its earlier and more extended sense; and it is thus used in 2 Ed. xv. 46, xvi. 1. The title "King of Asia" was used by the Seleucid monarchs of Antioch, and was claimed by them even after it more properly belonged to the immediate predecessors of Attalus (see 1 Macc. viii. 6, xi. 13, xii. 39, xiii. 32; 2 Macc. iii. 3, x. 24; Conybeare and Howson's *Life and Epistles of St. Paul*, ch. xiv.; Marquardt's *Röm. Alterthümer*, iii. pp. 130–146; *Dict. of Gr. and Rom. Geog.*, art. Asia).

[J. S. H.] [W.]

ASIARCHAE (Ἀσιάρχαι; principes Asiae, Vulg.; chief of Asia, A. V.; chief officers of Asia, R. V.; Acts xix. 31), officers chosen annually by the cities of that part of the province of Asia, of which Ephesus was, under Roman government, the metropolis. They had charge of the public games and religious theatrical spectacles, the expenses of which they bore, as was done by the holders of *Aesropyliu* at Athens, and the aediles at Rome (Niebuhr, iii. 35; Cicero, *De Offic.* ii. 16; Liv. xxiv. 33). Their office was thus, in great measure at least, religious, and they are in consequence sometimes called ἀρχιερεῖς, and their office *ιερωσύνη* (Mart. S. Polycarp. in *Patr. Ap. c.* 21). That the office existed as early as B.C. 50 is certain, for Pythodorus of Tralles, a friend of Pompey, is described by Strabo as an Asiarch (xiv. p. 649). But in all probability it began much earlier, and obtained its name at the time when the kingdom of Attalus, having become a Roman province, began to be called Asia, i.e. proconsular Asia, about B.C. 130 (Strabo, xiii. p. 624).

Officers called Ἀσιάρχαι are mentioned by

Strabo (xiv. p. 665), who exercised judicial and civil functions, subject to the Roman government; but there is no evidence to show that the Asiarchs exercised any but the religious functions above mentioned; and Modestinus, c. A.D. 230, mentions *Ἀσιαρχία* as well as *Βιβυαρχία* and *Καρπυδοαρχία* as religious offices conferring certain legal exemptions on the holders of them. (Dig. xxvii. tit. 1, 6, § 14.) It continued to exist as late as the time of the Emperor Honorius, A.D. 409 (Cod. Theodos. xv. tit. 9).

The office of Asiarch was annual, and subject to the approval of the proconsul, but might be renewed; and the title appears to have been continued to those who had at any time held the office. From its costliness, it was often (*del*) conferred on a citizen of the wealthy city of Tralles (Strabo, xiv. p. 649). Philip, the Asiarch at the time of S. Polycarp's martyrdom, was a

Trallian. Coins or inscriptions bearing the names of persons who had served the office of Asiarch, once or more times, are known as belonging to the following cities:—Abydus, Acmonia, Adramyttium, Aphrodisias? Cyxicus, Ephesus, Hypaepa, Laodicea, Miletus, Otrus, Pergamus, Philadelphia, Saittae, Sardis, Smyrna, Stectorium, Synaus, Thyatira, Tichiussa. (Aristid. Or. xxvi. p. 518, ed. Dind.; Eckhel, ii. 507, iv. 207; Böckh, *Inscr.* vol. ii.; Van Dale, *Dissert.* p. 274 sq.; Krause, *Civitates Neocorae*, p. 71; Wetstein, *On Acts* xix.; Akerman, *Numismatic Illustr.* p. 51; Herod. v. 38; Hammond, *On N. T.*; and a monograph on the subject by Professor Churchill Babington, London, 1866, to which the writer of this art. is much indebted. Cp. Lightfoot's *Excursus on the Asiarchats* in "Apostolic Fathers," Pt. ii. St. Ignatius, St. Polycarp, ii. § ii. p. 987 sq.) [H. W. P.]

Greek Imperial Copper Coin ("aureolion") of Laodicea of Phrygia; Commodus; with name of Asiarch.

Obv.: ΑΥΤΑΙΜΑΥΡ. ΑΝΤΩΝΕΙΝΟCΕ. Bust of Emperor to right. Rev.: ΕΠΙΔΙΑΗΥΤ ΕΠΟCΑCΙΑΡ. ΑΑΟΔΙΚΕΩΝ ΝΕΚΟΠΟΝ. Figure in triumphal quadriga of horses, to left.

ASIBI'AS (B. 'Ασβέλας, A. 'Ασιβίας; *Jam-mebias*). One of the sons of Phorus, or Parosh, in 1 Ed. ix. 26, whose name occupies the place of MALCHIJAH in Ezra x. 25. [W. A. W.]

ASIEL (אֲשִׁיֵּל = *created of God*; 'Ασιήλ; *Asiel*). 1. A Simeonite whose descendant Jehu lived in the reign of Hezekiah (1 Ch. iv. 35). 2. One of the five writers whom Esdras was commanded to take to write the Law and the history of the world (2 Ed. xiv. 24). [W. A. W.]

ASIPHA (A. 'Ασιφά, B. Τασιφά; *Gaspia*), 1 Ed. v. 29. [HASUPHA.]

AS'KELON, Judg. i. 18; 1 Sam. vi. 17; 2 Sam. i. 20. [ASHKELON.]

ASMA'VETH [AZMAVETH.]

ASMODEUS (Ἀσμοδαῖος; *Tob.* iii. 8). The name also occurs in the forms *Ἰδεν* (Midrash Rabba on Lev. 5) and *Sham-don* (id. i. 37). He is called "Lord of the Spirits," "King of the demons" (*Gittin*, 68; *Pesachim*, 110; Targum on *Kohleth*, i. 13). The Jews regard him as one of the *Shedim*, or malignant spirits. Some consider him to be identical with *Ἰδεν*, which in Job xxxi. 12, &c., means "destruction," and *Ἀπολλών*, Rev. ix. 11, where he is called "a king, the angel of the bottomless pit," and *ὁ Ὁλοθρευτής*, Wisd. xviii. 25, where he is represented as the "Evil angel"

(Ps. lxxviii. 49) of the plague (Schleusner's *Thesaur.* s. v.) From the fact that the Talmud calls him *שֵׁטֶן דְּמֵיטָא*, *rex daemonum* (cp. Lightfoot, *Hor. Hebr. et Talm.* in Luke xi. 15), some assume him to be identical with Beelzebub, and others with Azrael. All these identifications are very precarious. The name is derived either from *אָסַד*, "to destroy," or, according to Reland (Winer, s. v.), from a Persian word = "to tempt" (comp. Matt. iv. 1) or (according to Windischmann) from Persian words meaning "leader of the Devs." [See *Speaker's Comm.* on Tob. iii. 8.] In the Book of Tobit this evil spirit is represented as loving Sarr, the daughter of Raguel, and causing the death of seven husbands, who married her in succession, on the bridal night; gaining the power to do so (as is hinted) through their incontinence. Tobias, instructed by Raphael, burns on "the ashes of perfume" the heart and liver of the fish which he caught in the Tigris; "the which smell when the evil spirit had smelled, he fled into the utmost parts of Egypt, and the Angel bound him" (Tob. viii. 3).

It is obviously a vain endeavour to attempt to rationalise this story of

"... Asmodens with the fishy fume
That drove him, though enamoured, from the spouse
Of Tobit's son, and with a vengeance sent
From Media post to Egypt, there fast bound,"

since it is throughout founded on Jewish demonology and "the loves of the angels," a strange fancy derived from Gen. vi. 2. Those however who attempt this task make Asmodëus the demon of impurity, and suppose merely that the fumes deadened the passions of Tobias and his wife. The Rabbis (among other odd fables) make this demon the offspring of the incest of Tubalcain with his sister Noëma, and say (in allusion to Solomon's many wives) that Asmodëus once drove him from his kingdom, but being dispossessed was forced to serve in building the Temple, which he did noiselessly, by means of a mysterious stone Shamir (Calmet, s. v. and *Fragments*, p. 271, where there is a great deal of fanciful and groundless speculation). See the story at full length in the Babylonian Talmud (*Gittin*, f. 68, 1, 2). It is not found in the Jerusalem Talmud. The Rabbis of the first three centuries in Palestine, in the careful endeavour to exclude from Judaism all elements which they regarded as being of Christian or Gnostic origin, were also anxious to avoid all legends or notions which came from a Persian or foreign source. Rav and R. Samuel are the first who refer to Ashmedai and tell the famous legend about his dealings with Solomon. From them it found its way into many Talmudic writings, where other stories are told respecting him. Cp. *Tosephoth Menachoth*, 37, 1; Targum on *Kohleth*, i. 13; *Midrash Rabba* on Numbers, § 11; *Pesachim*, 110, &c. See Rappoport, *Erech. Millin.*; Hamburger, *Talm. Wörterb.* s. vv. Ashmedai, Schedim, &c.; Eisenmenger, *Ent. Judenth.* ii. 440, &c.; *Speaker's Comm.* on Tobit, *Excursus on Demonology*, i. p. 176.

[F. W. F.]

AS'NAH (אֲסָנָה, *thornbush*; 'Asevd; Asena).

The children of Asnah were among the Nethinim who returned with Zerubbabel (*Ezra* ii. 50). The name is omitted from the list in *Neh.* vii. 52, and in 1 *Esd.* v. 31 it is written ASANA [B. 'Asevd, A. 'Asava].

[W. A. W.] [F.]

ASNAPPER (אֲסַנְפָּר, i.e. Osnappar [R.V.],

or [Baer i. l.] אֲסַנְפָּר, Asenappar; Syr. *Espir*; B. 'Asevadpār, A. Naḏpār; *Asenapher*), a ruler mentioned in *Ezra* iv. 10 as the "great and noble" (גָּדוֹל וְנָכוֹן) personage who had brought "the Dinaites, the Apharsathchites, the Tarpelites, the Apharsites, the Archevites, the Babylonians, the Susanchites (Susaniens), the Dehavites, and the Elamites," and had settled them in the cities of Samaria. He has been variously identified with Shalmaneser, Sennacherib, and Esarhaddon. Gelzer (*Zeitschr. für ägyptische Sprache*, xiii. [1875] p. 81) conjectures that Asnapper is the Aššur-bani-apli or Assurbanipal of the cuneiform inscriptions, and this has been accepted both by A. von Gutachmid (*Die Assyriologie in Deutschland*, p. 145) and Prof. Fried. Delitzsch, who is of opinion that the "one and only king, who was able to remove the Sasanians to a distance, was Assurbanipal, the conqueror of Susa," and he joins with Gutachmid and Gelzer in regarding Asnapper as a mutilation of the (Persian pronounced) name Assurbanipal. Supposing this to be correct (as is most likely), there has been a change from *r* to *n* (*Asn* for *Assr* = Assur);

bani (or *ban*) has disappeared altogether, leaving only a trace of its existence in the vowel *a*; and the *l* of the last compound has become *r* (*par* for *pal*)—all being changes for which analogies can be found.

Aššur-bani-apli or Assurbanipal ("Assur has created a son"), king of Assyria, was the eldest son of Esarhaddon, and ascended the Assyrian throne in April 667 or 668 B.C., shortly before the death of his father, being at the time probably about twenty-five years old. Of his three younger brothers, one, Šamaš-šum-ukin (Šaoduchinos), was installed as king of Babylon under his brother the king of Assyria. Assurbanipal was one of the most renowned of all the kings of Assyria, and, though he probably never personally conducted any warlike expeditions, he nevertheless made himself master, through his generals, of considerable tracts on all sides. He made two expeditions to Egypt, with varying success. In the first his forces succeeded in replacing the governors whom Esarhaddon had appointed, and in overthrowing Tirhakah. These governors, however, themselves revolted against Assyrian rule, but the plot was discovered, and they were captured and sent to Nineveh. Assurbanipal now appointed Necho as king in Sais, and Nabû-šeribani (Nebosharban), his son, as king in Athribes. Urdamane, however, nephew of Tirhakah, now arose against the Assyrian overlordship, necessitating the second expedition to Egypt, which resulted in the expulsion of Urdamane. Assurbanipal besieged Tyre, and brought that city, together with the petty states around, to submission. Gyges, king of Lydia, also gave tribute, but afterwards sent secretly to aid Tušamili, king of Egypt, thus bringing down upon him the curse of the Assyrian king. Gyges died a violent death at the hands of the Cimmerians. His son, who succeeded him, was submissive to the Assyrian overlordship. Assurbanipal subdued also the Mannāa (= Wannāa) or Armenians, and the tribes lying in the neighbourhood of that district: he repulsed the invasion of Urtag or Urtak, king of Elam, and afterwards carried the conflict into the enemy's country, defeating Te-umman, who had succeeded Urtak as king, and proclaiming Umman-igāš, an Elamite prince, as king of Elam, in Shushan and Madaktu. Later, he defeated the combined forces of the Babylonians, Elamites, and Arabians, and annexed Babylonia to Assyria; again invading (partly, probably, in revenge for the part which the Elamites had taken against him) Elam twice, and Arabia once. After his Arabian successes, Assurbanipal again turned his attention to Elam, and captured Ummanaldas, who was then king of that country, bringing him to Nineveh, and compelling him to drag, in company with other captive princes, his royal chariot to É-mašmaš, the temple of Beltis and Assur in that city. From the above outline of his conquests it will be seen that, of all the kings of Babylonia and Assyria, Assurbanipal had best right to the epithets "great and glorious," and that he was also best able to transplant the Babylonians, Susaniens, Elamites, and other nations or tribes, to Samaria, as is recorded in the 4th chapter of *Ezra*. [T. G. P.]

A'SOM (Ἀσώμ; *Asom*), 1 *Esd.* ix. 33. [HASHEM.]

ASP (אֲסַפ, *pethen*; ἄσπις, ὄφικον, βασίλειος; *aspis*, *basiliscus*). The Hebrew word occurs in the six following passages:—Dent. xxxii. 33; Ps. lviii. 5, xci. 13; Job xx. 14, 16; Is. xi. 8. It is expressed in the passages from the Psalms by *adder* in the text of the A. V. and R. V., and by *asp* in the margin: elsewhere the text of both Versions has *asp** as the representative of the original word *pethen*.

That some kind of poisonous serpent is denoted by the Hebrew word is clear from the passages quoted above. We further learn from Ps. lviii. 5, that the *pethen* was a snake upon which the serpent-charmers practised their art. In this passage the wicked are compared to "the deaf adder that stoppeth her ear, which will not hearken to the voice of charmers, charming never so wisely;" and from Is. xi. 8, "the sucking child shall play on the hole of the asp," it would appear that the *pethen* was a dweller in holes of walls, &c. Bochart contributes nothing in aid to a solution of identity when he attempts to prove that the *pethen* is the *asp* (*Hieroz.* iii. 156), for this species of serpent, if a species be signified by the term, has been so vaguely described by authors, that it is not possible to say what known kind is represented by it. The term *asp* in modern zoology is generally restricted to the *Vipera aspis* of Latreille, but it is most probable that the name, amongst the ancients, stood for different kinds of venomous serpents. Solinus (c. xxvii.) says, "plures diversaeque sunt aspidum species;" and Aelian (*N. Anim.* x. 31) asserts that the Egyptians enumerate sixteen kinds of *asp*. Bruce thought that the *asp* of the ancients should be referred to the *cerastes*, while Cuvier considered it to be

portant question has been generally omitted by the champions of rival claimants, viz. Does the species exist in Bible lands? With our present knowledge of the herpetology of Syria, we can have little hesitation in assigning the *pethen* of Scripture to the hooded cobra of Egypt, *Naja haje*. It does not occur in the cultivated districts of Palestine, but it is well known in the plains, and the downs south of Beersheba. I have met with it near Gaza. It is an African species, extending from Arabia Petraea through Egypt, Nubia, the Soudan, and the Sahara. In India it is represented by an allied species, *Naja tripudians*. It is needless here to discuss the conjectures of many writers on the Arabian *Coluber boetian* of Forskål or the *C. lebetinus* of Linnaeus, since no one has yet been able to identify Forskål's species; and *C. lebetinus* is most probably a synonym of *Vipera Euphratica* [ADDER], which would not meet the conditions of the Biblical allusions, as it neither lives in holes, nor is it a species on which the snake-charmers practise.

The hooded cobra, or asp (*Naja haje*), lives in holes in rocks or old walls, and has the power of dilating its neck by raising the anterior ribs so as to expand the front of the breast into the shape of a flat dish. When alarmed or disturbed, it raises itself into an upright posture, supported on the lower vertebrae of the tail, and bounds forward with great force. In this position it is often portrayed on Egyptian monuments, and is used to symbolise immortality. It was also employed as the emblem of the protecting Divinity of the world, and we find aculptured over the portals of their temples a cobra on each side of a winged globe (Horapollo, i. 1; Kalisch, *Hist. and Crit. Comm. Gen.* iii. 1). Sometimes the Egyptian paintings represent a monster with the head of an asp or some other serpent (Wilkinson, *Anc. Egypt.* iii. p. 310, ed. 1878).

The art of serpent-charming referred to in Ps. lviii. 4, Jas. iii. 7, is of immense antiquity, and is practised in India on the *Naja tripudians* as in Africa on the *Naja haje*. The resources of the charmers appear to be very simple—the shrill notes of a flute, which are the only kind of tones which the serpent, with its very imperfect sense of sound, is capable of distinctly following, and, above all, coolness and courage, combined with gentleness in handling the animal, so as not to irritate it. The charmers are not impostors, for though they may sometimes remove the fangs, it is a well-attested fact that they generally allow them to remain, and they will operate on the reptiles when just caught as willingly as on those which have been long in their possession; but they are very reluctant to make experiments on any other species than the cobra. When a cobra has been discovered in a hole, the charmer plays at the mouth till the serpent, attracted by the sound, comes out, when it is suddenly seized by the tail, and held at arm's

Egyptian Cobra (*Naja haje*).

the Egyptian cobra (*Naja haje*). Be this, however, as it may, there can be little doubt that the Hebrew name *pethen* is specific, as it is mentioned as distinct from 'acshûb, *shephiphôn*, *tephôn*, &c., names of other members of the *Ophidia*.

Many pages of conjecture have been written as to the species intended by *pethen*, but one im-

* *Asp* (the Greek ἄσπις, the Latin *aspis*) has by some been derived from the Heb. אָסַפ, "to gather up," in allusion to the coiling habits of the snake when at rest; but this etymology is very improbable. The eteld (*aspis*) may be derived from the form of the animal at rest.

Asp-headed monster. (Wilkinson.)

length. Thus suspended, it is unable to turn itself so as to bite; and when it has become exhausted by its vain efforts, it is put into a basket, the lid of which is raised while the music is playing, but at each attempt of the captive to dart out, the lid is shut down upon it, until it learns to stand quietly on its tail, swaying to and fro to the music, and ceases to attempt an escape. If it shows more than ordinary restlessness, the fangs are extracted as a precaution. Instances are not uncommon, in which, with all their care, the jugglers' lives are sacrificed in the exhibition.

The expression in Ps. lviii. 4, "the deaf adder that stoppeth her ears," seems simply to allude to the fact that there are some species of serpents not amenable to the charmer's art, or that there are individuals of the ordinary cobra which defy all his attempts to soothe them. These are called *deaf*. The force of the comparison with wicked men made by the Psalmist lies in the fact that they, like the adder, can hear the charmer's song, but obstinately refuse to do so. If reference had been made, as some have supposed, to a species of serpents which had not the power of hearing, the whole force of the illustration would be lost. There is therefore no occasion to search for some species which is literally deaf, or to consider the groundless stories of Bythner, Thomson (*Land and the Book*, p. 155), and others of serpents stopping their ears with their tails or with dust, in order not to hear the charmer, inasmuch as no serpent possesses any external openings to the ear. There is doubtless a popular impression that the serpent is deaf, grounded perhaps on the absence of external ears, or perhaps on a mistaken interpretation of the passage in the Psalms.

Serpents, though comparatively speaking deaf to ordinary sounds, are no doubt capable of hearing the sharp, shrill sounds which the charmer produces either by his voice or by an instrument; and this comparative deafness is, it appears to us, the very reason why such sounds as the charmer makes produce the desired effect on the subject under treatment. [SERPENT-CHARMING.] It has been stated that the jugglers, by pressing the nape of the cobra's neck with the fingers, know how to throw it into a mesmeric state, which renders it stiff and immovable, thus seeming to change it into a rod or stick. This may throw light on the contest of the magicians with Moses before Pharaoh. I cannot vouch for this from personal observation.

[H. B. T.]

ASPALATHUS (ἀσπάλθος ἀρωματῶν; Compl. ὠλθαός; *balsamum*), the name of some sweet perfumes mentioned in Eccles. xxiv. 15, to which Wisdom compares herself:—"I gave a sweet smell like cinnamon and aspalathus." The question as to what kind of plant represents the aspalathus of the ancients has long been a puzzling one. From Theocritus (*Id.* iv. 57) we learn that the aspalathus was of a thorny nature, and (from *Id.* xxiv. 87) that the dry wood was used for burning. Pliny (*H. N.* xii. 24) says that the aspalathus grows in Cyprus; that it is a white thorny shrub, the size of a moderate tree; that another name for this plant was *cryscetrum* or *sceptrum*, "acceptre," or "red acceptre," a name perhaps which it owed to the

fact of the flowers clustering along the length of the branches: but in another place (xv. 13) he speaks of *aspalathus* as distinct from the *cryscetrum*, as growing in Spain, and commonly employed there as an ingredient in perfumes and ointments. He states that it was employed also in the washing of wool. Theophrastus (*Hist. Plant.* ix. 7, § 3, ed. Schneider) enumerates *aspalathus* with cinnamon, cassia, and many other articles which were used for ointments, and appears to speak of it as an Eastern production. In *Fr.* iv. 33 he says it is sweet-scented and an astringent. He also states that it has large fleshy roots (μεγάλαι καὶ σαρκέες). Dioscorides (i. 19) says that the *aspalathus* was used for the purpose of thickening ointment.

It appears that there were at least two kinds or varieties of plants known by the name of *aspalathus*; for all the authorities cited above clearly make mention of two: one was white, inodorous, and inferior; the other had red wood under the bark, and was highly aromatic. The plant was of so thorny a nature that Plato (*Repub.* 616 A, ed. Bekker) says cruel tyrants were punished with it in the lower world.

Gerarde (*Herbal.* p. 1623) mentions two kinds of *aspalathus*: *aspal. albicans torulo citreo*, and *aspal. rubens*. "The latter," he says, "is the better of the two; its smell is like that of the rose, whence the name *Lignum Rhodium*, rather than from Rhodes, the place where it is said to grow." The *Lignum Rhodium* is by some supposed to be the substance indicated by the *aspalathus*; the plant which yields it is the *Convolvulus scoparius* of Linnaeus.* Dr. Royle (*Encycl. Bib. Lit.* a. v.) is inclined to believe that the bark of a tree of the Himalayan mountains, the *Myrica sapida* of Dr. Wallich, is the article indicated, because in India the term *Darshishan*, which by Aricenna and Serapion are used as the Arabic synonyms of *aspalathus*, is applied to the bark of this tree. If the *aspalathus* of the Apocrypha be identical with the *aspalathus* of the Greeks, it is clear that the locality for the plant must be sought nearer home, for Theocritus evidently mentions the *aspalathus* as if it were familiar to the Greek colonists of Sicily or the south of Italy in its growing state. For other attempts to identify the *aspalathus*, see Salmasius, *Hyl. lat. cap.*

* On this subject Sir W. Hooker in a letter writes: "We must not go to *Convolvulus scoparius*, albeit that may possess the two needful qualifications: it is peculiar to the Canary Islands. Many plants with fragrant roots are called rose-roots. Such is the *Lignum aloes*, the lign aloes of Scripture; and there is the *ῥοδάκινα* of Dioscorides, which came from Macedonia. A late learned friend of mine writes, 'This was certainly Linnaeus's *Rhodiola rosea*, figured as such by Parkinson in his *Theatrum Botanicum*, after Lobel. Soon after the discovery of the Canary Islands this name was transferred to *Convolvulus scoparius*, and afterwards to several American plants. It is called in the Canary Islands *Leña Noí*, a corruption of *Lignum aloes*, and, though now in little request, large quantities of it were formerly exported, and the plant nearly extirpated. The apothecaries sold it both as *Lignum Rhodium* and as the *aspalathus* of Dioscorides; it soon, however, took the latter name, which was handed over to a wood brought from India, though the original plant was a thorny shrub growing on the shores of the Mediterranean, probably *Spartium villosum*, according to Sibthorpe (*Flor. Græc.* vol. vii. p. 68)."

lxxiv.; Dr. Royle, in passage referred to above; Sprengel, *Hist. Herb.* i. pp. 45, 183: but in all probability the term has been applied to various plants. Comparing the accounts of Theophrastus with the commentaries of Gerarde and others, it seems to me that there are two plants of the family *Leguminosae* which may answer to the description,—*Spartium junceum*, L. Sp. 995, and *Calycotome villosa*, Vahl. *Symb.* ii. p. 80, more probably the latter. Both these shrubs are found in Syria, the Levant, and Southern Italy. They may possibly be the two species spoken of by Gerarde. [W. H.] [H. B. T.]

ASPATHA (אֶסְפָּתָה, of uncertain derivation, but probably Persian [Bertheau-Ryssel and Oetli in loco]; if so, contracted from the Pers. *aspatha*, given by the horse, i.e. by the god Behram in the form of a horse; T. פֶּסָדָה, מֶ. פֶּסָדָה; *Esphatha*), one of the ten sons of Haman slain by the Jews (Esth. ix. 7). [F.]

ASPHAR, THE POOL (אֶסְפָּר; *Asphar*; A. אֶסְפָּר; *lacus Asphar*), in the "wilderness of Thecoe." By this "pool" Jonathan and Simon Maccabaeus encamped at the beginning of their struggle with Bacchides (1 Macc. ix. 33; Joseph. *Ant.* xiii. 1, § 2). It was apparently one of the small reservoirs for collecting rain-water still used by the Bedawin; it has, however, been suggested that the name may possibly be a corruption of אֶסְפָּר אֶסְפָּרִיטִים? Xenophon (*Anab.* iv. 2, § 22) uses the word אֶסְפָּר for the excavations underground in which he stored his wine. [G.] [W.]

ASPHARASUS (Ἀσφαράστος; *Machpatastor*), one of those who returned from the Captivity with Zerobabel (1 Esd. v. 8). [MISRETH.] [F.]

ASRI'EL (אֶסְרִיֶּל; B. אֶסְרִיֶּל, AF. אֶסְרִיֶּל [Num.]. B. אֶסְרִיֶּל, A. אֶסְרִיֶּל [Josh.]; *Ariel*, *Esriel*). The son of Gilead, and great-grandson of Manasseh (Num. xxvi. 31 [LXX. v. 35]; Josh. xvii. 2). He was the founder of the family of the ASRIELITES. The name is spelt ASRIEL in the A. V. of 1 Ch. vii. 14, but Ariel in R. V.; and the LXX. makes Ariel [B. אֶסְרִיֶּל, A. אֶסְרִיֶּל] the son of Manasseh by his Syrian concubine. [W. A. W.] [F.]

ASRI'ELITES, THE (אֶסְרִיֶּלִּיתִים; B. אֶסְרִיֶּלִּיתִים, A. אֶסְרִיֶּלִּיתִים). Num. xxvi. 31. [ASRIEL.] [W. A. W.] [F.]

ASS. The five following Hebrew names of the genus *Asinus* occur in the O. T.:—*Chamôr*, אִיּוֹן, *Air*, פֶּרֶס, and *Arôd*. The last two apply to species of the wild ass.

1. *Chamôr* (חִמּוֹר; *donos*, *επασίγιον*, *γομόρ* in 1 Sam. xvi. 20; *asinus*, "ass," "he-ass") denotes the male domestic ass, though the word was no doubt used in a general sense to express any ass, whether male or female. The ass is

* חִמּוֹר, from root חִמַּר, "to be red," from the reddish colour of the animal in southern countries. MY.¹¹ compare the Spanish *burro*, *burrico*. In 2 Sam. xix. 27, the word is used as a feminine. The Arabic حِمَار, *himâr*, is identical.

frequently mentioned in the Bible; it was used (i.) for carrying burdens (1 Sam. xxv. 18; Gen. xlii. 26, xlv. 23; 2 Sam. xvi. 1; 1 Ch. xii. 40; Neh. xlii. 15; 1 Sam. xvi. 20)—(ii.) for riding (Gen. xxii. 3; Ex. iv. 20; Num. xxii. 21; 1 K. xiii. 23; Josh. xv. 18; Judg. i. 14, v. 10, x. 4, xii. 14; 1 Sam. xxv. 20; 2 Sam. xvii. 23, xix. 26; Zech. ix. 9; Matt. xxi. 7)—(iii.) for ploughing (Isa. xxx. 24, xxxii. 20; Deut. xxii. 10), and perhaps for treading out corn, though there is no clear scriptural allusion to the fact. In Egypt asses were so employed (Wilkinson's *Anc. Egypt.* i. 231 [1878]), and by the Jews, according to Josephus (*contr. Apion.* ii. § 7)—(iv.) for grinding at the mill (Matt. xviii. 6, R. V. marg. Gr. *a millstone turned by an ass*)—(v.) for carrying baggage in wars (2 K. vii. 7, 10)—(vi.) for the procreation of mules (Gen. xxxvi. 24; 1 K. iv. 28; Esth. viii. 10, &c.).

The origin of the domestic ass (*Asinus vulgaris*, or *A. asinus*) is from the wild ass of N. E. Africa, South Arabia, and Socotra, the true *Onager*, which Pallas has unfortunately confounded with the wild ass or Ghorkhur of Central Asia and Beluchistan. It is to Egypt we must look for the reclamation of the ass, the region where the particular species last found wild, and where also the finest and least altered of the domestic races prevail. The date of its domestication is lost in antiquity. It is repeatedly mentioned in the Pentateuch before the horse is noticed—as in the sacrifice of Abraham; in his visit to Egypt, where he received presents from Abimelech; and in the spoils of Shechem, where, along with other cattle, the ass occurs, but the horse is not mentioned. The horse is supposed to have been introduced into Egypt by the Hyksos. In Assyria it had been reclaimed at the period of the oldest known monuments. It is remarkable that, notwithstanding the length of time that has elapsed since the domestication of the ass, and entirely changed, as it is, in its habits and disposition, it has altered less from its pristine form and colour, and is less liable to variation in these respects, than any other domestic animal. It still in all climates and under all circumstances retains the general tone of colour which belongs to the wild race, and from which it derives its name, as well as the black line down the back, and the transverse black stripes on the shoulders; and the diversities of colour are, for the most part, merely different shades of the same primitive hue.

It is almost needless to observe that the ass in Eastern countries is a very different animal from what he is in Western Europe; there the greatest care is taken of the animal, and much attention is paid to cultivate the breed by crossing the finest specimens; the riding on the ass therefore conveys a very different notion from the one which attaches to such a mode of conveyance in our own country; the most noble and honourable amongst the Jews were wont to be mounted on asses; and in this manner our Lord Himself made His triumphant entry into Jerusalem (Matt. xxi. 5, 7). He came indeed "meek and lowly," but it is a mistake to suppose, as many do, that the fact of His riding on the ass had, according to our English ideas, ought to do with His meekness; although there by, doubtless, He meant to show the peaceable

nature of His kingdom, as horses were used only for war purposes.

In illustration of the passage in Judg. v. 10, "Speak, ye that ride on white asses," it may be mentioned that Buckingham (*Trav.* p. 389) tells us that one of the peculiarities of Bagdad is its race of white asses, which are saddled and bridled for the conveyance of passengers; that they are large and spirited, and have an easy and steady pace. Bokhara is also celebrated for its breed of white asses, which are sometimes more than thirteen hands high; they are imported into Peshawar, and fetch from 80 to 100 rupees each.

In Syria, white asses, which I have seen of the height of 13 hands, are highly prized, and choice he-asses will fetch ordinarily £40 sterling, both for riding and for mule-breeding. The Pasha of Jerusalem always rides a white ass within the city, on account of its surefootedness on the steep and slippery streets, and only appears on horseback when going outside the walls. It is curious to see the Pasha on his ass, attended by his body-guard comprising officers on horseback.

There are two distinct races of domestic asses represented in ancient Egyptian paintings, and the two may be seen side by side in any Syrian town to-day—one very large, with remarkably long ears, the other small and rather inferior to ours in England; bearing the same relation to the other as a pony does to a horse. The smaller race only has been domesticated in Northern Europe; or if the larger, it has degenerated, the ass being less capable of resisting cold than the horse. The ass of the large breed in the East possesses vivacity and humour, as well as ingenuity, and can exhibit personal likes and dislikes to members of the caravan. It can accomplish with ease as long a day's journey as a horse, and longer than a camel.

In Deut. xxii. 10, "plowing with an ox and an ass together" was forbidden by the law of Moses. Micholisi (*Comment. on the Laws of Moses*, transl. vol. ii. 392) believes that this prohibition is to be traced to the economic importance of the ox in the estimation of the Jews; that the coupling together therefore so valued an animal as the ox with the inferior ass was a dishonour to the former animal: others, Le Clerc for instance, think that this law had merely a symbolical meaning, and that by it we are to understand improper alliances in civil and religious life to be forbidden; he compares 2 Cor. vi. 14, "Be ye not unequally yoked with unbelievers." It is not at all improbable that such a lesson was intended to be conveyed; but we think that the main reason in the prohibition is a physical one, viz., that the ox and the ass could not pull pleasantly together on account of the difference in size and strength (see *Speaker's Comm.* in loco); perhaps also this prohibition may have some reference to the law given in Lev. xix. 19.

The expression used in Is. xxx. 24, "The young asses that ear the ground," would be more intelligible to modern understandings were it translated the asses that till [so R. V.] the ground; the word ear from aro, "I till," "I plough," being now obsolete (cp. 1 Sam. viii. 12, R. V. "plough").

Although the flesh of the wild ass was deemed

a luxury amongst the Persians and Tartars, yet it does not appear that any of the nations of Canaan used the ass for food. The Mosaic law considered it unclean, as "not dividing the hoof nor chewing the cud." In extreme cases, however, as in the great famine of Samaria, when "an ass's head was sold for eighty pieces of silver" (2 K. vi. 25), the flesh of the ass was eaten. Some commentators on this passage, following the LXX., have understood a measure (a *chomer* of bread) by the Hebrew word. Dr. Harris says, "No kind of extremity could compel the Jews to eat any part of this animal for food;" but it must be remembered that in cases of extreme need parents ate their own offspring (2 K. vi. 23; Ezek. v. 10). This argument therefore falls to the ground; nor is there sufficient reason for abandoning the common acceptation of these passages (1 Sam. xvi. 20; xxv. 18), and for understanding a measure and not the animal. For an example to illustrate 2 K. i. c. comp. Plutarch, *Artax.* i. 1023, "An ass's head could hardly be bought for sixty drachms."

The Jews were accused of worshipping the head of an ass. Josephus (*contr. Apion.* ii. § 7) very indignantly blames Apion for having the impudence to pretend that the Jews placed an ass's head of gold in their holy place, which the grammarian asserted Antiochus Epiphanes discovered when he spoiled the Temple. Plutarch (*Sympos.* iv. ch. 5) and Tacitus (*Hist.* v. §§ 3 and 4) seemed to have believed in this slander (see Bochart, *Hieroz.* iii. 199 seq.). The same charge was brought against Christians (see Tertullian, *Apolog.* xv. xvi.; and *Dict. of Christ. Antiq.* s. n. "Asinarii").

2. 'Athôn (ἄθων; ἡ βῆλος, βῆλος, βῆλος θηλεία, ἡ βῆλος, βῆλος θηλεία νομάς; asina, asinus, "ass," "she-ass"). There can be no doubt that this name represents the common domestic she-ass, nor do we think there are any grounds for believing that the 'athôn indicates some particular valuable breed which judges and great men only possessed, as Dr. Kitto (*Phys. Hist. Pal.* p. 383) and Dr. Harris (*Nat. Hist. of Bible*, art. Ass) have supposed. 'Athôn in Gen. xii. 16, xiv. 23 is clearly contrasted with Chamôr. Balaam rode on a she-ass ('athôn). The asses of Kish which Saul sought were she-asses. The Shunammite (2 K. iv. 22, 24) rode on one when she went to seek Elisha. They were she-asses which formed the especial care of one of David's officers (1 Ch. xxvii. 30). While, on the other hand, Abraham (Gen. xxii. 3, &c.), Achsah (Josh. xv. 18), Abigail (1 Sam. xxv. 20), the disobedient prophet (1 K. xiii. 23) rode on a chamôr.

3. 'Aîr (ἄϊρ; πῶλος, πῶλος νέος, βῆλος, βῆλος [in Is. xxx. 24]; pullus asinae, pullus onagri, jumentum, pullus asini, "foal," "ass colt," "young ass," "colt"), the name of a young ass, which occurs Gen. xlix. 11, xxiii. 15; Judg. x. 4, xii. 14; Job xi. 12; Is. xxx. 6, 24; Zech. ix. 9. In the passages of the Books of Judges and

^b The Talmudists say that the flesh of the ass causes avarice in those who eat it; but it cures the avaricious of the complaint (*Zool. des Talm.* § 165).

^c A word of uncertain derivation, derived by Ges. from a root used in Arabic, "to be slow," "to walk with short steps."

Zechariah the 'air is spoken of as being old enough for riding upon; in Is. xxx. 6, for carrying bardens, and in v. 24 for tilling the ground: perhaps the word 'air is intended to denote an ass rather older than the age we now understand by the term *foal* or *colt*.

Our Lord entered Jerusalem "riding upon an ass, even" (as it might be translated) "upon a colt," as did the sons of Jair. The colt never having before been ridden, was also symbolical: a new time, a new prince, a new animal to ride upon, which had not been under the yoke. The mother is led with it, to quiet it for the service.

The saddle of the ass, so often mentioned in Scripture, is a very elaborate structure, wholly different from that of the horse. Under it are spread several folds of thick woollen stuff. The saddle itself is of great thickness, made of straw stitched under carpet, very flat above, with a high roundedommel. Over it is spread a saddle-cloth of Persian carpet or velvet, of the brightest colours, ornamented with a fringe hanging over the ass's tail. The stirrups are small and narrow. The bridle is ornamented with tassels, embroidery, and cowries, and sometimes little bells are attached to the reins.

[W. H.] [H. B. T.]

ASS, WILD. Two words are used to represent wild asses. 1. *Pere* (פֶּרֶע; שׁוֹר אֲרָגִיּוֹס, שׁוֹר עַרְבִּי, שׁוֹר אֲרָגִיּוֹס, שׁוֹר אֲרָגִיּוֹס; *ferus homo*, Vulg.; *onager*, "wild ass"). The name of a species of wild ass mentioned in Gen. xvi. 12; Ps. civ. 11; Job vi. 5, xi. 12, xxxix. 5, xxi. 5; Hos. viii. 9; Jer. ii. 24; Is. xxxii. 14. In Gen. xvi. 12, *Pere Adam*, a "wild-ass man," is applied to Ishmael and his descendants, a character that is well suited to the Arabs at this day. Hosea (viii. 9) compares Israel to a wild ass of the desert, and Job (xxix. 5) gives an animated description of this animal, and one which is amply confirmed by both ancient and modern writers.

2. *Arôd* (אֲרֹד, omitted by the LXX. and Vulg., which Versions probably supposed *arôd* and *pere* to be synonymous; "wild ass"). The Hebrew word occurs only in Job xxxix. 5, "Who hath sent out the *pere* free, or who hath loosed the bands of the *arôd*?" The Chaldee plural *arâdayah* (אַרְדַּיָּה) occurs in Dan. v. 21: Nebuchadnezzar's "dwelling was with the wild asses." Bochart (*Hieroz.* ii. 218), Rosenmüller (S.A. in V. T. l. c.), Lee (*Comment.* on Job, l. c.), and Gesenius (*Thes.* and *MV.* s. v.) suppose *arôd* and *pere* to be identical in meaning; the last-named writer says that *pere* is the Hebrew, and *arôd* the Aramaean; but it seems more probable that the two names stand for different animals, two species of wild ass being found in Bible lands.

It is only recently that the wild ass or *A. onager* of Central Asia has been discriminated from the wild ass of N.E. Africa, *Asinus vulgaris* or *asinus*. The Russian naturalist, Pallas, the first modern writer on the subject, identified the two; and though both were most probably known to the Jews, they did not distinguish

them. But they did distinguish the wild ass of Syria and North Arabia, known by naturalists as *Asinus hemippus*. This was probably *pere*, the species most frequently mentioned; while *arôd*, the species of Babylonia, is naturally mentioned as the animal with the herds of which Nebuchadnezzar was driven out to consort (see *Speaker's Comm.* on Dan. v. 21).

The late Mr. E. Blyth enumerates seven species of the division *Asinus*. In all probability the species known to the ancient Jews are *Asinus hemippus*, which inhabits the deserts

Syrian Wild Ass (*Asinus hemippus*).
Specimen in Zoological Gardens of London.

of Syria, Mesopotamia, and the northern parts of Arabia; and *Asinus vulgaris* of N.E. Africa, South Arabia, and Socotra, the true onager or aboriginal wild ass, whence the domesticated breed is sprung; probably also the *Asinus onager*, the Koulan or Ghorkhur, which is found in Western Asia from 48° N. latitude southward to Persia, Beluchistan, and Western India, was not unknown to the ancient Hebrews, though in all probability they confounded these species. The *Asinus hemionus*, or Driggetai, which was

Driggetai or Kyang (*Asinus hemionus*).
Specimen in Zoological Gardens of London.

separated from *Asinus hemippus* (with which it had long been confounded) by Is. St. Hilaire, could hardly have been known to the Jews, as this animal, which is perhaps only a variety of *Asinus onager*, inhabits Tibet, Mongolia, and Southern Siberia, countries with which the Jews

* פֶּרֶע, from root פָּרַע, "to flee," "to be untamed."

Bochart thinks the word is onomatopoeic.

were not familiar. We may therefore safely conclude that the *athén* and *peré* of the sacred

Ghorghur or Koulan (*Asinus onager*),
Specimen in British Museum.

writings stand for the different species now discriminated under the names of *Asinus hemippus*, the Assyrian wild ass, *Asinus vulgaris*, the true onager—and perhaps *Asinus onager*, the Koulan or Ghorghur of Persia and Western India.

The following quotation from Mr. Blyth's valuable paper is given as illustrative of the scriptural allusions to wild asses:—"To the west of the range of the Ghor-khur lies that of *Asinus hemippus*, or true Hemionus of ancient writers—the particular species apostrophised in the Book of Job, and again that noticed by Xenophon. There is a recent account of it by Mr. Layard in *Nineveh and its Remains* (p. 324). Returning from the Sinher, he was riding through the desert to Tel Afer, and there he mistook a troop of them for a body of horse with the Bedouin riders concealed!" "The reader will remember," he adds, "that Xenophon mentions these beautiful animals, which he must have seen during his march over these very plains . . . 'The country,' he says, 'was a plain throughout, as even as the sea, and full of wormwood; if any other kind of shrubs or reeds grew there, they had all an aromatic smell, but no trees appeared . . . The asses, when they were pursued, having gained ground on the horses, stood still (for they exceeded them much in speed); and when these came up with them, they did the same thing again . . . The flesh of

Wild Ass pursued by dogs. (Layard.)

those that were taken was like that of a red deer, but more tender' (*Anab.* i. § 5). 'In fleetness,' continues Mr. Layard, 'they equal the gazelle, and to overtake them is a feat which only one or two of the most celebrated mares have been known to accomplish.'" (*Annals and Mag. of Nat. Hist.* vol. vi. No. 34, p. 243.)

We find on the bas-reliefs of Assyrian monuments frequent representations of the chase of the wild ass. He is pursued by the king on horseback, armed with bow and arrows. In one bas-relief the animal is represented as having been caught by a kind of lasso, with which the huntsmen lead it away (Layard). [W. H.] [H. B. T.]

Wild Ass taken with a rope. (Layard.)

ASSA'BIAS (אַסַּבִּיָּא; *Hasabias*), 1 Esd. i. 9. [HASHABIAH.]

ASSALIMOTH (ב. שַׁלְיִמּוֹת, א. אַסְאִלִּימּוֹת; *Salimoth* [Vulg. v. 39]), 1 Esd. viii. 38. [SHELOMITH.] One of those who went up from Babylon. [W. A. W.]

ASSA'NIAS (ב. אַסְאִנִּיָּא, א. אַסְאִנִּאס; *Assannas*), 1 Esd. viii. 54. [HASHABIAH.] One of those entrusted with the holy vessels, &c., on the return to Jerusalem. [W. A. W.]

ASSARE'MOTH. Cp. D. B. Amer. ed. In 1 Macc. iv. 15, the E. V. places this word in the

marg. as the Greek equivalent of the Gazera in the text. According to Grimm (*Kgf. exeg. Hdrsch. zu den Apokryphen d. A. T.*, note on l. c.) 'Ασσορημωθ is the reading of the Complut. and Aldine texts, supported by five minor codices; the reading of the Alexandrine text is Γασσηρὼν (T: Γασσηρῶ) [GAZERA]. The form 'Ασσορημωθ (K, T: 'Ασρ-, K' Σαρ-) also occurs in Jer. xlviii. 40 (LXX; Heb. xxxi. 40) as the reproduction of קִשְׁרֹת (Kethib), the A. V. and R. V. adopting with many commentators the Keri, קִשְׁרֹת ("the fields"), from the similar passage (2 K. xliii. 4; B. Σαλημωθ, A. Σαθημωθ). In the *Speaker's Comm.* (note on Jer. xxxi. 40) the more difficult reading is preferred, and Graf's rendering, "the quarries," advocated. [F.]

ASSHUR. [ASSYRIA.]

ASSH'URIM (אֲשׁוּרִים; A. 'Ασσυρίμ, D. 'Ασσυρίμ, E. -πρία; *Assurim*). A tribe descended from Dedan, the grandson of Abraham (Gen. xiv. 3), which has not been identified (Delitzsch, *Genesis in loco* [1887]). Knobel's view that they were the Asshur of Ezek. xvii. 23 is now given up. [W. A. W.] [F.]

ASSIDE'ANS (Ἀσιδαῖοι; *Assidai*; i.e. אֲשִׁידָאִי, the pious, "puritans;" of ἀσείβειρ, of δῆμον), the name assumed by a section of the orthodox Jews (1 Macc. ii. 42; Cod. A, συναγωγὴ Ἀσιδαίων, Vulg. "Synagoga Asideorum," alii *loubadim* probably by correction; 1 Macc. vii. 13; 2 Macc. xiv. 6), as distinguished from "the impious" (of ἀσείβειρ, 1 Macc. iii. 8; vi. 21; vii. 5, &c.), "the lawless" (of ἀνομοί, 1 Macc. iii. 6; ix. 23, &c.), "the transgressors" (of παράνομος, 1 Macc. i. 11, &c.), that is, the Hellenizing faction.

[Their rise as a party may be assigned to the days of Simon the Just (circ. 200 B.C.), when the Jewish nation had begun to realise the corruptions as well as the fascinations of Greek culture. Jewish tradition ascribed their origin to a voluntarily exaggerated exercise of the Nazirite vow (Tosephta *Nedarim*, חסידים וחסידות היו חסידים בנימין), in which case it is probable that the first Assideans combined merely to protest against the intemperate lives of the Greeks and their imitators (Grätz, *Gesch. d. Jüd.* ii. 6, 240). They became recognised as the sternest upholders of Judaism, and the most uncompromising opposers of the Hellenizing faction. The party is a true forerunner of the Pharisees, who emerge from the Maccabean epoch in which the Assideans become lost to view. (Cp. Schürer, *Gesch. d. Jüd. Volkes*, i. 157, n. 41.)—H. E. R.]

They were probably bound by some peculiar vow to the external observance of the Law (1 Macc. ii. 42, ἐκουσίαν τῶν νόμων). They were among the first to join Mattathias, and it was probably a body of the Assideans whose fanatical reverence for the Sabbath led to such disastrous results (1 Macc. ii. 32-38; 1 Macc. i. c.); and seem afterwards to have been merged in the general body of the faithful (2 Macc. xiv. 6, οἱ λεγόμενοι τῶν Ἰουδαίων Ἀσιδαῖοι, φησὶν ἔσται Ἰούδας ὁ Μακκαβαῖος...). When Bacchides came against Jerusalem, they used their influence (1 Macc. vii. 13, πρῶτοι οἱ Ἀσιδ. ἦσαν ἐν τοῖς Ἰσραήλ) to conclude a peace, be-

cause "a priest of the seed of Aaron" (Alcimus) was with him, and sixty of them fell by his treachery [ALCIMUS]. The name *Chasidim* occurs frequently in the Psalms (e.g. Ps. lxxix. 2 = 1 Macc. vii. 17; cxxiii. 9, &c.), and the words "His praise in the congregation of saints,"

Ps. cxlix. 1 (תהלתו בקהל חסידים), has been supposed by some to be a reference to the Assidean party; and it has been adopted in recent times by a sect of Polish Jews, who take as the basis of their mystical system the doctrines of the Cabbalistic book *Zohar* (Beer in Ersch und Gruber, *Encykl.* s. v. *Chassidäer*).

[B. F. W.]

AS'SIR (אֲסִיר). 1. Son of Korah (Ex. vi. 24,

B. 'Aseip, A. 'Aseip, Asir; 1 Ch. vi. 22, Heb. v. 7, B. 'Aseip, A. 'Aseip, Asir). 2. Son of Ebiasaph, and a forefather of Samuel (1 Ch. vi. 23, Heb. v. 8, B. 'Aseip, A. 'Aseip; v. 37, Heb. v. 22, 'Aseip, Asir). 3. Son of Jeconiah (1 Ch. iii. 17, 'Aseip, Asir), unless יְכִנְיָה (ed. Baer) be translated "Jecooniah the captive" (Bertheau, and Oettli in Strack u. Zöckler's *Kgf. Komm.* in loco). The accents and the best codices (see Baer in loco) favour the view that Jeconiah-Assir is the name of but one man, and the Midrash and Talmud explain the cognomen as given to Jeconiah because a son was born to him in exile; but the absence of the art. before אֲסִיר is an objection to this interpretation, and Keil (in loco) may be right in treating Assir as the name of Jeconiah's son.

[G.] [F.]

AS'SOS or AS'SUS (Ἀσσορ [called also Apollonia, Plin. v. 32]), a town and seaport of the Roman province of ASIA, in the district anciently called Mysia. It was situated on the northern shore of the gulf of ADAMYRTIUM, and was only about seven miles from the opposite coast of Lesbos, near Methymna (Strab. xiii. p. 618). A good Roman road, connecting the towns of the central parts of the province with Alexandria Troas [TROAS], passed through Asso, the distance between the two latter places being about twenty miles (*Itin. Anton.*). These geographical points illustrate St. Paul's rapid passage through the town, as mentioned in Acts xx. 13, 14. The ship in which he was to accomplish his voyage from Troas to Caesarea went round Cape Lectum, while he took the much shorter journey by land. Thus he was able to join the ship without difficulty, and in sufficient time for her to anchor off Mitylene at the close of the day on which Troas had been left.

The chief characteristic of Asso was that it was singularly Greek. Fellows found there "no trace of the Romans." Leake says that "the whole gives perhaps the most perfect idea of a Greek city that anywhere exists." The remains are numerous and remarkably well preserved, partly because many of the buildings were of granite. The citadel, above the theatre, commands a glorious view, and must itself have been a noble object from the sea. The Street of Tombs, leading to the Great Gate, is one of the most remarkable features of Asso. Illustrations of the ancient city will be found in Texier, Clarac, Fellows, and Choiseul-Gouffier. It is now utterly desolate. On the site of the town

stands now a small village called Bairam Kalesi. Two monographs on the subject are mentioned by Winer: Quadt, *De Asson*. Regiom. 1710; Amnell, *De 'Assos*, Upsal. 1758. See *Dict. of G. and R. Geog.* art. ASSUS; Conybeare and Howson's *Life and Epistles of St. Paul*, ii. 215 [4th ed.]; J. F. Clarke, *Report of Excavations at Assos* (36 plates), Boston, U.S., 1882; J. R. S. Sterrett, *Inscriptions of Assos*, in vol. i. pp. 1-90, of *Papers of American School of Classical Studies at Athens*.

It is now a matter of curiosity to refer to the interpretation which used to be given to the

words ἄσσον *warelégorto*, in Acts xvii. 13. In the Vulgate they were rendered "cum enstulissent de Asson," and they were supposed by Erasmus, Luther, and the English Versions (except the Geneva) up to 1611, to point to a city of this name in Crete. Such a place is actually inserted by Padre Georgi, in the map which accompanies his *Paulus Naufragus* (Venet. 1730, p. 181); but the *Asus* (so spelt) of Crete was a long way inland (see *Speaker's Comm.* and Zöckler's *Kgf. Komm.* on Acts xvii. 13). The true sense of the passage was first given by Beza. [J. S. H.] [F.]

Assos. The Acropolis.

ASSUE'RUS (B. Ἀσούρος, A. Ἀσσυρος), Tob. xiv. 15. [ARASUERUS.] The name given in the Gk. and E. Versions to the colleague of Nebuchadnezzar in the conquest of Nineveh. The Itala and N (for the variations in the MS. see Swete's ed. of LXX.) have "Achicbarus king of the Medes." This may be a variant form of Cyaxares, by which name Nebuchadnezzar's ally is better known. Assuerus, in its turn, may be a corruption of Ahasuerus, a name identical with Cyaxares, or it may be an error of the scribe (see *Speaker's Comm.* in loco). [F.]

AS'SUR (חֲשׁוּר; Ἀσσοῦρ; Assur). 1. (Ezra iv. 2; Ps. lxxxiii. 8; 2 Esd. ii. 8; Jud. ii. 14, v. 1, vi. 1, 17, vii. 20, 24, xiii. 15, xiv. 3, xv. 6, xvi. 4.) [ASSHUR; ASSYRIA.] 2. (B. Ἀσσοῦρ; Axiu), 1 Esd. v. 31. [HABHUR.] [W. A. W.]

ASSY'RIA, ASSH'UR (חֲשׁוּר; Ἀσσοῦρ, Jos. Ἀσσυρία; Assyrian: Aššur, Ašur, Aššur), a great and powerful country to the north of Babylonia, whose capital was, in later times, Nineveh; but during the early period, Aššur (Kileh-Shergat), a city about 50 miles south of Mosul. It is probably from this city that the country took its name; and as the Assyrians often call their land "the land of the god

Assur," it is likely that this name comes from that of Assur, the deified son of Shem (Gen. i. 22; 1 Ch. i. 17), the chief sent of whose worship the city Assur probably was. The now received rendering of the earliest form Aššur, which was borrowed from Akkadian, is "waterland," or "meadow," and it is probable therefore that the name of the god and that of the country were at first quite distinct, but were afterwards assimilated on account of their likeness in sound. The city Assur is never mentioned in the Old Testament.

1. *Country*. — Assyria was a rather narrow strip of country immediately to the north of Babylonia, which country formed its southern boundary, beginning between 34 and 35 degrees of north latitude, and stretching upwards in a north-westerly direction to between 37 and 38 degrees; following, roughly speaking, the courses of the rivers Tigris and Euphrates, which latter probably formed its western boundary. The north of Assyria was mountainous, but the greater part was flat, being an extension of the Babylonian plains. It was bounded on the north by Armenia (*Uršú* or *Urartu* = Ararat), on the south by Babylonia (*Akkad*, *Bāb-šá*, *Kar-Duniāš*), and on the east by Media (*māt Madāā*). The western boundary was probably the

Euphrates, but the Assyrian sway probably extended as far as the kingdom of which Til-Barsip (Bir or Birajik) was the capital, and which seems to have been regarded as a part of the district called Hatti (identified with Hit).

Assyria is first mentioned in the Bible (Gen. ii. 14) as the country towards the east (Revised Version), in front of which the Hiddekel (Tigris) flows, and farther on as the land into which Nimrod went forth (so the marginal reading of Gen. x. 11 and the Revised Version—the alternative reading being, “out of that land [Shinar] went forth Assur”). The phrase “as thou goest towards Assyria,” which occurs in Gen. xxv. 18, apparently refers to the pathway between Egypt and that country. Assyria is mentioned also in 2 K. xv. 19, 20, where “Pul the king of Assyria” is spoken of as having been bought off by Menahem; and in v. 29, where the invasion of “Tiglath-pileser king of Assyria” is recorded. Afterwards Ahaz sought the alliance of the Assyrian king (2 K. xvi. 7-18), who, complying with his request, came and captured Damascus; and the next chapter records how Hoshea became the servant of Shalmaneser king of Assyria, and afterwards conspired against

him, with the result that Shalmaneser invaded the country, took Samaria, and carried Israel away captive (vv. 3-6; see also vv. 23, 24, and ch. xviii. 9-12). The next reference to Assyria is in connexion with the famous siege of Jerusalem by Sennacherib (2 K. xviii. 13-27, xix. 1-37; 2 Ch. xxxii. 1-22; Is. xxxvi. 1-xxxvii. 38). See the historical section below. In Is. vii. 18, “the bee that is in the land of Assyria” is mentioned, and in v. 20 the king of Assyria is compared to a “hired razor” in the hands of the Lord (these passages probably refer to the stinging and cutting [chastising] disposition of these scourges of the ancient Eastern world; see Is. xxx. 31); in xi. 11-16, the delivery of a remnant of Israel from Assyria is spoken of; again, in xix. 23-25, a holy covenant between Egypt, Israel, and Assyria is mentioned; in xxvii. 13, the coming forth of “those which were ready to perish in Assyria” is referred to; and the destruction of Assyria is foretold in xxx. 31 and xxxi. 8. In Jer. ii. 18, the prophet asks, “What hast thou to do in the way of Assyria, to drink the waters of the river?” probably referring to joining in the ceremonies, in some of which drinking the water of a river formed a part. Compare v. 36,

Aššur-naṣir-aḥ II or Aššur-naṣir-pal hunting Lions. From Nimrud. (Layard.)

“Why gaddest thou about so much? . . . Thou shalt be ashamed of Egypt, as thou wast ashamed of Assyria.” The reception of Assyrian polytheism by Samaria (= Israel) and Judah is denounced by Ezekiel (ch. xxiii., R. V.) under the simile of the whoredoms of Oholah and Oholibah. Assyria is likened to a cedar in Lebanon (Ezek. xxxi. 3-17), and his pride and fall are also spoken of. The going (of Ephraim) to Assyria is mentioned in Hos. vii. 11, viii. 9, and the Israelites are to eat unclean things there (ix. 3). As an empty vine, Israel is to be carried to Assyria as a present to king Jareb, x. 6 (see p. 286, n. 1); she was to tremble as a dove out of Assyria, xi. 11 (Assyria was probably celebrated for its doves, which are often mentioned on the tablets). “The wasting of the land of Assyria” is spoken of by Micah, v. 6 (the “land of Nimrod,” mentioned immediately after, is Babylonian). The destruction of Assyria is again referred to in Zeph. ii. 13; in Zech. x. 10 the gathering of the chosen people from Assyria is foretold; and the country is again mentioned in Mic. vii. 12 and Zech. x. 11.

The principal rivers were the Tigris (Akkadian, *Idigna*; Assyrian, *Idiglat*; Heb., *Hiddekel*, “that is eastward of Assyria,” Gen. ii. 14),

and the Euphrates (Akkadian, *Puranunu*; Assyrian, *Purattu*; Heb., *Prath*, Gen. ii. 14), with their tributaries, of which may be mentioned the Upper and Lower Zab, and the Choser, which, coming from the Gebel-el-Maklub, flowed through Nineveh into the Tigris.

2. *Climate, &c.*—The climate is that of a high-lying land, being cool; and consequently, having a plentiful supply of water for irrigation, a thriving vegetation flourished. All kinds of grain, hemp, and cotton grew there, as well as mulberry-trees, melons, apples, walnut and almond-trees, pomegranates, figs, olives, and dates. There were excellent pasture-lands, and honey was very plentiful. The mention of wine, called by the Akkadians “the drink of life,” testifies to the cultivation of the vine.

The animals which abounded in ancient times were stags, roebucks, wild goats, wild asses, and large-horned wild oxen. Lions (the short-maned variety) were also very plentiful, and often afforded sport for the Assyrian kings. The preceding cut of a lion hunt by the king is described by Layard as one of the finest specimens hitherto discovered of Assyrian sculpture. The Assyrians possessed also excellent breeds of horses, brought probably from Cappadocia.

T

3. *Chief Cities.*—Assyria, on account of its fruitfulness, its temperate climate, and the energetic nature of the people, soon became a very powerful and prosperous country. Cities, towns, and villages sprang up everywhere. The chief city in later times was the renowned Nineveh, now represented by the mound of Kouyunjik, beside the Tigris. Close to Nineveh lay the city Calah (*Kalhu*), now Nimroud, where many early kings held court. About 50 miles south lay Asaur, now represented by the mound Kileh-Shergat. Sargon of Assyria built a splendid palace at a town seemingly founded by himself, which he called Dûr-Sargina, "Sargon's town," now Khorsabad. Among the other chief cities of Assyria may be mentioned *Arba-il* or *Irba-il* (Arbela), *Êkalâte* ("the city of palaces"), *Ingur-Bêl* (Balawat), and *Kalzu*, where Sennacherib had a palace.

4. *People.*—Judging from the records which have come down to us, we may infer that Assyria was originally a Babylonian colony, whose first settlement was probably the city of Assur, which afterwards became the capital of the country. The Assyrians therefore, speaking, as they did, the same language as the Babylonians, must

Assyrian groom, (time of Sargon.
From Khorsabad. (Layard.)

have been of the same race, being the result of inter-marriage between Semitic Babylonians and non-Semitic Akkadians and other tribes dwelling in Mesopotamia. The Assyrians, like the Babylonians, were a powerfully-built race, thick-set, and muscular. Their faces were rather round, the eyes full, with the

Impression from a cylinder-seal. Deity and winged bulls.
This shows the Assyrian type of face with great exactness.)

the people, from the royal portraits, and from the correspondence between the king and his subjects which has been found, they were mild and good-humoured, but cruel and relentless in war. They were very fond of pomp and show, but seem to have far surpassed the peoples around them in intelligence and energy. They were in every respect as learned as the Babylonians from whom they had sprung, and also quite as superstitious.

5. *Religion.*—The religion of the Assyrians was the same as that of their Babylonian ancestors. The chief divinities were Assur (probably the deified founder of the nation, cp. Gen. x. 22), the

Emblem of Assur. (After Layard.)

national god, who was probably another form of Bel (see above upon the name of the city and country of Assur or Assyria); Bêlta or Beltis, wife of Assur or Bel; Merodach (see Jer. i. 2), the god who went about doing good to mankind, and Zîr-panitum his consort; Êa* (Ea) or Oanncs, god of the sea, rivers, &c., and of deep wisdom, and Dam-kina or Daukê his consort; Nabû or Nebo (see Is. xli. 1), the god of learning and literature, and Tašmêtu his consort; Nergal, god of war, and his consort Laz; Anu, god of the heavens, and his consort Anatu, also called Lahmu and Lahamu (compared, by change of A into A, with the Dakhê and Dakhês of Damascius); Šamaš, the sun-god, and his consort, the moon-goddess Aa; Sin, the moon-god, also called Nannaru (Nanaros), the "light-giver;" Istar of Arbela, goddess of war, and Istar of Nineveh, goddess of love; Rammân or Addu (Rimmon or Hadad, see 2 K. v. 18), "the Thunderer," god of the atmosphere, the winds, storms, &c.; Gula, "the great one," goddess of healing; Ninip, "lord of arms," also called Uraš; Zagaga, "lord of the sanctuary;" Ennu-gi, "lord of brook and watercourse;" Bilgi or Gibil, the fire-god; Dumu-zi, Tammuz or Adonis, consort of Istar, worshipped by the Assyrians and Babylonians, and also by the Hebrew women, with lamentations (Ezek. viii. 15); besides many others, whose names and by-names are too numerous to mention.

The religious system of the Assyrians, which, like the Babylonian, was of Akkadian origin, was essentially astral, the determinative prefix for divinity being an eight-rayed star ✨

(corrupted to ✨ in late Assyrian and Babylonian texts). As this character was, after a time, always used to indicate a divinity, the group which stood for constellation (three stars clustered together) came to be used to designate the heavenly bodies. These were distinguished by the following names:—*Aku* (compare *Ari-aku* = Arioeh, Gen. xiv. 1) = Sin, the moon-god; *Bêlê* = Šamaš (Heb. Shemesh), the sun-god; *Dapias*

* Better, perhaps, Aê, as many texts give.

= *Dus-sig-ēa*, identified with Mercury; *Sib* or *Sib-raga* = *Dilbat*, Delephat or Istar (Venus); *Lulim* = *Lubat-sag-uš*, the planet Saturn; *Bibbu*

Nabo. (From a statue in the British Museum.)

= *Lubat-guda* or *Muḫiz-bulim* (also *Muḫtarilu*, Arab. *Mustari*), Jupiter; and *Simutu* = *Musta-burri-mūtānu*, "the foreboder of deaths," pro-

Emblems of the principal Gods. (Layard.)

ably the planet Mars (Nergal; see 2 K. xvii. 30). The beginnings of the gods, according to Babylonian cosmogony, are poetically told in the first tablet of the Creation story:

When on high the heavens proclaimed not,
Beneath the earth recorded not a name,
The primordial abyss begot them,
Mummu-Tiamat was she who bare them;
Their waters at once burst forth, and
Harvest was not gathered, the plain was unsought;
When none of the gods shone forth,
A name was not recorded, a symbol was not [raised?],
The [great] gods were made:
Lahmu and Lahamn shone forth [alone?],
Until [the gods] grew up.
Šar and Kīšar were made
The days grew long
Ann
Šar and [Kīšar]

Lahmu and Lahamn (= Anu and his consort Anatu) were therefore the first of the gods, and it is probably for this reason that he was designated by the number 1.^b In like manner some of the other gods were distinguished by numbers, Ninip's number being 50; the goddess Istar's, 15; Nergal's, 10; Nebo's, 10. Merodach's number is unknown; but that of the god Sin seems to have been 30, from the thirty days of the month, and that of the Sun-god 20. It is noteworthy that in the above list of gods identified with the planets, the order is the same as that of the days of the week, except that the Moon-god Sin precedes the Sun-god Šamaš.

There was also a number of minor deities, among which may be mentioned the fourteen sons of Mah, "the supreme one;" the four porters of Mah; the two porters of E-sagila (the temple of Bēl at Babylon); Ukkunnu, Akkulu, Ikšnda, and Iltebu, the four dogs of Merodach; Dumuzi-abzu ("Tammuz of the Abyss"), Kigula, Nira, Bara, Baragula, and Bur-nun-ta-sā, the six sons of Ēa or Aē (Oannes); together with others, by-names or manifestations of the other deities. Thus other names of Ninip are *Sukktu* (Siccuth, if we may take the marginal reading of Amos v. 26) and *Kāvanu* (Chiun, Amos v. 26).

Besides these divinities, to whom the Assyrians mostly attributed a beneficent power, they believed in a large number of evil spirits, who were only mentioned—and then not by name—to

Mythological representation, probably typifying protection from an evil spirit. (Layard.)
Time of Ašur-bani-pal or Ašur-bani-pal.

be exorcised. Thus we read of the evil *ūtukku*, the evil *ālu*, the evil *ēdimmu*, the evil demon

^b The single wedge, standing for 1, is also read "60," being the "sexagesimal unit."

(*gallû*), the evil god, the evil incubus, the hag, the *labasu*, the seizer, the *lûû* and the *lîlîtu* (evil spirits of the abyss, of which the feminine, *lîlîtu*, occurs in Hebrew under the form of *lîlîth*, which is translated "screech-owl" in the Authorized Version, and "night-monster" in the Revised. See Is. xxxiv. 14). According to the Rabbins, the *lîlîth* was a spectre in the form of a beautiful woman, which lay in wait for children by night. Besides these there were the servants of the *lîlû* and a whole row of spirits of evil, who were believed to bring on sickness, misfortune, and all the ills that flesh is heir to. Against these, incantations of various kinds were used, the favourite formulae being those in which Merodach, the god who went about doing good to mankind, was invoked. Merodach was supposed to inquire of his father Êa or Aê (Oannes), the "lord of deep wisdom," dwelling in the abyss, who seems never to have failed to inform his son how the suppliant might be cured or relieved.

The religious duties of the Assyrians consisted of sacrifices, libations, prayers, and psalms. The ceremonies were of varying forms. In some, a kind of visitation was made to the shrine of

Winged figure with offerings. (Laya. d.)
Time of Ashur-nasir-apli.

each god, and a verse was said or chanted before the image of each, with bowings and other tokens of adoration. Each day of the month was the festival of, or sacred to, one or more deities: the first day, for example, was sacred to Anu and Bel, the second to Istar, the third to Merodach and Zîr-panitum, the fourth to Nebo (and Merodach), the fifth to "the lord of the temple and the lady of the temple," &c. Every seventh day of each month, together with the nineteenth

day, was a kind of Sabbath, on which "the prince of the great nations" was not to eat flesh cooked by fire, was not to change his dress, was not to put on white, was not to make sacrifice; the king was not to ride in his chariot, and was not to talk "victoriously;" the seer was not to try to find out secret places, the physician was not to attend to the sick, and the day was not a suitable one to make an incantation. In the night, however, the king was to make offerings to Merodach and Istar, or Ninip or Gula, &c., as the case might be, to sacrifice a victim, and to raise his hands to the god in prayer. Sometimes, it would seem, the image, or the shrine of the god, was sprinkled with the water of the river (Tigris or Euphrates), which was probably consecrated for this purpose. Each day had its religious duties.

A very favourite deity seems to have been Istar of Arbela, goddess of war, whose oracle in that city was in great repute. It is probable that other deities had oracles as well, but few or none of their enunciations have come down to us.

6. *Writing.* — The wedge-writing in use amongst the Assyrians was inherited by them from their Babylonian forefathers, and had already, at the earliest period of real Assyrian history, taken the form of groups of wedges, several of which form a single character. The early writing is rather complex, and differs only slightly from the Babylonian of the same period. Gradually, however, it became much simpler, and about the time of Tiglath-pileser I. (1120 B.C.) reached (with but few exceptions) the simple form which it retained to the last. Assyrian handwriting is remarkable for its clearness and the care which has evidently been bestowed upon it by the Assyrian scribes. A great advantage, also, to the modern student, lies in the fact that the tablets bearing the records are always kiln-burnt, and not, as in Babylonia, merely sun-dried. During the time of Sargon, the Assyrian conquests in Babylonia—always a land of romance to the learned Assyrian—caused the introduction of certain Babylonian forms into the Assyrian sign-list, but these were kept mostly for the lapidary style. Like the Babylonians, the Assyrians sometimes used the archaic style of writing in late times, just as we sometimes use the old black letter.

The characters were originally hieroglyphs:

𐎶, for 𐎶 (the fingers of the hand), standing for "hand" (*kātu*); 𐎵, for 𐎵 (the sun's disc, the intermediate form of which was 𐎶), for "sun" (*šamšu*), "day" (*ānu*), "to be bright" (*ēlū*), &c.; 𐎶, for 𐎶 (a star), standing for "god" (*ilu*), "heaven" (*ame*), &c.; 𐎶, for 𐎶 (= 𐎶, a foot), for "to go" (*ālaku*), "to fix" (i.e. "to set down the foot," *kānu*), &c., with many others of which the hieroglyphic form can be traced. As remarked above, the latest inscriptions show the simplest forms, the examples here given being written 𐎶, 𐎶, 𐎶, and 𐎶. Besides the pronunciation of these characters given above (the ideographic value or meaning),

each character had one or more *syllabic values*, borrowed from Akkadian or Assyrian, as the case might be. Thus was pronounced *su* (Akkadian), and *kat* (Assyrian); was pronounced *ut, tu, tam, par, pir, lah, and hü* (apparently all from Akkadian); was pronounced *an* (Akkadian), and *ü* (Assyrian), and was pronounced *du, gin, and gub* (Akkadian values). These values go to form new words in Assyrian; and despite their polyphony, there is seldom any doubt upon that score as to how a word is to be read. The system of writing in Assyrian was threefold—it might be wholly ideographic, as , *hat ili šamaš uḫān*, "the hand of the sun-god will establish," where each character stands for a word; partly ideographic, as , *hat ili-šu uḫān*

(for *uḫān*, the final *an* being the "phonetic complement"), "the hand of his god will establish," where the first, second, and fourth characters are ideographic and the others syllabic; or wholly

syllabic, as , "*a-na muḫḫi lu-muṭ (dīna muḫḫi lūmūt)*, "may I die for (it)." As a rule, the omens, medical texts, and a few others, are written ideographically, or mostly so; whilst the historical texts, letters, interlinear translations, legends, &c., are almost entirely syllabically written. The Assyrians used the Babylonian character as well as the Assyrian, and of this the last phrase given above is an example. The Assyrian forms of the same characters would be .

The study of the Assyrian language and syllabary is much lightened by the many bilingual lists and syllabaries, the latter class of tablets being, in fact, the fundamental texts for the study of the language.* These syllabaries are of three classes: the first giving the syllabic values of the characters (these are mostly Akkadian words), the characters themselves, and their names; the second the syllabic values, the characters, and their meanings; and the third the syllabic values, the characters, their names, and their meanings. In the bilingual lists the Akkadian words are often accompanied by glosses indicating the pronunciation, but the names of the characters are but rarely given. As their name indicates, they give merely the Akkadian word, group, or phrase, with the Assyrian equivalent, and are written, as a rule,

* These two examples are not taken from any text—they are phrases made up by means of the four characters given in illustration of the writing, to show how diversely the same characters may be used.

* From the tablet K. 1249 (S. A. Smith's *Keilschrifttexte Assurbanipals*, lit.), line 26.

* Even these, however, would have been of but little use had it not been for the trilingual inscriptions of Persepolis, which were worked out by Grotefend, Sir H. C. Rawlinson, and others. The Behistun inscription, the text of which was obtained at great personal risk, and was studied by Sir H. C. Rawlinson, is the most important of the documents of this class.

in double columns. The syllabaries, however, are written in threefold or fourfold columns, as indicated above.

7. *Literature and Learning*.—The literature of the Assyrians was the same as that of the Babylonians, and derived from the same Akkadian and Sumerian sources. This inheritance from their non-Semitic ancestors consisted of tablets on language, Akkadian and Sumerian and Assyrian word-lists and syllabaries or sign-lists with explanations, tablets of phrases and bilingual hymns, prayers, and incantations. They had also the legends of the Creation and the Flood, the former seemingly of Sumerian origin. A large number of omen-tablets testifies to their superstition in respect to the affairs of every-day life. Among native Assyrian literary productions may be mentioned the historical inscriptions, which are often well and vigorously written, and a large number of letters and despatches referring to all kinds of civil and military matters. The Assyrians wrote (and consequently spoke) a purer dialect than the Babylonians, though the literary ability of the two nations was probably equal.

Like the learned Babylonian, the Assyrian in the same station of life had to be well instructed. He was expected to know the old languages of Sumer and Akkad as well as Aramaic and Phoenician. That the Assyrians knew Aramaic, and also Hebrew, is proved by the passage in 2 K. xviii. 17-35, in which the Rab-shakeh (*rab-šakī*) having harangued the people in Hebrew, is requested to speak "in the Syrian language" (Aramean), but refuses, and continues his rather boastful and impudent speech in very good Hebrew, in order that "the people on the wall" might understand. The dragoman (*tarjumanu* or *turgumanu*) was a recognised institution in the principal cities. The Assyrian physician (*āsu*) knew the use of medicine, and surgical operations were sometimes performed.

8. *Trade*.—The Assyrians were hardly such keen traders as the Babylonians, but it is probable that, if the Assyrian empire had not been overthrown, they would have become the rivals of the sister kingdom. The contracts which have been found at Nineveh extend from the time of Shalmaneser II. (859 B.C.) until the downfall of the empire at the end of the 7th century B.C. These contracts refer to field-produce of various kinds, cattle, tracts of land, slaves, &c. &c. They often bear Aramaic (Phoenician) dockets, and were sometimes written in duplicate (like the ancient Babylonian contracts), consisting of a small inner tablet and an envelope inscribed with the same transaction. There seems to have been a brisk trade in horses carried on with Cappadocia, and the existence of small objects of art of Egyptian and Phoenician workmanship testifies to a certain amount of commercial relationship between Assyria and those countries. The dating of all trade and official documents was by means of the so-called eponymies (public officials whose term of office lasted a year, and was taken in rotation by those who were eligible), of whom lists were made, from the remains of which modern scholars have been able to reconstruct the greater part of the Assyrian chronology. [BABYLON (the country), *Time-reckoning, Dating Records, Trade, Slavery*.]

9. *Art, Architecture, &c.*—Of the art of the ancient Assyrians we have many specimens, con-

sisting of a splendid series of bas-reliefs and a few statues, small clay figures of very fair execution, and some ivory carvings. From these

Assyrian ornament. (Layard.)

objects it is easy to see that the style of their art was essentially vigorous, the muscles of both human and animal forms being very prominently and carefully marked. They were also skilful engravers and workers in bronze and gold. From the embroidered robes of the kings represented on the sculptures, it is certain that their textile fabrics were not by any means inferior to those of the Babylonians. In all branches of art, it is in the reproduction of animal forms that they were most successful. Especially noteworthy are the splendid hunting scenes at the time of Aššur-bani-apli, B.C. 668-626.

The royal palaces, built upon mounds, were adorned with sculptures and mural paintings, and the entrances were generally ornamented

with figures of colossal bulls, the stone of which was brought from a distance, roughly shaped up, dragged by means of ropes pulled by multitudes of captives, and with the help of enormous levers, upon the palace-mound, and, once in position, there finished off. Captives were also employed to form these enormous mounds.

From an architectural point of view, it is probable that the city and palace of Dūr-Sargina (Khorsabad), excavated by Botta and Place, are the most interesting. As the name indicates, the city was founded by Sargon of Assyria, about the year 720. The city was four-square, with the angles pointing to the four cardinal points. On each side were two gates, eight in all, some of them of simple form and little ornamentation, others more highly decorated, and flanked with the well-known winged-bulls, together with human figures. The walls were provided with turrets at regular intervals, and both walls and turrets had battlements like steps. On the north-west side of the city was the royal palace, built partly outside the rectangle of the city. The palace consisted of a series of buildings erected on a rectangular platform, the portion outside the city being surrounded by towers with the usual step-battlements. Access was gained to the platform by flights of steps, and by inclines leading up to the walls, which seem to have been level with the platform. The palace itself consisted of series of chambers, with the necessary communications, built round courtyards of various dimensions. To the left were the chambers regarded as belonging to the

Observatory or Temple Tower at Khorsabad. (From Place, *Ninive et l'Assyrie*.)

harem, beyond which the observatory- or temple-tower (*zikkurat*) could be seen. This was a tower similar to that at the Birs-Nimroul. [See BABEL, TOWER OF.] It was built in stages, formed by an inclined rampart, which ran round the structure seven times, and enabled the visitor to reach the top. The four lower storeys are still perfect; each of them is

pannelled and coloured: the three upper storeys are gone, but may be easily restored from those below, as shown in the annexed cut. The remainder of the royal palace consisted of re-

arm a struggling lion. The gateways were arched; and flanked by towers, adorned by the recess-ornaments above mentioned. The whole must have been grand in its simplicity. This palace at Khorsabad may be regarded as a typical specimen of the best kind of Assyrian architecture. The other palaces differed from it in the arrangement and number of the rooms, &c., but they were all built upon the same general principle.

One of the most distinctive features of Assyrian as of Babylonian architecture is the *zikkurat* or temple-tower, such as the Tower of Babel must have been. Besides the form with an inclined rampart running round, as described above, others were to be seen, of a less pretending but, at the same time, more picturesque and asymmetrical nature. These were provided with steps leading up to an upper platform and

Palace of Kouyunjik restored. (Fergusson.)

a central door, from which walks branched off on each side, so that, instead of entering the first chamber, the visitor might make his way to an incline leading to an upper stage, and so, by the same means, in some, to a third, on the top of which it is supposed a shrine was built, for the statue of the god there worshipped. Such a tower is seen in a bas-relief found at Kouyunjik (see cut), containing four stages, of which the

topmost is imperfect, owing to the destruction of the upper portion of the tablet.

A similar tower is found in the remains of the ancient temple at Mukeyyer.

The houses of the common people were mostly very simple in design, and were probably, for the most part, built of unburnt brick. Of their exact form, however, there is some doubt, as the sculptures do not, as a rule, show Assyrian houses.

They were probably similar to those still found in the country (see Rawlinson's *Anc. Monarchies*, vol. i. pp. 403, 404).

Tower of Temples restored.

The Assyrians, as builders, were clever and systematic. They knew the use of the arch, but were timid in its employment. In their lighter style of architecture they used columns of various shapes, some of them resembling the Corinthian, Ionic, and Doric columns of Greek architecture. These columns sometimes rest on bases similar to the capitals, sometimes on the backs of animals. As an additional ornament, an ibex is sometimes placed on the summit. The walls of their palaces were not only lined with sculptured slabs, they were decorated also with mural paintings of scenes in the battle-field, &c., elegant patterns, and other devices. In some, if not most cases, the ceilings were decorated, and furnished with a central knob, pierced for the suspension of a lamp.

The Assyrians were skilful agriculturists, having inherited a knowledge of this science from the Babylonians. Like them, too, they had an extensive system of canals, watercourses, &c., for the irrigation of their fields. One of the sculptures has a small but well-executed representation of the use of the shaduf for raising water for irrigation. They were also extensive breeders of cattle, horses, asses, mules, camels, hunting-dogs, &c. It is probable that "the bee that is in the land of Assyria" (Isa. vii. 18) refers as much to the industry of the people as to their warlike (stinging and chastising) nature.

10. War.—It is clear, from the sculptures and inscriptions, that the Assyrians possessed disciplined and organized troops, well-drilled, hardy, experienced in war, and well exercised in the use of the sword, spear, dagger, bow, and sling. They must have known something of military tactics: the movement of troops to the attack, the retreat, and the various other movements necessary, were apparently executed in military order. The king led in person, accompanied by his *turtanu* or *tartanu* (*Tartan*), "commander-in-chief;" *sud-šaki*, "major-generals;" *rab-šaki* (*Rab-shakeh*), "generals;" *šaki*, "captains," and other officers. The army was attended by a large following; and the king, and probably his officers also, had every luxury which could at such a time and under such conditions be supplied to them. Musicians accompanied the troops.

In besieging a city, banks were cast up against it, battering-rams were used to overthrow the walls and to make breaches in them, sappers

and miners were set to work, large missiles were thrown by means of catapults and similar engines. Forts were built around the city (cp. Jer. iv. 2 and lii. 4), and from these, as well as from the

AMur-nasir-apli in his War Costume. (Nimroud.)

tops of the battering-rams and from the ground, the Assyrian sharpshooters picked off the defenders who were on the wall. Slingers also went to work with their missiles. A very good

Assyrian Battering-rams.

but short account of a siege is given by Sen-nacherib when speaking of his attack on Jerusalem. He says that he besieged and captured the cities around "with smiting (?) of battering rams (?) and shooting (?) with the catapult (?),

* The *šud-šaki* was sometimes a eunuch.

breaking away the wall (?) at the foot, breaching, cutting, and earthworks."^a After the capture of a city, the king, when present, sat in state to receive the prisoners and spoils. Those of the inhabitants who had incited to resistance were often executed and impaled. After the capture the cities were often destroyed by fire, and the inhabitants carried away into captivity. [ARMY.]

The arms of the Assyrians were the sword, dagger, spear, bow, and sling. The defensive armour of the soldiers varied considerably. Some seem to be quite naked as to the upper part of the body, whilst others wore cuirasses, chain mail, or scale armour. They wore also helmets of bronze and iron. They had shields of varying sizes and shapes, made of metal (bronze), hide, or wicker-work, the smaller being of the former and the larger of the latter material. The large

shields or *pavoi*s were often of a sufficient size to shelter two or three men completely. From these portable walls they attacked their foes, and it is probably to the excellence of their defensive armour that their successes were often due. For drawings of the Assyrian arms, see ARMS.

Of all the Eastern nations of old time, probably none surpassed the Assyrians in love of deeds of arms. The extent of their conquests alone is a sufficient proof of their energy in this respect. War was with them a study, and none of the surrounding nations had better arms, both offensive and defensive, than they. They were also no mean military engineers for their time. Rivers were crossed by means of pontoon bridges; every camping-place was carefully fortified. In besieging a town, towers, from which the soldiers might attack it by shooting and otherwise killing the defenders,

Capture of a City. Time of Tiglath-pileser III. (Layard.)

were raised close to the walls; breaches were made in the walls by means of battering-rams, so constructed that from their tops also the Assyrian archers might annoy the defenders; and sometimes also the walls were undermined, and an entrance thus made. As rulers over conquered nations they were harsh, and as conquerors usually ruthlessly cruel.

11. *Government*.—In Assyria the king was supreme, though it is probable that he often asked the counsel of the chief men of the country. Next to the king was the *turtānu* or *tartānu* ("tartan," Is. xx. 1; 2 K. xviii. 17), the chief of the army, and under him the *rab-sakē* ("Rabahakeh," Is. xxxvi. 2, &c.), the chief of the captains, who,

when the king did not himself go on an expedition, took the command. The country was divided into several districts, administered by a *šalat*, or "ruler," who seems to have sent in periodically reports to the king as to the administration of affairs in his district; and, if that district were an outlying one, he gave accounts also of the movements of the people, and especially of the army, on the other side of the boundary. The government in Assyria itself seems to have been mild, and rebellions against the authority of the "great king" were comparatively rare. Those unjustly treated, or against whom any complaint had been lodged, seem to have had the right of appeal, or of justification, before the king himself.

12. *History*.—Assyria seems to have been a colony of Babylonia, but the period at which the colonisation took place is quite unknown. In

^a These last three expressions are, in Assyrian: *pāšē*, *nišē*, & *labbanāšē*, from *palāšu*, "to make a hole," *nakānu*, "to cut," and *labānu*, "to lay bricks."

the earliest times the country was governed by viceroys or underkings (in Akkadian *patesi*, and in Assyrian *šakku*), subject, probably, to the principal Babylonian kingdom. On a brick from the site of Assur are found the names of Irišu and his father Hallu, who seem to have restored the temple of Assur in that city. Later, probably, came Išmi-Dagan and his son Samsi-Rammānu I., who reigned about 1820 B.C. The latter built a temple in the city of Assur to the gods Anu and Rammānu. There is no real history, however, until the time of Aššur-zakir-tiir, who was engaged in some disputes with Babylonia (probably about 1600 B.C.), the result of which seems to have been that war broke out in the time of his successor, Ninip-tukul-Aššuri.

About the year 1450 B.C. Aššur-bēl-nīši-šu ruled in Assyria, and discussions took place between him and Kara-Inđaš, king of Karduniaš, about the boundaries of Assyria and Babylonia, pledges being given and received on both sides. The discussion, however, was continued during the reign of the next king, Buzur-Aššur, who came to an agreement about the boundaries with Burna-buriaš, who had, in the meanwhile, come to the Babylonian throne.

About the year 1400 B.C., Aššur-nballit came to the throne of Assyria, and the two nations were upon such good terms that Aššur-uballit gave his daughter Muballitat-Šerūa in marriage to the king of Babylonia. Kara-Murdaš, the fruit of this marriage, duly became king of Babylon. Some discontented Kassites, however, arose, and killed Kara-Murdaš, setting Nazi-bugaš on the Babylonian throne instead. The Assyrian king marched into Babylonia and avenged the death of his grandson, by deposing and killing Nazi-bugaš, and setting Kuri-galzu on the Babylonian throne. Aššur-uballit was renowned as a conqueror, and also restored several temples of his country. He was succeeded by his son Bēl-nirari, who—evidently thinking that Kuri-galzu, who was forming an alliance with Ġur-ba-tila, king of Elam, was getting too powerful—marched into Babylonia and defeated them at Sugaga. A new rectification of the boundary now took place.

The next two kings, Bndu-ilu and Rammānu-nirari I., extended considerably the limits of the empire. He defeated Nazi-Morudas at the battle of Kar-Istar-Akarsalu, and the boundary of the two countries was afterwards again rectified, probably to the great advantage of the Assyrians. Šalmaneser I. succeeded his father Rammānu-nirari about 1300 B.C., and continued his conquests. He removed the royal seat of government from Assur, the old capital, to Nineveh, and built there a temple to the goddess Ishtar. The Assyrian empire continued to increase under Tukulti-Ninip, who conquered Babylonia, and ruled over the whole country from the Armenian mountains to the Persian Gulf. The next king of Assyria, Bēl-kudurri-ušur, was attacked and killed by the Babylonian king, who during his reign had declared himself independent. Ninip-spil-ēkur, who came to the throne about 1220 B.C., had to be continually on the alert to defend himself against the various hostile tribes around Assyria.

Aššur-dān,¹ son of Ninip-apil-ēkur, made in-

roads into Babylonia. His reign was, on the whole, very prosperous, for it is said of him that he "was the bearer of a glorious sceptre, the ruler of the people of Bēl, the work of whose hands and the giving of whose offering pleased the great gods, so that he attained to a good old age." He pulled down the great temple of Anu and Rimmon at Assur, intending to restore it, but died before the rebuilding was begun. Of Mutakkil-Nusku, his son, nothing is known except that he rebuilt the palace at Nineveh. He seems not to have been a very energetic ruler, but his son, Aššur-rēš-iši, who mounted the throne about 1150 B.C., carried his arms far and wide. He made expeditions in both Armenia and Babylonia, and "overthrew all the mighty ones."

Figure of Tiglath-pileser I. (From a rock tablet near Korkhar.)

Most glorious, however, was the reign of Tiglath-pileser I., who succeeded his father, Aššur-rēš-iši, about 1120 B.C. He claims to have fought with sixty kings, and the countries mentioned in his annals include the Muškia or people of Mesech; the land Hatti, supposed to be Hit; the land Nairi or Armenia, then governed by no less than twenty-three kings, with many other districts. He is said also to have captured Babylon and ravaged the whole of Upper Babylonia. At the death of Tiglath-pileser I. Assyria was the foremost power in the world. It is probable, however, that this empire decayed greatly under his son and successor, Aššur-bēl-kala. This ruler made a treaty with Marduk-šapik-kullat, king of Karduniaš or Babylonia, and afterwards married the daughter of his successor.

A gap of about 130 years now occurs in the history of Assyria, for it is not until about the year 950 B.C. that the kingdom again emerges from obscurity. The first ruler after the gap was Tiglath-pileser II., of whom nothing is known. Aššur-dān or Assur-danan II. rebuilt the cities and temples of Assyria. Rammānu-nirari II. made many expeditions, and again extended the limits of the kingdom. In the year 892 B.C. Tukulti-Ninip II. came to the throne, and during a short reign of seven years greatly extended his dominions, especially on

¹ This name may also be read Aššur-danan.

the north-east of Assyria. This king ruled also over Babylonia, but how he came to the throne of that country is unknown. This prince's end was, on the whole, a sad one. A revolt took place in Akkad, which proved successful, and Tukulti-Ninip was obliged to flee. After his

Ashur-nasir-apli or Ashur-nasir-pal. (Layard)

arrival at the city called, after him, Kar-Tukulti-Ninip, a revolt took place in Assyria itself, led by the king's own son, Ashur-nasir-apli, the result being the death of the king, and the accession of Ashur-nasir-apli to the throne of Assyria about the year 885 B.C.

The new king was most warlike, and exceedingly successful in his expeditions. He carried the arms of Assyria to the coast of the Mediterranean on the west, and to Suhi (supposed to be the land of Bidad the Shuhite, Job ii. 11) on the east. He claims to have conquered the

The Black Obelisk of Shalmaneser II.

whole of the land of Nairi (Armenia), and to have reconquered the district of Babylonia called Birati. He was a most able ruler, and raised

"The tribute of Jehu, son of Omri." Black Obelisk. (Layard.)

his country to a great pitch of prosperity. He was succeeded, about the year 860 B.C., by his son Salmanu-asharid or Shalmaneser II.

Shalmaneser II. was in every way as warlike as his father. His first expeditions were to the

countries north and west of Assyria, Van and Ararat, and the kingdoms of which Til-Barsip and Carchemish were the capitals. Til-Barsip he annexed to Assyria, changing its name to Kar Salmanu-asharid ("Shalmanesersburgh").

The next important struggle in which the Assyrians were engaged was that with the Syrian league, in which the leading state was Damascus, then ruled by Addu-Idri (Benhadad). The united forces of the twelve states engaged amounted to between 80,000 and 90,000 men, and to this vast army Ahab of Israel contributed 10,000 footmen and 2,000 chariots. The Assyrians gained the victory, but probably at heavy cost.

The next war in which the Assyrian arms were engaged was in Babylonia, whither Shalmaneser led his forces to help Marduk-šum-iškun, king of Babylonia, against Marduk-hēl-ūšate, who had rebelled. The Assyrian king seems to have succeeded in restoring order.

In the following years, Shalmaneser tried again twice to put down the Syrian league, but it was not until the year 842 B.C. that he finally crushed it. On this occasion Hazael (Haza'ilu), who was then king of Samaria, was defeated at Saniru, a mountain near Lebanon. 16,000 of his troops are said to have been slain, and his camp captured. Hazael was afterwards besieged by the Assyrian army in his capital Damascus. Shalmaneser next went to Ba'lira'ia, near the seacoast, and whilst there received tribute from the Tyrians, the Sidonians, and from Jehu, "son of Omri."

During the last four years of his reign Shalmaneser had to contend with a wide-spread disaffection in Assyria, in which a revolt took place, headed by Aššur-dān-apli, the king's own eldest son. Samši-Rammānu, a younger son, put down the revolt, and, Shalmaneser having died whilst the struggle was going on, succeeded him about the year 825 B.C.

The new king followed in his father's footsteps, and raised again the influence of Assyria. He reconquered Nairi, and conquered several other nations north and east of Assyria. He invaded Babylonia several times, and annexed some parts of it.

Rammānu-nirari, his son, was also a great conqueror. He attacked the Hattē, the Tyrians and Sidonians, and the "land of Omri." On the north he invaded Van, and on the south and east Babylonia and Media. The wife of this king was named Sammuramat or Semiramis.

Rammānu-nirari was succeeded by Shalmaneser III. 783 B.C. He attacked the region of Iṭu in Babylonia, Armenia, Van, Syria, Harḥar, Melia, &c. He died in 773 B.C., and was succeeded by Aššur-dān III., a king of whom very little is known. At the beginning of his reign he attacked Damascus and Hadrach, and afterwards made an expedition to the mountainous district of Gannanāti, near the modern Hulwān. In the year 763 a revolt took place at the old capital Assur, and lasted for six years, during which no foreign expeditions took place.

Aššur-nirari II. succeeded Aššur-dān III. in the year 735 B.C. This ruler does not seem to have been so active as to his foreign policy as his predecessor, the only expedition made being to Hadrach, Arpad, and Namri. This inactivity probably caused discontent, for Tiglath-pileser III., the successor of Aššur-nirari II., came to the throne about 745 B.C. The reign of this king is one of the most important in the history of Assyria. He was called Pul by the Babylonians, and must therefore be

the same as the Pul of 2 K. xv. 19, and 1 Ch. v. 26.¹ In the first years of his reign he made an expedition against Babylonia, at that time split up into a great many small states, and conquered the whole of the southern part of the country.

Other conquests of this king were the people of Namri, the Medes, the Armenians, and the people of Kummuhā. On the west the Syrians, including Rezon of Samaria, Hiram of Tyre, and Pisiris of Carchemish, were obliged to give tribute. The next year, however, Arpad, one of the principal cities of Syria, was fortified to resist the Assyrian inroads; and Tiglath-pileser, finding that his former vassals had thrown off their allegiance, again marched against them. It was apparently whilst he was known to the Israelites as Pul that Menahem of Israel gave him a thousand talents of silver to withhold from attacking that country (2 K. xv. 19). This probably took place whilst he was on one of these western expeditions.

For two years the Assyrian army besieged Arpad, but the city was at the end of that time captured, and the whole of Northern Syria submitted. After this Tiglath-pileser went against the allied forces of Judah (then ruled by Azariah) and Hamath. The forces of these two nations were defeated, and the Assyrian king divided the conquered countries amongst his generals. He afterwards received tribute from all the kings of Syria, amongst whom were Rezon of Syria, Hiram of Tyre, &c., together with Zabihe, queen of Arabia. According to 2 K. xv. 29. Ijon, Abel-beth-maachah, Janoah, Kedesh, Hazor, Gilead, and Galilee, in Naphtali, were all taken, and the people carried into captivity by Tiglath-pileser. This apparently took place on one of these expeditions.

Tiglath-pileser, after again making expeditions against Media and Armenia, marched, at the request of Ahaz, king of Judah, against Syria, with which Judah was then at war (see 2 K. xvi. 7-9, &c.). The army of Rezon, king of Syria, was totally defeated, and Rezon himself took refuge in his capital, Damascus, which the Assyrian king besieged, and, leaving there part of his army, overran with the other part the kingdom of Israel, whose king, Pekah, whilst the Assyrian army was ravaging the country, took refuge in Samaria. The Ammonites, Moabites, and Philistines were alike compelled to submit to the Assyrian king.

Damascus was at last captured by the Assyrians in 732. Rezon was taken and slain, and the inhabitants carried into captivity. At a great court held by Tiglath-pileser at Damascus, Ahaz of Judah appeared among the vassals of Assyria who came to do homage to the Assyrian king. Tiglath-pileser made conquests

¹ There is considerable difference of opinion concerning these two kings, Pul and Tiglath-pileser, some scholars believing them to be the same, others regarding them as different rulers. In the passages here quoted, it reads as if Pul and Tiglath-pileser were two different rulers, but the silence of the Assyrian and Babylonian records concerning any conflict makes it almost certain that they were one and the same. It was not unusual for kings of Assyria to assume the names of the renowned hero-kings of former times (Sargon of Assyria is supposed to have done so), and for an ambitious ruler to assume the glorious name of Tiglath-pileser I. was only to be expected.

also in Syria and Babylon, and ruled over the latter country for two years. He died about the year 727 B.C., and was succeeded by Shalmaneser IV.

Shalmaneser IV.,* who was king of Babylon as well as of Assyria, invaded Palestine, and attacked Hoshea, king of Israel, who "became his servant, and gave him presents" (2 K. xvii. 3), in order to buy off the Assyrian king. Shalmaneser finding, however, that his vassal was transferring his allegiance to So, king of Egypt (v. 4), marched against him, threw him into prison, and besieged Samaria, his capital. The city was taken after a three years' siege (v. 5, 6), and the Israelites were carried captive to Assyria, and placed in Gozan and the cities of the Medea. He died in the year 722 B.C. Sargon, founder of a new dynasty, succeeded Shalmaneser IV. as king of Assyria; and four months after the death of Shalmaneser, Merodach-baladan took advantage of the state of affairs in Assyria to mount the Babylonian throne.

Sargon was a most vigorous ruler, and his conquests were very extensive. He fought with the Babylonians under Merodach-baladan, the Elamites under Humhanigā, the Hamathites, and the people of Van. He directed also an expedition against Yavan, king of Ashdod, under the command of the Tartan, or commander-in-chief of the army, who took that city (Is. xx. 1). Bit-Humria (Beth-Omri) was also attacked. Each foe was in turn conquered, and in the end Merodach-baladan, who had resisted well, was captured and deposed, Sargon himself mounting the Babylonian throne and ruling the country for five years. This ruler built the city Dūr-

to get an army together. The Babylonian forces were defeated by Sennacherib at the battle of Kēš, near Babylon. Merodach-baladan fled, and escaped by hiding himself in the marshes of Guzummu. Sennacherib set a young man named Bel-ibni upon the throne of Babylon.

The next important expedition of Sennacherib was against Hezekiah, king of Judah. He began by attacking the nations lying on the coast of the Mediterranean, and brought to submission Great Sidon, Little Sidon, Achzib, Accho, &c. Menahem of Samaria, Abdi-li'ti of Arrad, Mitinti of Ashdod, together with the chiefs or kings of many other well-known nations, gave tribute. Sidkā (Zedekiah) of Askelon, however, being unsubmissive, was deposed, and Sarru-ludari was made king in his stead. Beth-Dagon, Joppa, Beneberak, and Azru, cities dependent on Askelon, were next captured.

Padi, king of Ekron, had been more obedient to the Assyrian king than his subjects liked; and they, losing their royal master with chains, had delivered him up to Hezekiah, and they had also made alliance with the kings of Egypt and the king of Ethiopia. These princes came with their armies to help the people of Ekron, and made ready for battle within sight of Eltekeh. The Assyrians, however, were victorious over this large force, and Eltekeh and Timnah naturally fell. The people who had dethroned Padi were executed, and Sennacherib caused him to be brought out of Jerusalem and seated him again on his throne. Sennacherib now says that he took twenty-six strong cities of Judah, with innumerable smaller towns around them, and then besieged Hezekiah within Jerusalem, making him, as the Assyrian account says, "like

a caged bird." The cities captured by Sennacherib were separated from his country, and distributed among the kings of Ashdod, Ekron, and Gaza. Hezekiah himself sent, as tribute, 30 talents of gold, 800 talents of silver, many kinds of precious stones and woods, &c., to Nineveh, and made obeisance by his ambassador to the Assyrian king.

The story of the Assyrian king, however, is a lame account, and it is clear, from what the Assyrians themselves say, that the expedition was not by any means successful, and

Sennacherib in his chariot returning from battle. From Kouyunjik. (Layard.)

Sargina ("Sargon-burgh"), now called Khorsabad, about ten miles from Nineveh.¹

Sennacherib, son of Sargon, succeeded him in the year 705 B.C. He soon found himself engaged in a war with Babylon, Merodach-baladan having profited by the death of Sargon

that the account given in 2 Kings xviii., Is. xxxvi.-xxxvii., and 2 Chron. xxxii. is the right one. The taking of "all the fenced cities of Judah" refers evidently to the twenty-six strong cities, with the numberless small towns around, mentioned by Sennacherib. Then, according to 2 K. xviii. 14, followed the giving of tribute, 300 talents of silver and 30 talents of gold—the amount of gold given agreeing in both accounts. This tribute was, according to the Assyrian account, sent to Nineveh. Notwith-

* This king is apparently the same as Ululiss, the Etulæus of the Canon of Ptolemy.

¹ The king Jareb mentioned in Hosea v. 13 is regarded by Prof. Sayce as being the same as Sargon.

standing this, the siege of Lachish was continued, and thence the Tartan, the Rabсарis, and the Rabshakeh were sent to Jerusalem to demand full submission and to enforce their demand by laying siege to the city. In the meantime, Sennacherib had left Lachish, and gone against Libnah. [LACHISH.] Then it was that the Assyrian king heard of the advance of Tirhakah, king of Egypt, and, marching to meet him, defeated him at the battle of Eltekeh. Then followed the disaster to the Assyrian army around Jerusalem—probably they were smitten with some kind of plague—and the abandonment of the expedition.

Sennacherib next went against Babylon, and defeated, at Bit-tûtu, the forces of the pretender Šuzub. Sennacherib set on the throne of Babylon his own eldest son, Aššur-nadin-šum. The Assyrian king then attacked various tribes of Asia Minor, and chastised the Chaldean settlers on the shores of the Persian Gulf. Šuzub now came forth again; raised, with the help of the king of Elam, an army, and proclaimed himself king of Babylon, but was again defeated, and sent in chains to Nineveh. Sennacherib's next expedition was against Elam.

Another Šuzub, the Mušezib-Marduk of the Babylonian Chronicle, now arose. He made alliance with Elam and with the son of Merodach-Baladan. The enormous forces of the allied armies were defeated at the battle of Halulê. Šuzub, who was afterwards delivered by the Elamite king into the hands of the Assyrians, seems to have succeeded in getting free once more, but was killed, in Northern Babylonia, by a fall from his horse.

Sennacherib was killed, in 681 B.C., by his sons, Adrammelech (see ADRAMMELECH 2) and Sharezer, who revolted against their father. Civil war now ensued for a space of nearly three months, at the end of which time Esarhaddon mounted the Assyrian throne (B.C. 681). Compare 2 K. xix. 37; Is. xxxvii. 38; 2 Ch. xxxiii. 21.

The new ruler was mild, but vigorous. He rebuilt Babylon, conquered the son of Merodach-Baladan, defeated the Phœnicians, and made all the kings of the district, including Manasseh of Judah, tributary to him. He made also the kings of Cyprus tributary, checked the inroads of the Cimmerians, fought against the Medes, Vanites, and Arabians, and conquered Tirhakah, king of Egypt, taking possession of that country, and dividing it into twelve states, appointing a native ruler to each. Besides this, he carried many of the Israelite captive (Ezra iv. 2), and brought Manasseh, king of Judah, in chains to Babylon, where he held his court (2 Ch. xxxiii. 11). He died in the year 668 B.C., whilst on his way to Egypt, to quell a revolt there. Aššur-bani-apli, his eldest son, succeeded Esarhaddon in Assyria.

The first expedition of this king is seemingly that in which his father had died. Tirhakah, the leader of the revolt in Egypt, was defeated, and compelled to flee to Ethiopia. On the withdrawal of the Assyrians from Egypt, another revolt took place, Tirhakah having allied himself with the native governors set up by Esarhaddon. The allied forces were defeated, and Tirhakah fled to Ethiopia, where he soon afterwards died. Rud-ammon, however, nephew of

Tirhakah, had more success, and put an end, for a time, to the Assyrian dominion in Egypt, but the Assyrians afterwards reconquered the country.

Aššur-bani-apli's next expedition was against Tyre, which state he compelled to submit, together with several small kingdoms on the sea-coast. Later, Gyges of Lydia sent an embassy with rich presents to Assyria, but at the same time made alliance with Tušamili, king of Egypt, against Aššur-bani-apli, the result being the overthrow of the Assyrian power in Egypt.

About the year 660 B.C. the Assyrian king made an expedition to try to check the inroads which were being made on the eastern border of Assyria, and then directed his forces against Ahšêri, king of Van, whom he defeated. Biriz-hadri, chief of the land Aa, and two chiefs of the Sahi, sons of Gâgl (or Gog), were next attacked and captured. Later on, affairs in Elam attracted the attention of the Assyrian king, who was obliged to send an army against Urtak, king of Elam. On being defeated, Urtak, in his mortification, committed suicide. He was succeeded by Te-Umman, who tried to kill all the relatives of the late king; and these, to escape his fury, took refuge in Assyria. On the Assyrian king refusing to give them up, war was declared. Te-Umman fell in the battle of Šnoshan, and the whole of Elam was at the mercy of the conqueror, who raised one of the fugitives, named Umman-igâš, to the throne.

For a while Assyria was at peace, but this was at last broken by Saosduchinos, brother of Aššur-bani-apli, who tried to free Babylonia from the Assyrian yoke. The Assyrians, however, were again victorious; Babylon was taken, and Saosduchinos, fearing to fall into the hands of his brother, set fire to his palace and perished in the flames (648 B.C.).

The Assyrian king next had a dispute with Umman-aldâš, who had succeeded Umman-igâš as king of Elam. An expedition was set on foot, and Elam was again conquered, and another king, named Tammarišu, was placed on the Elamite throne. The new king, however, began at once to plot against the power which had raised him, the result being that he was deposed and thrown into prison, and Umman-aldâš came back and resumed the government. Aššur-bani-apli was nevertheless determined to try to completely crush the Elamites, and to this end set another expedition on foot, the pretext being the detention by the Elamites of an image of the goddess Nanâ, carried away by an Elamite king from Erech in Babylonia 1535 years before. In every encounter the Elamites were defeated, the image of Nanâ was restored to its long-forsaken home, and Elam was completely wasted. The next and last recorded war of Aššur-bani-apli was against Uâte', king of Arabia, who, with some other Arabian princes, was taken prisoner. The Assyrian king afterwards held a thanksgiving-festival at Nineveh, in which Uâte', Tammarišu, Pa'e, and Umman-aldâš took an unenviable part, being obliged to draw the Assyrian king, in his chariot, to the temple called Bît-mašmašu, where the religious ceremony took place.

The history of the last years of this king is unknown, but it is supposed that he made,

during this period, an expedition against Tyre, whose king was deposed and an Assyrian governor appointed in his place. If he be, as is supposed, the Asnapper of the Book of Ezra iv. 10, it is probable that it was on this occasion that the nations mentioned in v. 9 were settled in the cities of Samaria. [ASNAPPER.] Assurbanipal seldom or never conducted his expeditions in person; he was, in fact, no warrior. He boasts, however, of his exploits in the hunting-field; and the sculptures representing his adventures with lions, &c., are among the best which Assyrian art has produced.

Assur-bani-apli is supposed to have been succeeded, about 626 B.C., by Assur-êtel-ilânikân, of whom nothing is known except that he reigned at least four years. The next king seems to have been Sin-âarra-iškun, who was apparently an Assyrian, though his records are written after the Babylonian model. Unfortunately, none of the inscriptions which he has left are historical. All that can be said is that the principal document bearing his name is dated in the eponymy of Daddî, the *Tukulu*,

an officer whose turn generally fell in the fifth, but sometimes also in the seventh year of a king's reign, implying that Sin-âarra-iškun had occupied the throne of Assyria for at least five years. Nineveh was, in his time, still in existence, and he calls the people over whom he ruled "a vast people," and says that the gods had caused his enemies to be slain. Assyria certainly existed in his time as a nation, and apparently as an independent power.

This king was evidently the Saracus of Syncellus,² and under him the overthrow of Nineveh took place. The history of the end is well known. Saracus, having heard that a great band of barbarians had come up from the sea to attack him, sent his general Busalossor (Nabopolassar) to Babylon. Having arrived there, he plotted against Saracus, and made alliance with the Medes, cementing it by arranging the betrothal of Nebuchadnezzar, his son, with Amuhia, a daughter of Asdabages, a Median prince. Busalossor then hastened to attack Nineveh; and when the Assyrian ruler heard of his march, he set fire to his royal palace

Assur-bani-apli or Assurbanipal hunting the lion. (Layard.)

and was burned to death. Nabopolassar (Busalossor), father of Nebuchadnezzar, received the government of the Chaldeans and of Babylon.

Until we get more certain information, it is impossible to say how the fall of Assyria really happened, but it is most likely that the above, which is that given by Eusebius from Abydenus, is correct. If, however, Nabopolassar were under the king of Assyria, it was as vassal-king of Babylon and not as a general of the Assyrian army. B.C. 606, the received date of the fall of Nineveh, was the 19th year of Nabopolassar as king of Babylon, and agrees therefore fairly with the indications furnished by the wedge-inscriptions, both of Assyria and Babylonia.

After the fall of Nineveh, Assyria was divided between Media and Babylonia, the latter power taking as her share only that part which lay along and to the west of the Euphrates. The lion's share, therefore, fell to the Medes, and this accounts at once for her silence in history and progress; for if the whole of Assyria had become annexed to Babylonia, a nation of the same tongue, religion, manners, and customs

as herself, her art and her literature would naturally have continued to flourish, and the whole history of the East in later times would probably have been different. The ravages of war must have greatly reduced the population, and the Median dominion, likely enough, caused all who could do so to flee into Babylonia (several clearly Assyrian names are to be found on the Babylonian contract-tablets), with the inhabitants of which they naturally assimilated, and thus became lost. After the conquest of Babylon by Darius Hystaspis, the country was reckoned as a part of the satrapy of Babylon, and an annual tribute of a thousand talents of silver was paid by them to their suzerain.

On the whole, the Assyrians were a remark-

² Saracus has been identified with a second Esarhad-don, who is supposed to have reigned after Sin-âarra-iškun. The identification of Saracus with Sin-âarra-iškun is however much better—*sarra*, the second element, would agree excellently, and the whole would present an abbreviation similar to that of the Babylonian king Nadiro, the full form of whose name was Nab-nadin-zêri.

able race. From a small nation—practically a colony, or a series of colonies, from Babylonian—they had risen by slow degrees to be one of the greatest, if not the greatest, of the powers of the ancient Eastern world. As the monuments and records depict them, they were brave, intelligent, and industrious; and their success and prosperity made them also proud, boastful, and cruel (see Is. x. 5-15). When they put their battle in array, and their mailed warriors marched over the lands which they invaded, great must have been the terror which they spread. The people flee before them; the cities fall into their hands as they march. The storm, the capture, the sack, the pillage, the roaring dunes, the piles of human heads, the impaled captives—all these rise before us as we contemplate their remains and read their records; and if we wish for anything more realistic, we have only to turn to the fine description of the prophet Isaiah, who, in vivid words, describes the march of the Assyrian army: "He is come to Aiath, he is passed through Migron; at Michmash he layeth up his baggage: they are gone over the pass; they have taken up their lodging at Geba: Ramah trembleth; Gibeon of Saul is fled. Cry aloud with thy voice, O daughter of Gallim! Harken, O Laishah! O thou poor Anathoth! Madmenah is a fugitive; the inhabitants of Gebim gather themselves to flee. This very day shall he halt at Nob: he shall smite his hand at the mount of the daughter of Zion, the hill of Jerusalem" (Is. x. 28-32, R. V.).

Such was the Assyrian at the height of his power, but this was not to last. In the very chapter in which Isaiah gives the above vivid word-picture, he foretells also the downfall of that nation so holden with pride. The Lord of Hosts, he prophesies, will stir up against them a scourge (x. 26), punishing the fruit of the stout heart of the king of Assyria, and the glory of his high looks (x. 12).

Nahum, who is supposed to have written about 645 B.C., devotes his whole prophecy to the Assyrians—the burden of Nineveh, their capital city. He describes the state of the "bloody city" (ch. iii.), which was vile, full of lies and rapine. Nineveh was to be laid waste (iii. 7); the shepherds of the king of Assyria were slumbering—there was none to gather in the people. There was to be no assuaging of Assyria's hurt (iii. 18, 19). The Lord would stretch forth His hand against the north, and destroy Assyria, and make Nineveh a desolation and dry like the wilderness (Zeph. ii. 13). Dreadful indeed was the retribution which fell upon the devoted country. She had been so hard, so severe, so merciless towards the lands which she had conquered, that she, in her turn, could expect but little mercy from those who, when the time came, found her at their mercy. The "cedar in Lebanon," with his fair branches (Ezek. xxxi. 3), in whose boughs all the fowls of heaven made their nests, and under whose shadow dwelt all great nations (v. 6), was cut off by strangers (the Medes and Babylonians); all the people of the earth went down from his shadow and left him, all the fowls of the heaven dwell upon his ruin (vv. 12, 13). His wide empire is departed. The nations whom he sheltered, and whom he kept in submission by the terror of his power, gladly forsook him when his glory

had departed; and those wild birds of passage, the fanatical Arabs, whose forefathers the Assyrian so often overcame, now dwell in his land; and their vigorous yet guttural language has taken the place of the soft, regular, and beautiful Assyrian tongue. There was no healing of Assyria's bruise (Nah. iii. 19). During the troubles which followed the accession of Darius Hystaspis, they attempted, in conjunction with Armenia and Media, to revolt. The result was utter failure. When the talent which had got together that mighty empire, and had kept it up, failed, the courage which had served them so well in former days gave place to despair. The mighty empire had had its day, and it sank, wounded even to death.

[T. G. P.]

ASSYRIANS (אַשּׁוּרִי; Ἀσσυρίαι, Ἀσσυρί, ἱλίοι Ἀσσυρίων; *Assur, Assyrii, filii Assyriorum*). The inhabitants of Assyria. The name in Hebrew is simply *Asshur*, the same as that of the country, and there appears to be no reason in most cases for translating it as a gentile one (Is. x. 5, 24, xiv. 25, xxxi. 8; Lam. v. 6; Ezek. xvi. 28; Jud. xii. 13, &c.).

[W. A. W.]

ASTAROTH (אַשְׁתָּרֹת; Ἀστάρωθ; *Astaroth*), Deut. i. 4. [ASHTAROTH.]

ASTAR'TE. [ASHTORETH.]

AST'TATH (Ἀστῆθ; *Ezed* [Vulg. v. 41]), 1 Esd. viii. 38, one of the chiefs who went up with Ezra the scribe from Babylon in the reign of Artaxerxes. [AZGAD.]

[W. A. W.]

ASTROLOGER. [DIVINATION; STAR.]

ASTRONOMY. [MAGI; STAR.]

ASTY'AGES (Ἀστυάγης; Herod. i. 107, Ἀστυάγης, Ctes. Ἀστιάγης), the last king of the Medes, B.C. 595-560, or B.C. 592-558, who was conquered by his grandson Cyrus (Bel and Dragon, v. 1; see *Speaker's Comm.* in loco). The name is identified by Rawlinson and Niebuhr (*Gesch. Asur's*, p. 32) with Deioces = Adjahak (*Arm.*), Aji-dahak (*Pers.*), "the biting snake," the emblem of the Median power (see *Speaker's Comm.* Excursus on Dan. v. p. 311). The passage in Bel and the Dragon states that Cyrus "received the kingdom" of Astyages on the death of the latter; Herodotus (i. 129) that Cyrus deprived him of it in battle. Cuneiform records support Herodotus. From the cylinder

U

of Nabonidus (*TSBA*. vii. pp. 146, 155, 156) it would seem that the army of Astyages (Istuvagu) revolted against him and delivered him to Cyrus (cp. Schrader, *Keilinschr. Bibl.* iii. 129). [B. F. W.] [F.]

ASUPPIM, and **HOUSE OF** (הֵיכַל אֲשַׁפִּים and בֵּית הָאֲשַׁפִּים; 1 Ch. xxvi. 15, B. *oikos* *ēsephēn*, A. *āsaḥēn*; 1 Ch. xxvi. 17, B. *ṛē* *ēsephēn*, A. *āsa-*; *domus seniorum concilium* [v. 15], *concilium* [v. 17]; R. V. "the storehouse," lit. "house of the gatherings"). Nothing is known of it except that it was the name given to certain store-chambers in the outer court of the Temple near the southern gate (Bertheau or Keil, l. c.). The Vulg. seems to have understood it of the council-chambers in the outer court of the Temple in which the elders held their deliberations. The same word in A. V. of Neh. xii. 25 (LXX. omits) is rendered "thresholds;" but rightly in R. V. "storehouses." [W. A. W.] [F.]

ASYNCRITUS (Ἀσύγκριτος; *Asyncritus*), a Christian at Rome, saluted by St. Paul (Rom. xvi. 14; see *Speaker's Comm.* in loco). [G.]

A'TAD, the threshing-floor of (אֶתֶד הָאֲתָד = "the floor [or trodden space] of the thorn;" Sam. Vers. אֶתֶד עֲטֹדָה; Saad. العوسج ;

ἄλως Ἀτὰδ, *arca Atad*), a spot "beyond Jordan," at which Joseph and his brethren, on their way from Egypt to Hebron, made their seven days' "great and very sore mourning" over the body of Jacob; in consequence of which we are told it acquired from the Canaanites the new name of Abel-Mizraim (Gen. l. 10, 11). According to Jerome (*OS.* p. 121, 15, s. v. *Arca Atath*), it was "trans Jordanem," and in his day called Beth-agla or Bethacla (Beth-Hoglah), a name which he connects with the gyratory dances or races of the funeral ceremony: "locus gyri; eo quod ibi more plangentium circumierint." But Beth-Hoglah was situated between the Jordan and Jericho, and therefore on the west side of Jordan [BETH-HOGLAH]; and this identification is not compatible with v. 11. Dillmann,* Keil,* and Delitzsch [1887] unite in placing Atad on the east side of the Jordan; and count the place otherwise unknown. [G.] [W.]

ATA'RAH (עֲטָרָה) = *a garland or crown*; B. Ἀραρά, A. 'Er-; *Attra*), wife of Jerahmeel, and mother of Onam (1 Ch. ii. 26). [W. A. W.]

ATAR'GATIS (Ἀταργάτις, Strab. xvi. p. 785, where the native pronunciation is said to be *Athara*), or according to another form of the word *DERCETO* (Δερκετώ, Strab. l. c.; Luc. *de Syria Dea*, p. 884, ed. Bened.; Plin. *H. N.* v. 19, *prodigiosa Atargatis Graecis Derceto*; Or. *Met.* iv. 45, *Dercetis*), a Syrian goddess, represented generally with the body of a woman and the tail of a fish (Luc. l. c.; Ovid, l. c., comp. *DAEON*). Her most famous temples were at Hierapolis (Mabug or *Membij*, called *Bambykē* by classical writers) and Ascalon. Herodotus identified her with *Aphrodite Urania* (i. 105, compared with Diod. Sic. ii. 4). Lucian compared her with *Here*, though he allowed that she combined traits of other deities (*Aphrodite*, *Rhea*, *Selene*, &c.; see *ASHTORETH*). Plutarch

(*Crass.* 17) says that some regarded her as "Aphrodite, others as *Here*, others as the cause and natural power which provides the principles and seeds for all things from moisture" (ἡ ἀρχὴ καὶ σπέρματα πάντων ἐξ ὑγρῶν παραχρῆσιν αἰρίαν καὶ φύσιν). This last view is probably an accurate description of the attributes of the goddess, and explains her fish-like form and popular identification with *Aphrodite*. Lucian also mentions a ceremony in her worship at Hierapolis which appears to be connected with the same belief. Twice a year water was brought from distant places and poured into a chasm in the temple; because, he adds, according to tradition, the waters of the Deluge were drained away through that opening (*de Syria Dea*, p. 883). Compare Burm. *ad Ovid, Met.* iv. 45, where most of the references are given at length; *Movers, Phoeniz.* i. 584 sq.

There was a temple of *Atargatis* (Ἀταργάτιον, A. Ἀρεγγ-2 Macc. xii. 26) at Karnion (Karnaim, 1 Macc. v. 43; i.e. *Ashtaroth-Karnaim*) which was destroyed by Judas Maccabaeus (1 Macc. v. 44).

An interesting coin representing *Atargatis* is engraved and described in the *Philosophical Transactions*, vol. lxi. pp. 346 sq.

On the coins of Hierapolis-Membij the name and figure of *Ἀταργάτις*, *Atar-jatis*, occurs, as well as the simple *Ἐτῆ*. The latter is the Greek *Edris*, made a deified queen by Antipater of Tarsus (*ap. Athen.* viii. p. 346). According to the Apology of Melito, 'Ati was the goddess of Adiabene, and *Ἐτῆ* and *Ἐτῆ* both appear as the name of a divinity in the inscriptions of Palmyra, while a deity *Ἐτῆ* or *Yakun-Athah* (cp. *Jecooniah*) is found on the coins of Membij. *Atargatis* or *Athah* was in fact the supreme goddess whose attributes the Hittites had borrowed from Babylonia, where her proper name was *Nana*. But she was also identified with *Istar*, the *Ashtoreth* of the Canaanites, who became the male deity 'Attar of the Himsyritic inscriptions, like the *Ashtar-Chemosh* of the Moabite Stone (where the compound name is similar to that of *Atar-gatis*). In Assyria *Istar*, as the planet Venus, was androgynous. The cult of the goddess spread from the Hittite capital *Carchemish* through Asia Minor, where she was known under the various names of *Kybele*, *Kybele*, *Omphale*, and the Ephesian *Artemis*. At *Carchemish* she seems also to have been called *Semi-ramis*, an Assyrian title of *Istar*, which reminds us of the Syrian goddess *Simi*, the daughter of *Hadad*, who, according to Melito, put an end to the attacks of a demon by filling the pit in which he lived with water. When the new Hierapolis at Membij succeeded to the older Hierapolis at *Carchemish* (Jerablus), the temple and cult of *Atargatis* were transferred to the new city. [A. H. S.]

ATAROTH (עֲטָרוֹת), and once עֲטָרֹת = crowns; ἡ Ἀραπόθ; *Ataroth*), the name of several places in Palestine both on the E. and W. of Jordan.

1. A. Ἀραπόν, in Num. xxxii. 3. One of the towns in the "land of Jazer and land of Gilead" (Num. xxxii. 3), "built" by the tribe of Gad (xxxii. 34). See the interesting notice in king Mesha's inscription on the "Moabite stone," lines 10-13. It is mentioned with

Dibon, and is probably *Kh. Attarús*, about six miles N.W. of *Dhibán* (Dibon). About a mile from the ruins, which are insignificant, is the mountain of *Jebel 'Attarús* (عتروس), crowned with the ruins of an ancient fortress (Istram, *Land of Moab*, pp. 271-3). A difficulty arises from the position of *J. 'Attarús*, which lies considerably to the S. of Heshbon (*Heshán*), a town assigned to Reuben, and named apparently as the southernmost limit of Gad (Josh. xiii. 26). The same difficulty, however, occurs with regard to Dibon, which was built by Gad (Num. xxxii. 34), but assigned to Reuben (Josh. xiii. 17). Atroth-Shophan was probably in the neighbourhood of Ataroth, perhaps on *J. 'Attarús*, the Shophan serving as a distinction; but for this see ATROTH.

2. A place on the boundary of Ephraim and Manasseh (Josh. xvi. 7, B. *Ἀσραῶθ*). It is mentioned between Janohah and Naarath, and as being at a lower altitude, "went down," than the former. Janohah is probably *Yanún*: the latter is placed in *OS*.² (pp. 165, 20; 268, 39) five Roman miles north of Jericho, a position which agrees with *el-Auje* (compare Josephus, *Ant.* xvii. 13, § 1). These indications place Ataroth in the Jordan Valley to the north of *Kh. Fuzail*, but the name has not been recovered.

3. A place on the south boundary of the children of Joseph (Josh. xvi. 2) mentioned next after Archi, now *Ain 'Arik*. The Versions differ here. A. V. reads "unto the borders of Archi to Ataroth," R. V. "unto the border of the Archites to A.;" and these two names are fused in the Greek, B. *Χαταροθέι*, A. *Ἀρχιαταρῶθ*. This Ataroth is probably the same as,

4. ATAROTH-ADAR, or -ADDAR (Ἱῤῥῶθ; in Josh. xvi. 5, A. *Ἀταρῶθ* [B. *Ἀσραῶθ*] καὶ Ἱῤῥῶθ [B. *Ἐρῶθ*]; in Josh. xviii. 13, B. *Μααταρῶροφ*, A. *Ἱῤῥῶθ Ἀῤῥῶθ*; *Ataroth Addar*); on the west border of Benjamin, "near the 'mountain' that is on the south side of the nether Beth-horon" (Josh. xviii. 13). In xvi. 5 it is accurately rendered Ataroth-addar. It is now *Kh. Dárich*, about a mile W.S.W. of *Beit 'Ur et-Tahta*, the nether Beth-horon (*P. F. Mem.* iii. 35).

In *OS*.² (p. 129, 25) mention is made of an Ataroth in Ephraim, in the mountains, four miles N. of Sebaste: as well as of two places of the name "not far from" Jerusalem (*OS*.² p. 129, 36). The former cannot be that seen by Robinson (ii. 265), now *Atára*. Robinson discovered another about six miles S. of Bethel (i. 575). In the Arabic chronicle of Abulfetad, of the return of the Samaritans, mention is made of *'Atarah Tarafain* as one of the places re-occupied (Ewald, iv. 108).

5. "ATAROTH, * THE HOUSE OF JOAB" (i.e. Ataroth [R. V. *Atroth*]-beth-Joab), a place (?) occurring in the list of the descendants of Judah (1 Ch. ii. 54; *Ἀταρῶθ οἴκου Ἰωάβ* [A. *Ἰωάβ*]; *Coronae domus Joab*). [G.] [W.]

A'TER (Ἱῤῥῶν, Ges.= bound or closed [cp. Judg. iii. 15,* Heb.]; B. *Ἀτῆρ*, A. *Ἀτῆρ* in *Ezra*; *Ater*). 1. The children of Ater were

among the porters or gate-keepers of the Temple who returned with Zerubbabel (*Ezra* ii. 42; Neh. vii. 45, B. *Ἱῤῥῶθ Ἀτῆρ*, *Ἱῤῥῶθ Ἀτῆρ*, A. omits the last two words). They are called in 1 Esd. v. 28 [A. *Ἀτῆρ*, B. omits], "the sons of JATAL."

2. The children of Ater of Hezekiah, to the number of ninety-eight, returned with Zerubbabel (*Ezra* ii. 16; Neh. vii. 21), and were among the heads of the people who signed the covenant with Nehemiah (Neh. x. 17, A. *Ἀτῆρ*, B. *Ἀῤῥῆρ*). The name appears in 1 Esd. v. 15 as ATEREZIAS. [W. A. W.] [F.]

ATEREZI'AS (marg. *Ater Hezekiah*; B. *Ἱῤῥῶθ Ἀτῆρ*, *Ἐξελού* [Ἱῤῥῶθ], A. *Ἀτῆρ*; *Aderectis* [Ἱῤῥῶθ]). A corruption of "Ater of Hezekiah" (1 Esd. v. 15; cp. *Ezra* ii. 15). The addition of the title (son of) Hezekiah was probably given to distinguish this Ater from Ater the door-keeper of *Ezra* ii. 42 (see *Speaker's Comm.* note on 1 Esd. v. 15). [W. A. W.] [F.]

ATHA'CH (Ἱῤῥῶθ; B. *Noó*; A. *Ἀθῶν*; *Athach*). The Syriac and Arabic Versions read, evidently in error, *Taanach*. It is mentioned only in 1 Sam. xxx. 30 as one of the towns to which David sent a portion of the Amalekite spoil. From its position in the list it would appear to have been to the south of, and not far from, Hebron; the site has not yet been recovered. It is not impossible that it is identical with *Ether*, Josh. xv. 42 (B. *Ἱῤῥῶθ*, xix. 7 (B. *Ἱῤῥῶθ*); but whether the *ch* or the *r* is correct cannot be determined (cp. Wellhausen, *Der Text d. B.B. Samuelis*, in loco). [W.]

ATHALIAH (Ἱῤῥῶθ; B. *Ἀθεῖα*, N. *Ἀθεῖα*, A. *Ἀθεῖα*; *Athalia*). A descendant of Pharez, the son of Judah, who dwelt at Jerusalem after the return from Babylon (Neh. xi. 4), called UTHAI in 1 Ch. ix. 4. [W. A. W.] [F.]

ATHALIAH. 1. Ἱῤῥῶθ; meaning doubtful; Ges., from the Arabic, = *Jah hath treated violently*; *Γεθαλία*; *Athalia*, daughter of Ahab and Jezebel. She married Jehoram the son of Jehoshaphat king of Judah, and introduced into the S. kingdom the worship of Baal, which had already defiled and overspread the N. After the great revolution by which Jehu seated himself on the throne of Samaria, she killed all the members of the royal family of Judah who had escaped his sword (2 K. x. 14), availing herself probably of her position as King's Mother [ASA], to perpetrate the crime. Most likely she exercised the regal functions during Ahaziah's absence at Jezreel (2 K. ix.), and resolved to retain her power, especially after seeing the danger to which she was exposed by the overthrow of the house of Omri and of Baal-worship in Samaria. It was not unusual in those days [and later, cp. *Speaker's Comm.* on Dan. v. 10] for women in the East to attain a prominent position, their present degradation being the result of Mahometanism. Miriam, Deborah, and Abigail are instances from the Bible, and Dido was not far removed from Athaliah, either in birthplace or date, if Carthage was founded B.C. 861 (Joseph. c. *Apion* i. 18). From the slaughter of the royal house, one infant named Joash, the youngest son of Ahaziah, was rescued by his aunt Je-

* The marginal note to this name in the Bibles of the present day, viz. *Asarites*, &c., is a corruption of *Atarites* in the edition of 1611.

hosheba, daughter of Jehoram (probably by another wife than Athaliah: cp. Joseph. *Ant.* ix. 7, § 1), who had married Jehoiaada (2 Ch. xxii. 11) the high-priest (2 Ch. xxiv. 6). The child was brought up under Jehoiaada's care, and concealed in the "house of the Lord" [R. V.] for six years, during which period Athaliah reigned over Judah. At length Jehoiaada thought it time to produce the lawful king to the people, trusting to their zeal for the worship of God, and loyalty to the house of David, which had been so strenuously called out by Asa and Jehoshaphat. After communicating his design to five "captains of hundreds," whose names are given in 2 Ch. xxiii. 1, and securing the co-operation of the Levites and chief men in the country-towns in case of necessity, he brought the young Joash into the "house of the Lord" to receive the allegiance of the soldiers of the guard. It was customary on the Sabbath for a third part of them to do duty at the palace, while two-thirds restrained the crowd of visitors and worshippers who thronged the Temple on that day, by occupying the gate of Sur (שׁוּר, 1 K. xi. 6, called "of the foundation," יְסוּד). 2 Ch. xxiii. 5. See SUR), and the gate "behind the guard" (*porta quae est post habitaculum scutarium*, Vulg.), which seem to have been the N. and S. entrances into the "house of the Lord," according to Ewald's description of it (*Geschichte*, iii. pp. 306, 307). On the day fixed for the outbreak there was to be no change in the arrangement at the palace, lest Athaliah, who did not worship in the "house of the Lord," should form any suspicions from missing her usual guard, but the other two-thirds were "to be a barrier" (2 K. xi. 6, R. V.) to protect the king's person by forming a long and closely-serried line across the "house of the Lord," and killing any one who should approach within "the ranks" (R. V.). They were also furnished with David's spears and shields, that the work of restoring his descendant might be associated with his own sacred weapons. When the guard had taken up their position, the young prince was anointed, crowned, and presented with the Testimony or Law, and Athaliah was first roused to a sense of her danger by the shouts and music which accompanied the inauguration of her grandson. She hurried into the "house of the Lord," but found Joash already standing "by a pillar," or more properly on it, i.e. on the tribunal or throne, apparently raised on a massive column or cluster of columns, which the king occupied when he attended the service on solemn occasions (cp. 2 K. xxiii. 3, and Ezek. xli. 2). She arrived however too late, and was immediately put to death by Jehoiaada's commands, without the "house of the Lord." The only other recorded victim of this almost bloodless revolution was Mattan, the priest of Baal (Ewald, *Geschichte*, iii. p. 574 sq.). Usher's date for Athaliah's usurpation is B.C. 884-878. Kamphausen corrects this (after the Assyrian Inscriptions) to B.C. 842-836. [On the text of 2 K. xi., which in parts is difficult and probably in disorder, cp. Wellh.-Bleek's *Eint.* (1878), p. 258 (= Wellh. *Compos. des Hez. u.s.w.* 1889, p. 361); Stade, *ZATW.* 1885, pp. 280-88.—S. R. D.] In modern times the history of Athaliah has been illustrated by the music of

Handel and of Mendelssohn and the stately declamation of Racine. [G. E. L. C.] [F.]

2. B. Ὀθολιάδ, A. Γοβολίας; *Otholia*. A Benjamite, one of the sons of Jeroham who dwelt at Jerusalem (1 Ch. viii. 26).

3. B. Ἀθελεί, A. Ἀθλία; *Athalia*. One of the Bene-Elam, whose son Jeshaiab with seventy males returned with Ezra in the second caravan from Babylon (Ezra viii. 7). [W. A. W.] [F.]

ATHARI'AS (Ἀρθαρίας; *et Astharas*), a corruption of תִּרְשַׁתָּה, THE TIRSHATHA (1 Esd. v. 40; see *Speaker's Comm.* in loco). [W. A. W.]

ATHENIANS (Ἀθηναῖοι; *Athenienses*), the people of Athens (Acts xvii. 21; in v. 22, "men of Athens"). [W. A. W.]

ATHENOBIUS (Ἀθηνόβιος), an envoy sent by Antiochus VII. Sidetes to Simon, the Jewish high-priest (1 Macc. xv. 28-36). He is not mentioned elsewhere. [B. F. W.]

ATHENS (Ἀθῆναι; *Athenae*), the capital of Attica, and the chief seat of Grecian learning and civilisation during the golden period of the history of Greece. This city is fully described elsewhere (*Dict. of Gr. and Rom. Geogr.* s. v.); and an account of it would be out of place in the present work. St. Paul visited it in his journey from Macedonia, and appears to have remained there some time (Acts xvii. 14, 15 sq.; cp. 1 Thess. iii. 1). At the time of St. Paul's visit, Athens was a free city of the Roman province of Achaia. "Athens was never placed under the *fascies* of the Roman governor, and never paid tribute to Rome; it always had a sworn alliance with Rome, and granted aid to the Romans only in an extraordinary and (at least as to form) voluntary fashion" (T. Mommsen's *Provinces of the Roman Empire*, i. 258). During St. Paul's residence there he delivered his memorable discourse on the Areopagus to the "men of Athens" (Acts xvii. 22-31) [AREOPAGUS]. In order to understand the localities mentioned in the sacred narrative, it may be observed that four hills of moderate height rise within the walls of the city. Of these one to the north-east is the celebrated Acropolis, or citadel, being an oblong craggy rock rising about 200 feet above the city, 350 feet above the Attic plain, and 470 feet above the level of the sea. Immediately to the west of the Acropolis, little more than half its height above the city and only 28 feet higher than the rising ground that intervenes, is a second hill of irregular form, called the Areopagus. To the south-west of the Areopagus and at a slightly lower elevation rises a third hill, the Pnyx, on which the assemblies of the citizens are generally supposed to have been held; while to the south of the Areopagus is a fourth hill, known as the Museum, whose summit is only fourteen feet lower than that of the Acropolis. According to the view maintained in Forchhammer's *Topographie von Athen*, published at Kiel in 1841, the Agora or "market" (where St. Paul disputed daily) was situated in the valley between the Acropolis, the Areopagus, the Pnyx, and the Museum, being bounded by the Acropolis on the N.E. and E., by the Areopagus on the N., by the Pnyx on the N.W. and W., and by the Museum on the S. According to this view there was only one Agora at Athens, and the

position which it probably occupied in primitive times remained unchanged (see *Dict. of Geogr.* i. p. 293 sq.). But it is now generally believed that the primitive market-place towards the S. or S.W. of the Acropolis was superseded, possibly as early as the time of the Peisistratidae, by a market-place situated in the inner Ceramicus, and lying to the N. of the Areopagus, between the Acropolis and the temple of Theseus (E. Curtius, *Attische Studien*, ii. 1865, and *Erläuternder Text der sieben Karten zur Topographie von Athen*, 1868, p. 50 and map opposite p. 55, and Dyer's *Athens*, pp. 197-206). The Agora of the time of St. Paul in 54 A.D. cannot have been different in position from the Agora described by Pausanias, who flourished 120 years later; and recent investigations make it more than probable that Pausanias began his tour of the monuments at the *Dipylum*, the principal gate of Athens, in the N.W., where the road from Eleusis and one of the roads from the Peiræus entered the precincts of the city (B. Schmidt, *Die Thorfrage in der Topographie Athens*, 1879, quoted by Lolling in I. Müller's *Handbuch der klassischen Alterthumswissenschaft*, iii. 310, 1889; see also

Milchhöfer's article on Athens in Baumeister's *Denkmäler*, i. 160). Hence it is inferred that the Agora of Pausanias, and of St. Paul, lay not to the S. but to the N. of the Areopagus.

In the "Plan of Athens" in Smith's *Classical Atlas* the '*cetus agora*' indicates that which Forchhammer regarded as the market-place from the earliest times to those of Pausanias. The '*Agora*' (in the S. W. of the *Ceramicus interior*) shows its position from the latter part of the sixth century B.C., according to the view now prevalent. Of the buildings round this later Agora, part of the Stoa Attali alone is now standing. The exact position of the other buildings is uncertain, as it depends to some extent on the question whether Pausanias approached the Agora from the *Dipylum* (as held by O. Müller and E. Curtius) or from the *Portæ Piræicæ* (as held by Leake, Bursian, Wachsmuth, and the author of the plan). The plan necessarily includes several structures of a later date than the visit of St. Paul, e.g. the *porta Hadriani*, the Odeum of Regilla, the monument of Philopappus, and the sepulchre of Herodes Atticus.

The Acropolis restored.

The remark of the sacred historian respecting the inquisitive character of the Athenians (Acts xvii. 21) is attested by the unanimous voice of antiquity. The great Athenian orator rebukes his countrymen for their love of constantly going about in the market, and asking one another, What news? (*Βούλεσθ', εἰπέ μοι, περιόυντες αὐτῶν τυθένεσθαι [κατὰ τὴν ἀγορὰν], λέγεται τι καινόν*; Dem. *Philipp.* i. § 10, p. 43, Reiske. Compare Plato's *Euthyphro*, ad init., and Theophrastus *περὶ λογοποιίας*). Their natural liveliness was partly owing to the purity and clearness of the atmosphere of Attica, which also allowed them to pass much of their time in the open air (Eurip. *Medea*, 829, and Cicero, *de Fato*, iv. § 7, "Athenis tenuè cælum, ex quo etiam actiones putantur Attici." Cp. Aristides, *Panathenæicus*, i. 305 Dindorf).

The remark of St. Paul upon the "somewhat superstitious" character of the Athenians (xvii. 22, R.V.; in marg. Or, *religious*) is in like manner confirmed by the ancient writers. Thus Pausanias says that the Athenians surpassed all other states in the attention which they paid to the worship of the gods (*Ἀθηναῖοι περισσώτερον*

τι ἢ τοῖς ἄλλοις ἐς τὰ θεῖά ἐστι σπουδῆς, Paus. i. 24, § 3); and hence the city was crowded in every direction with temples, altars, and other sacred buildings. The altar "To the Unknown God" (Acts xvii. 23. R. V. in text, "To an Unknown God"), which St. Paul mentions in his address, has been spoken of under ALTAR. On St. Paul's visit in general, see Conybeare and Hewson's *Life and Epistles of St. Paul*, chap. x.

In Athens was a synagogue in which St. Paul disputed with the Jews (Acts xvii. 17). Among the Attic inscriptions (*Inscr. Att. Aetatis Rom.* 404) is one engraved upon a stone and containing the Greek Version of Ps. cxviii. 18 (*ἀβρὴ ἡ πόλη τοῦ Κυρίου, κ.τ.λ.*). It is possible, but not certain, that this may have formed part of the gate to the synagogue. Another Jewish inscription found at Athens is surmounted by a representation of the seven-branched candlestick (*Inscr. Att.* 3546. Cp. Marshall, "The Account of St. Paul at Athens," in *PSBA.* x. p. 282).

Of the Christian Church founded by St. Paul at Athens, we have no particulars in the N. T.;

but, according to ecclesiastical tradition (Euseb. *H. E.* iii. 4), Dionysius the Areopagite, who was converted by the preaching of the Apostle, was the first bishop of the Church. [DIONYSIUS.]

Near the N.E. extremity of the Areopagus is the site of the ancient church named after Dionysius, mentioned as follows by the Jesuit Père Babin in 1672: "L'Archevêque a son logis sur les anciens fondemens de la maison de *S. Denys Areopagite*, joignant les ruines d'une petite Eglise fort ancienne, dont les mazzures et murailles paroissent encore toutes embellies de diverses peintures, et proche de laquelle est un puits, où l'on assure que *S. Paul* demeura caché 24 heures, dans une persécution que ses ennemis excitèrent contre lui, après la conversion de ce Seinteur de l'Areopage." Cp. Laberde, *Athènes*, i. 192; Wheler's *Travels*, p. 384; Stuart's *Athens*, ii. p. 17; Leake's *Athens*, p. 165; A. Mommsen, *Athenae Christianae*, pp. 42, 43; Gregorovius, *Stadt Athen im Mittelalter*, i. 69.

ATH'LAI (Ἀθλαί) [Ges. = abbreviated from Ἀθλῆαι, ATHALIAH; B. Θαλά, N. Θαλεῖν, A. Ὀθαλί, Athalai]. One of the sons of Bebai, who put away his foreign wife at the bidding of Ezra (Ezra [LXX. 2 Ed.] x. 28); called AMATHEIS in 1 Ed. ix. 29. [W. A. W.] [F.]

ATÍPHA (Ἀτεφά; Agisti), 1 Ed. (Vulg. 3 Ed.) v. 32 [HATÍPHA]. One of the heads of the "servants of the Temple" who returned with Zerubbabel. [W. A. W.] [F.]

ATONEMENT, THE DAY OF (ἡμέρα ἐξιλασμοῦ; *dies expiationum* and *dies propitiationis*; in the Talmud, מְוִלָּה, i.e. *the day*, or מַגֵּד מְוִלָּה, i.e. *the great fast*, to distinguish it from fasts appointed after the Captivity; in Philo, ἡ νηστεία ἐορτή, *Lib. de Sept.* vol. v. p. 47, edit. Tauchn.; in Acts xxvii. 9, ἡ νηστεία, the great day of national humiliation, and the only one commanded in the Mosaic Law. [FASTS.] This day gathered up and consummated the various injunctions of purification previously described (Lev. xi.-xv.). The mode of its observance, partly indicated in Ex. xxx. 10, is described in Lev. xvi., where it should be noticed that in vv. 3 to 10 an outline of the whole ceremonial is given, while in the rest of the chapter certain points are mentioned with more details. The victims which were offered in addition to those strictly belonging to the special service of the day, and to those of the usual daily sacrifice, are enumerated in Num. xxix. 7-11; and the conduct of the people is emphatically enjoined in Lev. xxiii. 26-32; Deut. xxix. 7-11.

It was kept on the tenth day of Tiari (the seventh month); that is, from the evening of the ninth to the evening of the tenth of that month, five days before the joyous Feast of Tabernacles, for which festival, as for the Jubilee year (Lev. xxv. 9), it formed a most fitting preparation. [FESTIVALS.] Some have inferred from Lev. xvi. 1, that the day was instituted on account of the sin and punishment of Nadab and Abihu. Maimonides (*Moré Nevuchim*, xviii.) regards it as a commemoration of the day on which Moses came down from the

mount with the second tables of the Law, and proclaimed to the people the forgiveness of their great sin in worshipping the golden calf. In any case Lev. xvi. 29, &c., gives the general object of the institution.

III. The observances of the day, as described in the Law, were as follows. It was kept by the people as a solemn sabbath (σάββατα σαββάτων, LXX.). They were commanded to set aside all work and "to afflict their souls," or fast, under pain of being "cut off from among the people." It was on this occasion only that the high-priest was permitted to enter into the Holy of Holies. Having bathed his person and dressed himself entirely in the holy white linen garments, he brought forward a young bullock for a sin-offering and a ram for a burnt-offering, purchased at his own cost, on account of himself and his family, and two young goats for a sin-offering with a ram for a burnt-offering, which were paid for out of the public treasury, on account of the people. He then presented the two goats before the Lord at the door of the Tabernacle (R. V. "tent of meeting"), and cast

lots upon them. On one lot יְהוֹזָבָב (i.e. for *Jehovah*) was inscribed, and on the other אַזָּזֶל (i.e. for *Azazel*. See § VI.). He next sacrificed the young bullock as a sin-offering for himself and his family. Taking with him some of the blood of the bullock, he filled a censer with burning coals from the brazen altar, took a handful of incense, and entered into the most holy place. He then threw the incense upon the coals and enveloped the mercy-seat in a cloud of smoke. Then, dipping his finger into the blood, he sprinkled it seven times before the mercy-seat, eastward.*

The goat upon which the lot "for *Jehovah*" had fallen was then slain, and the high-priest sprinkled its blood before the mercy-seat in the same manner as he had done that of the bullock. Going out from the Holy of Holies, he purified the holy place, sprinkling some of the blood of both the victims on the altar of incense.^b At

* See Lev. xvi. 14. The English Version (A. V. and R. V.), "upon the mercy-seat," if opposed to every Jewish authority, is supported by modern criticism (see *Speaker's Comm.* in loco). The Vulgate omits the clause; the LXX. follows the ambiguity of the Hebrew. The word *eastward* must mean either the direction in which the drops were thrown by the priest, or else *the east* (R. V.) of the ark, i.e. the side towards the veil. The last clause of the verse may be taken as a repetition of the command, for the sake of emphasis on the number of sprinklings: "seven times shall he sprinkle the blood with his finger before the mercy-seat."

^b That the altar of incense was thus purified on the Day of Atonement we learn expressly from Ex. xxx. 14. Most critics consider that this is what is spoken of in Lev. xvi. 18, 20. But some suppose that it is the altar of burnt-offerings which is referred to in those verses, the purification of the altar of incense being implied in that of the holy place mentioned in v. 16 (see *Speaker's Comm.* in loco). The arguments pro and con are briefly stated in Riehm's *HWB.* and Herzog's *RE* s. v. *Verzöhnungstag*. That the expression, "the altar before the Lord," does not necessarily mean the altar within the Tabernacle, is evident from Ex. xxix. 11. If the golden altar is here referred to, it seems remarkable that no mention is made in the ritual of the cleansing of the brazen altar. But perhaps the practice spoken of by Josephus and in the Mishna of pouring what remained

this time no one besides the high-priest was suffered to be present in the holy place.

The purification of the Holy of Holies, and of the holy place, being thus completed, the high-priest laid his hands upon the head of the goat on which the lot "for Azazel" had fallen, and confessed over it all the sins of the people. The goat was then led, by a man chosen for the purpose, into the wilderness, into "a land not inhabited," and was there let loose.

The high-priest after this returned into the holy place, bathed himself again, put on his usual garments of office, and offered the two rams as burnt-offerings, one for himself and one for the people. He also burnt upon the altar the fat of the two sin-offerings, while their flesh was carried away and burned outside the camp. They who took away the flesh and the man who had led away the goat had to bathe their persons and wash their clothes as soon as their service was performed.

The accessory burnt-offerings mentioned in Num. xxix. 7-11, were a young bullock, a ram, seven lambs, and a young goat. It would seem that (at least in the time of the second Temple) these were offered by the high-priest along with the evening sacrifice (see below, § V. 7).

It will be seen that in the special rites of the Day of Atonement there was a natural gradation. In the first place the high-priest and his family were cleansed; then atonement was made by the purified priest for the sanctuary and all contained in it; then for the brazen altar in the court; and lastly, reconciliation was made for the people.

IV. In the short account of the ritual of the day which is given by Josephus (*Ant.* iii. 10, § 3) there are a few particulars which are worthy of notice. His words of course apply to the practice in the second Temple, when the ark of the covenant had disappeared. He states that the high-priest sprinkled the blood with his finger seven times on the ceiling and seven times on the floor of the most holy place, and seven times towards it (as it would appear, outside the veil), and round the golden altar. Then going into the court he either sprinkled or poured the blood round the great altar. He also informs us that the kidneys, the top of the liver, and the extremities (*al ḥḳḳal*) of the victims were burned with the fat.

V. The treatise of the Mishna, entitled *Yoma*,⁴ professes to give a full account of the observances of the day according to the usage in the second Temple. The following details appear either to be interesting in themselves or to illustrate the language of the Pentateuch.

1. The high-priest, dressed in his coloured official garments, used himself, on the Day of Atonement, to perform all the duties of the ordinary daily service, such as lighting the lamps, presenting the daily sacrifices, and offering the incense. After this he bathed himself, put on the white garments, and commenced the special rites of the day. There is nothing in the Old Testament to render it improbable that this was the original practice.

2. The high-priest went into the Holy of Holies four times in the course of the day: first, with the censer and incense, while a priest continued to agitate the blood of the bullock lest it should congregate; secondly, with the blood of the bullock; thirdly, with the blood of the goat; fourthly, after having offered the evening sacrifice, to fetch out the censer and the plate which had contained the incense. These four entrances, forming, as they do, parts of the one great annual rite, are not opposed to a reasonable view of the statement in *Lev.* ix. 7 and of that in Josephus, *Bell. Jud.* v. 5, § 7. Three of the entrances seem to be very distinctly implied in *Lev.* xvi. 12, 14, and 15.

3. It is said that the blood of the bullock and that of the goat were each sprinkled eight times, once towards the ceiling and seven times on the floor. This does not agree with the words of Josephus (see above, IV.).

4. After he had gone into the most holy place the third time, and had returned into the holy place, the high-priest sprinkled the blood of the bullock eight times towards the veil, and did the same with the blood of the goat. Having then mingled the blood of the two victims together and sprinkled the altar of incense with the mixture, he came into the court and poured out what remained at the foot of the altar of burnt-offering.

5. Most careful directions are given for the preparation of the high-priest for the service of the day. For seven days previously he kept away from his own house and dwelt in a chamber appointed for his use. This was to avoid the accidental causes of pollution which he might meet with in his domestic life. But to provide for the possibility of his incurring some uncleanness in spite of this precaution, a deputy was chosen who might act for him when the day came. In the treatise of the Mishna entitled *Pirke Avoth*, it is stated that no such mischance ever befel the high-priest. But Josephus (*Ant.* xvii. 6, § 4) relates an instance of the high-priest Matthias, in the time of Herod the Great, when his relation Joseph took his place in the sacred office. During the whole of the seven days the high-priest had to perform the ordinary sacerdotal duties of the daily service himself, as well as on the Day of Atonement. On the third day and on the seventh he was sprinkled with the ashes of the red heifer in order to cleanse him in the event of his having touched a dead body without knowing it. On the seventh day he was also required to take a solemn oath before the elders that he would alter nothing whatever in the accustomed rites of the Day of Atonement.⁴

6. Several curious particulars are stated regarding the scapegoat. The two goats of the sin-offering were to be of similar appearance, size, and value. The lots were, originally, of boxwood, but in later times they were of gold. They were put into a little box or urn, into which the high-priest put both his hands and took out a lot in each, while the two goats stood

⁴ This, according to the Jerusalem Gemara on *Yoma* (quoted by Lightfoot), was instituted in consequence of an innovation of the Sadducean party, who had directed the high-priest to throw the incense upon the censer outside the veil, and to carry it, smoking, into the Holy of Holies.

⁴ The mixed blood at the foot of the large altar, was an ancient one, and was regarded as its purification.

* Published in a handy and separate form by Strack, Berlin, 1889.

before him, one at the right side and the other on the left. The lot in each hand belonged to the goat in the corresponding position, and when the lot "for Azazel" happened to be in the right hand, it was regarded as a good omen. The high-priest then tied a piece of scarlet cloth on the scapegoat's head, called "the scarlet tongue," from the shape in which it was cut. Maimonides says that this was only to distinguish him, in order that he might be known when the time came for him to be sent away. But in the Gemara it is asserted that the red cloth ought to turn white, as a token of God's acceptance of the atonement of the day, referring to Is. i. 18. A particular instance of such a change, when also the lot "to Azazel" was in the priest's right hand, is related as having occurred in the time of Simon the Just. It is further stated that no such change took place for forty years before the destruction of Jerusalem. The prayer which the high-priest uttered over the head of the goat was as follows:—"O Lord, the house of Israel, Thy people, have trespassed, rebelled, and sinned before Thee. I beseech Thee, O Lord, forgive now their trespasses, rebellions, and sins which Thy people have committed, as it is written in the law of Moses, Thy servant, saying that in that day there shall be 'an atonement for you to cleanse you that ye may be clean from all your sins before the Lord'" (Gemara on *Yoma*, quoted by Frischmuth). The goat was then gilded and rudely treated by the people till it was led away by the man appointed. As soon as it reached a certain spot, which seems to have been regarded as the commencement of the wilderness, a signal was made, by some sort of telegraphic contrivance, to the high-priest, who waited for it. The man who led the goat is said to have taken him to the top of a high precipice and thrown him down backwards, so as to dash him to pieces. If this was not a mistake of the writer of *Yoma*, it must have been, as Spencer argues, a modern innovation. It cannot be doubted that the goat was, originally, set free. Even if there be any uncertainty in the words of the Hebrew, the rendering of the LXX. must be better authority than the Talmud—*καὶ ἐξαποστείλων τὸν χίμαρον τὸν δισταλμένον εἰς ὄρεσιν κ. τ. λ.* (Lev. xvi. 26).

7. The high-priest, as soon as he had received the signal that the goat had reached the wilderness, read some lessons from the Law, and offered up some prayers. He then bathed himself, resumed his coloured garments, and offered either the whole, or a great part, of the accessory offering (mentioned in Num. xxix. 7-11) with the regular evening sacrifice. After this, he washed again, put on the white garments, and entered the most holy place for the fourth time, to fetch out the censer and the incense-plate. This terminated the special rites of the day.

8. The Mishna gives very strict rules for the fasting of the people. In the Law itself no express mention is made of abstinence from food. But it is most likely implied in the command that the people were "to afflict their souls." According to *Yoma*, every Jew (except invalids and children under 13 years of age) is forbidden to eat anything so large as a date, to drink, or to wash from sunset to sunset.

VI. There has been much discussion regarding

the meaning of the word Azazel. The opinions which seem most worthy of notice are the following:—

1. It has been regarded as a designation of the goat itself. This view has been most favoured by the old interpreters. They in general supposed it to mean the goat sent away, or let loose (as though = *לֵּילִי יָד, the going goat*). In accordance with this Symmachus renders it, *ὁ πρῶτος ἀπορχόμενος*; Aquila, *ὁ πρῶτος ἀποχέμενος*; the Vulgate, *capre emissarius*; Luther, *der ledige Bock*; the English translators, *the scapegoat*, &c. The LXX. uses the term *ἀπορχομαῖος*, applied to the goat itself. Theodoret and Cyril of Alexandria consider the meaning of the Hebrew to be the goat sent away, and regard that as the sense of the word used in the LXX. If they were right, *ἀπορχομαῖος* is, of course, not employed in its ordinary meaning (*Atteruncus*: see Suicer, s. r.). It should also be observed that in the latter clause of Lev. xvi. 10 the LXX. renders the Hebrew term as if it was an abstract noun, translating *לֵּילִי יָד* by *εἰς τὴν ἀπορχομήν* (F. *ἀπορχομαῖα*).

But the application of *לֵּילִי יָד* to the goat itself involves the Hebrew text in insuperable difficulties. It can hardly be supposed that the prefix which is common to the designation of the two lots should be used in two different meanings. If one expression is to be rendered for *Jehorah*, it would seem that the other must be for *Azazel*, with the preposition in the same sense. If this is admitted, it does not seem possible to make sense out of Lev. xvi. 10, 26, if Azazel be taken for the goat itself. In these verses the Versions are driven to strange shifts. We have already referred to the inconsistency of the LXX. In the Vulgate and our own Version the first clause of v. 10 stands "enjus (sc. hirci sors) autem in caprum emissarium"—"but the goat on which the lot fell to be the scapegoat" (R. V. "for Azazel"). In v. 26 our Version reads, "And he that let go the goat for the scapegoat" (R. V. "for Azazel"), while the Vulgate cuts the knot to escape from the awkward tautology—"ille vero, qui dimisit caprum emissarium."

2. Some have taken Azazel for the name of the place to which the goat was sent. (a) Aben Ezra quotes the words of an anonymous writer referring it to a hill near Mount Sinai. Vatablus adopts this opinion (*Critici Sacri*, in Lev. xvi.). (b) Some of the Jewish writers, with Le Clerc, consider that it denotes the cliff to which the goat was taken to be thrown down, according to *Yoma*. (c) Bochart regarded the word as a pluralis fractus signifying *distant places*, and understood it as a general name for any fit place to which the goat might be sent. But Gesenius remarks that the pluralis fractus, which exists in Arabic, is not found in Hebrew, and he objects also to the tautology.

3. Most modern critics take Azazel for a personal being to whom the goat was sent.

(a) Gesenius gave to *לֵּילִי יָד* the same meaning as the LXX. has assigned to it, if *ἀπορχομαῖος* is to be taken in its usual sense; but the being so designated he supposed to be some false deity who was to be appeased by such a sacrifice as

that of the goat. He derived the word from a root unused in Hebrew, but found in Arabic,

أَزَلَ, to remove or take away (*Heb. Lex. s. v.*). Ewald, Oehler, H. Schultz, Riehm, Delitzsch, and Dillmann adopt a similar view, supposing Azazel to be the name of an evil spirit popularly supposed to hare its dwelling in the desert (cp. *Lev. xvii. 7, R. V. marg.; Is. xiii. 21, xxiv. 14.*) (b) Others have regarded it as denoting the devil himself. In the Book of Enoch (vi. 7, viii. 14, xiii. 14, lxix. 2) the name Azazel is given to one of the fallen angels; and assuming, with Spencer, that this is a corruption of Azazel, if the book were written, as is generally supposed, by a Jew, c. B.C. 160 (see *Speaker's Comm.* on *Apocrypha*, i. p. 173, n. 7), it represents an old Jewish opinion on the subject. Origen, adopting the word of the LXX., identifies him with the devil: ἔτι τε ἐν τῷ Λευιτικῷ ἀποκομπαῖος διή Ἑβραϊκῇ γραφῇ ὠνόμασεν Ἀζαζήλ, οὗδεις ἕτερος ἦν (sc. ἡ δὲ διδδοχοῦ; c. *Cels. vi. p. 305, ed. Spenc.*), and Spencer and Hengstenberg have most elaborately defended the same opinion. Spencer supposes that the goat was given up to the devil, and committed to his disposal. Hengstenberg affirms with great confidence that Azazel cannot possibly be anything but another name for Satan. He repudiates the conclusion that the goat was in any sense a sacrifice to Satan, and does not doubt that it was sent away laden with the sins of God's people, now forgiven, in order to mock their spiritual enemy in the desert, his proper abode, and to symbolize by its free gambols their exulting triumph. He considers that the origin of the rite was Egyptian, and that the Jews substituted Satan for Typhon, whose dwelling was the desert. The obvious objection to Spencer's view is that the goat formed part of a sin-offering to the Lord, and that it, with its fellow, had been formally presented before the Lord at the door of the Tabernacle. Few, perhaps, will be satisfied with Hengstenberg's mode of meeting this difficulty.

4. To obviate the objections which have been felt in supposing the goat to have been sent to an evil spirit or demon, it has been proposed

to treat **אִזְאֵזֶל** as an appellative, and to render "for dismissal" (*R. V. marg.*). Thus under-

stood, the word would come from **אִז** (the root adopted by Gesenius), being the Pealal form, which indicates intensity. This view is held by Tholuck (quoted and approved by Thompson), by Bähr, and by Winer. The objection to it is (1) that the antithesis "to

Jehovah" suggests strongly that **אִזְאֵזֶל** is a designation of a personal being; (2) that the Pealal form indicates intensity of a very peculiar kind (*Gea.-Kautsch, § 53, 3; Stade, Lehrb. § 156*), such as would not be probable in such a connexion as the present.

On the whole the opinion that Azazel is a personal name is the most probable, though the precise derivation must remain uncertain, as Azazel seems not to be a genuinely Hebrew word. With Dillmann (note on *Lev. xvi. 10*) and Driver (*Expositor*, 1885, p. 214 sq.) it is sufficient to recognise here the survival of an older stage of religious belief, probably Egyptian,

engrafted upon or accommodated to the sacrificial system of the Hebrews.

VII. The Talmudist view of the Day of Atonement in *Yoma* (cap. viii.) is sound and edifying: "The Day of Atonement and death work atonement where there is penitence. Penitence itself makes atonement for slight transgressions, and in the case of grosser sins it obtains a respite until the Day of Atonement comes and works reconciliation. If a man say, 'I will continue to sin, and repent on the Day of Atonement,' no opportunity shall be given him of completing his repentance. Or if he say, 'I will sin and the Day of Atonement will make it right,' that Day will bring him no atonement." Authorities quoted by Frischmuth (p. 917) seem to indicate that the peculiar atoning virtue of the day was supposed to rest in the scapegoat.

Philo (*Lib. de Septenario*) regarded the day in a very noble light. He spoke of it as an occasion for the discipline of self-restraint in regard to bodily indulgence, and for bringing home to our minds the truth that man does not live by bread alone, but by whatever God is pleased to appoint. The prayers proper for the day, he says, are those for forgiveness of sins past and for amendment of life in future, to be offered in dependence, not on our own merits, but on the goodness of God.

It cannot be doubted that what especially distinguished the symbolical expiation of this day from that of the other services of the Law, was its broad and national character, with perhaps a deeper reference to the sin which belongs to the nature of man. Ewald instructively remarks that though the least uncleanness of an individual might be atoned by the rites of the Law which could be observed at other times, there was a consciousness of secret and indefinite sin pervading the congregation, which was aptly met by this great annual fast. Hence, in its national character, he sees an antithesis between it and the Passover, the great festival of social life; and, in its atoning significance, he regards it as a fit preparation for the rejoicing at the ingathering of the fruits of the earth in the Feast of Tabernacles. Philo looked upon its position in the Jewish calendar in the same light.

In considering the meaning of the particular rites of the day, three points appear to be of a very distinctive character. 1. The white garments of the high-priest. 2. His entrance into the Holy of Holies. 3. The scapegoat. The writer of the Epistle to the Hebrews (ix. 7-25) teaches us to apply the first two particulars. The high-priest, with his person cleansed and dressed in white garments, was himself the best outward type which a living man could present in his own person of that pure and Holy One Who was to purify His people and to cleanse them from their sins.

But respecting the meaning of the scapegoat, we have no such light to guide us, and (as has been already implied in what has been stated regarding the word Azazel) the subject is one of great doubt and difficulty.

Of those who take Azazel for the Evil Spirit, some have supposed that the goat was a sort of bribe, or retaining fee, for the accuser of men. Spencer, in supposing that it was given up with its load of sin, to the enemy to be tormented

made it a symbol of the punishment of the wicked; while, according to the strange notion of Hengstenberg, that it was sent to mock the devil, it was significant of the freedom of those who had become reconciled to God.

Some few of those who have held a different opinion on the word Azazel, have supposed that the goat was taken into the wilderness to suffer there vicariously for the sins of the people. But it has been generally considered that it was dismissed to signify the carrying away of their sins, as it were, out of the sight of Jehovah.*

If we keep in view that the two goats are spoken of as parts of one and the same sin-offering, and that every circumstance connected with them appears to have been carefully arranged to bring them under the same conditions up to the time of the casting of the lots, we shall not have much difficulty in seeing that they form together but one symbolical expression. Why there were two individuals instead of one may be simply this—that a single material object could not, in its nature, symbolically embrace the whole of the truth which was to be expressed. This is implied in the reasoning of the author of the Epistle to the Hebrews on the office and sacrifice of Christ (Heb. ix.). Hence some, regarding each goat as a type of Christ, supposed that the one which was slain represented His death, and that the goat set free signified His resurrection (Cyril, Bochart, and others, quoted by Spencer). But we shall take a simpler and perhaps a truer view, if we look upon the slain goat as setting forth the act of sacrifice, in giving up its own life for others "to Jehovah," in accordance with the requirements of the Divine law; and the goat which carried off its load of sin "for complete removal" (§ vi. 4), as signifying the cleansing influence of faith in that sacrifice. Thus in his degree the devout Israelite might have felt the truth of the Psalmist's words, "As far as the east is from the west, so far hath he removed our transgressions from us" (Ps. ciii. 12). But for us the whole spiritual truth has been revealed in historical fact, in the life, death, and resurrection of Him Who was made sin for us, Who died for us, and Who rose again for our justification. This Mediator, it was necessary, should, "in some unspeakable manner, unite death and life" (Maurice on Sacrifice, p. 85).

Lev. xvi., the chief passage dealing with the ritual and meaning of the Day of Atonement, forms part of what is now usually called the Priests' Code (see BIBLE, p. 427). This Code dates, according to the Book of Leviticus itself, from the time of Moses; according to Dillmann, from the 9th cent. B.C.; according to Wellhausen, from after the time of the Exile. The subject generally is discussed elsewhere [FASTS, FEASTS]; a few words only are introduced here with reference to this special holy day. One of the arguments urged in favour of a late date and late composition is the *argumentum c silentio*. No allusion to the fast is said to be found, outside of the Pentateuch, till the days of Simon the High Priest (Ecclus. i. 1-5; i.e. in the 3rd cent. if Simon I. be intended, or in the 2nd cent. if Simon II. See *Speaker's Comm.* on Apocrypha, Intro. to Ecclus. i. ii.), and all mention of it is absent from certain passages in the historical and prophetic Books, where it is thought mention should have been made. The *argumentum c silentio* is always precarious, and a careful examination of the context and bearings of the passages in question (e.g. 1 K. viii. 2, 65; Ezra iii. 1-6; Neh. viii.; Ezek. xiv. 18-20; Zech. vii. 8) does not by any means support the view that allusion to the great day was requisite. [F.]

ATROTH (אֶתְרוֹת = *crowns of*), a city of Gad, named with Aroer and Jaazer (Num. xxxii. 35). No doubt the name should be taken with that following it, Shophan; the addition serving to distinguish this place from the Ataroth in the same neighbourhood, and mentioned in r. 34. The Vulgate has *Etroth et Sophan*; A. V. "Atroth, Shophan;" R. V. more correctly, *Atroth-shophan*. In the LXX. reminiscences of Shophan alone remain (B. Σοφάν, A. γῆρ Σωφάν. F. Σωφάν). It was perhaps on *Jebel Attarus*, N.W. of *Dhibān*, Diban [ATAROTH]. [G.] [W.]

AT'TAI (אֶתַי; B. 'Eṯṯai, A. 'Iṯṯai; *Ethi*). 1. Grandson of Sheshan the Jerahmeelite through his daughter Ahlai, whom he gave in marriage to Jarha, his Egyptian slave (1 Ch. ii. 35, 36). His grandson Zabab was one of David's mighty men (1 Ch. xi. 41).

2. B. 'Eṯṯai, A. 'Eṯṯai; *Ethi*. One of the lion-faced warriors of Gad, captains of the host, who forded the Jordan at the time of its overflow, and joined David in the wilderness (1 Ch. xii. 11).

3. B. 'Iṯṯai, A. -i; *Ethi*. Second son of king Rehoboam by Maachab the daughter of Absalom (2 Ch. xi. 20). [W. A. W.] [F.]

* In the similar part of the rite for the purification of the leper (Lev. xiv. 6, 7), in which a live bird was set free, it must be evident that the bird signified the carrying away of the uncleanness of the sufferer in precisely the same manner.

ATTALIA (*Ἀττάλεια*; *Attalia*), a coast-town of Pamphylia, mentioned only very casually in the New Testament (Acts xiv. 25), as the place from which Paul and Barnabas sailed on their return to Antioch from their missionary journey into the inland parts of Asia Minor. It does not appear that they made any stay, or attempted to preach the Gospel in Attalia. This city, however, though comparatively modern at that time, was a place of considerable importance in the 1st century, and has continued to exist till now. Its name in the 12th century was *Satalia*, a corruption, of which the crusading chronicler, William of Tyre, gives a curious explanation. It is now called *Adalia*, and sometimes *Antalia*.

Attalus Philadelphus, king of Pergamum, ruled over the western part of the peninsula from the N. to the S., and was in want of a port which should be useful for the trade of Egypt and Syria, as Troas was for that of the Aegean. Thus Attalia was built and named after the monarch. It occupies a fine site, and probably soon became, as it is now, the chief port on the south coast of Asia Minor. It appears to have had close relations with Perga. There are many inscriptions and ruins of the Roman period.

There has been considerable doubt concerning the exact position of Attalia. There is a discrepancy even between Strabo and Ptolemy, the former placing it to the W. of the river Catarrhactes, the latter to the E. This may probably be accounted for by the peculiar character of this river, the calcareous waters of which are continually making changes in the channels. Beaufort thought that the modern *Adalis* is the ancient Olbia, and that *Laara* is the true Attalia. Forbiger, after Mannert, is inclined to identify the two places. But Spratt and Forbes found the true Olbia further to the west, and have confirmed Leake's opinion, that Attalia is where the modern name would lead us to expect to find it (Beaufort's *Karamania*; Spratt and Forbes' *Lycia*; *Dict. of G. and R. Geog.*, art. *ATTALEIA*). [J. S. H.] [W.]

ATTALUS (*Ἀττάλος*, a Macedonian name of uncertain origin), the name of three kings of Pergamum who reigned respectively B.C. 241-197, 159-138 (Philadelphus), 138-133 (Philometor). They were all faithful allies of the Romans (Liv. xlv. 13); and the last-named appointed the Romans his heirs. It is uncertain whether the letters sent from Rome in favour of the Jews (1 Macc. xv. 22) were addressed to Attalus II. (Polyb. xxv. 6, xxxi. 9, xxxii. 3, 5, 8, &c., 25 f.; Strab. xiii. 4; Just. xxv. 1, xxvi. 4, 5; App. *Mith.* 62) or Attalus III., as their date falls in B.C. 139-8 [LUCIUS], about the time when the latter succeeded his uncle. Josephus quotes a Pergamene decree in favour of the Jews (*Ant.* xiv. 10, § 22) in the time of Hyrcanus (c. B.C. 112); cp. Rev. ii. 12-17. [B. F. W.]

ATTHARATHES (*Ἀτθάρης*; *Atharathes*), 1 Esd. ix. 49 (see *Speaker's Comm.* in loco); a corruption of the title "the Tirshatha" (cp. Neh. viii. 9); cp. *ATHARIAS*. [W. A. W.]

AU'GIA (*Αὐγία*; om. in Vulg.). The daughter of Berzelus, or Barzillai, according to 1 Esd. v. 38 (the names in the LXX. are different).

Her descendants by Addus were among the priests whose genealogy could not be substantiated after the return from Babylon. The name does not occur in the lists of Ezra or Nehemiah. [W. A. W.]

AUGUSTUS (*Αὐγούστος*, Luke ii. 1; *Σεβαστός*, Acts xxv. 21 and 25; *Augustus*). In Luke ii. 1 the name designates Octavian, who first bore the title, and is generally known in history as Augustus. In the two references in Acts "Augustus" is simply equivalent to "emperor," and is so rendered in R. V. to avoid the confusion which might arise from the A. V. "Augustus." The emperor there intended is Nero. Augustus (Octavian) is mentioned by St. Luke as the author of the decree which was the occasion of Joseph's journey to Bethlehem. For the decree and questions connected with it, see CYRENIUS. Only a very short sketch of Octavian's life can be given here. He was born B.C. 63. His father was Caius Octavius, and his mother Atia, daughter of Julia, sister to C. Julius Caesar, the dictator. Having lost his father while young, he came under the charge of his great uncle Julius. After the murder of his uncle, the young C. Octavius succeeded to a great part of his wealth, and, being adopted into the gens Julia, was thenceforth known as C. Julius Caesar Octavianus, and no longer as C. Octavius. He fought for the Republic against Antony at Mutina; but soon we find him marching upon Rome, and extorting his election to the consulship, B.C. 43. Sent to defend the Republic against Antony and Lepidus, he met them in friendly conference near Bononia, and formed with them a triumvirate for the government of the empire. They divided among themselves the provinces and the legions. After the deposition of Lepidus the West was entirely in the hands of Octavian. His final struggle with Antony for the supreme power could not long be delayed. It was decided by his naval victory at Actium, B.C. 31, and the suicide of Antony. On Octavian's return to Rome, B.C. 29, instead of surrendering his military command (*imperium*) he retained with the name of Imperator the permanent control of all the military forces of the empire. By virtue of this control, together with the principate of the senate, the consulate, the tribunician power, &c., he was in fact, though not in name, the absolute master of the state. The offices and forms of the Republic were retained to give a popular colour to the government of an irresponsible ruler. For a detailed account of this system, see Merivale, *Hist. Emp.* xxii. No single title expressed the aggregate of powers combined in Octavian's person; but the honorific epithet Augustus conferred on him, B.C. 27, marked his unique position, and was inherited by his successors, e.g. Nero, as in the passages quoted (Acts xxv. 21, 25). The title—for such it became—was closely connected with the growing opinion of the sacredness of the prince's person, which culminated in emperor-worship. Dion says that Augustus took the title as "being (himself) something more than human." This aspect of the title is emphasized in the alternative Greek form *Σεβαστός* (cp. Dion Cass. liii. 16 and 18, quoted by Westcott, *Epp. St. John*, The Church and the World, where see whole passage, pp. 255-

269). Merivale says, "The adjunct, though never given to a man, had been applied to things most noble, most venerable, most divine. The rites of the gods were called august, the temples were august."

The principal point of contact between Augustus and Jewish history lies in the support and favour which he gave to Herod the Great. Immediately after the defeat at Actium of his early patron Antony, Herod contrived to ingratiate himself with Augustus, and before long received back Jericho, which Antony had taken away, with considerable additions of territory, B.C. 30 (Jos. *Ant.* xv. 6, § 5 sq., and 7, § 3). Other marks of favour followed, and Josephus, writing of a later period, said that, next to Agrippa, Augustus preferred no one to Herod. In compliance with the custom of emperor-worship mentioned above, Herod built temples in his patron's honour at Pnium (Caesarea Philippi) and at Caesarea Sebaste.

Medal of Augustus. (British Museum.)

Augustus was well disposed towards the nation, as well as its ruler. With his wife he presented wine-flacons to the Temple at Jerusalem (Jos. *B. J.* v. 13, § 6); and Josephus gives an edict of his, granting the fullest security and religious liberty to the Jews in Asia and Libya (*Ant.* xvi. 6, § 2). For the par-

tition by Augustus of Herod's dominions, see ARCHELAUS. He died at Nola in Campania, A.D. 14, in his seventy-sixth year, and was succeeded by Tiberius. For a fuller account, see AUGUSTUS, *Dict. Biogr. and Mythol.* [E. R. B.]

AUGUSTUS' BAND (Acts xxvii. 1). [ARMY, p. 247 a.] [G.]

AURANUS (Ἰσ Αὐράνος), leader of a riot at Jerusalem (2 Macc. iv. 40). In the LXX. B. and in the Vulgate the name is rendered *vis τυράννος*, *quidam tyrannus*. [W. A. W.]

AUTE'AS (Τ' Αὐτάλας; Vulg. omits), name of a Levite who taught the Law under Ezra (1 Esd. ix. 48). [HODIJAH.] [W. A. W.]

AVA (Ἀβὰ = Αἶα; *Aia*; *Acak*), a place at present unknown in the empire of Assyria, from which colonies were brought to re-people the cities of Samaria after the deportation of the Jews (2 K. xvii. 24). From the names in connexion with which it is introduced, some think it the same place as Ivah. [IVAH.] Schrader (*KAT.* p. 281) notes that the name has not yet been found in the inscriptions. [F.]

AV'ARAN (Ἀβάρων; *Abaron*), surname of Eleazar, brother of Judas Maccabaeus (1 Macc. ii. 5). [ELEAZAR, 8.] [W.]

AVEN (Ἄβεν = *nothingness*; *Av*; *idolum*). 1. The "plain of Aven," marg. "Bikath-nven"; R. V. "Valley of A." (*Ἀβεν*) is mentioned by Amos (i. 5), in his denunciation of Aram (Syria) and the country to the N. of Palestine. It has not been identified with certainty. Mi-

chaelis (notes on Amos) heard from a native of Damascus of a valley near that city, called Un, and he quotes a Damascene proverb referring to it; but the information was at best suspicious, and has not been confirmed, although the neighbourhood of Damascus has been tolerably well explored by Burckhardt (App. iv.) and by Porter. The Prophet, however, would seem to be alluding to some principal district of the country, of equal importance with Damascus itself; and so the LXX. have understood it, taking the letters as pointed *Ἄβεν*, and expressing it in their version as *ἄβεν* 'Av. By this they doubtless intended the great plain of Lebanon, Coele-syria, in which the renowned idol temple of Baalbek or Heliopolis was situated, and which still retains the very same name by which Amos and Joshua designated it, *el Bakk'a*. This name is also applied to a "fine large valley" six hours south of Jerash (Van de Velde, *Map*; and Lindsay, p. 278). The application of Aven as a term of reproach or contempt to a flourishing idol sanctuary, and the play or paronomasia therein contained, is quite in keeping with the manner of Amos and of Hosea. The latter frequently applies the very same word to Bethel. [BETHAVEN.]

2. In Hos. x. 8, "the high places of Aven" (*Ἄβεν*; *ἄβεν*; *ἄβεν*; *exalta* *idoli*), the word is clearly a contraction of Beth-aven; that is, Bethel (ep. iv. 15, &c. See *Speaker's Comm.* i. l.).

3. In Ezek. xxx. 17, A. V. and R. V. "Aven" (A. V. marg. *Heliopolis*); *Ἄβεν* (Cornill). In this manner are pointed the letters of the name which is elsewhere given as On, *Ἄβεν*, the sacred city of Heliopolis or On, in Egypt. [OX.] The LXX. and Vulgate both render it accordingly, *Ἡλιουπόλις*, *Heliopolis*. The intention of the prophet is doubtless to play upon the name in the same manner as Amos and Hosea. See above (1). [G.] [W.]

AVIM, AVIMS, or AVITES (Ἀβὶμ = the Avvim, as in R. V.; of *Εὐαίμ*, the word elsewhere used by the LXX. for Hivites; *Hevæi*). 1. An early, but perhaps not an aboriginal^b people among the inhabitants of Palestine, whom we meet with in the S.W. corner of the sea-coast, whither they may have made their way northwards from the Desert (Stanley, *Sinai and Pal.* App. § 83). The only notice of them which has come down to us is contained in a remarkable fragment of primeval history preserved in Deut. ii. 23. Here we see them "dwelling in 'the' villages" (or nomad encampments—*Chatzerim*) in the S. part of the Shefela, or great western lowland. "as far as Gaza." In these rich possessions they were attacked by the invading Philistines, "the Caphtorim which came forth out of Caphtor," and who "destroyed" them, and "dwelt in their stead." The remains of them are spoken of in Josh. xiii. 3, 4, "the Avvim on

^a It is characteristic of the looseness of the A. V. that this name is given differently each time it occurs, and that they are all inaccurate.

^b According to Ewald (*Geschichte*, I. 310) and Bertheau, the Avvim were an *Erwolk* of Palestine proper. They may have been so, but there is nothing to prove it, while the mode of their dwellings points rather to the desert as their origin.

the south" (so R. V., with LXX., Pesh., Vulg., Dillm., Keil) as dwelling south of the Philistines.

Nothing more is told us of this ancient people. Possibly a trace of their existence is to be found in the town "Avim" (accurately, as in the other cases, "the Avvim") which occurs among the cities of Benjamin (Josh. xviii. 23), and which may have preserved the memory of some family of the extinct people driven up out of their fertile plains to take refuge in the wild hills of Bethel; just as in the "Zemaraim" of the preceding verse we have probably a reminiscence of the otherwise forgotten Zemarites. [ZEMARAIM.] But, on the other hand, it is possible that the word in this place is but a variation or corruption of the name of Ai. [So Dillmann. Keil remarks that the site of Avvim is unknown.—S. R. D.] [A.]

2. The people of Avva, among the colonists who were sent by the king of Assyria to inhabit the depopulated cities of Israel (2 K. xvii. 31). [AVA.] They were idolaters, worshipping gods called Nibhaz and Tartak. [G.] [W.]

AVITH (עֵיִת); A. Γεθθίμ, in Gen.; in 1 Ch. B. Γεθθίμ; A. Γεθθίμ; *Avith*, the city of Hadad ben-Bedad, one of the kings of Edom before there were kings in Israel (Gen. xxxvi. 35; 1 Ch. i. 46; in the latter passage the text [Chetib] has עֵיִת, which in the *Keri* is corrected to agree with the reading in Genesis). The name may be compared with *el-Ghoveithel*

(الغويطة) a "chain of low hills," mentioned by Burckhardt (p. 375) as lying to the E. of the district of *Kerek* in Moab (Dillmann, *Genesis*, l. c.). [G.] [W.]

AWL (מַצֵּט; *ματρίον*; *subula*), a tool of which we do not know the ancient form. The only notice of it is in connexion with the custom of boring the ear of the slave (Ex. xxi. 6; Deut. xv. 17). [W. L. B.]

AXE. Seven Hebrew words are thus rendered in the A. V.

1. מַחֲרֵט, *Garzen*, from a root signifying "to cut or sever," as "hatchet," from "back," corresponds to the Lat. *securis*. It consisted of a head of iron (cp. Is. x. 34), fastened, with thongs or otherwise, upon a handle of wood, and so liable to slip off (Deut. xix. 5; 2 K. vi. 5). It was used for felling trees (Deut. xx. 19), and also for shaping the wood when felled, or rather perhaps for hewing stone, as on the Siloam Inscription, (1 K. vi. 7).

2. מַחֲרֵב, *Chereb*, which is usually translated "sword," is used of other cutting instruments, as a "knife" (Josh. v. 2) or razor (Exek. v. 1), or a tool for hewing or dressing stones (Ex. xx. 25), and is once rendered "axe" (Exek. xxvi. 9; R. V. marg., Heb. *swords*), evidently denoting a weapon for destroying buildings, a pickaxe.

3. מַשֶּׁל, *Cassil*, occurs but once (Ps. lxxiv. 6), and is evidently a later word, denoting a large axe. It is also found in the Targum of Jer. xvi. 22.

4. מַגְזֵרָה, *Magzérâh* (2 Sam. xii. 31), and

5. מַגְזֵרָה, *Megérâh* (1 Ch. xx. 3), are found in the description of the punishments inflicted by David upon the Ammonites of Rabbah. The

word מַגְזֵרָה is found twice in this verse; once in the singular, where it is translated by A. V. and R. V. "saws," and once in the plural, where it is translated by A. V. and R. V. "axes." Some have thought 5 an error of the transcriber for 4.

Egyptian Axes or Hatchets. (Thebes and in the Brit. Museum.)

6. מַצֵּד, *Ma'dtsâd*, rendered "axe" in the text of R. V. and in the margin of the A. V. of Is. xlv. 12, and in Jer. x. 3 (A. V. and R. V.). This was an instrument employed both by the ironsmith and the carpenter, and is supposed to be a curved knife or bill, smaller than

7. מַכְרֵם, *Kardôm*, a large axe used for felling trees (Judg. ix. 48; 1 Sam. xiii. 20, 21; Ps. lxxiv. 5; Jer. xlv. 22).

The words 1 and 5 have an etymological affinity with each other, the idea of cutting being that which is expressed by their roots. The "battle-ax," מַכְרֵם, *mappêts* (Jer. li. 20), was probably, as its root indicates, a heavy mace or maul (R. V. marg.), like that which gave a surname to a "Maccabee" or to Charles Martel. [W. A. W.]

Assyrian Axe.

AZ'ÆL (Ἀζαήλ; *Ezelus*), father of the Jonathan who with Ezechias undertook the rectification of the matter of the strange mar-

riages (1 Esd. ix. 14. On the difficulty connected with the passage, see note in *Speaker's Comm.*). [ASAHEL.] [W. A. W.] [F.]

AZAE'LUS (B. Ἀζαῆλος, A. Ἀζαήλ; *Dielus*), an Israelite in the time of Esdras; the name is thought to be a repetition of that preceding it, Ezriel (1 Esd. ix. 34. See note there in *Speaker's Comm.*). [W. A. W.] [F.]

A'ZAL (Atzel, אֶזֶל, in pause אֶזֶל, R. V. *Azel*; T. יֵאֶזֶל, A. Ἀζαήλ; *usque ad proximum*), a name only occurring in Zech. xiv. 5. It is mentioned as the limit to which the "ravine" or cleft (נֶחֱלִי) of the Mount of Olives will extend when "Jehovah shall go forth to fight." Nothing more is known about it; but it is thought by many to be identical with Beth-ezel (Mic. i. 11). Against the view that it is an appellative, see Keil, i. l. [G.] [S. R. D.]

AZALI'AH (אֶזְלִיָּה, Ges. = *Jah hath set apart or reserved*; B. Ἐλίας, A. Ἐσσελίας in K., BA. Σελιὰ in 2 Ch.; *Asia, Eselias*). The father of Shaphan the scribe under Josiah (2 K. xxii. 3; 2 Ch. xxxiv. 8). [W. A. W.] [F.]

AZANI'AH (אֶזְנִיָּה = *Jah heareth*; B. Ἀζανεία, A. -νία, N. -νιήλ; *Azanis*). The father or near ancestor of Jeshua the Levite in the time of Nehemiah, one who sealed the covenant (Neh. x. 9). [W. A. W.] [F.]

AZA'PHION (B. Ἀσσαφειῶν, A. Ἀσαφειῶν; *Sephegus*), 1 Esd. v. 33. Possibly a corruption of SOPHERETH (E. V. l. c. marg.). One of the descendants "of the servants of Solomon" who went up from the Captivity. [W. A. W.] [F.]

AZ'ARA (Ἀζαρά; *Attre*), one of the "servants of the Temple" (1 Esd. v. 31). No corresponding name can be traced in the parallel list in Ezra. [W. A. W.]

AZAR'AEL (the same name as the succeeding one; אֶזְרָאֵל; B. Ὀζεῖλ, N. Ὀζεῖλ [ο superse.]; *Azareel*), a Levite musician among those who "went on the right hand upon the wall" in the solemn dedication of the walls (Neh. xii. 36). [W. A. W.] [F.]

AZAR'EEL (אֶזְרָאֵל = *El hath helped*; B. Ὀζεῖλ, A. Ἐλῖλ; *Azareel*). 1. A Korhite who joined David in his retreat at Ziklag (1 Ch. xii. 6).

2. B. Ἀζαρίδ, A. Ἐζρήλ. A Levite musician of the family of Heman in the time of David, 1 Ch. xxv. 18; called UZZIEL in xxv. 4.

3. B. Ἀζαράλ, A. Ἐζρήλ; *Ezrihel*. Son of Jeroham, and prince of the tribe of Dan when David numbered the people (1 Ch. xxvii. 22).

4. B. Ἐζεῖλ, A. Ἐζρήλ, N. Ἐσρήλ; *Ezriel*. One of the sons of Bani, who put away his foreign wife on the remonstrance of Ezra (Ezra x. 41); apparently the same as ESRIL (1 Esd. ix. 34).

5. B. Ἐσδρήλ, A. Ἐζρήλ (N has here some additions. See Swete's text in Neh. i. c.); *Azrael*. Father, or ancestor, of Maasai, or Amashai, a priest who dwelt in Jerusalem after the return from Babylon (Neh. xi. 13; cp. 1 Ch. ix. 12). [W. A. W.] [F.]

AZARI'AH (אֶזְרִיָּה, אֶזְרִיָּה; Ἀζαρίας; *Azarius*; = *whom Jah hath helped*). It is a common name in Hebrew, and especially in the families of the priests of the line of ELIAZAR, whose name has a similar meaning to AZARIAH. It is nearly identical, and is often confounded with Ezra as well as with Zerariah and Seraiah. The principal persons who bore this name were:—

1. B. Ζαρεῖδ, A. Ἀζαρία. Son of Ethan, of the sons of Zerah, where, perhaps, Zerariah is the more probable reading (1 Ch. ii. 8).

2. Son of Ahimaaz (1 Ch. vi. 9). He appears from 1 K. iv. 2 to have succeeded Zadok, his grandfather, in the high-priesthood, in the reign of Solomon, Ahimaaz having died before Zadok. [AHIMAAS.] To him, it can scarcely be doubted, instead of to his grandson, Azariah the son of Johanan, belongs the notice in 1 Ch. vi. 10, "He it is that executed the priest's office in the Temple that Solomon built at Jerusalem," meaning that he officiated at the consecration of the Temple, and was the first high-priest that ministered in it. The other interpretation which has been put upon these words, as alluding to the Azariah who was high-priest in Uzziah's reign, and who resisted the king when he attempted to offer incense, is quite unsuited to the words they are meant to explain, and utterly at variance with the chronology. For this Azariah of 1 Ch. vi. 10 precedes Amariah, the high-priest in Jehoshaphat's reign, whereas Uzziah was king five reigns after Jehoshaphat. Josephus merely mentions Azarias as the son and successor of Ahimaaz.

3. The son of Johanan (1 Ch. vi. 10, 11). He must have been high-priest in the reigns of Abijah and Asa, as we know his son Amariah was in the days of Jehoshaphat, the son of Asa. It does not appear what part he took in Asa's zealous reformation (2 Ch. xv.), nor whether he approved the stripping of the House of God of its treasures to induce Benhadad to break his league with Baasha king of Israel, as related in 2 Ch. xvi., for his name and his office are never alluded to in the history of Asa's reign, either in the Books of Kings or Chronicles. The active persons in the religious movement of the times were the king himself and the two prophets,—Azariah the son of Obed, and Hanani. The silence concerning Azariah, the high-priest, is, perhaps, rather unfavourable than otherwise to his religious character. His name is almost lost in Josephus's list of the high-priests. Having lost, as we saw in the article AMARIAH, its termination AZ, which adhered to the following name, it got by some process transformed into Ἰσος.

4. The high-priest in the reign of UZZIAH, tenth king of Judah (2 K. xiv. 21; xv. 1, 6, 7, 8, 17, 23, 27; 1 Ch. iii. 12). The most memorable event of his life is that which is recorded in 2 Ch. xxvi. 17–20. When king Uzziah, elated by his great prosperity and power, "transgressed against the Lord his God, and went into the Temple of the Lord to burn incense upon the altar of incense," Azariah the priest, accompanied by eighty of his brethren, went in boldly after him, and withstood him. With unflinching faithfulness, and a high sense of his own responsibility as

ruler of the House of God, he addressed the king with the well-merited reproof—"It appertaineth not unto thee, Uzziah, to burn incense unto the Lord, but to the priests the sons of Aaron, that are consecrated to burn incense: go out of the sanctuary, for thou hast trespassed: neither shall it be for thine honour from the Lord God." And it is added that when "Azariah the chief priest and all the priests looked upon him, behold he was leprous in his forehead, and they thrust him out from thence; yea himself hasted to go out, because the Lord had smitten him." Uzziah was a leper onto the day of his death, and, as such, was never able again to go to the Lord's House, which he had so presumptuously invaded. Azariah was contemporary with Isaiah the Prophet, and with Amos and Joel, and doubtless witnessed the great earthquake in Uzziah's reign (Amos i. 1; Zech. xiv. 5). He is not mentioned in the list of Josephus. *Ἰούριος* occurs instead; possibly the name of the prophet inadvertently substituted for that of the high-priest. Neither is he in the priestly genealogy of 1 Ch. vi.

5. The high-priest in the days of Hezekiah (2 Ch. xxxi. 10-13). He appears to have co-operated zealously with the king in that thorough purification of the Temple and restoration of the Temple-services which was so conspicuous a feature in Hezekiah's reign. He especially interested himself in providing chambers in the House of the Lord in which to store the tithes and offerings and consecrated things for the use of the priests and Levites, and in appointing overseers to have the charge of them. For the attendance of priests and Levites, and the maintenance of the Temple-services, depended entirely upon the supply of such offerings, and whenever the people neglected them the priests and Levites were forced to disperse themselves to their villages, and so the House of God was deserted (cp. Neh. x. 35-39; xii. 27-30, 44-47). His name seems to be corrupted into *Νηρίας* in Josephus. He succeeded Urijah, who was high-priest in the reign of Abaz. Who his successor was is uncertain. He is not, any more than the preceding, included in the genealogy of 1 Ch. vi.

6. Another Azariah is inserted between Hilkiyah, in Josiah's reign, and Seraiah, who was put to death by Nebuchadnezzar (1 Ch. vi. 13). But Josephus does not acknowledge him, making Seraiah the son of Hilkiyah, and there seems to be scarcely room for him. It seems likely that he may have been inserted to assimilate the genealogy to that of Ezra vii. 1, where, however, the Seraiah and Azariah are probably neither of them the high-priests of those names.

7. Several other priests and Levites of this name occur, as (a) Son of Zephaniah and ancestor of Elkanah, taken by some to be the father of Samuel the prophet (1 Ch. vi. 36). (b) Son of Hilkiyah in the genealogy of Ezra (Ezra vii. 1; 1 Ch. ix. 11, called Seraiah in Neh. xi. 11). (c) One of the leaders of the children of the province who went up with Zerubbabel from Babylon (Neh. vii. 7); elsewhere called Seraiah (Ezra ii. 2) and ZACHARIAS (1 Esd. v. 8). (d) Son of Maaseiah, one of the priests, "the men of the plain," who repaired a

portion of the wall (Neh. iii. 23, 24). (e) A Levite who assisted Ezra in instructing people in the knowledge of the Law (Neh. viii. 7), called AZARIAS in 1 Esd. ix. 43. (f) One of the priests who sealed the covenant with Nehemiah (Neh. x. 2), and probably the same as the Azariah who assisted in the dedication of the city wall (Neh. xii. 33). (g) Two other Levites (2 Ch. xxix. 12) in the days of Hezekiah; one the father of Joel the Kohathite, the other the son of Jehalelel the Merarite.

8. B. 'Opveid, B. -ia, A. 'Açaplar. A chief officer of Solomon, the son of Nathan, perhaps David's grandson (1 K. iv. 5).

9. *עזריה*. Son of Jehoahaphat king of Judah (2 Ch. xxi. 2); not to be confounded with his brother, also called Azariah (*אֲזַרְיָהּ*). B. omits; A. inserts it once, after Zacharias).

10. The original name of Abed-nego (Dan. i. 6, 7, 11, 19). He appears to have been of the seed-royal of Judah, and for this reason selected, with Daniel and his other two companions, for Nebuchadnezzar's special service. The "three children," as they were called, were remarkable for their beauty, wisdom, knowledge, and intelligence. They were not less remarkable for their piety, their strict adherence to the Law of Moses, the steadfastness of their faith even unto death, and for their wonderful deliverance.

11. Azariah, the son of Oded (2 Ch. xv. 1; in v. 8 there is some error in the text), was a remarkable prophet in the days of king Asa, and a contemporary of Azariah the son of Johanan the high-priest, and of Hanani the seer. He powerfully stirred up the spirit of Asa, and of the people of Judah and Benjamin, in a brief but pithy exhortation, which has been preserved, to put away all idolatrous worship, and to restore the altar of the one true God before the porch of the Temple. Great numbers of Israelites from Ephraim, Manasseh, Simeon, and all Israel, joined in the national reformation, to the great strengthening of the kingdom; and a season of rest and great prosperity ensued. Oded, the prophet in the days of Ahaz, may probably have been a descendant of Azariah.

12. At 2 Ch. xxii. 6, Azariah is a clerical error for Ahaziah (A. V. and R. V. marg.; B. 'Oxoçlar; *Ochorias*).

13. Several other persons of this name are mentioned as belonging to different tribes, as e.g. (a) The son of Jehu of the family of the Jerahmeelites, and descended from Jarha the Egyptian slave of Sheshan (1 Ch. ii. 34, 38). He was probably one of the captains of hundreds in the time of Athaliah mentioned in 2 Ch. xxiii. 1, and there called the son of Obed. His name is very important, as marking clearly the time when the genealogy in 1 Ch. ii. 36-41 was made out, viz. in Hezekiah's reign; for Azariah would be about one generation older than Joash. Now there are six generations after Azariah in that genealogy, ending with Elishama, and, counting Joash, there are from Joash to Hezekiah also six generations, viz. Joash, Amaziah, Uzziah, Jotham, Ahaz, Hezekiah. Elishama, therefore, was contemporary with Hezekiah. Zabad, in 1 Ch. ii. 36, 37, we know too from xi. 41, to have been a contemporary of David. (b) In the same passage (2 Ch. xxiii. 1) is another Azariah, the son of Jeroham, and also one of the captains of Judah in the time of Athaliah.

(c) A. 'Αζάριος, B. Οὐδεδ, son of Johanan, one of the captains of Ephraim in the reign of Abaz, who sent back the captives and spoil that were taken in the invasion of Judah by Pekah (2 Ch. xxviii. 12). (d) A son of Hoshaiah, Jer. xliii. 2; cp. Neh. xii. 32, 33; called JEZANIAH in Jer. xlii. 1. [A. C. H.] [W. A. W.] [F.]

AZARIAS ('Αζάριος; *Azarias*). 1. 1 Esd. ix. 21, elsewhere called **UZZIAH** (Ezra x. 1). 2. 1 Esd. ix. 43 = **URIAH** (Neh. viii. 4). 3. 1 Esd. ix. 48, elsewhere called **AZARIAH** (Neh. viii. 7). 4. *Azareus*, priest in the line of Esdras (2 Esd. i. 1), elsewhere **AZARIAH** and **EZERIAS**. 5. Name assumed by the Angel Raphael (Tob. v. 12; vi. 6, 13; vii. 8; ix. 2). 6. A captain in the army of Judas Maccabaeus (1 Macc. v. 18, 56, 60). [W. A. W.]

A'ZAZ (אִזָּז = *strong*; 'Οζούζ; *Azaz*), a Reubenite, Bela's father (1 Ch. v. 8). [W. A. W.]

AZAZEL, the marginal rendering in A. V. of the "scape-goat" of the text (Lev. xvi. 8). The R. V. puts *Azazel* in the text, and inserts "Or, dismissal" in the margin. See **ATONEMENT**, DAY OF, § VI. [F.]

AZAZI'AH (אִזָּזִיָּה = *whom Jah hath strengthened*; BM. 'Οζίας, A. -ias; *Ozazi*). 1. A Levite musician in the reign of David, appointed to play the harp in the service when the ark was brought up from the house of Obed-Edom (1 Ch. xv. 21). 2. The father of Hosea, prince of the tribe of Ephraim when David numbered the people (1 Ch. xxvii. 20). 3. A. 'Οζαζάς; *Azarias*. One of the Levites in the reign of Hezekiah who had charge of the tithes and dedicated things in the Temple under Cononiah and Shimei (2 Ch. xxi. 13). [W. A. W.]

AZBAZ'ARETH (A. 'Ασβαζαρέθ, B. 'Ασβαζαρέθ; *Asbazareth*), king of the Assyrians (1 Esd. v. 69; LXX. c. 66). In Ezra iv. 2 the name is Esar-baddon (A. 'Ασραβδδών, B. 'Ασραβδδών), of which Asbazareth may be (?) a corruption (see *Spencer's Comm.* on 1 Esd. v. 69). The A. V. of 1611 spells the name more correctly Asbazareth. [W. A. W.] [F.]

AZBU'K (אִזְבּוּק; B. 'Αζαβούκ, N. 'Αζαβού, A. 'Αζβούκ; *Azbo*). Father or ancestor of Nehemiah the prince of part of Bethzur (Neh. iii. 16). [W. A. W.]

AZE'KAH (אִזְעָה, from a root signifying to dig or till the ground,* see Gesen. s. v.; 'Αζηκά, usually; *Azeka*), a town of Judah, with dependent villages ("daughters") lying in the Shefelah or rich lowland, a situation quite in accordance with the derivation of the name given above. It is named (Josh. xv. 35, B. 'Iaζηκά) in the same group with Jarmuth, Adullam, and Socoh; places which have been identified with *Kh. el-Yarmūk, Kh. Aid el-Mā and Kh. Shuweikeh*. In 2 Ch. xi. 9, 10, Azekah, Zorah, and Aijalon are named in succession, the two last being now *Sūrah* and *Yaló*; and it may be inferred from 1 Sam. xvii. 1, that it was not far from Shochoh (*Shuweikeh*), and that a valley separated the two places. [SHOCHOH.] Joshua's pursuit of the

Canaanites after the battle of Beth-horon extended to Azekah (Josh. x. 10, 11). Between Azekah and Shochoh, an easy step out of their own territory, the Philistines encamped before the battle in which Goliath was killed (1 Sam. xvii. 1). It was among the cities fortified by Rehoboam (2 Ch. xi. 9), was still standing at the time of the invasion of the kings of Babylon (Jer. xxxiv. 7), and is mentioned as one of the places re-occupied by the Jews after their return from Captivity (Neh. xi. 30).

The indications contained in the above passages seem necessarily to place Azekah at Tell Zakariya, or Zakariya, S.E. of 'Ain Shems, an identification already proposed by Schwarz (p. 102) and Van de Velde. This agrees with the statements of Eusebius and Jerome (OS⁴ pp. 125, 22; 238, 16) that the place lay between (ἀνὰ μέσον) Eleutheropolis and Jerusalem, i.e. on the Roman road from the former place which passed through Zakariya, 'Ain Shems, and Bethlehem to Jerusalem (PEF. Map). For Tell Zakariya and Zakariya, see PEF. Mem. ii. 441 and iii. 27. [G.] [W.]

A'ZEL (אֶזֶל, in pause אֶזֶל; 'Ezál, usually; *Asel*), a descendant of Saul (1 Ch. viii. 37, 38, ix. 43 [B. 'Ezál], 44 [N. 'Ezál, dis]). [W.]

A'ZEM (אֶזֶם, in pause אֶזֶם, a bone; B. 'Ασώμ, 'Iasón; A. 'Ασέμ, 'Ασώμ; *Ezem, Asen*; R. V. *Ezem, dis*), a city in the extreme south of Judah (Josh. xv. 29), afterwards allotted to Simeon (xix. 3). [EZEM.] [G.] [W.]

AZEPHU'RITH (B. 'Αρπεφουρίθ, A. 'Αρσφφ-; Vulg. omits), 1 Esd. v. 16: the head of a family whose sons returned to Jerusalem after the Captivity. The name answering to this in the list of Ezra (ii. 18) is Jorah, and in Nehemiah (vii. 24) is Hariph; and it has been conjectured that Azephurith arose from a transcriber's mistaken combination of the two names. The uncial Z of the second syllable was in that case confounded with E. [W. A. W.]

AZE'TAS ('Αζήτας; *Zelas*), the name of the head of a family which returned with Zerubbabel (1 Esd. v. 16). The name is absent from the lists of Ezra and Nehemiah. [W. A. W.]

AZ'GAD (אִזְגָּד; Ges. *Thes.* = *powerful is Gad*, i.e. the god Fortune; cp. Nöldeke. ZDMG., 1888, p. 479: *Azgad*). The children of Azgad, 1222 in number (Ezra ii. 12 [B. 'Ασγδδ, A. 'Αβγδδ]; 2322 in Neh. vii. 17 [B. 'Ασγδδ, N. 'Ασγδδ, A. 'Αγερδδ], were among "the men of the people of Israel" who returned with Zerubbabel. A second detachment of 110, with Johanan at their head, accompanied Ezra in the second caravan (Ezra viii. 12, B. 'Ασρδδ, A. 'Αγρδδ). With the other heads of the people they joined in the covenant with Nehemiah (Neh. x. 15, B. 'Ασγδδ, A. 'Αγρδδ). The name appears as SADAS in 1 Esd. v. 13 (B. 'Ασγδδ, A. 'Ασρδδ), and the number of the family is there given as 3222. In 1 Esd. viii. 38 it is written ASTATH ('Ασρδδ). [W. A. W.] [F.]

AZI'A (B. 'Οζέλος, A. -i-; *Ozius*), a Temple servant (1 Esd. v. 31), who returned with Zerubbabel, called Uzza in Ezra ii. 49. [W. A. W.]

* The verb occurs only in Is. v. 2, where it is rendered in the A. V. "fenced;" but by Gesenius, in his *Jesaja*, "grub ihn um;" R. V. "made a trench about it."

AZIEL (*Asiel*). 1. One of the ancestors of Edras (2 Esd. i. 2), elsewhere called **AZARAH** (Ezra vii. 3) and **EZIAS** (1 Esd. viii. 2).

2. **אֲזִיֵּל**; B. *Ὀζιήλ*, A. -r; *Oziel*. A Levite skilled in the use of the psalter (1 Ch. xv. 20). The name is a shortened form of **JAAZIEL** (**יֵאֲזִיֵּל**, 1 Ch. xv. 18). [W. A. W.] [F.]

AZIZA (**אֲזִיזָה**; B. *Ὀζιζά*, A. *Ὀζιζά*; *Aziza*). A layman of the family of Zattu, who had married a foreign wife after the return from Babylon (Ezra x. 27): called **SARDEUS** in 1 Esd. ii. 28 (A. *Σαρδάριος*, B. *Σερδαλίης*). [W. A. W.]

AZMA'VETH (**אֲזַמְוֶת**, Ges. *Thes.* perhaps = *Amor* is *Death*; B. *Ἀσμάθ*, B. *Ἀσμάθ*, A. *Ἀσμάθ* [2 Sam.]; B. *Ἀσμάθ*, A. *Ἀσμάθ* [1 Ch.]; *Azmaveth*, *Azmooth*). 1. One of David's mighty men, a native of Bahurim (2 Sam. xxiii. 31; 1 Ch. xi. 33), and therefore probably a Benjamite.

2. *Azmooth*. A descendant of Mephibosheth, or Nerib-baal (1 Ch. viii. 36 [B. *Σαλμῶν*, A. *Ἀσμάθ*], ix. 42 [B. *Γαζαῶν*, A. *Ἀσμάθ*]).

3. B. *Ἀσμάθ*, A. *Ἀσμάθ*. The father of Jeziel and Pelet, two of the skilled Benjamite slingers and archers who joined David at Ziklag (1 Ch. xii. 3), perhaps identical with 1. It has been suggested that in this passage "sons of Azmaveth" may denote natives of the place of that name.

4. B. *Ἀσμάθ*, A. *Ἀσμάθ*. Overseer of the royal treasures in the reign of David (1 Ch. xvii. 25). [W. A. W.] [F.]

AZMA'VETH (**אֲזַמְוֶת**; A. *Ἀσμάθ*, B. *Ἀσμάθ* [Ezra]; *Azmaveth*), a place to all appearance in Benjamin, being named with Anathoth, Kirjath-Jearim, and other towns belonging to that tribe. Forty-two of the Bene-Azmaveth returned from the Captivity with Zerubbabel (Ezra ii. 24). The "sons of the singers" seem to have settled round it (Neh. xii. 29, *ἄνθρωποι Ἀσμάθ*, B. omits). The name elsewhere occurs as **BETH-AZMAVETH** and **BETH-SAMOS**. Azmaveth does not make its appearance in the lists in Joshua, but the name was borne by several Benjamites of the kindred of Saul (1 Ch. viii. 36, ix. 42, xii. 3; in the last passage Bene-A. may merely denote natives of the place, especially as natives of Anathoth, Gibeah, &c. are mentioned in the same verse). In Neh. xii. 29 it is mentioned in close connexion with Geba, and it is now probably *Hizmech*, a village between *Anāta*, Anathoth, and *Jeb'a*, Geba (PEF. Mem. iii. 9). [G.] [W.]

AZMON (**אֲזַמֹּן** or **אֲזַמֹּן**; B. *Ἀσμωνά*, A. *Ἀσμωνά* [Num. v. 4]; B. *Σελμῶνα*, A. *Ἀσμωνά* [Josh.]; *Azmona*), a place named as being on the S. boundary of the Holy Land, apparently near the torrent of Egypt (*Wādī el-'Arish*) (Num. xxxiv. 4, 5 [A. *Σελμῶνα*, F. *Ἀσμωνά*]; Josh. xv. 4). It has not yet been identified; but was possibly at, or near, *Ἀλ. Lussán* at the S.W. corner of the Negeb. It is mentioned by Eusebius and Jerome (OS² pp. 123, 25; 236, 56), but evidently was not actually known to them. Knobel (*Ex. Hbb.* xiii. 414) compares the name with that of the *Azázimeh*, an Arab tribe at the S. end of the *Negeb*. In the Targum Jon. it is rendered by *Ḳessam*, which

Schwarz (p. 23) would identify with *W. Kusaimch*, S. of *Birein*. [G.] [W.]

AZ'NOTH-TA'BOR (**אֲזַנּוֹת-תַּבּוֹר**; A. *Ἀζανὸς Θαβώρ*, B. *Ἐνὰθ Θ.*; *Azanotthabor*) = "the ears (i.e. possibly the summits) of Tabor," one of the landmarks of the boundary of Naphtali (Josh. xix. 34). The town, if town it be, or the reason for the expression contained in the name, has hitherto escaped recognition. By Eusebius (OS² p. 242, 88, s. v. *Ἀζανὸς*) it is mentioned as lying in the plain on the confines of Diocaesarea.

For the use of the word *ἰῆ*=ear, cp. **UZZEN-SHERAH**; and for the metaphor involved in the name, comp. **CHISLOTH-TABOR**. [G.] [W.]

A'ZOR (*Ἀζὺρ*; *Azor*), son of Eliakim, in the line of our Lord (Matt. i. 13, 14). [G.]

AZOTUS. [ASHDOD.]

AZOTUS, MOUNT (*Ἀζότου ὄρος* or *Ἀζωτος ὄρος*; *Mons Azoti*). The mountain on which Judas Maccabaeus was killed (1 Macc. ix. 15-18). Josephus (*Ant.* xii. 11, § 2) gives the name of the mountain as *Ἀζάδ. Bacchides*, advancing from Jerusalem, pitched (1 Macc. ix. 4) at Berea, probably *Bireh* [BEREA (3)]; whilst Judas encamped at Eleasa, *Ἰλῆσι*, near Beth-horon. In the fight that ensued Judas broke the right wing of the army of Bacchides and pursued it to Mount Azotus, which Major Conder, following Ewald, proposes (PEF. Mem. ii. 294) to identify with the hill of the modern village *Bir ez-Zeit*, near *Jufna*, Gophna. [W.]

AZRIEL (**אֲזַרְיֵאל** = *the help of God*. Cp. the Punic Hasdrubal = *כַּלַּל עֲזָרָה* = *help of Baal*; B. *Ἐσδρηά*, A. *Ἰεζρηά*; *Ezriel*). 1. The head of a house of the half-tribe of Manasse beyond Jordan, a man of renown (1 Ch. v. 24). 2. B. *Ἐσρηά*, A. *Ὀζιήλ*; *Ozriel*. A Naphthalite, ancestor of Jerimoth the head of the tribe at the time of David's census (1 Ch. xxvii. 19); called **UZZIEL** in 2 Heb. MSS., and apparently in the LXX. (A.). 3. *Ἐσρηά*, A. *Ἐσδρηά*; *Ezriel*. The father of Seraiah, an officer of Jehoiakim (Jer. xxxvi. 26). [W. A. W.] [F.]

AZRI'KAM (**אֲזַרְיָקָם**, *my help hath uplifted itself*; B. *Ἐσρικᾶν*, A. *Ἐσρικᾶν*; *Ezri-cam*). 1. A descendant of Zerubbabel, and son of Neariah of the royal line of Judah (1 Ch. iii. 23). 2. Eldest son of Azel, and descendant of Saul (1 Ch. viii. 38 [B. *Ἐσρικᾶν* (B⁹ -κε), A. -καμ], ix. 44 [B. *Ἐσδρικᾶν*, A. *Ἐσρ*-, A. -καμ]).

3. *Azari-cam*. A Levite, ancestor of Shemaiah who lived in the time of Nehemiah (1 Ch. ix. 14 [B. *Ἐσρικᾶν*, A. -καμ]; Neh. xi. 15 [B. *Ἐσρελ*, A. *Ἐσρελ*, A. *Ἐσρελ*, A. *Ἐσρελ*]).

4. B. *Ἐσρελ*, A. -ρι. Governor of the house, or prefect of the palace to king Ahaz, who was slain by Zichri, an Ephraimite, in the successful invasion of the southern kingdom by Pekah, king of Israel (2 Ch. xxviii. 7). [W. A. W.] [F.]

AZU'BAH (**אֲזֻבָּה**, *forsaken*; B. *Γαζουβά*, A. *Ἀζουβά*; *Azuba*). 1. Wife of Caleb, son of Hezron (1 Ch. ii. 18, 19). 2. *Ἀζουβά*, B. [1 K.] *Ἀζαβὰ*. Mother of king Jehoshaphat (1 K. xxii. 42; 2 Ch. xx. 31). [W. A. W.]

AZ'UR, properly **AZ'ZUR** (אֲזִיר, *helper*; אֲזֹרָה; *Azur*). 1. A Benjamite of Gibeon, and father of Hananiah the false prophet (Jer. xxviii. 1). He may have been a priest, as Gibeon was one of the priestly cities (see *Speaker's Comm.* i. c.). 2. אֲזִיר; T. אֲזִיר, A. אֲזִיר. Father of Jaazaniah, one of the princes of the people against whom Ezekiel was commanded to prophesy (Ezek. xi. 1). [W. A. W.]

AZU'RAN (B. אֲזֹרָא, A. אֲזֹרָא; *Azoroc*). The sons of Azuran are enumerated in 1 Esd. v. 15 among those who returned from Babylon with Zerobabel, but there is no corresponding name in the catalogues of Ezra and Nehemiah. Azuran may perhaps be identical with Azzur in Neh. x. 17. [W. A. W.]

AZ'ZAH (אֲזָזָה = *strong*; גָּזָא; *Gaza*; R. V. *Gaza*). This is the more accurate rendering of the name of the well-known Philistine city, Gaza (Deut. ii. 23; 1 K. iv. 24; Jer. xxv. 20). [GAZA.] There is apparently nothing to explain why an exception should have been made in these three places from the usual (but less correct) version of the name. The name is accurately rendered by Milton, a Hebraist, in 'Samson Agon,' line 147. In 1 Ch. vii. 28 R. V. reads *Azzah* (marg. *Ayyah*) where A. V. has *Gaza* (marg. *Adasa*). [G.] [W.]

AZ'ZAN (אֲזָן, perhaps *strong*; וֹזָא; *Ozan*). The father of Paltiel, a prince who represented his tribe of Issachar in the division of the promised land (Num. xxxiv. 26). [W. A. W.]

AZ'ZUR (אֲזִיר, *helper*; אֲזֹרָה; A. אֲזֹרָה; *Azur*). One of the heads of the people who signed the covenant with Nehemiah (Neh. x. 17). The name is probably that of a family, and in Hebrew is the same as is elsewhere represented by **AZUR**. [W. A. W.]

B

BA'AL (בָּעַל; Bāal; *Baal*), the supreme male [ou Baal with the feminine article, see below] divinity of the Phœnician and Canaanitish nations, as **ASHTORETH** was their supreme female divinity. Both names have the peculiarity of being used in the plural, and it seems certain that these plurals designate not (as Gesenius, *Thes.* s. vv., maintained) statues of the divinities, but different modifications of the divinities themselves. That there were many such modifications of Baal is certain from the fact that his name occurs with numerous adjuncts, both in the O. T. and elsewhere, as we shall have occasion to notice hereafter. The plural Baalim is found frequently alone (e.g. Judg. ii. 11, x. 10; 1 K. xviii. 18; Jer. ix. 14; Hos. ii. 17), as well as in connexion with Ashtoreth (Judg. x. 6; 1 Sam. vii. 4) and with Asherah, misrendered "groves" by A. V., but correctly rendered by R. V. "Asheroth" (Judg. iii. 7; 2 Ch. xxxiii. 3). There is no difficulty in determining the meaning of the name since the word is in Hebrew a common noun of frequent occurrence, having the meaning *Lord*, not so much,

however, in the sense of Ruler as of *Master, Owner, Possessor*. The name of the god, whether singular or plural, is always distinguished from the common noun by the presence of the

article (הַבְּעַל, *the Baal*), except when it stands in connexion with some other word which designates a peculiar modification of Baal. The Assyrian form of the word is Bilu, the Greek Βήλος, more commonly known to us as Bel. Bel was properly the deity of the earth and air, answering to Mul-lil, the second god of the Accadian trinity, but in later times the name was almost entirely confined to "the younger Bel," Bel Mero-dech, "the lord Merodach." Merodach was a form of the Sun-god, and was the tutelary deity of Babylon, as Nebo was of its suburb Borsippa; and when Babylon became the capital of Babylonia, its chief divinity also became the supreme god of the whole country.

[Layard conjectures (*Nineveh and its Remains*, p. 287 smaller edit.) that Baal is the figure in the above cut, from a bas-relief found at Nimrud, representing a procession of warriors carrying away the idols of a conquered nation. Diodorus Siculus (ii. 9) says that the god was represented in the act of walking; and in the epistle supposed to have been written by the Prophet Jeremiah to the captive Jews we are told, "Now shall ye see in Babylon gods of silver, and of gold, and of wood, borne upon shoulders, ... he hath also in his right hand a dagger and an axe" (Bar. vi. 4, 15), as in the above cut.]

Baal was the most usual title of the Sun-god in his various manifestations among the Canaanites, and consequently there were as many Baalim or forms of Baal as there were aspects under which the Sun-god could be worshipped. [Hence he

Baal or Bel carried in procession.
(Layard.)

Baal as a Sun-god. (Reuss.)

is represented with his head encircled with rays.] These forms may be divided into two classes,—those which represent the beneficent and generative side of solar action, and those which reflect its destructive side. It was as the fierce deity who scorches in anger the beings he has himself created that Baal was appeased with human victims burnt in the fire. He was then addressed as Baal-Hammam or Ammon, "the lord of heat." He was also known at Tyre as Baal-Tsur, "lord of Tyre," and Baal-Melkarth (Melech-kirjath, "king of the city," the Greek Héraklēs). [Baal-Ammon is sometimes represented in the form somewhat like the Egyptian Ammon, as in the annexed cut. (Rawlinson,

Baal-Hammam. (Perrot et Chipiez.)

Phœnicia, pp. 325, 326.]) More usually, however, the destructive Baal was called Moloch, "the king," a word which took the form of Milcom or Malcham among the Ammonites. Each state and city had its own special form of Baal: thus Baal-Tsur was the Baal of Tyre; Baal-Zebub of Ekron; Baal-Gad, "the lord of good luck," of Baal-Gad or Baslhek (Josh. xi. 17). The Baalim were also named from the mountains on which their high-places stood, and the streams at whose sources their temples were erected, as Baal-Hermon, "the Baal of Hermon" or "the sanctuary" (Judg. iii. 3). Baal-Zephon, "Baal of the North" [see, however, BAAL-ZEPHON], was especially dreaded by sailors, as he governed the north wind and was worshipped on the dangerous headlands of Mount Kasios in Syria and in Egypt (Ex. xiv. 2, 9). By the side of Baal stood his female double or reflexion, called Pen-Baal, "the face of Baal," in Carthaginian inscriptions, but more usually known as Ashtoreth.

The name of Baal might be combined with other titles of the Sun-god—such as El, "god;" Adonai, "lord;" Elyon, "the most high;" Sydyk (Zeak), "righteousness"—or might be replaced by them. The title of Adonai or Adonis, however, was specially reserved for the Sun-god when regarded as the young and beautiful deity prematurely slain by the boar's tusk of Winter, and he was then addressed by the old Accadian

name of Tammuz, though Hadad and Rimmon were also used. Among the Moabites the supreme Baal was called Chemosh. In all cases, however, Baal, or more fully Baal-shemim, "the lord of heaven," was considered a single deity who manifested himself under an almost endless variety of forms, some one of which was specially honoured by the worshipper at a given time and in a given place. The worship, therefore, of the Baalim of the Canaanites (Judg. ii. 11–13, vi. 26, viii. 33, x. 10; 1 Sam. vii. 4) or of the Phœnicians (1 K. xvi. 31–33; xviii. 19, 21) meant apostasy from the national God of Israel and amalgamation with the native population of Canaan (cp. Ruth i. 15, 16; 1 Sam. xvi. 19). The God of Israel Himself, however, had once been addressed as Baal, "Lord." Both Jonathan and David had sons called Merib-baal (1 Ch. viii. 34) and Beel-iada (1 Ch. xiv. 7); and it was not until the associations connected with the title had made it abhorrent to the pious Israelite that Hosea declared that the God of Israel should no longer be termed Baali, "my Baal" (Hos. ii. 16). Henceforward Baal became synonymous with the name of a heathen deity. Consequently the shrine of the Phœnician sun-god which had been erected in the vicinity of the Lord's house at Jerusalem, probably by Ahaziah, is called "the house of Baal" in 2 K. xi. 18, and Manasseh is said to have "reared up altars for Baal" in 2 K. xxi. 3 (see also 2 Ch. xxviii. 2).

Like the Assyrian Bilu or Bel, Baal entered largely into the composition of proper names, such as Baal-banan (Gen. xxxvi. 38) or Hannibal, "Baal is gracious;" Beal-yah, "Jehovah is Baal" (1 Ch. xii. 5); Esh-baal, "man of Baal" (1 Ch. viii. 33; ix. 39), or Jernb-baal (Judg. vi. 32; viii. 29). Sometimes the worshipper called himself simply by the name of the god; thus there were two Baals, kings of Tyre (B.C. 675 and 575), and a Baal was king of Gebal in the time of Xerxes, while a Reubenite named Baal is mentioned in 1 Ch. v. 5, and an uncle of Saul was also called Baal (1 Ch. viii. 30; ix. 36).

The worship of Baal amongst the Jews appears to have been appointed with much pomp and ceremonial. Temples were erected to him (1 K. xvi. 32; 2 K. xi. 18); his images were set up (2 K. x. 26); his altars were very numerous (Jer. xi. 13), and were erected particularly on lofty eminences (1 K. xviii. 20) and on the roofs of houses (Jer. xxii. 29); there were priests in great numbers (1 K. xviii. 19) and of various classes (2 K. x. 19); the worshippers appear to have been arrayed in appropriate robes (2 K. x. 22); the worship was performed by burning incense (Jer. vii. 9) and offering burnt-sacrifices, which occasionally consisted of human victims (Jer. xix. 5). The officiating priests danced with frantic shouts around the altar, and cut themselves with knives to excite the attention and compassion of the god (1 K. xviii. 26–28; cp. Lucian, *de Dea Syria*, 50; Tert. *Apol.* 9; Lucan, i. 565; Tibull. i. 6, 47).

The particular forms of Baal alluded to in the O. T. are the following:—

1. BA'AL-BERITH (בעל ברית; *BaalBērit*). This form of Baal was worshipped at Shechem by the Israelites after the death of Gideon (Judg. viii. 33; ix. 4). The name X 2

signifies the *Covenant-Baal*, and has been compared with the Greek Ζεύς ὁρκίος or the Latin *Deus fidius*. The meaning, however, does not seem to be the god who presides over covenants, but the god who comes into covenant with the worshippers. In Judg. ix. 46 he is called

אל בָּרִית. We know nothing of the particular form of worship paid to this god.

2. BA'AL-ZEBU'D (בְּעֻל זְבוּד; Bāal μῦτα; *Beelzebub*), the form of Baal worshipped at Ekron (2 K. i. 2, 3, 16). The meaning of the name is *Baal of the fly*, the Sun-god being associated with the flea which awarm during the summer in hot climates. It has been supposed that the god was represented under the form of a monstrous fly, but possibly the epithet was derived from the office he was asked to undertake of driving away the plague of insects from his worshippers. Similarly the Greeks gave the epithet ἀσπίς to Zeus (Pausan. v. 14, § 2; Clem. Alex. *Protrept.* ii. 38), and Pliny (*N. H.* x. 40) speaks of a fly-god Myiagros at Elis (see also Solin. i.). As an oracle was established in the temple of Baal-zebub, the priests may have determined the future by watching the movements of flies. The name occurs in the N. T. in the well-known form BEELZEBUB.

3. BA'AL-PEOR (בְּעֻל פְּעֹר; Βεελφεγώρ; *Beelphegor*), the god of the mountains of Moab, and a form of the national deity Chemosh. The narrative (Num. xxv.) seems clearly to show that this form of Baal-worship was connected with licentious rites. We can lay no stress on the Rabbinical derivation of the word בְּעֻל, *hiatus*, i.e. "aperire hymenem virgineum," since the god clearly derived his title from the name of the mountain of Peor (Num. xxiii. 28), still known as Fa'ar. Baal-Peor was identified by the Rabbins and early Fathers with Priapus (see the authorities quoted by Selden, *de Diis Syris*, i. 4, 302 sq.). Selden himself dissents from this view, and in this he is followed by many critics (cp. Baudissin in Herzog, *RE*² s.n.; Dillmann² on Num. xxv. 3). More detailed information on some points will be found in Kreuzer's *Symbolik* and Movers' *Phönizier*.

4. BA'AL-GAD (בְּעֻל גַּד; "Baal of good fortune"; Βαλαγὰδ; *Baal-gad*), the form of the sun-god worshipped at Baal-Gad, a town called after his name, and probably to be identified with Baalbek. Gad, the god of good luck, is mentioned in Is. lxx. 11, along with Meni, the Assyrian Manu, where the proper names, misrendered "troop" and "number" in the A. V., are rendered "Fortune" and "Destiny" by R. V. [A. H. S.]

BA'AL, with the feminine article; a title used contemptuously. The LXX. constantly (esp. Jeremiah, e.g. ii. 23, vii. 9; cp. Hos. ii. 10, xiii. 1. In Rom. xi. 4, τῇ Βάαλ takes the place of τῇ Βάαλ of 1 K. ix. 18) prefixes the feminine article to the name of the male god. Αἰσχύνη (Τῆς) or *shame* is frequently a substitution for Baal (e.g. Jer. iii. 24; cp. *QF.E.*³), and Dillmann has ingeniously shown that the feminine article ἡ, when prefixed to Baal, indicated that αἰσχύνη was intended to be read (see Driver, *Notes on the Heb. Text of the BB. of Samuel*, p. 195, n. 2).

Baudissin (Herzog, *RE*² "Astarte," p. 723) thinks that the androgynous character of Baal may be represented by the fem. article, but Driver points out that no traces of an androgynous Baal have been found in the Phœnician inscriptions. [F.]

BA'AL (בְּעֻל), *geographical*. This word occurs as the prefix or suffix to the names of several places in Palestine. Many of these (see the list in Ges. *Thes.* i. 225) have reference to the worship of the god Baal, as inhabitant or owner of a particular spot, or contain original forms of his name (cp. Baudissin in Herzog, *RE*² s.n. "Baal"; Baethgen, *Beiträge z. Semit. Religionsgesch.* p. 19 sq.; W. R. Smith, *Religion of the Semites*, i. 93 sq.; Driver, *Notes on the Hebrew Text of the BB. of Samuel*, p. 50).

1. BA'AL (A. Bāal, B. Βάαλ; *Baal*), a town of Simeon, named only in 1 Ch. iv. 33, and which from the parallel list in Josh. xix. seems to have been identical with BAALATH-BEER.

2. BA'ALAH (בְּעֻל אֵל; in Josh. xv. 9, B. Ἰεβὰλ, A. εἰς Βάαλ; *Baalā*).

(a.) Another name for KIRJATH-JEARIM, or KIRJATH-BEAL. It is mentioned in Josh. xv. 9, 10; 1 Ch. xiii. 6 (εἰς πόλιν Δαυὶδ; *ad collem Cariathiarim*). In Josh. xv. 60 and xviii. 14, it is called Kirjath-Baal. From the expression "Baalah, which is Kirjath-jearim" (cp. "Jebusi, which is Jerusalem," xviii. 28), it would seem as if Baalah were the earlier or Canaanite appellation of the place. In 2 Sam. vi. 2 for "Baal Judah" [R. V.] (הַיְיָ בְּעֻל יְהוּדָה, ἀπὸ τῶν ἀρχόντων Ἰούδα, *de ciris Juda*) should be read Ἰεβὰλ: cp. 1 Ch. xiii. 6.

(b.) B. Βαλά, A. Balaā. A town in the south of Judah (Josh. xv. 29), which in xix. 3 is called BALAH [B. Βαλά], and in the parallel list (1 Ch. iv. 29) BILHAH [B. Ἀβελὰδ, A. Balaā]. A proposal has been made (*PEF. Mem.* iii. 261) to identify it with *Kh. Umun Baghleh*, twelve miles south of *Beit Jibrin*, but the identification is doubtful.

(c.) Mount (הַר) Baalah (B. εἰς λίβα, A. Βαλά; *Baalā*). A point on the boundary of Judah, mentioned between Shicron and Jabbeel. *Yebuth*, Josh. xv. 11. The site has not yet been discovered.

3. BA'ALATH (בְּעֻל אֵל; *Balaath*, 1 K. *Baalath*), a town of Dan named in the same group with Eltekeh and Gibbethon (Josh. xix. 44; B. omits, A. Βαλαών). It is possible that the same town is referred to in 1 K. ix. 18 (B. omits, A. Βαλάθ) and 2 Ch. viii. 6 (B. Βαλαά, A. -ar). Josephus, *Ant.* viii. 6, § 1 (Βαλῆθ), states that it and Beth-horon were not far from Gezer. The site appears to have been recovered at *Be'ain*, about 2½ miles N. of Beth-horon the nether *PEF. Mem.* ii. 296).

4. BA'ALATH-BEER (בְּעֻל בְּעֵר; *Baalath of the well*; B. Βαπέκ, A. Βααλθερηππαμύωθ; *Baalath-beer*), a town among those in the south part of Judah, given to Simeon; and which also bore the name of RAMATH-NEGEV, or "the heights of the South" (Josh. xix. 8). In another list it appears in the contracted form of BAAL [See I.] Other sacred wells in this parched region were the Beer-lahai-roi, the "well of

the vision of God;" and Beer-sheba, the "well of the oath."

5. BA'AL-GAD (גַּד בְּעַל; BA. Γαλαῖδ in Josh. xiii. 5; B. Βαλαγαῖδ, A. Βαλγῖδ, F. Βααλγῖδ in xii. 7; *Baalgad*), a place evidently well known at the time of the conquest of Palestine, and as such used to denote the most northern (Josh. xi. 17, xii. 7), or perhaps north-western (xiii. 5, Hamath being to the extreme north-east) point to which Joshua's victories extended. It was in all probability a Phœnician or Canaanite sanctuary of Baal, under the aspect of Gad, or Fortune (see BAAL [god] No. 4). No trace of its site has yet been discovered. The words "the plain (בְּעַלְמֵי) of Lebanon" would lead to the supposition that it lay in the great plain between the two ranges of Lebanon and Anti-Lebanon, which is still known by the same Hebrew word *el-Bukā'a*; and it has accordingly been identified by Iken and others with Baalbek (Rub. iii. 519). But against this are the too great distance of Baalbek to the north, and the precise expression of the text—"under Mount Hermon" (Jerome, *ad radices montis Hermon*). The conjecture of Schwarz (p. 60), supported by Robinson with his usual care, is, that the modern representative of Baalgad is *Bánias*, a place which long maintained a great reputation as the sanctuary of Pan. [CAESAREA PHILIPPI.]

6. BA'AL-HA'MON (הַמֶּן בְּעַל; *Baal of multitude*; T. Βεελαμών, B. Βεελαμών, B. Βεεθλαμών; *ei vixit habet populos*), a place at which Solomon had a vineyard, evidently of great extent (Cant. viii. 11). The only possible clue to its situation is the mention in Judith viii. 3 of a Belamón or Balamón (BNA. Βαλαμών; *Bethulia*; E. V. BALAMO) near Dothaim; and therefore in the mountains of Ephraim, not far north of Samaria.

7. BA'AL-HA'ZOR (הַצֹּר בְּעַל; B. Βαυλασώρ, A. Βελασώρ; *Baalhasor*; Josephus, *Ant.* vii. 8, § 2, gives the form Βελασφών), a place "by Ephraim" (N-D), where Absalom appears to have had a sheep-farm, and where Amnon was murdered (2 Sam. xiii. 23). The text is disputed; see Driver (l. c.). It appears to have been the next property to Joab's (2 Sam. xiv. 31), and is now probably Tell 'Asūr, 2½ miles N.W. of *Taiyibeh*, Ephraim (P. F. Mem. ii. 298, 371-2).

8. MOUNT BA'AL-HER'MON (הַר הַבַּעַל הַרְמֹן; B. τὸ ὄρος τοῦ Ἀερμών, A. τ. ὄ. τ. Βαλαερμῶ; *Mons Baal-Hermon*, Judg. iii. 3), and simply Baal-hermon (A. Βαλ Ἑρμών, B. Βαλεῖμ, F. Βααλεῖμ; *Baal-Hermon*, 1 Ch. v. 23). This is usually considered as a distinct place from Mount Hermon; but the only apparent ground for so doing is the statement in the latter of the above passages, "unto Baal-hermon, and Senir, and Mount Hermon;" but it is quite possible that the conjunction rendered "and" may be used here, as often elsewhere, as an expletive,—"unto Baal-hermon, even Senir, even Mount Hermon." Perhaps this derives some colour from the fact, which we know, that this mountain had at least three names (Deut. iii. 9). May not Baal-hermon have been a fourth, in use among the Phœnician worshippers

of Baal, one of whose sanctuaries, Baal-gad, was at the foot of this very mountain? Cp. *Speaker's Comm.* note on 1 Ch. v. 23; W. R. Smith, *Religion of the Semites*, i. 93, n. 3.

9. BA'AL-MEON (מֵעוֹן בְּעַל; in Num. B. Βεελαμών, A. Βαμῶ, F. Ναβῶ; in 1 Ch. B. Βεελαμσών, A. Βεελαμών; in Ezek., most Gk. MSS. om.; *Baalmeon*, *Beelmeon*), one of the towns which were "built" by the Reubenites (Num. xxxii. 38), and to which they "gave other names." The "Beth," which is added to the name elsewhere, probably preserves the fact that it was once the house or sanctuary of the Baal of Meon. [BETHBAAL-MEON; BETH-MEON.] It is also named in 1 Ch. v. 8, and on each occasion with Nebo. In the time of Ezekiel it was Moabite, and under that prosperous dominion had evidently become a place of distinction, being noticed as one of the cities which are the "glory of the country" (Ezek. xxv. 9). It is mentioned in the inscription on the "Moabite stone" as having been built by King Mesha (*Records of the Past*, N. S., ii. 201; Driver, *Notes on the Heb. Text of the BB. of Samuel*, p. lxxxvii.). In the days of Eusebius and Jerome (*OS*² pp. 136, 5; 246, 45) it was still a "vicus grandia" called Beelmaus, 9 miles distant from Heshbon (Εσβεθός. *Esbus*), near the "mountain of the hot springs," and reputed to be the native place of Elisha. It is now *Mu'in*, on the banks of the *Zerka Ma'in*; the ruins are of "vast extent," occupying "the crests and alopes of four adjacent hills" (*Triestram, Land of Moab*, pp. 303-4; *PEFQy. Stat.* 1871, p. 71).

10. BA'AL-PERA'ZIM (פְּרָצִים בְּעַל, *Baal of breaches*; *Baal-pharasis*), the scene of a victory of David over the Philistines, and of a great destruction of their images, and so named by him in a characteristic passage of exulting poetry—R. V. "The LORD hath broken (פָּרַץ; see another rendering in marg.) mine enemies before me, like the breach (פָּרַץ) of waters. Therefore he called the name of that place 'Baal-perazim,'" i.e. the place of breakings forth (R. V. marg.: 2 Sam. v. 20; 1 Ch. xiv. 11). The place and the circumstance appear to be again alluded to in Is. xxviii. 21, where it is called *Mount P*. Perhaps this may point to the previous existence of a high place or sanctuary of Baal at this spot, which would lend more point to David's exclamation (see Gesenius, *Jes.* p. 844). Driver thinks (*Notes on the Heb. Text of the BB. of Samuel*, l. c.) that Baal, as applied here, does not denote the Phœnician god, but is a title of Jehovah (cp. iv. 4, note). The LXX. twice render the name in 2 Sam. v. 20 ἑτάνω διακοπῶν, and in 1 Ch. xiv. 11, at the beginning of the verse, B. φαλφαθισίμ, N. φαλαδ' φαθισεί, A. Βααλ'φαρασείν; and, at the end of the verse, B. διακοπή φαρισίν, N. Δ. φαρισίν, A. Δ. φαρασείν. It was near the Valley of Rephaim, and not far from Jerusalem.

11. BA'AL-SHAL'ISHA (שַׁלְשִׁי בְעַל; Βαυθαριασα, B. Βαυθαρίσα, A. ^{v14} (ras sa A?) Βαθαρίασα; *Baalsalisa*), a place named only in 2 K. iv. 42; apparently not far from Gilgal, possibly *Jizlil*, in the mountains N. of Bethel (cp. v. 38). It was possibly situated in the district, or "land" of the same name. [SHALISHA.] It is probably the same as the Bethsalisa or Βαυθαριασαθ (*OS*²

* The "unto" in the A. V. is interpolated, and is omitted in the R. V.

pp. 141, 11; 250, 92), which is placed 15 miles N. of Diospolis in the Thamnitic toparchy and is now *Kh. Sirisia*. In the Targum it is rendered by Daroma, and in *PEF. Mem.* (ii. 285) it is identified with *Kh. Kefer Thilth*.

12. BAAL-TAMAR (בַּלְתָּמָר, *Baal of the palm*; Βαλλ Θαμάρ; *Baalthamar*), a place named only in Judg. xx. 33, as near Gibeah of Benjamin. The palm-tree (בַּלְתָּ) of Deborah (iv. 5) was situated somewhere in the locality, and is possibly alluded to (Stanley, pp. 145-6). In the days of Eusebius it was still known under the altered name of Βηθθαμάρ (*OS.* p. 250, 77); but no traces of it have been found by modern travellers. In the Targum it is given as "the plains of Jericho," probably a conjecture, and not a happy one, as Jericho was too far distant from Gibeah. Conder (*Hdbk. to Bible*, p. 404) states that Jewish tradition identifies it with the large ruin 'Attāra, near Gibeah. [G.] [W.]

BA'AL-ZEPHON (בַּלְצֶפֶן; Βαλζεφών, *Beelzebub*; *Beelzebub*), a place near which the Israelites crossed the Red Sea (*Ex.* xiv. 2, 9; *Num.* xxxiii. 7). The name is clearly Semitic, and is usually supposed to mean a shrine of Baal of the quarter צפון, "the North." The position of Baal-Zephon must have been in the territory which the Egyptians called "the East." [PITHOM.] We should therefore rather have expected the name Baal of the East than of the North, like "Supt of the East," the divinity of Kasem, the city of Goshen, and of "the East" generally. [GOSHEN.] Although the rendering of בַּלְצֶפֶן is on Hebrew authority only, and the Semitic names in Egypt are not proved to be of Hebrew origin, there is no ground in the different orientations of the ancient East for the conjecture that the word can here mean "east" instead of "north." It is quite true that in later Hebrew the term צפון, "the west," as the direction of the sea, sometimes naturally serves for "the south" (*Ps.* cvii. 3; *Is.* xlix. 12), the sea being southward of the land of exile, whereas it was westward of the land of promise, but בַּלְצֶפֶן remains "the north." If it mean the "dark" quarter, it could never stand for the direction of the sun-rising. Another and more probable etymology for Baal-Zephon may be suggested. We could derive the name from בַּלְצֶפֶן rather than בַּלְצֶפֶן, and render Baal-Zephon, "Baal of the watch-tower." M. Naville's geographical indications support this view. Migdol and Baal-Zephon, on opposite sides of the sea, would be two corresponding watch-towers, and Pi-Hahiroth with its temple of Osiris would again stand in the like relative position to Baal-Zephon, the temple of Baal or Set, the antagonist of Osiris; the last shrine of the protector of cultivation facing the outpost of the personification of the desert. [R. S. P.]

From the recent identification of the site of the city of Pithom-Succoth and the region of Succoth [PITHOM, SUCCOTH], it appears that the Israelites crossed the Red Sea near the ancient head of the Herodopolite Gulf (the Gulf of Suez), upwards of thirty miles north of the present head [RED SEA, PASSAGE OF], and Baal-Zephon

would therefore have stood near the head of the gulf. Its foreign name, made of two Semitic words, seems to indicate that it was not situated in Egypt, like Pi-Hahiroth, but on the Asiatic side of the sea (*Ex.* xiv. 2, 9, B. ἐξ ἐναντίας Βαλζεφών, *AF.* ἐξ ἐναντίας Βαλζεφών). The name of *Baal Zephon* has been found in a papyrus of the British Museum (Sallier, iv.), without any reference to its position. It is not likely that it was a city, but was probably only a hill or a mound used as a place of worship, and perhaps connected with a watch-tower.

Brügsch, who advocated the theory of the Exodus along the Mediterranean, considered Baal-Zephon as the sanctuary of Mons Casius, at the extreme limit of Egypt on the coast (*The Exodus and the Egyptian Monuments*, p. 278). Ebers, who adheres to the old view of the crossing near Suez, places Baal Zephon on the summit of Gebel Attaka, above Suez (*Durch Gosen zum Sinai*, p. 524). The opinion which is derived from the excavations is that Baal-Zephon must be looked for south of Lake Timsah on a hill like Sheykh Ennedek. [R. N.]

BA'AL (בַּל; Β, Ἰωήλ, A. Βαλ; *Baal*).

1. A Reubenite, whose son or descendant Beerah was carried off by the invading army of Assyria under Tiglath-pileser (1 Ch. v. 5).

2. B. Βααλαμ, A. Βααλ καὶ Νήρ. The son of Jehiel, father or founder of Gibeon, by his wife Maachah; brother of Kish, and grandfather of Saul (1 Ch. viii. 30, ix. 36). [W. A. W.]

BA'ALAH. [BAAL, 2.]

BA'ALATH. [BAAL, 3, 4.]

BA'ALE of Judah. [BAAL, 2 a.]

BA'AL-HA'NAN (בַּלְחָנָן, *Baal is gracious*; in Gen. A. Βαλαννών, D. -ενών, E. Βαλεννών; in 1 Ch. i. B. Βαλαεννών, A. -ών; *Balan*; cp. בַּלְחָנָן, Ἰωάννης, *Jehorah is gracious*). 1. The name of one of the early kings of Edom (Gen. xxxvi. 38, 39; 1 Ch. i. 48, 50). 2. The name of one of David's officers, who had the superintendence of his olive and sycamore plantations (1 Ch. xxvii. 28; B. Βαλνών, A. -να; *Balanan*). He was of the town of Gederah (Josh. xv. 36) or Beth-Gader (1 Ch. ii. 51), and from his name probably of Canaanitish, not Jewish origin. [A. H. S.]

BA'ALI (בַּאֲלִי; Βααλείμ; *Baals*). The word occurs as a name in Hos. ii. 16 (Heb. r. 18): "At that day thou shalt call Me Ishi (my husband); and shalt call me no more Baali (my Baal or my master);" and the change announced is evidently the change from a name connected with idolatry and unfaithfulness to a name significant of loyal and faithful attachment. The passage is historically important as testifying to the use of the word Baal not as a proper name but as an appellation of the God of Israel. A similar use of Baal is to be traced when the word forms part of the name of Saul's son Eshbaal, or of David's son Beeliada. And this may be readily admitted without the further assumption that Israel had identified God with the god of the Canaanites. Cp. *Speaker's Comm.* and Orelli, *Kgf. Komm.* (edd. Strack u. Zöckler) in loco; König, *Die Hauptprobleme d. alttestam.*

Religionsgeschichte, pp. 35-38; Baethgen, *Beiträge z. Semit. Religionsgesch.* p. 144. [F.]

BAALIM. [BAAL]

BA'ALIS (בְּאֵלִים). Cp. MV.¹¹ Perhaps =

בְּאֵלִים or בְּעָלִים, son or lord of exultation; Baethgen (p. 16) conjectures, *lord or husband of Isis*; B¹ בְּאֵלִים, A. -i; Baalis, king of the Bene-Ammon (Baathids vids 'Αμμών) at the time of the destruction of Jerusalem by Nebuchadnezzar (Jer. xl. [LXX. xlvii.] 14). [F.]

BA'ANA (בְּאָנָה), meaning uncertain, possibly MV.¹¹ = son of Anu [cp. Anammelech]. 1. A. Baana vids 'Ελοῦδ, B. Βακχά vids 'Αχιμαχ; Baana, the son of Ahilud, Solomon's commissariat officer in Jezreel and the north of the Jordan valley (1 K. iv. 12). 2. Baana; Baana. The father of Zadok, one of those who repaired the wall of Jerusalem after the return from the Captivity (Neh. iii. 4). 3. 1 Esd. v. 8. [BAANAH, 4.]

BA'ANAH (בְּעָנָה = בְּעָנָה [above]; A. Baana always; B. in cr. 5, 9, Baam, in v. 6 Baamud; Baana). 1. Son of Rimmon, a Benjamite, who with his brother Rechab murdered Ish-bosheth. For this they were killed by David, and their mutilated bodies hung up over the pool at Hebron (2 Sam. iv. 2, 5, 6, 9).

2. A Netophathite, father of Heleb or Heled, one of David's mighty men (2 Sam. xxiii. 29, A. Baana, B. omits; 1 Ch. xi. 30, A. Baana, B. Baana). [F.]

3. Accurately Baana, בְּנָנָה; B. Baana, A. -as; Baana, son of Hushai, Solomon's commissariat officer in Asher (1 K. iv. 16).

4. A man who accompanied Zerubbabel on his return from the Captivity (Ezra ii. 2, A. Baana, B. Baana; Neh. vii. 7). Possibly the same person is intended in Neh. x. 27. [BAANA, 3.] [W. A. W.] [F.]

BAANI'AS (BA. Bavaias; Bannas). BENAIAS, of the sons of Pharosh (1 Esd. ix. 26; cp. Ezra x. 25). [W. A. W.]

BA'ARA (בְּעָרָה), meaning uncertain, Ges. = foolish, MV.¹¹ = a burning; A. Baara, B. Baara; Baara, one of the wives of Shaharaim, a descendant of Benjamin (1 Ch. viii. 8). [F.]

BAASEI'AH (בְּעֵשִׂי, probably an error for בְּעֵשִׂי, the work of Jah. The same error occurs in some texts [not N] of LXX. in Jer. xii. 1. Cp. here B. Baasai, A. Baasid; Baasid, a Gershonite Levite, one of the forefathers of Asaph the singer (1 Ch. vi. 40 [25]). [F.]

BA'ASHA (בְּעָשָׂה or בְּעָשָׂה; Baasid; Joseph. Baasid; Baasa), third sovereign of the separate kingdom of Israel, and the founder of its second dynasty. He was the son of Ahijah of the tribe of Issachar. He conspired against king Nadab, son of Jeroboam, when he was besieging the Philistine town of Gibbethon, and killed him with his whole family (1 K. xv. 27-29). He appears to have been of humble origin, as the prophet Jehu speaks of him as having been "exalted out of the dust" (1 K. xvi. 2). In matters of religion his reign was no improve-

ment on that of Jeroboam; he equally forgot his position as king of the nation of God's election, and upon him and his house there equally fell the destruction which had befallen the house of Jeroboam (1 K. xvi. 3, 12). Further, his reign was chiefly remarkable for his persevering hostility to Judah (1 K. xv. 32). It was probably in the 13th year of his reign that he made war on its king Asa, and began to fortify Ramah as an *ἐπιτειχισμα* against it. He was defeated by the unexpected alliance of Asa with Benhadad I. of Damascus, who had previously been friendly to Baasha. Benhadad took several towns in the N. of Israel, and conquered lands belonging to it near the sources of Jordan. Baasha died in the 24th year of his reign, and was honourably buried in the beautiful city of Tirzah (Cant. vi. 4), which he had made his capital. The dates of his accession and death according to Usher are B.C. 953 and B.C. 930, according to Kamp-hausen and as corrected by the Assyrian Chronology B.C. 914 and B.C. 891 (see Herzog, *RE*,² 'Zeitrechnung,' p. 477). Cp. 1 K. xv. 27, xvi. 7; 2 Ch. xvi. 1-6. [G. E. L. C.] [F.]

BA'BEL, BAB'YLON (בְּבֶל; Βαβυλών), the capital of the country Babylon or Babylonia, called, in Gen. x. 10, *Shinar* (שִׁנְאָר), and in the later books Chaldean (כַּלְדָּיִם) [the land of the] Chaldeans, also כַּלְדָּיִם in full). The name Babel is connected, in Gen. xi. 9, with the Hebrew root בָּלַל, "to confound," referring to the confusion of tongues which took place at the building of the Tower of Babel. The native name, however, was Bāb-ili (also Bābilit and Bābilitum), "gate of God," and Bāb-ilani, "gate of the gods." The ancient Akkadian (non-Semitic) names are *Ka-dingira*, "gate of God" (a translation of Bābilit); *Tin-tir*, "life-seat" (in Semitic Babylonian *šubat balāti*, "seat of life"); *Ē* or *E-ki*, "house" or "hollow," and *Su-anna*, the city with "the high defence" (a reference to the great walls of Babylon).^a Babylon was probably at first only the principal town of the district in which it was situated, and afterwards rose, by the power of its kings, to be the capital of the whole district known later as Babylonia.

The Biblical account of the foundation of the city (Gen. xi. 2-9) states that as they (the descendants of Cush and followers of Nimrod) journeyed from the east, they found a plain in Shinar, and dwelt there. This statement apparently refers to one of the migrations of the people of Kingi-Ura, as they called themselves—the Sumero-Akkadians, as scholars now name them—a race which seems to have come from the east, or rather north-east, of Mesopotamia. Their first act, after settling down, was to build "a city and a tower" with burnt brick and "elime" (bitumen). Such was the beginning of the mighty city of Babylon, and in the same way, likely enough, the other cities of Mesopotamia had their origin—a number of

^a The form Bāb-ili and its Akkadian translation, *Ka-dingira*, are probably the results of a folk-etymology. The original form of the name seems to have been Babelam—a form differing but slightly from that of Bābilitum above. The final m in both cases is the diminution.

simple dwellings scattered around a temple-tower (Assyro-Babylonian, *zikkuratu*). Any discontinuance of the building of the city must have been comparatively short, for, as is well known, it grew to be the largest city of the ancient world.

The date of the foundation of the city is uncertain, but it seems not unlikely that, as it is mentioned before Erech, Akkad, and Calneh (Gen. x. 10), it was at least as old as those cities. It first came into prominence about the year 2232 B.C., a date which corresponds very closely with that of 2230 B.C., which the Greeks derived from the Babylonians in Alexander's age. The city itself, however, must have been much older. The various names of the city existed at a much earlier date, and it is not unlikely that it owed its origin to the existence of renowned temples and sacred places, visited by the primitive inhabitants; the principal being, probably, the great temple-tower of Babel itself. It is likely that the many names which the city bears in the inscriptions come from the fact that originally several distinct towns or villages occupied the site and, growing, became one single city, just as, in later times, Tê, Tema, Âlu-êssu, and other towns were incorporated and formed part of it.

Patron deities.—The principal god of the city was Merodach, whose seat it was (*Bâbilû mahâz Marduk*, "Babylon, the stronghold of Merodach"), and the principal goddess was his consort, Zir-panitum or Zir-banitum. Splendid shrines for the worship of these deities existed in the city from the earliest times. Innana, Nana, or Istar was also regarded as one of the patron deities of the city.

History.—From the accounts left by the Babylonians themselves we get no detailed history of the rise of the city. Hammurabi (or Hammuragâ, in Babylonian *Kîmta-rapaânu*), king of Babylon about 2120 B.C., who belonged to what was known as "the dynasty of Babylon," seems to have fixed his court there. He greatly added to the temple of Merodach, and restored the temple of the god Zagaga, called Mite-ursag, in the city of Kê, to the east of Babylon. Samas-iluna, son of Hammurabi, dedicated images overlaid with gold to the god Merodach, whose shrine was in Ê-sagila. Another early king, Agu-kak-rime, known to us from a long inscription from the library of Assur-bani-apli or Assurbanipal at Nineveh, gives a long account of the restoration of the shrines of Merodach and his consort Zir-panitum in Ê-sagila at Babylon; and how he clothed their images (brought back from captivity in the land of Hân) with splendid vestments, and adorned the shrines with gold, silver, and many kinds of rare and costly stones. This king also restored at the same time the whole of the temple Ê-sagila.

After this period, however, hardly anything is known as to the progress made in the city of Babylon. It continued doubtless to grow in size and in splendour, but the kings by whom the work was accomplished seem to have left little or no record of the part they took in adorning the city. The constant invasions of the Assyrian kings also not only retarded but quite checked the growth of the city, and Sennacherib, in his last invasion of Babylonia,

completely razed it to the ground. Esarhaddon, his son, a king of milder disposition, came to Babylon soon after his accession to the thrones of Assyria and Babylonia. He completely restored the city, rebuilt the great temples and towers, and brought back the images of the gods. The temples Ê-sagila in Babylon and Ê-zida in Borsippa were afterwards restored with great splendour by Samâs-um-ukin (Saoduchinos or Sammughes), and his brother Assur-bani-apli or Assurbanipal, king of Assyria. To Nabopolassar and his son Nebuchadnezzar, however, it was that Babylon, in later times, owed most of her splendour. Nebuchadnezzar was especially energetic in the work, and the number of edifices rebuilt or restored by him gives great justification to the question "Is not this great Babylon that I have built?" (Dan. iv. 30.), which is attributed to him. All the Babylonian kings claim, however, more or less, to have rebuilt or restored the temples of Babylon and Borsippa, especially those called Ê-sagila and Ê-zida. Antiochus Soter, whose record is inscribed on the cylinder found at the Birs-Nimroud by Mr. Rassam, was probably the last king to do any work of this kind. Herodotus (i. 183) states that Xerxes plundered the temple of Belus of the golden statue that Darius had not dared to remove, and Arrian says (iii. 26) that he destroyed the temple itself on his return from Greece; and that, it being in ruins when Alexander was at Babylon, that king formed the design of rebuilding it, and restoring it to its former grandeur. The work, however, was not done on account of the magnitude of the task, as it would have taken 10,000 men to clear away the ruins. Babylon decayed rapidly after Alexander's death; and after the building of Seleucia by Seleucus Nicator, became a desert. There are, however, no native records which would shed light on the history of the city at this time. There is a small tablet, dated "219th year, Arsaces, king of kings" (= 93 B.C.), recording that two priests of Ê-sa-bad, the temple of the goddess Gula, which had been restored by Nebuchadnezzar (see below), had borrowed 18 shekels of silver from the treasury of the temple of Bel. This would seem to indicate that the sacred places of the great city were still in existence and that the worship was carried on as late as the reign of Mithridates II., the ninth of the Arsacidae.

Greek accounts.—According to Herodotus (i. 178-186), who himself saw the glories of the great city of Babylon, it formed a vast square, 120 stades or 13 miles 1385 yards on each side, so that its circumference was 480 stades (55½ miles). The city was surrounded by two walls, the inner one narrower, but not much weaker than the outer one. Here and there, on each bank of the river, were certain fortified places, on one side the palace of the king and on the other the temple of Belus (the temple called Ê-sagila), which consisted of a massive tower within a square enclosure measuring two stades (400 yards) each way, and provided with brazen gates. The tower within, which was a kind of pyramid in eight stages (counting also the lowest), had a winding ascent to allow visitors to reach the top. On the highest stage of this tower or pyramid was a sanctuary, containing no statue, but regarded by the Babylonians as

the abode of the god. Lower down was another sanctuary, containing a great statue of Zeus (Bel-Merodach) sitting, and before it a large table. Both statue and table were of gold, as also the throne and its steps. Outside the sanctuary were two altars, one small and made of gold, on which only unweaned lambs were sacrificed, and the other larger, for other victims.

The city itself, so Herodotus says, was filled with houses of three and four stories high, laid out in streets crossing each other at right angles, those leading to the Euphrates being closed at the river-ends by brazen gates, which guarded the passages leading from the quays which lined the banks of the Euphrates the whole extent of its course through the city.

Two of the greatest works in Babylon were the changing of the course of the Euphrates and the building of a bridge, so as to form a communication between the two quarters of the city. These works are attributed to two queens, Semiramis and Nitocris. The first-named is said to have made some very remarkable embankments to prevent the waters of the Euphrates from deluging the country around. Nitocris, who reigned five generations later, formed the plan of changing the course of the Euphrates, so that it flowed no longer in a straight line before entering the city, but made three considerable windings, and the traveller by water approached the city Ardericca three times in three days. This queen made also embankments and a large reservoir, the vast outline of which, 420 stades, navigators of the stream were obliged to follow at the end of their journey. The object in delaying the approach to the city by water was to lessen the chances of its being captured by an enemy. Whilst the water was drained off, Nitocris made use of the opportunity thus afforded to connect the two divisions of the city by a bridge. A series of stone piers, built with iron and lead, were constructed; and were, during the daytime, connected by means of drawbridges, thus enabling the inhabitants of each division of the city to communicate with greater ease.

Ctesias (*ap. Diod. Siculus, li. 7 et seqq.*) makes the circuit of the city much less than Herodotus—360 stades (41 miles 600 yards) instead of 480 stades. The city lay, he says, on both sides of the Euphrates, and the two parts were connected by a bridge (built where the river was narrowest) five stades (3,032 feet) long and 30 feet broad, of the kind described by Herodotus. At each end of the bridge was a royal palace, that in the eastern division of the city being the more magnificent. The part called the twofold royal city by Diodorus had three walls, the outermost being 60 stades, or 7 miles, round; the second, which was circular, 40 stades, or $4\frac{1}{2}$ miles; and the third 20 stades, or $2\frac{1}{2}$ miles. The height of the middle wall was 300 feet, and its towers 420 feet, but the height of the innermost wall was even greater. The walls of both the second and third enclosures were made of coloured bricks, ornamented with figures of different kinds, among which were to be seen Semiramis and Ninus slaying the leopard and the lion. Diodorus mentions a square lake, 300 stades long and 35 feet deep; and speaks also of the temple of Belus, with its statues of Zeus, Hera, and Rhea (Bel-Merodach, Zir-pani-

tum his consort, and probably the goddess Damkina). The statue of Zeus was, he says, 40 feet high, and weighed 1000 Babylonian talents. The two palaces were not only joined by a bridge, but also by a tunnel under the river. Diodorus gives a description (still, apparently, quoting Ctesias) of the famous hanging gardens of Nebuchadnezzar. These, it appears, were of square form, 400 feet each way, and rose in terraces. Earth of sufficient depth was placed on this structure to allow the growth of trees of great size.

All the ancient writers agree in giving to Babylon an immense size. As mentioned above, Herodotus makes the wall surrounding the city 480 stades, and Ctesias 360 stades, this last number being evidently allegorical and giving the numbers of the days in the year (12 months of 30 days = 360 days); for this reason, as acknowledged by Diodorus, it was corrected into 365 by Clitarchus. These numbers were more or less accurately copied by the later writers, Strabo (*xvi. 1, § 5*) giving 385, Pliny (*H. N. vi. § 121*) 480, Q. Curtius (*v. 1, § 26*) 368. The estimate of Herodotus seems to be the most trustworthy one; for, if the builder of this wall had followed any symbolism for its length, it would be in Babylonian and not Greek measures. The Greek historian is the only writer who speaks of the inner wall, but without giving any measurement (*i. 81*). Both walls were protected by large ditches filled with water. Dr. Oppert believes that he has found traces of the two walls, but the state of the ruins does not permit any restoration. The disappearance of the walls is easily accounted for, either by the constant quarrying or by the subsidence of the bulwark into the moat from which it was raised. This immense enclosed area was not entirely covered with houses. Diodorus states that two plethra of ground unbuild on were preserved near the walls, and Q. Curtius says that Babylon contained large gardens and fields; it was in fact not a town, but a fortified district.

For the height of the outer wall Herodotus gives 200 cubits or 337½ feet, and Ctesias 50 fathoms or 300 feet. The later writers merely copied these numbers, changing the cubits into feet, and the fathoms into cubits. This enormous height, being nearly that of the dome of St. Paul's, seems almost incredible, notwithstanding that modern explorations indicate that the Babylonian and Assyrian city-walls were, so to say, real artificial mountains (see Nebuchadnezzar's account, below). The thickness of the outer wall is given by Herodotus as 50 cubits or 85 feet. This measure is also softened down by later writers, who have again changed the cubits into feet.

According to Ctesias, the wall was strengthened by 250 towers, irregularly arranged, to guard the weakest parts; and according to Herodotus this wall was pierced by a hundred gates, which were made of brass, and had brazen lintels and side-posts. It is not unlikely, however, that "a hundred" means simply "a large number." The gates and walls are both mentioned in Scripture (*Jer. li. 58; cp. l. 15 and li. 53*).

Herodotus and Ctesias both say also that the course of the Euphrates was regulated by an embankment built of baked brick, and describe a

bridge sail to be made of stone piles with a movable wooden floor. Modern explorers believe that they have found traces of both these structures. The remains of a quay or embankment on the eastern side of the stream (E; see Plan, p. 315, col. 2) still exist, the bricks of which bear the name of Nabonidus, the last native king of Babylon.

Turning now to the native records, we find a certain amount of likeness in the descriptions, but considerable divergence as to the origin of the many wonders of this great city of the ancient Eastern world.

Nebuchadnezzar's account.—According to Nebuchadnezzar, king of Babylon, it was Nabopolassar, his father, who built the walls of Babylon. These were called Imgur-Bél ("Bél has been merciful") and Némitti-Bél ("foundation of Bél") respectively, the former being the outer, and the latter the inner wall of the city. He had dug the ditch, had raised two strong walls on its banks, and had built the wall or dam of the Arahtu or Araxes. He had also lined the banks of the Euphrates with embankments (probably the quays to which Herodotus refers) of brick, but he had not finished the whole of the work which he had undertaken. Within the city itself Nabopolassar had constructed a road reaching from Du-azag, the place where the oracles were declared, to Aa-ibur-sabû, the street of Babylon, close to the gate of Beltis, for the great yearly procession of the god Marduk or Merodach.

Brick stamped with inscription of Nebuchadnezzar, recording the restoration of the temple E-sagila at Babylon and E-zida at Borsippa.

Nebuchadnezzar completed Imgur-Bél and Némitti-Bél, bricked their ditches, and added to the thickness of the two walls which Nabopolassar his father had built. He built a wall on the west side of Babylon, and raised the level of the great street Aa-ibur-sabû, from the "glorious gate" to the gate of Nana. This raising of the pathway of the street necessitated also the raising of the gateways through which it went. The gates themselves, Nebuchadnezzar says, were made of cedar covered with copper, probably after the style of the great gates of Balawat in Assyria. Probably no gate in Babylon was of solid metal, though no mention of their being constructed of wood occurs in Herodotus. The thresholds of these gates were

of bronze, and they were guarded by images of bulls and serpents of the same metal. Nebuchadnezzar constructed also a wall on the east side of the city, 4,000 cubits distant, high like a mountain, so that no enemy could come near. In this wall were also gates of cedar covered with copper. As an additional protection, he constructed also an enormous lake, "like unto the broad sea to cross." This great sheet of water was kept in by means of dams and embankments. He thus made Babylon, as he says, quite "a fortress."

Nebuchadnezzar speaks also of the royal palace in Babylon—the palace which Nabopolassar had built and wherein he had lived. This palace, which reached from Imgur-Bél to Libil-gegala, the eastern canal, and from the banks of the Euphrates to the sacred street Aa-ibur-sabû, had somewhat fallen into decay, the foundation having become ruinous through the floods when the river was high; and the doorways were now too low in consequence of the raising of the roadway of Aa-ibur-sabû. Nebuchadnezzar completely restored this edifice, rebuilding its foundations with bitumen and brick, and raising the whole, as he says, "mountain-like." The roof of this building was of cedar, and the doors were of cedar covered with bronze or copper. The thresholds were, as usual, of bronze, and the palace was also otherwise adorned with gold, silver, precious stones, and every kind of costly thing.

Imgur-Bél, the principal wall of Babylon, was situated, so Nebuchadnezzar says, 490 cubits from Némitti-Bél; and in order that no hostile attack should reach the former, he built, as a protection, two strong walls and an outer wall, "like a mountain," with a great building between them which should serve as a castle and a royal residence. This building was in connexion with the old palace of Nabopolassar above named. According to the Babylonian king's account, this work took only fifteen days! The decoration, in the same style as the other palace, followed, and the battlements were strengthened by blocks of alabaster and other stones. Other defences also surrounded this stronghold.

As may well be supposed, there was a large number of other temples, besides that of Belus, at Babylon, as well as smaller erections which adorned the city. These Nebuchadnezzar claims to have rebuilt or restored. Among those which he mentions may be cited E-tua, the shrine of Merodach in the temple E-sagila; and a sanctuary called Du-azag, or the "place of fate," where yearly, at the new-year's festival on the 8th and 9th (of Nisan), "the king of the gods of heaven and earth" was placed, and the future of the king asked and declared. Nebuchadnezzar also restored E-temen-ana-ki, called by the Babylonians "the tower of Babylon" (*zikkurat Bâbil*) within that city. For the goddess Nin-mag he rebuilt or restored E-mag; for Nebo, E-nig-gad-kalama-uma; for Sin, the moon-god, "the white limestone temple;" for the sun-god, E-ditar-kalama; for the goddess Gula, E-sa-lad and E-garsag-ella, &c. The above will give an idea of a small portion of the work which Nebuchadnezzar claims to have done in Babylon, his favourite city. Notwithstanding that (unlike the other kings before him, who

had taken different cities as their favourites) Nebuchadnezzar looked upon Babylon only with the eye of affection, he nevertheless duly restored the temples of the other great cities of Babylon, as his predecessors had also done. Nebuchadnezzar's claim, that Nabopolassar his father had built the great walls and other defences of Babylon, cannot be taken literally—he probably only began their restoration, for these great works which he claimed as his father's are mentioned in documents which were not only written long before the time of either, but which are themselves copies of still older texts. It is very probable, however, that these two great rulers did more to render them really effective than any other king before them.

Plan of the city of Babylon, showing the district called Tuma and the Great Gate of the Sun-god, from a tablet from Babylon now in the British Museum.^b

Present state of the ruins.—About five miles above Hillah, on the eastern bank of the Euphrates, are "three great masses of building—the high pile of unbaked brickwork called by Rich 'Majellibe,' but which is known to the Arabs as 'Bibel' (A); the building denominated the 'Kasr,' or palace (B); and a lofty mound (C), upon which stands the modern tomb of Amrîm-ibn-'Alî" (Loftus's *Chaldea*, p. 17). These are mostly "enclosed within an irregular triangle formed by two lines of ramparts (GG) and the river, the area being about eight miles." Besides these are two parallel lines of rampart (FF) bounding the chief ruins on the east, some similar but inferior remains on the north and west (H and II), an embankment along the river-side (F), and a noteworthy isolated heap (K) in the middle of a long valley regarded by some as possibly the ancient bed of the stream. On the

west or right bank the remains are very slight and scanty. There are mounds which give the appearance of an enclosure, traces of a structure of moderate size within it (D). Besides these, there is a number of remarkable mounds, usually standing single, scattered over the country on both sides of the Euphrates. Of

Present State of the Ruins of Babylon.

these, by far the most striking is the vast ruin, crowned apparently by the remains of a tower rising to the height of 153½ feet above the plain, and having a circumference of somewhat more than 2000 feet, called the *Birs-i-Nimrud* (the *Ê-zida* of the inscriptions). This mass of brickwork is generally regarded as the remains of the Tower of Babel. This tower, however, being situated within the city of Borsippa, does not properly fall within the limits of the city of Babylon, though one of the names by which Borsippa was known was that of "the second Babylon." [See BABEL, TOWER OF.]

The great difficulty which meets us on attempting to identify these sites is the fact, that the remains are situated almost exclusively on the left bank of the river. It is probable, however, that the edifices existing on the western bank have been almost entirely swept away by the waters of the Euphrates, which have a tendency to run off in that direction. It has been also supposed that the ancient authors may have confounded one of the great canals, which

^b The other side of the fragment bears an inscription referring apparently to the topography of Babylon, the name of which, as well as that of the great temple Ê-agila, occurs in the first column of the obverse, which is very mutilated. The second column contains references to the three watches of the day, the closing of the gates, and mentions the upper and lower east and west strongholds. The text seems to have contained principally instructions for guarding the city.

existed in ancient times, with the main stream. This (which is not altogether unlikely) would do away with many difficulties, and reconcile the conflicting evidence. The ruin known as Babil (A) has been identified with the temple of Belus. Tiele (*Zeitschr. für Assyriologie*, vol. ii. p. 190) is of opinion that E-sagila (which has

been identified with the temple of Belus) lay, if not in the old royal palace itself, at least in its immediate neighbourhood, on account of its having been found impossible by Nebuchadnezzar to enlarge the palace without desecrating the holy place. This mound of Babel is an oblong mass, chiefly of unbaked brick, about

View of Babil, from the West. Ruins of Babylon.

140 feet high, 200 feet long, and about 140 yards broad. It is flattish at the top. Originally it was coated with fine burnt brick laid

in excellent mortar (Layard, *Nin. and Bab.* pp. 503-5), and was no doubt built in stages, most of which have crumbled down. All the

View of the Kasr.

inscribed bricks found in it bear the name of Nebuchadnezzar. The *Kasr* (B) is regarded as marking the site of the great palace of Nebu-

chadnezzar. It is an irregular square of about 700 yards each way, and probably consists of the old palace-platform with certain portions of

the ancient royal residence. The walls are built of burnt brick of a pale yellow colour and excellent quality, laid in fine lime-cement, and stamped with the name and titles of Nebuchadnezzar. They "contain traces of architectural ornament — piers, buttresses, pilasters, &c." (Jard, p. 506); and slabs inscribed with the name of Nebuchadnezzar, and giving an account of the building of the edifice, have been found in the rubbish at their base; together with sculptured fragments and pieces of enamelled brick of brilliant hues. These last-named, which show sculptured figures of animals and

fabulous monsters, recall the statements of Ctesias (*ap.* Diod. Sic.) as to the walls of the palace being coloured and having representations of hunting-scenes. No plan of the palace, however, is to be made out. The mound of *Amrām* (C) is thought by Professor Oppert to represent the site of the "hanging gardens" of Nebuchadnezzar, but this is hardly likely. The materials are much poorer than those of the other edifices of that prince; and the whole being, according to Rich, 1100 yards long by 800 yards broad,⁶ gives an area much too great for the site of the hanging gardens, which are

Chart of the country round Babylon, with limits of the ancient city, according to Oppert.

said to have been only 400 feet each way. It most likely represents the ancient palace of Babylon, it being the only mound from which bricks have been obtained bearing the names of kings older than Nebuchadnezzar. The identifications of the other ruins or remains are still more doubtful, but it is not unlikely that the parallel lines of embankment (II and FF) mark the outlines of the ancient reservoirs mentioned by Nebuchadnezzar and the Greek historians, though they may mark the positions of ancient enclosures or defences of the palace. The position of the "festival-street" (*Aa-ibur-sabû*) mentioned by Nebuchadnezzar is unknown. The

embankment (E) is undoubtedly a portion of the work which Berosus ascribes to the last king of Babylon—Labynetus, Nabonidus, or *Nabû-na'id*.

Babylon in the time of its glory compared with its present condition probably presents the greatest contrast which it is possible to imagine. Poor though the materials were, the inhabitants and rulers had nevertheless erected edifices which, for genius and grandeur of conception, provoked comparison with the pyramids of Egypt, and even in their decay excite the

* Ker Porter regards the shape as that of a triangle, the sides of which are respectively 1400, 1100, and 850 ft.

admiration and astonishment of the traveller. In default of stone, the early inhabitants built houses and palaces of baked or unbaked brick, wood, or even of reeds. Most of the houses were probably very simple structures, with flat roofs, such as are still to be seen in the East. Ancient Babylon must, however, have been a beautiful city, for many of the houses were situated in the midst of gardens and orchards, and here and there might be seen large fields of waving corn of various kinds, and everywhere date-palms and other Eastern trees raised their lofty heads. A vast trade was, from the 6th century to the time of Darius, carried on in the city, which became filled with rich merchants and slaveholders, and the taxes and tithes paid by the inhabitants must have brought in a large revenue to the exchequer and the temple-treasures. Here, during the period above named, were representatives of all the principal nations of the then known world—Jews and Assyrians mourning over their captivity and the desolation of their respective fatherlands; Median, Persian, Phœnician, and Syrian merchants; Chaldean and Aramean soldiers and mercenaries; slaves and serfs from all the countries around. Here the son of Neriglissar lent money upon security, the judges of Nabonidus dealt out justice, and Belshazzar's servant engaged in trade, seemingly on his master's account. This most important and well-populated city, the abode of princes and the great ones of the earth, where so many historical events have taken place, and so much affecting the surrounding nations passed, the capital of one of the greatest nations of ancient times, is now represented merely by a few mounds and ruins, and a few thousand clay tablets from which scholars are slowly gleaning her eventful and chequered record.

Babylon is often mentioned in the Old Testament, and we get from it not only the record of its foundation, but also of the greatness which it ultimately attained, and the prophecies of its fall and utter desolation. The inhabitants of Babylon, by whose rivers the captive Israelites sat down and wept, hanging up their harps upon the willows which were in the midst of it (Ps. cxxxvii.), can no longer mockingly ask for a song from those whom they have carried away captive. She who was to be destroyed (v. 8) has long since been razed to the ground. Often and often, probably, during the numerous sieges to which she has been subjected, were her little ones taken and dashed against the rocks (v. 9). The "burden" which, at the hands of the Medes, was to fall upon the devoted city, is detailed at length by the prophet Isaiah (ch. xlii.). "Babylon, the glory of kingdoms, the beauty of the Chaldeans' pride," was to become "as when God overthrew Sodom and Gomorrah" (v. 19). Besides the great ruins, which are to be seen there, "other shapeless heaps of rubbish cover for many an acre the face of the land. The lofty banks of ancient canals fret the country like natural ridges of hills. Some have long been choked with sand; others still carry the waters of the river to distant villages and palm-groves. On all sides, fragments of glass, marble, pottery, and inscribed brick are mingled with that peculiar nitrous and blanched soil, which, bred

from the remains of ancient habitations, checks or destroys vegetation, and renders the site of Babylon a naked and hideous waste. Owls start from the scanty thickets, and the foul jackal skulks through the furrows." (Layard, *Nineveh and Babylon*, p. 484.) From time to time a few black tents and flocks of sheep and camels are seen scattered over the yellow plain, but no permanent dwelling is erected there, and the sheep of the Arabs probably find but little food among Babylon's barren ruins. "But wild beasts of the desert shall dwell there, and their houses shall be full of doleful creatures; and ostriches shall dwell there, and he-goats shall dance there. And wolves shall cry in their castles, and jackals in the pleasant palaces: and her time is near to come, and her days shall not be prolonged" (Is. xiii. 21, 22). Compare also Jer. l. 39. It is now a long time since the sword fell upon the inhabitants of Babylon (Jer. l. 34), and since the battle was set in array against the daughter of Babylon (v. 42). The trembling of the earth at "the noise of her capture" has long since passed away, and the echoes of the cry which then went up are making their last resound. [T. G. P.]

BA'BEL, TOWER OF. The "tower" (בָּבֶל) of Babel is only mentioned once in Scripture (Gen. xi. 4, 5), and then only in connexion with the city (Babel) which certain immigrants, probably Akkadians (see the article BABEL) began to build in the plain of Shinar, but left incomplete in consequence of the confusion of tongues. No reference to it appears in the prophetic denunciations of the punishments which were to fall on Babylon for her pride. It is therefore quite uncertain whether the building ever advanced beyond its foundations. As, however, the classical writers universally in their descriptions of Babylon gave a prominent place to a certain tower-like building, which they called the temple (Herod., Diod. Sic., Arrian, Pliny, &c.), or the tomb (Strabo) of Belus (see pp. 312, 313), it has generally been supposed that the tower, the building of which, it may be conjectured, was abandoned when "they left off to build the city," was in course of time finished, and became the principal temple of the Chaldean metropolis. Certainly this may have been the case; but, while there is some evidence against, there is none in favour of it. A Jewish tradition, recorded by Bochart (*Phaleg*, i. 9), declared that fire fell from heaven, and split the tower through to its foundation; while Alexander Polyhistor (*Fr.* 10) and the other profane writers who noticed the tower (as Abydenus, *Fr.* 5 and 6), said that it had been blown down by the winds. Such authorities therefore as we possess, represent the building as destroyed soon after its erection. When the Jews, however, were carried captive into Babylonia, struck with the vast magnitude and peculiar character of certain of the Babylonian temples, they imagined that they saw in them, not merely buildings similar in type and mode of construction to the "tower" of their Scriptures, but in this or that temple they thought they recognised the very tower itself. The predominant opinion was in favour of the great temple of Nebo at Borsippa, the modern *Birs Nimrud*, although the distance of that place

from Babylon is an insuperable difficulty in the way of the identification. Similarly when Christian travellers first began to visit the Mesopotamian ruins, they generally attached the name of "the tower of Babel" to whatever mass, among those beheld by them, was the loftiest and most imposing. Rawulf in the 16th century found the "tower of Babel" at *Fahurjah*, Pietro della Valle in the 18th identified it with the ruin *Babil* near *Hillah*, while early in the present century Rich and Ker Porter revived the Jewish notion, and argued for its identity with the *Birs*. There are, in fact, no real grounds for identifying the tower with the Temple of Belus, even supposing that any remains of it long survived the check which the builders received, when they were "scattered abroad upon the face of the earth," and "left off to build the city" (Gen. xi. 8).

The *Birs-Ninrud*, though it cannot be the tower of Babel itself, which was at Babylon (Gen. xi. 9), may, perhaps, as the most perfect representative of an ancient Babylonian temple-tower, be regarded as showing, better than

any other ruin, the probable shape and character of the edifice. This building appears from the careful examinations that have been made of it, to have been a sort of pyramid built in seven stages. "Upon a platform of crude brick, raised a few feet above the level of the alluvial plain, was built of burnt brick the first or basement stage—an exact square, 272 feet each way, and 26 feet in perpendicular height. Upon this stage was erected a second, 230 feet each way, and likewise 26 feet high; which, however, was not placed exactly in the middle of the first, but considerably nearer to the south-western end, which constituted the back of the building. The other stages were arranged similarly—the third being 188 feet, and again 26 feet high, the fourth 148 feet square, and 15 feet high, the fifth 104 feet square, and the same height as the fourth; the sixth 62 feet square, and again the same height; and the seventh 20 feet square, and once more the same height. On the seventh stage there was probably placed the ark or tabernacle, which seems to have been again 15 feet high, and must have nearly, if not

Diagram Elevation of Birs-Ninrud. (Restored by Fergusson.)

entirely, covered the top of the seventh story. The entire original height, allowing three feet for the platform, would thus have been 156 feet, or, without the platform, 153 feet. The whole formed a sort of oblique pyramid, the gentler slope facing the N.E., and the steeper inclining to the S.W.* On the N.E. side was the grand entrance, and here stood the vestibule, a separate building, the debris from which, having joined those from the temple itself, fill up the intermediate space, and very remarkably prolong the mound in this direction" (Rawlinson's *Herodotus*, vol. II, pp. 582, 583). The *Birs* temple, which was called the "Temple of the Seven Spheres of Heaven and Earth," was ornamented with the planetary colours, the basement being black, the second story orange, the third red, the fourth yellow, the fifth green, the sixth blue, and the seventh white, while on the top was a

shrine or chapel. The above cut shows its conjectural restoration by Fergusson. The other chief features of it seem to have been common to most, if not all, of the Babylonian temple-towers. The feature of stages is found in the temples at Warka and Mukeyyer (Erech and Ur, Loftus's *Chaldaea*, pp. 129 and 168), which belong to very primitive times (about 2500 B.C.); that of the emplacement, so that the four angles face the four cardinal points, is likewise common to those ancient structures; while the square form is universal. A similar tower was found at Khorsabad. [See ASSYRIA, p. 278.] On the other hand, it may be doubted whether so large a number of stages was common. The Mukeyyer and Warka temples have no more than two, and probably never had more than three, or at most four, stages. The great temple of Belus at Babylon (*Babil*) shows only one stage, though, according to the best authorities, that too was a sort of pyramid (Herod., Strab.). The height of the *Birs* is 153½ feet, that of *Babil* 140 (?), that of the Warka temple 100, that of the temple at Mukeyyer 50 feet. Strabo's statement that the

* Messrs. Perrot and Chézy, in their *History of Art in Chaldaea and Assyria*, vol. I. chap. IV. (English edit.), are more correct in making each successive stage to have been placed exactly in the centre of that below it

tomb of Belus was a stade (606 feet) in height would thus seem to be a gross exaggeration. Probably no Babylonian tower ever equalled the Great Pyramid, the original height of which was 480 feet.

With regard to the materials used in the tower, and the manner of its construction, more light is to be obtained from the Warka and Mukeyyer buildings than from the *Birs*. The *Birs* was rebuilt from top to bottom by Nebuchadnezzar, and shows the mode of construction prevalent in Babylon at the best period; the temples at Warka and Mukeyyer remain to a certain extent in their primitive condition, the upper stories alone having been renovated. The Warka temple is composed entirely of sun-dried bricks, which are of various shapes and sizes;

the cement used is mud; and reeds are largely employed in the construction. It is a building of the most primitive type, and exhibits a ruler style of art than that which we perceive from Scripture to have obtained at the date of the tower. Burnt bricks were employed in the composition of the tower (Gen. xi. 3), and

the Arab.  implies that the *hcnar* (חֲנִיךָ)

used for mortar was bitumen, which abounds in Babylonia. Now the lower basement of the Mukeyyer temple exhibits this combination in a decidedly primitive form. The burnt bricks are of small size and of an inferior quality; they are laid in bitumen^b; and they face a mass of sun-dried brick, forming a solid wall outside

Temple of Birs-Nimrud at Borsippa.

it, ten feet in thickness. No reeds are used in the building. Writing appears on it, but of an antique cast. The supposed date is B.C. 2500—rather earlier than the time commonly assigned to the building of the tower. Probably the erection of the two buildings was not separated by a very long interval, though it is reasonable to suppose that of the two the tower was the earlier. The date assigned by the Babylonians to Sargon of Agadé is 3800 B.C., and the erection of the Tower of Babel may be set down roughly at about this period.

There is little or nothing to be said as to the probable position of the Tower of Babel. That it ought to be found within the city of Babylon is implied by its name, and by the scriptural account of its erection. The improbability of

its having been the Birs-Nimroud (the Ê-zida of the Babylonian inscriptions) has been referred to above; and there is no indication, in the ancient records, that it was the great and renowned temple called Ê-sagila ("the House of the High Head") at Babylon, though it must be confessed that the name would support such a view. There was, however, at Babylon another temple or temple-tower, apparently held by the Babylonians next in veneration, and called by them Ê-temen-ana-ki ("the House of the Foundation of Heaven and Earth"). Further it was also generally spoken of as "the Tower of Babylon" (*zikkurat Bâbîli* or *zikkurat Babilam*). This

^b *Mukeyyer* means literally "coated with bitumen."

tower seems to have been mentioned, on a geographical tablet, at the head of the list, before that of Borsippa (Ê-zida, or the Temple of the Seven Spheres). Nebuchadnezzar, too, in many of his inscriptions, speaks of having restored it. He says, "Ê-temen-ana-ki, the Tower of Babylon, I made, I completed, and with brick and bright marble I raised its top." It must be left to future research to determine whether Ê-sagila, Ê-temen-ana-ki, or Ê-zida be the Tower of Babel, but the choice may be regarded as lying rather between the first two.

It is not necessary to suppose that any real idea of "scaling heaven" was present to the minds of those who raised either the Tower of Babel, or any other of the Babylonian temple-towers. The expression used in Genesis (xi. 4) is a mere hyperbole for great height (cp. Dent. i. 28; Dan. iv. 11, &c.), and should not be taken literally. Military defence may have been the primary object of such edifices in early times: but the probability is that it was intended to be used as an observatory, and for the offering of sacrifices and performance of religious ceremonies. Most, if not all of the principal cities of Babylonia and Assyria had a tower, and some of them probably more than one.* These towers were called *zikkurâtî*, a word which comes from the root *זכר*, and which probably means, therefore, "memorial-peak," or something of that kind. Um-napistim, the Chaldean Noah, in the story of the Flood, says that, after coming forth from the ark, he "built an altar on the peak (*zikkurat*) of the mountain," and offered sacrifice there. It is therefore probable that the custom of having *zikkurâtî* arose from this act on the part of the Patriarch. Diodorus states that the great tower of the temple of Belus was used by the Chaldeans as an observatory (ii. 9); and the careful emplacement of the Babylonian temples with the angles facing the four cardinal points, would be a natural consequence, and may be regarded as a strong confirmation of the reality of this application. M. Fresnel has conjectured that they were also used as sleeping-places for the chief priests in the summer-time (*Journal Asiatique*, June 1853, pp. 529-31). The upper air is cooler, and is free from the insects, especially mosquitoes, which abound below; and the description which Herodotus gives of the chamber at the top of the Belus tower (i. 181) goes far to confirm this ingenious view.

[G. R.] [T. G. P.]

BABYLON [BABEL], בָּבֶל, Βαβυλών, the country of Babylon or Babylonia (Βαβυλωνία), so called from Babel (Bab. *Bâb-ili*), the name of its capital city [see BABEL, BABYLON]. Though the Babylonians themselves often called their country Bâb-ili or Babylon, this was not its ancient name. The general designation of the whole tract was (according to Fried. Delitzsch) Edin. This name, however, was very rarely used, if used at all, by the Babylonians themselves. The country is generally designated, by both Babylonians and Assyrians, Kar-duniâš,* but this name probably indicated only the

country around the city Babylon itself. A more usual expression was, in Akkadian, *Kingi-Uri*, rendered by *mât Sumeri u Akkadî*, "the land of Sumer and Akkad," Sumer being identified with שׁוּמַר, Shinar, and Akkad derived from the name of the capital city Akkad or Agadé, and meaning the south and north (or south-east and north-west) of Babylonia respectively. Other names for these two districts, or parts of them, were Makan (southern) and Meluhhâ (northern). There were a great many tribes in ancient Babylonia, who gave their names to the districts where they dwelt. The principal of these were Bit-Amukkan, and Bit-Yakin and Tamtim, on the shores of the Persian Gulf, tribes from which sprang several Babylonian kings.

Geography.—Babylonia proper extended from the Persian Gulf (then reaching farther inland than now) to between thirty-four and thirty-five degrees of north latitude. The boundaries probably varied much at different periods, but the tract of country known as Babylonia must have been a narrow strip, following the course of the two great rivers, the Tigris and the Euphrates, and extending therefore in a north-westerly direction. It is a low-lying plain, marshy during the overflowing in the south, but during the dry season is a mere desert covered with a crust of salt, the sky-line being only broken by the hills and mounds marking the sites of the ruins of the cities of this once prosperous and fertile land. The country of Babylonia was bounded on the north by Assyria, on the south by the Persian Gulf, on the east by the mountainous country of Persia and Elam, and on the west by the Syrian desert. The chief cities were Babylon and Borsippa, Kêa (Hymér) and Harsagkalama, Cuthah (Tell-ibrabim), Lagaš (Tell-Lo), Ur (Mukéyyer), Sepharvaim (Abu Habbah), Akkad, Isin or Karrag, Nippur (Niffer), Eridu, Kullab, Erech (Warka), and many others.

Babylonia was in ancient times an extremely fruitful country, for not only was it watered by the two great rivers, the Tigris and the Euphrates, but also by a whole network of canals, which were excavated by the various kings, and which contributed greatly to the fruitfulness of the land. The summers are hot and sultry, the great plains being then scorched and without verdure, but the winters are mild. Petroleum and bitumen springs are found in the Euphrates valley, and hitumen (the "allme" of Gen. xi. 3) was largely used by the Babylonians in building, as it formed an excellent cement. The soil is clayey, and for this reason most of the edifices were of brick, both kiln-burnt and sun-dried, and clay was largely used instead of papyrus or other material for books, records, and documents of all kinds, from a very early date.

Government.—The king was an absolute monarch, and had the power of life and death over his subjects. It is probable that with the Babylonians, as with the Assyrians, people who considered that they had suffered injustice at the

* The city of Niffer seems to have had three.

* Apparently a Kассite or Kassacan name, meaning "the garden of Duniâš."

BIBLE DICTIONARY.—VOL. I.

* From Eme-luhhâ, "(the land of) the pure tongue," or "of the tongue of the servant." It is supposed that the Sumerians were the dominant race.

hands of the judges of the land could appeal to him. The Babylonian kings, however, seem not to have been so accessible to their people as the Assyrian kings, and they were therefore not so popular: hence, perhaps, the many revolutions in Babylonia. The king was, as a rule, the patron of learning, and some of the Babylonian kings had a taste for archaeology, the result being that very many of the ancient monuments which would otherwise, perhaps, have perished, were preserved.

The administration of the various provinces was placed in the hands of different officials, who were responsible to those over them or to the king. The courts of justice were presided over by several judges, who were called the king's judges, and who acted as the judge and jury of modern days. Justice was therefore very fairly administered. Bribes were not allowed, and were probably very seldom offered.

Arms.—The Babylonians were brave, but not warlike, being much more traders than soldiers. Their arms were the sword, dagger, bow and arrow, spear, mace, and sling and stone. Their sports were falconry, and probably also hunting and a kind of boxing or fencing.

Learning.—They preferred learning to fighting, and in this respect differed greatly from the Assyrians. Like most of their kings, the more educated had a taste for archaeology. A knowledge of Phœnician, and probably of Aramaic also, was required in business transactions; whilst the true literary class were expected to know, besides these things, the ancient and dead languages of the country, Akkadian and Sumerian.

Writing.—The wedge-writing of the Babylonians and Assyrians, called also cuneiform, is a development of the earlier line-writing, which

Inscription of Ur-Bau, an early Chaldean king.

was, in its turn, derived from the original hieroglyphics. The wedge-writing proper arose out of the desire of the users of the system to impress the lines of the hieroglyphs, rather than draw them, on the soft clay which they used. The early writing is rather complex, and there is an attempt, in some cases, to keep to the line-forms. Later, this attempt was abandoned, and, as the people wrote more, the characters were much less carefully, because more quickly, formed.

The character *an* (syllabic value) = Akkadian *dingir* = Semitic Babylonian *ilu*, "god":—

Archaic , late form .

The character *su* (syllabic value) = Akkadian *su* = Semitic Babylonian *kutu*, "hand":—

Archaic , late form .

The character *ud* (syllabic value) = Akkadian *u* = Semitic Babylonian *umu*, "day":—

Archaic , late form .

About the year 900 B.C. the writing becomes both simpler and clearer, the characters being very symmetrically formed. From the time of Nabonidus to that of the Arsacidae the writing becomes again less clear. The scribes of Sæoduchinos, Nebuchadnezzar, Nabonidus, and even of Antiochus, were very fond, however, of imitating the ancient and more complicated styles of writing in documents of the better class. [ASSYRIA, Writing.]

Literature.—Besides the records mentioned below, the Babylonians had an extensive literature, consisting of records of the creation of the world, of the Flood, legends of the gods and heroes, fantastic tales accounting for eclipses and the movement of the heavenly bodies, hymns, penitential psalms, and poems; some alliterative proverbs and fables have also been found. Of more serious subjects we have grammatical lists, Akkadian or Sumerian and Babylonian; vocabularies of these languages; tablets on agriculture, geography, natural history, astronomy, and mathematics. There are also tablets of legal precepts, exhibiting an excellent knowledge of the technicalities of law. Special bilingual-lists were drawn up for the use of those likely to be engaged in trade; and a great many fragments of tablets, containing the Babylonian students' practice in reading and writing, have come down to us.

Time reckoning.—The year with the Babylonians, as also with the Assyrians, began with the month Nisan (March); the new moon next before the equinox marking, according to Mr. Geo. Smith, the beginning of the new year. The year was divided into twelve months, each of thirty days,* so that the reckoning of time was not entirely lunar. The following are the most usual names of the months in Babylonian:—

1. Nisannu	Nisan	March.
2. Aaru	Iyyar	April.
3. Simannu	Sivan	May.
4. Dâru	Tammuz	June.
5. Âbu	Ab	July.
6. Ūlûlu	Elul	August.
7. Tîrîtu	Tisri	September.
8. Araḫ-samru ^a	Marcheswan	October.
9. Kisîmu	Kisleu	November.
10. Tebêtu	Tebet	December.
11. Šabâtu	Sebat	January.
12. Âdaru	Adar	February.

Arḫu makru is *Adari*, *Arḫu makru* is *Adari*. *Arḫu dîaru* is *Adari* = the intercalary Ve-Adar.

Besides Ve-Adar, there was also an intercalary Elul as well as an intercalary Nisan.

Calendars were drawn up, giving all the lucky and unlucky days, and the learned men were often consulted as to the suitability of any

* The ideograph for "month" is the sign for "day" with the numeral 30 within.

^a "The eighth month."

day for some particular work. Besides these calendars, there were also tablets giving the religious festivals for each day of every month, as well as rules as to one's life on these days, and the list of the Sabbaths, which were the 7th, 14th, 21st, and 28th of each month. The Babylonian sabbaths, however, were not by any means so strict as those of the Jews. There was also an intercalary day inserted after the 21st of the month.

Each day had twelve hours, which were equal to two hours of our own time-reckoning. The night was divided into three watches. In travelling, the length of a journey was reckoned by hours, about seven English miles being the distance got over in a Babylonian hour.

Dating.—In the earliest times in Babylonia the dating of trade documents was by means of events, such as the building of a temple, the digging of a canal, or the march of a warlike expedition. Later on, the people seem to have regarded this as rather clumsy and inconvenient, and the system of dating by the regnal years of the kings came into use. The Assyrians held the middle course of dating by eponyms, which may have been also an early Babylonian custom [see ASSYRIA]. In every case the month and day were inserted.

Records.—Defective as was the Babylonian system of dating, they were yet most careful as to keeping records of events, and they have left excellent lists of all their kings from at least as early as the year 2300 B.C.; and Nabonidus, the great Babylonian chronologist, mentions the date of 3200 years before his time as the date of Naram-Sin, son of Sargani or Sargon, and it is not at all unlikely that he had good authority, in the shape of authentic records, for that date. Besides the Babylonian canons, there were also the chronicles, giving a very full account of the events of every reign, and omen-tablets, giving the principal events and the omens to be deduced therefrom, to enable the after-comers to form an estimate of what might be likely to happen under the same astral influences. It is probable therefore that the extreme exactness of the Babylonian records arose from the strict account kept of the movements of the heavenly bodies.

Trade; Slavery.—The Babylonians were ardent traders, and have left documents dating from the earliest times. They begin about the time of Hammurabi, 2120 B.C., and are written, for the most part, in Akkadian, that period seeming to be the transition from the non-Semitic to the Semitic in trade and legal documents, though all the people at this time spoke Semitic Babylonian. These early trade documents were always made in duplicate, each transaction, having been recorded on a clay tablet, having an outer coating or envelope of clay moulded on it, and this in turn inscribed with the same transaction. All these documents are dated by the mention of some important event which took place at or near the time when the transaction was completed. They are generally impressed all over with the seals of the contract-

ing parties, rendering the writing exceedingly difficult, and sometimes impossible, to read. In

A Babylonian cylinder-seal.

later times the trade documents are smaller and neater, the style of writing not being so complicated. The more convenient method of dating

Part of the edge of a tablet of the time of Nabonidus, showing impressions of cylinder-seals Priests (men and eunuch) in an attitude of worship. (Late Semitic type.)

in the regnal years of the kings came also into use. Seals, however, are not much used, and case-tablets entirely disappear. During the latest period the style of the trade documents does not change much. The writing, however, gets rougher; seals are more used; and small case-tablets again become usual. During the earliest and latest periods, the clay tablets were seldom baked, being only sun-dried. The objects bought and sold were houses, lands, plantations, ships, oxen, sheep, goats, various kinds of grain, vessels of earthenware or copper, ironware, &c. The traffic in human beings was very common; and slaves, both male and female, were sometimes branded or marked on the hand with the name of their master or mistress. The trade done at Babylon and Sepharvaim from the time of Nabonidus until the end of the reign of Darius was enormous.

Though slavery was in full force in Babylonia, yet the slaves do not seem to have been at all badly treated, and there were special laws for their protection. They seem to have been allowed to acquire property and even to trade on their own account, and it is probable also that many were allowed to buy their freedom with the money thus gained (see p. 325, *Manners and Customs*).

Architecture.—The Babylonians were no mean architects, and knew the use of the arch. There being but very little or no good building-stone in the country, most, if not all, of the buildings were of brick, both baked and unbaked. It is very probable that any stone that may have been used (as in the case of the bridge at Babylon mentioned by Herodotus) was brought from other lands—probably from Assyria, where limestone and alabaster are to be found. The early Mesopotamian buildings were seldom, if ever, more than one story high. They were built of both baked and unbaked brick, and

like those of Assyria, the palaces probably consisted of a series of long narrow rooms, with communicating passages, built round several courtyards of various sizes (see the article *ASSYRIA, Architecture*). Though not altogether ignorant of the use of the column, and probably also of the pier, the Babylonians seem, like the Assyrians, to have made little or no use of either—hence the long narrow rooms. Like the palace of Assyria, horizontal lines predominated in its general physiognomy, and perpendicular lines in its exterior wall-decoration. Like the Assyrians also, the royal buildings were raised on artificial platforms with carefully-paved surfaces. The lines of the great buildings rose therefore high above the surrounding country, attaining a greater prominence than any other edifice, and breaking the tiring monotony of the unvarying Mesopotamian plain. Their style of architecture was very simple, and was not greatly varied; but as most of the royal palaces were on a large scale, the very simplicity added somewhat to the grandeur of the whole. A certain number of the bricks were generally stamped with the name and titles of the king who had the palace built or restored. The ornamentation of the inside consisted generally of designs of men, animals, and fabulous monsters, modelled in brick in high relief, and enamelled in the natural colours—a branch of art in which the Babylonians probably excelled. Far grander, however, in appearance than the palaces, were the temple-towers, such as have been described by Herodotus. These consisted of pyramidal towers built in stages, rising in seven tiers either by an inclined passage all round, or in a similar number of stages parallel with each other, to which access was gained by inclined passages on each side, until the top was reached. These *zikkurāti* ("peaks" as they were called) are supposed to have contained only two chambers, one on the fifth stage, the other higher up, all the rest being solid. In these chambers the worship of the gods was performed, and shrines for the images of the gods were erected within them, and in some cases also on the top of the tower. Simpler forms of

A simple form of Babylonian temple-tower.

the temple-tower, similar to that shown in the illustration, also existed.

Art.—Practically, the art of Babylonia was the same as that of Assyria, though there are some essential differences as to style and detail, the Babylonian having, of the two, rather less mannerism. The art of the earliest period is naturally that which might be supposed to exist among a nation in its infancy, the artist being unskilled, and his productions, therefore, amateurish. On the bas-reliefs from Tel-lo (Lagash), for example, the human figures, in common with everything else, are very roughly formed; but especially rough are some representations of birds of prey carrying off the limbs of the

slain. The designs, however, are sometimes well thought out. Much better executed are the sculptures in the round, from the same place. These represent seated and standing figures probably intended for images of the kings Gudea and Ur-Bau, whose inscriptions they bear. All the figures are headless, but two heads, probably belonging to similar statues, are very fine. The art of Lagash, however, may be regarded as almost, if not quite, pure Akkadian. A small bas-relief in the British Museum, representing king Hammurabi, is a variant of the same style of art. It is impossible, on account of the lack of monuments, to trace the development of Babylonian art. We only know, from the later examples which are extant, that, possibly on account of Semitic influence, it became bolder, more finished, and that more attention was paid to details. (Compare the monument known as the "Sungod-stone," found by Mr. H. Rassam at Abu-habbah, and the bas-relief of Marduk-nadin-ahi, p. 329.) The decorations of the palace-walls, of which only the merest fragments are now in existence, imply a style still closer resembling that of Assyria—bold outlines, and strongly-marked muscles in the human and animal forms. These wall-decorations were carved on the bricks, and then enamelled in bright colours. They consisted of men, fabulous monsters, palm-trees, &c., and call to mind the statement made by Ctesias, as to the walls of the palace of Babylon being sculptured and coloured with representations of hunting-scenes, &c., and the "men portrayed upon the wall, the images of the Chaldeans portrayed with vermillion, . . . exceeding in dyed attire upon their heads, . . . after the manner of the Babylonians of Chaldaea, the land of their nativity" (Ezek. xliii. 14, 15). These enamelled carvings seem also to have been accompanied by inscriptions, the characters beautifully enamelled in white on a blue ground. The Babylonians also modelled very well in clay, a very favourite subject being a woman with a child at her breast (perhaps emblematic of Ištar). Many excellent castings in bronze, from Lagash, also exist. They represent principally king Gudea holding a cone with the point downwards, thought to be intended for the fire-stick.

Engraving.—The Babylonians were, from the very earliest times, excellent engravers in hard

Warrior and followers returning with two captives and spoils of war. Seal of the secretary of the king of Erech's brother. An example of exceedingly early Babylonian engraving. About 2500 B.C.

stone. The earliest specimen of this kind of art is a cylinder-seal with the name of Sargani or Sargon, about 3800 B.C. The design, though conventional, is rather elaborate, and the

animal forms are especially good. Later the style grows simpler, but the forms are still good; and it is not until about 2000 B.C. that the art began to degenerate, and probably about 1200 B.C. began to die out, or at least only lingered on until the time of Nabonidus, at which period another style arose, of a much severer kind, in which, however, the human figures are excellently formed, and much attention is given to details. The art of engraving among the Babylonians suffered greatly upon the conquest of Babylonia by the Persians, and the almost national cylinder-seal gave place to the ordinary stone signet. After the time of Darins, engraving on stone, in the true Babylonian style of the art, had ceased to exist.

Religion.—The religion of the Babylonians was polytheistic, developed out of a worship of the powers of nature. The chief god was Bēl (the lord), identified in later times with Marduk or Merodach, "the patriarch of the gods" who went about doing good to mankind. Other deities were Anu and Anatu, the male and female personifications of the heavens; Éa or Aē, "lord of the human race, whose hands made mankind;" Sin,* the moon-god, "lord of the month;" Šamaš, the sun-god, "lord of judgment," and his consort Aa; Rammanu (Rimmon) or Addu (Hadad) the god of the atmosphere, who fertilised the land; Beltis, consort of Bēl, and Zer-panitum, consort of Marduk; Ištar or Venus, goddess of love, "lady of the world;" Nin-harrag (lady of Karrah or Isin), "the great healer;" Gibil, the god of fire, with many others. On every occasion these gods were prayed to and invoked, splendid temples were erected to them, sacrifices were made at stated times, and yearly festivals, with magnificent processions in which their "ships" (nrka or shrines) were carried round, took place in their honour. See the article BABEL, BABYLON (end of "Nebuchadnezzar's account"), and ASSYRIA, Religion.

Manners and Customs.—The manners and customs of the Babylonians probably varied from time to time, as they were influenced by the nations around with whom they came into contact. Strabo (xvi. 1, § 20) says that their customs were like those of the Persians (save a few which were peculiar to themselves), but this naturally refers only to the late period, during and after the Persian occupation.^a

Very few records of a nature to give information upon these points have come down to us from the earliest period, the principal sources being the very difficult contract-tablets from Southern Babylonia, dating from about the 22nd century B.C. From these it is to be gathered, that they worshipped practically the same deities as in later times, Šamas and Sin (the sun and the moon) being the favourite deities. At this period, although Semitic Babylonian had practically become the language of the people, it is nevertheless probable that

Akkadian was much used, portions at least of most of the legal documents being written in that tongue, and Akkadian names of persons being not uncommon. At this early period one of their customs seems to have been to "make brotherhood" (*tappūtu* or *đhiūtu*). The single record of this custom, the Deed of the Brotherhood of Šini-Innana and Iribā-Sin, shows that it was accompanied by a religious ceremony in the temple of the Sun and Moon. They were told to give some slaves to the temple; their brotherhood was then declared to be confirmed, and an exhortation to brotherly love was pronounced. The two parties to one of these deeds could, however, possess property that was not in common, if acquired otherwise than with their common means. Thus Šini-Innana and his true brother Apil-ili acquired, with their mother's money, property to which, it is stated, Iribā-Sin (Šini-Innana's partner) and his brothers had no claim. In later times "brotherhood" of this kind seems not to have existed, an ordinary business partnership (*harrana*, lit. "a double road") having taken its place.

Slavery had existed in Babylonia from very remote ages, and many laws and enactments concerning it had grown up. Slaves seem to have been liable to be called on to perform service for the king, &c., and a slave sold unconditionally could be bought back by the seller on refunding the money. As in Rome, slaves were taught trades, and were regularly apprenticed, the tablet of apprenticeship generally recording certain penalties which would be imposed if his temporary master failed to fulfil his agreement. Slaves seem to have been able to work their way, by the favour of their master, up to freedom, through certain intermediate privileged stages, one of which was called *mār-banūtu*, or "born-" or "made-sonship." He was then regarded more as the son of his master, for whom probably he still worked, and who contracted to give him food, oil, and clothing. A case is recorded of the *mār-banūtu* of a slave having been annulled, by mutual consent, on account of his master having been unable to fulfil these conditions. His master then transferred the slave to his married daughter.

Herodotus (i. 194) and Strabo (xvi. 1, 20) speak of a custom by which young women were sold by auction, those who were good-looking going to the highest bidder, and the plain ones to the man who would take them with the smallest dowry, the money paid for the good-looking ones going to dower their less-favoured sisters. The native records make no mention of this custom. Dower-contracts exist, but, as far as known, they are all of the nature of a private contract between the parties and their parents. In one or two marriage-contracts, the clause is inserted that adultery is to be punished by death, which was apparently the usual penalty. From one of these documents it seems that a man could contract a marriage on behalf of his son, and also annul that contract by simply saying "(N. N.) *ūl aššātu* ēi," "(So-and-so) is not a wife," but in that case the dowry had to be returned at the time when the woman was sent back to her father's house. It is not improbable, therefore, that a man could himself divorce his wife in the same easy way. Judging from the native records, dowries seem

* This divine name forms the first element in the name of the Assyrian king Sennacherib.

^a This name forms part of the royal names Merodach-baladan, Evil-Merodach, &c.

^b Babylonians at this period sometimes even bore Persian names, as in the case of a certain Baga'pada, son of Nabū-zēr-iddin, a Babylonian.

to have been the rule, and not the exception. Married women could possess property and engage in trade, and on the death of their husbands were entitled to the amount of their dowry out of what he left behind.

Only a portion of the wedding ceremony, on a fragment of a tablet from Nineveh, has been preserved. According to this document, after the priest had pronounced the couple to be man and wife, they were commanded to make offerings of certain things in sevens—7 canes, 7 cypress-branches, 7 victims, &c. &c., placed 7 feet from the altar. The priest then performed certain rites, and afterwards uttered a prayer to Éa or Aš, to Šamaš, and to Merodach. Ištar or Venus is not mentioned.

No real confirmation has been found in the native records of the sacrifice by maidens of their virtue, to Mylitta (Venus), mentioned by Herodotus and Strabo. According to these writers, the women go to a temple of Venus, accompanied by numerous attendants and a crowd of people. Each woman has a cord round her head. A man, on approaching her, placed on her lap as much money as he thought proper, and then led her away to a distance from the sacred grove, and had intercourse with her, she not daring to refuse. The money given was considered as consecrated to Venus. It is apparently to this that reference is made in Baruch v. 43 (Epistle of Jeremy): "The women also with cords about them, sitting in the ways, burn bran for perfume" [i.e. as incense to the goddess]: "but if any of them, drawn by some that passeth by, lie with him, she reproacheth her fellow, that she was not thought as worthy as herself, nor her cord broken;" and from this, it would seem as if the breaking of the cord (apparently that about her head) typified her release from the obligation. An examination of some of the female figures with their hands beneath their breasts, or folded upon their breasts, supposed votaries of Venus, shows only one with what may be a cord round the head.^a

Strabo states also that the Babylonians had three tribunals—one of whom military men, one of nobles, and a third of old men. Besides these there was another appointed by the king. No certain indications of any of these have yet been found in the native records, but "the Judges of Nabonidus," who are often mentioned on the tablets of his time, probably correspond with the last. According to Strabo, it was the tribunal appointed by the king which disposed of the virgins in marriage, and decided in cases of adultery. The judges mentioned on the tablets seem to have had to determine all civil actions, such as disputes as to property, &c. Of the Babylonian laws which have been preserved, and the juridical decisions recorded, none could be juster.

^a A tablet, in private hands, records a contract by which a man swears to send his daughters, not to the temple of Venus, but to that of the Sun-god at Sippara, saying, "About the tenth day of Sivan, I will take Šabuliatu, Tablūtū, Tunā, (and) Amtū, my daughters, to the treasury of the Sun-god, before Guzann, the priest of Sippara. Whether it be male or female, I will place it before the Sun-god for redemption." If this latter phrase refer to the offspring, this text may record a kind of parallel to the custom mentioned by Herodotus and Strabo.

The same writer (xvi. 1, § 6) mentions the "native philosophers called Chaldeans," who were chiefly devoted to the study of astronomy [CHALDEANS, 3], and a certain section of them, not approved by the rest, who professed to understand the casting of nativities. Some of the Chaldean astronomers, he says, have the names of Orcheni and Borsippeni (Erechites and Borsippans), &c., as if divided into sects, and disseminate different tenets on the same subjects. This statement is borne out by the native records. Herodotus states that the sick were brought out into the market-place, where the passers-by were expected to ask after their malady, and to give them advice; but the reason he gives for this, that they employed no physicians, is not true. The *āsi*, or physician, was a recognised office from very early times. The Babylonians were also accustomed to the use of incantations and charms for the cure of diseases.

Strangely enough, there is but little to be gathered from the native records concerning their funeral customs. Strabo says that they buried their dead in honey, first be smearing the body with wax. This, however, probably refers to the latest period; for the indications which have been gained from the native records, both Assyrian and Babylonian, imply that they burnt their dead, and the sepulchral remains which have been found at El-hibba confirm this.

The Babylonians consumed dates, as food, in large quantities, and used various kinds of corn, greens, and roots, such as the carrot, &c. They drank wine from Helbon and Azali, and seem to have had many kinds of grapes. They were also flesh-eaters, and consumed, probably, a large amount of fish, principally caught by means of nets, as indicated by the bilingual texts. Sesame was much used, the oil pressed from it being employed in dressing dishes, and for anointing the body. Their costume, according to Herodotus and Strabo, consisted of a linen tunic reaching to the feet, then a woollen tunic, and over that a white mantle. They wore sandals or shoes resembling a skin, long hair, curled, and were accustomed to perfume themselves. Each had a cylinder-seal and a wand, the former engraved, the latter carved with an animal or device.

The Babylonians were exceedingly superstitious, and made constant use of charms and magical formulae either to protect themselves from evil, misfortune, and sickness, or to charm them away if any such happened to them. The god who was most sought on such occasions was Merodach, who was regarded as the most merciful of all the gods, going constantly about, doing good. In many of the incantations he is represented as the one who taught the magical healing formulae to the first man needing it. Merodach was in all things advised by his father Éa, god of the waters and lord of deep wisdom, and to him Merodach always went for the health-working words which were to charm away the trouble of his human supplicant. Magical drinks and washings were also largely used. Before taking in hand any work also, the Babylonians seem always to have ascertained whether the day were lucky or unlucky for its performance, whether the

heavenly bodies were propitious, or whether the terrestrial omens were equally favourable.

The Babylonians.—The Babylonians seem to have been of mixed race, caused by the mingling of the Akkadians (supposed Turanians) with the Semitic tribes of the Euphrates valley. Certain

duction of a nation far superior to most of the peoples around them as to intelligence, and ideas of freedom and justice. The Babylonians of later times seem to have been of very nearly the same type as the Assyrians—a round face, full eyes, with eyebrows meeting over the nose,

Impression of a cylinder-seal. The hero Gistubar (Gilgamesh) struggling with a lion. Babylonian (Semitic) type of about 3000 B.C.

it is that the cylinder-seals, as well as the few sculptures that have come down to us, show us two distinct types—the earlier (evidently the

Impression of a cylinder-seal. Deity, worshipper, and divine attendant. Akkadian (non-Semitic) type of about 2,500 B.C.

Akkadian) being tall, thin, well-formed, with exceedingly handsome, regular features;¹ and the later, in which the figure is short and thick, the features being decidedly Semitic. It seems clear that the more polished race, the Akkadian (or Sumerian), was, at an early period, the ruling race, and Akkadian was the language of a large section of the people. Later, the two races mingled, and the Akkadian type was lost in the stronger Semitic. The result of this mingling of the two races was the pro-

Head of a Babylonian.

Impression of a cylinder-seal. Ennuch-priest before emblems of the sun and moon. Babylonian type of about 600 B.C.

¹ There are no traces, on any of the sculptures or the engraved seals, of the oblique eyes of which several scholars have spoken.

which was short and turned down at the tip, small mouth, and dark hair and beard. In disposition they were mild and good-humoured, and seem to have differed from the Assyrians in loving the arts of peace, rather than those of war. The illustrations here given show the two types which produced the late Babylonian and also the Assyrian—early Semitic, almost, if not quite, pure, and early Akkadian, the result of the fusion being the type of face

shown in the next two illustrations, and in the reproduction of the seal-impressions, p. 323. See also the corresponding section of the article *ASSYRIA*, and the type shown in the illustration to that article on p. 274.

History.—Babylonian history may be divided into three periods, namely—1, the mythical period, immediately following the Flood, when lived and ruled the heroes, such as Gistubar (Gilgamesh), Tābi-ūtūl-Bel, and others; 2, the first historical period, which lasted until about 2300 B.C.; and 3, the second historical period, from about 2300 B.C. until the end of the existence of the kingdom.

The earliest king of whom we have any certain record is Sargina or Sargon of Agadé, a city lying very close to Sepharvaim (Abū-habbah). This king, who according to Babylonian chronology reigned about 3800 B.C., attacked the Hittites, subdued certain states in Babylonia, made expeditions against the Syrians, and penetrated as far as the Mediterranean. After this he put down a revolt which had arisen in his own dominions, and wasted the region called Sinmašti (a part of Elam). He restored and rebuilt various temples, &c., and founded a city called Dūr-Sargina, on the site of an old Chaldean town. The story of his mother placing him, when an infant, in a little ark on the Euphrates, to save him from the fury of his uncle, who then ruled the land, is probably mythical. Sargina is evidently identical with the Sargani of a very ancient inscription found by Mr. H. Rassam at Abū-habbah or Sepharvaim.

Narām-Sin, his son, who succeeded him about 3750 B.C., conquered, amongst other places, the city of Apirag, then ruled by a king named Rēš-Rammāni, and overran the land of Maganna, a district of Babylonia.

Ur-Bau, or Ur-Babi (formerly read Uruk), a king probably of Kassite origin, reigned about 2700 B.C. He was a great builder, and raised, in the city of Ur (Mukeyyer), a temple to the moon-god Sin, and restored or founded at Larsa (Senkerah), Nipur (Niffer), and Lagaš (Tel-lo), temples to the various gods. Hahamer was a viceroy under him.

Ur-Bau was succeeded by Dungi, his son, who finished the tower of Ur, rebuilt the temple of Erech, and built a temple at Babylon.

About the time of Dungi, the state of Lagāš comes into prominence, and the names of the following rulers of this state, which must have had much influence, have been preserved:—En-temenna and his son En-ana-gin, Ri-nita-ni, Ur-Papsukal and his son Gudea. These kings are only known to us as having restored the various temples, and Gudea was especially very energetic in such pious works.

Subject from the signet-cylinder of king Ur-Ban.

The seat of empire passed afterwards to Larsa (Senkerekh), which, under an Elamite dynasty, of which the first king seems to have been Simtilhak, became the most influential city in Babylonia. Kudur-Mabug^a and Rim-Agu, his son and grandson, conquered several other parts of Babylonia. After the long and prosperous reign of Rim-Agu, his dominions seem to have been conquered by Hammurabi¹ or Kimta-rapaštu, about 2120 B.C.

Hammurabi was a vigorous ruler and builder, but details of his campaigns are entirely wanting. He made himself master of the whole of Babylonia, including the region of the Persian Gulf.

Samsu-iluna, his son, succeeded him about 2075 B.C., but nothing except the architectural history of his reign is known. He reigned thirty-five years, and was succeeded by his son Ébišu.^m

About 1570 B.C. arose a dynasty of Kassite kings, the most distinguished of whom was Agū-kak-rimé, son of Tašši-gurumaš, grandson of Abi-gurumaš. Agū-kak-rimé calls himself king of Kašši (the land of the Cossaeans), and Akkadi, king of the vast land of Babylon, coloniser of Ašnunak, king of Padan and Alman and Gutl. The dominion of many of these countries he had evidently gained by conquest. Like most of the Babylonian kings, he was more an architect than a warrior.

About the year 1450 B.C. Kara-indaš ruled over Babylonia, and made a treaty with Aššur-bēl-niškī-šu, king of Assyria, as to the boundary of the two kingdoms.

^a The likeness of this name to Chedorlaomer (Kudur-Lagamaru) will be noticed.

¹ Also read Hammuragāš.

^m Apparently the same name as Ab'su', found on contracts from Babylonia.

Burna-buriaš, who reigned about 1425 B.C., continued the peace with Assyria, and seems to have married an Assyrian princess, Muballitat-Serā, daughter of Aššur-uballit.

Kara-Murdaš was the fruit of this marriage, and seems to have succeeded Burna-buriaš. Some disaffected Kassites, however, arose, and, killing Kara-Murdaš, placed Nazi-bugaš, "the son of a nobody," on the throne.

Aššur-uballit, king of Assyria, to avenge the death of Kara-Murdaš, marched to Babylonia and killed Nazi-bugaš, placing on the throne Kuri-galzu, a child, son of Burna-buriaš. Kuri-galzu had a long and prosperous reign, but Bēl-nirari, king of Assyria after Aššur-uballit, attacked him, and defeated his army near the city Sugaga.

Later, about the year 1330 B.C. Nazi-murtal, king of Babylonia, was defeated by Rammāna-nirari near Kar-Istar-akarsal, and a new rectification of the boundary of the two countries took place.

About the year 1250 Tukulti-Ninip, king of Assyria, conquered Babylonia, and a little later the country was invaded by Aššur-danan, who completely defeated the king of Babylonia, Zagaga-šum-iddin.

Nebuchadnezzar I., who ruled about 1150, invaded Assyria three times, but is said to have been defeated on the third expedition by the Assyrian king Aššur-rēš-iši. Marduk-nadin-ahi, Nebuchadnezzar's successor, invaded South Assyria and carried off the images of the gods Rammānu and Šala from the city of Ékallāti. Tiglath-pileser I., king of Assyria at this time, to avenge this raid, captured Babylon and ravaged the whole of Upper Babylonia.

Marduk-šapik-kullat,ⁿ king of Babylonia about 1100 B.C., made peace and alliance with Aššur-bēl-kala, then king of Assyria. The Babylonian king, however, seems to have left his country for some reason; and whilst he was away, the Babylonians raised Rammānu-abla-iddina, a man of common origin, to the throne. Aššur-bēl-kala of Assyria afterwards married a daughter of the new Babylonian king.

In the reign of Simmaš-Šihu, the Sūtā, an Elamite tribe, invaded Babylonia, and spoiled and carried off the property of the temple of the sun-god at Sepharvaim. Simmaš-Šihu reigned seventeen years, and was succeeded by Hamukin-zēri, a usurper, who reigned only three months. Kaššū-nadin-ahi, who succeeded Hamukin-zēri, restored the temple of the sun-god at Sippara. Of the history of the reigns of the next few kings nothing is known.

Merodach-baladan, son of Iriba-Marduk, restored the temple of Erech. Sibir, a later king, invaded Assyria, and burned the city Adil. Nabū-šum-damiq (B.C. 913) and his successor Nabū-šum-iškun both fought against Rammāna-

ⁿ Also read Marduk-šapik-zēr-māti.

nirari, king of Assyria, but were defeated by him.

About 892 B.C. Tukulti-Ninip of Assyria took possession of the throne of Babylon, and ruled the country for seven years. During the struggle which followed upon his expulsion, the Babylonians seem to have been strong enough to take and hold the Assyrian cities of Calah and Imgur-Bél, near Nineveh, until they were again wrested from them by Aššur-naṣir-apli.

About 879 B.C. Nabû-abla-iddina ("Nebo-baladan") came to the throne. He made a

usáte, brother to the reigning king, laid claim to the throne, but the revolt was only quelled with the help of Shalmaneser and the Assyrian army.

In the years 820-812 B.C. Samsi-Rammanu, king of Assyria, made several expeditions to Babylon against Marduk-balaṣṣu-iḫbi, in one of which at least the Babylonian army was defeated, and the city Dûr-Papsukal taken. The names of the next few kings of Babylon are unknown.

In 747 B.C. Nabonassar came to the throne, and reigned over Babylon for fourteen years. It is said by Berosus, *Synec. Chron.* 207, that this king destroyed all the annals of his predecessors to compel the Babylonians to date from his reign, but this is evidently only a fiction to explain the Era of Nabonassar, for not only have we many important fragments of the Babylonian annals, but the Babylonians themselves seem not to have used his reign as a starting-point either in their chronology or in dating business documents. During his reign a revolt occurred in Babylon and Borsippa, but was quelled. He died in his palace at Babylon, and was succeeded by his son, Nabû-nadin-zêri or Nadinu, the Nadios of the Canon of Ptolemy. This king was killed, after a reign of two years, in a revolt led by Nabû-šum-ukin or Šum-ukin, who reigned only one month.

Nabû-šum-ukin was succeeded by Ukîn-zêr (the Chinzirus of the Canon of Ptolemy), chief of the tribe of Bit-Amukkan, B.C. 731. Tiglath-pileser III. of Assyria, however, invaded Babylonia, destroyed Bit-Amukkan, and took Ukîn-zêr prisoner, after a short reign of three years (B.C. 728).

The Babylonian Canon gives Pul or Pul, 2 Kings xv. 19 (Poros)—whose attack upon Israel was bought off, and his help secured, by a payment, by Menahem, of a thousand talents of silver—as the next ruler, but the chronicle gives Tiglath-pileser—apparently the name assumed by Pul on his accession to the throne. He died after a reign of two years, and was succeeded, according to the Canon, by Ulula, the Elulæus of Ptolemy. The chronicle, however, gives Šulman-ašarid, the Šalmanu-ašarid III. (Shalmaneser) of the Assyrians. The Babylonian chronicle records that this king destroyed the city of Samara'in.* He died, after reigning five years in Babylon. (For a fuller account of these kings, see the corresponding section of the article ASSYRIA.)

Merodach-baladan, a Babylonian from Tamtim south of Babylonia, mounted the throne after the death of Shalmaneser, B.C. 721. During the reign of this king a great battle took place in the province of Dûr-ili, between Ummanigâš, king of Elam, and Sargon, of Assyria, in which, it is stated by the Babylonian chronicle, the former was victorious. Merodach-baladan came to the aid of the Elamites, but was only in time to join in the pursuit. Sargon (who, in his annals, claims the victory) retreated to Assyria, and did not return to the conquest until the year 712 B.C. Merodach-baladan made great efforts to withstand him, but was defeated, and compelled to retreat to Iḫbi-Bél,

* Or Samara'in, identified by Prof. Fried. D. Hitzsch with Samaria (cp. 2 Kings xvii.).

Marduk-nadin-ahh, king of Babylon about 1130 B.C. (Carved on a large black stone brought from Babylon and now in the British Museum.)

great many additions to the shrine of the sun-god at Sippara, and joined the Shuites in resisting Aššur-naṣir-apli, king of Assyria. The allies were defeated by the Assyrians. The leader of the Shuites escaped by taking to the Euphrates, but the brother of the Babylonian king and the general of the army were captured by Aššur-naṣir-apli. After the death of the Assyrian king, a treaty was made between Nabû-abla-iddin and Shalmaneser II., settling the boundaries of the two kingdoms.

About 853 B.C. Nabû-abla-iddin died, and was succeeded by his son, Marduk-šum-iškun. Babylonia was now torn by civil war. Marduk-bél-

whilst the Assyrian king entered Babylon in triumph. Merodach-baladan was captured in Iktî-Bêl, and taken prisoner to Assyria.

Sargon, the Arkeanos of the Canon of Ptolemy, reigned at Babylon, after the conquest, for five years, and was succeeded, in the year 705 B.C., by his son Sennacherib, who was deposed, however, two years afterwards, and Marduk-zakir-sum placed on the throne. This king, however, reigned only one month, for Merodach-baladan, having escaped from the Assyrians, killed him, and again mounted the throne of Babylon. Sennacherib marched to Babylon, defeated Merodach-baladan at Kîa (Hymér), and compelled him to flee. Sennacherib now ravaged the country, and set on the throne of Babylon a Babylonian prince named Bêl-ibni, the Belibns of the Canon of Ptolemy.

The government of this prince seems not to have been satisfactory to the Assyrian king, for in the third year of the reign of Bêl-ibni Sennacherib came to Akkad and ravaged the country, and carried away Bêl-ibni and his chief men to Assyria, setting on the Babylonian throne his own son Aššur-nadin-sum.

Troubles, however, still continued in Babylonia, a chief named Suzub having arisen and placed himself at the head of a large army. This new pretender was defeated by Sennacherib, and obliged to flee and hide himself. Sennacherib now marched against the kindred of Merodach-baladan who were at Nagitu, on the Persian Gulf, completely defeating them. Whilst Sennacherib was on this expedition, Suzub, the Nergal-ušêzib of the Babylonian chronicle, raised, with the help of the king of Elam, an army and marched to Babylon, where he was proclaimed king, Aššur-nadin-sum being carried captive to Elam.² The Assyrian army, then on their way home, turned aside and defeated the rebels, and Suzub was captured and sent to Nineveh. Sennacherib then attacked Elam, and whilst engaged there, another Suzub, the Mušêzib-Marduk of the Babylonian chronicle and the Meesimordachos of the Canon of Ptolemy, mounted the Babylonian throne. During his reign Umman-menanu, king of Elam, with an army of Elamites and Akkadians, fought with the Assyrians near the city Haluli. Later, however, the Elamite seems to have become the friend of the Assyrians, for he invaded Babylonia, captured Mušêzib-Marduk, and sent him to Assyria, and Babylonis fell under the rule of the Assyrians for twenty-one years (688-668 B.C.).

After the death of Sennacherib in 681 B.C., Esarhaddon his son came to the Babylonian throne. Babylon enjoyed comparative peace during his reign, the only formidable invasion being an Elamite raid, which penetrated as far as Sepharvaim. Esarhaddon fell ill and died on his way to Egypt, B.C. 668, and was succeeded in Babylonia by his son, Šamaš-šum-ukin or Saosduchinos.³

During about the first ten years of this king's reign Babylon was at peace, but the quiet was broken at the end of this by Urtaku, king of

Elam, who persuaded Bêl-ikîša, with some other petty Babylonian chiefs, to join him in a war against Saosduchinos and Aššur-bani-apli his brother. The result of this war was that Elam was conquered by the Assyrians, who deposed Urtaku, and placed on the throne Umman-igâl, one of his sons.

Saosduchinos, however, seems to have become dissatisfied at being a vassal of his brother, and determined to try to make himself quite independent. He therefore broke open the treasuries of the various temples, and sent the gold and silver found therein to Umman-igâl, king of Elam, and made an agreement with him to make war upon Aššur-bani-apli.

The struggle which followed was long and severe, but the Assyrians were in the end victorious, the result being that in the year 648 B.C. Babylon was taken, and Saosduchinos, fearing to fall into the hands of the Assyrians, set fire to his palace and was burnt to death.

Šamaš-šum-ukin or Saosduchinos was succeeded by Kandalann or Kineladanos, who reigned twenty-two years (647-625 B.C.), but of his reign nothing is known.⁴

Kineladanos was apparently succeeded by the Assyrian king Aššur-êtil-ilâni, who reigned at least four years. He seems to have been followed by Sin-šarra-iškun, who was king of Assyria as well. This king is evidently the Saracos of Syncellus, of whom it is related that, having heard that a great band of barbarians had come up from the sea to attack him, he sent his general Busalossor (Nabopolassar) to Babylon to resist them. Having arrived there, Busalossor turned against his master, and made alliance with Necho, king of Egypt, and Cyaxares, king of Media. The allied armies are said to have been defeated three times by the Assyrians, but on the arrival of reinforcements the tide of fortune turned, the Assyrian army being routed, and Shalman, brother of the king of Assyria, slain. The siege of Nineveh followed, and lasted over two years, at the end of which time in the spring the Tigris rose so high that a large portion of the city-wall was carried away, and the king of Assyria, seeing that all was over, set fire to his palace and perished in the flames.

After the division of the Assyrian empire amongst the allies, Nabopolassar and his son Nebuchadnezzar made Babylonia the richest and most influential power in the world, and Nebuchadnezzar led the armies of his father against the Egyptians and defeated them. Whilst Nebuchadnezzar was away on this expedition, his father died, and he hastened back to Babylonia to take the crown.

The glory of the name of Nebuchadnezzar II. is well known. He overran the various small kingdoms of Palestine, and in 587 B.C. captured Jerusalem and carried off the people into bondage. He attacked Tyre, but only captured the city (if he took it at all) after a siege of thirteen years (573 B.C.). In the year 572 B.C. Nebuchadnezzar defeated and deposed Hophra, king of Egypt, and set on the throne Ahmes or Amasis, who in the thirty-seventh year of Nebuchadnezzar's reign seems to have revolted against

² This king had reigned, supported on the throne by the arms of Assyria, for six years (699-693 B.C.).

³ For a fuller account of the reign of Esarhaddon, see the corresponding section of the article ASSYRIA.

⁴ Twenty years would probably be nearer the mark, as there seems to have been an interregnum.

him, and Nebuchadnezzar marched to Egypt and defeated him. Nebuchadnezzar, the greatest builder of his time, restored and rebuilt almost all the principal temples and palaces of Babylonia. He died in the year 562 B.C., and was succeeded by his son Amēl-Marduk or Evil-Merodach, a king of a very peaceful disposition. This king, after a short reign of two years, was assassinated by his own brother-in-law, Nergal-larra-usur or Neriglissar, who then took possession of the throne.

Neriglissar was rather advanced in years when he took the reins of government, and reigned only a little over three years. He is not known to have engaged in any warlike expedition. He was succeeded by Labarsoarchodas (Lābāsi-Marduk), who was assassinated after a reign of nine months, and Nabū-na'id, or Nabonidus, son of Nabū-balāt-au-ikbi, raised to the throne (B.C. 556).

Nabonidus was a most unwarlike king, and seems to have given up all the military affairs into the hands of his son Belshazzar, whilst he himself gratified his taste for archaeology by excavating the foundation of all the temples to find the records of ancient kings, and his desire for splendour by restoring the buildings again with great magnificence. Whilst the nation was plunged into mourning for the king's mother, who had died, Cyrus crossed the Tigris below Arbela, to attack a petty king in that neighbourhood. In the year 539 B.C. he began the conquest of Babylonia itself, and his army entered Sippara on the 14th of Tammuz, Babylon being captured two days later by Gobryas. Nabonidus, who had fled, was afterwards captured and brought to Babylon, where on the 11th of Marcheswan he died. Belshazzar is not mentioned by name in the Babylonian annals, but is always spoken of as "the son of the king." His father, Nabonidus, once mentions him in an account of the restoration of a temple at Mekerker, and his name occurs several times in contracts. According to the Bible account, he was feasting with his lords when the enemy entered the city, and was killed. It is probable that it was he, rather than his father, who was real king, though his father alone bore the title of king among the Babylonians. [See BEL-SHAZZAR.]

About 538 B.C. Cyrus found himself completely master of Babylonia, and governed, during the eight or nine years of his reign, with great ability, taking great care to respect the feelings of the people whom he had conquered. His son Cambyases was associated with him during the last two years of his reign.

In the year 527 B.C. Cambyases conquered Egypt; and whilst he was upon this expedition, the Medes revolted, and went over to the standard of Gumatu or Gomatis, one of the Magi, who—personating Bardes (in Babylonian, Barzia), the younger brother of Cambyases, whom that king is said to have secretly murdered—had risen in rebellion. Cambyases left Egypt to quell this revolt, but killed himself, apparently by accident, whilst on the road to Persia. The Pseudo-Barzia or Bardes now took possession of the throne, but was deposed and killed by Darius, who became king of Persia and Babylonia.

The Babylonians now revolted under the leadership of a man named Nidintu-Bēl, who

personated Nebuchadnezzar III., son of Nabonidus. This ruler reigned only one year, being defeated by Darius in two battles, and compelled to flee. Darius, however, having captured him in Babylon, put him to death. Again, about 515 B.C., another pretender, named Arahū, also personating Nebuchadnezzar III., arose, but was besieged in Babylon by Darius's general; and, on the city being taken, was captured and crucified.

After this period Babylonia appears only as a province of the various powers by which it was subjugated, and has no independent history. Once during the reign of Xerxes it tried again, but unsuccessfully, to regain its independence. Its commerce, which had, during the period from the end of the reign of Nabopolassar to the end of that of Darius, been enormous, now declined considerably. The defences and public buildings also suffered much from neglect, the new rulers not having that enthusiasm for the ancient monuments of the glories of the country which the native Babylonian rulers possessed. The observations made by the astrologers in the temple-towers, however, were still continued, and considerable additions were made to the library at Ê-zida (the Birs-Nimroud) during the time of Antiochus Soter, who also restored that building to somewhat of its former magnificence.

The Babylonians were in many ways a peculiar nation, being, in a sense, a prototype of the great Anglo-Saxon race—a number of small kingdoms united at last to form a single state, from which, however, Assyria broke off, and, declaring herself independent, became, from time to time, Babylonia's chief enemy. Babylonia seems, strangely enough, not to have attained any considerable military power until the time of Nebuchadnezzar, her foreign conquests before that time being few and of short duration. The kingdom of Babylon had a more honourable claim than Assyria to the respect of the surrounding nations in that she was renowned more for the arts of peace than for those of war, and the Babylonian language and writings became the diplomatic tongue of the ancient East. Her "godly garments" (Josh. vii. 21) were probably to be found in many a city of the ancient Eastern world, together with a large number of her other products; and her influence, for good or evil, was doubtless widely felt. Probably there were but few who had not heard of the world-renowned tower within her capital (Gen. xi. 4), and who had not been influenced by her religious system, with its mysticism and superstition, worshipping her gods Siccuth, Chiuu (Amos v. 26), Succoth-benoth (2 K. vii. 30), and weeping for Tammuz (Ezek. viii. 15) like the Israelites. Whilst the country was free from invasion, the citizens were most prosperous. Like Tyre, her merchants were princes—small wonder that the land was looked upon with envy by the nations around, as by Judah and Israel (cp. Ezek. xlii. 14, 15). But the prosperity of this great nation soon passed away. "The Lord shall perform His pleasure upon Babylon, and His arm shall be upon the Chaldeans" (Is. xlviii. 14); Chaldaea was to be a spoil (Jer. l. 10); to Babylon and to all the inhabitants of Chaldaea was to be rendered all the evil that they had done to Zion (Jer. li. 24, 25). That land, honoured in being in early

times the dwelling-place of Abraham and his forefathers (Gen. xi. 28; Acta vii. 4), fell a prey first to the Persians and Medes (Dan. v. 29), and then to the Parthians, the Greeks, the Romans, and lastly, the Turkish empire, under the rule of which there is little or no hope for a return to that prosperity which, under the rule of the old native kings, polytheists as they were, it enjoyed. The cities are ruins, the fertilizing canals are all choked up, malarious marshes abound to make the land now but little fit for human habitation. Babylonia, from whom the West has learnt so much, is waiting, with the rest of the ancient East, for a slight return, a participation in some of the advantages which the civilized West now enjoys, and can, and probably will, in the near future, give to that now benighted part of the earth.

For the descriptive portions of Babylon the city, and Babylon the country, see Rich's *Two Memoirs on Babylon*; Ker Porter's *Travels*, vol. ii.; Layard's *Nineveh and Babylon*, chs. xxi., xlii.; Fresnel's *Two Letters to M. Mohl* in the *Journal Asiatique*, June and July 1853; and Loftus's *Chaldaea*, ch. ii. On the architecture and art, Perrot and Chipiez's *History of Art in Chaldaea and Assyria*. On the identifications of the ruins of ancient sites, compare Rawlinson's *Herodotus*, vol. ii., essay iv.; Oppert's *Expédition en Mésopotamie*, and Rennel's *Essay* in Rich's *Babylon and Persepolis*. On the history, compare Smith's *History of Babylonia and Assyrian Discoveries*, chs. xii. and xv.-xix.; Pinches' introduction to the *Guide to the Kouyunjik Gallery*; Rawlinson's *Herodotus*, vol. i., essays vi. and viii., and Hommel's *Geschichte Assyriens und Babyloniens*. [T. G. P.]

BABYLON (Βαβυλών; *Babylon*). The occurrence of this name in 1 Pet. v. 13 has given rise to a variety of conjectures, some of which—such as the identification of it with Jerusalem, Seleucia, or a frontier fort between Upper and Lower Egypt—no longer command attention. There remain two opinions to be considered:—

1. That Babylon denotes Rome. In support of this opinion is brought forward a tradition recorded by Eusebius (*H. E.* ii. 15), on the authority of Papias and Clement of Alexandria, to the effect that 1 Peter was composed at Rome. Oecumenius and Jerome both assert that Rome was figuratively denoted by Babylon; and the uniform, unvarying testimony of early Christian writers is to the effect that Babylon here is a recognised appellation of Rome, the head-quarters of anti-Christian influences. And this opinion, held by Grotius, Lardner, Cave, Whitby, Macknight, Hales, and others, is the opinion generally adopted now (cp. *Speaker's Comm.* and Burger in Strack u. Zöckler's *Kfg. Komm.* in loco).

2. The very natural supposition that by Babylon is intended the old Babylon of Assyria owes its origin to Calvin, to whom it was "a stronghold of popery," and was supported by Lightfoot and Bentley. But Babylon, though largely inhabited by Jews previous to the time of Caligula, was towards the end of that emperor's reign (c. A.D. 40) almost entirely depopulated of its Jewish colony (Jos. *Ant.* xviii. 9, § 8), and it is difficult to suppose that a Christian Church consisting of Hebrew converts could have been

established there in less than a quarter of a century after the catastrophe. [E.]

BABYLON, in the Apocalypse, is the symbolical name by which Rome is denoted (Rev. xiv. 8, xvii., xviii.). The power of Rome was regarded by the later Jews as that of Babylon had been by their forefathers (cp. Jer. li. 7 with Rev. xiv. 8. See *Speaker's Comm.* on xvii. 4), and hence, whatever the people of Israel be understood to symbolize, Babylon represents the antagonistic principle. [REVELATION.] [W. A. W.]

BABYLO'NIANS (בְּבִלְיָנִים [Baer], בַּבְּלֹנִיָּים; Βαβυλωνιοι; *Babylonii*, *fili* *Babylonis*). The inhabitants of Babylon, a race of impure Semitic origin, who were among the colonists planted in the cities of Samaria by the conquering Assyrians (Ezra iv. 9). Later, when the warlike Chaldeans acquired predominance in the 7th cent. B.C., the names Chaldean and Babylonian became almost synonymous (Ezra xiii. 14, 15; cp. Is. xlviii. 14, 20). [W. A. W.]

BABYLO'NISH GARMENT (צִנְיָן מִבָּבֶל, צִנְיָן מִבָּבֶל; *pallium coccineum*), literally "robe of Shinar" (Josh. vii. 21; see *Speaker's Comm.* and Dillmann, ² l. c.). An ample robe probably made of the skin or fur of an animal (cp. Gen. xxv. 25), and ornamented with embroidery, or perhaps a variegated garment with figures inwoven in the fashion for which the Babylonians were celebrated. Josephus (*Ant.* v. 1, § 10) describes it as "a royal mantle (χλαμύδα βασιλευσιν), all woven with gold." Tertullian (*De habitu muliebri*, c. i.) tells us that while the Syrians were celebrated for dyeing, and the Phrygians for patchwork, the Babylonians inwove their colours. For this kind of tapestry work they had a great reputation (Pliny, viii. 74: *Colores diversos picturæ intertexere Babylon maxime celebravit, et nomen imposuit*). Compare also Martial (*Ep.* viii. 28):

"Non ego praetulerim Babylonica picta superbe
Texta, Semiramida quae variantur acu;"

and the *Babylonia peristromata* of Plautus (*Stich.* ii. 2, 54; see also Jos. B. J. vii. 5, § 5; Plut. *M. Cato*, iv. 5). Perhaps some of the trade in these rich stuffs between Babylon and the Phoenicians (Ezek. xxvii. 24) passed through Jericho, as well as the gold brought by the caravans of Sheba, which they may have left in exchange for the products of its fertile soil (Josh. vii. 21). [JERICHO.] Rashi has a story that the king of Babylon had a palace at Jericho, probably founded on the fact that the robe of the king of Nineveh (Jonah iii. 6) is called מִלְּבָנִים, *addereth*. In the *Beresith Rabba* (§ 85, fol. 75, 2, quoted by Gill) it is said that the robe was of Babylonian purple. Another story in the same passage is that the king of Babylon had a deputy at Jericho who sent him dates, and the king in return sent him gifts, among which was a garment of Shinar. Kimchi (on Josh. vii. 21) quotes the opinions of R. Chanina bar R. Isaac that the Babylonish garment was of Babylonian purple, of Rab that it was a robe of fine wool, and of Shmuel that it was a cloak washed with alum, which we learn from Pliny (xxxv. 52) was used in dyeing wool. [W. A. W.]

BACA, THE VALLEY OF (בְּכַחֲמֵי; *κλάς τοῦ κλαυθμῶνος*: A. -*μωρος*; *Vallis lacrymarum*; R. V. text "valley of Weeping;" marg.

[valley of] *ba.sam trees*), a valley somewhere in Palestine, through which the exiled Psalmist sees in vision the pilgrims passing in their march towards the sanctuary of Jehovah at Zion (Ps. lxxiv. 6). The passage is thought by some to contain a play, in the manner of Hebrew poetry, (1) on the name of the trees (בְּכַחֲמֵי; MULBERRY. The balsam when bruised distils a white and bitter "tear"-like sap) from which the valley may possibly have derived its name, and (2) on the "tears" (דִּמְעָה) shed by the pilgrims in their joy at their approach to Zion (see various opinions in Perowne, the *Speaker's Comm.*, Delitzsch¹, and Schultx in Strack u. Zöckler's *Kyf. Komm.* in loco). These tears were so abundant as to turn the dry valley in which the Baccam trees delighted (Niebühr, quoted in Winer, s. v.) into a springy or marshy place (נֶחֱלָה). That the valley was a real locality is most probable, from the use of the definite article before the name (Ges. *Thes.* p. 205). A valley of the same name (وادي البكا) still exists in the

Sinaitic district (Burck. p. 619). Josephus (*Ant.* vii. 4, § 1) calls the "mulberry trees" of 2 Sam. v. 23, the groves of weeping, *ἐν τοῖς ἄλσεσι τοῖς κλαυμένοις κλαυθμῶσι*, thus identifying it with Baca, but the site of this action of David's is uncertain; possibly near Jerusalem.

The rendering of the Targum is Gehenna, i.e. the Ge-Hinnom or ravine below Mount Zion. Hengstenberg, Tholuck, Hupfeld, and Robinson (*Phys. Geog.* p. 113, note) consider the valley to be an idealised and not an actual place.

[G.] [W.]

BACCHIDES (*Bαρχίδης*), a friend of Antiochus Epiphanes (*Joseph. Ant.* xii. 10, § 2) and governor of Mesopotamia (*ἐν τῇ τέρει τοῦ ποταμοῦ*; 1 Macc. vii. 8; *Joseph. l. c.*), who was commissioned by Demetrius Soter to investigate the charges which Alcimus preferred against Judas Maccabaeus. He confirmed Alcimus in the high priesthood; and, having inflicted signal vengeance on the extreme party of the Asidaeans [ASIDEANS], he returned to Antioch. After the expulsion of Alcimus and the defeat and death of Nicanor, he led a second expedition into Judaea. Judas Maccabaeus fell in the battle which ensued at "Eleasa" (B.C. 161; 1 Macc. ix. 5, see note in *Speaker's Comm.*); and Bacchides re-established the supremacy of the Syrian faction (1 Macc. ix. 25, of ἀρεβείν ἄνδρες; *Joe. Ant.* xiii. 1, § 1). He next attempted to surprise Jonathan, who had assumed the leadership of the national party after the death of Judas; but Jonathan escaped across the Jordan. Bacchides then placed garrisons in several important positions, and took hostages for the security of the government. Having completed the pacification of the country" (*Joseph. Ant.* xiii. 1, 5), he returned to Demetrius (B.C. 160). After two years he came back at the request of the Syrian faction, in the hope of overpowering Jonathan and Simon, who still maintained a

small force in the desert; but meeting with ill success, he turned against those who had induced him to undertake the expedition, and sought an honourable retreat. When this was known by Jonathan, he sent envoys to Bacchides and concluded a peace (B.C. 158) with him, acknowledging him as governor under the Syrian king, while Bacchides pledged himself not to enter the land again, a condition which he faithfully observed (1 Macc. vii. ix.; *Joseph. Ant.* xii. 10, 11; xiii. 1). [B. F. W.]

BACCHURUS (*Βάκχουρος*; *Zaccarus*), one of the "holy singers" (*τῶν ἁγῶν ᾄδόντων*) who had taken a foreign wife (1 Esd. ix. 24). No name corresponding with this is traceable in the parallel list in Ezra x. 24, unless the Uri of Ezra has got corrupted into Bacchurus (see *Speaker's Comm.* on 1 Esd. l. c.). [W. A. W.] [F.]

BACCHUS. [DIONYSUS.]

BACE'NOR (*Βαχναρ*; *Bacenor*), apparently a captain of horse in the army of Judas Maccabaeus (2 Macc. xii. 35). Or possibly *τοῦ Βαχναροῦ* may have been the title of one of the Jewish companies or squadrons. [W. A. W.]

BACHRITES, THE (בְּכַרִּי; LXX. [r. 39] omits; *fam. Becheritarum*), the family of BECHER, son of Ephraim (Num. xvi. 35). [W. A. W.]

BADGER-SKINS (עֹרֹת תַּחַשׁ, *ôrôth tēch-âshim*; תַּחַשׁ, *tachash* [*Ezek.* xvi. 10]; BAF. *δέρματα δακτυθία* in Ex. xxv. 5, in Ex. xxxv. 7; *δακτυθῶν*; Aq. and Sym. *ιδύθια* in *Ezek.* xvi. 10; *pelles ianthinae, ianthinus*). The Hebrew *tachash*, which the A. V. renders *badger* [R. V. text "seal," marg. *porpoise*], occurs in connexion with 'ôr, 'ôrôth ("ekiu," "skins"), in Ex. xiv. 5, xvi. 14, xxv. 7, 23, xxxvi. 19; Num. iv. 6, 8, 11, 12, 14, 25. In *Ezek.* xvi. 10 *tachash* occurs without 'ôrôth, and is mentioned as the substance out of which women's shoes were made; in the former passages the *tachash skins* are named in relation to the Tabernacle, ark, &c., and appear to have formed the exterior covering of these sacred articles. There is much obscurity as to the meaning of the word *tachash* (see many opinions collected by Rüdiger in *Gen. Thes.* s. v.), although, as we shall see, there is reasonable ground for believing it to mean some of the marine mammalia, as the dugongs and seals found in the Red Sea, the skins of which are much used by the Arabs. The ancient Versions seem nearly all agreed that it denotes not an animal, but a colour, either black or sky-blue; and amongst critics who adopt this interpretation are Bochart (*Hieroz.* ii. 387), Rosenmüller (*Schol. ad V. T.*, Ex. xxv. 5; *Ezek.* xvi. 10), Bynæus (*de Calceis Hebraeorum*, lib. i. ch. 3), Scheuchzer (*Phys. Sacr.* in Ex. xxv. 5), Parkhurst (*Heb. Lex.* s. v.), who observes that "an outermost covering for the Tabernacle of azure or sky-blue was very proper to represent the sky or azure boundary of the system." Some Versions, as the German of Luther and the A. V., led apparently by the Chaldee, and perhaps by a certain similarity of sound between the words *tachash*, *tazus*, *dachs*,

¹ In 1 Macc. ix. 57, his return seems to be referred to the death of Alcimus.

² בְּכַחֲמֵי. "tazus, sic dictus quia gaudet et euperbit in coloribus multis" (Buxtorf, *Lex. Rab.* s. v.).

have supposed that the badger (*Meles taxus*) is denoted. The badger (*Meles taxus*) of naturalists is found in the hilly parts of Palestine, concealing itself in burrows; and though a nocturnal and very shy animal, it must be rather common, as not only have I three times procured it myself, but we frequently found traces of it, and often saw the skins exposed for sale in saddlers' shops. The Palestine species is identical with the English, but there is no reason to think that it could be sufficiently common in the Sinaitic Peninsula, if it exist there at all, to have provided an outer covering for the Tabernacle. Others, as Gesner and Harenberg (in *Musæo Brem.* ii. 312), have thought that the jackal, known by the Greek name *θῆς* and the Arabic *Shaghu*, is intended. Hasæus (in *Dissert. Philolog. Sylloge*, diss. ix. § 17), Büsching (in his preface to the Epitome of Scheuchzer's *Physica Sacra*), Sebald Ran (*Comment. de iis quæ ex Arab. in usum Tabernac. fuerunt repetita*, Traj. ad Rheu. 1753, ch. ii.), and Dr. Geddes (*Crit. Rem. Ex. xxv.* 5), are in favour of *tachash* representing some kind of seal or other marine mammalian. Gesenius understands some "kind of seal or badger, or other similar creature." Fried. Delitzsch (*Prolegg. eines neuen Hebr.-Aram. Wörterbuchs z. A. T.*, p. 77, &c.) identifies the *tachash* with the Assy. *tahšu*, the sheep with whose skin the Assyrians lined their boats (Herod. i. 194). Of modern writers, Col. H. Smith (*Encyc. Bib. Lit.*, art. *Badger*), with much plausibility, conjectures that *tachash* refers to some ruminant of the Aigocerine or Damaline groups, as these animals are known to the natives under the names of *pacasse*, *thacasse* (varieties, he says, of the word *tachash*), and have a deep grey, or slaty (*hyginus*) coloured skin. Dr. Robinson on this subject (*Bib. Res.* i. 171) writes, "The Superior of the convent at Sinai procured for me a pair of the sandals usually worn by the Bedouin of the peninsula, made of the thick skin of a fish which is caught in the Red Sea. The Arabs round the convent called it *Turs*, but could give no further account of it than that it is a large fish, and is eaten. It is a species of *Halicore*, named by Ehrenberg" (*Symb. Phys.* ii.) *Halicore hemprichii*. The skin is clumsy and coarse, and might answer very well for the external covering of a Tabernacle which was constructed at Sinai, but would seem hardly a fitting material for the ornamental sandals belonging to the costly attire of high-born dames in Palestine, described by the prophet Ezekiel."

It is difficult to understand why the ancient Versions have interpreted the word *tachash* to mean a colour (an explanation which has, as Gesenius remarks, no ground either in the etymology or in the cognate languages), unless it be that they understood by the word something capable of taking a blue tint, and that thus the *tachash* became synonymous with that tint. Whatever is the substance indicated by *tachash*, it is evident from Ex. xiv. 23, that it was some material in frequent use among the Israelites during the Exodus, and the construction of the sentences where the name occurs (for the word

^b According to Ehrenberg, the Arabs on the coast call this animal *Naka* and *Lottum*. Arabian naturalists applied the term *ensan alma*, "man of the sea," to this creature.

gróth, "skins," is always, with one exception, repeated with *tachash*, seems to imply that the skin of some animal, and not a colour, is denoted by it. The fact of the Arabs of Sinai

giving the name *tucash*, *تخس*, identical with the Hebrew, to the various species of dugongs and seals of the Red Sea, and also using their hides as leather, while they distinguish the dolphin as *delfin*, seems to point pretty clearly to the dugong skin as the one intended in the Pentateuch (see Dillmann^a on Exod. xxv. 5). But as *tachash* probably included the seal, there is no difficulty in supposing that Jewish ladies made their slippers of seal-skin. This would obviate the objection suggested by Robinson.

The dugongs are a singular group of marine herbivorous mammalia, having affinities with the *Cetacea*, or whale tribe, with the seals, and in some respects with the *Pachydermata*, or thick-skinned quadrupeds. They are found off the shores of the Indian Ocean from Australia to the Cape; frequenting the mouths of rivers; and are easily caught, as they never leave the shallow water, where they graze on seaweed. They are ordinarily from twelve to twenty feet in length, but sometimes considerably exceed these measurements. The species from the coral beds of the Red Sea, described by Rüppell (*Mus. Sench.* i. 95-114) as *Halicore tabernaculi*

Halicore tabernaculi, with enlarged drawing of the head.

(Pl. vi.), is probably identical with Ehrenberg's species, *Halicore hemprichii*. Pliny (*H. N.* ii. 55) says that seal-skins were used as coverings for tents.

[W. H.] [H. B. T.]

BAG is the rendering of several words in the Old and New Testaments. 1. *בָּגָז*; *σάκος*: *saccus*: the "bags" in which Naaman bound up the two talents of silver for Gehazi (3 K. v. 23), probably so called, according to Gesenius, from their long, cone-like shape. The word only occurs besides in Is. iii. 22 (A. V. "cripping-pins") and there denotes the reticules [R. V. "satchels"] carried by the Hebrew ladies. 2. *בֶּגֶד*; *μαρτύριον*; *sacculus*, *saccellus*: a bag for carrying weights (Dent. xiv. 13; Prov. xvi. 11;

Mic. vi. 11), also used as a purse (Prov. i. 14; Is. xlv. 6). 3. **קֶבֶץ**; *kaddion*; *pera*: translated "bag" in 1 Sam. xvii. 40, 49, is a word of most general meaning, and is generally rendered "vessel" or "instrument." In Gen. xli. 25 it is the "sack" [R. V. "vessel"] in which Jacob's sons carried the corn which they brought from Egypt, and in 1 Sam. ix. 7, xxi. 5, it denotes a bag or wallet for carrying food (A. V. and R. V. "vessel"; cp. Jud. i. 5, xiii. 10, 15). The shepherd's "bag" which David had seems to have been worn by him as necessary to his calling, and was probably, from a comparison of Zech. xi. 15, 16 (A. V. and R. V. "instruments"), used for the purpose of carrying the lambs which were unable to walk or were lost, and contained materials for healing such as were sick and binding up those that were broken (cp. Ezek. xxxiv. 4, 16). 4. **קֶבֶץ**; *ἐνδομας*, *δομας*; *sacculus*: properly a "bundle" (Gen. xlii. 35; 1 Sam. xiv. 29), appears to have been used by travellers for carrying money during a long journey (Prov. vii. 20; Hag. i. 6; cp. Luke xii. 33; Tob. ix. 5). In such "bundles" the priests bound up the money which was contributed for the restoration of the Temple under Jehoiada (2 K. xii. 10, Heb. v. 11; יִצְרָאֵל, A. V. "put up in bags," so R. V. in text; in marg. *bound up*, omitting "in bags"). The "bag" (*γλωσσόκομος*; *loculi*) which Judas carried was probably a small box or chest (John xii. 6, xiii. 29). The Greek word is the same as that used in the LXX. for "chest" in 2 Ch. xxiv. 8, 10, 11, and originally signified a box used by musicians for carrying the mouth-pieces of their instruments (see Liddell and Scott *Lex.* s. v.). [W. A. W.] [F.]

BAG'O (B. *Barai*, A. *Bayó*; Vulg. omits), 1 Esd. viii. 40; head of one of the families who went up with Ezra from Babylon in the reign of king Artaxerxes; called Bagol in 1 Esd. v. 14, and Bigvai in Ezra viii. 14. [W. A. W.] [F.]

BAGO'AS (*Bayóas*; *Bagoas*, *Vagao*), Judith xii. 11. The name is said to be equivalent to eunuch in Persian (Plin. *H. N.* xiii. 4, 9. Cp. Burmann *ad* Ovid, *Am.* ii. 21), and may be related to Bigvai (see Ball in *Speaker's Comm.* on Judith xii. 11). [B. F. W.] [F.]

BAG'OI (A. *Bayói*, B. *Bogái*; *Zovoar*), 1 Esd. v. 14; called Bago in 1 Esd. viii. 40. His descendants went back to Jerusalem with Zerubbabel after the Captivity. [BIGVAI.] [F.]

BAHARUM'ITE, THE. [BAHURIM.]

BAHUR'IM (**בְּחֻרִים** and **בְּחֻרִים**; A. *Baoupeim* [usually]; B. in 2 Sam. iii. 16, *Bapakel*; in xvi. 5, *Boupeim*; in xix. 16, *Baoupeim*; in xvii. 18, *Bapeli*; in 1 K. ii. 8, B. *Baoupeim*, A. *Baá*; Jos. *Bayouph* and *Baouph*; *Bahurim*), a village, the eight notices remaining of which connect it almost exclusively with the flight of David. It was apparently on, or close to, the road leading from the Jordan valley up to Jerusalem. Shimei the son of Gera resided here (2 Sam. xvii. 18; 1 K. ii. 8), and from the village, when David, having left the "top of the mount" behind him, was making his way down the eastern slopes of Olivet into the Jordan valley below, Shimei issued forth, and running along (Joseph. *Διατρέχων*)

on the side or "rib" of the hill over against the king's party, flung his stones, dust, and foul abuse (xvi. 5), with a virulence which is to this day exhibited in the East towards fallen greatness however eminent it may previously have been. Here in the court of a house was the well in which Jonathan and Ahimaz eluded their pursuers (xvii. 18). In his account of the occurrence, Josephus (*Ant.* vii. 9, § 7) distinctly states that Bahurim lay off the main road (*καθ' ἑκτραπέντες τῆς ὁδοῦ*), which agrees well with the account of Shimei's behaviour. Here Phaltiel, the husband of Michal, bade farewell to his wife when on her return to king David at Hebron (2 Sam. iii. 16). Bahurim must have been very near the south boundary of Benjamin, but it is not mentioned in the lists in Joshua, nor is any explanation given of its being Benjaminite, as from Shimei's residing there we may conclude it was. Dr. Barclay conjectures that the place lay where some ruins still exist close to a *Wady Rúabeh*, which runs in a straight course for 3 miles from Olivet directly towards Jordan, offering the nearest though not the best route (Barclay, pp. 563-4). Tobler (*Topog.* ii. 763) identifies it with *Om Rásrá*, more correctly *Kh. el Murussus*, on the right of the road from Jerusalem to Jericho; Antoninus (*Itin.* xvi.) describes it as being "not far from Jerusalem," and if he followed the Roman road from Jericho it must have been near *El 'Aisáwiyeh*.
